PROCEEDINGS AND DEBATES OF THE 80th CONGRESS, SECOND SESSION

SENATE

TUESDAY, JANUARY 6, 1948

The 6th of January being the day provided by Public Law No. 358, Eightieth Congress, first session, for the meeting of Congress, the second session of the Eightieth Congress commenced this day.

The Senate assembled in its Chamber at the Capitol.

ARTHUR H. VANDENBERG, a Senator from the State of Michigan, President pro tempore of the Senate, called the Senate to order at 12 o'clock meridian.

The Chaplain, Rev. Peter Marshall, D. D., offer the following

PRAYER

Our Father, who art Lord of heaven and of all the earth, Thou knowest the difficulties these men have to face and the grave decisions they must make.

Have mercy upon them, for Jesus' sake. Amen.

CALL OF THE ROLL

Mr. WHERRY. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk (Edward E. Mansur, Jr.) called the roll, and the following Senators answered to their names:

Aiken	Hill	Robertson, Va.
Baldwin	Hoey	Robertson, Wyo.
Ball	Holland	Russell
Barkley	Ives	Saltonstall
Brewster	Jenner	Sparkman
Bricker	Johnson, Colo.	Stennis
Buck	Johnston, S. C.	Stewart
Bushfield	Knowland	Taft
Cain	Langer	Taylor
Capper	Lodge	Thomas, Okla.
Chavez	Lucas	Thomas, Utah
Connally	McCarran	Thye
Donnell	McClellan	Tobey
Dworshak	McFarland	Tydings
Ecton	McKellar	Umstead
Ferguson	Martin	Vandenberg
Flanders	Millikin	Watkins
George	Moore	Wherry
Green	Murray	Wiley
Gurney	O'Conor	Williams
Hatch	O'Daniel	Wilson
Hayden	Reed	Young
Hickenlooper	Revercomb	

Mr. WHERRY. I announce that the Senator from New Hampshire [Mr. BRIDGES], the Senator from New Jersey [Mr. HAWKES], the Senator from Wisconsin [Mr. MCCARTHY], and the Senator from Oregon [Mr. MORSE] are necessarily absent on official business of the Senate.

The Senator from Illinois [Mr. BROOKS] is necessarily absent on official business.

The Senator from Nebraska [Mr. BUTLER] and the Senator from Nevada [Mr. MALONE] are necessarily absent on official committee business.

The Senator from Indiana [Mr. CAPEHART] and the Senator from Kentucky [Mr. COOPER] are necessarily absent.

The Senator from Oregon [Mr. CORDON] is necessarily absent on official business of the Committee on Public Lands.

The Senator from Missouri [Mr. KEM] is unavoidably detained.

The Senator from New Jersey [Mr. SMITH] is detained because of illness.

Mr. LUCAS. I announce that the Senator from Virginia [Mr. BYRD], the Senator from California [Mr. DOWNEY], the Senator from Louisiana [Mr. ELLENDER], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from West Virginia [Mr. KILGORE], the Senator from Washington [Mr. MAGNUSON], the Senator from South Carolina [Mr. MAYBANK], the Senator from Rhode Island [Mr. MCGRATH], the Senator from Connecticut [Mr. MCMAHON], the Senator from Pennsylvania [Mr. MYERS], the Senator from Louisiana [Mr. OVERTON], and the Senator from Florida [Mr. PEPPER] are absent on public business.

The Senator from Mississippi [Mr. EASTLAND] is absent on official business at one of the Government departments.

The Senator from Wyoming [Mr. O'MAHONEY] and the Senator from New York [Mr. WAGNER] are necessarily absent.

The PRESIDENT pro tempore. Sixty-eight Senators having answered to their names, a quorum is present.

LIST OF SENATORS BY STATES

Alabama.—Lister Hill and John Sparkman.

Arizona.—Carl Hayden and Ernest W. McFarland.

Arkansas.—John McClellan and J. William Fulbright.

California.—Sheridan Downey and William F. Knowland.

Colorado.—Edwin C. Johnson and Eugene D. Millikin.

Connecticut.—Brien McMahon and Raymond E. Baldwin.

Delaware.—Clayton Douglass Buck and John J. Williams.

Florida.—Claude Pepper and Spessard L. Holland.

Georgia.—Walter F. George and Richard B. Russell.

Idaho.—Glen H. Taylor and Henry C. Dworshak.

Illinois.—Scott W. Lucas and C. Wayland Brooks.

Indiana.—Homer E. Capehart and William E. Jenner.

Iowa.—George A. Wilson and Bourke B. Hickenlooper.

Kansas.—Arthur Capper and Clyde M. Reed.

Kentucky.—Alben W. Barkley and John Sherman Cooper.

Louisiana.—John H. Overton and Allen J. Ellender.

Maine.—Wallace H. White, Jr., and Owen Brewster.

Maryland.—Millard E. Tydings and Herbert R. O'Conor.

Massachusetts.—Leverett Saltonstall and Henry Cabot Lodge, Jr.

Michigan.—Arthur H. Vandenberg and Homer Ferguson.

Minnesota.—Joseph H. Ball and Edward J. Thye.

Mississippi.—James O. Eastland and John C. Stennis.

Missouri.—Forrest C. Donnell and James P. Kem.

Montana.—James E. Murray and Zales N. Ecton.

Nebraska.—Hugh Butler and Kenneth S. Wherry.

Nevada.—Pat McCarran and George W. Malone.

New Hampshire.—Styles Bridges and Charles W. Tobey.

New Jersey.—Albert W. Hawkes and H. Alexander Smith.

New Mexico.—Carl A. Hatch and Dennis Chavez.

New York.—Robert F. Wagner and Irving M. Ives.

North Carolina.—Clyde R. Hoey and William B. Umstead.

North Dakota.—William Langer and Milton R. Young.

Ohio.—Robert A. Taft and John W. Bricker.

Oklahoma.—Elmer Thomas and E. H. Moore.

Oregon.—Guy Cordon and Wayne Morse.

Pennsylvania.—Francis J. Myers and Edward Martin.

Rhode Island.—Theodore Francis Green and J. Howard McGrath.

South Carolina.—Burnet R. Maybank and Olin D. Johnston.

South Dakota.—Chan Gurney and Harlan J. Bushfield.

Tennessee.—Kenneth McKellar and Tom Stewart.

Texas.—Tom Connally and W. Lee O'Daniel.

Utah.—Elbert D. Thomas and Arthur V. Watkins.

Vermont.—George D. Aiken and Ralph E. Flanders.

Virginia.—Harry Flood Byrd and A. Willis Robertson.

Washington.—Warren G. Magnuson and Harry P. Cain.

West Virginia.—Harley M. Kilgore and Chapman Revercomb.

Wisconsin.—Alexander Wiley and Joseph R. McCarthy.

Wyoming.—Joseph C. O'Mahoney and Edward V. Robertson.

LEGISLATIVE PROGRAM

Mr. WHERRY. Mr. President, I think it well to announce that it will be the intention to follow the precedent established as a matter of courtesy to the President of the United States that the Senate transact no business in the way of the introduction of bills or resolutions and take no action on any matter other than the adoption of the necessary privileged resolutions incident to the opening of a session until the President shall have delivered his annual message.

It is my understanding that the President's message will be ready for presentation tomorrow at 1:30 o'clock p. m. Therefore, it is my purpose to move, after the conclusion of the routine business today, that the Senate adjourn until tomorrow at 1 o'clock p. m.

It is the intention to have the Senate reconvene immediately after the President's message shall have been delivered, when the Senate will proceed with business, at which time the introduction of bills or resolutions or the transaction of any other business will be in order.

NOTIFICATION TO THE PRESIDENT OF THE UNITED STATES

Mr. WHERRY submitted the following resolution (S. Res. 182), which was read, considered by unanimous consent, and agreed to:

Resolved, That a committee consisting of two Senators be appointed to join such committee as may be appointed by the House of Representatives to wait upon the President of the United States and inform him that a quorum of each House is assembled and that the Congress is ready to receive any communication he may be pleased to make.

Under the foregoing resolution, the President pro tempore appointed Mr. WHERRY and Mr. BARKLEY the committee on the part of the Senate.

NOTIFICATION TO THE HOUSE OF REPRESENTATIVES

Mr. BARKLEY submitted the following resolution (S. Res. 183), which was read, considered by unanimous consent, and agreed to:

Resolved, That the Secretary inform the House of Representatives that a quorum of the Senate is assembled and that the Senate is ready to proceed to business.

HOUR OF DAILY MEETING

Mr. WHERRY submitted the following resolution (S. Res. 184), which was read, considered by unanimous consent, and agreed to:

Resolved, That the hour of daily meeting of the Senate be 12 o'clock meridian unless otherwise ordered.

ADJOURNMENT

Mr. WHERRY. I move that the Senate adjourn until 1 o'clock p. m. tomorrow.

The motion was agreed to; and (at 12 o'clock and 16 minutes p. m.) the Senate adjourned until tomorrow, Wednesday, January 7, 1948, at 1 o'clock p. m.

HOUSE OF REPRESENTATIVES

TUESDAY, JANUARY 6, 1948

This being the day fixed by Public Law 358, Eightieth Congress, enacted pursuant to the twentieth amendment to the Constitution for the meeting of the second session of the Eightieth Congress, the Members of the House of Representatives of the Eightieth Congress met in their Hall, and at 12 o'clock noon were called to order by the Speaker, Hon. JOSEPH W. MARTIN, JR., a Representative from the State of Massachusetts.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following

PRAYER

Thou blessed Lord, the way, the truth, and the life, our times are in Thine hands. Where human judgment misleads, where emotion withers and the will of man seems a broken reed, be Thou our guiding light and lead us on. Take away our mantle of self-esteem; cast aside all hurtful differences and widening conflicts which threaten the safety and security of a strong America and a peaceful world.

"I beseech you, therefore, brethren, by the mercies of God, that ye present your bodies a living sacrifice, holy, acceptable unto God, which is your reasonable service. And be not conformed to this world: but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God."

Let us pray together our Lord's Prayer:

Our Father, who art in heaven, hallowed be Thy name. Thy kingdom come. Thy will be done, on earth as it is in heaven. Give us this day our daily bread. And forgive us our trespasses, as we forgive those who trespass against us. And lead us not into temptation, but deliver us from evil. For Thine is the kingdom, and the power, and the glory for ever and ever.

Amen.

RESIGNATION OF A MEMBER

The SPEAKER laid before the House the following communication, which was read by the Clerk:

DECEMBER 30, 1947.

Hon. JOSEPH W. MARTIN, Jr.,
Speaker, House of Representatives,
Washington, D. C.

MY DEAR MR. SPEAKER: This is to advise you that I have this date tendered to the Governor of New York my resignation as Representative of the Twenty-fourth Congressional District of the State of New York in the Congress of the United States, such resignation to take effect as of midnight of December 31, 1947.

Sincerely yours,

BENJAMIN J. RABIN.

CALL OF THE ROLL

The SPEAKER. The Clerk will call the roll to determine whether a quorum is present.

The Clerk called the roll, and the following Members answered to their names:

[Roll No. 1]

Abernethy	Almond	Andrews, Ala.
Albert	Andersen, H. Carl	Andrews, N. Y.

The SPEAKER. On this roll call 313 Members have answered to their names. A quorum is present.

PROVIDING FOR RECESS TOMORROW

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that on tomorrow, Wednesday, January 7, 1948, it may be in order for the Speaker to declare a recess at any time subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

COMMITTEE TO NOTIFY THE PRESIDENT OF THE UNITED STATES

Mr. HALLECK. Mr. Speaker, I offer a resolution (H. Res. 415) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That a committee of three Members be appointed by the Speaker on the part of the House of Representatives to join with a committee on the part of the Senate to notify the President of the United States that a quorum of each House has assembled and Congress is ready to receive any communication that he may be pleased to make.

The resolution was agreed to.

The SPEAKER. The Chair appoints as members of the committee on the part of the House to join with a committee on the part of the Senate to notify the President of the United States that a quorum of each House has been assembled and that the Congress is ready to receive any communications he may be pleased to make, the gentleman from Indiana [Mr. HALLECK], the gentleman from Illinois [Mr. ALLEN], and the gentleman from Texas [Mr. RAYBURN].

NOTIFICATION TO THE SENATE

Mr. KNUTSON. Mr. Speaker, I offer a resolution (H. Res. 416) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That the Clerk of the House inform the Senate that a quorum of the House is present and that the House is ready to proceed with business.

The resolution was agreed to.

REPORT OF COMMITTEE TO NOTIFY THE PRESIDENT

Mr. HALLECK. Mr. Speaker, your committee on the part of the House to join a like committee on the part of the Senate to notify the President of the United States that a quorum of each House has been assembled and is ready to receive any communications that he may be pleased to make has performed that duty. The President asked us to report that he will be pleased to deliver his message at 1:30 o'clock p. m. January 7, 1948, to a joint session of the two Houses.

DAILY HOUR OF MEETING

Mr. ALLEN of Illinois. Mr. Speaker, I offer a resolution (H. Res. 417) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That until otherwise ordered, the daily hour of meeting of the House of Representatives shall be at 12 o'clock meridian.

The resolution was agreed to.

JOINT SESSION OF THE HOUSE AND SENATE

Mr. HALLECK. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 130) and ask for its immediate consideration.

The Clerk read as follows:

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Wednesday, January 7, 1948, at 1:30 o'clock in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make to them.

The resolution was agreed to.

CALENDAR WEDNESDAY

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that business in order on Calendar Wednesday of this week may be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

EXTENSION OF REMARKS

Mr. SMITH of Wisconsin asked and was granted permission to extend his remarks in the RECORD in two instances and to include editorials.

Mr. ROSS asked and was granted permission to extend his remarks in the RECORD and include an editorial.

INVESTIGATE FUEL OIL SHORTAGE

Mr. ROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROSS. Mr. Speaker, the fuel oil shortage in the northeastern seaboard area has reached a serious stage. It is particularly serious in metropolitan New York. During the most severe snowstorm New York City has ever experienced, hundreds of large apartment houses, as well as individual homes, were without heat for days.

Fuel oil supplies were just not adequate. Black markets have sprung up and price gouging has become rampant. I have received reports of consumers being charged double what they paid 3 weeks ago. Veterans living in flimsily constructed temporary houses, most of the houses not even weather stripped and all supplied with oil-burning stoves, are, when they can get it, forced to pay 7 to 10 cents more a gallon for kerosene than was the price on December 15.

I urge that the proper House committee make an immediate sweeping investigation of the entire fuel-oil situation. Let us find out if there is a genuine shortage of fuel oil in this country. If there is, why and who is responsible? Is the shortage on the eastern seaboard because of a transportation bottleneck as some claim? If so, let us take action to see that this bottleneck is broken.

Another severe snowstorm or prolonged period of subzero weather in the New York City area could be disastrous unless adequate fuel oil is assured. Let us not fiddle while we have no fuel oil to burn.

HON. SAM RAYBURN

Mr. HALLECK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no opjection.

Mr. HALLECK. Mr. Speaker, I have asked for this time in order to say to my colleagues in the House that today is the birthday of our very esteemed and most highly respected Member the gentleman from Texas [Mr. RAYBURN].

I am not quite sure just which anniversary this day marks. Possibly if I did know I would not say. However, I must make the statement that instead of his getting older he seems to me to be getting younger every day. We are all happy about that. Of course, I do not want him to get too vigorous because I have enough trouble with him on occasions now.

Mr. Speaker, we enter upon this final session of the Eightieth Congress with great and momentous problems confronting us. Undoubtedly there will be many times when the minority leader and I will not see things quite alike, but I am quite sure that in all the days to come there will be that fine comradeship, sportsmanship and spirit of fair play that has always characterized our relations.

Mr. COX. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. COX. Mr. Speaker, I am very happy that recognition of this important event should have first been taken by the majority leader of this House.

I think I know this distinguished American to whom he pays tribute quite as well as any Member of this body. I know that every piece of timber used in the structure is sound. There is not a faulty piece in it.

Mr. Speaker, I have served here for many years. I am confident I do not exaggerate when I say that during the time I have been a Member of this body there is not one who has come or gone who has held and enjoyed a larger measure of the confidence and the affection of his colleagues than has SAM RAYBURN. Sam is gentle, strong; he is wise and good; he is truly, Mr. Speaker, a very great American, and I am happy to join with my colleagues in saluting him on this occasion.

Mrs. BOLTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Mrs. BOLTON. Mr. Speaker, it is perhaps a little out of order for a second Member of the Republican group to rise to express appreciation of the man whose birthday it is today, but I cannot refrain from so doing. We, on our side, have learned during the years that he is not only a Member of Congress and a statesman but he is also a man of vision, a

man who recognizes the very grave responsibilities that this country has been hurled into, a man who is willing to assume responsibility, a man with whom one can counsel without fear of partisan advice or partisan attitude. Nor does he fail to look at the question under discussion from the widest possible angle. Recognizing the need of the world for mutual understanding, knowing how important it is that the issues coming before this House and before the other body be considered with careful, cooperative consideration and cold-blooded reasoning, he makes his contribution to this end with humility, clear vision, and the courage of action.

I congratulate you, Mr. RAYBURN, on your birthday. I trust the years will rest easily upon you, and I hope that you may have many more among us.

EXTENSION OF REMARKS

Mr. WELCH asked and was given permission to extend his remarks in the RECORD.

Mr. BUFFETT asked and was given permission to extend his remarks in the RECORD in two instances and include editorial matter.

Mr. WEICHEL asked and was given permission to extend his remarks in the RECORD in two instances.

Mr. HESELTON asked and was given permission to extend his remarks in the RECORD and include an address delivered by his colleague, CHRISTIAN A. HERTER, over the ABC radio network last night with reference to his bill H. R. 4579.

Mr. BENDER asked and was given permission to extend his remarks in the RECORD and include an address by the Honorable Alexander L. De Maioribus.

Mr. ELLIS asked and was given permission to extend his remarks in the RECORD in three instances and include in each, newspaper articles.

Mr. MERROW asked and was given permission to extend his remarks in the RECORD and include a radio address delivered by him over the NBC radio network.

Mr. PHILLIPS of California asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. EDWIN ARTHUR HALL asked and was given permission to extend his remarks in the RECORD and include a radio address.

Mr. SNYDER asked and was given permission to extend his remarks in the RECORD.

Mr. McDONOUGH asked and was given permission to extend his remarks in the RECORD and include an address delivered by the Governor of California, Hon. Earl Warren.

Mr. ARENDS asked and was given permission to extend his remarks in the RECORD and include a Republican broadcast last night participated in by Chairman Reece of the Republican National Committee, Speaker Martin, Majority Leader Halleck, Senator Taft, and Senator Millikin.

Mr. LODGE asked and was given permission to extend his remarks in the RECORD and include an article by Sumner Welles.

Mr. HARNESS of Indiana asked and was given permission to extend his remarks in the RECORD in two instances; to include in one an editorial appearing in the Fort Wayne (Ind.) News-Sentinel, and in the other an address he delivered before the surgeons and physicians committee in Chicago.

Mr. BRADLEY asked and was given permission to extend his remarks in the RECORD and include an editorial.

SPECIAL ORDERS GRANTED

Mr. MASON. Mr. Speaker, I ask unanimous consent that on Monday next, at the conclusion of the legislative program of the day and following any special orders heretofore entered, I may be permitted to address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent that on Tuesday next, at the conclusion of the legislative program of the day and following any special orders heretofore entered, I may be permitted to address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PANAMA CANAL

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BRADLEY. Mr. Speaker, the Seventy-ninth Congress enacted Public Law 280, which empowered the Governor of the Panama Canal to make studies of the present Panama Canal, of its future possibilities, and of other possible canal locations.

The Governor has submitted a report of this study, a report which advocates the replacement of the present canal by a sea-level canal at an expense of some $2,500,000,000.

The Republic of Panama has just unanimously refused to ratify a treaty with the United States which would have allowed us to maintain strategic bases within Panamanian territory for the protection of the Canal.

The United States is withdrawing its forces from all outlying bases in the Republic of Panama.

This series of events presents a most serious problem to the United States. The continued functioning of a canal from the Atlantic to the Pacific is a matter of vital importance to us and to the world as a whole. Certainly it would be the height of foolishness to commence the expenditure of billions of dollars to modify the present canal or to construct a new sea-level model if, due to our exclusion from the use of Panamanian soil for defense bases, we cannot properly defend the Canal Zone and its installations. Certainly it would be ridiculous to even consider the investment of more billions in Panama, even if we can protect our interests, unless we are convinced through thorough study by competent and experienced officers of the various branches of the national defense services, that such an immense investment is justified by real necessity. Certainly in these days when we are being asked to put up untold sums for the relief and rehabilitation of other parts of the world, we should not lightly enter into further commitments without deep thought and the exploration of every detail connected with the proposed work.

With these thoughts in mind, I have introduced a bill which would create an Interoceanic Canals Commission, composed of commissioners drawn from the armed services and civilian life, for the purpose of thoroughly exploring the whole canal problem and of making recommendations in the premises. I am aware that many other commissions and boards have covered this field in the past but we have so many new developments, such as the atomic bomb, marked increase in the size of ships, air transport and air combat, the refusal of the Republic of Panama to allow us sites in its territory for the defense of the canal, the expected increase in world waterborne commerce within the next few decades, that I believe another commission is needed to take recognition of all these vital factors.

In matters of this magnitude we should make haste slowly. I hope the Congress will see fit to create a new Interoceanic Canals Commission from the viewpoint of economy, national safety, and common sense.

EXTENSION OF REMARKS

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD on two subjects and include excerpts in each.

Mr. O'HARA asked and was given permission to extend his remarks in the RECORD in two particulars and include certain newspaper editorials.

Mr. GROSS asked and was given permission to extend his remarks in the RECORD and include an article written by Samuel B. Pettengill entitled "Plug This Rat Hole."

Mr. POTTS asked and was given permission to extend his remarks in the RECORD and include a radio address he made on the Panama Canal.

Mr. BYRNES of Wisconsin asked and was given permission to extend his remark in the RECORD in two instances and include editorials in each.

Mr. SHORT. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a most enlightening and admirable statement by Harvey S. Firestone, Jr.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. LANE asked and was given permission to extend his remarks in the RECORD in two instances and include in one an editorial that appeared in last Sunday's Boston Post.

Mr. DONOHUE asked and was given permission to extend his remarks in the RECORD and include a radio speech delivered by him.

Mr. PHILBIN asked and was given permission to extend his remarks in the RECORD and include certain editorials and comments.

Mr. PRICE of Illinois asked and was given permission to extend his remarks in the RECORD and include an address delivered in Chicago by Hon. William O. Douglas.

Mr. HUBER asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. LUDLOW asked and was given permission to extend his remarks in the RECORD in two instances and include excerpts in both.

Mr. KEFAUVER (at the request of Mr. GORE) was given permission to extend his remarks in the RECORD in two instances and include excerpts from certain newspapers.

Mr. BLAND. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an article entitled "Shipping—Foreign Trade," by Stanley Ferguson, and further to extend my remarks in the RECORD and include an article entitled "The Panama Canal—Operations or Engineering?" which appeared in the United States Naval Institute proceedings of December 1947. I am advised by the Public Printer that the article included in the second extension will make three and one-third pages of the CONGRESSIONAL RECORD, at a cost of $260.34, but I ask that these articles be printed notwithstanding that fact.

The SPEAKER. Without objection, notwithstanding the cost, the extensions may be made.

There was no objection.

Mr. LYLE asked and was given permission to extend his remarks in the RECORD.

Mr. ALLEN of Illinois asked and was given permission to extend his remarks in the RECORD and include a statement made by a veteran news commentator, George E. Reedy, over station WOL this morning.

LABOR-MANAGEMENT RELATIONS ACT

Mr. OWENS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. OWENS. Mr. Speaker, as chairman of a subcommittee of the Committee on Education and Labor of the House, I have just completed a hearing in Chicago with respect to the strike which has been conducted in that city by Local No. 16 of the International Typographical Union against six of the major newspapers of Chicago. Just as soon as the balance of the exhibits are presented to the subcommittee and the testimony transcribed and analyzed, a complete report will be made to the committee, and in turn to the House. However, at this time I would like to make a few brief remarks.

At the close of the hearing last Friday I complimented the newspapers for the very fair way in which the proceedings of the hearing had been published in Chicago. It was not until I arrived in Washington that I learned for the first time of radio reports and published accounts in certain sections of the country of remarks that were purported to have been made by me when, as a matter of fact, they constituted distortions or abbreviations of my true remarks.

I wish to state right here and now that I am not in favor of the repeal of the Labor-Management Relations Act of 1947. I believe that it is very beneficial to the workers of the country and I so stated at the time of the hearings in Chicago. I then supplemented such a statement by saying that even though the leaders of the ITU might desire to have the Labor-Management Relations Act of 1947 repealed—which would mean the repeal of the entire National Labor Relations Act, because the present act virtually replaced the Wagner Act—that it represented approximately 85,000 workers as compared with the millions of other workers throughout the Nation, but that I would gladly report their stand to the full committee. I also stated that if it were definitely determined that the workers of the Nation, as well as the labor leaders, wanted the act repealed that it was my personal opinion that it should be done, and that other Members of Congress, in my opinion, would feel likewise. However, I added emphatically a number of times during the course of the hearing that the Labor-Management Relations Act of 1947 (Taft-Hartley law) was very beneficial to the workers of the Nation. I stated that when the original labor act was passed by Congress that it was done for the purpose of equalizing the rights of labor with those of management and for the purpose of helping the worker. That law set specific restrictions upon management, which restrictions were continued in the amended act of 1947.

I said, during the course of the hearings, that the present act was passed to remedy many of the evils which had sprung up under the old act as the result of the actions of a number of unscrupulous and unprincipled labor leaders, sometimes in combination with employers, and that such actions had to be curbed for the benefit of both employers and employees, primarily to help the workers.

It was also pointed out during the course of the hearing in Chicago, that the old law had resulted in an increased number of strikes each year so that by 1946 there were 116,000,000 man-days of labor lost throughout the country because of strikes which included a Nation-wide strike that darkened the entire country for a period of time. The present law was aimed at ending such a loss of time if it was at all possible to do so, and that the act appeared to be accomplishing that purpose; therefore, it should be given a reasonable opportunity to prove that it was for the best interests of the workers of the Nation. I remarked that no act should be beneficial only to employers and that it was my opinion that if a choice were to be made that it would be the employers who would desire to have the act repealed rather than the workers of the Nation to whom it has been so helpful. The members of the subcommittee feel that much was accomplished by the hearings in developing the meaning of the law so as to allay unnecessary fears which had arisen in the minds of the respective parties to the strike. It is to be regretted, therefore, that incomplete reporting may overcome the otherwise good results of the subcommittee's work.

Mr. RICH. Mr. Speaker, will the gentleman yield?

Mr. OWENS. I yield to the gentleman from Pennsylvania.

Mr. RICH. Why was it that the radios broadcast that the gentleman is in favor of the repeal of that law?

Mr. OWENS. It is just the same as if I were to have a conversation with the gentleman from Pennsylvania wherein I said, "I was just speaking with a certain man and he said to me 'I will kill you'." If someone were repeating the conversation I had with the gentleman from Pennsylvania and made a statement that I had said "I will kill you," he would be making a correct statement, but by leaving out the words preceding the remark, he would be changing the entire context of my statement. The preceding remarks of mine before I mentioned that the act could be well removed from the books, included the fact that it should be done if it were determined that labor leaders and workers of the country wanted the act repealed. However, that statement was based entirely on the fact that the act was not passed for the benefit of the employers, but for the workers, and for the general welfare of the people of the Nation.

POULTRY PRICES

Mr. CURTIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. CURTIS. Mr. Speaker, after due investigation, I think I have found an answer to the old question of which comes first, the chicken or the egg.

The "new look" on the poultry question proves that first comes the egg. After that, much later, comes the chicken.

During the month of December, for 4 weeks I watched the poultry and egg prices as quoted by my home-town newspaper, the Minden Courier. Eggs ranged in market price from 40 to 50 cents per dozen. And running a tired second were the chickens—hens ranged from 13 to 20 cents a pound, and roosters stayed throughout the month at the one price of 7 cents a pound.

There is no doubt that these are not inflation prices. Seldom in a decade have poultry prices been lower as far as the farmer's market price goes. Yet, in this same past month I have bought poultry in Washington at the lowest-price stores and paid prices for live chickens ranging from 39 to 52 cents per

pound. Prices for dressed chickens were even higher.

Some place along the line someone is making a great deal of profit. Obviously it is not the farmer. And as we all know, it is not the consumer or retail buyer.

I should like to know the answer. I am sure that each of us here assembled can find by comparing notes from the family grocery lists that poultry prices are high beyond reason. If Nebraska, from which I quote current poultry prices, were thousands of air-miles away from Washington, we could find some excuse for these prices to be exorbitantly high. But today the shipping distance between this farm State and Washington, D. C., is a matter of hours by modern transportation.

In calling your attention to these prices, I should like to ask the Congress these two questions, in the general consideration of present inflation.

They are: First, How can farmers continue to produce poultry at these low market prices yet pay the prices they must for freight charges and feed? and, second, Why do not the consumers get the benefit of the low prices farmers are now getting for hens and roosters?

There is an answer around the price corner. I am sure we would all like to have it.

A FREE PRESS AND FREE SPEECH ARE THE SAFEGUARDS OF A REPUBLIC

Mr. HOFFMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN. Mr. Speaker, free speech and a free press are the safeguards which make possible the continuation of a representative republican form of government such as that which has prevailed in this land of ours since the adoption of the Constitution.

Apparently so well known was this truism to the founding fathers that it was not thought necessary to incorporate any provision in the Constitution, as first adopted, guaranteeing freedom of speech and of the press.

But the very first amendment to the Constitution remedied that omission and expressly provided that "Congress shall make no law abridging the freedom of speech or of the press."

Unfortunately, all too many individuals and a segment of the press have misconstrued that guaranty to mean that the right to criticize was exclusively theirs; that the right to criticize the critic did not exist.

In more recent years, the Congress, which, after all, is the people's Congress and the servant of the people, and its committees have been pilloried, not only by those who are honestly critical but by those who, through propaganda, seek to impose their opinions upon the people and the Congress.

Many of these individuals, and that part of the press which follows their line, not only through fair criticism but through the use of abuse, half-truths, and sometimes falsehoods, use to the utmost their right to free speech and a free press, but the moment any one of their utterances is criticized become hysterical and yell to high heaven that they are being denied a constitutional right.

One of the more recent examples of this was the attitude of the 10 Hollywood writers and actors. Called before a congressional committee—as was the right of the committee, affirmed by the opinions of the courts, including the United States Supreme Court—they set up a howl of simulated indignation when they were asked whether they belonged to a party which openly advocates the overthrow of this Government by force.

They claimed their constitutional rights were being taken from them. They argued that it was no one's business whether they belonged to that organization. They denied the right of Congress to learn what they were saying and writing and the purpose of their sayings and their writings, and in the same breath insisted upon full freedom to say and write what they pleased, even though the purpose was the destruction of the Government whose protection they were claiming.

To put it briefly, they claimed the unhampered right to speak and to write as they wished, but denied to the people and the Congress the right to criticize them, to make reply to their utterances, after it had been ascertained what they were saying and writing by making direct inquiry of them.

Another illustration is that furnished by the recent inaccurate and repeated comments of editors and columnists who attempt to show that the action of a House subcommittee was an attempt to restrict the right of free speech, of a free press. The basis for their charge grows out of the following facts:

The House Committee on Expenditures in the Executive Departments, of which I am chairman, acting through a subcommittee, of which I am also chairman, is charged by statute with riding herd on the exercise of the powers given executive departments and agencies and the manner in which funds appropriated are spent.

It came to the knowledge of that subcommittee that the Civil Service Commission, through an expenditure of public funds, had compiled and had in its possession an "investigators' leads" file consisting of some 750,000 cards, among which there were cards carrying not only information but rumor and gossip which reflected upon the loyalty and the patriotism of Senators, Senators' wives, Congressmen, and—believe it or not—prominent individuals who were not Federal employees and who could not, by any stretch of the imagination, be classified as applicants for Federal jobs.

THE AUTHORITY OF THE CSC

The Civil Service Commission has no authority to expend one cent in investigating, compiling, or maintaining a file bearing upon the loyalty, the patriotism, or any other attribute or characteristic, of a Senator, a Senator's wife, or a Congressman. Nor has it any similar authority to make any such compilation bearing upon the activities or opinions of any other citizen, unless that citizen be an employee of the Federal Government or an applicant for a position under the Federal Government.

Investigating and keeping a record of the words and acts of Senators, Congressmen, or others, which indicate a violation of the law, is the duty of the local and State law-enforcement officials, of the FBI, and of the Department of Justice, not the Civil Service Commission.

Complying with its duty, the subcommittee called as witnesses Mr. Mitchell, the president, Miss Perkins, and Mr. Flemming, the three individuals in charge of the Civil Service Commission. Each testified that the Commission had no authority to compile or maintain such a file, that he did not know it had compiled or was maintaining such a file, that all information contained in it which referred to Senators, Senators' wives, or Congressmen, would be destroyed; that the practice of compiling and maintaining such a file through the expenditure of public funds would be discontinued.

THE FREE PRESS ANGLE

Reporters were present during the taking of the testimony. The purpose of the investigation and the result were known to the Washington Star, which publishes several daily editions circulating in the city of Washington and vicinity.

One of the editors of that paper, exercising his right of free speech and of free press, wrote an editorial captioned "Disloyal Congressmen." The first paragraph of that editorial—which is hereafter quoted in full—carried the charge that there were—and I quote—"Disloyal Congressmen" in Congress and that their names "may have been filed away by the Civil Service Commission."

I do not challenge the right of the Star to make that charge. I assume that the only purpose of making a charge that there are disloyal Congressmen was to bring to the attention of the people and of the Congress the fact—if it were a fact—that some of the people's servants were disloyal, so that they might be defeated at the next election or, more properly, tried by the House on that charge of disloyalty and, if found guilty, at once expelled by the House.

The making of such a charge, if true, would be the rendition of an outstanding public service.

If false, the making of such a charge cannot tend but to destroy the confidence of the people in the Congress and, hence, impair its usefulness.

Now note, the Star and its editor exercised the right of free speech and of a free press, but became incensed when the congressional committee, which had been performing its duty, sought to follow through and ascertain whether there was any truth in the charge. The Star might well have welcomed the opportunity to expose disloyal Congressmen, if any there were.

The writer of the editorial and the editor of the paper, appearing before the committee on invitation, were resentful because a committee of the Congress asked them to lay their cards on the table and to name to the committee the

disloyal Congressmen to whom reference was made.

And what was the answer? The editor said that he was not referring to anyone in Congress. What an absurdity for the Star to waste valuable space on its editorial page to caption an editorial "Disloyal Congressmen," to assert in the first paragraph that there were disloyal men in Congress, and then, when called upon to name those men and produce the proof of their disloyalty, to answer—as the editor did—that he was not referring to anyone, not even to the mythical "Senator Claghorn."

Because, subsequently, so many radio commentators, editors, and columnists, free-lance writers—who apparently are more interested in the number of words they can get into the paper than they are in factual statements or accurate conclusions—have falsely charged that the committee was attempting to limit or suppress free speech, these remarks are made. Attached hereto is a reprint—carried in the Friday, November 21, 1947, issue of the Star—of the editorial and that part of the testimony taken at the hearing which is pertinent to the subject discussed.

THE APPARENT FAIRNESS OF THE STAR

Permit me to add that I am deeply appreciative of the courtesy, generosity, and fairness of the Evening Star for this reprint. The testimony clearly shows the purpose of the investigation, and it not only shows that the committee was not attempting to, in any way, limit free speech or a free press, but that the Star had no reason whatever to even hint that there were disloyal men in the Congress.

Unfortunately, the Star could not forget the personal element and was not content to let the public judge the committee or the speaker solely upon the reading of the editorial and the testimony.

On the same day that it printed the testimony and reprinted the first editorial, the editor could not resist the opportunity to take another dig at me. A second editorial, published in the Star on the 21st of November, was captioned "Mr. HOFFMAN and the Star."

The first paragraph reads:

> The Star does not believe that Representative HOFFMAN, of Michigan, is endangering the freedom of the press. He is not big enough to do that. It does not believe that he is intimidating editors and reporters by a disposition to put them on the witness stand before his committee and interrogate them about what they write. Mr. HOFFMAN's abilities as an intimidator are not without their limitations.

Instead of frankly admitting that, as the testimony shows—and you may read for yourself—there was not the slightest thought of attempting to intimidate anyone, rather an effort to ascertain the truth or the falsity of a widely published, serious charge which had been made against the Congress—a charge that there were disloyal individuals within its ranks. This second editorial is merely an attempt to belittle me.

Fortunately—at least for me—the Constitution provides for the election of Congressmen from congressional districts. One of the reasons for that is that the people of a district, presumably knowing the candidates for office, are better able to judge of the candidates' ability, integrity and loyalty than is the editor of a metropolitan newspaper who cannot be expected to know the true character of the 435 Members of the House whom the people are, every 2 years, required to select as their servants.

Nor was the editor of the Star, in this second editorial, content to confine his efforts to derogatory statements about me. Rather, he adopts the Walter Winchell line—you may remember that Walter, after the 1942 election, bemoaned the fact that the people lacked the intelligence to select qualified Congressmen when they reelected those for whose defeat Winchell had campaigned.

In true Winchellian style, the editor writes:

> When one thinks of Congress, one does not think of Mr. HOFFMAN. When one thinks of Mr. HOFFMAN, one thinks of other things—confusion, verbosity, a futile fretfulness, the seniority rule and the sometimes curious manifestations of popular government.

Because the people for whom I work are so kind and so generous to me, the Star's gibes do not greatly worry me, and they are only repeated here to give emphasis to the Star's conclusion that being, in its opinion, lacking in so many qualifications, the people of my district are so dumb that they refuse to accept the dictation of the Star and exhibit "curious manifestations of popular government" when they elect me. The Star feels sorry for the other 528 Members of Congress. The Star feels sorry for the thousands of individuals who elect me. I should feel sorry for the Star. I would, were it not for the fact that I am sure the editor's confidence in his own infallibility and omnipotence will sustain him, and that my sympathy would be wasted.

The testimony and the first editorial are marked "Exhibit A." The second editorial is marked "Exhibit B."

EXHIBIT A

[From the Evening Star, Washington, D. C., of November 21, 1947]

REPRESENTATIVE HOFFMAN AND THE STAR

Representative HOFFMAN, Republican, of Michigan, yesterday on the floor of the House described a Star editorial, entitled "Disloyal Congressmen," as "not only inaccurate, unfair, but tends to create lack of confidence in Congress; to impair its authority."

The Star editorial appeared October 6 and Mr. HOFFMAN's remarks yesterday were an amplification of previous criticism. On October 7, John H. Cline, the Star's chief editorial writer, was invited to appear before the House Expenditures Committee, of which Mr. HOFFMAN is chairman, for discussion of the editorial. He was accompanied by B. M. McKelway, editor of the Star. Following is a transcript of the questioning at that time, printed so that the public may have a complete understanding of the points involved:

"The CHAIRMAN. Now, I think that Mr. McKelway has something to say. Will you identify yourself?

"Mr. MCKELWAY. I am B. M. McKelway, editor of the Evening Star. I have come here with Mr. John H. Cline, the chief editorial writer of the Star, and I merely wish to make it plain, sir, that both of us have come in response to the committee's invitation and out of respect to a committee of the Congress. We have nothing to defend or explain, but Mr. Cline will be glad to help the committee if he can.

"The CHAIRMAN. That is my understanding of it. Mr. Cline was invited and I assume that he asked you to come along, which is very agreeable to us.

"May I also say that there has been no charge made against anyone. We are merely seeking information. That is why Mr. Cline was asked to come. Will you give your name, please?

"Mr. CLINE. My name is John H. Cline.

"The CHAIRMAN. In last night's Star this editorial appeared captioned 'Disloyal Congressmen.' Did you write that, Mr. Cline?

"Mr. CLINE. Yes, I did.

"The CHAIRMAN. Now, the caption, in the opinion of some, leads to the conclusion that there are in Congress disloyal Congressmen. Was that your intention, to say that there are Members of Congress who are disloyal?

"Mr. CLINE. No, sir. I think that the text of the editorial makes it very clear that I did not intend to say that and in fact it does not say it.

"The CHAIRMAN. Then the editorial continues:

" 'Very few people share the reported indignation of certain Members of the House at the discovery that the names of disloyal Congressmen may have been filed away by the Civil Service Commission.'

"What do you mean by the expression 'disloyal Congressmen?' Identify them, if you will.

"Mr. CLINE. As I said, I do not know of any disloyal Congressmen. As I understand it, this hearing is based on the assumption that the names of certain Members of Congress appeared in this file and that there has been a suggestion that they may have been affiliated with some Nazi, Fascist, or Communist organization."

HAS NOT EXPLAINED FILES

"The CHAIRMAN. Let me interrupt you right there. Mr. Flemming (Civil Service Commissioner), have you examined the files sufficiently to know whether the names of Senators and Congressmen are in the files?

"Mr. FLEMMING. Mr. Chairman, I have not. The information that I have is the information that was divulged to me at the hearing yesterday.

"The CHAIRMAN. Then, to make the record complete, I wish you would send us up a letter stating whether it is or is not true the names of Senators, Senators' wives, and Congressmen appear in those files.

"Mr. FLEMMING. I think, Mr. Chairman, we agreed yesterday after we had made a search of the files we would make such a report, and we will do that.

"The CHAIRMAN. Well, in your opinion would not the average reader reading that first paragraph, and I will repeat it—

" 'Very few people will share the reported indignation of certain Members of Congress at the discovery that the names of disloyal Congressmen may have been filed away by the Civil Service Commission'—

"Leads to the conclusion that you were stating that there were disloyal Congressmen?

"Mr. CLINE. I certainly do not think so, and if you read the next sentence, I am sure that you will not think so.

"The CHAIRMAN. And that paragraph standing alone does not state, in your opinion, that there are disloyal Congressmen?

"Mr. CLINE. It conveys there may be, I will agree to that.

"The CHAIRMAN. Not that there may be disloyal Congressmen, but the names of disloyal Congressmen—that is a statement of fact—may have been filed away. The word 'may' relates to the filing away, do you not agree with me on that?"

DOES NOT AGREE ON WORD

"Mr. CLINE. I do not agree with you on that. If you want to construe it that way, you can.

"The CHAIRMAN. I just want to construe it as the average reader would. You say that

that sentence does not convey the impression that there are disloyal Congressmen?

"Mr. CLINE. It would not convey it to me.

"The CHAIRMAN. All right; and you say this:

" 'It is not certain that the names of any Congressmen are in this file, but if there are any they got there in the course of investigations which the Commission has been directed to make.'

"Now, that is a statement that the Commission has directed the making of these investigations.

"Mr. CLINE. No; it is not.

"The CHAIRMAN. It is not?

"Mr. CLINE. It is a statement that the names got there in the course of an investigation which the Commission was instructed to make. I refer there to the President's Executive order directing the Commission to make this investigation.

"The CHAIRMAN. What order?

"Mr. CLINE. I do not know the number of the order.

"The CHAIRMAN. When was it made?

"Mr. CLINE. Within the past few years.

"The CHAIRMAN. But this file dates back to 1943, Mr. Cline, so that answer is not any good, is it?"

DIRECTION OF PRESIDENT

"Mr. CLINE. The Commission has been directed by the President throughout the war to make an investigation, a series of investigations.

"The CHAIRMAN. You mean the Civil Service Commission?

"Mr. CLINE. That is right.

"The CHAIRMAN. If you know of any such order that applies to anybody in Congress we will be glad to have it.

"Mr. CLINE. I did not say that it applied to anybody in Congress.

"The CHAIRMAN. Yes; you do. You say, 'Actually it is not certain that the names of any Congressmen are in the files.'

"Mr. CLINE. Why do you not read the whole editorial?

"The CHAIRMAN. I will get to it in a minute, but I am getting to it sentence by sentence and paragraph by paragraph. You say, 'But if there are any, they got there in the course of investigations which the Commission has been directed to make.'

"Now, you heard Mr. Flemming testify that the Commission has no authority to make any such investigation. Where do you get your authority that the Commission had?

"Mr. CLINE. The editorial says that the names, if they are there, got there in the course of investigations that the Commission should make.

"The CHAIRMAN. In spite of the statement that Mr. Flemming said that they had no authority."

SEES NO CONFLICT

"Mr. CLINE. I see no conflict between the two statements at all. The Commission was certainly directed to make investigations and in the course of those investigations these names may have gotten into the files.

"The CHAIRMAN. It is a good thing that your reporters do not proceed by the same mental processes.

"Mr. CLINE. That may be.

"The CHAIRMAN. I will say it is.

"Then you say, 'The Commission, of course, does not investigate the Congressmen as such, but for example it does investigate Federal job applicants.'

"And now this is the important part: 'In the course of such investigation it might discover that the applicant had signed some Communist or Fascist petition.'

"Of course, the members of the committee and the Congressmen generally conceive that it is their duty; that is, if the applicant had signed a Communist petition, the fact would be recorded in the files and the other names on the petition would go into what is called a lead file. I think that no one will disagree that the procedure is not correct, but assume that John Doe applies for a Federal job, over which the Civil Service Commission has jurisdiction and in support of his application he presents 10 letters of endorsement and that one of the letters is from a Communist. Is it your opinion that the name of the other nine letters should be placed in the files of the Commission with a notation to the effect that they had endorsed an applicant for a job who is also endorsed by a Communist?"

DO YOU ASK MY OPINION?

"Mr. CLINE. Do you ask is it my opinion that they should be put in?

"The CHAIRMAN. Yes.

"Mr. CLINE. I should not think so.

"The CHAIRMAN. Here is another paragraph:

" 'Why should immunity from an investigation, especially from what is purely an incidental investigation, extend to Congressmen and to no one else? What is there so sacred and untouchable about the position these gentlemen happen to hold?'

"Yesterday it was stated here, and I have never heard it questioned by any Member of either the Senate or the House, that the Federal Bureau of Investigation, the Committee on Un-American Activities, and the Police Department of the city of Washington, the State police and any law-enforcing agency, has the right to investigate Congressmen or Senators, or even the President, if they want to. Where did you get the idea that this committee, or any member of it, was objecting to any investigation other than the one under discussion, the one conducted by the Civil Service Commission which admits that it had no authority to do?

"Mr. CLINE. This is the investigation that I am talking about.

"The CHAIRMAN. Where did you get the idea that any Congressman or Senator claims immunity from investigation by any agency other than the Civil Service Commission?

"Mr. CLINE. I did not say they did.

"The CHAIRMAN. You do not think that editorial leaves that impression?"

DOUBTS SUCH IMPRESSION

"Mr. CLINE. I do not think so. This editorial is directed exclusively to this particular investigation.

"The CHAIRMAN. If that is so, to what Congressmen were you referring in the caption 'Disloyal Congressmen'?

"Mr. CLINE. I was not referring to any particular Congressman.

"The CHAIRMAN. Senator Claghorn?

"Mr. CLINE. I was not referring to Senator Claghorn.

"Mr. STONE (reporter for newspaper PM). What is your authority to investigate the press? What is this all about? What authority does this committee have?

"The CHAIRMAN. Put that man out if he does not keep still.

"You are not objecting to coming up here, are you, Mr. Cline?

"Mr. CLINE. No.

"The CHAIRMAN. Certainly not, and the editor has no objection?

"Mr. MCKELWAY. No.

"The CHAIRMAN. As I have stated before, we are only trying to get this thing straight so that the Star editorial writers as well as the reporters will know what we are objecting to.

"Mr. MCKELWAY. We are anxious to find out.

"The CHAIRMAN. For myself—and I think I speak for every Member of the House—I have no objection to the FBI, the sheriff, the policemen who are charged by law with making an investigation to make an investigation, but what I am objecting to—and I think the committee—is the fact that money has been appropriated by the Congress that has been used without authority of law to make an investigation, an investigation which was made by the Civil Service Commission which every member of the Commission says it had no authority to make, and who say that they did not know that the information was in the files.

"Mr. MCKELWAY. That is the only basis of your objection?"

FURTHER OBJECTION

"The CHAIRMAN. And the further objection that the information in there consists largely of rumors, hearsay, reports about this, that, or the other, some of which are responsible and some of which are irresponsible, and are known the country over as being unreliable and smear articles.

"Mr. MCKELWAY. The editorial is not based on hearsay.

"The CHAIRMAN. I thought that you were talking about the investigation that the Civil Service Commission made. That is what I was talking about, not about your editorial. You say the editorial is not based on hearsay, but the editorial is captioned 'Disloyal Congressmen.' Maybe I am entirely wrong, but my thought was that the average reader would at once reach the conclusion that the Star and the editors of the Star were announcing it as a fact that there were disloyal Congressmen and that the Congressmen who had been referred to in this file were objecting to the publicity given them; is that clear?

"Mr. MCKELWAY. Your point is clear. The caption refers to the names of disloyal Congressmen that might be in these files.

"Mr. HARDY (Representative from Virginia, member of the committee). I think the key to that is this—the fact that there are names in that file does not indicate that the information contained on those cards is either accurate or justified.

"Mr. MCKELWAY. Would that apply to all names?

"Mr. HARDY. I think that it would from the investigation yesterday, and the assumption that the existence of these cards in that file indicates that a Member of Congress or anyone else is disloyal is an erroneous concept.

"Mr. MCKELWAY. Yes; the same principle applies to all the names that might be in the file.

"Mr. HARDY. Some of the information on those cards may be substantiated. Most of it, as I understood the testimony yesterday was not substantiated information and the thing that I objected to was the possible publicity of information contained on those cards, which information had not been authenticated in any way.

"Mr. MCKELWAY. You are speaking, sir, of Congressmen only?"

SPEAKING OF ANY CARDS

"Mr. HARDY. I am speaking of Congressmen, and I am speaking of any other cards in there that contain information that is not verified.

"Mr. MCKELWAY. But in the case of Congressmen, there would be no opportunity to verify it because the Commission had no right to make such an investigation?

"The CHAIRMAN. Then the answer to that is it has no right to receive a complaint as long as the individual name is not an applicant for a job.

"Mr. MCKELWAY. Has no right to receive a complaint against a Member of Congress?

"The CHAIRMAN. Against anyone who is not an applicant for a job that comes under such civil-service jurisdiction. Do you not see?

"Mr. HARDY. May I say this? I am sure it 's not the attitude of the chairman, and I know it is not my attitude, to shield anyone who is disloyal, whether he be a Member of Congress or otherwise; but it is not the function of the Civil Service Commission to indicate whether a Congressman is subversive or not, and it certainly is not a function of the Civil Service Commission, or any other agency of the Government to possess unauthenti-

cated information which might cast a
flection upon the loyalty of a Membe
Congress.

"Mr. MCKELWAY. I think that there
cases where, as you say, information w
has not been authenticated, relating to
people than Members of Congress, has
made public.

"Mr. HARDY. From the Civil Service C
mission's records?

"Mr. MCKELWAY. No, sir, from other rec

"Mr. HARDY. That should not be done
gardless of who the individual is.

"Mr. MCKELWAY. I agree with you."

MENTIONED NAMES

"The CHAIRMAN. You see, my point
further than just to Congressmen. I
tioned names here yesterday. For inst
I think that I named Henry Kaiser and
less and half a dozen men who are pr
nent in our national industrial life, an
point was that if none of those gentle
had applied and would not be apt to a
for a job it was not right or fair to
their names in there on the cards, ch
that they might be this, that, or the o
any more than it would be fair to you.
pose that your name appears down t
Who says so? Oh, some Congressman
that I was such-and-such and so-and-so
doesn't make any difference that a Cong
man said it, but the fact that they p
in a Government file lends dignity to it
authority to it.

"Mr. MCKELWAY. I think that everyone
be glad to hear you say that.

"The CHAIRMAN. That is it. The Con
is the judge of the qualifications of its M
bers. It is not the business of the
Service Commission whether I am a c
disloyal, or anything else. It is the
ness of the FBI, the Committee on Un-Am
can Activities, and it is your business a
editor to expose me, if you desire,
nobody complains about that. That
with the job, and that is not what we
complaining about. What I am complai
about here is the inaccuracy of this edit
and how it would be understood by the
age reader, because when you put it in
paper some fellow will say, 'Well, it appe
in the Star.' For instance, a radio
mentator said after 1942, 'What are you g
to do with the eight saboteurs in Congr
He did not have anything. That was ju
smear.

"Mr. MCKELWAY. Of course, the edit
did not say that.

"The CHAIRMAN. The editorial said
loyal Congressmen.'

"Mr. CLINE. On the point of how the
age person might react to the editorial, m
interpret the editorial, I have a letter
Congressman MCDOWELL, whom I do
know. It came in this morning in the co
of the mails. May I read it?

"The CHAIRMAN. If you think it is
tinent."

READS M'DOWELL LETTER

"Mr. CLINE. It reads:

" 'I read with a great deal of interest
original story saying that somebody has
a fuss about a report of an investigatio
the files of the Civil Service Commission,
named some Members of Congress, and,
sequently, your editorial of Monday, Oc
6, entitled "Disloyal Congressmen."
editorial is very good and very logical
states the case exactly.

" 'I doubt if very many people will b
dignant in that the Civil Service Com
sion has somewhere in its office inform
regarding Members of Congress. As a
ber, I do not see why any Member of a
lative body of the Nation should mind
investigated. Without exception, each o
us campaigns vigorously for our seats,
it has become traditional in American po
that if your background cannot stan
vestigation, it would be very unwise to
the political arena.

what it was all about, the text of the editorial and the transcript of the hearing which its publication provoked are reprinted on page A-16. Nothing that Mr. HOFFMAN said at the hearing or yesterday in the House affects the honesty or the validity of the Star's comment or the Star's right to make it.

As for Mr. HOFFMAN'S fears that the editorial may have shaken public confidence in Congress, they are not well founded. When one thinks of Congress, one does not think of Mr. HOFFMAN. When one thinks of Mr. HOFFMAN, one thinks of other things—confusion, verbosity, a futile fretfulness, the seniority rule, and the sometimes curious manifestations of popular government. But one does not necessarily think of Congress. There are 529 Members of Congress, but there is only one Mr. HOFFMAN.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. HINSHAW (at the request of Mr. ARENDS), for today, on account of official business re Atomic Energy Committee.

To Mr. GAMBLE (at the request of Mr. LEONARD W. HALL), for 2 days, on account of attendance at former Representative Hancock's funeral.

To Mr. JACKSON of Washington (at the request of Mr. RAYBURN), for the balance of the week, on account of illness in family.

To Mr. CRAVENS (at the request of Mr. GATHINGS), for an indefinite period, on account of illness in the family.

To Mr. COLE of New York and Mr. ANDREWS of New York to attend the funeral of Hon. Clarence E. Hancock.

To Mr. BLATNIK, for 5 days, on account of business in his district.

To Mrs. DOUGLAS, indefinitely, on account of illness.

To Mr. REEVES.

THE LATE HONORABLE CLARENCE E. HANCOCK

The SPEAKER. The Chair recognizes the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Speaker, I regret to have to announce the death of Clarence E. Hancock, who for nearly 20 years was a Member of the House of Representatives and was one of its most distinguished members. For many years he was the ranking minority member of the Committee on the Judiciary, which is the position he held at the time of his retirement on the 3d of January 1947.

Mr. Hancock was an able speaker. The occasions were too rare that we had the opportunity to listen to him here. But every time he spoke, what he had to say carried great weight. In my opinion, he was one of the fairest, ablest, keenest, as well as one of the most influential Members of the House. I regret to say that he was compelled to retire because of ill health, which took him away from us.

Mr. Speaker, I yield to the gentleman from New York [Mr. ANDREWS].

Mr. ANDREWS of New York. Mr. Speaker, as the leader of our delegation has announced, Hon. Clarence E. Hancock has passed from this life. Those of us who knew him, and I am sure there are many in the House, would agree with the statement on my part that if he were here he would not want this. As a mutual friend of ours said to me a few moments ago if Hancock were here he would say, "Please don't do that to me." Suffice it to say that we were old friends for over a period of thirty-odd years. Our military service together included service as enlisted men on the Mexican border as noncommissioned officers, and as officers of the front line with the Twenty-seventh New York National Guard Division in France, and we enjoyed a long period of association together here in the House. I think it is safe to say that rarely has one been among us who walked so humbly and who was so little given to show or extravagant statement. His rare sense of humor and cordial good friendship for Members of both sides of the aisle were fitting characteristics to top off his truly fine character, his unusually clear and analytical mind for legislative considerations. We grieve with the members of his family in the loss of our dear friend—a real soldier and a gentleman.

Mr. TABER. Mr. Speaker, I yield to the gentleman from Michigan [Mr. MICHENER].

Mr. MICHENER. Mr. Speaker, when the late Representative Clarence E. Hancock announced his intention to retire from Congress, I made some remarks in the House and said in part:

> Mr. Hancock retires of his own volition. Possessed of one of the best legal minds in the Congress, endowed with plenty of courage, he commands the respect and confidence of all of us. Never offensively partisan, he is a good Republican, believing thoroughly in the American way of life. When he speaks in Congress, people listen because he says something worth while. He is never a demagog. Many a law is a better law because Clarence Hancock helped write it, and in his retiring we lose a most valuable member of the Judiciary Committee and one whose services the country can ill afford to lose in these trying days. The country is safe with men like Mr. Hancock at the legislative helm.

I am glad, Mr. Speaker, that I made those remarks when Clarence Hancock was living and could appreciate how his colleagues, and especially his teammates on the Committee on the Judiciary felt about him. I can add nothing.

To his splendid wife and son I extend my most genuine sympathy.

Mr. TABER. Mr. Speaker, I yield to the gentleman from Maine [Mr. FELLOWS].

Mr. FELLOWS. Mr. Speaker, on July 18, 1946, when word came to me that Clarence Hancock would not seek reelection to this body, I took occasion to make this statement upon the floor of the House:

> In this decision I sense a loss to this country which cannot be measured by any expression of my personal regret, keen though it be, for I value beyond words the privilege of his friendship.
>
> Modest, kind, clean, able, he has served his State and country with distinction for 20 years. We all have ideals, from which most of us fall terribly short, but if I were asked what qualities of brain and heart best fit a man to represent a great district of intelligent people, I could do no better than point to the gentleman from New York, Clarence Hancock.

It is fitting that the usual proceedings of this body should be interrupted today—that for a few moments we record the passing of our former colleague.

To those who possessed the privilege of his friendship, he was ever a comfort and a joy. Let others bear testimony to his abilities as a lawyer and legislator, true to duty, loyal to the truth. The flower of sweet friendship is all I seek to lay upon that "covered bridge" through which Clarence Hancock has passed to his eternal—his heavenly—home.

He was modest, companionable, loyal and brave.

His modesty was not the least of his charms. He had no pride of opinion. He demanded of his party and his country no honors for the unquestioned talents he exercised in their behalf. He asked only the opportunity to serve. The State of New York, his Committee on Judiciary, the Republican Party and the country accepted his services and his sacrifices, and "he gained from Heaven—'twas all he wished—a friend."

He was a companionable man. His wit was keen, but never barbed. Many sided and magnanimous, malice and revenge he knew not. Trouble has his sympathy, stupidity his kind reproof. Kindness was his daily habit, and generosity almost a fault. He loved his friends. He knew that the only way to have a friend is to be one.

He was loyal.

His pleasure in his ability to serve his people knew no bounds. It is a wonderful—yes—inspiring thought, that since God created man there has never been an edifice erected, a statue placed, a memorial tablet framed to any man who only got and kept.

Religion, literature, poetry, and the consensus of mankind have all united in this—that the highest honor known to man shall be only won by those who have given consecrated service to their fellowmen.

He was a brave man.

In the days when it is easy to be brave in the support of measures that are sure to command the assent of the majority, when so often men shrink from opposing what they fear they will be out-numbered in opposing, the courage of Clarence Hancock—the dauntlessness with which he hewed to the line as he saw it—is the trait I believe most needed and most lacking in public life. He possessed it, he exercised it, and he did so to the end.

He was content to dwell in the serene minority with truth and with the right.

If he were sitting before me today, I would say, "Clarence, I do not care where my fireplace is or my garden, if only you will put on the logs for me and pick my roses."

He will live in the hearts of his friends.

Mr. TABER. Mr. Speaker, I yield to the gentleman from New York [Mr. COLE].

Mr. COLE of New York. Mr. Speaker, from the standpoint of pure crass materialism, the compensation for service as a Member of Congress is of no great moment, but from the standpoint of spiritual and moral values, the position pays handsomely; the dividends are rich and priceless. Outside the personal satisfaction which one derives from his devotion to duty in the public service, the really great reward for service in Congress is the opportunity it affords

each of us to work and live and play with fine, able, and noble characters—such a person as was the former Member of the House, Clarence E. Hancock, whose passing we mourn today.

Two years ago, when Mr. Hancock announced his decision not to seek reelection because of ill health, it came as a distinct shock to the legion of his friends in the Congress, for it was generally recognized that he possessed in an unusual degree those statesmanlike qualities so desirable in a representative of the people in the National Legislature. In fact, the feeling of loss in the realization that his services would no longer be available here in the Halls of Congress was so acute that a most unusual step was taken by his colleagues here in the House. All of the Republican Members from New York State joined with all the Republican members of the House Committee on the Judiciary, with the then minority leader and present Speaker and other Republican leaders, to petition Mr. Hancock and the party leaders of his district and State seeking a reconsideration of his decision and an arrangement which would make possible the continuation of his services here. This action in itself was a great tribute to Mr. Hancock and speaks more forcibly than any words which we might utter here today of the high regard and esteem in which he was held by the Congress. Unfortunately, he knew better than any of us what was best for him and his constituency; typical of his constant forthrightness and sincerity of purpose, his people were allowed a new representative and he was free to concentrate on the recovery of his health, which had been so severely undermined in the public service. It is tragic that his efforts were unsuccessful.

The first time I became acquainted with Mr. Hancock was in 1934 at the Republican State Convention at Rochester, N. Y., when he delivered the keynote address in which was clearly evident the great talents as a legislator and statesman which he possessed. Subsequent years of association with him in the House substantiated that first impression. Narrow partisanship was not in his book; demagoguery was his mortal foe; political expediency he constantly shunned; devotion to duty, honesty of purpose, intellectual sincerity, impassionate patriotism, courage, simplicity, kindliness, and habitual frankness were the signposts that marked his path of life.

Already his absence from us has been notable, now that he has moved along into the eternal life to welcome our arrival, his presence here is all the more keenly missed. His spirit will remain with us forever and, to me at least, constantly serve as an inspiration for greater efforts in the public service and the living of a more noble life. All of us are better persons because of our association with Clarence; though we shall miss him greatly we are profoundly grateful for the opportunity to have known him and to have loved him.

But Clarence Hancock was more than an outstanding legislator and statesman. He was a good soldier in the military service of his country; he was a devoted father, leaving behind a son, the pride of his life, possessing most of his own admirable traits, and a widow who was his inspiration and whose sweet, kindly understanding and Spartan character arouse the love and admiration of all who know her.

Whenever Clarence wished to pay an unusual compliment to a person in recognition of that individual's ability, intellect, courage, and character, he would say that the person was a "stout fellow." It was an expression which was used by him with great discretion, discrimination, and infrequency. No finer tribute could he pay to any person than to say that he was a "stout fellow." Clarence Hancock was just such a person himself. He was the kind of man whom all men admire. He was the kind of person who inspires confidence and emulation. He was the kind of person who leaves the world better than he found it. His was a noble life, overflowing with brilliant public service, abounding with innumerable fast friendships and rich with the devotion of a happy home and family. Clarence E. Hancock was truly a "stout fellow." We admire his character, we cherish his friendship, and we honor his memory.

Mr. TABER. Mr. Speaker, I yield to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, I shall always cherish as one of the finest possessions of my congressional experience my close personal friendship with Clarence Hancock. He was one of the strongest, most able, and most honest men whom I have ever known. He was resourceful in debate, vigorous in his advocacy of any cause in which he believed, but with all of that he was one of the most kindly gentlemen I have ever known.

He also possessed in the highest degree one of the finest characteristics that any man can ever have, great humility. Clarence Hancock had much of which to be proud, but he never evidenced that sort of feeling. Rather he was humble, always possessed of that humility which, in my opinion, is one of greatness.

A great American once said that everything he was and everything he hoped to be he owed to his mother.

As for myself I can say that for everything I am, and everything that I ever hope to be, I owe a deep and sincere and real measure of gratitude to Clarence Hancock and to his fine influence on my life.

Mr. TABER. Mr. Speaker, I yield to the gentleman from New York [Mr. KEARNEY].

Mr. KEARNEY. Mr. Speaker, it is with a feeling of distinct loss that I speak of the death of my very dear friend, Clarence Hancock, who served his State and his Nation for 20 years as a Member of this House from the Thirty-fifth District of the State of New York, which later became the Thirty-sixth District under the Reapportionment Act.

Mr. Hancock was born in the city of Syracuse February 13, 1885, attending the public schools of that city, and later graduating from Wesleyan University with the degree of bachelor of arts. He then started his chosen profession of the law, attending New York Law School, from which he graduated in 1908 with the degree of bachelor of law. During the years that he was a practicing attorney of the city of Syracuse, on two occasions he left his practice and entered the service of his country—the first time as a member of Troop E, First New York Cavalry, serving on the Mexican border, and the second time as a member of the One Hundred and Sixth Machine Gun Battalion, Twenty-seventh Division, New York National Guard, in the First World War, serving with the American Expeditionary Forces in France with great distinction.

It was while he was a member of the First New York Cavalry that I first became acquainted with him, both he and I serving in that regiment on the border during 1916 and a part of 1917. Throughout the years we kept up our friendship, and in 1943, when I first became a Member of the Congress of the United States, it was he who offered me the advice necessary for the general welfare of a new Member.

Mr. Hancock in 1926–27 was corporation counsel of the city of Syracuse and was gifted with that particular type of a legal mind necessary to give true and accurate legal decisions arising from the problems that daily came to him as such counsel.

As a member of the Judiciary Committee of the House and later as its ranking member, he was respected and admired by all Members for his calm and dispassionate analysis of the many problems which came before that committee. His voice on the floor of this House brought attentive and respectful listening from his colleagues, and his word was unquestioned.

As a friend I shall miss him, and to his family I can only express from the heart my deepest sympathy.

Mr. TABER. Mr. Speaker, I yield to the gentlewoman from Ohio [Mrs. BOLTON].

Mrs. BOLTON. Mr. Speaker, I have been deeply shocked this morning. I had not known of Clarence Hancock's death until my arrival this noon.

Nineteen years ago I first met him, and during the years of my husband's service in this House he was one of those most frequently in my home. When I came in as a Member of this body he was one of the few to whom I felt I could go with all the many questions of a new Member without any sense of embarrassment, certain of helpful comment and advice, often couched with humor, and always with understanding.

Clarence knew me well, and I knew him, and loved him even as I love his wife.

A conversation which he and I had once down on a Florida beach when he and other members of a small group of this House were staying with my husband and me comes to me very vividly today. We were discussing life and death, the meaning of life, the possibilities in death; where did it come from, where does it go? I have always read much in the philosophies of the various races and nations of the world. We had looked up and discussed some of the passages that had meant much to me. The passage which I want to read into the

RECORD appealed to Clarence so very much that several times in the years afterward he would speak of it. When some of our close friends went on he would say, "Frances, let me read that again. I hope you will always carry it in your purse. I like to know it is there."

This is from the ancient Aryan Vedas, translated by Sir Edwin Arnold:

IMMORTALITY

Never the spirit was born; the spirit shall cease to be never;
Never was time it was not: "End and Beginning are dreams."
Birthless and deathless and changeless remaineth the spirit forever;
Death hath not touched it all, dead though the house of it seems.

Nay, but as one who layeth his worn-out robes away,
And taking new ones, sayeth "These will I wear today!"
So putteth by the spirit lightly its robe of flesh,
And passeth to inherit a residence afresh.

Mr. TABER. Mr. Speaker, I yield to the gentleman from New York [Mr. BUCK].

Mr. BUCK. Mr. Speaker, Clarence Hancock was a great man because he combined kindliness, friendliness, tolerance, understanding, simplicity, and judgment with sheer downright ability. I shall always treasure the benefits of my too brief association with a man who merited both love and respect in such abundant measure.

Mr. TABER. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. RICH].

Mr. RICH. Mr. Speaker, on Sunday I took up the paper and noticed an article stating that Clarence Hancock had died. I mentioned it to my wife, who is a great friend of Mrs. Hancock. We could hardly realize that he had passed. He was such a fine fellow. We attended the funeral services yesterday and heard Dr. Montgomery quote the scriptures which were so appropriate with reference to the life of Clarence Hancock. When I looked in the room and saw the beautiful flowers that were sent there as a tribute by his friends, I thought of how much his friends thought of Clarence Hancock and what he must have meant to them during his life. Such beautiful flowers would be a tribute to anyone on his passing. And today I think of the many Members of Congress who want to say a word about him and of their association with him. I always honored and respected Clarence Hancock for his gentleness and his ability. He stood out among the Members of the House as one who was considerate, kind, honorable, and just—a man whom we could respect. Clarence Hancock has left us, but we shall always cherish his fine attributes and the spirit in which he associated with his fellow men. While he has gone to his great reward, he will always be remembered as a man. What a wonderful thing it is to have associated with men who leave their marks in life as Clarence Hancock has. He has done honor to the people of Syracuse and the people of his district who knew him and loved him. The country is better because of him. I think the finest thing that can be said of anyone after he is gone is that he was everybody's friend. He tried to do everything he could to make life brighter and sweeter and happier for those who knew him and associated with him. We extend our sympathy to Mrs. Hancock and their son.

Mr. TABER. Mr. Speaker, I yield to the gentleman from New York [Mr. EDWIN ARTHUR HALL].

Mr. EDWIN ARTHUR HALL. Mr. Speaker, I rise to pay tribute to a Member of the House with whom I served from the time that I came here in the Seventy-sixth Congress and subsequently until his retirement. It was a great shock to me when I heard of Clarence Hancock's passing. I cherished him as one of the finest friends that it was my opportunity to make. His was one of the finest associations I have had while I have been a Member of the House. I recall one summer when my daughter and I were visiting the northern part of my district. Clarence Hancock's summer residence is in Cazenovia, N. Y., in Madison County, which is in my district. I had been a speaker at one of the meetings there and that evening we were entertained by the most gracious of hosts, Clarence and Mrs. Hancock. That visit will remain indelible upon my memory as long as I live. Even in the early years of my service in the House, Clarence E. Hancock was looked upon as one of the outstanding leaders of upstate New York and of this body. He was very well thought of throughout the southern tier and the people of Syracuse had enough faith and confidence in him to send him to Congress for 20 years.

Any man who can remain in this body and serve as diligently and faithfully as long as he did possesses an intangible something which many of us yearn to possess but which escapes many of us.

Few of us appreciate the good things of life while they are evident, and it is especially true of friendship. Often death's door has to be closed before the real loss becomes apparent.

In paying tribute to our former distinguished colleague, when a friend such as Clarence Hancock is taken away, we can use the words of the poet:

For it so falls out that what we have we prize not to its worth while we enjoy it;
But being lacked and lost, why then we rack the value;
Then we find the virtue that possession would not show us while it was ours.

Mr. TABER. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. WIGGLESWORTH].

Mr. WIGGLESWORTH. Mr. Speaker, it was my privilege to serve in this House with our beloved friend and colleague, Clarence Hancock, for almost 20 years. He was one of the best friends that I have ever had in Congress, both at work and at play. His death is a tremendous personal loss.

Clarence Hancock had a long record of distinguished service, both to his State and to the Nation.

He served on the Mexican border in 1916. He served in World War I as a captain of a machine-gun battalion in the Twenty-seventh Division. He served as corporation counsel for the city of Syracuse. He served in this House from the Seventieth through the Seventy-ninth Congress.

A fine lawyer, the ranking member on the powerful Judiciary Committee, he served America with great ability and great fidelity.

Of the highest character, possessed of qualities which endeared him to all those with whom he came in contact, he will be greatly missed, I know, by every one of us who served with him here in the Congress, and by his wide circle of friends.

I join in extending my heartfelt sympathy to all his family, and particularly to his devoted wife and to his son of whom he was so proud.

America needs more public servants like Clarence Hancock.

Mr. TABER. Mr. Speaker, I yield to the gentleman from Mississippi [Mr. RANKIN].

Mr. RANKIN. Mr. Speaker—

A king once said of a prince struck down,
Taller he seems in death;
And this speech holds true, for now, as then,
'Tis after death that we measure men.

No man with whom I have served in this House during the last 26 years was more popular, regardless of his political affiliations, than Clarence Hancock, of New York. He will grow in stature with the passing years.

I believe it was Thomas Jefferson who once said there are three questions to ask an applicant for public office: Is he honest; is he qualified; is he faithful? Clarence Hancock measured up to that standard set by Jefferson, one of the greatest statesmen of all time.

We all join in mourning his passing, and I, for one, feel a keen personal loss in the death of one of the best personal friends with whom I have ever served.

There comes to my mind the words of William Cullen Bryant in his Ode to a Waterfowl, where he said:

Thou'rt gone, the abyss of heaven
Hath swallowed up thy form; yet, on my heart
Deeply hath sunk the lesson thou has given,
And shall not soon depart.

He who, from zone to zone,
Guides through the boundless sky thy certain flight,
In the long way that I must tread alone,
Will guide my steps aright.

Clarence Hancock's life will always be to me a guiding light which I trust may help to keep my footsteps in the right path.

He was one of the finest Americans I have ever known. I not only join in mourning his passing, but extend to his bereaved family my heartfelt sympathy in their great sorrow.

Mr. TABER. Mr. Speaker, I yield to the gentleman from Ohio [Mr. VORYS].

Mr. VORYS. Mr. Speaker, after all the fine things that have been said of Clarence Hancock, for me to speak is not to add more to his honor but is a great comfort to me.

In my first year here in Congress in the summer of 1939 I lived with Clarence Hancock and a group of Congressmen and got to know him and his gentle humor and his keen mind and his unswerving integrity. It was then that I

learned his definition of a "stout fellow" which has already been quoted. By that he meant, among other things, one who puts intellectual honesty always above political expediency. I saw him through the years live out in his own life his definition of a stout fellow. This was an inspiring lesson to me in my service here, however much I may have faltered and fallen from the example he gave. I have missed him in the last year. I shall miss him in the years ahead. My heart goes out to Emily, his fine wife, and to John, his fine son, in their loss. We are all better for having known him.

Mr. TABER. Mr. Speaker, I yield to the gentleman from New York [Mr. REED].

Mr. REED of New York. Mr. Speaker, I stand here with a very full heart on this occasion. Within the last few days I have suffered terribly because of the loss of one of the dearest friends I have ever had among men. It was my opportunity to know Clarence E. Hancock for the past 35 years. He was a grand man, and as you all know he was a man of extraordinary ability and a man of great patriotism, a man who has left behind him a monument of conspicuous public service.

I know something of how the people of Syracuse felt toward Clarence Hancock. I know that city is in mourning today, and I regard the city of Syracuse because of the character of its citizenship, as a great city. How do you measure it?

What makes a city great?
Huge piles of stone heaped heavenward?
Vast multitudes who live within wide circling walls?
Palace and throne and riches past the count of man to tell?
No; these the empty husk.
True honor dwells where noble deeds are done
And great men rise whose names
Athwart the dusk of misty centuries gleam like the sun.

Clarence E. Hancock was modest in every respect, yet he has added to the greatness of his home city. I want to measure his true worth by a standard that never fails; that is, no man is worth more than he contributes to the social, civic, and spiritual progress of the community in which he lives. I happen to know what he has done for his home city with the aid of his splendid and beautiful and self-sacrificing wife. They were active in every organization that tended to strengthen the spiritual and civic spirit of their home city.

He served with distinction as a corporation counsel of that great city. The people knew him before they sent him here; they knew they were sending a man of great ability and fine character to represent them.

It has been said many times by men on the floor of this House that they loved and respected this fine legislator. He has made a permanent place for himself in the hearts of the legislators of this House. He has left a great heritage of achievement, not only in legislation but in the influence for good which he has bequeathed to this and future generations of men. Clarence carried with him an atmosphere of sunshine and good will. He displayed great courage when controversial public questions were before this House. His was a useful and patriotic life.

So, in conclusion, I want to say to you today, my good friends, that I mourn the death of Clarence Hancock and my heart pours out an understanding sympathy to his fine wife and his splendid son and his wife and the relatives of this splendid, distinguished man.

LEAVE TO EXTEND REMARKS

Mr. TABER. Mr. Speaker, I ask unanimous consent that all Members who have spoken may have the right to revise and extend their remarks and that all Members of the House may have the right to extend their remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GWYNNE of Iowa. Mr. Speaker, Clarence Hancock will long be remembered in this House, not only because of his value as a legislator but also because of his qualities as a man.

His work on the Judiciary Committee was of a very high order. He was an excellent lawyer with a real understanding of legislative problems. Over the years the Members of the House came to have complete confidence in him. He displayed rare skill in explaining a complicated legal proposition so that all could understand. That was due to his habit of putting aside nonessentials and concentrating on the real point at issue.

Clarence Hancock was a real Congressman because he was a real man. He never engaged in pussy-footing or demagogery. He thought things through and his final decision was never affected by consideration of what it might do to him personally. One of his conspicuous traits was modesty. He never pushed himself forward, nor did he ever turn from the path of duty to seek popularity. Yet who in this House has been more universally admired, more generally loved? A capable and devoted legislator, a true and loyal friend, and citizen of the highest character—that was Clarence Hancock.

Mr. JENKINS of Ohio. Mr. Speaker, I join with my colleagues in a testimonial of the worth and character of Clarence Hancock. My service here antedates his service. I remember him from his first day's service in this House. He and I and one or two other Members sat down together to lunch on his first day's attendance. I was so impressed with the fine quality of his mind at that our first meeting that I have always remembered that meeting and the impression he made on me.

Later I grew to know him intimately. I found then that he was a man of sterling character. His children have every reason to be proud of him. When he decided to retire from membership in this House, I felt that the House was losing one of its most brilliant and most worthy Members. To his family I extend my sincere sympathy.

Mr. KEATING. Mr. Speaker, a mighty oak has fallen. When I came to Congress a year ago from upstate New York, on all sides, my colleagues here, particularly those on the Judiciary Committee, where he had labored so effectively and faithfully for many years, told me of the extremely high respect and regard which Clarence Hancock enjoyed among the Members of this body.

I had known him as a leading practicing lawyer of my neighboring city of Syracuse. Down here I came to the realization that, in his quiet, pleasant, and efficient manner, during his service as a legislator he had gained national stature and made a contribution over the years second to none in the life of our Nation.

To Mrs. Hancock, his family, and to the thousands throughout the land, especially in his well-beloved home in Syracuse, who mourn his passing, I express my deepest sympathy, both in a very personal way and as the Representative of the neighboring county of Monroe, N. Y. We feel keenly the loss of this distinguished public servant, but even more of this true and loyal friend.

Mr. WADSWORTH. Mr. Speaker, those of us who were colleagues of Clarence Hancock in the Seventy-ninth Congress remember well the deep concern we felt when he announced that he would not be a candidate for election to the Eightieth Congress. The news of his decision came to us suddenly and we could scarce understand it. Many of us, conscious of his remarkable value as a legislator, endeavored to persuade him to change his mind, and many of his constituents in and around Syracuse made a similar effort—all to no avail. I cannot be certain of my conclusion, but I suspect very strongly that Clarence Hancock reached that decision because he realized that he was facing a hard battle for survival—a battle against a physical disability which he knew would last a long time and require all his strength. None of us realized the seriousness of the menace which faced him at the time of his retirement, but those of us who kept in touch with him from time to time in the months that have intervened came to realize the nature of the struggle in which he was engaged. And let me say to my colleagues that no man ever showed greater courage and cheerfulness in the midst of physical weakness, pain, and distress than did Clarence Hancock. Literally, it was amazing. Now that battle is ended and he has passed away. I will not concede for one moment that he suffered defeat. Rather, I visualize him as having scored triumph after triumph—spiritual triumph—during a long siege until, finally, a higher power, in its wisdom, decreed that it should end.

A knowledge of Clarence Hancock's life should bring encouragement to every young American who cares for his country. In many respects his life was the kind which all of us, beginning in our youth, would like to lead. He grew to prominence in the city where he was born. He earned his way by sheer ability founded upon character. At every rung of the ladder up which he climbed his contacts with his contemporaries were intimate and enjoyable. He was a good student at school and at college and in his later years delighted in the memories of those days of his youth. The fact that he was a snappy infielder on the Wesleyan College baseball team back in

1906 kept those memories fresh in his mind, and I happen to know that he liked nothing better in his later years than to "talk baseball." Those who have played the game and loved it will understand this. His liking for teamwork among younger people, together with his sense of obligation to his country, prompted him to enlist in a National Guard troop of cavalry stationed and maintained at Syracuse as an element in the First New York Cavalry. He did this at a time when he was just embarking upon the practice of law and it meant a considerable sacrifice—something which should not be forgotten by the young men of today. In those good old days cavalrymen were mounted upon horses and every trooper, if he were a good one, had a sentimental feeling for his mount. A little later, in 1916 to be exact, the First New York Cavalry, including the Syracuse troop, was sent to the border and there served for approximately 9 months. There were no barracks. The men were sheltered under tents. There were no stables. The horses were hitched to picket lines laid along the ground in the open. Truly, it was an outdoor life. Clarence Hancock proved to be a faithful and an enterprising soldier and began rising through the grades of noncommissioned officers. He returned North with his troop in the early spring of 1917, ready to return to the practice of law. But on April 7 of that year we went to war against the German Imperial Government, with the result that, with scarcely any intermission, Clarence and his men were remobilized and, a little later, sent to a big encampment at Spartanburg, S. C. During that period they lived the lives of cavalrymen, still devoted to their horses—training hard. Suddenly a bitter blow fell upon them. The horses were taken away and the old First New York Cavalry was reorganized into machine gun battalions. I happened to be at Spartanburg when this thing occurred. The men had been ordered to move the horses to a corral situated not far away and to leave them there. They obeyed orders, cussing under their breaths. Someone left a gate open at that corral and next morning the horses were all back on their old picket lines. They had returned on their own initiative and stood there waiting to be fed and groomed by Clarence and his fellow troopers. Many of the men were crying, but of course orders were orders and the horses were taken away for keeps.

Many years later, during World War II, Clarence Hancock observed to me one day that he did not see how anybody could get sentimental about a tank. And he remarked, further, that men who served in tanks smelt of gasoline, whereas the real cavalryman smelt—otherwise. Clarence went to France in World War I as a machine gunner. He and his men, having had thorough basic training, much of it with lighter weapons, picked up the machine-gun technique very quickly and the battalion in which he served, an element in the famous New York Twenty-seventh Division, did excellent work. Hancock and his men were in the thick of many a battle. The Twenty-seventh Division, along with the Thirtieth Division, serving in the British Fourth Army, cracked the famous Hindenberg Line—an astonishing performance. I went over that ground myself shortly after the battle. To this day I cannot understand how men could attack a determined enemy in those trenches and long tunnels and come out alive. Clarence Hancock came out of that war a captain, proud of his outfit and adored by his men. This is an all too hasty sketch of Hancock's younger days. But I think we should be reminded of his life in those days for it spells patriotism. The people of Syracuse and its neighborhood are thoroughly familiar with his services to the city. When World War I was over and Clarence was discharged he jumped back into the practice of law, and before long he held the office of corporation counsel of the city of Syracuse. His record in that office is known to be excellent. Then he came to the House of Representatives, a mature man and, as it turned out, remarkably well equipped to perform the duties of a legislator. I shall not attempt to catalog his achievements in the House but merely to emphasize some of those qualities of mind and heart which made him a leading figure in this institution. He was possessed of a remarkably alert and incisive mind. You could place before him what seemed to be an exceedingly complicated problem and ask for his help. In an astonishingly short space of time he would push aside the nonessentials, dig down and find the root of the matter. Having found it, he would expose it, analyze it and give you an absolutely logical solution of the whole problem. He did this time and again, especially during the meetings of the Committee on the Judiciary of which he was a member for many years and of which he would have been chairman in the Eightieth Congress had his physical condition not forced his retirement. I say that he exposed and analyzed the roots of problems. Upon many an occasion this required political courage and complete candor. Never was he lacking in those qualities. As a result of them he contributed enormously to the work of the Congress. All his colleagues, Democrats as well as Republicans, respected him. Not only did they respect him but they were very fond of him. He was a genial soul, witty, tolerant, and delighting in friendships. His wit often took the form of kidding—good-natured kidding—which we all enjoyed even though upon occasion we were its targets. Perhaps he acquired that talent on the baseball field and as an enlisted man in the Army. Be that as it may, ask any Member of the House and he will tell you that Clarence Hancock's career, founded upon unimpeachable character, was American at its best.

Mr. RIEHLMAN. Mr. Speaker, it has been my privilege to represent the Thirty-sixth Congressional district since January 3, 1947, when Clarence Hancock retired. I have known him for a long time and have been closely acquainted with him the last few years. I have regarded him as one of the ablest legislators in the House of Representatives, a fine, clear-thinking man who was devoted to the welfare of the country. Onondaga County never has had a more public-minded citizen nor one who took a greater interest in the welfare of the people that he represented. He was uniformly kind and courteous to those with whom he had to deal but above all there was in the background a great patriotic spirit which we will all remember and cherish.

Mr. HOPE. Mr. Speaker, Clarence Hancock and I came here together in the Seventieth Congress. He was one of the first Members with whom I became acquainted. From the beginning I was impressed with his fine qualities of heart and mind. I saw him advance to a position of influence and leadership. Like all of his associates, I had a feeling of deep regret when ill health forced him to retire at the close of the Seventy-ninth Congress. His retirement was a real loss, not only to his constituents, but to the country as a whole.

I know of no relationship which serves to bring to his associates the real worth and value of a man like service here in Congress. We do our work in a glass house. After a man has been here for any considerable length of time, his fellow Members learn a great deal about him. They know his strength and his weakness. They get a pretty good idea of his character, of his ability, of his industry, of his sincerity of thought and purpose, and of his moral strength. Judged by these standards, his fellow Members considered Clarence Hancock an outstanding Member of Congress. He was a gentleman in the finest sense of the word, a man of integrity and keen intelligence, one who gave his best to everything he undertook. For all his gifts and ability, he was a modest man.

It was a privilege, as well as an inspiration, to serve in Congress with Clarence Hancock. He set an example in the way of sincere, conscientious service which could not help but raise the general level of Congress, not only in our own eyes but in the estimation of the public. My sympathy goes to his wife and son in this dark hour. I hope and pray that they may be given the strength to bear their heavy burden.

LEAVE OF ABSENCE

Mr. WOODRUFF. Mr. Speaker, I ask unanimous consent that my colleague from Michigan [Mr. SHAFER] may be given leave of absence because of illness.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EXTENSION OF REMARKS

Mr. WOODRUFF asked and was given permission to extend his remarks in the RECORD in two instances and include editorials.

Mr. KNUTSON. Mr. Speaker, I am today mailing to the entire membership of the two Houses a memorandum prepared by a very able and distinguished Swiss citizen who stands high in the business life of that country, analyzing the situation in Europe. I think that fine statement should also be inserted in the RECORD, and I therefore ask unanimous consent that I may be permitted to extend my remarks in the RECORD and include the statement even though it may exceed by a few dollars the statutory length.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

THE LATE HONORABLE PATRICK HENRY DREWRY

Mr. BLAND. Mr. Speaker, it becomes my sad duty to announce to the House since it last met, the death of PATRICK HENRY DREWRY, a former Member of this House from the Fourth Congressional District of Virginia.

When I arrived at my office on Monday, December 22, 1947, I was shocked by the sad news that on the preceding Sunday night our beloved colleague from Virginia had passed away. He died at his home in Petersburg, Va. I believe that if he had been given his choice of going, he would have preferred to go as he did. A few days previously he had returned to his home in Petersburg from Washington.

I felt peculiarly close to Mr. DREWRY. His district joined mine for a short distance. I came to this House for the first time on July 3, 1918. When I was sworn in the Honorable Walter Allen Watson, an outstanding man, beloved and respected by all, a lawyer of rare ability, a judge of distinction, a legislator of great merit, and a man beloved by all, was the Member from the Petersburg district. I served with him from the 3d day of July 1918 until he passed away on December 24, 1919. I attended his funeral. He was succeeded by PAT DREWRY who was a very worthy successor of Judge Watson and of the other splendid men from the Fourth District of Virginia who had served in Congress. Representative DREWRY was elected to Congress on April 27, 1920, and was sworn in to enter upon his career here on May 10, 1920; from that time until his death on Sunday, December 21, 1947, we served together. He was far more than a colleague from the same State. He was a very dear friend, an adviser in many respects and a beloved companion. The day's service was not complete unless its duties were brightened by his cheerful greeting.

Since I have been a Member of the House, I have seen many Members come and go. They were men of ability, men of the greatest merit, faithful, industrious, patriotic, all imbued by a single purpose to do their duty as God gave them the light to see that duty. To name some of them is to attest the truth of what I say though I fear to name some lest I omit others equally deserving, and what I say applies equally to both sides of the aisle, and to all parties or shades of parties represented here. When I came, there were here Clark, of Missouri, then Speaker of the House; Gillette, of Massachusetts, majority floor leader; Mann, of Illinois, the ablest parliamentarian ever to hold a seat on the floor; Longworth, of Ohio, later Speaker of the House; and Kitchen, of North Carolina, who is the ablest debater I have ever heard. There were here when DREWRY came many other men of commensurate caliber with those I have mentioned. The delegation from my own State has entirely changed, but in the period of my long service for almost 30 years, I have seen none more faithful to his duties, more loyal, more industrious, more companionable or more capable than PATRICK HENRY DREWRY.

He served with rare distinction. He was devoted to all of the interests of his native State, and he had served her in her legislative halls. He was well qualified for his duties here.

I wish to pause a little while to express my concluded opinion after a service of nearly 30 years here—30 years on July 3 next, if I shall be spared that long—and I can count on the fingers of one hand men who proved themselves to be unworthy. The caliber, intellect, and patriotism of the men with whom I have served attest indisputably the worth of our form of government. They served as a representative cross-section of America acquainted with her problems, diligent to know her needs, studious of her problems, and alert to the needs of all kinds, character and description of her citizens. Those who laid the foundations of our America built well—far better than even they knew or could have suspected. To those who would change the form of government fixed by the fathers, I would urge that they do not disturb that structure. It is flexible and elastic, far more so than we know.

DREWRY was brought up in this philosophy and he adhered to it throughout his life. He served his party with distinction as chairman of its Democratic National Congressional Committee for many years, ever diligent, alert, capable, intimately acquainted with its wishes and with its general structure in every district in the Nation, but he never lost sight of the old moorings, of the philosophy of government as it had existed and developed from the earliest days of the Republic.

Mr. DREWRY was made chairman of the Democratic National Congressional Committee in 1935, and was reelected every 2 years thereafter upon the organization of the committee. He worked untiringly and his thorough grasp of particular situations in the various districts rendered his work invaluable.

Before Mr. DREWRY entered the House of Representatives he represented the city of Petersburg and the county of Dinwiddie, constituting a State senatorial district for 8 years in the Senate of Virginia.

Mr. DREWRY's work in the Senate of Virginia was very constructive. He was active in the passage of laws promoting the health, education, and comfort of the State and their political and moral uplift and welfare. A leading newspaper of Virginia referred to the vital statistics bill, of which Senator DREWRY was author, as "one of the real constructive pieces of legislation enacted in Virginia in years." As chairman of the fish and game committee of the senate, Senator DREWRY was active in the passage of laws which could protect our wild game and yet give the fullest recreational facilities to the people of Virginia. He helped to enact legislation that would give Virginia better schools and more and better teachers.

Mr. DREWRY was chairman of the State auditing committee, and his experience on that committee afforded him an opportunity to acquaint himself thoroughly with the State's finances and he was the author of the bill providing for an economy and efficiency commission which was enacted. He was made chairman of that commission. That commission worked for 2 years without pay. It made a full survey of the State government and submitted a report to the legislature of 1918. That report formed the basis of several succeeding reports and much legislation was based upon the suggestions of that report. This commission drafted what was known as the budget bill, which was approved in 1918 and was adopted as the model budgetary system by many States of the Union. The Governor of the State of Virginia appointed Mr. DREWRY as chairman of the advisory board on budgets which put the law into effect, and the very satisfactory results obtained as a result of that legislation were due in large part to Mr. DREWRY's wisdom and work.

In the Congress of the United States Mr. DREWRY gave his constituency prompt, energetic, and efficient attention to all matters in which they were interested. He was instrumental in securing various public buildings in his district, notably at Petersburg, Hopewell, Emporia, Blackstone, and Lawrenceville; in securing the establishment of the Petersburg National Military Park and the Appomattox Military Park.

For many years Mr. DREWRY served on the Naval Affairs Committee, attaining the rank of ranking member and vice chairman of the committee. His work there cannot be overestimated. Several years ago Rear Adm. Richard E. Byrd wrote "We would not have the wonderful Navy we have today had it not been for the untiring efforts PAT DREWRY made year after year to build up our great naval forces."

Another unsolicited statement which attests Mr. DREWRY's great work for the Navy came from the Honorable CARL VINSON, of Georgia, chairman of the Naval Affairs Committee of the House. He wrote to Mr. DREWRY:

> As the ranking Democratic member of the House Naval Affairs Committee you have been a tower of strength in the formulation of a strong naval policy. I have relied upon your judgment and your ability more than upon any other member of the committee. Your keen analytical mind, with its legal training, has been most helpful in solving many difficult problems. Among many other tasks, you served as chairman of subcommittees to investigate the sinking of the *Normandie*, and the failure of production at the Brewster Aeronautical Corp. You did a fine piece of work in both assignments and earned the thanks of your Government. Your great talents have been recognized and applauded by your colleagues irrespective of party affiliations.

Mr. DREWRY's efforts helped to build up the United States Navy and he contributed to the great victory won by the United States in the last World War.

From the day that he first qualified as a Member of the House of Representatives to the day of his death, I can say with knowledge whereof I speak, that PATRICK HENRY DREWRY represented the people of his district, the State of Virginia, and the Nation faithfully, ably, and with rare distinction. He did not spare himself in any way in their behalf.

His representation was with dignity. He ignored the playing of petty politics or political favoritism. He gave all the energy and faithfulness of service in his power, and in keeping with the splendid service that had been rendered by illustrious Virginians in the past.

In all truth I say to him, "Well done, thou good and faithful servant. May your slumbers be sweet."

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Virginia [Mr. SMITH].

Mr. SMITH of Virginia. Mr. Speaker, it is with a sense of deep personal loss that I speak of PATRICK HENRY DREWRY, late Representative from the Fourth Congressional District of Virginia.

I was closely and intimately associated with him through the years of my service in the House. He was one of those rare persons whose high character and splendid qualities are appreciated and evaluated more with each passing year.

He was quiet, unassuming, and modest, but with a sense of humor and a human tolerance toward the shortcomings of his fellow beings that endeared him to all who knew him.

He was inherently a philosopher; and no argument, however cogent, had weight with him unless it was bottomed on sound logic.

In all the years we were associated and during all the confidences we exchanged, I never knew him to do or say a mean or malicious thing. The controversies and vicissitudes of political strife never lowered his high principles or tempted him to indulge in petty practices. He pursued his even course, undaunted and undeterred by either praise or criticism.

Few men have ever held the confidence of their constituents so completely and consistently as to effect their election to Congress for 14 consecutive terms without opposition. That PAT DREWRY accomplished this feat attests more than words can speak, his character, his integrity, his ability, and his qualities of statesmanship.

Practically all the years of his adult life were given in unselfish service to his State and to his country. He served for 10 years in the State Senate of Virginia, where his work was of such outstanding quality that, when a vacancy occurred in the House of Representatives from his district, he was elected to the Congress without opposition.

He served on the Naval Affairs Committee of the House through the two major wars, and much of his vitality and energy was devoted to bringing the United States Navy to its position of superiority among the navies of the world.

He enjoyed the confidence of his Democratic colleagues in the House to such an unusual degree that he was chosen as chairman of the Democratic Congressional Election Committee for several consecutive Congresses, and was devoting most of his time to that position at the time of his death.

He will live long in the hearts of his colleagues in the Congress and in the affection of the people of his congressional district who honored him with their confidence for the 28 years of his service in the House of Representatives.

I think none of his colleagues will miss him or mourn his passing more than I.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Virginia [Mr. ALMOND].

Mr. ALMOND. Mr. Speaker, with silent but relentless tread the Grim Reaper, who is no respecter of persons or the evenescent sovereignty of human life, has again invaded our ranks to deliver the inevitable and mandatory summons to a great colleague of sterling quality and commendable virtues, beloved by all who knew him—PATRICK HENRY DREWRY, of Virginia.

I think that I can say without doing violence to the accepted tenets of modesty and decorum, that he who measures up to Virginia's standards of loyalty, fidelity, and greatness in public service needs no further eulogy. In life PAT DREWRY met the test without stint of energy or mental reservation. In death he passes on to those who may succeed him through the years a rich heritage of constructive public service gilded with that patriotism which he poured from a noble heart imbued with unflagging love for his country.

Modest, retiring, jovial, good natured, earnest, sincere, wholesome, able, courageous, zealous in friendship, devoted to duty, kindly and considerate, his record of nearly 28 years of unbroken service in this body without serious challenge from any source conducively attests the love, esteem, and confidence of an enlightened constituency.

PAT DREWRY served Virginia and the Nation long, faithfully, and well. He was ever true to his trust. His shield of service is without tarnish or blemish. He fought the good fight. He kept the faith.

His country will miss him, and beset by peril, can ill afford to lose him.

Mr. BLAND. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks in the RECORD at this point on the death of our beloved colleague, PATRICK DREWRY.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Virginia [Mr. FLANNAGAN].

Mr. FLANNAGAN. Mr. Speaker, PAT'S death was a great blow to me. Yea, more; it was a great personal loss, because he was my friend and I entertained for him a fondness that was akin to love.

Only yesterday, it seems, we were seated in the reading room of the House engaged in one of our many frequent, friendly, and intimate conversations. It is hard for me to believe that our chats are at an end. I rather believe—I do believe—that our chats have only been suspended for a season, and that sometime in the future we will meet again and chat and chat to our hearts' content. Yes; I believe that the joy and happiness of heaven will be added to by a friendly chat with dear old PAT now and then.

He was a Virginian of whom all Virginians were proud. He was made of the fiber from which real men are woven. Pure in heart, sound in judgment, loyal, courageous, patriotic, he faithfully served his people with an eye single to the general welfare of the country he loved. His departure is a great national loss at a time when we need men, real men, men like PAT, in high places.

May his loved ones reap real solace and comfort from the life that he lived, and may his soul rest in peace, is the supplication of one of his many friends.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Virginia [Mr. HARDY].

Mr. HARDY. Mr. Speaker, with the passing of PATRICK HENRY DREWRY, Representative of the Fourth District of Virginia for 27 years, the people of his district, of the Commonwealth of Virginia, and of the United States have lost an able servant. His long record of service is one of quiet efficiency, high honor, and distinction.

Mr. DREWRY had many close relatives in my district. Some of these are very dear friends of mine, and through them I have known him casually for many years. As a freshman Member of the Eightieth Congress it was my privilege to enjoy a more intimate association with this quiet Virginia gentleman, whose friendly help and cooperation have meant so much to me. PAT DREWRY was my friend.

In tribute to PATRICK HENRY DREWRY, and in memory of this man whose ability was recognized and known in many areas of the country, I include in my remarks an editorial from the Norfolk Virginian-Pilot of December 23, 1947:

PATRICK HENRY DREWRY

Representative PATRICK HENRY DREWRY, of Virginia's Fourth Congressional District, who died Sunday night at his home in Petersburg at the age of 73, had served continuously in the House of Representatives since 1920, when he was elected, without opposition, to fill the unexpired term of Representative W. A. Watson, deceased. At the time of his death Mr. DREWRY was dean of Virginia's congressional delegation. The last few years have brought a new group of Virginia Congressmen to the front—HARDY, GARY, STANLEY, ALMOND, HARRISON. Mr. DREWRY belonged to the older group whose survivors are Representatives BLAND, FLANNAGAN, and SMITH. He was, in length of service, the senior of this company, his tenure topping by 2 years, at the time of his death, the quarter-century service of the First District's Representative BLAND.

An examination of the House roll calls between the time of Warren Gamaliel Harding and the time of Harry Truman would disclose a DREWRY voting record marked by a high degree of party regularity touched, during the second half of the Roosevelt tenure, with increasing divergence from the philosophy of the New Deal. An examination of the CONGRESSIONAL RECORD for the same period would disclose very little DREWRY speech making, for the Petersburg Congressman, although an able public speaker when moved to take the floor, was never entranced with the sound of his own voice. His preference was for quiet work in committee and in the party organization—at both of which he excelled. Since 1933 he had been ranking Democratic member of the House Naval Affairs Committee. His service on this committee fell during a period of great naval expansion. The Hampton Roads area found in him an alert and sympathetic student of its expanding naval requirements.

Since 1935, Mr. DREWRY had been chairman of the Democratic Congressional Campaign Committee. In this post, he once remarked, it was his job to elect 435 Democrats to the House of Representatives. With the considerable aid of President Roosevelt, he came as near doing that in 1936 as any chairman of the party's congressional campaign committee had done since the House membership was increased to 435 following the 1910 census. At the 1936 high-tide mark in the party's national fortunes, the Seventy-fifth Congress opened with 333 Democrats in the House to 89 Republicans and a small scattering of independents.

There is something revealing in the fact that the Hoover inundation of 1928 swept every Virginia congressional district into the Republican Presidential column except Representative DREWRY'S Fourth. He had a remarkable talent for political welding. It was founded on personal integrity, on a surpassing gift for making and holding friends, and on meticulous attention to the district's interests. There was no beating this man in the Fourth District. He had served part of the district for 8 years in the State senate before he began serving the whole district in the House of Representatives. In both the State and national legislatures he commanded respect.

Party regularity and responsibility Mr. DREWRY practiced almost as a political religion, but of his own choice—not as anybody's yes-man. He could never be counted in on a party maneuver until he made up his own mind on it. Sometimes—but not often—he parted company with the party's high command. He was a friendly, soft-spoken, and slightly withdrawn member of the State's Democratic hierarchy, far less often in the spotlight than outside it, but he kept his eye on the ball and nearly always emerged with an impressive score. If there are no bold pioneering achievements in his long legislative record, there is plenty in it that reflects the work of an old-school Virginia conservative tackling the problems of a changing period with intelligence and industry, and with unfailing urbanity and good manners.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Virginia [Mr. GARY].

Mr. GARY. Mr. Speaker, my predecessor served in this body for 8 years. During that time there was only one change in the Virginia delegation. Including his resignation, in less than 3 years, there have been six changes in the delegation. Two-thirds of the delegation has changed within that time, which is the largest turn-over certainly within my memory, and possibly within the history of our State.

Let me say to you that of those who have gone the State and Nation could ill afford to lose PATRICK HENRY DREWRY. He was a distinguished Virginian who gave the greater part of his life to the public service. He served with distinction in the State legislature before he came to this body. There he sponsored some of the most important legislation enacted. He introduced legislation that was the forerunner of the State budget in Virginia. He patroned the bill that established the Vital Statistic Bureau of the State, and his name was attached to other important legislation.

From the State legislature he came to this body. Here he served in many important capacities. As a high-ranking member of the Committee on Naval Affairs he contributed substantially to the building of our Navy. He can be counted among those whose efforts brought victory to our Nation in World War II.

But with it all, PAT DREWRY was a kindly man. He had many friends as is evidenced by the fact that he was returned to this body session after session for 28 years without opposition. That is a record which speaks for itself. He was beloved by his own constituency and by the people of the entire State.

As one of those who count themselves proud to be numbered among the friends of PAT DREWRY, I wish at this time to extend my heartfelt sympathy to his family in this hour of their deep bereavement, and to express the hope that they will receive great comfort from the knowledge that he lived a noble and useful life.

Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include an editorial from the Richmond News Leader of Monday, December 22, and an editorial from the Richmond Times-Dispatch of Tuesday, December 23.

The SPEAKER pro tempore (Mr. WOODRUFF). Is there objection to the request of the gentleman from Virginia?

There was no objection.

[From the Richmond (Va.) News Leader of December 22, 1947]

AN EMINENT CONGRESSMAN PASSES

Virginians will read with deep regret today the announcement of the death of one of their most devoted and, in point of service, one of their oldest public men, Congressman PATRICK H. DREWRY, of the Fourth (Petersburg) District. His colleague of the First District, OTIS BLAND, took the oath July 2, 1918, about 21 months ahead of him and, for that reason, is fifth on the list of those "M. C.'s" who have survived all the fluctuations of opinion, and all the changing whims of voters who follow strange gods, economic and political. Mr. DREWRY'S membership began April 27, 1920, after the death of the scholarly and beloved Judge Walter A. Watson. This Congress was the fifteenth in which Mr. DREWRY had represented Virginia. Ten Members, 10 only, remain of those whose names were on the roster the day his was added.

To say this is to pay tribute to Mr. DREWRY'S character and constancy. A less worthy man would not have enjoyed for almost 30 years the unwavering support of such a constituency as that of southside Virginia. He possessed the art of eliminating possible competitors, but it was an art more personal than tactical. It consisted, fundamentally, of deserving and of holding the full confidence of his people both by what he did and by what he left alone. "PAT" DREWRY'S vote always was cast with care. Never was his voice given to any political fad or vagary or act of vengeance. One would not err greatly in setting down the list of his votes on major issues, and in saying of them, "This is what Virginia believed in 1920–47."

Satisfied as all of us were when he was elected to succeed Judge Watson without opposition, some of us regretted deeply his retirement from the State senate where he served magnificently from 1912 to the time he was chosen Congressman. This newspaper can attest that throughout those 8 years Virginia had no legislator more diligent, more definitely open-minded, more discerning, or more courageous. Senator DREWRY was patron of the historic bill for the State registration of vital statistics. His, too, was the responsibility for the creation of the commission on economy and efficiency, whose report of 1918 was the basis of the Conference on Governmental Efficiency, November 1921. The recommendations of that conference took form in the act of March 24, 1922, for the establishment of the Commission on Simplification and Economy of State and Local Government. This Commission, in turn, under the chairmanship of Senator (now Judge) Julien Gunn, presented the renowned report of 1924 that contained the ground plan, so to say, of the Byrd Reorganization Act of 1927. It is proper to write down, therefore, that PAT DREWRY was one of the earliest and most conspicuous of those to whom Virginia owes thanks for the great forward movement in administration that began in 1918 under Gov. Westmoreland Davis.

In Congress Mr. DREWRY was a specialist on naval affairs. These represented an absorbing interest of his alert mind. Few Members of Congress knew more about the technical aspects of ship design, none was more attentive to proper organization and training. In seniority he was second only to CARL VINSON among Democratic members of the Armed Services Committee and was one of its most influential spokesmen. This activity mirrored PAT DREWRY'S long devotion to all that concerned the history of America and in particular of the region where he lived. Essentially an intellectual man, he had much discernment as a student. If he had selected a different career, he would have been distinguished in the teaching and writing of history.

The "Petersburg" District, which now extends from Sussex to Buckingham, has had eminent representation for many years. In the round half-century since the Fifty-fifth Congress three men of outstanding ability have served Southside Virginia—Francis Rives Lassiter (1899–1909), Walter Allen Watson (1913–19), and Patrick Henry Drewry (1920–1947). Fortunate are voters—aye, fortunate and wise—who choose such men. Each of that trio is honored by being mentioned with the others.

[From the Richmond (Va.) Times-Dispatch of December 23, 1947]

REPRESENTATIVE PATRICK HENRY DREWRY

Representative PATRICK HENRY DREWRY had not been in robust health for some years, but his sudden death came as a shock to the people of Virginia.

He was the oldest member of the Virginia congressional delegation in point of service, as well as in years, with the single exception of Representative S. OTIS BLAND, of Newport News. Mr. DREWRY was 72 and had been in the House since 1920, when he succeeded the late Representative Walter A. Watson. Mr. BLAND is 75, and has been in the lower branch since 1919, when he took the seat of the late Representative William A. Jones. Representative HOWARD W. SMITH, who will soon be 65, is next in age and service and has been in the House since 1931, the same year that retiring Representative JOHN W. FLANNAGAN, JR., of Bristol, soon to be 63, entered that branch of the National Legislature. The two Virginia Senators are both 60, and both were born, by a strange coincidence in Martinsburg, W. Va., within a few weeks of one another. The remainder of the Virginia delegation at Washington is in a somewhat lower age bracket.

Representative DREWRY had a fruitful service of several sessions in the State legislature before he went to Congress, upon the death of Representative Watson. His progressive approach to State issues was well exemplified in his sponsorship of the resolution setting up the first of the commissions on simplification and economy to survey the State government and make recommendations for improvement. This report, made in 1918 by that pioneer agency, began a trend toward better government in Virginia which is still being felt and which at this moment is being exemplified in the

studies being made by the Burch commission. As patron of the budget act, giving the Commonwealth a budget for the first time, "PAT" DREWRY rendered another notable service.

Mr. DREWRY's excellent record in the State senate gave him an ideal springboard to Congress. In that body he was particularly active in the field of naval affairs, and was chairman of the House Naval Affairs Committee at a time when the United States Navy was expanded more rapidly and effectively than ever before in the country's history.

He was a wheelhorse in the Democratic Party nationally, for he was chosen in 1935 chairman of the Democratic National Congressional Committee, an agency charged with the task of returning a Democratic majority in Congress every 2 years. His 12-year tenure in this post was longer than that of any of his predecessors, and his success was remarkable, since the party retained its majority in five of the six elections held during the period of his chairmanship.

But although Mr. DREWRY was a key figure in party councils in Congress, he was not "on the inside" to the same extent in Virginia. He seems to have got at cross purposes with the State Democratic organization, and his relations with it were not altogether cordial, although he was respected by its leaders. He was never a member of the inner circle, despite the fact that he seems to have voted with the majority of the organization representatives in the Senate and House on most measures. His blast in opposition to poll-tax repeal in 1945 was likewise in line with the attitude of the machine at the time.

Mr. DREWRY was a useful and effective man in both the State and National Legislatures. A bibliophile and man of scholarly instincts, he viewed the issues of the day with a greater measure of perspective than some of his colleagues. Not spectacular or scintillating, he was thorough and painstaking. He has left the impress of his record and his personality both at Washington and at Richmond, as well as throughout the Fourth District of southside Virginia, where he was a popular and admired figure.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from New York [Mr. ANDREWS].

Mr. ANDREWS of New York. Mr. Speaker, on December 21, a Sunday during the Christmas recess, there passed from this body PATRICK HENRY DREWRY, of Virginia. Quiet, unassuming, modest, not given to extreme and extravagant statements or self-display, PAT DREWRY served the State of Virginia here long and well. Entering upon his duties as a Member of the House April 27, 1920, he was one of its oldest Members and No. 10 among the membership in point of continuous service.

For many years he served at the right hand of the long-time chairman of the Naval Affairs Committee, during which period he likewise contributed immeasurably to the development of our modern Navy in the war just past, and I know that Mr. Vinson will attest to this fact today. He had the great quality of deliberate consideration and wise counsel, and with these he was of inestimable value a year ago in the formation of the present Armed Services Committee. We of this committee valued his heavy contribution to our work in the first session, and I valued him as a great friend of unfailing courtesy and fairness. Virginia has lost a real public servant.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Georgia [Mr. VINSON].

Mr. VINSON. Mr. Speaker, as we are assembled in one of the most critical times in our Nation's history, our hearts are still saddened by the passing of one of the finest gentlemen, one of the most unselfish and devout Americans and one of the ablest Members of this or any other Congress, our beloved friend, the late PATRICK H. DREWRY, of the Fourth District of Virginia.

PAT, as he was known to all of us, was elected to the Sixty-sixth Congress at a special election on April 27, 1920, to succeed the Honorable Walter Allen Watson, and he was reelected to each Congress to and including the Eightieth. With one exception he was elected without opposition.

At the beginning of his congressional career, he was assigned to the Naval Affairs Committee of which I was a member. He and I served side by side for over 27 years. During 16 years of that period I was chairman and I soon began to rely upon his considered opinions and upon his quiet but most effective service. While we were preparing to meet the world-shattering crisis culminating in World War II, no man was more familiar with our naval establishments, and no man did more to build and maintain the truly great Navy which did so much to win the war.

I came to know PAT DREWRY and to love him. I could depend upon his unwavering support in every movement to build our national defense. He was tolerant toward the opinion of others but was most tenacious in his championship of what he believed to be right.

To me he was like my right arm, and I shall ever cherish the memory of this great friend, loyal patriot, and outstanding citizen.

I join with his constituents, his State, and our Nation in extending to his bereaved widow and his family our deepest sympathy.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Massachusetts [Mr. MARTIN].

Mr. MARTIN of Massachusetts. Mr. Speaker, PAT DREWRY measured up to the finest traditions of his historic State. He was an earnest, sincere, conscientious public official. He was a man whose intense patriotism, whose votes and actions, were guided by a sincere purpose to make this a better America.

In these trying and chaotic days, the death of a man like PAT DREWRY is a great national loss.

Our country has always been proud of the fine type of men Virginia has contributed to the service of the Nation. From the very beginning of the Republic, Virginia has had outstanding public officials. They contributed materially to the founding of the new Republic and have had an important part in shaping the onward march of our Nation, and our deceased colleague's service maintained the high idealism of his State.

PAT DREWRY was a kindly man. It was my privilege, in a visit to Virginia, to enjoy his fine southern hospitality at his home. There was revealed to me the fine traits that endeared him to his multitude of friends.

We who were privileged to claim him as a friend join with his family in mourning the death of a fine Christian gentleman, an able statesman, and a stalwart American patriot.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Mississippi [Mr. RANKIN].

Mr. RANKIN. Mr. Speaker, one of the most profound shocks I ever received was the news of the untimely passing of my distinguished friend, PAT DREWRY, one of the few men left who were Members of the House when I first came to Congress.

At that time his office was only a couple of doors from mine. I learned to love him then and to appreciate his great character. My esteem and admiration for him grew steadily with the passing years.

Other Members have spoken of his services to the Nation and especially of his services on the Committee on Naval Affairs. I wish to speak of PAT DREWRY as a Christian gentleman, the highest type of American citizenship. I do not believe I ever met a finer type, a finer exemplification of a Christian life, than PATRICK DREWRY, of Virginia.

I am reminded of the lines of Scotland's immortal poet, Charles Mackay, in which he said:

Tell me, ye winged winds,
That round my pathway roar,
Dost thou not know some spot
Where mortals weep no more?
Some lone and pleasant dell,
Some valley in the west,
Where, free from toil and pain,
The weary soul may rest?
The loud wind softened to a whisper low,
And sighed for pity as it whispered "No!"

Tell me, thou mighty deep,
Whose billows round me play,
Know'st thou some favored spot,
Some island far away,
Where weary man may find
The bliss for which he sighs—
Where sorrow never lives,
And friendship never dies?
The loud waves, rolling in perpetual flow,
Paused for a moment, and signed to answer "No!"

And thou, serenest moon,
That with such holy face
Dost look upon the earth,
Asleep in night's embrace,
Tell me, in all thy round
Hast thou not seen some spot,
Where miserable man
Might find a happier lot?
Behind a cloud the moon withdrew in woe,
And a voice sweet, but sad, responded "No!"

Tell me, my secret soul,
O, tell me, Hope and Faith!
Is there no resting-place
From sorrow, sin and death?
Is there no happy spot,
Where mortals may be blest,
Where grief may find a balm,
And weariness a rest?
Faith, Hope, and Love—best boons to mortals given—
Waved their bright wings, and whispered, "Yes: in Heaven!"

PAT DREWRY has gone to the undiscovered country from whose bourne no traveler returns; but none who knew him doubts that he will safely anchor in a peaceful harbor where the wicked cease from troubling and the weary shall find rest.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Missouri [Mr. SHORT].

Mr. SHORT. Mr. Speaker, "life is a narrow vale between the cold and barren peaks of two eternities. We strive in vain to look beyond the heights, we cry aloud and the only answer is the echo of our wailing cry. From the voiceless lips of the unreplying dead there comes no answer, but in the night of death hope sees a star and listening love can hear the rustle of the wing." Even the skepticism of the famous agnostic melted when confronted by death itself. It was Robespierre, if I recall correctly, who said, at the height of the French Revolution, when the gospel of atheism was being preached: "If there were no God we would have to create one."

And it was St. Augustine who uttered the immortal truth: "Thou hast made us for Thyself, and our hearts are restless until they rest in Thee."

It only goes to show that heart has reason, that reason knows not of, and that life after all is deeper than logic.

The greatest Teacher of all time once said:

I am the resurrection, and the life: he that believeth in Me, though he were dead, yet shall he live:

And whosoever liveth and believeth in Me shall never die.

PATRICK HENRY DREWRY is not dead, because he had supreme faith in Christ. He has left us for a little while, but it will not be too long before each and all of us here this afternoon will shuffle off this mortal coil to join him. It is so reassuring to hear the unshakable faith expressed by Judge FLANNAGAN here this afternoon and we rejoice in the hope that in the not distant future we will be reunited with loved ones and dear ones gone on before.

What a piece of work is man! how noble in reason! how infinite in faculty! in form and moving how express and admirable! in action how like an angel! in apprehension how like a god!

William Shakespeare must have had PAT DREWRY or his prototype in mind when he wrote those words. And magnificent and strong as words are, they are, after all, rather feeble instruments by which to express the deepest longings and feelings of our heart. "I would that my tongue could utter the thoughts that arise in me."

Those of us who were privileged to know PAT DREWRY know this world is better because he lived in it. No person could know PAT DREWRY without liking him. All the kind and generous words spoken here today were so well merited by him. His simplicity and sincerity carried conviction and what he was spoke so loud that I could hardly hear what he said.

He did rank high on the old Naval Affairs Committee. He did much for the Navy. For these many years he sat by the very able chairman, the gentleman from Georgia [Mr. VINSON], on that committee. Since the old committees on Military Affairs and Naval Affairs have been merged into the Armed Services Committee, it has been my privilege to sit through long and exhaustive hearings and always I have been impressed by PAT DREWRY because I cannot remember him ever asking an irrelevant question on any bill. The questions he asked were pertinent ones. He was quiet, modest, humble, but his imperturbability, his sweet serenity, his sound reasoning, and his eminent sense of fairness and justice, particularly his charity for those who held views different from his own, will always be remembered and cherished by every single member of our great committee.

PAT DREWRY possessed a good mind. It was a silent mind, but a very efficient one; and he kept his tongue still long enough for that mind to work. He did have courage, he was devoted to duty, and for over one-third of a century, nearly 36 years, he stood in the public arena with the pitiless searchlight of publicity turned upon him; but year after year, time and time again, the intelligent, patriotic citizenry of the Fourth Virginia District returned him to this body, which in itself is sufficient tribute to the greatness and goodness of any man.

We shall miss him, but we shall thank God that it was our privilege to have served and worked with him, and I, too, feel, as his friend, Judge FLANNAGAN, and as many of his other friends here today feel, that in the future we might be permitted to sit down and have another chat with Pat.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Speaker, there is very little that I can add to these glowing tributes that have been paid to this wonderful man, our late departed colleague. It was my privilege to have been intimately associated with Mr. DREWRY during all of his service in the House. It was my high privilege to have been a guest in his home more than one time. His was a lovely home, his was a lovely family and family life because he was a man who knew how to love and who was a lovable man. This world is richer for his having lived in it. Today it is much poorer that he has passed from its activities and from its scenes. He was a man of character, fundamental character. He was a gentleman in the truest sense of the word. He was a statesman who loved his country, and during all the time of his service he hoped to serve to make it better while he lived and left it better when he died. He did that, in my opinion, to the fullest measure. To his lovely and bereaved family I extend my deepest and sincerest sympathies.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from New York [Mr. COLE].

Mr. COLE of New York. Mr. Speaker, for most of us the glad tidings of the Christmastime from which we have all returned to renew our labors in the quest of solutions to the manifold problems which beset our Nation and the world were marred by the sudden and shocking news that one of our beloved colleagues was without warning snatched from us and gathered into the protective arms of the Almighty Father. Only the day before his passing, the Honorable PATRICK HENRY DREWRY, known to his friends and colleagues as PAT, had been with us in this very Chamber during the closing hours of the recent session, going about the customary conscientious performance of his public duty which was so characteristic of him.

Although he himself will no longer be with us in person, the spirit of PAT DREWRY will remain forever with those of us who knew him, serving constantly as an inspiration to guide us in our day-by-day dealings with one another and to influence our deliberations as we face the arduous tasks of the future. We must meet those responsibilities with the same degree of forthrightness, the same breadth of vision, the same measure of understanding and kindness, and the same unswerving patriotism which were so characteristic of him.

For over 10 years it was my privilege to have served with PAT on the Committee on Naval Affairs of the House, an assignment which he had filled with distinction for nearly 3 decades. During that period of association with him, a rich treasure of fraternal relationship was made available to me which I value among my most precious possessions. For him, his country came first, ahead of self or family, ahead of church or State, ahead of friends or party. Steeped in the rich historical lore of the section of Virginia from which he came, all of his decisions were molded by considerations of what was best for his native land; his constant patriotism qualified him as the namesake of his great forebear, Patrick Henry.

Calm, temperate, reflective, and modest, PAT was never ruffled, never angry, never impetuous. He never spoke an unkind or harsh word to or about his fellow man. Sweet, simple, generous, and considerate and yet with a sparkle of humor and wit, he was the kind of man whose companionship one always enjoyed and whose association with him always left one a better man because of it.

Though all of us will miss PAT, miss his smile, miss his sober judgment, I cannot grieve too deeply in the realization that he has moved along life's eternal pathway a bit ahead of me and the rest of us. My profound gratitude for having known him, for having been exposed to his outstanding manly qualities, for having found him to be a man of God in the body and the spirit, in the flesh, and in the soul, leaving me a better person because of it, outweighs any deep sorrow or sadness I may possess because he has been taken from us. Our country, the State of Virginia, the Congress, and we ourselves are better because PATRICK HENRY DREWRY lived; his memory will always be revered as one of the noble men of America.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from North Carolina [Mr. KERR].

Mr. KERR. Mr. Speaker, it is with a sense of great sorrow to me and I know to all the Members of this House when we realize that our distinguished colleague PATRICK HENRY DREWRY has gone from this earth to that "city which hath foundations, whose builder and maker is God." Mr. DREWRY and I were born not

far apart, and for many years we have had the honor of representing congressional districts in Virginia and North Carolina adjoining and extending more than 50 miles along the States' line.

PAT DREWRY was a gentleman of the type of which any section of this Nation would be proud. He came into this world with a bright and incisive intellect and it remained until the day of his death. As a member of the legislature of his beloved State his rank and esteem have never been surpassed. As a Member of this body his intellect and approach to public matters, both great and small, weighed heavily with his fellow legislators, inspired the confidence of his fellow workers, and won the respect and esteem of the membership of this House, irrespective of party affiliation. He was a partisan, but that characteristic never obscured his patriotism and his love of country. His greatest object in life was to render that service in this biological world which would uplift his fellow man to that relationship which God intended he should attain. His home life was ideal. I join with every Member of the House in the expression of deepest sympathy for his lovely helpmeet, his two fine boys, and their fine families.

What the Old Dominion thought of PATRICK HENRY DREWRY is written in the history of this Republic and can never be effaced as long as that history exists. I am proud that he was my friend. I am proud of my close relationship with him in this great body, and I shall cherish and esteem his fine character and his fine fellowship until I too shall go to that "city which hath foundations, whose builder and maker is God."

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Arizona [Mr. MURDOCK].

Mr. MURDOCK. Mr. Speaker, I would like to add my brief word to the many eulogies that have been spoken. I feel that I have had a part of the heritage of old Virginia. My maternal grandmother came from Virginia to Kentucky. My mother went from Kentucky into Missouri. From Missouri where I was born I went into the far West, thus typifying that which is true of so many Americans—moving west. So I come from the far West to add my feeble word now in praise of a great Virginian.

When I came to this body, only recently it seems, I felt that I should get acquainted at once with Members of this body from Virginia. Before I met the man—the name PATRICK HENRY DREWRY intrigued me. I made haste to meet him, for which I am very, very thankful. I found that he perhaps was not as dramatic as that other great Virginian after whom he was named, but I found that the earlier Patrick Henry could not surpass our friend whom we mourn today in patriotic devotion and zeal for the public good.

We are told that we are a part of all that we have met. We may not be able to assess the contribution to us of those with whom we associate, but I feel that I am a greater man and a better American because I knew and associated with PATRICK HENRY DREWRY. The words of the poet come to me now more fitting than any words that I could frame:

> Green be the turf above thee,
> Friend of my better days!
> None knew thee but to love thee,
> Nor named thee but to praise.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Louisiana [Mr. BROOKS].

Mr. BROOKS. Mr. Speaker, the Members of the House were profoundly saddened during the course of the holidays by the death of our friend, PAT DREWRY. He had been a Member of the House of Representatives since the Sixty-sixth Congress; and we had learned to know and love this quiet son of the State of Virginia.

I, especially, had come to know PAT, as we all affectionately called him, extremely well. I sat next to him on our Committee on Armed Services at its sessions which were held from day to day and time to time. I often sat next to him on the floor of this House; and had occasion to discuss informally with him the many affairs of the committee and the many problems of Congress.

He was always quiet and unassuming. He was always affable and friendly. His views were sound and his judgment good. During the course of the critical war years, and then subsequently during the troublesome postwar period, he always kept his feet on the ground, so to speak. He was not swept away by the turbulent emotions of the crowd; but maintained a calm, sound judgment as others were carried away by the emotions of the moment.

I think Congressman DREWRY was a real credit to his congressional district, his great State, and to the Nation. He will be missed during the course of the debates of this session when dispassionate views will be sorely needed. We have lost PAT DREWRY here; but he has gone to a higher realm where his personality, judgment, and high character will be deeply appreciated.

Mr. Speaker, as long as the State of Virginia continues to send to the Halls of the National Legislature men of the type of PATRICK DREWRY, its place in the annals of history remains secure.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. Mr. Speaker, I could not permit this sad occasion to pass without paying my humble tribute to the memory of my good friend, PATRICK H. DREWRY. To me he typified, he personified, everything that is expected in a perfect gentleman. PATRICK DREWRY was moreover a statesman, scholar, a forceful and productive Member of Congress. As I tender my sympathies to the Virginia delegation, the good people of his district, and to the great State of Virginia, I express the hope and the prayer that God will rest eternally his weary and noble soul.

Mr. BLAND. Mr. Speaker, I yield to the gentleman from North Carolina [Mr. DOUGHTON].

Mr. DOUGHTON. Mr. Speaker, since I have been a Member of the House of Representatives, beginning March 4, 1911, no State has been more ably represented than the Commonwealth of Virginia. It has always had a delegation of strong, able, courageous, and faithful Representatives. Same can be said of her Senators.

The Inspired Writer said:

> Behold the perfect man, and mark the upright, for the end of that man is peace.

Judged by that standard, PATRICK HENRY DREWRY certainly would qualify as among the truly great. I never knew PATRICK HENRY DREWRY to say or do a foolish thing. I have known him from the time he first entered the House of Representatives. We lived in the same hotel last year, and I learned to know him better and admire him more. He was a man of great ability, diligent, faithful, and courageous, and the more you associated with him the more you admired him. He was a truly great Representative in every sense of the word. He honored his district, his State, and the Nation by serving them faithfully and serving them well.

His passing is not only a great loss to the membership of this House and to the Congress of the United States, but to the country which he served so long, so faithfully, and so well.

Mr. MICHENER. Mr. Speaker, in the passing of the late Representative PATRICK H. DREWRY the House has lost another of its outstanding Members. PAT DREWRY was a typical Virginia gentleman, a man of personal charm, strong character, rugged honesty, and a fighter for any cause in which he believed, yet always tolerant of the political and economic views of others. In short, he was an effective and worth-while representative of his people. He occupied a unique position in the House and the center aisle was an imaginary line so far as his friends were concerned.

I join with those who have preceded me in paying tribute to the life, character, and public service of this distinguished man.

Mr. HARRISON. Mr. Speaker, it is with a heavy heart that I speak to the House on the sudden passing of PATRICK HENRY DREWRY.

Mr. DREWRY was a colleague in this House and an intimate friend of my father. Mr. DREWRY came to this body in 1920 and there grew between him and my father an inseparable companionship.

This friendship was renewed and continued between Mr. DREWRY and me. My father knew him as a young man of promise who would win his spurs in the Congress. I knew him as an elder statesman to whom I could turn for counsel and advice. Both of us knew him as a man of impeachable character, absolutely true to his principles, independent and fearless in his judgment, and filled with love of his fellowman.

The Nation and the Commonwealth of Virginia has suffered a grievous loss.

Mr. TIBBOTT. Mr. Speaker, the passing of PATRICK HENRY DREWRY has brought deep sadness to his colleagues in the House of Representatives and has deprived the Virginia delegation of a true friend and a wise counselor.

PAT DREWRY understood the people of the Fourth Congressional District of Virginia. He understood their needs and problems, and he served them with unswerving devotion. They appreciated him as evidenced by the fact that he was elected to 15 consecutive Congresses. He brought to the House of Representatives a vigorous mind and a grand personality. He was possessed with an extreme amount of common sense, always looked upon as one having strong convictions, and above all, was honest and sincere.

When I entered Congress 9 years ago, PAT DREWRY was one of the first Members I had the privilege to meet. He made a profound impression upon my mind. I shall always cherish his memory. His passing is a personal loss, not only to his colleagues of the House and the State of Virginia, but to the entire Nation.

Mr. BLAND. Mr. Speaker, I present a resolution (H. Res. 419) and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. PATRICK H. DREWRY, a Representative from the State of Virginia.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect the House do now adjourn.

The resolution was agreed to.

ADJOURNMENT

Thereupon (at 2 o'clock and 34 minutes p. m.) the House adjourned until tomorrow, Wednesday, January 7, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1160. A letter from the Chairman of the Board of Directors of the Tennessee Valley Authority, transmitting the fourteenth annual report, covering the activities of the Authority during the fiscal year beginning July 1, 1946, and ending June 30, 1947; to the Committee on Public Works.

1161. A letter from the director, national legislative commission, the American Legion, transmitting the financial statement of the American Legion up to and including October 31, 1947; to the Committee on Veterans' Affairs.

1162. A letter from the Acting Secretary of the Navy, transmitting a report, as required by Public Law 313, Eightieth Congress, approved August 1, 1947, which authorized the creation of additional positions in the professional and scientific service; to the Committee on Post Office and Civil Service.

1163. A letter from the Under Secretary of State, transmitting a draft of a proposed bill to amend section 5 of the act of May 28, 1908, as amended; to the Committee on Merchant Marine and Fisheries.

1164. A letter from the Attorney General, transmitting a request for withdrawal of the case of Leopold Tracevskis from those 1,479 cases involving suspension of deportation referred to in letter of November 15, 1947; to the Committee on the Judiciary.

1165. A letter from the Acting Administrator, War Assets Administration, transmitting a fifth supplementary report with respect to chemical plants and facilities, which supplements the report submitted November 12, 1945; to the Committee on Expenditures in the Executive Departments.

1166. A letter from the Acting Administrator, War Assets Administration, transmitting a draft of a proposed bill to amend section 13 of the Surplus Property Act of 1944, as amended, to provide for the disposition to States, political subdivisions, and municipalities of surplus real property for public park, recreational, or historic monument purposes; to the Committee on Expenditures in the Executive Departments.

1167. A letter from the People's Counsel, Public Utilities Commission, District of Columbia, transmitting a report of his official activities for the year ended December 31, 1946, supplementing the report of the Public Utilities Commission submitted on September 22, 1947; to the Committee on the District of Columbia.

1168. A letter from the Secretary of the Interior, transmitting, pursuant to the Helium Act, the report for the fiscal year ended June 30, 1947, concerning the special helium-production fund; to the Committee on Armed Services.

1169. A letter from the Acting Secretary of the Navy, transmitting information required by Public Law 301: the number of such officers, by rank and age groups, above the rank of major in the Army or lieutenant commander of the Navy with the average monthly flight pay authorized by law to be paid to such officers during the 6-month period preceding the date of the report; to the Committee on Armed Services.

1170. A letter from the adjutant general, Veterans of Foreign Wars of the United States, transmitting a report of the proceedings of the Veterans of Foreign Wars of the United States for the fiscal year ended August 31, 1947, including a full and complete report of receipts and disbursements; to the Committee on Armed Services.

1171. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, United States Army, dated May 12, 1947, submitting a report, together with accompanying papers and illustrations, on a beach-erosion study, south shore of Long Island, N. Y., made under the provisions of section 2 of the River and Harbor Act approved July 3, 1930, as amended and supplemented; to the Committee on Public Works.

1172. A letter from the Chairman, Reconstruction Finance Corporation, transmitting a report on the Government-owned tin smelter at Texas City, Tex.; to the Committee on Banking and Currency.

1173. A letter from the Attorney General, transmitting a request for withdrawal of the case of Thor Wilhelm Rostad from those 151 cases involving suspension of deportation referred to in letter of April 15, 1947; to the Committee on the Judiciary.

1174. A letter from the Attorney General, transmitting a request for withdrawal of the case of William Henry Dollah from those 1,479 cases involving suspension of deportation referred to in letter of November 15, 1947; to the Committee on the Judiciary.

1175. A letter from the Secretary of the Treasury, transmitting a draft of a proposed bill to amend the Contract Settlement Act of 1944, to provide that claims under section 17 must be filed within 6 months to be allowable, to stop further accrual of such claims, and for other purposes; to the Committee on the Judiciary.

1176. A letter from the Acting Secretary of the Treasury, transmitting information with respect to the Coast Guard, relative to Public Law 301, Seventy-ninth Congress; to the Committee on Armed Services.

1177. A letter from the Vice Chairman, Federal Communications Commission, transmitting the Thirteenth Annual Report of the Federal Communications Commission, covering the fiscal year 1947; to the Committee on Interstate and Foreign Commerce.

1178. A letter from the Secretary of Agriculture, transmitting copy of a report for the fiscal year ended June 30, 1947, covering the receipts, expenditures, and work of the agricultural experiment stations in the States, Hawaii, Alaska, and Puerto Rico under the Hatch, Adams, Purnell, and supplementary acts, and title 1 of the Bankhead-Jones Act of June 29, 1935, authorizing payments to States, Hawaii, Alaska, and Puerto Rico for agricultural experiment stations; to the Committee on Agriculture.

1179. A letter from the Under Secretary, Department of Agriculture, transmitting the report on cooperation of the United States with Mexico in the control and eradication of hoof-and-mouth disease under the terms of Public Law 8, Eightieth Congress, for the month of November; to the Committee on Agriculture.

1180. A letter from the Clerk of the House of Representatives, transmitting in compliance with requirements of rule III, clause 2, of the Rules of the House of Representatives, a list of reports (H. Doc. No. 491); to the Committee on House Administration and ordered to be printed.

1181. A letter from the Chairman, United States Tariff Commission, transmitting the Thirty-first Annual Report of the United States Tariff Commission; to the Committee on Ways and Means.

1182. A letter from the Chief Clerk, Court of Claims of the United States, transmitting a statement of all judgments rendered by the Court of Claims for the year ended November 30, 1947, the amount thereof, the parties in whose favor rendered, and a brief synopsis of the nature of the claims; to the Committee on the Judiciary.

1183. A letter from the Acting Secretary of the Interior, transmitting a report of all tort claims paid by this Department in the fiscal year 1947; to the Committee on the Judiciary.

1184. A letter from the Secretary of the Treasury, transmitting a combined statement of receipts, expenditures, and balances of the United States Government for the fiscal year ended June 30, 1947; to the Committee on Expenditures in the Executive Departments.

1185. A letter from the Clerk of the House of Representatives, transmitting a report for the period from July 1, 1946, to June 30, 1947, both inclusive, giving names of statutory and contingent-fund employees of the House and their respective compensations, including clerks to Members; the expenditures from the contingent fund and from certain specific appropriations; to the Committee on House Administration.

1186. A letter from the Acting Secretary of the Interior, transmitting a report on the inspection of coal mines by the Bureau of Mines for the period ending June 30, 1947; to the Committee on Education and Labor.

1187. A letter from the Acting Secretary of Commerce, transmitting a report concerning operations under the Federal Airport Act during the fiscal year 1947, including an appendix containing a brief résumé of developments since the end of the fiscal year and up to November 30, 1947; to the Committee on Interstate and Foreign Commerce.

1188. A letter from the president, the Chesapeake & Potomac Telephone Co., transmitting a report of the Chesapeake & Potomac Telephone Co. for the year 1947; to the Committee on the District of Columbia.

1189. A letter from the Postmaster General, Chairman, Board of Trustees, transmitting a report of operations of the Postal Savings System for the fiscal year ended June 30, 1947 (H. Doc. No. 492); to the Committee on Post Office and Civil Service and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BLAND:

H. R. 4832. A bill to provide for a preliminary examination and survey of McKane's Bay, a branch of the Rappahannock River; to the Committee on Public Works.

By Mr. BRADLEY:

H. R. 4833. A bill to create the Interoceanic Canals Commission, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H. R. 4834. A bill to provide aid for persons who served in the United States merchant marine during World War II, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H. R. 4835. A bill to amend the Social Security Act so as to provide a standard for determining the continued absence of parents from the home in cases of aid to dependent children; to the Committee on Ways and Means.

By Mr. BUFFETT:

H. R. 4836. A bill to authorize the purchase of a new post-office site at Omaha, Nebr.; to the Committee on Public Works.

By Mr. FENTON:

H. R. 4837. A bill to provide an engineering study of the mine-water problem of the Pennsylvania anthracite-mining area for the purpose of obtaining information and presenting a solution relating to the health, safety, and economic conditions of the area, State, and Nation as affected by the encroachment of water that progressively floods the mines, threatens to destroy the anthracite reserves of the Nation, contributes to a waste of a valuable natural resource, and seriously affects the whole economy of the anthracite-mining area; to the Committee on Public Lands.

By Mr. FORAND:

H. R. 4838. A bill to extend the period of validity of the act to facilitate the admission into the United States of the alien fiancées or fiancés of members of the armed forces of the United States; to the Committee on the Judiciary.

By Mr. GROSS:

H. R. 4839. A bill to extend further the period during which the admission into the United States of alien fiancées or fiancés of members of the armed forces of the United States may be facilitated; to the Committee on the Judiciary.

By Mr. EATON:

H. R. 4840. A bill to promote the general welfare, national interest, and foreign policy of the United States through necessary economic and financial assistance to foreign countries which undertake to cooperate with each other in the establishment and maintenance of economic conditions essential to a peaceful and prosperous world; to the Committee on Foreign Affairs.

By Mr. HUBER:

H. R. 4841. A bill to grant hospitalization and medical treatment to veterans of occupation forces following World War I on a parity with war veterans; to the Committee on Veterans' Affairs.

H. R. 4842. A bill to amend subsection 602 (f) of the National Service Life Insurance Act of 1940, as amended, to authorize renewal of level premium term insurance for a second 5-year period; to the Committee on Veterans' Affairs.

By Mr. LANE:

H. R. 4843. A bill to amend the act of June 20, 1936, so as to broaden the application of laws governing the inspection of steam vessels to vessels propelled by internal-combustion engines; to the Committee on Merchant Marine and Fisheries.

By Mr. MACKINNON:

H. R. 4844. A bill to appropriate funds for the extension of the 9-foot channel of the Mississippi River above St. Anthony's Falls, Minneapolis, Minn.; to the Committee on Appropriations.

By Mr. McDONOUGH:

H. R. 4845. A bill to provide for the extension and improvement of post-office facilities at Los Angeles, Calif., and for other purposes; to the Committee on Public Works.

H. R. 4846. A bill to amend section 3406 (a) (4) of the Internal Revenue Code; to the Committee on Ways and Means.

By Mr. MEYER:

H. R. 4847. A bill to reimburse uncompensated leave to Government Printing Office employees earned during the fiscal year 1932; to the Committee on House Administration.

By Mr. MITCHELL:

H. R. 4848. A bill to amend subsection (b) of section 328 of subchapter III of title I of the act of October 14, 1940; to the Committee on the Judiciary.

By Mr. MURDOCK:

H. R. 4849. A bill authorizing and directing the Commissioners of the District of Columbia to prepare plans and subsequently construct a divided highway in Foundry Branch substantially in line of Arizona Avenue between Canal Road and Tenley Circle (Wisconsin Avenue), and for other purposes; to the Committee on the District of Columbia.

By Mr. O'HARA:

H. R. 4850. A bill to extend for the period of 1 year the provisions of the District of Columbia Emergency Rent Act, approved December 2, 1941, as amended; to the Committee on the District of Columbia.

By Mr. PLUMLEY:

H. R. 4851. A bill to release and to discharge the Republic of Finland from further financial liability to the United States of America; to the Committee on Foreign Affairs.

By Mr. PRIEST:

H. R. 4852. A bill to promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. RAMEY:

H. R. 4853. A bill to extend veterans' benefits to certain members of the Civil Air Patrol who performed submarine patrol duty during World War II; to the Committee on Veterans' Affairs.

By Mr. REEVES:

H. R. 4854. A bill authorizing and directing the Commissioner of Public Buildings to determine the fair market value of the Fidelity Building in Kansas City, Mo., to receive bids for the purchase thereof, and for other purposes; to the Committee on Public Works.

By Mr. ROBERTSON:

H. R. 4855. A bill to amend the Tariff Act of 1930, as amended, so as to permit the entry free of duty of twine used for baling hay, straw, and other fodder and bedding materials; to the Committee on Ways and Means.

By Mr. HOPE:

H. R. 4856. A bill to delay the liquidation of mineral interests reserved to the United States as required by the Farmers Home Administration Act of 1946, and for other purposes; to the Committee on Agriculture.

By Mr. LESINSKI:

H. J. Res. 285. Joint resolution authorizing the President of the United States of America to proclaim October 11, 1948, General Pulaski's Memorial Day for the observance and commemoration of the death of Brig. Gen. Casimir Pulaski; to the Committee on the Judiciary.

By Mr. DOMENGEAUX:

H. J. Res. 286. Joint resolution to quiet the titles of the respective States, and others, to lands beneath tidewaters and lands beneath navigable waters within the boundaries of such States and to prevent further clouding of such titles; to the Committee on the Judiciary.

By Mr. HOFFMAN:

H. J. Res. 287. Joint resolution directing the executive departments herein named to make available to the House Committee on Expenditures in the Executive Departments certain information in their possession; to the Committee on Ways and Means.

By Mr. HUGH D. SCOTT, JR.:

H. Res. 418. Resolution to express the sense of the House that the United States should resettle Hebrew displaced persons in the American zones of occupation by providing for their transportation to Palestine; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LUCAS:

H. R. 4857. A bill for the relief of Kira and Nina Grigorieff; to the Committee on the Judiciary.

By Mr. MARCANTONIO:

H. R. 4858. A bill for the relief of Pietro Fazzalari; to the Committee on the Judiciary.

By Mr. O'HARA:

H. R. 4859. A bill for the relief of Clarence King; to the Committee on the Judiciary.

By Mr. SCRIVNER:

H. R. 4860. A bill for the relief of Catherine S. Tremayne; to the Committee on the Judiciary.

1068. Also, petition of George Waters, president, Ruskin Townsend Club, No. 1, Ruskin, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1069. Also, petition of Tampa Townsend Club, No. 8, Tampa, Fla., petitioning consideration of their resolution with reference to signing of Discharge Petition No. 7, relative to Townsend plan; to the Committee on Ways and Means.

1070. Also, petition of O. L. Williams, Tampa, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1071. Also, petition of Miss Alice E. Fogleson, Lake Worth, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1072. Also, petition of Mrs. M. L. Norton, secretary, Townsend Club, No. 1, St. Petersburg, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1073. Also, petition of human relations commission, the Protestant Council of the City of New York, petitioning consideration of their resolution with reference to equality in naturalization; to the Committee on the Judiciary.

1074. Also, petition of the Association of State and Territorial Health Officers, petitioning consideration of their resolution with reference to request for careful consideration of the appropriation of adequate funds for the support of the Public Health Service research grant-in-aid program; to the Committee on Appropriations.

SENATE

WEDNESDAY, JANUARY 7, 1948

The Senate met at 1 o'clock p. m.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

O Saviour of the world, Thou who hast a plan for peace and a program for all the nations, make it plain, and make us see it clearly, that we may find that which will work and will have Thy blessing.

Save us from hot heads that would lead us to act foolishly, and from cold feet that would keep us from acting at all.

May Thy Holy Spirit work among us to lead us into all truth. Through Jesus Christ our Lord. Amen.

ATTENDANCE OF SENATORS

STYLES BRIDGES, a Senator from the State of New Hampshire; C. WAYLAND BROOKS, a Senator from the State of Illinois; HARRY FLOOD BYRD, a Senator from the State of Virginia; JAMES P. KEM, a Senator from the State of Missouri; GEORGE W. MALONE, a Senator from the State of Nevada; BURNET R. MAYBANK, a Senator from the State of South Carolina; FRANCIS J. MYERS, a Senator from the State of Pennsylvania; CLAUDE PEPPER, a Senator from the State of Florida; and H. ALEXANDER SMITH, a Senator from the State of New Jersey, appeared in their seats today.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, January 6, 1948, was dispensed with, and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Swanson, one of its reading clerks, informed the Senate that a quorum of the House was present and that the House was ready to proceed with business.

The message also informed the Senate that a committee of three Members had been appointed by the Speaker, on the part of the House of Representatives, to join with the committee on the part of the Senate to notify the President of the United States that a quorum of each House had assembled and that Congress was ready to receive any communication that he may be pleased to make.

The message announced that the House had agreed to a concurrent resolution (H. Con. Res. 130) providing that the two Houses of Congress assemble in the Hall of the House of Representatives on Wednesday, January 7, 1948, at 1:30 o'clock in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make to them.

The message communicated to the Senate the intelligence of the death of Hon. Patrick H. Drewry, late a Representative from the State of Virginia, and transmitted the resolutions of the House thereon.

NOTIFICATION TO THE PRESIDENT OF THE UNITED STATES

Mr. WHERRY and Mr. BARKLEY advanced to the center of the aisle, and Mr. WHERRY said: Mr. President, I wish to announce that the committee appointed by the President pro tempore to wait upon the President of the United States and inform him that the Congress had assembled and was ready to receive any communication he might be pleased to make to it report that they have performed that duty and that the President has indicated a desire to address the two Houses of Congress in person today at 1:30 p. m.

CALL OF THE ROLL

Mr. WHERRY. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Hill	Revercomb
Baldwin	Hoey	Robertson, Va.
Ball	Holland	Robertson, Wyo.
Barkley	Ives	Russell
Brewster	Jenner	Saltonstall
Bricker	Johnson, Colo.	Smith
Bridges	Johnston, S. C.	Sparkman
Brooks	Kem	Stennis
Buck	Knowland	Stewart
Bushfield	Langer	Taft
Byrd	Lodge	Taylor
Cain	Lucas	Thomas, Okla.
Capper	McClellan	Thomas, Utah
Chavez	McFarland	Thye
Connally	McKellar	Tobey
Donnell	Malone	Tydings
Dworshak	Martin	Umstead
Ecton	Maybank	Vandenberg
Ferguson	Millikin	Watkins
Flanders	Moore	Wherry
George	Murray	Wiley
Green	Myers	Williams
Gurney	O'Conor	Wilson
Hatch	O'Daniel	Young
Hayden	Pepper	
Hickenlooper	Reed	

Mr. WHERRY. I announce that the Senator from New Jersey [Mr. HAWKES], the Senator from Wisconsin [Mr. MCCARTHY], and the Senator from Oregon [Mr. MORSE] are necessarily absent on official business of the Senate.

The Senator from Nebraska [Mr. BUTLER] is necessarily absent on official committee business.

The Senator from Indiana [Mr. CAPEHART] is necessarily absent on account of illness.

The Senator from Kentucky [Mr. COOPER] is necessarily absent.

The Senator from Oregon [Mr. CORDON] is necessarily absent on official business of the Committee on Public Lands.

Mr. LUCAS. I announce that the Senator from California [Mr. DOWNEY], the Senators from Louisiana [Mr. ELLENDER and Mr. OVERTON], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from West Virginia [Mr. KILGORE], the Senator from Washington [Mr. MAGNUSON], the Senator from Rhode Island [Mr. MCGRATH], and the Senator from Connecticut [Mr. MCMAHON] are absent on public business.

The Senator from Mississippi [Mr. EASTLAND], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from New York [Mr. WAGNER] are necessarily absent.

The Senator from Nevada [Mr. MCCARRAN] is absent on official business.

The PRESIDENT pro tempore. Seventy-six Senators having answered to their names, a quorum is present.

LEAVE OF ABSENCE

Mr. MARTIN asked and obtained consent that he be excused from attendance on the sessions of the Senate on Friday, January 9, 1948, and Monday, January 12, 1948.

JOINT MEETING OF THE TWO HOUSES

The PRESIDENT pro tempore. The Chair lays before the Senate a concurrent resolution coming over from the House of Representatives, which will be read.

The concurrent resolution (H. Con. Res. 130) was read, considered by unanimous consent, and agreed to, as follows:

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Wednesday, January 7, 1948, at 1:30 o'clock in the afternoon, for the purpose of receiving such communications as the President of the United States shall be pleased to make to them.

Mr. WHERRY. Mr. President, it is the intention, and I ask that Senators take notice, that the Senate shall return to its Chamber after the joint meeting shall be dissolved.

At this time I ask unanimous consent that when the Senate reconvenes it proceed to the consideration of morning business, so that all Senators may have opportunity to introduce bills or resolutions as they may desire.

The PRESIDENT pro tempore. Without objection, the order is made.

Mr. WHERRY. The hour of 1 o'clock and 12 minutes having arrived, under the practice heretofore followed I ask that the Senate do now proceed to the Hall of the House of Representatives for

the joint meeting of the two Houses pursuant to the provisions of the concurrent resolution just agreed to by the Senate.

The PRESIDENT pro tempore. Without objection, that procedure will be followed, and the Senate will now proceed to the Hall of the House of Representatives for the joint meeting with the House to receive a message from the President of the United States. Senators will remember that the Senate is to reassemble at the conclusion of the joint session.

Thereupon (at 1 o'clock and 12 minutes p. m.) the Senate, preceded by its Secretary (Carl A. Loeffler), its Sergeant at Arms (Edward F. McGinnis), and the President pro tempore, proceeded to the Hall of the House of Representatives to hear the annual message of the President of the United States.

ANNUAL MESSAGE OF THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 493)

(The annual message of the President of the United States this day delivered by him to the joint meeting of the two Houses of Congress appears at p. 33 of the proceedings of the House of Representatives in today's CONGRESSIONAL RECORD.)

LEGISLATIVE SESSION

The joint meeting of the two Houses having been dissolved, the Senate returned to its Chamber at 2 o'clock and 21 minutes p. m., and was called to order by the President pro tempore.

COMMITTEE MEETING

Mr. MOORE. Mr. President, I ask unanimous consent that the senior Senator from Missouri [Mr. DONNELL] and I may be excused from the Senate at this time, in order to attend a hearing by a subcommittee of the Committee on the Judiciary.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

AMENDMENT OF SECTION 5 OF THE ACT OF MAY 28, 1908, RELATING TO YACHTS

A letter from the Acting Secretary of State, transmitting a draft of proposed legislation to amend section 5 of the act of May 28, 1908, as amended, to remove the present discrimination against yachts which do not belong to regularly organized yacht clubs (with an accompanying paper); to the Committee on Interstate and Foreign Commerce.

AMENDMENT OF CONTRACT SETTLEMENT ACT OF 1944

A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to amend the Contract Settlement Act of 1944, to provide that claims under section 17 must be filed within 6 months to be allowable, to stop further accrual of such claims, and for other purposes (with an accompanying paper); to the Committee on the Judiciary.

FLIGHT PAY OF CERTAIN OFFICERS OF THE COAST GUARD

A letter from the Acting Secretary of the Treasury, reporting, pursuant to law, information as to rank and age of officers above the rank of lieutenant commander in the Coast Guard on duty involving flying with the average monthly flight pay authorized by law to be paid to such officers during the 6 months ended December 31, 1947; to the Committee on Appropriations.

REPORT OF NATIONAL FOREST RESERVATION COMMISSION (S. DOC. NO. 116)

A letter from the Secretary of the Army, as president of the National Forest Reservation Commission, transmitting, pursuant to law, a report of that Commission for the fiscal year ended June 30, 1947 (with accompanying papers); to the Committee on Agriculture and Forestry, and ordered to be printed with an illustration.

FLIGHT PAY OF CERTAIN OFFICERS OF THE NAVY

A letter from the Acting Secretary of the Navy, reporting, pursuant to law, information as to rank and age of officers above the rank of lieutenant commander in the Navy on duty involving flying, with the average monthly flight pay authorized by law to be paid to such officers during the 6 months ended December 31, 1947; to the Committee on Appropriations.

REPORT ON PROFESSIONAL AND SCIENTIFIC PERSONNEL IN THE NAVY

A letter from the Acting Secretary of the Navy, transmitting, pursuant to law, a report of the filling of three positions in the professional and scientific services of the Navy, together with statements of qualifications and duties performed in each case (with accompanying papers); to the Committee on Post Office and Civil Service.

SUSPENSION OF DEPORTATION OF ALIENS—WITHDRAWAL OF NAME

A letter from the Attorney General, withdrawing the name of Leopold Tracevskis from a report relating to aliens whose deportation he suspended more than 6 months ago, transmitted by him to the Senate on November 15, 1947; to the Committee on the Judiciary.

REPORT ON HELIUM PRODUCTION FUND

A letter from the Secretary of the Interior, transmitting, pursuant to law, a report of the amount of moneys credited to the helium production fund and the amount of disbursements made therefrom for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Armed Services.

FINAL REPORT OF PHILADELPHIA NATIONAL SHRINES PARK COMMISSION

A letter from the Secretary of the Interior, transmitting, pursuant to law, the final report of the Philadelphia National Shrines Park Commission concerning the establishment of a national historical park in the city of Philadelphia (with an accompanying report); to the Committee on Public Lands.

TORT CLAIMS PAID BY DEPARTMENT OF THE INTERIOR

A letter from the Acting Secretary of the Interior, transmitting, pursuant to law, a report of all tort claims paid by the Department of the Interior for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on the Judiciary.

REPORT ON INSPECTION OF COAL MINES BY THE BUREAU OF MINES

A letter from the Acting Secretary of the Interior, transmitting, pursuant to law, a report on the inspection of coal mines by the Bureau of Mines for the period ended June 30, 1947 (with an accompanying report); to the Committee on Labor and Public Welfare.

ISLANDS IN RED RIVER, OKLA.

A letter from the Acting Secretary of the Interior, transmitting a draft of proposed legislation to extend the public land laws of the United States to certain lands, consisting of islands, situated in the Red River in Oklahoma (with an accompanying paper); to the Committee on Public Lands.

REPORT ON AGRICULTURAL EXPERIMENT STATIONS

A letter from the Secretary of Agriculture, transmitting, pursuant to law, a report covering the receipts, expenditures, and work of the agricultural experiment stations in the United States, Hawaii, Alaska, and Puerto Rico, for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Agriculture and Forestry.

REPORT ON REGIONAL RESEARCH LABORATORIES

A letter from the Secretary of Agriculture, transmitting, pursuant to law, his report of the activities of, funds used by, and donations to, the Regional Research Laboratories, calendar year 1947 (with an accompanying report); to the Committee on Agriculture and Forestry.

REPORT ON CONTROL AND ERADICATION OF FOOT-AND-MOUTH DISEASE

A letter from the Under Secretary of Agriculture, transmitting, pursuant to law, a report on cooperation of the United States with Mexico on the control and eradication of foot-and-mouth disease for the month of November 1947 (with an accompanying report); to the Committee on Agriculture and Forestry.

REPORT OF CIVIL AERONAUTICS ADMINISTRATION

A letter from the Acting Secretary of Commerce, transmitting, pursuant to law, the annual report of the Civil Aeronautics Administration, fiscal year 1947, including an appendix containing a brief résumé of developments since the end of the fiscal year and up to November 30, 1947 (with accompanying papers); to the Committee on Interstate and Foreign Commerce.

REPORT OF UNITED STATES TARIFF COMMISSION

A letter from the Chairman of the United States Tariff Commission, transmitting, pursuant to law, the thirty-first annual report of that Commission for the year 1947 (with an accompanying report); to the Committee on Finance.

REPORT OF RECONSTRUCTION FINANCE CORPORATION AND SUBSIDIARIES

A letter from the Chairman of the Board of Directors of the Reconstruction Finance Corporation, transmitting, pursuant to law, a report of that Corporation and its subsidiaries up to and including June 30, 1947, together with consolidated balance sheet and financial statements of operating results (with accompanying papers); to the Committee on Banking and Currency.

REPORT ON TIN SMELTER AT TEXAS CITY, TEX.

A letter from the Chairman of the Board of Directors of the Reconstruction Finance Corporation, transmitting, pursuant to law, a report on the Government-owned tin smelter at Texas City, Tex. (with accompanying papers); to the Committee on Banking and Currency.

REPORT OF FEDERAL COMMUNICATIONS COMMISSION

A letter from the Vice Chairman of the Federal Communications Commission, transmitting, pursuant to law, the thirteenth annual report of that Commission for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

SUPPLEMENTAL REPORT OF WAR ASSETS ADMINISTRATION ON CHEMICAL PLANTS AND FACILITIES

A letter from the Acting Administrator of the War Assets Administration, transmitting, pursuant to law, the fifth supplemental report of that Administration with respect to chemical plants and facilities (with an accompanying report); to the Committee on Expenditures in the Executive Departments.

REPORT OF SECRETARY OF THE SENATE

A letter from the Secretary of the Senate, transmitting, pursuant to law, a report of the receipts and disbursements of the Secretary of the Senate for the fiscal year ended June 30, 1947 (with an accompanying report); ordered to lie on the table and to be printed.

REPORT OF FINANCES OF AMERICAN LEGION

A letter from the director of the national legislative committee of the American Legion, Washington, D. C., transmitting, pursuant to law, a copy of the financial statement of the Legion up to and including October 31, 1947 (with an accompanying report); to the Committee on Finance.

REPORT OF TENNESSEE VALLEY AUTHORITY

A letter from the Board of Directors of the Tennessee Valley Authority, transmitting, pursuant to law, the annual report of that Authority for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Public Works.

JUDGMENTS RENDERED BY COURT OF CLAIMS (S. Doc. No. 115)

A letter from the Chief Clerk of the Court of Claims of the United States, transmitting, pursuant to law, a statement of all judgments rendered by the Court of Claims for the year ended November 30, 1947, the amount thereof, the parties in whose favor rendered, and a brief synopsis of the nature of the claims (with accompanying papers); to the Committee on Appropriations, and ordered to be printed.

REPORT OF CHESAPEAKE & POTOMAC TELEPHONE CO.

A letter from the president of the Chesapeake & Potomac Telephone Co., transmitting, pursuant to law, the annual report of that company for the year 1947 (December operations estimated) (with an accompanying report); to the Committee on the District of Columbia.

SUPPLEMENTAL REPORT OF PUBLIC UTILITIES COMMISSION OF THE DISTRICT OF COLUMBIA

A letter from the People's Counsel of the District of Columbia, transmitting, pursuant to law, a supplemental report of the Public Utilities Commission, transmitted on November 17, 1947, of the official activities of the People's Counsel for the year ended December 31, 1946 (with an accompanying report); to the Committee on the District of Columbia.

PETITIONS

Petitions, etc., were laid before the Senate and referred as indicated:

By the PRESIDENT pro tempore:

The petition of Ohio Bell, of Chicago, Ill., praying for the enactment of legislation for redress of certain grievances denied him under Public Law No. 12, Sixty-third Congress; to the Committee on Armed Services.

Resolutions adopted by the Common Council of the City of Milwaukee, Wis.; the Adult Education and Social Action Committee, the Anti-Inflation Council, and the Vladeck Houses Tenants Council, of New York, N. Y., favoring the enactment of legislation to control prices and the cost of living; to the Committee on Banking and Currency.

The petition of Simon Bass, of Culver City, Calif., praying for the enactment of legislation to set aside Finland's future payments on its World War I debt to the United States for the education of Finnish youth in the United States; to the Committee on Finance.

Petitions of sundry citizens of the State of Florida, praying for the enactment of the so-called Townsend plan, to provide old age assistance; to the Committee on Finance.

A resolution adopted by the National Executive Board of the National Lawyers Guild, Washington, D. C., favoring the enactment of legislation to make lynching a Federal crime; to the Committee on the Judiciary.

A letter from The Ruling Archbishop and Diocesan Council, American and Canadian Diocese of the Russian Orthodox Greek-Catholic Church, Inc., New York, N. Y., signed by Archbishop Vitaly, relating to the displaced-persons problem (with an accompanying paper); to the Committee on the Judiciary.

A resolution adopted by the National Association of Assessing Officers, Chicago, Ill., favoring the enactment of legislation to make available all information in the possession of Federal departments, agencies, and corporations necessary to the local assessment officers; to the Committee on Interstate and Foreign Commerce.

The petition of the Council of Bishops of the Methodist Church, Atlantic City, N. J., praying for the enactment of legislation to amend the laws governing communications so that television will be free from all kinds of advertising of beverage alcohol and that advertisements of liquor be prohibited from all the media of communications; to the Committee on Interstate and Foreign Commerce.

A resolution adopted by the Board of Managers of the National Congress of Parents and Teachers, Washington, D. C., favoring aid to war-blighted countries, especially to children and teachers; to the Committee on Foreign Relations.

A resolution adopted by the Association of State and Territorial Health Officers, Washington, D. C., favoring a program of grants for research in the field of environmental sanitation; to the Committee on Labor and Public Welfare.

A resolution adopted by the County Board of Supervisors of Milwaukee County, Wis., favoring the enactment of legislation to authorize the creation of a national cemetery at some appropriate location in the State of Wisconsin; to the Committee on Public Lands.

A resolution adopted by the National Association of Assessing Officers, Chicago, Ill., favoring the enactment of legislation providing that whenever the United States or any of its agencies acquire land for the purpose of setting such land aside or for use as a site for private enterprise, such land and any buildings, structures, or fixtures attached to and forming a part of such land, shall be subject to taxation by the several States and their political subdivisions; to the Committee on Public Lands.

The petition of Josef and Eugenie Geiger, of Milwaukee, Wis., praying for the enactment of legislation to create a Nation-wide health, safety, and atomic age cultural Federal building program, to protect the civilian population against atomic bombing and germ warfare; to the Committee on Public Works.

PROBLEMS OF AGRICULTURE—TELEGRAM FROM TOM LINDER

Mr. CAPPER. Mr. President, I have received an interesting telegram from Tom Linder, prominently connected with the agricultural industry of Georgia, in which he expresses some interesting views on the problems of agriculture. I present the telegram for appropriate reference and ask unanimous consent that it may be printed in the RECORD.

There being no objection, the telegram was referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

ATLANTA, GA., *January 6, 1948.*

Hon. ARTHUR CAPPER,

Member, United States Senate:

My information is that during 1947 Anderson-Clayton Cotton Co. were 20,000 bales long and 3,020,000 bales short in cotton futures. The evil of futures trading is in permitting short sales.

If a man were permitted to sell Ford cars on a futures market and then if called on his sales he were permitted to deliver old dilapidated, worn, and discarded Fords so as to force the manufacturer to take less than cost of production, you would have a situation analogous to permitting delivery of any and all grades at 10 different points in the United States in order to force the farmers to produce cotton at less than cost.

The same thing applies to futures of other farm commodities. The records in the office of Commodity Credit Corporation showed that Anderson-Clayton Cotton Co. sold to the Government 255,000 bales of cotton on or about January 29, 1944, at approximately $13 a bale above the market price on the date of sale.

Why not investigate and see what Commodity Credit Corporation was allowing the farmers for their cotton at the same time?

The most important thing to determine while investigations are being made, is to find out who was short on the futures markets. The short sellers are the enemies of agriculture.

The Commodity Markets Act should be so amended as to prohibit short selling. Hedging should be put on the same basis as straight out buying and selling of futures. Under present arrangement big dealers who are also spot buyers or spinners can sell the market short under pretext of hedging.

It is a well-known fact through the cotton belt that Anderson-Clayton Cotton Co. and McFadden Brothers have what amounts to a corner or monopoly in buying the farmers' cotton. This has been well known for years.

Cotton futures were originally designed by British cotton spinners for the purpose of selling futures to speculators in order to take speculators out of the market for actual cotton, thus giving the British spinner a free field to buy the farmers' cotton without speculative competition.

It is ridiculous to permit foreign capital to be used in selling the farmers' crop short.

Only the fact that the farmer does not understand these things has made it possible for this great injustice to be continued. While the iron is hot, why not straighten this thing out?

Every reasonable man knows that the spot house processor and manufacturer could not sell hedges were it not for the speculators to buy those hedges.

When the President of the United States, the Secretary of Agriculture and other officials of the Government lend themselves to try to force speculators out of the market they are simply trying to help steal the farmers' crop and they should be stopped by the Congress by whatever means is required to stop them.

Please note Georgia market bulletin of Wednesday, January 7, 1948.

TOM LINDER.

REDUCTION IN COSTS OF GOVERNMENT

Mr. WHERRY. Mr. President, I should like to call the attention of the Members of the Senate to the fact that many have fixed ideas as to the basic causes of the present high living costs and inflation, and the remedies. I have read no article anywhere which more forcefully sets out the causes and the remedies than does a very short editorial appearing in the Omaha World-Herald of December 29, 1947. I agree with the editorial in toto, and ask that at this point in my remarks it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

IT WILL TAKE SOME GUTS

The other day an official Soviet spokesman, irked by American comment on Russia's confiscation of rubles, retorted that the United States has money troubles, too.

The dollar of 1947, he said, is really worth only 50 cents. Thus the American people have been "taxed" by inflation, just as the Russian people were "taxed" by seizure of the rubles.

He was as right as can be.

The American who had saved a little money prior to the war, or who now is living on a fixed income of prewar dollars, has been taxed approximately 50 percent of his holdings or his income.

The unfortunate thing about the American capital levy is that the Government, which caused the inflation, refuses to accept the blame. It denounces business for charging high prices. It threatens to reimpose controls. But it declines to face the fact that inflation is the product of national fiscal policy.

Inflation results from an excess of buying power. Buying power is a result of money in circulation, and money and credit in banks. Both are directly controlled by the Government.

During the war money and credit were vastly inflated by Government borrowing and spending. Government bonds were stuffed into banks, thereby automatically creating more credit and forming the basis for issuance of more currency. Thus the real value of the dollar was deflated.

Now, in a relatively free market, the dollar is seeking its level. Already some prices have become virtually stable. Others—on products that are in the greatest demand—are still advancing. Those will continue to go up—either in a free market or a black market—until the surplus of buying power has been soaked up; until the dollar reaches its new par.

Currently the Government has stopped its borrowing. Thus it no longer is pumping inflation into the economic system. If that policy is continued, stability should be near at hand—on the basis of a 50- or perhaps a 45-cent dollar.

What can the Government now do to hasten stabilization?

Nebraska's Senator WHERRY answered that question last week, candidly.

The administration and the Congress, he said, can join forces "in a statesmanlike slash in the huge cost of the Federal Government." Such a policy, he admits, "is going to take some guts." But it is the only effective anti-inflationary policy.

And the Senator concluded:

"All this talk about price controls and rationing completely misses the primary causes of inflation. They aim at treatment of the symptoms rather than the disease."

Treating the symptoms, rather than the disease, has one inevitable result: Trouble always breaks out in a new place. The people discovered that in the days of OPA.

Actually, responsible officials of Government don't want to bring back the 100-cent dollar. If they did, and if they should succeed, the national income would diminish, dollarwise, so greatly that the national debt could not be financed. Either the country must put up with the cheap dollar for many, many years or it will have to repudiate its debt—and thereby bring on the most devastating depression ever known.

The thing that can be done and should be done is to stabilize the dollar at something like its present actual value.

That can be done by reducing the cost of government, by making prudent payments on the national debt, and by reducing taxes to such an extent that Americans again will have an incentive to work and produce.

Such a program doesn't have much political glamour. In Senator WHERRY's words, it will take some guts. But it is the only program that offers a prospect of success.

THE KANSAS CITY SCANDAL—EDITORIAL FROM THE ST. LOUIS POST-DISPATCH

Mr. KEM. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an editorial entitled "The Kansas City Scandal," published in the St. Louis Post-Dispatch of December 18, 1947.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE KANSAS CITY SCANDAL

The investigation of Attorney General Clark's handling of the Kansas City vote frauds case which Senator KEM is urging should by all means be made.

Mr. Clark whitewashed the scandal by declaring it had been thoroughly investigated when, as was subsequently brought out, nothing had been done worthy of the name of investigation. He continued to stall until so much heat was put on him that he was forced, belatedly, to appoint a special prosecutor.

Senate Democrats aided and abetted Mr. Clark in this political maneuver against the impartial operation of justice. They filibustered to death Senator KEM's resolution at the last session of Congress for an investigation of the Attorney General. The present move for investigation is designed to bypass the filibuster by having it done by an existing committee without a further vote by the Senate.

The investigators should not be content to discover why no more has been done in the past. They should inquire why more is not being done now. Here was a primary election in which a grand jury investigation found wholesale fraud. The grand jury returned several indictments and the ballot boxes containing the evidence to support the indictments were impounded. The safe in the Jackson County courthouse was blown open and the ballot boxes were stolen.

The earmarks were those of an inside job performed by a few men who knew exactly how to get in and what boxes to take. This shouldn't be a hard case to solve, yet the FBI, which is supposed to have been on it for months, hasn't caught the safe blowers yet, though it is nabbing culprits in intrinsically more difficult cases all over the country every day.

Altogether, the Kansas City scandal cries for exposure in all its aspects.

GREAT LAKES-ST. LAWRENCE SEAWAY—REPORT OF A COMMITTEE

Mr. WILEY. Mr. President, from the Committee on Foreign Relations, I report favorably with amendments the joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof; expressing the sense of the Congress with respect to the negotiation of certain treaties; providing for making the St. Lawrence seaway self-liquidating; and for other purposes, and I submit a report—No. 810—thereon.

I wish to say that the Committee on Foreign Relations, to which the joint resolution was referred, approved the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin project, with the exception of certain provisions thereof, expressing the sense of the Congress with respect to the negotiation of certain treaties providing for making the St. Lawrence seaway self-liquidating, and for other purposes. The committee recommends that the joint resolution be passed.

The PRESIDENT pro tempore. The report will be received, and the joint resolution will be placed on the calendar.

Subsequently, Mr. LODGE submitted the views of the minority of the Committee on Foreign Relations, on the foregoing joint resolution (S. J. Res. 111), which were ordered to be printed as part 2 of Report No. 810.

THE VOICE OF AMERICA PROGRAM—REPORT OF A COMMITTEE (S. REPT. NO. 811)

Mr. SMITH. Mr. President, from the Committee on Foreign Relations, I report favorably with amendments the bill (H. R. 3342) to enable the Government of the United States more effectively to carry on its foreign relations by means of promotion of the interchange of persons, knowledge, and skills between the people of the United States and other countries, and by means of public dissemination abroad of information about the United States, its people, and its policies, otherwise known as the Voice of America program. I ask unanimous consent to file the report to accompany the bill when the report is prepared within the next day or two.

The PRESIDENT pro tempore. The bill will be received and placed on the calendar; and, without objection, the report may be filed as requested by the Senator from New Jersey.

TABLE RELATING TO COMMITTEE ASSIGNMENTS

Mr. ECTON. Mr. President, I hold in my hand a table prepared by the Legislative Reference Service. The table deals with Senate committee assignments during the Seventy-ninth Congress, and Senate committee assignments during the Eightieth Congress, after the Legislative Reorganization Act went into effect. The data are taken from the official records of the Senate. The table shows that the total number of Senate committee assignments has decreased from 1,030 during the Seventy-ninth Congress, to 516 during the first session of the Eightieth Congress, or a reduction of 50 percent. It also shows that the average number of committee assignments of all kinds for each Senator has decreased from 10.7 to 5.4 since 1946. I ask unanimous consent that the table may be printed in the body of the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Senate committee assignments

	Standing committees	Subcommittees	Special committees	Total	Average seats per Senator
79th Cong.	472	466	92	1,030	10.7
80th Cong.	201	288	27	516	5.4
Change	−271	−178	−65	−514	−5.3

REPORT OF PERSONNEL AND FUNDS BY COMMITTEE ON THE DISTRICT OF COLUMBIA

Pursuant to Senate Resolution 123, Eightieth Congress, first session, the following report was received by the Secretary of the Senate:

REPORT OF COMMITTEE ON THE DISTRICT OF COLUMBIA

DECEMBER 31, 1947.

TO THE SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eightieth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from July 1 to December 31, 1947, together with the funds available to and expended by it and its subcommittees:

J. George Stewart, chief clerk; rate of gross annual salary, $8,023.09; total salary received, $4,011.54.

James R. Kirkland, counsel; rate of gross annual salary, $8,971.11; total salary received, $4,485.55.

Edna L. Ward, stenographic secretary; rate of gross annual salary, $3,626.56; total salary received, $1,813.28.

Ruth W. Wood, stenographic clerk; rate of gross annual salary, $3,295.51; total salary received, $1,647.75.

Funds authorized or appropriated for committee expenditure, balance remaining July 1	$7,882.14
Amount expended July 1 through Dec. 31, 1947	361.38
Balance unexpended	7,520.76

C. D. BUCK,
Chairman.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GURNEY:

S. 1925. A bill to convey certain land to the city of Pierre, S. Dak.; to the Committee on Public Lands.

By Mr. LANGER:

S. 1926. A bill for the relief of Mrs. Nagibe Chalhoub;

S. 1927. A bill for the relief of Adaniandos C. Arakas;

S. 1928. A bill for the relief of Tanios Elias Rahme; and

S. 1929. A bill for the relief of Evangelos Christoforatos; to the Committee on the Judiciary.

By Mr. CAIN (by request):

S. 1930. A bill to provide additional compensation for employees of the Federal Government and of the government of the District of Columbia; and

S. 1931. A bill to provide additional compensation for postmasters and employees of the postal service; to the Committee on Post Office and Civil Service.

By Mr. MURRAY:

S. 1932. A bill for the relief of Dorothea Singer; to the Committee on the Judiciary.

S. 1933. A bill to authorize the Secretary of the Interior to convey certain lands in the State of Montana to school district 55, Roosevelt County, Mont.; to the Committee on Public Lands.

By Mr. BUSHFIELD:

S. 1934. A bill relating to the leasing of Indian lands;

S. 1935. A bill to authorize and direct the Secretary of the Interior to issue to Paul Afraid of Horses a patent in fee to certain land;

S. 1936. A bill to authorize and direct the Secretary of the Interior to issue to Cora M. Rogers a patent in fee to certain land;

S. 1937. A bill to authorize and direct the Secretary of the Interior to issue to Todd Edward Fast Wolf a patent in fee to certain land;

S. 1938. A bill to authorize and direct the Secretary of the Interior to issue to William Voice a patent in fee to certain land;

S. 1939. A bill to authorize and direct the Secretary of the Interior to issue to George G. Nichols a patent in fee to certain land;

S. 1940. A bill to authorize and direct the Secretary of the Interior to issue to Julia Richard Red Willow a patent in fee to certain land;

S. 1941. A bill to authorize and direct the Secretary of the Interior to issue to John F. Compton, formerly John Crazy Bull, a patent in fee to certain land;

S. 1942. A bill to authorize and direct the Secretary of the Interior to issue to Wallace Gilbert Nichols a patent in fee to certain land;

S. 1943. A bill to authorize and direct the Secretary of the Interior to issue to George Swift Bird a patent in fee to certain land;

S. 1944. A bill to authorize and direct the Secretary of the Interior to issue to William Burning Breast a patent in fee to certain land; and

S. 1945. A bill to authorize and direct the Secretary of the Interior to issue to Joseph War Chief a patent in fee to certain land; to the Committee on Public Lands.

By Mr. IVES:

S. 1946. A bill for the relief of Panagiotis Carvelas; to the Committee on the Judiciary.

By Mr. KNOWLAND:

S. 1947. A bill authorizing a review of the report on the Interoceanic Canal across Nicaragua contained in House Document No. 139, Seventy-second Congress, first session; and

S. 1948. A bill relating to the construction, maintenance, and operation of an interoceanic canal over Nicaraguan territory; to the Committee on Armed Services.

(Mr. BALDWIN introduced Senate bill 1949, to provide additional compensation for postmasters and employees of the postal service, which was referred to the Committee on Post Office and Civil Service, and appears under a separate heading.)

By Mr. TAFT:

S. 1950. A bill to provide for a decennial census of housing; to the Committee on Post Office and Civil Service.

By Mr. ROBERTSON of Wyoming:

S. 1951. A bill to abolish the Jackson Hole National Monument as created by proclamation No. 2578, dated March 15, 1943, and to provide for administration of all public lands therein by the National Park Service of the Department of the Interior, or by the Forest Service of the United States Department of Agriculture, and to finally determine the area to be included within the exterior boundary of the Grand Teton National Park, and for other purposes; to the Committee on Public Lands.

INCREASE IN WAGES OF POSTAL EMPLOYEES

Mr. BALDWIN. Mr. President, I introduce for appropriate reference a bill which provides additional compensation for employees in the field service of the Post Office Department. I think there can be little doubt among the Members of the Senate that the present economic conditions have reduced considerably the purchasing power of the present-day salary dollar. I am firmly convinced that of all Federal employees postal workers are most in need of an increase.

The bill I have introduced provides for an increase of $800 per annum for those employees whose compensation is fixed at an annual rate. Postal personnel paid by the hour, or part-time workers, would receive an additional 40 cents an hour. I have given considerable thought to the figures included in my bill, and I feel that the proposed increases will scarcely do more than permit postal workers to keep abreast of their economic problems. Certainly, they will never accumulate any great wealth as a result of the provisions of this bill.

It has been my happy experience to note that the average postal worker is an industrious, faithful, and efficient public servant. Most of the postal personnel have made a career of the post-office service, and I think a review of their wages down through the years will show that they have never been high-salaried employees. As I recall, there was a period just prior to 1945 when postal employees had not been given a salary increase for almost 20 years. Yet during that 20-year wait postal wages were reduced when times were bad, both in dollars and cents and by payless furloughs. So they entered the present period of high prices at a lower level than most any other workers. Consistency would seem to indicate that consideration should be given postal employees in the matter of wages when prices are beyond the reach of their salaries. I do not think this necessarily applies to other Federal employees.

It would be repetitious at this point to say that food prices and costs of clothing and other essentials are almost beyond the reach of the low-salaried postal worker, and this includes workers at all levels, because none of the salaries are high and never have been. The postal worker must be considered as belonging in the wage-earner group. His average gross income, I am told, is approximately $2,708 per annum, and he has not received during the past year increases that have been granted to other groups of workers.

When we consider that postal workers contribute 5 percent of their salary for retirement purposes in addition to the authorized withholding tax, it is easy to see that their average gross income is considerably less in take-home pay. I think it is common knowledge that $2,100 is the starting wage for letter carriers and postal clerks. I need not elaborate on the difficulty a $2,100 postal worker must have in living today.

I have talked with numerous postal people in my State of Connecticut. In every instance the topic of their conversation was the difficulty they are experiencing in stretching their salary to meet present-day costs.

It is my sincere belief that postal workers have suffered too long; that they have been left behind in the wage increases which have been granted during the recent years and during the war years; and that a further delay in granting them what need demands would be highly unjust.

The bill (S. 1949) to provide additional compensation for postmasters and employees of the postal service, introduced by Mr. BALDWIN, was received, read twice by its title, and referred to the Committee on Post Office and Civil Service.

INCREASE IN EXPENDITURES BY COMMITTEE ON BANKING AND CURRENCY

Mr. TOBEY submitted the following resolution (S. Res. 185), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on Banking and Currency is hereby authorized to expend from the contingent fund of the Senate during the Eightieth Congress $10,000 in addition to the amount, and for the same purposes, specified in section 134 (a) of the Legislative Reorganization Act of 1946, approved August 2, 1946.

EXTENSION OF TIME FOR INVESTIGATION OF APPOINTMENT OF CERTAIN POSTMASTERS

Mr. LANGER submitted the following resolution (S. Res. 186), which was referred to the Committee on Post Office and Civil Service:

Resolved, That the last paragraph of Senate Resolution 81, Eightieth Congress, agreed to June 17, 1947 (authorizing an investigation of the appointment of postmasters), is hereby amended by striking out the date "January 15, 1948" and inserting in lieu thereof the date "February 28, 1948."

INVESTIGATION OF THE FUEL OIL SITUATION

Mr. JOHNSTON of South Carolina. Mr. President, I submit for appropriate reference a resolution and express the hope that it will receive immediate consideration. I read from the resolution:

Resolved, That the special committee appointed pursuant to Senate Resolution 20, Eightieth Congress, or any duly authorized subcommittee thereof, is authorized and directed, in connection with its study of problems of American small business enterprises, to make a full and complete study and investigation of shortages in, and methods used in distributing, fuel oil, especially fuel oil for heating purposes. In view of present seasonal needs for fuel oil for heating purposes the committee shall report to the Senate at the earliest practicable date the results of its study and investigation, together with such recommendations as it may deem advisable.

It is not my intention to prejudge the oil industry or any company or group of companies. However, there seems to me sufficient justification to at least suspect the existence of a highly organized and effective conspiracy to restrict and curtail independent oil producers and distributors, with resulting hardship and higher prices to the consuming public and with severe financial losses or bankruptcy to the independent operators.

I suggest that the Senate Special Committee to Study Problems of American Small Business, under the authorization and direction of this resolution, enlist the assistance of the Department of Justice and the Federal Trade Commission. It is my opinion that these agencies can furnish considerable information and data from current files and can facilitate the collection, assimilation, and evaluation of new evidence by inquiry and investigation. These agencies should, in my opinion, be directed to report to the committee conclusions drawn on the basis of their experience and knowledge and to make recommendations for corrective action by the Congress or appropriate executive department.

The resolution (S. Res. 187) submitted by Mr. JOHNSTON of South Carolina, was referred to the Committee on Banking and Currency, as follows:

Resolved, That the special committee appointed pursuant to Senate Resolution 20, Eightieth Congress, or any duly authorized subcommittee thereof, is authorized and directed, in connection with its study of problems of American small business enterprises, to make a full and complete study and investigation of shortages in, and methods used in distributing fuel oil, especially fuel oil for heating purposes. In view of present seasonal needs for fuel oil for heating purposes the committee shall report to the Senate at the earliest practicable date the results of its study and investigation, together with such recommendations as it may deem advisable.

THE MARSHALL PLAN—STATEMENT BY SENATOR O'CONOR

[Mr. O'CONOR asked and obtained leave to have printed in the RECORD a statement by him entitled "The Marshall Plan," which appears in the Appendix.]

UNIVERSAL MILITARY TRAINING—STATEMENT BY SENATOR O'CONOR

[Mr. O'CONOR asked and obtained leave to have printed in the RECORD a statement by him entitled "Universal Military Training," which appears in the Appendix.]

MEMORIAL TO THE LATE SENATOR DAVIS, OF PENNSYLVANIA

[Mr. LANGER asked and obtained leave to have printed in the RECORD a memorial to the late Senator James J. Davis, of Pennsylvania, published in the Moose magazine, which appears in the Appendix.]

DEMOCRATIC NATION-WIDE RADIO RALLY—COMMENTS ON ISSUES BY DEMOCRATIC LEADERS

[Mr. HILL asked and obtained leave to have printed in the RECORD the transcript of a Democratic Nation-wide radio rally, containing comments by Democratic leaders, which appears in the Appendix.]

REVIEW OF SENATOR WILEY'S BOOK, LAUGHING WITH CONGRESS, IN AMERICAN BAR ASSOCIATION JOURNAL

[Mr. BREWSTER asked and obtained leave to have printed in the RECORD a review of Senator WILEY's book, Laughing With Congress, published in the December 1947 issue of the American Bar Association Journal, which appears in the Appendix.]

BENEFITS OF TENNESSEE VALLEY AUTHORITY PROGRAM—LETTER FROM E. R. DEAVER

[Mr. MURRAY asked and obtained leave to have printed in the RECORD a letter received by him from Mr. E. R. Deaver, of Knoxville, Tenn., describing the advantages which have come to the people of the Tennessee Valley as a result of the program carried out by the Tennessee Valley Authority, which appears in the Appendix.]

REPEAL OF THE TAFT-HARTLEY ACT—EDITORIAL FROM THE TRAINMAN NEWS

[Mr. MURRAY asked and obtained leave to have printed in the RECORD an editorial entitled "AFW: 'Repeal That Law,'" published in the Trainman News of December 20, 1947, which appears in the Appendix.]

NOTICE OF ADDRESS BY SENATOR HATCH

Mr. HATCH. Mr. President, when I first came to the Senate several years ago it was the custom, when a Senator desired to address the Senate, to so advise the Chair, and make a public announcement. In recent years that custom has been superseded by a private list submitted to the Chair, which frequently causes embarrassment to the Chair and to Members of the Senate who desire to speak and who do not know that a previous commitment has been made.

Mr. President, I prefer the former custom. I understand that the Senate will not be in session tomorrow. In accordance with the previous custom, I announce that on Friday, at the first opportunity, I shall seek recognition from the Chair to address the Senate on what I consider to be the most important subject before the Congress and the country at this time.

WISCONSIN STATE CENTENNIAL CELEBRATION

Mr. WILEY. Mr. President, would it be in order to address the Senate for 5 minutes in relation to the centennial anniversary of our State?

The PRESIDENT pro tempore. Without objection, the Senator is recognized for 5 minutes.

Mr. WILEY. Mr. President, on Monday, January 5, the State of Wisconsin began observance of its centennial year, marking its admission into the Union on May 29, 1848, as our thirtieth State. As my colleagues may recall, on July 22, 1947, I called attention in the Senate to the wonderful plans being laid for our centennial year.

The celebration on January 5 at the State Capitol, which was addressed by Mr. Charles E. Bohlen, of the State Department, was the opening gun of a year that will see countless splendid celebrations throughout my State. On the actual anniversary date, May 29, a parade and pageant will be held in the State Capitol. Starting August 2, a multimillion-dollar centennial exposition will run for 23 days at State Fair Park, in West Allis, Wis.

COOPERATION IN CENTENNIAL

Later I plan to report in more detail on the extensive plans being made by the University of Wisconsin, by historical societies, school groups, women's clubs, and countless other State organizations in contributing to the centennial observation. This year, too, will see the issuance of a special postage stamp celebrating the centennial, on which I have been in contact with the Post Office Department. In Washington, a gala exposition will be held in the Library of Congress. This exhibition will feature many valuable historical documents relating to Wisconsin history and growth.

A special centennial art collection has been planned by Mr. Charles Zadok, of Milwaukee, and it is my privilege to serve as chairman of the sponsoring committee. Governor Rennebohm is the honorary chairman of this committee, and other committee members include my colleague the junior Senator from Wisconsin [Mr. MCCARTHY]; Mayor Bohn, of Milwaukee; President Fred, of the University of Wisconsin; Father Brooks, of Marquette University; and other distinguished citizens.

It has been a pleasure for me to aid in some small way in these various centennial plans and to cooperate with the

group of excellent men and women who comprise our State centennial committee. My one regret is that the President unfortunately vetoed the Wisconsin centennial coin bill which I originally introduced in the Senate. Proceeds from this coin might have been used to help defray the expenses of the centennial observation.

GENERAL MAC ARTHUR'S MESSAGE

To return for a moment to the January 5 celebration at Madison, it was marked in particular by a great message received from Wisconsin's most illustrious son, Gen. Douglas MacArthur, our supreme commander in Japan. This message saluting Wisconsin's one hundredth anniversary was read by Chief Justice Marvin Rosenberry, of the Wisconsin Supreme Court, during the exercises held in the University of Wisconsin's field house. The words of General MacArthur speak for themselves, and I should like to quote briefly from them:

There can be no greater satisfaction than such as comes from the confidences reflected in the selection by one's neighbors for public service—no more challenging responsibility than lies in the fulfillment of their trust.

SEAWAY BILL

As we in Wisconsin know, perhaps the greatest tribute that can be paid to our State and to the entire midwestern region, of which it is a vital part, is the passage later this month of the St. Lawrence seaway bill, which has been endorsed by every Wisconsin State Legislature in the past two decades.

INVITATION TO WISCONSIN

Our fellow citizens of the other 47 States are cordially invited to visit this year, and every other year, the magnificent paradise which is the Badger State—56,000 square miles of "heaven on earth"—a State evenly balanced in industry and agriculture; known, too, for its great pulp and paper industry, its mining, and its many tourist attractions. The name of Wisconsin and the fame of Wisconsin have encircled the globe. Her cheese, and all her other dairy products, her heavy industrial equipment, to cite but a few examples, have become the synonyms of high quality and outstanding integrity.

As I previously stated, I hope to place in the CONGRESSIONAL RECORD at an early date a more complete report on our centennial program.

DEATH OF REPRESENTATIVE DREWRY

The PRESIDENT pro tempore. The Chair lays before the Senate a resolution from the House of Representatives, which the clerk will read.

The Chief Clerk read the resolution (H. Res. 419), as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. PATRICK H. DREWRY, a Representative from the State of Virginia.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect the House do now adjourn.

Mr. BYRD. Mr. President, I submit a resolution and ask to have it read and immediately considered.

The resolution (S. Res. 188) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. PATRICK H. DREWRY, late a Representative from the State of Virginia.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Mr. BYRD. As a further mark of respect to the memory of the deceased Representative, I move that the Senate do now adjourn until Friday next at noon.

The motion was unanimously agreed to; and (at 2 o'clock and 41 minutes p. m.) the Senate adjourned until Friday, January 9, 1948, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

WEDNESDAY, JANUARY 7, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Father of all love and of all mercy, who canst alter the minds of men according to Thine own purpose, do Thou direct the Congress this day; so rule in our hearts that these chosen servants of our Republic may seek the honor and welfare of our people. Reveal unto us that pretense may endure but for a day, and that the power of our country is in that tempered justice which gives every man a due share of peace and contentment. Direct our search for that which is true; for honesty, integrity, and reverence for the holy things of life; herein lies the lasting triumph of a free people. Be with us, that Thy will may be magnified in all decisions. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had adopted the following resolutions:

Senate Resolution 182

Resolved, That a committee consisting of two Senators be appointed to join such committee as may be appointed by the House of Representatives to wait upon the President of the United States and inform him that a quorum of each House is assembled and that the Congress is ready to receive any communication he may be pleased to make.

The message also announced that, pursuant to the above resolution, Mr. WHERRY and Mr. BARKLEY were appointed members of the committee on the part of the Senate.

Senate Resolution 183

Resolved, That the Secretary inform the House of Representatives that a quorum of the Senate is assembled and that the Senate is ready to proceed to business.

RESIGNATION OF MEMBER

The SPEAKER laid before the House the following communication, which was read:

COMMONWEALTH OF KENTUCKY,
Frankfort, January 6, 1948.

Hon. JOSEPH W. MARTIN,
Speaker of the House of Representatives,
Washington, D. C.

MY DEAR MR. SPEAKER: I hereby resign my office as Representative in the Congress of the United States from the Second District of Kentucky.

With best wishes, I am,
Sincerely yours,
EARLE C. CLEMENTS,
Governor of Kentucky.

RECESS

The SPEAKER. The House will stand in recess subject to the call of the Chair.

Accordingly (at 12 o'clock and 7 minutes p. m.) the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 1 o'clock and 17 minutes p. m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 130. Concurrent resolution providing for a joint session of Congress on January 7, 1948.

JOINT SESSION OF THE HOUSE AND SENATE

At 1 o'clock and 19 minutes p. m., the Doorkeeper announced the President pro tempore of the Senate and the Members of the United States Senate.

The Senate, preceded by the President pro tempore of the Senate and by their Secretary and Sergeant at Arms, entered the Hall of the House of Representatives.

The President pro tempore of the Senate took the chair at the right of the Speaker, and the Members of the Senate took the seats reserved for them.

The SPEAKER. On the part of the House, the Chair appoints the following members of the committee to conduct the President of the United States into the Chamber: The gentleman from Indiana [Mr. HALLECK], the gentleman from Illinois [Mr. ARENDS], and the gentleman from Texas [Mr. RAYBURN].

The PRESIDENT pro tempore of the Senate. On the part of the Senate, the Chair appoints as members of the committee to escort the President of the United States into the Chamber the Senator from Nebraska [Mr. WHERRY], the senior Senator from Ohio [Mr. TAFT], and the senior Senator from Kentucky [Mr. BARKLEY].

At 1 o'clock and 22 minutes p. m., the Doorkeeper announced the Ambassadors, Ministers, and Chargés d'Affaires of foreign governments.

The Ambassadors, Ministers, and Chargés d'Affaires of foreign governments entered the Hall of the House of Representatives and took the seats reserved for them in front of the Speaker's rostrum.

At 1 o'clock and 26 minutes p. m., the Doorkeeper announced the Cabinet of the President of the United States.

The members of the Cabinet of the President of the United States entered the Hall of the House of Representatives and took the seats reserved for them in front of the Speaker's rostrum.

At 1 o'clock and 30 minutes p. m., the Doorkeeper announced the President of the United States.

The President of the United States, escorted by the committee of Senators and Representatives, entered the Hall of the House of Representatives and stood at the Clerk's desk. [Applause, the Members rising.]

The SPEAKER. Members of the Congress, I have the distinguished honor of presenting to you the President of the United States.

ADDRESS OF THE PRESIDENT OF THE UNITED STATES

The PRESIDENT. I sincerely hope that all of you had a pleasant holiday season and that you will not have too much hard work in the coming year. [Laughter and applause.]

Mr. President, Mr. Speaker, Members of the Eightieth Congress, we are here today to consider the state of the Union.

On this occasion, above all others, the Congress and the President should concentrate their attention, not upon party but upon country; not upon the things which divide us but upon those which bind us together—the enduring principles of our American system, and our common aspirations for the future welfare and security of the people of the United States.

The United States has become great because we, as a people, have been able to work together for great objectives even while differing about details.

The elements of our strength are many. They include our democratic Government, our economic system, our great natural resources. But these are only partial explanations.

The basic source of our strength is spiritual. For we are a people with a faith. We believe in the dignity of man. We believe that he was created in the image of the Father of us all.

We do not believe that men exist merely to strengthen the state or to be cogs in an economic machine. We do believe that governments are created to serve the people and that economic systems exist to minister to their wants. We have a profound devotion to the welfare and rights of the individual as a human being.

The faith of our people has particular meaning at this time in history because of the unsettled and changing state of the world.

The victims of war in many lands are striving to rebuild their lives, and are seeking assurance that the tragedy of war will not occur again. Throughout the world new ideas are challenging the old. Men of all nations are reexamining the beliefs by which they live. Great scientific and industrial changes have released new forces which will affect the future course of civilization.

The state of our Union reflects the changing nature of the modern world. On all sides there is heartening evidence of great energy—of capacity for economic development—and even more important, capacity for spiritual growth. But accompanying this great activity there are equally great questions, great anxieties, great aspirations. They represent the concern of an enlightened people that conditions should be so arranged as to make life more worth while.

We must devote ourselves to finding answers to these anxieties and aspirations. We seek answers which will embody the moral and spiritual elements of tolerance, unselfishness, and brotherhood upon which true freedom and opportunity must rest.

As we examine the state of our Union today, we can benefit from viewing it on a basis of the accomplishments of the last decade and our goals for the next. How far have we come during the last 10 years and how far can we go during the next 10?

It was 10 years ago that the determination of dictators to wage war upon mankind became apparent. The years that followed brought untold death and destruction.

We shared in the human suffering of the war, but we were fortunate enough to escape most of war's destruction. We were able through these 10 years to expand the productive strength of our farms and factories

More important, however, is the fact that these years brought us new courage and new confidence in the ideals of our free democracy. Our deep belief in freedom and justice was reinforced in the crucible of war.

On the foundations of our greatly strengthened economy and our renewed confidence in democratic values, we can continue to move forward.

There are some who look with fear and distrust upon planning for the future. Yet our great national achievements have been attained by those with vision. Our Union was formed, our frontiers were pushed back, and our great industries were built by men who looked ahead.

I propose that we look ahead today toward those goals for the future which have the greatest bearing upon the foundations of our democracy and the happiness of our people.

I do so, confident in the thought that with clear objectives and with firm determination, we can, in the next 10 years, build upon the accomplishments of the past decade to achieve a glorious future. Year by year, beginning now, we must make a substantial part of this progress.

Our first goal is to secure fully the essential human rights of our citizens.

The United States has always had a deep concern for human rights. Religious freedom, free speech, and freedom of thought are cherished realities in our land. Any denial of human rights is a denial of the basic beliefs of democracy and of our regard for the worth of each individual.

Today, however, some of our citizens are still denied equal opportunity for education, for jobs and economic advancement, and for the expression of their views at the polls. Most serious of all, some are denied equal protection under our laws. Whether discrimination is based on race, or creed, or color, or land of origin, it is utterly contrary to American ideals of democracy.

The recent report of the President's Committee on Civil Rights points the way to corrective action by the Federal Government and by State and local governments. Because of the need for effective Federal action, I shall send a special message to the Congress on this important subject.

We should also consider our obligation to assure the fullest possible measure of civil rights to the people of our Territories and possessions. I believe that the time has come for Alaska and Hawaii to be admitted to the Union as States.

Our second goal is to protect and develop our human resources.

The safeguarding of the rights of our citizens must be accompanied by an equal regard for their opportunities for development and their protection from economic insecurity. In this Nation the ideals of freedom and equality can be given specific meaning in terms of health, education, social security, and housing.

Over the past 12 years we have erected a sound framework of social-security legislation. Many millions of our citizens are now protected against the loss of income which can come with unemployment, old age, or the death of wage earners. Yet, our system has gaps and inconsistencies; it is only half finished.

We should now extend unemployment compensation, old-age benefits, and survivors' benefits to millions who are not now protected. We should also raise the level of benefits.

The greatest gap in our social-security structure is the lack of adequate provision for the Nation's health. We are rightly proud of the high standards of medical care we know how to provide in the United States. The fact is, however, that most of our people cannot afford to pay for the care they need.

I have often and strongly urged that this condition demands a national health program. The heart of the program must be a national system of payment for medical care based on well-tried insurance principles. This great Nation cannot afford to allow its citizens to suffer needlessly from the lack of proper medical care.

Our ultimate aim must be a comprehensive insurance system to protect all our people equally against insecurity and ill health.

Another fundamental aim of our democracy is to provide an adequate education for every person.

Our educational systems face a financial crisis. It is deplorable that in a nation as rich as ours there are millions of children who do not have adequate schoolhouses or enough teachers for a good elementary or secondary education. If there are educational inadequacies in any State, the whole Nation suffers. The Federal Government has a responsibility for providing financial aid to meet this crisis.

In addition, we must make possible greater equality of opportunity to all our citizens for an education. Only by so doing can we insure that our citizens will be capable of understanding and sharing the responsibilities of democracy.

The Government's programs for health, education, and security are of such great importance to our democracy that we should now establish an executive department for their administration.

Health and education have their beginning in the home. No matter what our hospitals or schools are like, the youth of our Nation are handicapped when millions of them live in city slums and country shacks. Within the next decade, we must see that every American family has a decent home. As an immediate step we need the long-range housing program which I have recommended on many occasions. This should include financial aids designed to yield more housing at lower prices. It should provide public housing for low-income families, and vigorous development of new techniques to lower the cost of building.

Until we can overcome the present drastic housing shortage, we must extend and strengthen rent control.

We have had, and shall continue to have, a special interest in the welfare of our veterans. Over 14,000,000 men and women who served in the armed forces in World War II have now returned to civilian life. Over 2,000,000 veterans are being helped through school. Millions have been aided while finding jobs, and have been helped in buying homes, in obtaining medical care, and in adjusting themselves to physical handicaps.

All but a very few veterans have successfully made the transition from military life to their home communities. The success of our veterans' program is proved by this fact. This Nation is proud of the eagerness shown by our veterans to become self-reliant and self-supporting citizens.

Our third goal is to conserve and use our natural resources so that they can contribute most effectively to the welfare of our people.

The resources given by nature to this country are rich and extensive. The material foundations of our growth and economic development are the bounty of our fields, the wealth of our mines and forests, and the energy of our waters. As a Nation, we are coming to appreciate more each day the close relationship between the conservation of these resources and the preservation of our national strength.

Yet we are doing far less than we know how to do to make use of our resources without destroying them. Both the public and private use of these resources must have the primary objective of maintaining and increasing these basic supports for an expanding future.

We must continue to take specific steps toward this goal. We must vigorously defend our natural wealth against those who would misuse it for selfish gain.

We need accurate and comprehensive knowledge of our mineral resources and must intensify our efforts to develop new supplies and to acquire stock piles of scarce materials.

We need to protect and restore our land—public and private—through combating erosion and rebuilding the fertility of the soil.

We must expand our reclamation program to bring millions of acres of arid land into production, and to improve water supplies for additional millions of acres. This will provide new opportunities for veterans and others, particularly in the West, and aid in providing a rising living standard for a growing population.

We must protect and restore our forests by sustained-yield forestry and by planting new trees in areas now slashed and barren.

We must continue to erect multiple-purpose dams on our great rivers—not only to reclaim land, but also to prevent floods, to extend our inland waterways, and to provide hydroelectric power. This public power must not be monopolized for private gain. Only through well-established policies of transmitting power directly to its market and thus encouraging widespread use at low rates can the Federal Government assure the people of their full share of its benefits. Additional power—public and private—is needed to raise the ceilings now imposed by power shortages on industrial and agricultural development.

We should achieve the wise use of resources through the integrated development of our great river basins. We can learn much from our Tennessee Valley experience. We should no longer delay in applying the lessons of that vast undertaking to our other great river basins.

Our fourth goal is to lift the standard of living for all our people by strengthening our economic system and sharing more broadly among our people the goods we produce.

The amazing economic progress of the past 10 years points the way for the next 10.

Today 14,000,000 more people have jobs than in 1938.

Our yearly output of goods and services has increased by two-thirds.

The average income of our people, measured in dollars of equal purchasing power, has increased—after taxes—by more than 50 percent.

In no other 10 years have farmers, businessmen, and wage earners made such great gains.

We may not be able to expand as rapidly in the next decade as in the last, because we are now starting from full employment and very high production. But we can increase our annual output by at least one-third above the present level. We can lift our standard of living to nearly double what it was 10 years ago.

If we distribute these gains properly, we can go far toward stamping out poverty in our generation.

To do this, agriculture, business, and labor must move forward together.

Permanent farm prosperity and agricultural abundance will be achieved only as our whole economy grows and prospers. The farmer can sell more food at good prices when the incomes of wage earners are high and when there is full employment. Adequate diets for every American family, and the needs of our industries at full production, will absorb a farm output well above our present levels.

Although the average farmer is now better off than ever before, farm families as a whole have only begun to catch up with the standards of living enjoyed in the cities. In 1946, the average income of farm people was $779, contrasted with an average income of $1,288 for nonfarm people. Within the next decade, we should eliminate elements of inequality in these living standards.

To this end our farm program should enable the farmer to market his varied crops at fair price levels and to improve his standard of living.

We need to continue price supports for major farm commodities on a basis which will afford reasonable protection against fluctuations in the levels of production and demand. The present price-support program must be reexamined and modernized.

Crop insurance should be strengthened and its benefits extended in order to protect the farmer against the special hazards to which he is subject.

We also need to improve the means for getting farm products into the markets and into the hands of consumers. Cooperatives which directly or indirectly serve this purpose must be encouraged—not discouraged. The school-lunch program should be continued and adequately financed.

We need to go forward with the rural electrification program to bring the benefits of electricity to all our farm population.

We can, and must, aid and encourage farmers to conserve their soil resources and restore the fertility of land that has suffered from neglect or unwise use.

All of these are practical measures upon which we should act immediately to enable agriculture to make its full contribution to our prosperity.

We must also strengthen our economic system within the next decade by enlarging our industrial capacity within the framework of our free enterprise system.

We are today far short of the industrial capacity we need for a growing future. At least $50,000,000,000 should be invested by industry to improve and expand our productive facilities over the next few years. But this is only the beginning. The industrial application of atomic energy and other scientific advances will constantly open up further opportunities for expansion. Farm prosperity and high employment will call for an immensely increased output of goods and services.

Growth and vitality in our economy depend on vigorous private enterprise. Free competition is the key to industrial development, full production and employment, fair prices and an ever improving standard of living. Competition is seriously limited today in many industries by the concentration of economic power and other elements of monopoly. The appropriation of sufficient funds to permit proper enforcement of the pres-

ent antitrust laws is essential. Beyond that we should go on to strengthen our legislation to protect competition.

Another basic element of a strong economic system is the well-being of wage earners.

We have learned that the well-being of workers depends on high production and consequent high employment. We have learned equally well that the welfare of industry and agriculture depends on high incomes for our workers.

The Government has wisely chosen to set a floor under wages. But our 40-cent minimum wage is inadequate and obsolete. I recommend lifting the minimum wage to 75 cents an hour.

In general, however, we must continue to rely on our sound system of collective bargaining to set wage scales. Workers' incomes should increase at a rate consistent with the maintenance of sound price, profit, and wage relationships and with increasing productivity.

The Government's part in labor-management relations is now largely controlled by the terms of the Labor-Management Relations Act of 1947. I made my attitude clear on this act in my veto message to the Congress last June. Nothing has occurred since to change my opinion of this law. As long as it remains the law of the land, however, I shall carry out my constitutional duty to administer it. [Applause.]

As we look ahead we can understand the crucial importance of restraint and wisdom in arriving at new labor-management contracts. Work stoppages would result in a loss of production—a loss which could bring higher prices for our citizens and could also deny the necessities of life to the hard-pressed peoples of other lands. It is my sincere hope that the representatives of labor and of industry will bear in mind that the Nation as a whole has a vital stake in the success of their bargaining efforts.

If we surmount our current economic difficulties, then we can move ahead to a great increase in our national income which will enable all our people to enjoy richer and fuller lives.

All of us must advance together. One-fifth of our families now have average annual incomes of less than $850. We must see that our gains in national income are made more largely available to those with low incomes, whose need is greatest. This will benefit us all through providing a stable foundation of buying power to maintain prosperity.

Business, labor, agriculture, and government, working together, must develop the policies which will make possible the realization of the full benefits of our economic system.

Our fifth goal is to achieve world peace based on principles of freedom and justice and the equality of all nations.

Twice within our generation, world wars have taught us that we cannot isolate ourselves from the rest of the world.

We have learned that the loss of freedom in any area of the world means a loss of freedom to ourselves—that the loss of independence by any nation adds directly to the insecurity of the United States and all free nations.

We have learned that a healthy world economy is essential to world peace—that economic distress is a disease whose evil effects spread far beyond the boundaries of the afflicted nation.

For these reasons the United States is vigorously following policies designed to achieve a peaceful and prosperous world.

We are giving, and will continue to give, our full support to the United Nations. While that organization has encountered unforeseen and unwelcome difficulties, I am confident of its ultimate success. We are also devoting our efforts toward world economic recovery and the revival of world trade. These actions are closely related and mutually supporting.

We believe that the United States can be an effective force for world peace only if it is strong. We look forward to the day when nations will decrease their armaments. Yet, so long as there remains serious opposition to the ideals of a peaceful world, we must maintain strong armed forces. [Applause.]

The passage of the National Security Act by the Congress at its last session was a notable step in providing for the security of this country. A further step which I consider of even greater importance is the early provision for universal training. There are many elements in a balanced national-security program, all interrelated and necessary, but universal training should be the foundation for them all. A favorable decision by the Congress at an early date is of world importance. I am convinced that such action is vital to the security of this Nation and to the maintenance of its leadership. [Applause.]

The United States is engaged today in many international activities directed toward the creation of lasting peaceful relationships among nations.

We have been giving substantial aid to Greece and Turkey to assist these nations in preserving their integrity against foreign pressures. Had it not been for our aid, their situation today might well be radically different. The continued integrity of those countries will have a powerful effect upon other nations in the Middle East and Europe struggling to maintain their independence while they repair the damages of war.

The United States has special responsibilities with respect to the countries in which we have occupation forces: Germany, Austria, Japan, and Korea. Our efforts to reach agreements on peace settlements for these countries have so far been blocked. But we shall continue to exert our utmost efforts to obtain satisfactory settlements for each of these nations.

Many thousands of displaced persons, still living in camps overseas, should be allowed entry into the United States. I again urge the Congress to pass suitable legislation at once so that this Nation may do its share in caring for homeless and suffering refugees of all faiths. I believe that the admission of these persons will add to the strength and energy of this Nation.

We are moving toward our goal of world peace in many ways. But the most important efforts which we are now making are those which support world economic reconstruction. We are seeking to restore the world trading system which was shattered by the war and to remedy the economic paralysis which grips many countries.

To restore world trade we have recently taken the lead in bringing about the greatest reduction of world tariffs that has ever occurred. The extension of the provisions of the Reciprocal Trade Agreements Act, which made this achievement possible, is of extreme importance. We must also go on to support the International Trade Organization, through which we hope to obtain world-wide agreement on a code of fair conduct in international trade.

Our present major effort toward economic reconstruction is to support the program for recovery developed by the countries of Europe. In my recent message to the Congress I outlined the reasons why it is wise and necessary for the United States to extend this support.

I want to reaffirm my belief in the soundness and promise of this proposal. When the European economy is strengthened, the product of its industry will be of benefit to many other areas of economic distress. The ability of freemen to overcome hunger and despair will be a moral stimulus to the entire world.

We intend to work also with other nations in achieving world economic recovery. We shall continue our cooperation with the nations of the Western Hemisphere. A special program of assistance to China, to provide urgent relief needs and to speed reconstruction, will be submitted to the Congress.

Unfortunately, not all governments share the hope of the people of the United States that economic reconstruction in many areas of the world can be achieved through cooperative effort among nations. In spite of these differences we will go forward with our efforts to overcome economic paralysis.

No nation by itself can carry these programs to success; they depend upon the cooperative and honest efforts of all participating countries. Yet the leadership is inevitably ours.

I consider it of the highest importance that the Congress should authorize support for the European recovery program for the period from April 1, 1948, to June 30, 1952, with an initial amount for the first 15 months of $6,800,000,000. I urge the Congress to act promptly on this vital measure of our foreign policy—on this decisive contribution to world peace.

We are following a sound, constructive, and practical course in carrying out our determination to achieve peace.

We are fighting poverty, hunger, and suffering.

This leads to peace—not war.

We are building toward a world where all nations, large and small alike, may live free from the fear of aggression.

This leads to peace—not war.

Above all else, we are striving to achieve a concord among the peoples of the world based upon the dignity of the individual and the brotherhood of man.

This leads to peace—not war.

We can go forward with confidence that we are following sound policies, both at home and with other nations, which will lead us toward our great goals for economic, social, and moral achievement.

As we enter the new year, we must surmount one major problem which affects all our goals. That is the problem of inflation.

Already inflation in this country is undermining the living standards of millions of families. Food costs too much. Housing has reached fantastic price levels. Schools and hospitals are in financial distress. Inflation threatens to bring on disagreement and strife between labor and management.

Worst of all, inflation holds the threat of another depression, just as we had a depression after the unstable boom following the First World War.

When I announced last October that the Congress was being called into session, I described the price increases which had taken place since June 1946. Wholesale prices had increased 40 percent, and retail prices had increased 23 percent.

Since October prices have continued to rise. Wholesale prices have gone up at an annual rate of 18 percent. Retail prices have gone up at an annual rate of 10 percent.

The events which have occurred since I presented my 10-point anti-inflation program to the Congress on November 17 have made it even clearer that all 10 points are essential.

High prices must not be our means of rationing.

We must deal effectively and at once with the high cost of living.

We must stop the spiral of inflation.

I trust that within the shortest possible time the Congress will make available to the Government the weapons that are so desperately needed in the fight against inflation.

One of the most powerful anti-inflationary factors in our economy today is the excess of Government revenues over expenditures.

Government expenditures have been and must continue to be held at the lowest safe levels. Since VJ-day Federal expenditures have been sharply reduced. They have been cut from more than $63,000,000,000 in the fiscal year 1946 to less than $38,000,000,000 in the present fiscal year. The number of civilian employees has been cut nearly in half—from 3,750,000 down to 2,000,000.

On the other hand, Government revenues must not be reduced. Until inflation has been stopped there should be no cut in taxes that is not offset by additions at another point in our tax structure.

Certain adjustments should be made within our existing tax structure that will not affect total receipts, yet will adjust the tax burden so that those least able to pay will have their burden lessened by the transfer of a portion of it to those best able to pay. [Applause.]

Many of our families today are suffering hardship because of the high cost of living. At the same time profits of corporations reached an all-time record in 1947. Corporate profits totaled $17,000,000,000 after taxes. This compared with $12,500,000,000 in 1946, the previous high year.

Because of this extraordinary high level of profits, corporations can well afford to carry a larger share of the tax load at this time.

During this period in which the high cost of living is bearing down on so many of our families tax adjustments should be made to ease their burden. The low-income group particularly is being pressed very hard. To this group a tax adjustment would result in a saving that could be used to buy the necessities of life.

I recommend, therefore, that, effective January 1, 1948, a cost-of-living tax credit be extended to our people consisting of a credit of $40 to each individual taxpayer and an additional credit of $40 for each dependent. [Applause.] Thus the income tax of a man with a wife and two children would be reduced $160. The credit would be extended to all taxpayers, but it would be particularly helpful to those in the low-income group.

It is estimated that such a tax credit would reduce the Federal revenue by $3,200,000,000. This reduction should be made up by increasing the tax on corporate profits in an amount that will produce this sum—with appropriate adjustment for small corporations. [Applause.]

This is the proper method of tax relief at this time. It gives relief to those who need it most without cutting the total tax revenue of the Government.

When the present danger of inflation has passed we should consider tax reduction based upon a revision of our entire tax structure.

When we have conquered inflation we shall be in a position to move forward toward our chosen goals.

As we do so let us keep ever before us our high purposes.

We are determined that every citizen of this Nation shall have an equal right and equal opportunity to grow in wisdom and in stature and to take his place in the control of his Nation's destiny.

We are determined that the productive resources of the Nation shall be used wisely and fully for the benefit of all.

We are determined that the democratic faith of our people and the strength of our resources shall contribute their full share to the attainment of enduring peace in the world.

It is our faith in human dignity that underlies these purposes. It is this faith that keeps us a strong and vital people.

This is a time to remind ourselves of these fundamentals. For today the whole world looks to us for leadership.

This is the hour to rededicate ourselves to the faith in mankind that makes us strong.

This is the hour to rededicate ourselves to the faith in God that gives us confidence as we face the challenge of the years ahead. [Applause, the Members rising.]

At 2 o'clock and 13 minutes p. m., the President retired from the Hall of the House of Representatives.

The members of the President's Cabinet retired from the Hall of the House of Representatives.

The ambassadors, ministers, and chargés d'affaires of foreign governments retired from the Hall of the House of Representatives.

At 2 o'clock and 15 minutes p. m., the Speaker announced that the joint session was dissolved.

Thereupon the President pro tempore and the Members of the Senate returned to their Chamber.

MESSAGE OF THE PRESIDENT REFERRED TO COMMITTEE

Mr. HALLECK. Mr. Speaker, I move that the message of the President of the United States be referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

The motion was agreed to.

EXTENSION OF REMARKS

Mr. REED of New York asked and was given permission to extend his remarks in the RECORD in two instances and include extraneous matter.

Mr. KEOGH asked and was given permission to extend his remarks in the RECORD and include a summary of the grain situation.

Mr. KLEIN asked and was given permission to extend his remarks in the RECORD.

Mr. CHADWICK asked and was given permission to extend his remarks in the RECORD and include a column from the Washington Post.

Mr. PRICE of Illinois. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a speech delivered in Chicago, Ill., by Mr. Justice William O. Douglas of the Supreme Court of the United States in connection with the observance of the one hundredth anniversary of the birthday of John Peter Altgeld.

I have secured an estimate from the Public Printer and have been informed that this manuscript will make approximately 2⅔ pages of the CONGRESSIONAL RECORD at a cost of $189.34. Notwithstanding that fact, I ask that it be included with my remarks.

The SPEAKER. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

THE ISSUE IN 1948

Mr. CHURCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CHURCH. Mr. Speaker, President Truman has stooped to political expediency by recommending purely political solutions to basic economic problems.

To overcome the Wallace threat, he would out-deal the New Deal with a program that would mean a misdeal to the American people.

The adoption of the Truman program would mean an increase in the cost of government by billions and billions of

dollars and our people would be burdened for generations with taxes and more taxes.

The issue in 1948 is now clear: It is between new dealism and Americanism. He would have us adopt the very type of socialistic program that has contributed to Europe's present desperate plight. Our people want less government, not more government. They want less taxes, not more taxes.

EXTENSION OF REMARKS

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD and include an article.

Mr. MASON asked and was given permission to extend his remarks in the RECORD with reference to the message of the President of the United States on the state of the Union.

THE PRESIDENT'S MESSAGE

Mr. SMITH of Ohio. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. SMITH of Ohio. Mr. Speaker, Mr. Truman has just about out-Wallaced Wallace. If Mr. Wallace can make a more socialistic or communistic speech than Mr. Truman has just delivered, he can accomplish what I believe to be the impossible.

THE OIL SITUATION

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, on December 6, I telegraphed to the President of the United States asking him on account of the shortage of fuel oil in many parts of the country to prohibit by embargo shipments of oil from the United States to foreign countries and to direct the United States Maritime Commission to sell tankers to Americans and not to foreign persons or governments. The President has neither replied to my telegram nor taken the action requested although the oil shortages increase each day. I am informed that the mayor of New York has requested additional tankers of oil owing to the need there. I believe the President should issue the embargo at once and direct the United States Maritime Commission to cooperate in every possible way in this emergency. The fuel oil is needed in the United States and the tankers are needed for its transportation. For months hearings and investigations have been held without accomplishing any relief. Our people are confused and have lost confidence in being asked to change from oil to coal and then from coal to oil and back again from oil to coal. Too much fuel oil and too many tankers are being sent to foreign countries. Embargo is necessary to provide fuel oil for our people in proper and necessary amounts and at fair prices. The President should act immediately.

EXTENSION OF REMARKS

Mr. SMITH of Wisconsin asked and was given permission to extend his remarks in the RECORD and include a radio address.

Mr. GAVIN asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. HOPE. Mr. Speaker I ask unanimous consent to extend my remarks in the RECORD by including an address by Mr. E. H. Taylor. I have been informed by the Public Printer that the manuscript is estimated to make three and one-third pages of the CONGRESSIONAL RECORD at a cost of $236.67.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. JUDD asked and was given permission to extend his remarks in the RECORD and include a radio address.

Mr. KERSTEN of Wisconsin asked and was given permission to extend his remarks in the RECORD.

Mr. OWENS asked and was given permission to extend his remarks in the RECORD and to include an article.

PERMISSION TO EXTEND REMARKS AT THIS POINT IN THE RECORD

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BRADLEY. Mr. Speaker, the Long Beach Chamber of Commerce is one of the progressive organizations of southern California. It is the spark plug for industries of many kinds, such as shipbuilding, ocean shipping, aircraft building, oil production and refining, fishing, soap manufacturing, and a multitude of others.

The Long Beach Chamber of Commerce is fully conversant with the fact that control of the air is one of the prime essentials for a nation of the importance of the United States both in peace and in war. In its efforts to have us maintain that degree of supremacy which is so essential to us, the chamber recently approved a resolution addressed to the Congress of the United States urgently requesting that an adequate national air policy be adopted.

The resolution is as follows:

LONG BEACH CHAMBER OF COMMERCE,
Long Beach, Calif.

WE MUST REGAIN AIR SUPREMACY

Whereas the United States has demonstrated its desire to live in peace with the world; and

Whereas in every generation it has been drawn into a terrible war for which it was unprepared; and

Whereas this unpreparedness has cost many thousands of lives and billions of dollars; and

Whereas the security of our homes, families, property, and Nation depends upon adequate national defense; and

Whereas an air force superior to that of any enemy is the strongest deterrent to aggression and the best immediate means of defense: Therefore it is hereby

Resolved, That the Congress of the United States be urgently requested to adopt promptly a national air policy which will assure:

1. A modern powerful air force in being.
2. Enough trained personnel to man this air force.
3. Sufficient research and development to guarantee that America remains first in this field.
4. Strategically located bases of operation.
5. An adequate system of air transportation which in effect is an auxiliary and supplement to the air force.
6. A strong independent aircraft industry capable of rapid expansion.
7. Designation of stand-by plants from those already constructed to provide a stronger basic production nucleus to meet any national emergency.
8. Creation of an additional separate stock pile of critical materials for aircraft manufacture and maintenance.

THE BOARD OF DIRECTORS,
LONG BEACH CHAMBER OF COMMERCE.
Adopted December 29, 1947.

EXTENSION OF REMARKS

Mr. JONKMAN asked and was given permission to extend his remarks in the RECORD and include an article by Arthur Krock, of the New York Times.

ADJOURNMENT

Mr. HALLECK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 25 minutes p. m.) the House adjourned until tomorrow, Thursday, January 8, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1190. A letter from the Director, Naval Petroleum Reserves, Navy Department, transmitting information that there have been no agreements, purchases, or condemnation proceedings entered into under the reference authority during the calendar year 1947; to the Committee on Armed Services.

1191. A letter from the Acting Secretary of the Navy, transmitting a draft of a proposed bill to amend the act of December 3, 1945, so as to extend the exemption of Navy or Coast Guard vessels of special construction from the requirements as to the number, position, range, or arc of visibility of lights, and for other purposes; to the Committee on Armed Services.

1192. A letter from the Secretary of Agriculture, transmitting a report of the activities of, funds used by, and donations to, the regional research laboratories established pursuant to section 202 of the Agricultural Adjustment Act of 1938, as required by paragraph (e) of that section; to the Committee on Agriculture.

1193. A letter from the Secretary of the Army, transmitting a draft of a proposed bill to provide for the utilization of certain surplus military real property as national cemeteries; to the Committee on Public Lands.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BARRETT:

H. R. 4862. A bill granting the consent of Congress to the States of Montana and Wyoming to negotiate and enter into a compact for the division of the waters of Powder River and its tributaries originating in either of the two States and flowing into the other; to the Committee on Public Lands.

By Mr. BECKWORTH:

H. R. 4863. A bill granting the benefits of section 251 of the Internal Revenue Code to members of the armed forces taken as prisoners of war in Java or French Indochina; to the Committee on Ways and Means.

H. R. 4864. A bill to authorize States and their political subdivisions and instrumentalities to elect coverage of the old-age and survivors' insurance benefit provisions of the Social Security Act for their employees; to the Committee on Ways and Means.

By Mr. BLAND:

H. R. 4865. A bill to provide for a preliminary examination and survey of Powells Bay, Accomack County, Va.; to the Committee on Public Works.

By Mr. BRADLEY:

H. R. 4866. A bill to amend sections 210 and 209 (f) of the Social Security Act so as to increase the benefits payable to veterans of World War II and their survivors and to remove the 3-year limitation upon survivors' insurance benefits in the case of deceased World War II veterans; to the Committee on Ways and Means.

By Mr. CUNNINGHAM:

H. R. 4867. A bill to amend and supplement the Federal-Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the postwar construction of highways, and for other purposes; to the Committee on Public Works.

H. R. 4868. A bill to amend and supplement the Federal-Aid Road Act approved July 11, 1916 (39 Stat. 355), as amended and supplemented, to authorize appropriations for continuing the postwar construction of highways, and for other purposes; to the Committee on Public Works.

By Mr. DINGELL:

H. R. 4869. A bill to authorize the construction of a building adjacent to the Roosevelt Park Parcel Post Station at Detroit and for the remodeling and modernization of present facilities; to the Committee on Public Works.

By Mr. FARRINGTON:

H. R. 4870. A bill to amend subsection (b) of section 328 of subchapter 111 of title 1 of the act of October 14, 1940, relative to registry of aliens; to the Committee on the Judiciary.

By Mr. LEONARD W. HALL:

H. R. 4871. A bill to provide for a preliminary examination and survey of Dosoris Creek, N. Y.; to the Committee on Public Works.

By Mr. LANE:

H. R. 4872. A bill to incorporate the Italian-American World War Veterans of the United States; to the Committee on the Judiciary.

H. R. 4873. A bill to extend the time limit within which certain suits in admiralty may be brought against the United States; to the Committee on the Judiciary.

By Mr. LEA:

H. R. 4874. A bill authorizing the Secretary of the Interior to issue patent to the county of Del Norte, State of California, to Pelican Rock in Crescent City Harbor, Del Norte County, Calif.; to the Committee on Public Lands.

By Mr. MITCHELL:

H. R. 4875. A bill to increase the fees and mileage allowances of jurors in courts of the United States; to the Committee on the Judiciary.

By Mr. PRICE of Florida:

H. R. 4876. A bill to extend the benefits of the act of May 29, 1944, entitled "An act to provide for the recognition of the services of the civilian officials and employees, citizens of the United States, engaged in and about the construction of the Panama Canal," to certain additional civilian officers and employees; to the Committee on Merchant Marine and Fisheries.

H. R. 4877. A bill to provide for assistance by the Federal Government in the repair of damage caused by erosion by waves and currents to the shores of the State of Florida and in the prevention of future damage to such shores; to the Committee on Public Works.

By Mrs. ROGERS of Massachusetts (by request):

H. R. 4878. A bill to authorize the Administrator of Veterans' Affairs to grant allowances for the feeding of seeing-eye dogs; to the Committee on Veterans' Affairs.

By Mr. TWYMAN:

H. R. 4879. A bill to amend section 7 of the act of June 25, 1910, as amended, to reduce the interest rate on postal-savings deposits to 1 percent per annum; to the Committee on Post Office and Civil Service.

By Mr. HOFFMAN:

H. J. Res. 288. Joint resolution directing all executive departments and agencies, other than those exempted herein, to make available to the Senate Committee on Expenditures in the Executive Departments and to the House Committee on Expenditures in the Executive Departments information which may, by either of said committees, be deemed necessary to enable it to properly perform the duties delegated to it by the Congress; to the Committee on Expenditures in the Executive Departments.

H. J. Res. 289. Joint resolution directing the Civil Service Commission to make available to the House Committee on Expenditures in the Executive Departments certain information in its possession; to the Committee on Post Office and Civil Service.

By Mr. LANE:

H. Res. 420. Resolution to authorize the Committee on Banking and Currency to investigate and study the distribution and sale of fuel commodities and the rising prices in same commodities in New England; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. KEOGH:

H. R. 4880. A bill for the relief of Antonio Valenti; to the Committee on the Judiciary.

By Mr. PATTERSON:

H. R. 4881. A bill for the relief of Dimitri Petrou; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1075. By Mr. KILDAY: Petition of Victor Keller, of San Antonio, Tex., and 42 others, urging legislation to establish a system of universal military training for American young men; to the Committee on Armed Services.

1076. By Mr. MARTIN of Massachusetts: Petition of Mrs. Margaret C. Springer and sundry citizens of Massachusetts, advocating enactment of universal military training; to the Committee on Armed Services.

1077. By Mr. MULTER: Petition of 65 residents of Brooklyn, N. Y., urging that legislation establishing a system of universal military training in America be enacted; to the Committee on Armed Services.

1078. By Mr. SMITH of Wisconsin: Petition of residents of Evansville, Wis., and vicinity, urging legislation to establish universal military training; to the Committee on Armed Services.

1079. Also, petition of members of Zilmer-Riley Post, No. 84, of the American Legion, Monroe, Wis., urging legislation to establish universal military training; to the Committee on Armed Services.

1080. Also, petition of members of Kelly Gardner Post Auxiliary of the American Legion, Elkhorn, Wis., urging legislation to establish a system of universal military training; to the Committee on Armed Services.

1081. Also, petition of members of Joseph Bailey Ingalls Unit, No. 102, American Legion Auxiliary, Walworth, Wis., urging legislation to establish a system of universal military training; to the Committee on Armed Services.

1082. Also, petition of members of American Legion Auxiliary, Beloit, Wis., urging legislation establishing universal military training; to the Committee on Armed Services.

HOUSE OF REPRESENTATIVES

THURSDAY, JANUARY 8, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O brooding Spirit of the Most High, each day be Thou our decisive authority. Silently steal into our breasts; rebuke our tendencies and give our tongues a ministry of thought and discretion. If we seem to wander, harken to our appeal for a wise pathway, neither weary of the day nor fearful of the night. O refresh our Nation with the spiritual wellsprings of life, and may there be an awakening of patriotic fervor that will persuade all minds that happiness outside of goodness is vanity and that happy is that people whose God is the Lord. In our Master's name. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had adopted the following resolution (S. Res. 188):

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. PATRICK H. DREWRY, late a Representative from the State of Virginia.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased, the Senate do now adjourn until Friday next at noon.

ADJOURNMENT OVER

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

CROW TRIBE OF INDIANS

Mr. WELCH. Mr. Speaker, on July 22, 1947, the Senate asked for a conference on the bill S. 1317. I now ask unanimous consent to take from the Speaker's table the bill (S. 1317) to give to members of the Crow Tribe the power to manage and assume charge of their restricted lands, for their own use or for lease purposes, while such lands remain under trust patents, with House amendments thereto, insist on the amendments of the House, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from California? [After a pause.] The Chair hears none, and appoints the following conferees: Mr. WELCH, Mr. CRAWFORD, and Mr. SOMERS.

EXPORT OF DOMESTIC AND FOREIGN MERCHANDISE

The SPEAKER laid before the House the following communication, which was read by the Clerk, and, together with the accompanying papers, referred to the Committee on Interstate and Foreign Commerce:

THE SECRETARY OF COMMERCE,
Washington, January 7, 1948.

The Honorable the SPEAKER,
House of Representatives,
Washington, D. C.

DEAR MR. SPEAKER: Pursuant to House Resolution 366, I am transmitting the following documents:

Set of Bureau of the Census Export Report FT 410, United States Export of Domestic and Foreign Merchandise—Commodity by Country of Destination Arrangement, for each of the months January through October 1947, marked to show the commodities in which the House may be interested.

Set of Bureau of the Census Monthly Summary of Foreign Commerce of the United States, covering the months January through August 1947, and similarly marked. This report contains the same information as the FT 410 report but in summary form and without a break-down by countries, and contains also a summary of exports to various destinations without break-down by commodity.

Set of Bureau of the Census Export Report FT 420, showing country of destination by commodity.

Special Foreign Trade Report A, showing dollar summaries for exports for selected countries, January 1947 through October 1947.

It is believed that the above reports, particularly the marked copies mentioned, fulfill the requirements of the first paragraph of House Resolution 366. In a letter of this same date to the chairman of the Committee on Interstate and Foreign Commerce, we are describing at some length additional data which it may be possible for us to provide and the measures which will be necessary if this data is compiled and transmitted. In that letter, a copy of which is attached for your information, we request an interpretation of the intention of the House concerning the additional data mentioned above.

Sincerely yours,

WILLIAM C. FOSTER,
Acting Secretary of Commerce.

SPECIAL ORDER GRANTED

Mr. HOFFMAN. Mr. Speaker, it was my purpose to rise to a question of personal privilege, but there being no special orders I ask unanimous consent that upon the conclusion of the 1-minute speeches I may be recognized for so much of an hour as I care to use.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

THE STEAMSHIP "PRESIDENT CLEVELAND"

Mr. ALLEN of California. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ALLEN of California. Mr. Speaker, progress has been made in the building of the postwar merchant marine. The steamship *President Cleveland* recently steamed through the Golden Gate on its maiden voyage bound for the Hawaiian Islands and ports in the Philippines, China, and Japan.

I was invited aboard the ship by officials of the American President Lines for which it was built by the Maritime Commission and spent several hours on it. It is a beautifully appointed vessel of 15,000 tons, capable of transporting more than 500 passengers and a quantity of cargo. While it is beautiful, it is equally practical and efficient. The members of the crew with whom I came in contact seemed proud of their ship and endeavored to show it off in its best light.

It is a beautiful ship and Americans can be pleased with it. It is, however, the only one of its kind in operation.

It is the only fine, fast passenger-carrying ship built since the war. One more will follow it shortly. The steamship *America*, which is larger, is its only equal. Obviously we must go further in the building of our postwar merchant marine.

THE FUEL-OIL SHORTAGE

Mr. POTTS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POTTS. Mr. Speaker, yesterday we heard the President deliver an address on the sorry state of the Union which 16 years of New Deal misadministration has got us into. Here is another instance.

Mr. Speaker, New York is experiencing a critical fuel-oil shortage. I know because I live there.

Yesterday I received a telegram from the mayor of the city of New York requesting my strong and immediate support to secure prompt action by the Congress to extend the authority of the Maritime Commission to operate tankers so as to relieve the situation.

Upon inquiry, I was informed that the Maritime Commission has sold all of its serviceable tankers, so that an extension of time for the commission to operate ships would be to no avail.

The real reason for the shortage is not a lack of tankers but the refusal of the Administration to limit exports of petroleum products. I said before and I repeat that at hearings before the House Committee on Merchant Marine and Fisheries early last year, administration spokesmen appeared and testified that there would be a critical fuel-oil shortage on the east coast. At that time the newspapers were full of reports of shipments of oil leaving the west coast for Russia.

When it was suggested that these exports be banned pursuant to export controls which the administration was armed with, the committee was told that the administration had no intention to do so.

Thereafter in July of last year, this House passed a resolution to require the Secretary of Commerce to certify that on any exports of petroleum products, they were not needed for the defense of the United States or for domestic consumption, but despite that shipments are yet permitted to go out of the country to Russia and with full knowledge of our urgent needs.

I insist that fuel oil is needed for domestic consumption and in this New York's mayor agrees, but the administration turns a deaf ear to the pleas of New York's very cold residents.

EXTENSION OF REMARKS

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD and include an article.

Mr. POULSON (at the request of Mr. PHILLIPS of California) was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

DETROIT POLLS OVERWHELMINGLY AGAINST GOVERNMENT CONTROL OF CONSUMER CREDIT

Mr. DONDERO. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DONDERO. Mr. Speaker, during the special session which terminated recently I presented to the House some figures on a poll being taken in my district, especially at Pontiac, Mich., on the simple question whether or not the people were in favor of the reestablishment of governmental control over consumer credit. It was done by the Buckner Finance Co. They have sent me the last tabulation, and on that question, here is the result: There were 494 ballots or answers received, of which 418 were opposed and 76 in favor.

Also at Pontiac, Mich., another company, the Home and Auto Loan Co., received 176 answers, of which 152 were opposed and 24 in favor. In Detroit, Mich., the following three companies, Peoples State Loan Co., with three offices in Detroit, Service Loan Co., Detroit, and Protection Loan Co., Wyandotte, held a similar poll. They received 1,124 replies. Out of this number 998 were opposed to the reestablishment of governmental control over consumer credit, and only 126 were in favor.

It seems to me from this poll the people of the country, at least in my section of the country, do not favor the reestablishment of governmental control over consumer credit.

PRESIDENT TRUMAN'S MESSAGE ON THE STATE OF THE UNION

Mr. BUSBEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. BUSBEY. Mr. Speaker, the people and the Congress expected and were entitled to something better than they received in President Truman's message on the state of the Union.

He handed out a political sop to every group of people in the United States except the Navajo Indians. There was very little in his speech that even the Democrats could applaud. Never before has any person addressed the Congress for 30 minutes without at least some applause.

He definitely was announcing his candidacy for reelection by indulging in the cheapest of demagogery which was far beneath the dignity of a President of the United States. It was a feeble attempt to outdo the Roosevelt New Deal and Henry Wallace, and was a definite bid to keep the Communists and followers of Henry Wallace in the Democratic Party next November.

He repeatedly referred to our democracy and our democratic government, when as President he must know we have a republic and ours is a republican form of government.

SPECIAL ORDER GRANTED

Mr. MILLER of Connecticut. Mr. Speaker, I ask unanimous consent that on Tuesday next, after disposition of matters on the Speaker's desk and at the conclusion of any special orders heretofore granted, I may be permitted to address the House for 30 minutes on the subject of the problems of the physically handicapped, and, Mr. Speaker, if the House is not in session on Tuesday, I ask that the order go over until Wednesday.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

EXTENSION OF REMARKS

Mr. THOMAS of New Jersey asked and was given permission to extend his remarks in the RECORD and include a radio address he made last evening.

THE FOOD-CONSERVATION PROGRAM

Mr. JAVITS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include an editorial.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. JAVITS. The President, in his address on the state of the Union, said that "inflation holds the threat of another depression," but he failed to say anything about one of the potent weapons with which to fight it, a weapon which he is just taking out of the hands of the American people—an effective food-conservation program—and incidentally jeopardizing the European recovery program in the process. In my city of New York, for example, the food-conservation program is falling apart with most of the restaurants and hotels refusing to go along with it and housewives, bitterly disappointed, paying little attention to it. Regardless of how I feel about it—and I stated at the close of the special session that I favored the authorization by Congress itself of rationing and price controls on key items like steel, grain, butter, milk, and meat—I know that any kind of rationing and price-control program for food faces a hard fight, but voluntary conservation administered on a big scale will get the prompt support of the whole country. Instead of disestablishing the President's Citizens Food Committee, there should be immediately established a national food-conservation administration, and Congress should adequately finance such an agency. This House has shown its attitude on this question by the insertion in the version of the foreign aid bill of 1947, which we approved, of a provision for a national citizens' food-conservation committee, but it was stricken out in conference. The provisions of the recently passed anti-inflation bill for voluntary agreements should be used to get the support of food producers and processors, distributors, and consumers. City people whose standard of living is being undermined by inflation should be given a weapon with which to help themselves now.

An editorial from the New York Times of January 7, 1948, on this subject follows:

A FAILURE OF LEADERSHIP

When we pause to reckon how completely world reconstruction depends on a wise distribution of food supply, and how gravely Europe's own share in her recovery will be jeopardized if her people do not have enough food to maintain the strength to produce, then the break-down of our voluntary food-conservation program in this country must be a source of great concern. The Government itself had long since abandoned the poultryless day, and admits that the pledge from poultrymen on which it so acted has not been fully honored. Now eggless Thursday has also been dropped for seasonal reasons. About all that is left of the voluntary program, the meatless Tuesdays, had already been scuttled by general noncompliance, and some restaurant and hotel associations have told members that it would be impractical for a few establishments to continue the voluntary program when it was being ignored widely throughout the country. Reports from other major cities confirm that the program, initiated with much enthusiasm from Washington only 3 months ago, is now largely forgotten.

It was on October 5 in a radio speech to the Nation that President Truman said that "an essential requirement of lasting peace in the world is the restoration of the countries of western Europe as free, self-supporting democracies. * * * They must do most of the job themselves. They cannot do it if thousands of their people starve." Secretary Marshall on that same evening supported this appeal by the President in saying that "food is a vital factor in our foreign policy," that the attitude of Americans toward food "can make or break our efforts to achieve peace and security throughout the world."

What President Truman and Secretary Marshall said in early October is as true now as it was then. But the administration in Washington must substantially share the blame if the voluntary food-saving program has increasingly lost popular support. For it has failed itself to provide the continuing leadership to make that program work. Since Charles Luckman resigned in late November as Chairman of the Citizens Food Committee virtually no appeal has been made to the public except by way of warning on price inflation. The fact is that many housewives have forgotten there is such a thing as a meatless Tuesday. The public has to be told continuously and eloquently of the need for food saving and what is to be done with the food saved by American abstention. It has not been so told. The administration has apparently felt that a 2-month job of selling the program would be all that was necessary. If so, it made a colossal misappraisal of human nature.

The Marshall long-term aid plan, which will now be under discussion in Congress, assumes a level of production in Europe that will strain every human resource in those countries taking part. They will not be able to hold up their end of the bargain unless they are reasonably well fed. It is essential that our Government resume its responsibility of leadership if the food-saving program is not to degenerate completely into a farce of nonobservance.

THE ISLAND OF GUAM

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BRADLEY. Mr. Speaker, in 1898, a full half century ago, the United States took possession of the island of Guam. For 50 years the Chamorro people of Guam have been ruled by America—the great emancipator, the champion of government by law rather than by orders or decrees. It is 50 years since the Stars and Stripes replaced the royal banner of the Kingdom of Spain over that far-distant land. Yet, today, as yesterday, and the day before back through some three centuries, the people of Guam are not citizens of the state of their overlords—they are merely subjects of a conquering people—subjects now of the American democracy. Yet, today, after all these 50 years, the people of Guam are not protected in their persons or their property by the majesty of the law such as is extended to even the most despicable wrongdoers of the United States. Instead, they, and all they have, are subject to the despotic orders—wise or foolish as they may be—of the Governor of Guam, an individual whose acts seek the plane of his own character and intelligence, as is the case in all such dictatorial governments.

Now, after the release of Guam from temporary bondage to Japan, the President of the United States, the Secretary of the Navy, the Secretary of the Interior, and the Congress of Guam are in substantial agreement on an organic act for the island—an act which will authorize citizenship and a measure of home rule under the jurisdiction of such governmental department as the President may designate. This act should not be further delayed.

In the light of an appreciation of American justice, I ask that a proposed organic act for the island of Guam be brought before the House. I ask that this be done soon so that the people of that island may receive their just reward during this year, in which the fiftieth anniversary of American occupation of Guam will be observed.

LEGAL FARM PRICES

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. MURRAY of Wisconsin. Mr. Speaker, while our friends from the cities complain about the cost of food, the other side of the picture is that the fellow that produces some of the foods is not even getting what the law says he should obtain. The President has the power and the authority and he has the money to control prices, whether they are low prices or whether they are high prices. For several weeks I have tried to get the Department of Agriculture to do something about chicken prices. If the administration is not going to pay any more attention to the Steagall amendment than it has paid to it in the last 90 days, we might as well take it off the books. I do not care to hear about the Steagall amendment just during election time; I would like to see it put into operation in between elections. The Steagall amendment allows the minimum wage to the rural people of this country, but 7-, 10-, and 15-cent chickens gives the workers on the farm a mighty low minimum wage. I would like to know if you believe the Secretary of Labor would sit and let the minimum wage fall below the 40 cents per hour provided by law without offering any protest. I have been carrying on considerable correspondence with the Under Secretary of Agriculture, and the more letters I receive the less I can follow the ambiguous replies. Possibly the Committee on Agriculture will feel that it should insist that the Steagall amendment be religiously followed.

Mr. Speaker, I ask unanimous consent to include as part of my remarks a letter I received from Mr. Dodd, and my answer thereto.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. MURRAY of Wisconsin. The letters I refer to are as follows:

DECEMBER 23, 1947.

Hon. REID F. MURRAY,
House of Representatives.

DEAR MR. MURRAY: This is in reply to your letter of December 8 commenting on various features of the Department's fowl-purchase program.

In the development and operation of its support programs for poultry products the Department has continually aimed at maintaining prices of these commodities at levels necessary to reflect a national average of 90 percent of parity. It has done so because parity is a national average and there is no other yardstick used to measure the percentage of parity which farmers receive for their commodities. In other words, parity is not calculated on the basis of individual communities, States, or regions. This is true of all agricultural commodities for which a parity calculation is made each month or annually.

In developing its price-support programs for poultry products it is necessary for the Department to give recognition to the historical differences which have prevailed and which will likely prevail currently in price levels between regions if its programs are to be as accurate as possible in reflecting any given percentage of parity on a national basis. We know, for example, that historically, egg and poultry prices to producers in the deficit producing areas such as the east and west coasts, have always averaged substantially higher than prices received by producers in the Midwest which is our vast surplus producing poultry area. We find, for instance, that during the 1942–46 5-year period average yearly prices for eggs in individual regions varied from 5 cents per dozen below the United States average to 11 cents per dozen above that average. A more current example can be cited the first 11 months of the current year wherein egg prices in the West North Central States have averaged 6 cents per dozen below the national average and egg prices to producers in New England have averaged 17.6 cents per dozen above the national average. A similar situation prevails with respect to poultry prices although the spreads between regions are not as extensive.

You can readily understand from the above comments that if the Department were to support prices to all producers at the national average level required to reflect 90 percent of parity, the effect of such a program would be to maintain prices at a level far above 100 percent of parity. Furthermore, and importantly so, it would necessitate tremendous expenditures of public funds in meeting obligations beyond those set forth in the Steagall amendment. We should also point out that such a program would, without doubt, substantially increase poultry and egg production rather than bring some downward adjustment in the industry toward peacetime requirements.

In the operation of our price-support purchase programs for poultry products we have fully recognized that each and every producer in a given State or area in which purchases are being made would not be assured of a specific price but rather that we were providing a market outlet for surplus poultry on an area basis. We recognize that within that area or region wide differences would prevail between producer location, quantity of product sold, methods of handling, quality of product sold, and distances from markets. These are circumstances which have always prevailed in producing areas and they are fundamental to the wide differences which have and do prevail in egg and poultry prices to producers in any region. Price differentials prevail within the community, within the State, and between regions throughout the Nation, and have become well established over the years. Should we fail to recognize these differences and attempt to guarantee a specific price to each and every individual poultry producer, the problem of support would become an impracticable one.

With respect to the revision of the current fowl-purchase program wherein the processing margins were increased, this was done in order to assure cooperation in the program on the part of poultry processors, cooperative associations, as well as individual producers dressing their own birds. The original processing margins provided in the program were found to be inadequate in view of rising costs of packaging materials, labor, and grade loss. We have always followed a policy of establishing processing margins on all poultry commodities purchased in order to keep such margins at a minimum and thus prevent insofar as possible excess-profit margins to handlers of the commodities.

I trust that the above explanation of the Department's price-support objectives with respect to poultry products will prove adequate for your purpose. I can assure you that much thought and planning has gone into the price-support operations on poultry products because of the many complex problems which prevail in the marketing of these commodities.

Sincerely yours,

N. E. DODD,
Under Secretary.

JANUARY 7, 1948.

Mr. N. E. DODD,
Under Secretary of Agriculture,
United States Department of
Agriculture, Washington, D. C.

DEAR MR. DODD: I wish to acknowledge receipt of your letter of December 23, 1947, in regard to the fowl purchase program.

In a previous letter you stated that 90 percent of parity was 24.8 cents per pound. Your letter seemed to indicate that by some process or other the Department was justified in instituting a purchase program based on 15 cents per pound. The more I try to get the facts in connection with this situation the more confusing the picture becomes. I feel that the chickens will all be killed before any action will be taken. If they are killed. I would like to see the poultrymen receive the legal, lawful price for their birds. Evidently the poultrymen will be "bushed" out of millions of dollars while we will be hearing of the wonders of the Steagall amendment.

I note that your letter did not state any provision of law where the Department has any authority to announce any support program below the 90 percent of parity. I fail to find any mention of the question as to where the Department obtained its authority to tell the processor what the processing margin should be on chickens. There will probably be an effort made on the part of some to blame the processor for low poultry prices. There is no doubt but what they can profit handsomely if the Department of Agriculture sets up a purchase program based on 50 to 60 percent of parity. No doubt the handsome profit will be made on the roosters selling in the West and Midwest for 7 to 10 cents per pound. This will be especially true if the propaganda is further emphasized to the effect that there will be less or no meat to eat in the United States by next spring.

It will not be necessary for me to write you any more letters about this chicken situation, because there are too many inconsistencies embodied in the replies, and in fact the replies are altogether too confusing.

I note that next Thursday will be the last eggless Thursday, and, of course, the chickenless Thursdays were discontinued some time ago.

I have no way of knowing how much meat or protein foods the people are going to have next spring, but it is evident that if all animal food producers are subjected to the same working over that the chicken producers have been subjected to there could sometime be a shortage of animal proteins for human consumption. The Department is asking for 8 percent less eggs, 8 percent less hens and pullets on farms, 7 percent less chickens, 12 percent less turkeys, 9 percent less sows to farrow, 6 percent less spring pigs, 6 percent less cattle, 11 percent less cattle slaughter, and 3 percent less sheep and lambs—although the sheep numbers have been reduced 35 percent during the last 4 years. Incidentally, less milk is to be provided for the babies, as the goal is 120,000,000,000 pounds, the same as for 1947, and, of course, we have a large increase in the number of babies to feed.

With all these activities detrimental to the livestock industry of this country, no doubt we will hear more about the fertility of our soil. After all, there are two points that are missed by most of the food planners. One is that millions of pounds of human food are secured from lands that are not adapted to grain or crop farming. Second, that millions of pounds of human food are produced from feeds or fodders that have little or no value for human consumption.

With best wishes for the New Year, I am,

Sincerely yours,

REID F. MURRAY,
Member of Congress.

EXTENSION OF REMARKS

Mr. TWYMAN asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. RICH asked and was given permission to extend his remarks in the RECORD and include an article appearing in the New York Sun under date of January 5 by Phelps Adams.

WHERE ARE YOU GOING TO GET THE MONEY?

Mr. RICH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RICH. Mr. Speaker, yesterday the President made the following statement, and I quote:

> On this occasion, above all others, the Congress and the President should concentrate their attention, not upon party but upon country; not upon the things which divide us but upon those which bind us together—the enduring principles of our American system, and our common aspirations for the future welfare and security of the people of the United States.

With a national debt of $257,000,000,000, he made these recommendations without saying one word as to where you are going to get the money, except three billions from corporations. Where will the balance come from? I would like to ask the Congress if that is political or sound? You be the judge.

	Estimated cost
To protect and develop our human resources by increasing social-security benefits	$500,000,000
Broadening social-security coverage	250,000,000
Medical-care insurance	750,000,000
Federal aid to education	700,000,000
A Department of Health, Education, and Security	50,000,000
A long-range housing plan	1,000,000,000
Extending and strengthening rent control	10,000,000
An extended reclamation program	500,000,000
Increasing annual output by one-third	5,000,000
Price support for farm commodities	500,000,000
More crop insurance, annually	50,000,000
Minimum wage, 75 cents per hour	1,000,000
Encouragement to farm cooperatives, loss in taxes	100,000,000
School-lunch program	50,000,000
Support the United Nations, annually	1,000,000,000
Maintaining a strong armed force	15,000,000
Universal military training, annually	3,000,000,000
Admitting displaced persons to the United States	100,000,000
Extending reciprocal trade agreements program, loss in duties	200,000,000
European recovery program, Marshall plan (over 4-year period)	18,000,000,000-20,000,000,000
Providing special assistance to China	1,000,000,000
Cut in taxes of	3,000,000,000

This would require an annual expenditure of at least $20,000,000,000 and the President did not say how you would get the money, or where you will get the money, for all these things, or how much additional it will cost the American people in taxes. His budget, I will bet, will be for nearly $30,000,000,000. He would drive America into bankruptcy. He certainly was saying, "Henry, come back home." He talked like one who would destroy the private enterprise system and bring us to dictatorship; or like one who has gone through bankruptcy and does not care if everyone else had the experience.

What a pity America has such leadership. Wake up, America, if you value your liberty, your freedom, your independence, and your form of government. Time is the essence.

EXTENSION OF REMARKS

Mr. KERSTEN of Wisconsin asked and was given permission to extend his remarks in the RECORD and include an article from the Milwaukee Sentinel.

Mr. GILLIE asked and was given permission to extend his remarks in the RECORD and include a short article from the Fort Wayne News-Sentinel.

Mr. MANASCO asked and was given permission to extend his remarks in the RECORD and include a radio commentary by George Reedy over Station WOL this morning.

Mr. BECKWORTH asked and was given permission to extend his remarks in the RECORD and include a letter.

Mr. BARTLETT asked and was given permission to extend his remarks in the RECORD and include an editorial from the Cleveland Plain Dealer.

Mr. HAYS, Mr. SMATHERS, Mr. TEAGUE, and Mr. McGARVEY asked and were given permission to extend their remarks in the RECORD.

Mr. EDWIN ARTHUR HALL asked and was given permission to extend his remarks in the RECORD and include a radio address.

FOOLING THE PEOPLE

Mr. BUCK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BUCK. Mr. Speaker, yesterday's tax proposals by the President may fool a portion of the people. They will not fool the fifteen or twenty million Americans who, through self-denial, thrift, and savings, have become the owners of American corporations. Among those stockholders are some Democrats.

INCOME-TAX REDUCTION

Mr. MANSFIELD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

Mr. MANSFIELD. Mr. Speaker, when this House passed Senate Joint Resolution 167 on the last day of the special session, I said at that time that it was a fraud and a hoax on the American people. I said further:

> It will no more stop the tides of inflation than Canute could have stopped the waves of the sea. As long as this Congress has failed in its duty to legislate in behalf of the American people and curb inflation I shall, at the opening of the regular session in January, introduce an income-tax reduction measure which will, if passed, be of benefit to the people in the lower-income brackets and will help them, in part at least, to alleviate the high cost of living.

Mr. Speaker, I am today introducing H. R. 4882, a bill which allows income-tax exemptions for single persons at $1,500 and for married couples at $2,500, with $500 for each additional dependent. I submit that this measure will be of extreme benefit to all people, and certainly will be most equitable and fair. It is among the small-income groups, Mr. Speaker, that tax relief is needed the most and, as long as this Congress refuses to pass legislation to lower the high cost of living, I feel that it is vitally necessary that these people be given this consideration. Recent statistics indicate that a $3,400-a-year income is necessary, at present prices, to sustain life for a man, wife, and two children. Certainly this should bring added support to my bill and I urge my colleagues to vote for this measure so as to give income-tax relief to those who need it most.

DIVERSION OF GRAIN TO MANUFACTURE OF BEVERAGE ALCOHOL

Mr. HAYS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HAYS. Mr. Speaker, I have today introduced a joint resolution to extend the President's authority to prevent diversion of grain to the manufacture of beverage alcohol from January 31, the date prescribed by the recent anti-inflation law, to December 31.

It is apparent from the fact developed in the debate upon this measure that executive authority is needed to prevent the diversion of grain desperately needed for food in Europe and other parts of the world. Congress conveyed this authority upon the President while withholding authority as to other commodities only because we were convinced that the liquor manufacturers are unable or unwilling to prevent the use of an inordinate amount of grain for intoxicants. The Secretary of Agriculture was rebuffed by the distillers and it is obvious that voluntary agreements will not suffice. During the so-called liquor holiday 8,000,000 bushels of grain were used by the makers of neutral spirits in one city and the good purposes of the holiday were defeated by this single action.

It was urged during the debate on the anti-inflation bill in December that the President's authority is unduly limited but proponents pointed out that Congress would have an opportunity during this month to extend the date. It was

probably assumed that this extension could be included in over-all legislation but it is now apparent that such general legislation cannot possibly be enacted prior to January 31. Therefore, this particular section of the law should have special treatment and Congress should promptly extend the President's power so that the Government will not be powerless to prevent the misuse of basic foodstuffs. We must decide whether to have liquor in abundance or minimum food supplies for our fellowmen.

TAX REDUCTION

Mr. GRANT of Indiana. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks and include an editorial.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. GRANT of Indiana. Mr. Speaker, had President Truman and his palace guard tried, they could not have come up with a better proposal to complete the drying-up process of venture capital for American business. The President's proposal would further aggravate the inflationary problem by stimulating demand and at the same time would provide a road block for any increase in production.

This country needs real tax reduction and this Republican Congress is determined to meet that need.

Our income-tax laws today—almost 3 years after the war—are still at a level that was not even considered approachable by the Socialists 25 years ago. Today, America's tax bill is bigger than its food bill.

Everywhere—except in some Government and in some labor circles—it is recognized that in order that one factory worker may be employed, an average capital investment of $8,000 or more is required; that without capital investment, factory workers will not be employed, and that without wage earners, there will be no production, with the result that our present economy will cease to exist.

Shortages exist today in many industries because of the lack of production facilities to meet the demand. Steel shortages are hindering production in many fields. Lack of boxcars and other types of transportation equipment are aggravating the fuel shortages that exist over the country, including my own State of Indiana.

Expanded plants are needed to produce the materials necessary to a world that is rebuilding from a destructive war. More machinery is required with the expansion of the plants. America's industrial machine is wearing out.

Billions of dollars for capital expansion must be poured into American industry over the next few years. That money can come from only two sources—the people or the Government.

The penal tax system, continued long, will bring pure and unadulterated state socialism. The Government, through its taxing powers, will provide that capital and eventually run that business.

On the other hand, we can make it possible, through real tax reduction now, for new capital again to come from the savings of the people. That is the American system to which we are committed.

I include herewith an editorial that appeared in this morning's Washington Post:

BID FOR VOTES

The President's plan for reducing individual income taxes and offsetting the resultant revenue loss of $3,200,000,000 by increasing taxes on corporations is only explicable as a transparently political move—and a crude one at that—to keep in the Democratic ranks certain left-wing groups that might desert to third-party candidate Wallace. Of course, the President reiterates previous warnings that Government revenues should not be reduced until inflation has been stopped. But his words have a hollow sound in view of the character of the recommended tax adjustments. For he is proposing to put more than $3,000,000,000 of additional purchasing power in the hands of consumers by means of income-tax credits of $40 for each individual taxpayer and each of his dependents. The remission would benefit particularly the lower-income-tax groups and would result in dropping from the tax rolls between nine and ten million individual income-tax payers. Hence the proposal has a demagogic appeal that may commend it to the short-sighted.

However, the President's plan creates grave doubts as to the sincerity of his professed desire to follow anti-inflationary fiscal policies, since it would stimulate consumer buying at a time when buying restraint is being urged by the President's own advisers as a check to price increases. Moreover, the proposal to levy an additional tax on corporate profits to compensate for revenue losses would not neutralize the inflationary effect of the lowered income taxes. On the contrary, it would make heavy inroads on corporate reserves accumulated out of profits, and consequently tend to curtail expenditures for the replacement of obsolete equipment and installation of new production facilities. In other words, the President's tax-adjustment program will stimulate demand for goods and at the same time hinder efforts to increase the production of goods by taxing away savings from profits that would otherwise be available to finance industrial expansion. It is, in short, a first-rate method of fanning inflationary fires.

The plan cannot even be defended on the ground that profits are excessive in relation to other types of income. For the Department of Commerce states that the distributive share of business income going to profits is currently the same as in 1929 (that is 12.9 percent). If account is taken of the substantially increased profits-tax liabilities over this period, the department adds, profits after taxes and inventory valuation adjustment are seen to represent about 7 percent of total income originating in business as compared with 11 percent in 1929. On the other hand, labor's share of income originating in business rose from 56.1 percent of the total in 1929 to 59.4 percent in 1947. Moreover, the share of corporate profits is lower now than it was in 1941, while labor's share of total income from business is higher.

These data, in our opinion, dispose of the argument that current business profits are so excessive as to justify a form of tax adjustment that would shift tax burdens from individuals to industry. Already business concerns are feeling the pinch of capital shortages that have resulted in rapidly growing demands for bank loans of an inflationary type. Inflationary credit expansion of this kind would be ecouraged by heavy increases in taxes on corporate profits—a large part of which would otherwise be saved and invested in productive facilities.

If the President had stood by the principles that he has indorsed so courageously in the past, and refused to countenance any form of tax reduction calculated to increase consumer spending, he might have rallied sufficient support to defeat the Republican tax-reduction program. As it is, his opportunistic bid for labor votes, implicit in his proposal to reduce income taxes at the expense of industry, will be regarded as a go-ahead signal by the Republican advocates of immediate tax reduction.

LEGISLATIVE PROGRAM

Mr. HALLECK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALLECK. Mr. Speaker, it is my understanding that the Congress will receive another message from the President of the United States on Monday next.

After that, and for the balance of the week, it is proposed to call up the bill H. R. 2575, which is a bill from the Committee on Armed Services, having to do with the revision of the Army court-martial system. The next bill we propose to call up is H. R. 2759, from the Committee on Interstate and Foreign Commerce, to amend the Interstate Commerce Act so as to provide limitations on the time within which actions may be brought for the recovery of undercharges or overcharges by or against common carriers. The next bill is H. R. 4071, also from the Committee on Interstate and Foreign Commerce, to amend section 301 (k) and 304 (a) of the Federal Food, Drug, and Cosmetic Act.

EXTENSION OF REMARKS

Mr. LEA asked and was given permission to extend his remarks in the RECORD and include excerpts from a speech by John C. Cooper on aviation.

Mr. KEATING asked and was given permission to extend his remarks in the RECORD and include an editorial by Mr. Walter Lippmann.

Mr. LECOMPTE asked and was given permission to extend his remarks in the RECORD and include an editorial from the Ottumwa (Iowa) Courier.

THE PRESIDENT'S SPEECH

Mr. H. CARL ANDERSEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. H. CARL ANDERSEN. Mr. Speaker, the President's speech before the joint session of Congress was definitely political, very weak, and did not touch on the real cause of inflation, the great threat to our Nation today.

Everyone would like to see the idealistic picture drawn by the President brought into reality. We would all like to know that every family had the kind of a home every man dreams of providing for his loved ones. We would all like

to know that every child in America had the advantage of the best educational facilities available anywhere in the world. We would all like to know that every American could have the benefit of the best medical and hospital care, as well as the guaranty of security in old age. A very small percentage of the people in the Seventh Congressional District come under the Social Security Act.

However, we are faced with the grim, realistic picture presented in the problems of inflation, a forty-thousand-million-dollar governmental budget, a stupendous national debt, and a foreign situation which is anything but bright, and which will necessitate strong national-defense measures for years to come.

The President said we must keep the Nation strong but said nothing about the production—and more production—which I believe is the only answer to inflation. Rationing would only make a bad matter worse and the black markets would flourish.

If the administration would cooperate with Congress, there would be ample surplus this year to make a generous reduction in the tax burden, as well as to whittle a slice from the national debt, and provide foreign aid.

As a member of the Appropriations Committee, I have no hesitancy in saying that the administration has at least 300,000 people on the Federal pay roll whose services are not required. The President indicated that the administration anticipates adding tens of thousands to the rolls. If the people of America want taxes reduced, we must have economy in Government. We, as a nation, cannot spend and spend and reduce the tax load at the same time any more than we, as individuals, can live beyond our means and put aside anything for a rainy day.

The speech made by the President was weak in that it was based on a foundation of financial insecurity for our Nation. The cornerstone of our national security, economy, was missing from his address to the Nation.

EXTENSION OF REMARKS

Mr. RANKIN asked and was given permission to extend his remarks in the RECORD and to include an article from the Des Moines (Iowa) Democrat on the liquor question.

CONTROL DANGEROUS INFLATION AND PREVENT DISASTROUS DEFLATION

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, I want to extend my sympathy to the Members of the majority party in both Houses, who are ostensibly trying to control inflation by fixing prices or rationing purchases.

They remind me of the man in Gulliver's Travels who was trying to manufacture gunpowder out of ice, or to extract sunbeams from cucumbers.

You might as well attempt to weld a wooden handle on a pewter spoon, graft a dead bough to a living trunk, and make it blossom as the rose, mix oil and water together placidly in the same bottle, make boon companions of the spider and fly, or promote the agricultural prosperity by teaching the farmers how to milk ducks, as to control inflation by fixing prices or rationing purchases.

You remind me of the old woman who tried to heal the wound in the boy's foot by putting ointment on the instrument that made the wound, instead of on the wound itself.

I am voicing the opinion of every first-class economist in the world when I say that prices in a free economy are governed by two things, the volume of the Nation's currency multiplied by the velocity of its circulation.

In 1920, at the peak of high prices, we had $8,000,000,000 in circulation, for the first time in history, and prices soared to levels never known before.

In 1930 our money in circulation had gone down to $4,426,000,000 and the depression reached its worst.

The other day I quoted you the figures of October 31, 1947, showing that our currency in circulation had gone up to $28,551,870,056, of which $24,283,461,535 were Federal Reserve notes.

The last report came to me on yesterday, and it shows that the money in circulation on November 30, 1947, amounted to $28,765,640,996, of which $24,474,706,235 were Federal Reserve notes.

In other words, it went up $200,000,000 while you were talking about doing something about inflation.

The same Federal Reserve banks that are inflating the currency through the issuance of Federal Reserve notes through the Federal Reserve System, have the power to deflate that currency and bring about such a depression as they created in 1921, and with which they wrecked the Hoover administration in 1929 to 1933.

I appeal again to the Committee on Banking and Currency to bring out a bill to restore to the Congress the power given it by the Constitution of the United States "to coin money and regulate the value thereof," provide for stabilizing the currency at a given point, and let the American people know what they may depend on.

That is the only way ruinous inflation can be stopped and disastrous deflation prevented.

This is not a political question. It is an American question that involves the welfare and the prosperity of every individual and also the integrity, as well as the life, of the Republic itself.

It is the most serious question with which we have to deal; and I again appeal to the Committee on Banking and Currency not to waste any more time talking about regulating inflation by holding down the prices of individual articles, or rationing purchases. It cannot be done. The only way in which you can check inflation is to stabilize the currency and assure the American people of a reasonable measure of prosperity and safety, now and in the years to come.

The SPEAKER. The time of the gentleman from Mississippi has expired.

SPECIAL ORDER GRANTED

Mr. SIKES. Mr. Speaker, I ask unanimous consent that on Monday next, after the legislative business of the day and any other special orders, I may address the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER. Under previous order of the House, the gentleman from Michigan [Mr. HOFFMAN] is recognized for such part of 1 hour as he desires to use.

(Mr. HOFFMAN asked and was granted permission to revise and extend his remarks and include certain newspaper articles and court records.)

LOYALTY OF CONGRESSMEN

Mr. HOFFMAN. Mr. Speaker, it is not my purpose today in calling attention to the message on the state of the Union to say anything that might be construed as being political in its nature. I may, however, state that to me it seemed to be an invitation to everyone in this country, and perhaps to people wherever they may live in the world, even though they do not realize that they need or want anything, to think it over again and see if there is not something that Congress could do for them.

If Congress does not do all of the things that everyone wants, then—and this is the point of my remarks today—the Congress as a whole is no good and individual Congressmen are greedy and selfish; they are skunks and rats; they are everything disreputable in the opinion of those who ask.

Now, why do I say that? Some of you babes in arms who served in the last World War, as the gentleman from South Carolina [Mr. DORN], who sits just before me here, you have not been here—it is true you were in the war and you were shot at and perhaps they tried to drown you and blow you out of the sky, something like that—but while that was going on, and even before that, you know, Members of Congress were under a different kind of fire, harmless but unpleasant.

The reason I speak of what happened then is because history will repeat itself, and unless the Members of Congress do not do exactly what the Washington Post and some of the other papers want them to do—and you can find out in the morning if you will get your paper and turn to the editorial page, you can find out just exactly what you ought to do on every measure that is coming before the Congress; and if you do not do it, you are a bad egg, you are disloyal, you are seditious, you are subversive; in fact, you are no good. If you do not support every measure advocated by some section of the press, then get ready for the smear campaign.

And the Post goes so far—and the Star does, too, in a recent editorial—as to wonder what in the world is wrong with the people who elected you. The paper felt sorry—the Star said it felt sorry—for the people of my district—and I know they felt the same way about some of the rest of you—because my people did not know any more than to elect me to Congress.

If the Star and the Post and these other editorial writers would go out—but they do not have the courage or perhaps they do not want to give up their income to go off in some district and run for Congress, but they want to dictate to every Congressman here just what he should do. Their abuse would have some point. They want to tell us what to do but do not wish to assume the responsibility of office.

The Star said it felt sorry for my folks. Well, I do, too, but it is the best they could do; and, after all, here I am, and when they discharge me they will have to give me, according to this congressional action, I understand if I pay for it, a pension, and they will have to pay my successor; and my folks are shrewd enough to know that it costs them at least $3,000 less to keep me in Congress than it would to keep a new man here. My folks are not just so dumb as some of these editorial writers think they are. And it is just possible that I accurately represent my folks and that they, in spite of the editorial opinions of the Washington writers, may, after all, have the correct solution to some of the questions which the Congress is called upon to answer.

Now, way back 4 or 5 years ago the Washington Post started out on a great crusade, so they called it, and they bragged they had a nice young fellow down there named Dillard Stokes, who used the alias of Jefferson Breem, and Quigley Adams, about what they were doing for the country. He wrote out all over the country, to some old folks and people of one kind or another. Some folks said some of them were a little weak in the head but that is no crime, there are a lot of others that way, including a few editors, you know. He wrote out and asked them to write to him. So they did.

There was Elizabeth Dilling out there in Chicago. What was the matter with Elizabeth? Well, she talked an awful lot, she talked incessantly; but in addition to talking differently than some people who talk so much—and I will not say who I am thinking about now—she was bright, intelligent, and aggressive, and she was among other things bitterly anti-Semitic. Some of these other folks were anti-Semitic. That makes me pause a moment to think of this message yesterday. We must not discriminate against any one we were told. I try not to.

There is one thing I cannot understand, and I wish someone would tell me about it. Why is it, if we are to have no discrimination in this country, that we have a Jewish veterans' organization? Why do we have a Catholic veterans' organization? Why do we split up that way? Is a Catholic or Jewish veteran any different than a Methodist, Episcopal, Lutheran, or Baptist veteran? Is he? I do not know. I cannot understand these folks when they get on both sides of this fence. Why not end discrimination among veterans? Why not have just veterans' organization?

Anyway, Mrs. Dilling and a bunch of these other people were anti-Semitic. So the Washington Post conceived this great idea of getting a reporter to write, to entrap them into a situation where they could be brought within the jurisdiction of the Washington courts, and he does. These people answer him and send the pamphlets of an anti-Semitic nature here to Washington. Do you see the point? They lay the jurisdiction here in Washington to bring those people in from all over the country and charge some 20 or 30 of them with a conspiracy. A conspiracy to do what? Well, the real charge was that they were anti-Semitic. That is wrong, of course. None of us wants to be anti-anything.

According to that message yesterday, we all want to be for everything. Why the President wanted to discriminate I do not know, and I think he did a little bit. He said when a fellow had an income tax he should have a $40 rebate, and if he had two or three more children, $40 for each one. That is all right. But the President said that the corporations, the nasty, wicked, dirty corporations, should be made to pay the tax which the other fellows escape because of the $40 exemption.

If a man has an income and is to be excused because it is small, then does it not follow that, if he has no income at all, he ought to have a direct payment from the Federal Treasury? Why did not the President go a little further and say that he would give $40 to every fellow who did not have an income and $40 for each child he did not have? This would hit the bachelors who never marry. That omission was real discrimination. Here is a happy couple who have been married maybe 30 years. They have done their best in every way, but they have neither chick nor child, they have an income, but they do not get any exemption. Why not give them an exemption based upon their real efforts? What is the matter with the administration?

I want to be fair. I want to be reasonable. Let us go further. I will go the President one step farther if it is going to be political and say that we should exempt everybody from taxation. I would be in favor of that if I knew any way of getting my salary or getting government without the people being taxed.

Let us go back to Dillard Stokes and the Washington Post. There was another leg on that stool—William Maloney. They got him in there. So they called these people down here and they prosecuted them—persecuted them, some would say—for four and a half years. William was a great lawyer. The Post just bragged him to high heaven for his ability and integrity. Of course, they did not say anything about his being arrested for being disorderly and fighting in the street and fined $10 on March 21, 1945.

But the Supreme Court had something to say about him. In judicial and polite language, the Supreme Court characterized him as a pettifogging shyster, if any of you know what that means. That is everything which is disreputable, mean, low, and contemptible when it is practiced by one who has been admitted to practice before the Court.

This is a part of what the United States Supreme Court, on March 1, 1943, had to say of William Power Maloney:

> At a time when passion and prejudice are heightened by emotions stirred by our participation in a great war we do not doubt that these remarks addressed to the jury were highly prejudicial, and that they were offensive to the dignity and good order with which all proceedings in court should be conducted.

In another case where Mr. Maloney was one of the United States district attorneys prosecuting the case his conduct came up for review, and the judge writing the opinion, among other things, said:

> Even from the printed record we can see the vigor with which the prosecutor pressed the case, vigor which at times went beyond the canons of decorum and dignity which an officer of the United States should observe. The prosecutor was not averse to indulging his talent for spectacle: Chorus girls and movie stars were paraded to the stand to prove only minor portions of the Government's case. Theatrical demonstrations, however diverting to the spectators and jury, have no place in a United States courtroom. Nor was the intemperance of several attacks made upon defendants and their counsel in keeping with the Supreme Court's reminder that the prosecutor is to regard himself as "the servant of the law." (*United States* v. *Buckner* (108 Fed. (2d), 921, 928).)

And the one-worlders who wanted to establish a super United States of the World, surrender our sovereignty, haul down the Stars and Stripes; the Post and Stokes and Maloney tried to link me with the so-called seditionists; charged me with being disloyal, seditious. It is to warn you against what you may have to meet that these remarks are made.

But the situation got so bad that even the Washington Post could not take it, and here is what they said about the trial, about the case that they had worked up by fraud and chicanery and all sorts of disreputable practices:

For example, after bragging and patting itself on the back day in and day out, week in and week out, for a year or more, about how it—the Post—had brought about an investigation and caused the indictment of some 33 persons for sedition, and printing articles like the following—and I quote:

[From the Washington (D. C.) Post of June 5, 1943]

ISOLATIONISTS CRIED "SMEAR"—GRAND JURY INDICTS 33 PERSONS, NEW YORK PAPER FOR SUBVERSION

(By Dillard Stokes)

Three women, thirty men, and a New York paper were indicted here yesterday for conspiring with the Nazi propaganda boss, Ulrich Fleischauer, to stir up mutiny and disloyalty in the United States armed forces.

The District grand jury added six defendants to the 28 who were accused last July 21 of weaving scores of organizations into a vast Nazi network. Named as tools of the conspirators were groups ranging from the America First Committee to the Black Legion, from Hamilton Fish's Committee To Keep America Out of Foreign Wars to the Ku Klux Klan.

HOWLS OF "SMEAR"

The prosecution touched off angry protests from isolationists in Congress, which hit crescendo 2 months ago when Assistant Attorney General Wendell Berge, Chief of the Department of Justice Criminal Division, sent his crack squad of special prosecutors back to the grand jury with new evidence.

While Senators and Representatives cried "smear!" and clamored for congressional investigation of the case, Prosecutors William Powers Maloney, John T. M. Reddan, and

Miss Jean R. Meyer presented a score of witnesses and stacks of new exhibits.

The indictment handed up in district court yesterday by Grand Jury Foreman Harry Boss demonstrated that the probers had dug far beneath the surface of the Nazi propaganda operations first exposed by a special grand jury 6 months ago. Named for the first time, as coconspirator of the 33 agitators who were operating in this country, was the Nazi Fleischauer, who is boss of the mammoth propaganda press at Erfurt, Germany.

REICH CHECKED CLOSELY

Disclosed for the first time was the close check kept by the Wilhelmstrasse upon the success of its American operations. Quoted in the indictment, as an overt act to carry out the plot, was a letter from George Sylvester Viereck to Dr. Hans Heinrich Dieckhoff, chief of the German foreign office propaganda section. Viereck, an admitted Nazi agent now in jail for violating the Foreign Agents Act, told Dieckhoff that a radio speech by President Roosevelt was enthusiastically received in the press, which had "joined the New Deal dance of death."

GRIFFIN EDITORIAL REPRINTED

But said Viereck: "* * * there were a 'few notable exceptions—the Chicago Tribune, Mr. Hearst personally (his papers are not entirely under his control), Griffin's Enquirer, etc., etc.' "

In the same letter to his chief in Berlin, Viereck reported that an editorial by William Griffin (Enquirer editor and one of the alleged conspirators) "appeared not only in his own paper, but was reprinted as a paid advertisement in the New York Times, the Chicago Tribune, the Hearst papers in Chicago and San Francisco. * * *"

Somebody spent several thousand dollars to reprint this editorial.

Viereck wrote a speech which the late Senator Ernest Lundeen (Farmer-Labor), of Minnesota, gave in the Senate, after which the speech was issued as a book by Flanders Hall, Inc., a publishing house controlled by Viereck. The title was Lord Lothian vs. Lord Lothian.

Viereck reported that "Mr. Hearst gave it (the book) a great deal of space—nearly half a page—in his own column, which reaches at least 20,000,000 people."

Viereck's letters to Berlin were seized by the British Intelligence.

The six defendants accused yesterday of conspiring with Griffin, Viereck, and the other 26 indicted in July were:

1. Franz K. Ferenz, a Nazi Party secret agent who distributed books, films, and other Nazi propaganda in California and was jailed a few weeks ago under the California Anti-subversion Act. Ferenz was active in the seditious Friends of Progress and a spark plug of isolationist agitation. He plugged the America First speech of Senator Burton K. Wheeler (Democrat), of Montana, in Los Angeles, on October 2, 1941.

(Senator Wheeler is one of those who called the conspiracy prosecution a smear and wrote Attorney General Biddle, "I cannot believe some of them (the alleged plotters) are guilty." When asked, the Senator admitted this was just "conjecture," because he knew none of the facts and none of the alleged plotters. He publicized his letters to Biddle a few days after the grand jury revealed that Ferenz was a suspect.)

2. Mrs. Lois de LaFayette Washburn, alias T. N. T., a promoter for the National Liberty Party and a distributor of Yankee Freemen, one of the publications named as tools of the conspirators.

3. Frank W. Clark, alias G. P., another Liberty Party organizer and commander in chief of the League of War Veteran Guardsmen.

4. Paquita de Shishmareff, alias Mrs. Leslie Fry, organizer of Militant Christian Patriots in this country and England and publisher of the Christian Free Press, another alleged tool of the conspirators.

5. George E. Deatherage, leader of the Knights of the White Camelia, who once plotted seizure of this Government and was a conferee at the Nazi Embassy here.

6. New York Evening Enquirer, Inc., a corporation headed by the defendant William Griffin, which issued the Enquirer, another alleged tool of the conspirators.

The other defendants included Mrs. Elizabeth Dilling, alias the Reverend Frank Woodruff Johnson, Chicago antiwar agitator and "Mothers" group promoter; William Dudley Pelley, the Silver Shirt chief, now in prison for sedition; David J. Baxter, chancelor of the secret "Socis," an armed revolutionist band; Gerald B. Winrod, Kansas agitator whose oratory won him the name of the "Jayhawk Hitler"; Prescott F. Dennett, who ran the Washington headquarters of the Nazi agent Viereck, getting Viereck's material into the CONGRESSIONAL RECORD with the aid of Representative Hamilton Fish's secretary, George Hill (now in prison for perjury), and Charles B. Hudson, circulator of the seditious V card and of the "Roosevelt Is a Judas" speech of Representative CLARE E. HOFFMAN.

The indictment was in two counts, one charging that the conspiracy against the Army and Navy was carried on before the war, the second charging that the plot went on after the attack on Pearl Harbor.

The first count listed 20 overt acts alleged to have been done to carry out the plot. These included letters to and from German officials; Hudson and Mrs. Dilling coming to Washington on isolationist junkets and mailing of seven propaganda items to "Jefferson Breem" and "Quigley Adam" in Washington. These mailings were the seven overt acts set out under the second count.

(EDITOR'S NOTE.—"Jefferson Breem" and "Adam Quigley" were names adopted by Dillard Stokes, Post reporter, in his investigation of subversive activities.)

AMERICA FIRST AMONG GROUPS CALLED TOOLS

Forty-one groups which blatantly extolled their own patriotism while their spokesmen beat the drums of isolation were branded the tools of a Nazi network in the seditious conspiracy indictment returned by the District grand jury yesterday.

Biggest was the America First Committee, set up by well-meaning Americans to serve their country's interests as they saw them, but widely invaded by pro-Nazis to serve Hitler's interests as his agents set them out. Even Laura Ingalls, the America First ace spellbinder, was shown to be a Nazi mouthpiece, paid and directed by Baron Ulrich von Gienanth, of the German Embassy. She is in prison.

Another was Representative Hamilton Fish's National Committee to Keep America Out of Foreign Wars, which he set up in 1939 just before he went to Germany and came away declaring Hitler's demands on Poland were just.

Others were the Silver Shirts, Knights of the White Camelia, Black Legion, American Nationalist Confederation, Ku Klux Klan, Militant Christian Patriots, German-American Bund, National Liberty Party, National Workers League of America, Friends of Progress, Citizens Committee to Keep America Out of War, Mrs. Elizabeth Dilling's Patriotic Research Bureau, Make Europe Pay War Debts Committee and two other debt committees set up by the Nazi agent Viereck, National Gentile League, Coalition of Patriotic Societies, Pelley Publishers, Crusading Mothers of America, Pan Aryan Conference, Citizens No Foreign War Coalition, Capital News and Feature Service, American Guards, Yankee Comrades, Social Republic Society (Socis), Committee of Patriotic Societies, Protestant Gentile League, League of War Veteran Guardsmen, Pioneer News Service, Crusader White Shirts, James True Associates, Women Investors of America, Constitutional Education League, We, the Mothers United, Flanders Hall, Inc., United Mothers of America, Purdy Publishing Co., We, the Mothers Mobilize for America, and American Mothers.

The indictment declared the Nazi network made use of 42 publications, many of which were sponsored by these groups. Included were books, papers, and magazines which advanced in unison the theme that America was safe between two oceans and that anti-Nazi views came from warmongers.

The Post, on July 16, 1944, in an editorial, had this to say:

MASS TRIAL

The severance of three cases from Washington's mass sedition trial is the best news that has come out of this dreary affair in Judge Eicher's court. It clearly suggests belated recognition of the mistake that was made in bringing 30 individuals of widely varying temperaments and backgrounds to trial at the same time and place for a series of alleged offenses classified as sedition.

One defendant recently died. Another is too ill to attend court sessions regularly. A third found it difficult to follow the proceedings because of limited hearing. A fourth proved to be so obstreperous as seriously to interfere with the progress of the trial. In other words, the exigencies of human life are such as to defeat most any attempt to dispose of complicated criminal charges en masse with both fairness and dispatch. It is a pity that the Department of Justice did not foresee this elementary objection to mass trials before embarking on such an adventure.

The fact that four cases have been eliminated from the trial is overshadowed, therefore, by the larger fact that 26 cases remain before the court. We hope that better progress can now be made but no end of even the presentation of evidence by the prosecution is in sight after 13 weeks. How can the jurymen be expected to remember testimony given many weeks before their verdict will be rendered? How can they, in these circumstances, distinguish the varying degrees of guilt, if any, among the 26 remaining defendants? We fear that whatever may be the outcome of this trial it will stand as a black mark against American justice for many years to come.

Still later and on the 28th of the same month—July 1944—the Washington Post printed this editorial, and I quote:

COURTROOM FARCE

For weeks Washington has been aware of the farcical nature of the sedition trial that is droning on from one weary session to another in Justice Eicher's court. Everyone who reads the newspapers knows that the trial has been characterized by obstruction, unruly conduct on the part of some of the defendants, unreasonable delays, prolongation of the testimony and cross-examination and laxity of control or direction. If there were any lingering doubts as to the farcical nature of the trial, they must have been removed by James E. Chinn's factual account of the proceedings on the "third day of the fifteenth week" in the Post yesterday.

Justice Eicher has undoubtedly tried to make the best of a bad situation. He has attempted to prevent the trial from being turned into a comedy of errors; he has tried to keep it moving toward a conclusion. But the very nature of the case has thwarted his efforts. Mass trials may possibly be successful where the issues are simple and the testimony is brief—or where the Russian technique of condemning the defendants first and putting on a trial for show is used. But where the issues are complicated and defendants who have not been browbeaten stand on their democratic rights, a trial involving more than two dozen individuals is almost certain to be a fizzle.

We think the time has come to recognize the unlikelihood of securing any fair approximation to justice from this unhappy experi-

ment. The end of the Government's testimony is nowhere in sight. Prosecutors have 4,000 exhibits to offer in evidence and only about one-eighth of them are in the record at present. Then each of the 26 defendants will have to present his case. At its present rate of progress, therefore, the trial may run on for several years after the war is over. Meanwhile it is gravely undermining confidence in American justice.

Apparently it would be impossible now to end this sorry spectacle and try the individual defendants separately. But the court could probably sever additional cases and insist that the testimony be stripped down to essentials. After all, this is a trial of men and women accused of sedition, not a contest in befuddlement. In our opinion, the trial can continue its present course only at the cost of serious impairment of our judicial system and the reputations of those responsible for this travesty.

It got down to be a dreary affair by that time. Then, later on, the Washington Post had something else to say about the persecution it had carried on.

Still later and on the 23d of November 1946, the Post editors wrote:

SORRY EXPERIMENT

The Department of Justice had been unconscionably dilatory in handling the sedition cases which Chief Justice Laws threw out of the district court yesterday. Nearly 2 years have elapsed since the death of Chief Justice Eicher halted the notorious mass trial. At that time, Government witnesses had been giving testimony for more than 7 months and vast piles of so-called evidence remained to be read into the record. When the war in Europe was over, the Department sent its prosecutor, O. John Rogge, to Germany in search of additional evidence. On his return, despite his sensational innuendoes against various prominent citizens, he recommended dismissal of the sedition cases. Mr. Rogge was later dismissed for disclosing confidential material in his report. But the Department of Justice still insisted on keeping the cases open and was found in opposition when Chief Justice Laws finally brought this sorry incident in our judicial history to a close.

Whether the Government might have convicted some of the defendants if they had been tried individually is a question that can never be settled. But one conclusion is obvious. It was a colossal blunder to herd 30 persons of widely differing backgrounds and no specific relation to one overt act into a single trial. The unwieldy character of the trial contributed in no small measure to the farcical aspects which it soon developed. The effect was to bring American justice into contempt. But at last the court has acted to end that deplorable experiment in circumstances which should make it stand out as a warning against any similarly hysterical move if we are again involved in war.

Many other papers had something to say about the trial of the so-called seditionists.

On the same day that the Post editorial was written, that is, November 23, 1946, in the Washington Times-Herald, Frank C. Waldrop had a piece. That piece reads this way:

THE CHEAPEST ACT

(By Frank C. Waldrop)

For disgrace and cheapness can you name anything by our great United States Government throughout its history to equal its performance in the so-called sedition case?

Chief Justice Bolitha J. Laws, of the United States District Court here put the Department of Justice out of its misery yesterday by granting defense motions to dismiss the case. He said:

"In the circumstances, to permit another trial, which conceivably would last more than a year, with new prosecutors and newly appointed counsel for the defendants, with the eventual outcome in serious doubt * * * would be a travesty on justice."

That it would be. But no worse a travesty than the record to date. Except for the cold, official, provable facts of public record, anybody would be justified in thinking the whole story is a joke or a lie.

The great sedition trial's history is sordid in every line. No single person who had a part in bringing it on can point with pride to an accomplishment of worth to grow out of it, for all the money it cost, for all the reputations it smeared or for all the unsuspecting American minds it poisoned.

The story begins—oh, we'll never know exactly all about that until the secret archives of the Department of Justice are broken open, as they should be—but for a formal date, put down July 1941.

That was when a special prosecutor for the Department of Justice, one William Power Maloney, went before a District of Columbia grand jury to allege some people had been violating the Espionage Act of 1917, and the Alien Registration Act of 1940.

Maloney charged a conspiracy to violate the seditious propaganda sections of these acts. Sedition is the high crime of inciting resistance to the Government. It is just one slight step short of treason, which is giving open aid and comfort to an enemy.

Naturally, anybody accused of sedition any time is on a hot spot. Friends avoid him. Acquaintances know him not. And given the state of public feeling in July 1941, all is multiplied.

Obviously, the United States Government and its special prosecutor, Mr. William Power Maloney, had upon them at that time a tremendous responsibility to protect innocent good names and observe common decency just as they had a tremendous responsibility to protect the Nation from any internal enemies.

But what happened?

Well does this writer remember the day when some terrified lady members of the America First Committee were summoned to appear before the grand jury.

One was a Senator's wife. The others were private citizens. Against none could doubts of loyalty to the United States be raised by even the remotest suggestion. Their crime was that they were exercising their constitutional right to differ with the administration in the great foreign policy debate then raging in America.

Still they felt Mr. Maloney's heavy hand upon their shoulders. So did many another. The grand jury proceedings were a scandal and an outrage. Secrets of the jury room leaked in a steady stream to Mr. Maloney's favored reporters, columnists, and gossipmongers.

Well, finally an indictment was returned on July 24, 1942, and the real legal war began.

But for all his performance, Mr. Maloney's indictment was no good. In fact, the Department of Justice had to go back and do the whole thing over twice, so that not until January 4, 1944, was an indictment brought down that the Government cared to test in court.

Meanwhile, Mr. Maloney had been tested in court, also. The United States Supreme Court reversed his preliminary canter in the field with language that would blister the hide of a rhinoceros.

That was on March 1, 1943, in the matter of George Sylvester Viereck, a German agent convicted of improperly registering with the State Department.

Maloney had prosecuted Viereck in a warm-up for the main event of the sedition trial. The Supreme Court reversed the conviction, 5–2, on the ground that Viereck was being tried for acts committed before the law was passed under which he was accused.

In the course of the reversal, the late Harlan F. Stone, then Chief Justice of the Supreme Court, had this to say of Maloney:

"He indulged in an appeal wholly irrelevant to any facts or issues of the case, the purpose and effect of which could only have been to arouse passion and prejudice.

"At a time when passion and prejudice are heightened by emotions stirred by our participation in a great war, we do not doubt that the remarks addressed to the jury were highly prejudicial and that they were offensive to the dignity and good order in which all proceedings in court should be conducted * * *."

Only once before in its history had the Supreme Court ever so directly and fiercely reprimanded an attorney and never before had it ever felt the need to do so with a United States prosecutor.

That was nothing, however, to what followed.

The third indictment came on for trial April 19, 1944, with 30 defendants. For 8 months it ground away getting nowhere and ended in a mistrial when the presiding judge dropped dead. The Government has not dared since to do anything positive about it one way or the other.

Two of the defendants have died, also, and O. John Rogge, the special prosecutor who succeeded Maloney, has been fired by the Department of Justice for shooting off his mouth.

There just was no luck in that case for anybody. And why? Because it was a case bred in malice, prosecuted in hate, and pursued in bigotry. It had purposes far wider than the mere trial of people accused of a crime.

It was a disgrace to America.

The Chicago Tribune, 2 days later, on November 25, 1946, carried an editorial which reads:

A TRAVESTY ON JUSTICE

Chief Justice Laws, of the District of Columbia Federal court, dismissed the mass sedition case with the remark that to bring it to trial again would be a travesty on justice.

That is true, and he could have gone further. The case, from its very inception 4 years ago has been a travesty on justice. It was conceived dishonestly and conducted dishonestly to the last. The sedition indictment was a tyrannical attempt by Roosevelt and his henchmen to suppress criticism of the administration. By proceeding against a group composed largely of harmless and relatively helpless crackpots, the administration sought to intimidate more reputable and influential critics.

Everything that was done in contempt of law at Nuremberg was foreshadowed in the sedition cases. The prosecutors attempted a proscription within the framework of American law and the American Bill of Rights. They failed because that law and those rights were too strong for them. Biddle and Jackson at Nuremberg cast American concepts of justice into the discard from the beginning. They hanged the defendants, who deserved hanging on other grounds, but they convicted themselves as unfit ever again to take part, in any capacity, in the American judicial process.

The new law that they asserted they were establishing at Nuremberg was nothing more than the destruction of existing law. Transplanted to America, their new law could become an instrument for the destruction of American liberty at the hands of a world tyranny. The election of November 5, and now the sedition case dismissal, blighted those hopes. Americans, as the Washington court has held, still enjoy the constitutional and legal safeguards which their fathers died to establish and maintain.

Mr. Roosevelt in 1942 had his war, but the way in which he got it was proving increasingly embarrassing politically. Four out of

five Americans hadn't wanted war, and all the powers of wartime censorship had not been sufficient to still questions of Roosevelt's conduct in bringing the war about. That was the real reason for the sedition case.

The original indictment named 27 defendants. Some of them previously convicted, may have been guilty of sedition or they may have been railroaded. Their cases must be reviewed. They were merely window dressing. The rest of the defendants were crackpots. Some of them were violently anti-Semitic; others preached other forms of religious hatred; a few were sponsors of fantastic monetary and economic schemes. None of them was known nationally. Almost without exception, these defendants got more advertising and notoriety out of the indictment than they had been able to win by their own efforts which, in many instances, had covered periods of years. They were little people, and had they done all the conspiring they were charged with, their influence was so slight that they still would have been harmless to the Nation.

None of the defendants knew all the others. There was never the slightest evidence that they had any concerted plan of action. The one thing that they had in common was that they all spoke or wrote violently against Franklin D. Roosevelt and his warmongering. Nevertheless, they were all grouped together in a conspiracy indictment.

The purpose of this indictment was, first, to make it difficult for the defendants to defend themselves by bringing them to trial in a strange city; and, second, by the old trick of grouping the lot of small fry together, to make the case look important. The indictment was returned in Washington, where the preponderance of New Deal payrollers made it easier for the prosecutors to find a subservient jury. The technical grounds for trial in the District were that a reporter for the Washington Post had, by provocative correspondence, persuaded most of the defendants to send their literature to him in Washington. Later the Post was to regret the villainy.

Few of the defendants had any means. They were transported from their homes for trial in Washington, where a number of them were kept in jail because they couldn't post bail. Others of them had to live in cheap lodging houses and support themselves by odd jobs during the months and years through which the trial dragged itself. One of them, an old man, died during the trial, virtually of starvation.

Every power of government was used to deny them a fair trial. The first indictment was defective. A second, and then a third one, were returned. The case was so flimsy that Government counsel delayed it as long as they could, continuing their harassment of the defendants. Most of them had no funds to employ counsel, and lawyers had to be appointed by the court. Some of the latter were as erratic as their clients. The trial, when it got under way, was vaudeville. It lasted through 8 months of disorders such as no other courtroom in this country, probably, has ever seen.

At the end of that period the judge, tormented by conscience and worn out by the strain to which he had been subjected, died. A mistrial was declared and the New Dealers never dared bring the case to trial again, until they were forced to do so last week. Neither would they dismiss the charges, holding them instead over the heads of the defendants.

Every prosecutor who took the case destroyed his reputation. Williams Power Maloney, the first of them, was last heard from as counsel for the Garssons. O. John Rogge, who held the position until recently, wrote an official report based, so it was said, on the supposed testimony of dead Nazis, in an attempt to justify the prosecution. Although the report was presumably secret, Rogge quoted from it in a public speech and was fired because he attacked John L. Lewis, whom the administration was trying at the moment to mollify.

When Theron L. Caudle, who succeeded Rogge, was asked by Chief Justice Laws if he had any reasons why the case should not be dismissed, Caudle attempted to give the court Rogge's report for private inspection, but refused to let defense attorneys see it. The report was not so secret but what parts of it could be used for a New Deal political speech, but Caudle wanted the judge to read it without allowing counsel for the defendants whom it attacked to know what was being charged against their clients. The judge, naturally, refused the offer. Chief Justice Laws' final comments should have burned the ears of the prosecutors.

"The defendants," he said, "have bee before the court upon these charges for nearly 4½ years. All of them were brought here from other parts of the country to stand trial. Because of the impoverished state of 18 of the defendants, they were represented by counsel not of their own choice but appointed by the court to serve without compensation.

"As in all long-delayed cases, the witnesses now are scattered; some are not accessible, more particularly to the defendants who are without funds; the memories of witnesses as to events occurring many years ago are not clear. It is for these reasons, among others, that the Constitution requires a speedy trial and that the Congress has imposed a statute of limitation to prevent long-delayed prosecutions. I do not see how these defendants can now possibly obtain fair trials."

Every American may take comfort in these remarks. All the guaranties of a fair trial which the Constitution vouchsafes still live. The Nuremberg tyranny can never be brought across the Atlantic so long as these principles persist and courts have the courage to apply them.

Many other papers and periodicals carried similar denunciations of the trial. And remember that was the case which the Post and its reporter, with the aid of disorderly, pettifogging William Power Maloney, had conceived and wetnursed until it had secured the indictment and arrest of some thirty or more citizens who, with the exception of five or six, had never been convicted of any crime, were not shown to be guilty of any criminal offense or of any misconduct other than that of being anti-Semitic.

In dismissing the case, Mr. Justice Laws wrote the following opinion:

[In the District Court of the United States for the District of Columbia, *United States* v. *Joseph E. McWilliams et al.* Criminal Nos. 70153, 71203, 73086]

MEMORANDUM ON MOTIONS TO DISMISS

These cases are before me upon motions to dismiss, lately filed by permission of the court.

Until yesterday, so far as the court has been informed, the prosecution has been chiefly entrusted to O. John Rogge, special assistant to the Attorney General. On January 25, 1946, when the court heard previous motions to dismiss, Mr. Rogge stated that in view of late decisions of the Supreme Court of the United States, he felt doubtful as to whether a conviction of the defendants could be sustained. Counsel explained this was his personal opinion, that the Department of Justice had not taken a position in the matter, and for this reason he was not at liberty to state its opinion. Two weeks later Mr. Rogge again appeared before the court upon further hearings of the motions to dismiss. The court asked whether he then was in a position to tell whether the prosecution wished to proceed with the case. The court was requested to give the Government a reasonable amount of time to answer this question; however, on this occasion the chief prosecutor again stated that after considering Supreme Court decisions in comparable cases it was his personal view that it was doubtful whether a conviction would be sustained. The Court then took the question of dismissing the cases under advisement.

On March 1, 1946, while the matter was pending under advisement, counsel for the prosecution applied to the Court to postpone its ruling for a period of 30 days, alleging it was believed certain testimony might be available from witnesses in Germany which would directly establish guilt of certain of the defendants. When this application was presented it was stated the Attorney General wished to send Mr. Rogge to Germany to make an investigation. Counsel for defendants objected. While unusual in the midst of a long pending criminal case to permit an investigation to endeavor to build up a doubtful case, I decided, because the charges were serious and access to possible evidence previously had been foreclosed by the war with Germany, I should permit time for the investigation. Accordingly, the prosecution was granted until April 30, 1946, a longer time than had been asked. A written memorandum filed by the court granting this time stated that "On or before April 30, 1946, counsel for the prosecution will be expected to advise the court in writing (copy to be sent to each defendant) whether prosecution of the cases is desired, also whether in his judgment, a conviction of defendants, if one is obtained, may be sustained under controlling decisions of the Supreme Court of the United States."

On April 30, 1946, a memorandum was filed by one of counsel for the prosecution, stating that prosecution was desired, "provided the prosecutor's investigation being presently conducted in Germany elicits additional evidence of guilt of defendants." This memorandum stated that the investigation had not been completed and that 45 days additional time would be required.

While I did not specifically grant the additional time to complete the investigation, it eventuated that Government counsel were able to secure this time, because it was not until May 18, 1946, that the motions to dismiss the indictments were overruled.

The case was called on September 20, 1946, for the purpose of setting a date for trial. On this occasion, Chief Prosecutor Rogge, being asked the third time in 8 months the attitude of the prosecution, stated that there still remained in his mind the question whether there was sufficient evidence to meet the test of the Supreme Court cases. He said he had serious doubts on this point, as he previously had advised the Court, but that the Department of Justice wished to suggest a trial date in December. Mr. Rogge informed the Court that an analysis he had made of evidence found in Germany had been turned over to the Department of Justice the previous week. Inasmuch as Mr. Rogge on three occasions, one after a lengthy investigation in Germany, had stated to the Court his serious doubts of a successful prosecution, a renewal of the motions to dismiss was permitted. The motions to dismiss now under consideration then were filed.

On yesterday, at the time of the hearing upon these motions, Mr. Rogge was not present representing the prosecution. Thereon Lamar Caudle, Assistant Attorney General, for the first time entered his appearance in behalf of the prosecution. Mr. Caudle stated the Department wished to prosecute all of the cases and to have a date set for trial; that the Department did not share the

doubts of Mr. Rogge. The Court requested Mr. Caudle to state his reasons why those now in charge had a different view from Mr. Rogge. In answer, Mr. Caudle made no statement of reasons. However, he offered to submit to the Court a trial brief which had been prepared and a written report of Mr. Rogge made to the Attorney General. Asked whether these documents would also be made available to the defendants, the prosecutor stated they would not. Counsel for defendants objected to the Court's examining the documents without copies being furnished them. The Court then informed counsel that by reason of the recent condemnation by the Conference of Senior Circuit Judges of the United States, at a meeting presided over by the Chief Justice of the United States, of the practice prevailing in some districts of trial judges' receiving from the prosecutor a brief or other documents not furnished opposing counsel, he was not in a position, over objection, to consider the trial brief and the report of Mr. Rogge.

The defendants have undergone before a court and jury part of a trial which ended on November 29, 1944, by reason of the sudden death of the presiding justice. The prosecution was still in progress at the conclusion of this trial, which had been under way for 8 months. Eighteen thousand pages of testimony were taken and eleven hundred documents were introduced in evidence. The prosecution was formally brought to a close on December 7, 1944. Beginning on December 9, 1944, and from time to time thereafter, various defendants have sought a speedy trial of their cases. For nearly 2 years such a trial has not been made possible for them. Their constitutional right to a speedy trial has been denied.

I can reach no other conclusion than that there is a serious doubt as to the validity of these cases. More than 8 months is an abnormally long time to be required by the prosecution to establish guilt in a clear case. One would expect convincing testimony of guilt to be fully adduced long before the expiration of such a length of time. When a retrial was in prospect the chief prosecutor, who more than any other person is familiar with the cases, expressed his doubts as to sustaining a conviction, and because of these doubts made the unusual request for permission to hold the question of their retrial in abeyance until he could make further investigation into the facts. Not only two times before this request was made, but on one occasion lately, after a lengthy investigation had been completed in Germany, this court asked the prosecution whether it desired to retry the cases; until yesterday there was no answer that it did. If these defendants are guilty, it would seem that any serious doubt as to their guilt would be resolved in more than 5 years of intensive investigation by able counsel and investigators of the Department of Justice. If they were clearly guilty the prosecution should have unwaveringly assured the court to this effect at least upon completion of the investigation in Germany.

Usually the court will permit the prosecutor to decide whether he will bring a case to trial. But where it appears, as here, there is serious doubt as to the success of the case, and that the defendants, because of long delays granted over their objections, cannot obtain a fair trial, the court should exercise its discretion to deny prosecution. It would be both unjust and un-American to do otherwise.

The defendants have been before the court upon these charges for nearly 4½ years. All of them were brought here from other parts of the country to stand trial. Because of the impoverished state of 18 of the defendants, they were represented by counsel not of their own choice but assigned by the court to serve without compensation. As in all long-delayed cases, the witnesses are now scattered; some are not accessible, more particularly to the defendants who are without funds; the memories of witnesses as to events occurring many years ago are not clear. It is for these reasons among others that the Constitution of the United States requires a speedy trial and that the Congress of the United States has imposed statute of limitations to prevent long-delayed prosecutions. I do not see how these defendants now can possibly obtain fair trials.

Under the circumstances, to permit another trial, which conceivably would last more than a year, with new prosecutors and newly appointed counsel for defendants, with the eventual outcome in serious doubt, as Mr. Rogge has stated to the court on three occasions, would be a travesty on justice. I have no doubt the cases should be dismissed and an order to that effect will be entered as to all defendants.

The question of terminating these cases is one of importance. If the dismissal I shall order is sustained, new prosecutions may not be started, because they will be barred by the statute of limitations. The court feels that the prosecution should have opportunity, if so advised to take action by way of application to appellate courts to review my order dismissing the cases. While this seems to me to be possible after final judgments of dismissal, nevertheless in order to safeguard the interests of the prosecutor against any doubt, the final order of dismissal will not be entered by this court until December 2, 1946.

The court should and does acknowledge with gratitude the services of counsel who served in behalf of the defendants without compensation. Their sacrifices were extensive; their financial losses were great. Specifically the court thanks for their services in these cases W. Hobart Little, Frank H. Myers, Elizabeth R. Young, J. Austin Latimer, M. Edward Buckley, Orille C. Gaudette, P. Bateman Ennis, John S. Hillyard, Ethelbert B. Frey, Harry A. Grant, James A. Davis, Ben Lindas, Frank J. Kelly, Arthur Carroll, Charles E. Morganston, Claude Thompson, William Gallagher, Joseph H. Bilbrey, Rees B. Gillespie, L. J. H. Herwig, John B. Gunion, and George B. Fraser.

BOLITHA J. LAWS,
Chief Justice.

NOVEMBER 22, 1946.

That decision was later affirmed by the appellate court.

Why do I call this to your attention now, as long as it is water over the dam or under the bridge?

Just because, if you oppose the Marshall plan, if you fight any of the international schemes advocated by the Post, you may expect a similar smear campaign, although it is extremely doubtful whether the Post, having once burned its fingers, will again go so far as to attempt to procure the indictment of the critics of its internationalism; of its efforts, which, all too often, regrettably fan the flames of racial prejudice.

In the message yesterday, something was said about discrimination. We all abhor discrimination, that is, unfairness, inequality, under the law. But let me give you an example of effective discrimination.

One of the Members of the House talked to me about a soldier; a married man. He was in the Army. He had a wife, and a baby was coming along, so he took some Government sheets over home, and somebody found out about it and they called him on the carpet for it. But, before they got him up there for court-martial he had taken the sheets back, but they gave him a year, the "brass" did, and he is serving it.

Well, there were those four fellows who belonged to that Capone gang, that crime syndicate, and they were convicted of a conspiracy to extort—not a sheet, nor a pillowslip, nor a wash rag, oh, no—$1,000,000 out of reputable business concerns. The judge said, "Ten years for you boys." They served a little while, the minimum term, and then less than 30 days after they became eligible for parole they got out on parole, and one of them testified before one of our committees that for 30 years he had not had any business except an illegal gambling business, and the others along similar lines. And that is a long period. Not only that, but while they were in prison there was good, reliable evidence that their businesses, their illegal businesses, were carried on.

One of your committees, a subcommittee of the Executive Expenditures Committee, when those paroles were granted, had its attention called to the matter by letters from people throughout the country, especially by letters from people who were in jail and wanted to get out. They thought in some way the hinges and locks would come off the doors, and if these big boys had gone out they ought to get out. They were just dumb folks, those fellows who were in there. They did not realize that if you are going to steal money you want to make it worth while, you want to get up in the aristocracy of the thieves and the racketeers and the crooks, where you will get some attention when an application for parole comes along. You want to have some friends in high places.

So complaint was made to our committee, and this subcommittee got into this thing, and naturally, then, the committee wanted to know, these paroles having been granted, what was the theory on which these people should be restored to society, and by what means did they get out.

My thought was that if the President did not want any discrimination, he ought to leave those experts in vice and gambling in prison and let the little fellows get along a little bit, if he did not want to discriminate in favor of the big boys.

We in this committee wanted to know what these people had been doing while in prison and what the man who had carried on their business while they were in prison, their legal business, was making. We wanted to know what those fellows had been doing and how much they had been making.

So we asked the Secretary of the Treasury to tell us about it. You know what he did? "Oh, no," he said, "you cannot have the information. We won't tell you. We deem it would not be proper to tell your committee whether Mr. Campagna and Mr. de Lucia, and the other two, or their lawyer, Mr. Bernstein"—who said under oath that people came into his office, people who were unknown to him; he did not know whether they were men, women, or children; black, white, or yellow; but they came in and

just slapped down $5,000 and $10,000 until he had more than $100,000 there—all the people said was, "Now, use that for Louie, Louie Campagna; use it for Louie." And he used it, and they paid $15,000 of it on a tax penalty.

The tax they paid, in all I think was about $120,000, toward a half-million-dollar-tax penalty, seemed rather small. That proved that either the Government claims were exorbitant or that there is something rotten about the settlement, because these men had property all this time out of which the tax could be obtained.

So we said, "Let us see those tax returns, let us see Mr. Bernstein's return, let us see if those fellows who were convicted of this thing had money of this kind." We wanted to know whether those paroles should not be revoked, because all the time these men were in jail we had found they were still engaged in criminal activities, and they were still engaged in the same line of business for which they were sent to jail. We thought they ought to stay there, at least, until they had reformed.

We went to the Internal Revenue Bureau and asked them for information, but they would not turn over that information to a committee of Congress, or anybody else, for that matter. They would not turn over the information because that would send a fellow to jail for a violation of the law. The Internal Revenue Bureau says, "We are satisfied if you pay the tax." Now they say to us, "Here are these four gangsters." They say to us, "Why, sure, they are out. That is all right. They paid a sum to us in settlement."

When we asked the Attorney General, your friend, Tom Clark—when we asked him about it, what did Tom say? "No, no; you cannot have the information from the Justice Department; you cannot have it; no, sir."

We want to know on which side, or which team, he is playing. Is he running interference for the four Chicago gangsters, or is he with the Department of Justice to prosecute and keep in jail people who are violating the law? Who is he working for? Who is he siding with? You get the point?

That is why I introduced a resolution yesterday asking this Congress for the passage of a resolution so that the Secretary of the Treasury and the Department of Justice can turn over to us that information.

I asked the Department of Justice, and J. Edgar Hoover told us, "No, we cannot do it. It is turned over to the Department of Justice." We asked Mr. Clark, and he said, "No, I cannot do it. I cannot give it to you. I will not give it to you." Do you see where it gets?

That is not all. Not so long ago someone came up to the committee and said, "Well, down here they have a file in the Civil Service Commission, the 'investigators' leads' files of some 750,000 cards." I had some of the cards given to me. So we asked the Civil Service Commission—Mr. Mitchell, Miss Perkins, and Mr. Flemming—to come up, and they were very nice about it. They came up before the committee. The three of them were sitting together, and I said, "Will one of you speak for all?" They said, "Yes." They were asked, "Well, where did you get the authority to compile this file?" They said, "We never knew it was there. We did not have any right to make it."

What was in that file? There were cards there which described Congressmen as Communists and Nazis, which referred to Senators as being disloyal, which referred to the conduct of Senators' wives, which referred to the activities and opinions of citizens of prominence who were not applicants for Federal jobs and who did not hold Federal jobs, and every one of these Commissioners admitted, and admitted freely, that they did not know those cards were there and did not know such a thing existed, although we did drag out of one of them a little later on that he O. K.'d $10,000 to make it.

So they said, "We will destroy those cards." Now, the Civil Service Commission has authority, of course, to investigate applicants for Federal jobs and Federal employees, and that is proper and right. But they have no business to investigate you or me unless we are applying for jobs or holding jobs which fall within their jurisdiction.

But the papers took it up right away and said, "Oh, well, you are trying to protect Congressmen and Senators." That was not so at all. We are trying to protect everyone and trying to safeguard the use of Federal funds and trying to prevent the misuse of Federal power.

Then we asked, "You say you will destroy this file?" And they said, "Yes." They were then asked, "Will you let some representative of the Congress go down and see that these cards are destroyed?" They said, "No." They said, "You can take our word for it. Why will you not take our word?" My answer to that is, "You say you are not dressed and that you do not know if you have any clothes on. You say you do not know that you have them and you say that you are going to take them off." My answer is, "How are you going to take them off, how will you know whether they are off if you do not know you have them?" Do you not see? Why should we trust the Civil Service Commission to destroy something that they did not know they had?

Do you know where they got this information which is on these cards—from the Anti-Defamation League and from some law firm of Mintzer & Levy, in New York. And they have these cards not only here in Washington but have them in the regional offices throughout the country, in New York and other places.

Mr. ROBSION. Mr. Speaker, will the gentleman yield?

Mr. HOFFMAN. I yield.

Mr. ROBSION. If I understand the gentleman, these cards were made by the Civil Service Commission and $10,000 were expended for that purpose.

Mr. HOFFMAN. Yes, sir.

Mr. ROBSION. Were they not then the records of the Civil Service Commission?

Mr. HOFFMAN. Yes, sir.

Mr. ROBSION. Is there any law that would permit them to destroy those records belonging to that department or to any department?

Mr. HOFFMAN. Except it is something that they had no right to have there, that is all; just the same as if a stray skunk came in there and they would chase it out.

But think of it, now, think of putting in the records of the Government a bunch of cards which reflect on the character—you do not know, any one of you here do not know whether your names are there or not—of individuals who are neither Federal employees nor applicants for Federal jobs. I know that some of your names are there. Is there any reason why they should not be taken out? What is on the cards? Statements that reflect upon your loyalty and your patriotism. Where do those cards come from? Where did that information come from? I said a moment ago from the Friends of Democracy and similar organizations, and from a law firm in the city of New York, a private law firm which is counsel for the organization the Anti-Defamation League. They collected all that stuff and as they were asked by the gentleman from Virginia [Mr. HARDY] when they were here, "Has that information ever been checked? Has it ever been verified?" The answer was, "No, no."

Then, when I asked them if we could go down there and look at it—and the President backed them up, and we have his letter—he said, "No. You cannot look at it, because I am relying upon the Civil Service Commission." You cannot have that file. You cannot see that your names are out of there.

So there is a resolution in to make that available. That will be brought up. I hope when it comes that you gentlemen will give it serious consideration. I hope that no one is going to be frightened into supporting the Marshall plan or any other administration measures that come here by the knowledge that, before the session is over, unless he goes along with the Washington Post, the Washington Star, and the News, his loyalty, his patriotism, his common sense, and his good judgment will all be questioned.

Now, do not be frightened, because, after all, neither the Washington Post, nor the Star, nor the News, nor the New Republic, nor the Daily Worker, nor the New Masses, nor any other communistic rag has very much influence back in your district.

Mr. PHILLIPS of California. Mr. Speaker, will the gentleman yield?

Mr. HOFFMAN. I yield.

Mr. PHILLIPS of California. I think you should go more into detail in connection with these trials about which you spoke. There was a man who sometimes lived in my district and sometimes in the district of my colleague, the gentleman from California [Mr. SHEPPARD], who surrendered himself as soon as he discovered by reading in the papers that they wanted him. He was brought here manacled, helpless; an extremely uninfluential gentleman. When he came here, I think you should say that these men were all refused their own witnesses. If they brought witnesses, they would have had to bring them at their own expense all the way from Cal-

ifornia, and they were refused aid until it was granted through other sources.

Mr. HOFFMAN. Not only that, while the Government spent the taxpayers' money to persecute, they had—many of them—no money to defend themselves. But here is another angle to the situation which should be remedied by an act of Congress: Almost all of these people were without funds. They were brought here from California, from other States—thousands of miles from home, as the gentleman says. They did not have the money to hire attorneys. They had to go to work to support themselves to pay their room rent and food bills. The court down here appointed—I have forgotten how many—Washington lawyers to defend them. I would say there must have been 15 or 20, or perhaps more. Some of those lawyers spent more than 2 years in defending those people under the order of the court. They had to defend them or go to jail for contempt of court. Do you know what the lawyers got out of it? Nothing. They did not get a nickel out of it. There is no law that pays those lawyers anything. Now, that is a fine how-do-you-do. I imagine the President did not know about that, or he would have advocated taking care of those lawyers, and I would have gone along with him on that, because when a person is appointed by the court to defend a man charged with crime, he certainly ought to get his board and room out of it, if nothing else, other than experience. That is the situation those gentlemen are in.

Mr. McDOWELL. Mr. Speaker, will the gentleman yield?

Mr. HOFFMAN. I yield.

Mr. McDOWELL. The gentleman referred to the Washington Star and the Post and News, and various other newspapers, and then concluded by saying, "Any other communistic rag." The gentleman does not mean to include those papers in that statement.

Mr. HOFFMAN. Not the Washington papers. Oh, in between there, if you had listened—I know you are a great supporter of the Star. You even wrote a letter of approval when I found fault because they characterized Members of Congress as being disloyal. I think if you will read my remarks you will find in there—no, I am not charging the Washington papers with being communistic. I think they would get along all right if they did not have your support, but I did not charge them with being communistic. In between there I mentioned several others, the Daily Worker, the New Masses, but if they—the Star and the Post—want to insult and abuse Congressmen and you want to approve of it, that is your business and not mine. If you want to submit to their charges of being disloyal and not knowing anything, that is your business, but I will resent it. I will leave it to my people whether I know anything or not, but I know very well that I am just as patriotic as the Washington Star or the Post or the News. The trouble with these papers is, I know that you cannot win any fight that you get into with them. The only time I ever got a break was when the Star got after me and then after a while they printed the whole testimony bearing on the incident. They wasted a lot of valuable space, but it was all right with me. It set the situation on the record and for that I thank them.

Mr. CHURCH. Mr. Speaker, will the gentleman yield?

Mr. HOFFMAN. I yield.

Mr. CHURCH. The gentleman has discussed discrimination. I wonder if the gentleman would discuss the discrimination in connection with the disbarred lawyers.

Mr. HOFFMAN. It is my experience that if a Member talks more than 10 minutes—except Members who are really up and coming—he is out of luck. So I will let the gentleman from Illinois do that.

My purpose, and the only purpose, in speaking here today is to recall to your minds the fact that, if you oppose the Marshall plan or any part of the Marshall plan; if you oppose any part of the program suggested by the internationalists, by the one-worlders, by those who believe it to be our duty to take on the burden of supporting and clothing and educating and directing the political thought of all the rest of the world's people; if you oppose any domestic scheme to waste the taxpayers' money—in short, if you do not go along, become a part of a rubber-stamp Congress, a me-too, bipartisan Republican, toe the mark, bend the knee, bow the head, get on your sackcloth and wallow in the ashes, you will be smeared and charged with being not only dumb, idiotic, unintelligent, but perhaps even seditious and disloyal.

Serve your people in the way they want to be served; run counter to what the Communists, the New Dealers, or the one-worlders want, and you are out of step.

But do not let it worry you overmuch. Your duty is to your people and, as long as we are honest and sincere, just fairly intelligent and represent their thought and convictions, although we may not enjoy it, we may consider the abuse and the vilification as needed remedies to prevent us becoming too egotistical, too conceited, too stubborn.

More than 50 years ago, I learned that, if one listened to his friends and neighbors, considered their advice, used his own judgment, and endeavored conscientiously to do the right thing, he would please and earn the respect of more people than he would if he gave heed to and followed the advice of everyone who talked to him.

Now that we know what is coming, thicken up your hides and, instead of waiting for the attack, carry the battle to our opponents.

EXTENSION OF REMARKS

Mr. SHEPPARD asked and was given permission to extend his remarks in the Appendix of the RECORD.

Mr. BONNER asked and was given permission to extend his remarks in the Appendix of the RECORD and include therein a speech delivered by the gentleman from North Carolina [Mr. DURHAM] at Guilford College, N. C., recently.

Mr. DORN asked and was given permission to extend his remarks in the RECORD and include an article from Look magazine of December 9, entitled "We Are Preparing for the Wrong War," by Maj. Alexander P. de Seversky.

PERMISSION TO ADDRESS THE HOUSE

Mr. RAYBURN. Mr. Speaker, I ask unanimous consent to proceed for a few minutes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. RAYBURN. Mr. Speaker, I was very much interested in the entertaining talk of the gentleman from Michigan—and with a great deal of his conversation today I agree, but I do fear, Mr. Speaker, that if we haul up the FBI here before the committees of Congress and make them divulge all that they know and their sources of information, most of which is given them in confidence, that we may cripple the FBI to the point where they will not be able to get the necessary information they need in trying to enforce the laws of the country.

Mr. HOFFMAN. Mr. Speaker, will the gentleman yield?

Mr. RAYBURN. I yield.

Mr. HOFFMAN. In my letter to the FBI and to all these other agencies I expressly waived any request for information as to the source of their information. I agree with the gentleman from Texas.

Mr. RAYBURN. The gentleman did not make that clear in his remarks.

Mr. HOFFMAN. I thank the gentleman very much.

EVERETT DIRKSEN

Mr. CANFIELD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. CANFIELD. Mr. Speaker, in the 24 years that I have labored here on Capitol Hill, 17 as a congressional secretary and 7 as a Member of this body, I have never seen a more dynamic character, a more prodigious worker, a more effective advocate in the well of the House, than the gentleman from Illinois, EVERETT DIRKSEN.

I am among the many Members of this House and the thousands and thousands of our people who regret exceedingly that physical misfortune has caused him to decide to retire as a Member. There is, however, a silver living to the clouds that disturb this distinguished statesman whom Bruce Barton once called a potential Abraham Lincoln. His doctors have a prescription, and the prescription is this: he needs adequate rest, he needs a prolonged rest period—not too long, I understand, and he can become well.

I therefore join the Speaker and others in hoping that the draft DIRKSEN movement in the Sixteenth District of Illinois will prevail and that his constituency will send him back to the House of Representatives which he has served so well.

LAW LIBRARY FEDERAL WORKS AGENCY

We can ill afford to lose EVERETT DIRKSEN.

Mr. RAYBURN. Mr. Speaker, will the gentleman yield?

Mr. CANFIELD. I yield.

Mr. RAYBURN. I just want to say in endorsing everything the gentleman from New Jersey has said about the distinguished gentleman from Illinois, that of course, as far as I am concerned I never did want too many Republicans around here, but if they are going to send Republicans to Congress then let them send Republicans of the EVERETT DIRKSEN kind.

Mr. CANFIELD. Very good. That sentiment is typical of the gentleman from Texas.

Mr. Speaker, in connection with my remarks, I ask unanimous consent to include therein two editorials appearing in Washington newspapers in credit to our distinguished colleague, and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

(The editorials referred to follow:)

[From the Evening Star, Washington, D. C., January 5, 1948]

MR. DIRKSEN WILL BE MISSED

There is a marked tone of genuine regret in the comments following Representative DIRKSEN'S statement that he will not be a candidate for reelection in the April primary.

That is easy to understand. An able, hard-working Member of Congress since he first came to Washington, Mr. DIRKSEN has steadily risen in the esteem and respect of his colleagues and has become an outstanding Member of the House. His loss would be shared on both sides of the aisle. For while he has made himself a great asset to the majority, he was never a narrow partisan and always constructive in committee and in debate.

Some of his friends have known of the affliction to his eyesight which had caused him trouble last year and have hoped that treatment and rest would find a cure. If his decision to retire means that he will devote himself to that end now, retirement might be temporary—something to be desired in his own and the public's interest.

Here in Washington it is only natural that we should be selfishly concerned about Mr. DIRKSEN. His chairmanship of the District Committee, preceded by so many years as one of its most useful members, has been a boon to this community. The Star joins his other friends in regretting his decision to retire but in hoping that it will give him the opportunity—which he has been unwilling to take for himself—to get well again.

[From the Washington (D. C.) Post of January 5, 1948]

DIRKSEN'S MISFORTUNE

The misfortune which has impelled Representative EVERETT M. DIRKSEN to announce that he will not be a candidate for renomination in 1948 will arouse profound regret among a vast number of Americans. By dint of hard work, native intelligence, and a commendable flexibility of mind, Mr. DIRKSEN has become one of the most powerful and highly esteemed leaders in the House of Representatives. In large measure he has achieved the happy feat of looking forward without losing touch with current realities. And his dynamic personality, his skill in debate and his habit of informing himself on every major public issue have given his influence a contagious quality.

The District of Columbia and the Sixteenth Congressional District of Illinois will be especially loath to lose the services of Mr. DIRKSEN. Since he first came to Congress in 1933 he has taken a keen interest in District affairs. His fights for fair and progressive legislation applicable to the Capital City have frequently been unsuccessful. But he has stood out as a tower of strength against the angry and uninformed waves of sentiment that sometimes sweep the House when District legislation is under debate. It is with his aid and sympathy, moreover, that the Auchincloss plan for home rule in the District has been worked out by a subcommittee of the House District Committee over which Mr. DIRKSEN presides.

In recent months Mr. DIRKSEN has given a large measure of his energy to support of the Marshall plan. Touring Europe last fall to get a first-hand view of the recovery problem of that shattered continent, he went into the homes of the people, into the factories, and business establishments. In Germany he talked with the people in their native language. He sought facts instead of broadcasting advice and came home a determined advocate of ample aid to insure the survival of freedom in the lands that we helped to rescue from Hitlerism. His idea of Government insurance to protect private American capital invested in new European enterprises against sudden nationalization of industries and to insure the conversion of profits from foreign currencies into dollars has found a definite place in the ERP recommendations sent to Congress by the President. We are glad that Mr. DIRKSEN will continue to be in the House for the momentous debate on the Marshall plan and sincerely hope that the impairment of his sight at the early age of 52 will not make it necessary for him to terminate his public career.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted to Mr. HORAN, indefinitely, on account of illness.

ADJOURNMENT

Mr. HALLECK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 10 minutes p. m.) the House, pursuant to its previous order, adjourned until Monday, January 12, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1194. A communication from the President of the United States, transmitting a draft of a proposed bill to authorize the President to appoint Maj. Gen. Laurence S. Kuter as a member of the Civil Aeronautics Board, without affecting his military status and perquisites; to the Committee on Armed Services.

1195. A letter from the Secretary, Department of Agriculture, transmitting a report of the Federal Crop Insurance Corporation relative to its operations for 1947; to the Committee on Agriculture.

1196. A letter from the Acting Secretary of Commerce, transmitting various documents pursuant to House Resolution 366; to the Committee on Interstate and Foreign Commerce.

1197. A letter from the Under Secretary, Department of the Interior, transmitting, pursuant to section 16 of the Organic Act of the Virgin Islands of the United States, approved June 22, 1936, one copy each of various legislation passed by the Municipal Council of St. Thomas and St. John; to the Committee on Public Lands.

1198. A letter from the president, Gorgas Memorial Institute of Tropical and Preventive Medicine, Inc., transmitting the Twentieth Annual Report of the Gorgas Memorial Laboratory, covering the fiscal year ended June 30, 1947 (H. Doc. No. 495); to the Committee on Foreign Affairs and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MANSFIELD:

H. R. 4882. A bill to provide assistance against the high cost of living to low-income families under the individual income tax; to the Committee on Ways and Means.

By Mr. HENDRICKS:

H. R. 4883. A bill authorizing a review of the report on the interoceanic canal across Nicaragua contained in House Document No. 139, Seventy-second Congress, first session; to the Committee on Merchant Marine and Fisheries.

By Mr. HINSHAW:

H. R. 4884. A bill defining and regulating the practice of the profession of engineering and creating a Board of Registration for Professional Engineers in the District of Columbia; to the Committee on the District of Columbia.

By Mr. HENDRICKS:

H. R. 4885. A bill relating to the construction, maintenance, and operation of an interoceanic canal over Nicaraguan territory; to the Committee on Merchant Marine and Fisheries.

By Mr. MANASCO:

H. R. 4886. A bill to amend the Surplus Property Act of 1944, as amended, so as to provide priorities for veterans in the purchase of surplus residential real property; to the Committee on Expenditures in the Executive Departments.

By Mrs. NORTON:

H. R. 4887. A bill to raise the minimum-wage standards of the Fair Labor Standards Act of 1938; to the Committee on Education and Labor.

By Mr. SCHWABE of Oklahoma:

H. R. 4888. A bill to name the reservoir to be created by the construction of the Fort Gibson Dam on the Grand River, in the State of Oklahoma, Lake Chouteau; to the Committee on Public Works.

By Mr. SMATHERS:

H. R. 4889. A bill to extend disability and death benefits to personnel of the Reserve components of the armed services while on active duty or in training; to the Committee on Armed Services.

By Mr. WELCH:

H. R. 4890. A bill to provide for the utilization of certain surplus military real property as national cemeteries; to the Committee on Public Lands.

By Mr. KNUTSON:

H. R. 4891. A bill to amend the act of February 10, 1920, in order to provide for the free distribution to veterans' organizations of blank ammunition for use in connection with the funeral ceremonies of deceased veterans; to the Committee on Armed Services.

By Mr. WEICHEL:

H. R. 4892. A bill to amend the act of July 23, 1947 (61 Stat. 409) (Public Law No. 219 of the 80th Cong.); to the Committee on Merchant Marine and Fisheries.

By Mr. WILSON of Indiana:

H. R. 4893. A bill to provide for emergency flood-control work made necessary by recent floods, and for other purposes; to the Committee on Public Works.

By Mr. NORBLAD:

H. R. 4894. A bill to release and to discharge the Republic of Finland from further financial liability to the United States of America; to the Committee on Foreign Affairs.

By Mr. HAYS:

H. J. Res. 290. Joint resolution to amend section 4, paragraph (b), of Public Law 395, Eightieth Congress (ch. 526, 1st sess.); to the Committee on Banking and Currency.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LESINSKI:

H. R. 4895. A bill for the relief of Adam Artur Wandzel; to the Committee on the Judiciary.

By Mr. McDONOUGH:

H. R. 4896. A bill for the relief of Louis Serlin; to the Committee on the Judiciary.

By Mr. POTTS:

H. R. 4897. A bill for the relief of Francis Doman; to the Committee on the Judiciary.

By Mr. SADLAK:

H. R. 4898. A bill for the relief of Casimir (Kazimierz) Stanislaw Skowyra; to the Committee on the Judiciary.

H. R. 4899. A bill for the relief of Stanislaw Czerwinski; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1083. By Mr. THOMAS of New Jersey: Petition signed by 11 members of the American Legion Auxiliary, Unit No. 20, Bloomfield, N. J., and petition signed by 9 members of Peter S. Hotalen Unit, No. 157, American Legion Auxiliary, Branchville, N. J., urging the adoption of universal military training; to the Committee on Armed Services.

1084. By Mr. TIBBOTT: Petitions of citizens of Cambria County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1085. Also, petition of citizens of Armstrong County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1086. By the SPEAKER: Petition of Mrs. Alta L. McAllister, San Antonio, Tex., petitioning consideration of her resolution with reference to requested removal from office in the District Court of the United States for the Western District of Texas of Judge Ben H. Rice, Jr., and District Clerk of Court Maxey Hart; to the Committee on the Judiciary.

SENATE

FRIDAY, JANUARY 9, 1948

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Lord, Thou wilt still be here after this prayer is said, and we would have it so, for we know deep down in our hearts that without Thy help we can do nothing abiding.

Without Thee we shall discuss more and more and settle less and less.

Unite, we pray Thee, the leaders of our Nation behind the right way to achieve a just and lasting peace in our land and in all the world, that we may win it together, lest we lose it apart. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
PRESIDENT PRO TEMPORE,
Washington, D. C., January 9, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. IRVING M. IVES, a Senator from the State of New York, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. IVES thereupon took the chair as Acting President pro tempore.

ATTENDANCE OF SENATORS

JAMES O. EASTLAND, a Senator from the State of Mississippi; ALBERT W. HAWKES, a Senator from the State of New Jersey; JOSEPH R. McCARTHY, a Senator from the State of Wisconsin; and JOSEPH C. O'MAHONEY, a Senator from the State of Wyoming, appeared in their seats today.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, January 7, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Swanson, one of its reading clerks, announced that the House insisted upon its amendment to the bill (S. 1317) to give to members of the Crow Tribe the power to manage and assume charge of their restricted lands, for their own use or for lease purposes, while such lands remain under trust patents, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. WELCH, Mr. CRAWFORD, and Mr. SOMERS were appointed managers on the part of the House at the conference.

CALL OF THE ROLL

Mr. WHERRY. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Gurney	Malone
Baldwin	Hatch	Maybank
Ball	Hawkes	Millikin
Barkley	Hayden	Moore
Brewster	Hickenlooper	Murray
Bridges	Hill	O'Conor
Brooks	Hoey	O'Daniel
Buck	Holland	O'Mahoney
Bushfield	Ives	Pepper
Byrd	Johnson, Colo.	Reed
Cain	Johnston, S. C.	Revercomb
Capper	Kem	Robertson, Va.
Chavez	Knowland	Robertson, Wyo.
Connally	Langer	Russell
Donnell	Lodge	Saltonstall
Dworshak	Lucas	Smith
Eastland	McCarran	Sparkman
Ecton	McCarthy	Stennis
Ferguson	McClellan	Stewart
George	McFarland	Taft
Green	McKellar	Thomas, Okla.
Thomas, Utah	Vandenberg	Williams
Thye	Watkins	Wilson
Tobey	Wherry	Young
Umstead	Wiley	

Mr. WHERRY. I announce that the Senator from Ohio [Mr. BRICKER], the Senator from Kentucky [Mr. COOPER], and the Senator from Indiana [Mr. JENNER] are necessarily absent.

The Senator from Nebraska [Mr. BUTLER] and the Senator from Vermont [Mr. FLANDERS] are necessarily absent on official committee business.

The Senator from Indiana [Mr. CAPEHART] is necessarily absent on account of illness.

The Senator from Oregon [Mr. CORDON] is necessarily absent on official business of the Committee on Public Lands.

The Senator from Pennsylvania [Mr. MARTIN] is absent by leave of the Senate.

The Senator from Oregon [Mr. MORSE] is necessarily absent on official business of the Senate.

Mr. LUCAS. I announce that the Senator from California [Mr. DOWNEY], the Senators from Louisiana [Mr. ELLENDER and Mr. OVERTON], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from West Virginia [Mr. KILGORE], the Senator from Washington [Mr. MAGNUSON], the Senator from Rhode Island [Mr. McGRATH], the Senator from Connecticut [Mr. McMAHON], the Senator from Pennsylvania [Mr. MYERS], and the Senator from Idaho [Mr. TAYLOR] are absent on public business.

The Senator from Maryland [Mr. TYDINGS] and the Senator from New York [Mr. WAGNER] are necessarily absent.

The ACTING PRESIDENT pro tempore. Seventy-four Senators having answered to their names, a quorum is present.

LEGISLATIVE PROGRAM

Mr. WHERRY. Mr. President, for the information of the Members of the Senate I think it would be well to announce at this time that, if it meets with the approval of the membership of the Senate, it is intended, until further notice, that the Senate shall meet on Mondays, Wednesdays, and Fridays. That will leave Tuesdays and Thursdays open for committee work. Many committees are now functioning, and there is a desire that as many of their members as possible may be present at the committee meetings. It is proposed that the program I have suggested be followed until further notice. It is my feeling that until some legislative proposal is brought upon the floor of the Senate for consideration, the program I have just announced should not be changed.

With respect to the program for next week, I announce that, if it shall meet with the approval of the Senate, it is intended that the Senate shall proceed with the morning hour and the consideration of routine business on Monday. I ask unanimous consent that when the morning business shall have been concluded the legislative calendar shall be called for the consideration of measures to which there is no objection. I make that unanimous-consent request for the

reason that unless it is granted the calendar will be called under rule VIII.

Mr. BARKLEY. When is that to be?

Mr. WHERRY. Monday.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. WHERRY. It is the intention to have a morning hour on next Wednesday, following the Monday session, and dispose of routine business, and at the conclusion of the routine business I shall move that Calendar No. 861, House bill 3342, the bill providing for legislation with respect to the Voice of America, be made the unfinished business. As I stated, it is my intention to make the motion at the close of routine business on next Wednesday, and it is proposed that the bill shall be taken up for consideration by the Senate on the following Friday, which will be a week from today.

Mr. President, let me restate that proposed program. At the conclusion of the consideration of routine morning business by the Senate on next Wednesday, it is my intention to move to make the unfinished business Calendar No. 861, House bill 3342, the measure dealing with the Voice of America, and it is proposed that it shall be brought up for consideration by the Senate the following Friday, which is 1 week from today.

I have made this statement respecting the legislative program because many Senators have asked what the program for next week is to be. The statement is made for the information of all Senators so that they may arrange their office work and make plans with respect to attendance on committee hearings on the basis of the program I have outlined.

MEETING OF FOREIGN RELATIONS COMMITTEE

Mr. VANDENBERG. Mr. President, at 2 o'clock today the Senate Foreign Relations Committee will continue to hear the testimony of Ambassador Douglas. I ask unanimous consent that if the Senate is still in session at 2 o'clock the Committee on Foreign Relations be permitted to sit.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DEATH OF ROBERT L. NORTON, WASHINGTON CORRESPONDENT OF THE BOSTON POST

Mr. LODGE. Mr. President, it saddens me greatly to announce to the Senate the death on January 7 of the distinguished Washington correspondent of the Boston Post, Robert L. Norton.

He and I had been friends for years, going back to my early days as a newspaper reporter when he helped me unstintingly and in many ways. I had recently seen him at the Gridiron Club, where I had several times been his guest. He was an able newspaperman, and his writings were of high quality. He was a most shrewd observer, and many men in public life confided in him and set great store by his judgment. He had many friends in this body and throughout the Government. My deep sympathy goes out to his family. I shall miss him and think of him often.

DEATH OF CHARLES MICHELSON

Mr. BARKLEY. Mr. President, I call the attention of the Senate to the death of a very outstanding American who for many years was connected with the Democratic National Committee, the Honorable Charles Michelson, who died on yesterday at the age of 79. Mr. Michelson was for many years publicity director of the National Democratic Committee and though always a partisan Democrat he was broadminded in his approach to problems and enjoyed the respect of the entire community and of all those who knew him or knew of him. I do not know of any man in the newspaper field or in the field of politics who was more active, who was more beloved, who was more greatly respected, and who enjoyed a greater reputation for fairness in his dealings even with partisan matters, than did Mr. Michelson. We all regret to know of his death. We respect the great record he made as a newspaper correspondent and as a publicity director, and we wish to express to his family and to his friends our profound regret at his death on yesterday.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

SUSPENSION OF DEPORTATION OF ALIENS—WITHDRAWAL OF NAMES

Two letters from the Attorney General, withdrawing the names of certain aliens whose deportation he suspended more than 6 months ago, heretofore transmitted by him to the Senate; to the Committee on the Judiciary.

REPORT OF FEDERAL CROP INSURANCE CORPORATION

A letter from the Secretary of Agriculture, transmitting, pursuant to law, the report of the Federal Crop Insurance Corporation relative to its operations for the year 1947 (with an accompanying report); to the Committee on Agriculture and Forestry.

REPORT OF OPERATION OF AGRICULTURAL CONSERVATION PROGRAM

A letter from the Secretary of Agriculture, transmitting, pursuant to law, his report of the operation of the agricultural conservation program for the program year 1946, together with a financial report for the fiscal year ended June 30, 1947 (with accompanying papers); to the Committee on Agriculture and Forestry.

TORT CLAIMS PAID BY DEPARTMENT OF AGRICULTURE

A letter from the Secretary of Agriculture, transmitting, pursuant to law, a report of all claims paid under the Federal Tort Claims Act by the Department of Agriculture for the period August 2, 1946, to the end of the fiscal year June 30, 1947 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF COOPERATIVE EXTENSION WORK IN AGRICULTURE AND HOME ECONOMICS

A letter from the Assistant Secretary of Agriculture, transmitting, pursuant to law, the annual report of cooperative extension work in agriculture and home economics, for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Agriculture and Forestry.

LAWS PASSED BY MUNICIPAL COUNCIL OF ST. THOMAS AND ST. JOHN, V. I.

A letter from the Under Secretary of the Interior, transmitting, pursuant to law, copies of laws passed by the Municipal Council of St. Thomas and St. John, V. I. (with accompanying papers); to the Committee on Public Lands.

REPORT OF SECRETARY OF LABOR

A letter from the Secretary of Labor, transmitting, pursuant to law, his annual report for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Labor and Public Welfare.

REPORT OF VETERANS' ADMINISTRATION

A letter from the Administrator of Veterans' Affairs, transmitting, pursuant to law, the annual report of that Administration for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Finance.

REPORT ON NAVAL PETROLEUM RESERVES

A letter from the Director of Naval Petroleum Reserves, reporting, pursuant to law, that there have been no agreements, purchases, or condemnation proceedings entered into within naval petroleum reserves during the calendar year 1947 under the provisions of the act of June 30, 1938, as amended by the act of June 17, 1944; to the Committee on Armed Services.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Archivist of the United States, transmitting, pursuant to law, a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition(with accompanying papers); to the Joint Select Committee on the Disposition of Papers in the Executive Departments.

The ACTING PRESIDENT pro tempore appointed Mr. LANGER and Mr. CHAVEZ members of the committee on the part of the Senate.

PETITION

The ACTING PRESIDENT pro tempore laid before the Senate a resolution adopted by Camp No. 28, St. Paul Island, Alaska (Pribilofs), Alaska Native Brotherhood, favoring the enactment of legislation correcting certain alleged wrongs, which was referred to the Committee on Public Lands.

THE MARSHALL EUROPEAN RECOVERY PROGRAM

Mr. O'CONOR. Mr. President, one of the outstanding organizations of our splendid citizenry in Maryland is the Italian-American Civic Club, which is composed of professional and business men of high standing.

At a recent meeting the membership unanimously adopted a resolution recommending favorable action by the Congress upon the Marshall plan.

I present for appropriate reference a letter from the Italian-American Civic Club of Maryland, signed by Samuel M. Campanaro, president, advising of the adoption of the resolution, and I ask unanimous consent that the letter may be printed in the body of the RECORD.

There being no objection, the letter was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

ITALIAN-AMERICAN CIVIC CLUB
OF MARYLAND, INC.,
Baltimore, Md., January 6, 1948.

Senator HERBERT R. O'CONOR,
Senate Office Building,
Washington, D. C.

DEAR SENATOR O'CONOR: At the regular meeting of our organization, held on Monday,

January 5, a resolution was unanimously adopted by the body recommending the passage by Congress of the Marshall plan.

I have been directed to convey to all the Members of the Maryland congressional delegation our feelings with respect to this most humanitarian plan in behalf of the suffering people of western Europe, so that in casting their votes in this matter our representatives would feel certain that they were voicing the sentiments of their constituents.

We feel that the adoption by Congress of the Marshall plan bill will be by far this country's most generous and effective contribution toward world peace. We sincerely hope that you in your wisdom will exert every effort possible to the end that this plan may be enacted into law by Congress.

Sincerely yours,

SAMUEL M. CAMPANARO,
President.

PERSONS EMPLOYED BY COMMITTEES WHO ARE NOT FULL-TIME SENATE OR COMMITTEE EMPLOYEES

The ACTING PRESIDENT pro tempore laid before the Senate a report for the month of December 1947, from the chairman of a certain committee, in response to Senate Resolution 319 (78th Cong.), relative to persons employed by committees who are not full-time employees of the Senate or any committee thereof, which was ordered to lie on the table and to be printed in the RECORD, as follows:

UNITED STATES SENATE,
COMMITTEE ON FINANCE,
January 5, 1948.

To the Senate:

In compliance with the terms of Senate Resolution 319 agreed to August 23, 1944, the Committee on Finance submits the following report of persons employed by the committee during the month of December 1947 who are not full-time employees of the Senate or of the committee, together with a statement of the department by whom the persons are employed and their annual rate of compensation:

Mrs. Leona V. McKinnon, Washington, D. C., Federal Security Agency, $5,905.20 per annum.

Mr. Milton Mayer, Washington, D. C., Public Housing Administration, $7,341 per annum.

EUGENE D. MILLIKIN,
Chairman.

REPORTS OF COMMITTEES ON PERSONNEL AND FUNDS

Pursuant to Senate Resolution 123, Eightieth Congress, first session, the following reports were received by the Secretary of the Senate:

UNITED STATES SENATE,
COMMITTEE ON FINANCE,
January 5, 1948.

To the SECRETARY OF THE SENATE:

Pursuant to Senate Resolution 123, Eightieth Congress, first session, the above-mentioned committee submits the following report showing the name, profession, and total salary of each staff member employed by it for the period from July 1, 1947, through December 31, 1947, together with funds appropriated to and expended by it.

Sherwood B. Stanley, clerk, gross amount, annual rate, $7,549.09.

Elizabeth B. Springer, assistant clerk, gross amount, annual rate, $5,116.32.

Fred W. Peel, research clerk, gross amount, annual rate, $5,281.84.

Janice M. Everly, stenographer, gross amount, annual rate, $3,626.56.

Bernice Crouze, stenographer, gross amount, annual rate, $3,626.56.

Jesse R. Nichols, document clerk, gross amount, annual rate, $3,129.98.

Funds appropriated, $10,000.

Funds expended:

During period January 1 through June 30, 1947, previously reported, $4,643.68.

During period July 1 through December 31, 1947: travel expenses, $183.77; telephone charges, $56.65; photostat service, $25.83; total, $266.25.

Unexpended balance of appropriated funds, $5,090.07.

EUGENE D. MILLIKIN,
Chairman.

UNITED STATES SENATE,
RULES AND ADMINISTRATION
SUBCOMMITTEE ON PRIVILEGES
AND ELECTIONS,
December 31, 1947.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eightieth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by its subcommittee for the period from July 1, 1947, to December 31, 1947, together with the funds available to and expended by its subcommittee:

Mary D. Almond, challenger, rate of gross annual salary, $3,226.56; total salary received, $171.25.

Irma Anderson, challenger, rate of gross annual salary, $1,859; total salary received, $866.98.

Fannie Angelos, challenger, rate of gross annual salary, $3,226.56; total salary received, $633.58.

Thomas P. Baldwin, challenger, rate of gross annual salary, $3,226.56; total salary received, $231.63.

John W. Benson, investigator, rate of gross annual salary, $3,792.09; total salary received, $1,537.87.

Arianna Blizzard, challenger, rate of gross annual salary, $3,626.56; total salary received, $593.23.

A. J. Bosica, investigator, rate of gross annual salary, $3,047.22; total salary received, $1,032.64.

Arthur R. Breor, Jr., chief investigator, rate of gross annual salary, $5,695.66; total salary received, $2,521.53.

Jack C. Brown, investigator, rate of gross annual salary, $5,447.37; total salary received, $1,890.19.

James F. Carr, investigator, rate of gross annual salary, $5,116.32; total salary received, $625.32.

James H. Cunningham, investigator, rate of gross annual salary, $3,792.09; total salary received, $1,367.47.

Lillian D. Dornbusch, typist, rate of gross annual salary, $1,859; total salary received, $144.58.

Virginia M. Dornbusch, typist, rate of gross annual salary, $1,859; total salary received, $165.23.

Bernard J. Dugan, checker, rate of gross annual salary, $3,792.09; total salary received, $474.

Betty J. B. Du Jack, secretary, rate of gross annual salary $3,461.04; total salary received, $1,311.46.

Helen Earp, challenger, rate of gross annual salary, $3,626.56; total salary received, $98.11.

Kelso Elliott, investigator, rate of gross annual salary, $5,695.66; total salary received, $1,787.77.

B. B. Gilchrist, investigator, rate of gross annual salary, $5,695.66; total salary received, $2,847.78.

Margaret C. Guthridge, typist, rate of gross annual salary, $1,859; total salary received, $58.

Mary L. Green, administrative assistant, rate of gross annual salary, $3,792.09; total salary received, $1,896.

Jack W. Hardy, counsel, rate of gross annual salary, $7,549.08; total salary received, $807.09.

Evelyn M. Hearsey, typist, rate of gross annual salary, $1,859; total salary received, $273.75.

George Curtis Hartman, investigator, rate of gross annual salary, $5,116.32; total salary received, $1,492.20.

Marie A. Heid, challenger, rate of gross annual salary, $3,626.56; total salary received, $191.40.

Camille Jeneau, administrative assistant, rate of gross annual salary, $3,792.09; total salary received, $1,896.

Grace E. Johnson, financial clerk, rate of gross annual salary, $6,357.78; total salary received, $3,006.46.

Sylvan Katz, challenger, rate of gross annual salary, $3,626.56; total salary received, $433.16.

Francis T. Kelly, chief investigator, rate of gross annual salary, $6,257.78; total salary received, $3,178.86.

Joseph F. Kelly, investigator, rate of gross annual salary, $5,116.32; total salary received, $1,591.74.

Henry P. Kiley, investigator, rate of gross annual salary, $5,695.66; total salary received, $2,847.78.

Fred H. Kohler, investigator, rate of gross annual salary, $5,116.32; total salary received, $2,089.16.

Joseph F. Langan, investigator, rate of gross annual salary, $5,281.84; total salary received, $2,102.95.

David Laupheimer, checker, rate of gross annual salary, $3,792.09; total salary received, $450.

Judd Leighton, investigator, rate of gross annual salary, $5,116.32; total salary received, $724.81.

Robert K. Lyle, investigator, rate of gross annual salary, $4,288.68; total salary received, $2,082.25.

Joseph V. McCann, investigator, rate of gross annual salary, $5,281.84; total salary received, $2,585.74.

Robert J. McElroy, challenger, rate of gross annual salary, $3,626.56; total salary received, $433.16.

John N. Maguire, challenger, rate of gross annual salary, $3,626.56; total salary received, $433.16.

Anna Mae Melvin, challenger, rate of gross annual salary, $3,626.56; total salary received, $324.50.

Leah G. Miller, typist, rate of gross annual salary, $2,222; total salary received, $440.63.

Theodore P. Mullan, guard, rate of gross annual salary, $2,881.69; total salary received, $1,200.70.

Paul A. Newland, guard, rate of gross annual salary, $2,881.69; total salary received, $146.06.

Richard J. Oppitz, challenger, rate of gross annual salary, $3,626.56; total salary received, $433.16.

Joseph G. Cronson, challenger, rate of gross annual salary, $3,626.56; total salary received, $433.16.

Alice J. Pentz, typist, rate of gross annual salary, $1,859; total salary received, $113.60.

David A. Pollock, checker, rate of gross annual salary, $3,792.09; total salary received, $474.

Jack M. Poorbaugh, investigator, rate of gross annual salary, $5,116.32; total salary received, $2,558.16.

Martha Pringle, secretary, rate of gross annual salary, $3,212.74; total salary received, $576.84.

David H. Putnam, investigator, rate of gross annual salary, $4,288.68; total salary received, $652.69.

Elda G. Quast, typist, rate of gross annual salary, $3,626.56; total salary received, $433.16.

William F. Reed, investigator, rate of gross annual salary, $5,116.32; total salary received, $2,089.16.

Emory P. Roberts, investigator, rate of gross annual salary, $5,116.32; total salary received, $653.75.

Charles R. Rouse, Jr., challenger, rate of gross annual salary, $3,626.56; total salary received, $130.95.

Dorothy A. Sailors, challenger, rate of gross annual salary, $3,626.56; total salary received, $261.90.

George D. Solter, challenger, rate of gross annual salary, $3,626.56; total salary received, $60.44.

William E. Stevenson, investigator, rate of gross annual salary, $5,116.32; total salary received, $1,279.08.

Alfred L. Wiepert, guard, rate of gross annual salary, $2,881.69; total salary received, $152.08.

William W. Williams, guard, rate of gross annual salary, $2,881.69; total salary received, $1,200.70.

Allan M. Winner, challenger, rate of gross annual salary, $3,626.56; total salary received, $433.16.

M. J. Yamin, challenger, rate of gross annual salary, $3,626.56; total salary received, $433.16.

Gerald J. Zeller, challenger, rate of gross annual salary, $3,626.56; total salary received, $433.16.

Funds on hand July 1, 1947, plus funds authorized by Senate Resolution 142, agreed to July 23, 1947, authorized or appropriated for committee expenditure, $161,998.81.

Amount expended, $89,929.57.

Balance unexpended, $72,069.24.

W. E. JENNER,
Chairman, Subcommittee,
Privileges and Elections.

UNITED STATES SENATE,
COMMITTEE ON AGRICULTURE
AND FORESTRY,
January 9, 1948.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eightieth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from June 30, 1947, to December 31, 1947, together with the funds available to and expended by it and its subcommittees:

H. C. M. Case, consultant, rate of gross annual salary, $10,000; total salary received, $2,499.99.

James M. Kendall, clerk, rate of gross annual salary, $7,075.06; total salary received, $3,537.53.

Joycette K. Jones, clerk, rate of gross annual salary, $6,026.72; total salary received, $3,013.36.

Funds authorized or appropriated for committee expenditure, $10,000.

Amount expended, $636.55.

Amount expended as of June 30, 1947, $1,780.35.

Balance unexpended, $7,583.10.

ARTHUR CAPPER,
Chairman.

UNITED STATES SENATE,
COMMITTEE ON AGRICULTURE AND
FORESTRY, SUBCOMMITTEE ON
LONG-RANGE FARM PROGRAM,
PURSUANT TO SENATE RESOLUTION 147,
January 9, 1948.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eightieth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from June 30, 1947, to December 31, 1947, together with the funds available to and expended by it and its subcommittees:

Funds authorized or appropriated for committee expenditure, $15,000.

Amount expended, $5,345.46.

Balance unexpended, $9,654.54.

ARTHUR CAPPER,
Chairman.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MCKELLAR:

S. 1952. A bill for the relief of W. Garland Lillard; to the Committee on the Judiciary.

By Mr. BALL:

S. 1953. A bill to amend the act of February 10, 1920, in order to provide for the free distribution to veterans' organizations of blank ammunition for use in connection with the funeral ceremonies of deceased veterans; to the Committee on Armed Services.

By Mr. REVERCOMB:

S. 1954. A bill to amend and supplement the Federal-Aid Road Act, approved July 11, 1916, as amended and supplemented, and for other purposes;

S. 1955. A bill to amend the act entitled "An act to provide for the construction of certain public buildings, and for other purposes," approved May 25, 1926, to provide for the acquisition of sites and the preparation of plans for Federal public buildings, and for other purposes; and

S. 1956. A bill for the purpose of erecting a Federal building in South Charleston, W. Va.; to the Committee on Public Works.

By Mr. CAPPER:

S. 1957. A bill to establish two additional offices of Assistant Secretaries of Agriculture, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. MOORE:

S. 1958. A bill to provide for the designation of the reservoir formed by the dam on the Grand River near Fort Gibson, Okla., as Lake Chouteau; to the Committee on Public Works.

By Mr. MCCARRAN:

S. 1959. A bill for the relief of Marthe Camille Bisby; to the Committee on the Judiciary.

(Mr. MCCARRAN also introduced Senate bill 1960, to further implement the full faith and credit clause of the Constitution, which was referred to the Committee on the Judiciary and appears under a separate heading.)

By Mr. GURNEY:

S. 1961. A bill to amend the act of December 3, 1945, so as to extend the exemption of Navy or Coast Guard vessels of special construction from the requirements as to the number, position, range, or arc of visibility of lights, and for other purposes; to the Committee on Armed Services.

S. 1962. A bill to extend further the period during which the admission into the United States of alien fiancées or fiancés of members of the armed forces of the United States may be facilitated; to the Committee on the Judiciary.

S. 1963. A bill to provide for the utilization of certain surplus military real property as national cemeteries; to the Committee on Public Lands.

By Mr. PEPPER:

S. 1964. A bill for the relief of Walter Werner Tech; to the Committee on the Judiciary.

(Mr. WILEY introduced Senate Joint Resolution 171, to establish a commission to revise and codify the general and permanent laws of the United States, which was referred to the Committee on the Judiciary, and appears under a separate heading.)

FULL-FAITH-AND-CREDIT CLAUSE OF THE CONSTITUTION

Mr. MCCARRAN. Mr. President, I introduce for appropriate reference a joint resolution to further implement the full-faith-and-credit clause of the Constitution, and I ask unanimous consent that the joint resolution, with footnotes, together with a memorandum, be printed in the RECORD.

The ACTING PRESIDENT pro tempore. The bill will be appropriately referred; and, without objection, the bill together with the memorandum and footnotes will be printed in the RECORD, as requested by the Senator from Nevada.

The bill (S. 1960) to further implement the full-faith-and-credit clause of the Constitution, introduced by Mr. MCCARRAN, was received, read twice by its title, and (with an accompanying paper), was referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That where a State has exercised through its courts jurisdiction to dissolve the marriage of spouses, the decree of divorce thus rendered must be given full faith and credit in every other State as a dissolution of such marriage, provided (1) the decree is final; (2) the decree is valid in the State where rendered; (3) the decree contains recitals setting forth that the jurisdictional prerequisites of the State to the granting of the divorce have been met; and (4) the State wherein the decree was rendered was the last State wherein the spouses were domiciled together as husband and wife, or the defendant in the proceeding for divorce was personally subject to the jurisdiction of the State wherein the decree was rendered or appeared generally in the proceedings therefor. In all such cases except cases involving intrinsic fraud the recitals of the decree of divorce shall constitute a conclusive determination of the jurisdictional facts necessary to the decree.

The memorandum and footnotes presented by Mr. MCCARRAN were ordered to be printed in the RECORD, as follows:

MEMORANDUM

POWER OF CONGRESS TO PRESCRIBE THE EXTRATERRITORIAL EFFECT OF A DIVORCE DECREE; PROPOSED STATUTE TO ACCOMPLISH THIS PURPOSE

Soon after the adoption of the Constitution, the first Congress exercised some of the power conferred upon it by article IV, section 1, of the Constitution [1] and enacted a statute which, with some supplementation and revision of phraseology, exists today as 28 United States Code, section 687, Revised Statutes, section 905. This section reads as follows:

"The acts of the legislature of any State or Territory, or of any country subject to the jurisdiction of the United States, shall be authenticated by having the seals of such State, Territory, or country affixed thereto. The records and judicial proceedings of the courts of any State or Territory, or of any such country, shall be proved or admitted in any other court within the United States, by the attestation of the clerk, and the seal of the court annexed, if there be a seal, together with a certificate of the judge, chief

[1] "Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records and proceedings shall be proved, and the effect thereof."

justice, or presiding magistrate, that the said attestation is in due form. And the said records and judicial proceedings, so authenticated, shall have such faith and credit given to them in every court within the United States as they have by law or usage in the courts of the State from which they are taken."

Writers and commentators on the subject generally agree that 28 United States Code, section 687, represents only a partial exercise of the congressional power under the full-faith-and-credit clause; and that both the words of the clause and its historical background fully sustain the view that Congress can go much further than it has gone and that Congress has broad power to prescribe the extraterritorial effect of a judgment.[2]

Outer limits of the congressional power under the full-faith-and-credit clause never have been determined by the Supreme Court; and in *Williams* v. *North Carolina* (II)[3] Mr. Justice Frankfurter, for the majority, expressly stated: "The reach of congressional power given by article IV, section 1, is not before us."[4] The majority opinion in *Williams* v. *North Carolina* (I)[5] is to the same effect.

Mr. Justice Jackson, delivering the annual Cardozo lecture before the bar of the city of New York in 1944, indicated that Congress may properly fix the standards for extraterritorial effect and recognition of State judgments, saying:

"The Court has had no occasion to decide such questions, but I should say that it has been fairly ostentatious in leaving the way open to sustain such enactments without embarrassment."[6]

Mr. Justice (later Chief Justice) Stone, dissenting on other grounds in *Yarborough* v. *Yarborough*[7] declared:

"The mandatory force of the full-faith-and-credit clause as defined by this Court may be, in some degree not yet fully defined, expanded, or contracted by Congress. Much of the confusion and procedural deficiencies which the constitutional provision alone has not avoided may be remedied by legislation. Cook, Powers of Congress under the Full Faith and Credit Clause, 28 Yale Law Journal, 421; Corwin, The Full Faith and Credit Clause, 81 University of Pennsylvania Law Review, 371; compare 33 Columbia Law Review 854, 866. The constitutional provision giving Congress power to prescribe the effects to be given to acts, records, and proceedings would have been quite unnecessary had it not been intended that Congress should have a latitude broader than that given the courts by the full-faith-and-credit clause alone. It was remarked on the floor of the Constitutional Convention that without the extension of power in the Legislature, the provision "would amount to nothing more than what now takes place among all independent nations." Hunt and Scott, Madison's Reports of the Debates in the Federal Convention of 1787, page 503. The play which has been afforded for the recognition of local public policy in cases where there is called in question only a statute of another State, as to the effect of which Congress has not legislated, compared with the more restricted scope for local policy where there is a judicial proceeding, as to which Congress has legislated, suggests the congressional power."

With particular respect to divorce decrees, the authorities seem again agreed that Congress has the power under the full-faith-and-credit clause of the Constitution to prescribe the conditions under which such decrees shall be given extraterritorial recognition and to compel that recognition.[8] Corwin, in his article, The Full Faith and Credit Clause,[9] stated that "* * * Congress may, under the clause, describe a certain type of divorce and say that it shall be granted recognition throughout the Union, and that no other kind shall." In The Supreme Court and Full Faith and Credit, by Moore and Oglebay,[10] it is said:

"The migratory divorce is a matter having large social and moral implications upon which an informed legislative directive is needed. The States are probably impotent to give the directive. Congress, however, has the power to set up minimum legislative standards relative to divorce jurisdiction as a prerequisite before a decree is entitled to full faith and credit. And some such congressional directive is probably desirable.

* * * * *

"We do not care to suggest that Congress can or should provide upon what grounds divorce may be granted. Our thought is that it may deal with the relationship, such as domicile or residence (and what shall constitute these relationships), which one or both of the parties to the divorce proceeding must bear to a State before its courts can have jurisdiction to proceed to grant a divorce which is entitled to full faith and credit."

There are fairly strong suggestions also that the Supreme Court would sustain such legislation. Mr. Justice Jackson, in the Cardozo lecture previously referred to, stated in effect that Congress can proceed "to prescribe the type of divorce judgment that is entitled to extraterritorial recognition," and then suggested, as already pointed out herein, that the way was open for the Supreme Court to uphold such an enactment. (It should be borne in mind that Mr. Justice Jackson was with the majority in *Williams* v. *North Carolina* (II).)

These remarks were referred to by way of general citation in *Williams* v. *North Carolina* (II) (note 5 of the majority opinion) wherein Mr. Justice Frankfurter disclaimed any effort in the decision to determine the reach of congressional power. Justices Black and Douglas, dissenting in the same case, expressly remarked as to the broad power of Congress to act, though admittedly it had not done so.

Obviously a congressional statute prescribing the extraterritorial effect of divorce decrees, so that a divorce valid in one State must be given full faith and credit everywhere, faces the necessity of overruling the majority view in *Williams* v. *North Carolina* (II), that a State may apply its own local policy regarding the jurisdictional fact of domicile and refuse credit to the concededly valid decree of another State. And in *Andrews* v. *Andrews*[11] the court permitted the later impeachment of recitals by a defendant who appeared in the proceeding. On the other hand, any proposed statute must allow for the application of procedural due process in testing the divorce proceeding. Warnings are to be found in Supreme Court decisions[12] and in the dissenting and concurring opinions in *Williams* v. *North Carolina* (II), that a State judgment, notwithstanding full faith and credit, is always subject to the principles of due process.

With these propositions in mind a draft of a suggested statute prescribing the extraterritorial effect of divorce decrees is submitted herewith. This language could be added to the present 28 United States Code section 687, or could be a separate section of the code.

This suggested statute, it is believed, would entitle other States to question a decree based on fraud, for such a decree would not be valid in the rendering State. The suggested statute would, however, give full recognition to decrees based on constructive service where the rendering State was the last place of domicile with respect to the marriage relationship; and would also permit a State wherein only one spouse is domiciled to determine its jurisdiction to grant the divorce, and to render a decree conclusive against everyone, where the defendant appears or is validly personally served with process. A default judgment, entered without such appearance or service, against a spouse not domiciled in the State, where the State was not the last State of marital domicile, would be open to attack and refusal of recognition; but certainly not to any greater degree than under the present state of the law.

Suggested statute

"Where a State has exercised through its courts jurisdiction to dissolve the marriage of spouses, the decree of divorce thus rendered must be given full faith and credit in every other State as a dissolution of such marriage, provided (1) the decree is final; (2) the decree is valid in the State where rendered; (3) the decree contains recitals setting forth that the jurisdictional prerequisites of the State to the granting of the divorce have been met; and (4) the State wherein the decree was rendered was the last State wherein the spouses were domiciled together as husband and wife, or the defendant in the proceeding for divorce was personally subject to the jurisdiction of the State wherein the decree was rendered or appeared generally in the proceedings therefor. In all such cases except cases involving intrinsic fraud the recitals of the decree of divorce shall constitute a conclusive determination of the jurisdictional facts necessary to the decree."

COMMISSION ON CODIFICATION OF UNITED STATES LAWS

Mr. WILEY. Mr. President, I introduce for appropriate reference a joint resolution to establish a commission to establish and codify the general and permanent laws of the United States. This proposed joint resolution has been under study for a considerable time by myself, by members of the Judiciary Committee staff, and many outside qualified organizations and individuals. Copies of a draft of the joint resolution were submitted to numerous Government departments, and I am glad to say that it has won very widespread endorsement

by them and by many State bar associations, in addition to the American Bar Association.

I am hoping that favorable action on this joint resolution will be taken by the Congress at an early date.

The joint resolution (S. J. Res. 171) to establish a commission to revise and codify the general and permanent laws of the United States, introduced by Mr. WILEY, was read twice by its title, and referred to the Committee on the Judiciary.

THE ROLE OF GOVERNMENT MANAGEMENT-LABOR RELATIONS—ADDRESS BY SENATOR THOMAS OF UTAH

[Mr. THOMAS of Utah asked and obtained leave to have printed in the RECORD an address entitled "The Role of Government in Management-Labor Relations," delivered by him at the round-table discussion at the annual meeting of the American Political Science Association at the Statler Hotel, Washington, D. C., December 29, 1947, which appears in the Appendix.]

THE NATIONAL SCIENCE FOUNDATION—ADDRESS BY SENATOR THOMAS OF UTAH

[Mr. THOMAS of Utah asked and obtained leave to have printed in the RECORD an address on the subject The National Science Foundation, delivered by him before Pi Gamma Mu, National Social Science Fraternity, at the annual meeting of the American Political Science Association, Washington, D. C., December 30, 1947, which appears in the Appendix.]

PROBLEMS FACING THE CONGRESS—ADDRESS BY SENATOR HILL

[Mr. THOMAS of Utah asked and obtained leave to have printed in the RECORD a radio address delivered by Senator Hill on January 2, 1948, in a discussion of critical problems which face the Congress, which appears in the Appendix.]

ONE WAY AMERICA CAN HELP—STATEMENT BY SENATOR THOMAS OF UTAH

[Mr. THOMAS of Utah asked and obtained leave to have printed in the RECORD a statement entitled "One Way America Can Help," prepared by him, and published in the Deseret News, of Salt Lake City, Utah, December 17, 1947, which appears in the Appendix.]

ALTGELD CENTENARY BANQUET—ADDRESS BY CARDINAL STRITCH

[Mr. LUCAS asked and obtained leave to have printed in the RECORD an address delivered by His Eminence Samuel Cardinal Stritch, of Chicago, on the occasion of the Altgeld centenary banquet, at Chicago, Ill., on December 30, 1947, which appears in the Appendix.]

WHY DO WE STAY IN NEW ENGLAND?—EXCERPTS FROM ADDRESS BY EDWARD WEEKS

[Mr. LODGE asked and obtained leave to have printed in the RECORD excerpts from and address on the subject Why Do We Stay in New England? by Edward Weeks, editor of the Atlantic Monthly, before the advertising Club of Boston, which appears in the Appendix.]

VETERANS' ECONOMIC DEVELOPMENT PROGRAM—LETTER AND ADDRESS OF RAY H. BRANNAMAN

[Mr. DWORSHAK asked and obtained leave to have printed in the RECORD a letter from Ray H. Brannaman, commander in chief of the Veterans of Foreign Wars, together with a radio address by him, which appears in the Appendix.]

HENRY A. WALLACE—ARTICLES BY ELEANOR ROOSEVELT

[Mr. BARKLEY asked and obtained leave to have printed in the RECORD articles by Eleanor Roosevelt dealing with Henry A. Wallace and published in the Washington (D. C.) Daily News, on December 31, 1947, under the heading "Henry Wallace has always been politically inept"; on January 2, 1948, under the heading "Wallace's approach like Chamberlain's with Herr Hitler"; on January 3, 1948, under the heading "Wallace wouldn't be so cocksure if he were President"; and on January 5, 1948, under the heading "Conclusion—Wallace has done country and world a disservice," which appear in the Appendix.]

GET TOGETHER ON THE BUDGET—EDITORIAL FROM THE WORCESTER (MASS.) TELEGRAM

[Mr. LODGE asked and obtained leave to have printed in the RECORD an editorial entitled "Get Together on the Budget," published in the Worcester (Mass.) Telegram of December 31, 1947, which appears in the Appendix.]

BE A LEADER: THEY'RE NEEDED—EDITORIAL FROM THE WINDOW SEAT

[Mr. CAPPER asked and obtained leave to have printed in the RECORD an editorial entitled "Be a Leader: They're Needed," by Hon. W. D. Jamieson, published in the Window Seat, a weekly newspaper, in its January 7, 1948, issue, which appears in the Appendix.]

SIDE SHOW—EDITORIAL FROM THE PALM BEACH POST-TIMES

[Mr. HAWKES asked and obtained leave to have printed in the RECORD an editorial entitled "Side Show," by Charles Francis Coe, editor and publisher of the Palm Beach Post-Times, Palm Beach, Fla., which appears in the Appendix.]

RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF FOREIGN SERVICE RETIREMENT AND DISABILITY SYSTEM

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on Foreign Relations:

To the Congress of the United States:

I transmit herewith a report by the Acting Secretary of State, showing all receipts and disbursements on account of refunds, allowances, and annuities for the fiscal year ended June 30, 1947, in connection with the Foreign Service retirement and disability system as required by section 862, Foreign Service Act of 1946 (Public Law 724).

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 9, 1948.*

(Enclosure: Report Concerning Retirement and Disability Fund, Foreign Service.)

MAJ. GEN. LAURENCE S. KUTER

The ACTING PRESIDENT pro tempore laid before the Senate the following communication from the President of the United States, which was read, and, with the accompanying paper, referred to the Committee on Armed Services:

THE WHITE HOUSE,
Washington, January 8, 1948.

Hon. ARTHUR H. VANDENBERG,
President of the Senate pro tempore,
Washington, D. C.

MY DEAR MR. PRESIDENT: I am attaching hereto a draft of bill to authorize the President to appoint Maj. Gen. Laurence S. Kuter as a member of the Civil Aeronautics Board, without affecting his military status and perquisities. I contemplate designating Major General Kuter as Chairman of the Board.

The draft of bill would provide that Major General Kuter would continue, while serving as a member of the Civil Aeronautics Board, to receive his military pay and allowances, with Department of the Air Force appropriations being reimbursed therefor from appropriations of the Civil Aeronautics Board, but that, in the performance of his duties as a member of the Civil Aeronautics Board, Major General Kuter would be subject to no supervision or control by the Department of the Air Force, the National Military Establishment, or the armed services of the United States. The bill provides that in the event the civilian salary of a member of the Civil Aeronautics Board should at any time exceed Major General Kuter's military pay and allowances, the difference would be paid to him from Civil Aeronautics Board appropriations.

I would appreciate your aid in having the bill introduced in the Senate. Since it is desirable to send Major General Kuter's nomination to the Senate at an early date, I would appreciate your aid in securing the passage of the bill as soon as practicable.

I am writing a similar note to Speaker MARTIN.

Sincerely yours,

HARRY S. TRUMAN.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

BUDGET RECEIPTS AND EXPENDITURES DURING FIRST HALF OF FISCAL YEAR 1948

Mr. AIKEN. Mr. President, the Senate Committee on Expenditures in the Executive Departments has just completed a summary of budget receipts and expenditures and the national debt for the second quarter of the present fiscal year. Heretofore this summary has been made available only to Members of the Senate. However, there seems to be no good reason why the public should not have the facts contained in it. Therefore, I ask unanimous consent to have printed in the body of the RECORD the comparative statement of the public debt, budget receipts and expenditures, as of December 31, 1947, and a short accompanying statement.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

STATEMENT BY UNITED STATES SENATOR GEORGE D. AIKEN, CHAIRMAN, SENATE COMMITTEE ON EXPENDITURES IN THE EXECUTIVE DEPARTMENTS

WASHINGTON, D. C., January 8, 1948.—The Senate Committee on Expenditures in the Executive Departments has just completed a summary of budget receipts and expenditures during the first half of fiscal year 1948. This report shows that on December 31, 1947, the public debt totaled $256,899,844,854, which is $22,864,524,494 less than the peak total of $279,764,369,348 on February 28, 1946, and $1,476,058,437 less than the total on June 30, 1947. The interest paid on the public debt during the first 6 months of the current fiscal year totaled $2,273,019,677, or an in-

crease of $46,706,349 over the corresponding period for last year.

According to information obtained from the United States Treasury, the total budget receipts during the first half of the year were $19,184,411,749, compared with a total of $18,466,138,389 for the period ending December 31, 1946. The expenditures reported for the same period this year totaled $17,525,221,067, as compared with $18,487,075,734 a year ago. Receipts exceeded expenditures by $1,659,190,682, thereby creating a surplus of this amount for the period, as compared with a deficit of $20,837,345 during a similar period a year ago (July 1 to December 31, 1946).

An analysis of the expenditures reported by the Treasury Daily Statement for the period ending December 31 indicates that of the $17,525,221,067 expended, over 79 percent was charged to five agencies of the Government and three functions or objects of expenditure. In other words, over 79 percent of the total Federal expenditures fall under the categories listed below:

Social Security Administration	$428,025,765
Department of the Army	3,691,842,348
Department of the Navy	2,141,284,404
Railroad Retirement Account	[1] 568,072,493
Credit to United Kingdom	1,400,000,000
Interest on public debt	2,273,019,677
Tax and duty refunds	425,347,845
Veterans' Administration	3,042,974,443
Total	13,970,566,980

[1] Transferred from general fund to trust account by the U. S. Treaury.

From these figures it will be observed that the four largest items of expenditure result either directly or indirectly from World War II.

These totals do not include $540,000,000 appropriated by Congress under the Interim Aid Act approved on December 23, 1947, nor any funds for the permanent European recovery program now being considered in Congress.

Comparative statement of the public debt, budget receipts and expenditures as of Dec. 31, 1947

Total public debt, Dec. 31, 1947	$256,899,844,854
Interest on public debt:	
Interest paid (July 1 to Dec. 31, 1947)	2,273,019,677
Interest paid (corresponding period last year)	2,236,313,328
Net increase this year	46,706,349
Interest rate on total debt, 2.144 percent.	
Reduction of public debt since war peak (Feb. 28, 1946)	22,864,524,494

Period	Amount	Per capita	Interest paid on public debt	
			Fiscal year	Amount
WORLD WAR I				
Prewar (Mar. 31, 1917)	$1,282,044,346	12.36	1917	$23,232,376
War debt (Aug. 31, 1919)	26,596,701,648	250.18	1920	1,020,251,623
Postwar (Dec. 31, 1930)	16,026,087,087	129.66	1931	611,559,705
WORLD WAR II				
Before defense program (June 30, 1940)	48,499,935,184	367.73	1940	1,040,935,697
Pre-Pearl Harbor (Nov. 30, 1941)	61,363,867,932	459.69	1942	1,260,085,336
War debt (Feb. 28, 1946)	279,764,369,348	1,989.76	1946	4,721,957,683
Postwar (June 30, 1947)	258,375,903,293	1,795.62	1947	4,957,922,484

	This year	Last year
Budget receipts (July 1 to Dec. 31)	$19,184,411,749	$18,466,138,389
Budget expenditures (same period)	17,525,221,067	18,487,075,734
Surplus (+) or deficit (−)	+1,659,190,682	−20,837,345

PROBLEMS WITH RESPECT TO GREECE AND TURKEY

The ACTING PRESIDENT pro tempore. The Chair lays before the Senate a Senate resolution coming over from a previous day, which will be read.

The Chief Clerk read the resolution (S. Res. 101), submitted by Mr. BYRD on April 1, 1947, as follows:

Resolved, That it is the sense of the Senate that the United States representative to the United Nations organization bring before the United Nations organization immediately, for its immediate consideration, the present problems which have arisen with respect to Greece and Turkey with a view to having said organization take such action with respect to such problems as it may deem necessary for the immediate solution thereof.

The ACTING PRESIDENT pro tempore. In the absence of the Senator from Virginia [Mr. BYRD], without objection, the resolution will be passed over without prejudice.

Morning business is concluded.

PROBLEMS ON THE FOREIGN AND DOMESTIC FRONTS

Mr. HATCH. Mr. President, the opening of this, the second session of the Eightieth Congress, also marks the opening of a new year. The year and the session both will, in my judgment, go down in history as fateful times, times filled with fate for our Nation and for all the world. Even as we begin our labors in this new session, already grave and serious problems pend and await solution. These problems exist on both the foreign and the domestic fronts—and they are fronts—fronts against which enemies are dangerously pressing. Almost immediately we are faced with decisions to be made, decisions which will not only shape the course our country shall take and follow for many years to come, but decisions which can well shape the course other nations must adopt and follow. It is not alone legislation dealing with foreign affairs that will affect other nations. Decisions on domestic matters will likewise affect all nations and all peoples. For example, should inflation proceed unchecked and economic collapse occur at home, it would not only affect economic conditions abroad, but the world-wide repercussions of such a collapse would create unthinkable and dangerous political conditions in almost every country of the Old World.

From the heavy responsibility which rests upon us in these days there is no escape. That responsibility is here now. It is ours. It cannot be shifted to anyone else. There can be no buck passing—there should be no procrastination or delay. The issues are squarely before us. They should and must be met frankly, courageously, and with all the wisdom we possess.

It takes no high degree of intelligence to know that world conditions cannot forever continue as they now are. The widening chasm between eastern and western Europe must somehow be spanned and bridged. The already tense political and economic strife on that continent and elsewhere must end, as it surely will end some day and in some way. When it will end and how it will end depend in large measure on what we of this Congress do in this new year.

Grim and dark as the situation may appear now, to me it is not hopeless. The political and economic warfare which presently exists—and without question it does exist—can end in peace with a reconstructed, recovered, revitalized and restrengthened Old World. But that happy end, Mr. President, is not a certainty at this moment. Evil portents are everywhere. With wrong decisions and wrong action, or if there be no decision, if there be inaction, it is not at all impossible that the present political and economic discord and dispute can end in complete disaster, approaching actual anarchy and chaos.

Between the two extremes there is a choice to be made. Fortunately, today is not too late to choose. We and other nations yet have time and opportunity to make the right choice. Tomorrow—and I mean tomorrow literally—it may be too late to choose. The onrushing tides of conflicting interests are moving so swiftly that tomorrow, next week, or next month the time to choose may have passed. Our decision may be made for us before we act ourselves. Yes, it could happen that a decision might be forced, as it was at Pearl Harbor.

Mr. President, must it always be necessary that we wait for decisions to be forced? Must we always wait for a Pearl Harbor or the sinking of a *Lusitania*? Can we not exercise wisdom and discretion in advance and prevent forced decisions, decisions forced by cruel and ruthless war? There is wisdom enough in this Government of ours, with all of its branches working together, to decide in advance and before it is too late.

That is the reason, Mr. President, why I am speaking today, in the early days of the session, hoping that we may act before the bitter and unwelcome cry, "Too late, too late," is heard throughout the land.

It is not necessary for me to relate or detail to any extent whatever the precarious conditions which now prevail everywhere in the world. But it is not alone the international scene which has a somber aspect. On the domestic front there is a problem almost as serious as are matters of foreign concern. I shall not dwell on the grave domestic situation, except to say that the inflationary trend and spiral can become as deadly and disastrous in its effect on our economy at home and our way of life, and perhaps even our institutions of Government, as any issue of foreign affairs. Already that trend of ever-rising prices is well on the way toward getting beyond control or remedy. Here again it takes no high degree of intelligence to foresee the inevitable catastrophe which is bound to come unless prices soon become adjusted to a level upon which men and women in every station in life can live and retain that sense of safety and security which a stable economic position gives to all and which does not exist today.

The issue of foreign affairs and this domestic problem of inflation are the two things which prompted me in the beginning to call this session and this year "times filled with fate." Yet I do not want to sound merely a note of alarm; rather I would speak with a strong voice of hope, faith, and confidence, for if the problems are faced frankly and honestly with strong, united effort to meet and overcome all the evil potentialities contained within these issues, this Congress can, I am confident, win the battles on both the domestic and foreign fronts. With united effort, this Congress can overcome all obstacles and go down in history as one of the greatest Congresses of all times. On the other hand, if we procrastinate, if we delay, if we quibble, and if we divide, historians of the future may write that such discord, disunity, indecision, and inaction by us marked the beginning of the downfall of the Republic. Never before in the Senate have I used words such as these. Yet I use them today deliberately, and in saying them I speak not my own thoughts alone, for it is the prevailing opinion among students of government and of history that these two issues which confront us are as grave and serious as any which have come before any Congress since the beginning of our country's history. With the exception of that unfortunate period of civil strife which once existed, times have never been fraught with more evil possibilities than they are today. Yet I hasten to add that these same times are also filled with promise of good for all, for us and for the world, if we but act wisely and with complete fidelity to the Nation's good.

I am not dismayed by these issues or the necessity for the decisions to be made. I am not afraid that we do not possess the wisdom and ability to meet and solve correctly all the tremendous problems of this day. Within the membership of the present Congress there is ample wisdom and courage on both sides of the aisle, cooperating with the executive branch of Government, to meet and solve all problems.

Notwithstanding this faith and confidence in our Government, there is one thing I fear—one thing of which I am afraid, and I do not hesitate to confess this fear. I am afraid of—I do fear—the deadly, destructive effect of party politics in this year of fate and decision. Always a menace in some degree to well-considered legislation, party politics in election year develop an atmosphere of strife, contention, discord, and disunity, to which may be added selfishness and greedy ambition, all of which make wise and sound legislation almost impossible.

It is not my intention to assume the role of critic, nor to place blame or responsibility upon anyone or upon either party, but there is no use disguising the facts or mincing words. We all know that in the session just recently adjourned, the approach of the Presidential election year did exercise a baneful influence. While we passed the interim-aid bill, it was not enacted with that high degree of enthusiasm and faith required to make it strong and effective. By quibbling—and it was quibbling—its passage was needlessly delayed; things were said in debate which would have been better left unsaid. Without question some of the things which went on tended to weaken, if not to destroy, some of the best and most effective results we hoped to obtain by our action.

It was with genuine regret, Mr. President, that during the progress of that debate I heard the distinguished chairman of the Foreign Relations Committee [Mr. VANDENBERG] chided by some members of his own party. He was even accused of having embraced some strange New Deal doctrine or policy of foreign affairs, whatever that may be. Certainly a New Deal policy of foreign affairs was something none of us had ever heard of before, let alone embraced, and least of all, the Senator from Michigan. Actuated and moved solely by an overwhelming purpose to aid in bringing some degree of order and peace to this disordered, warring, and unhappy world, the Senator from Michigan has given as fine an example of nonpolitical and nonpartisan approach to these world-wide issues as has ever been given by any man or statesman anywhere.

I cannot pay this small tribute to the Senator from Michigan without also giving like commendation to the former chairman of the Committee on Foreign Relations the senior Senator from Texas [Mr. CONNALLY]. During the past years, regardless of which party was in the majority in the Senate, and whether it was the Senator from Michigan or the Senator from Texas who presided over the Foreign Relations Committee, I often had a strong feeling of gratification as I watched these two stalwarts of the Senate stand shoulder to shoulder, fighting together, without regard to political affiliation, for the common cause of their country's good.

It is for just this kind of nonpolitical, nonpartisan approach to these two weighty and menacing issues that I plead today. Let party politics prevail—no, they need not prevail—merely let party politics enter into our debates, deliberations, or decisions on these problems of inflation and foreign affairs, and our battle in each instance is already lost. If party politics guides or directs any of us in these critical days of destiny, only disaster can or will result.

It is of this partisan division that I am afraid, and I have strong cause to be afraid. Already I have mentioned the disturbing conditions which prevailed to some extent as we discussed the interim aid bill. Those political influences were even more evidenced as we sought to enact legislation to curb inflation. Does any Senator question but that party politics did enter into that discussion?

Again, I do not want to play the role of critic or fault-finder; rather I would speak of what the people of the country are saying. They think party politics prevailed altogether in our discussion and decision on measures to stop inflation. In fact, many people with whom I talked during the vacation frankly said they thought the Members of Congress, Democrats and Republicans, and even the President, were playing football with inflation issues. The people with whom I talked said the Democrats tossed the ball to the Republicans, who first refused it, and later fumbled the entire issue. All the time, so the people say, the Republicans were shouting that theirs was not the responsibility, that the President was solely to blame. For partisan reasons they tossed the ball back to the Democrats, who in turn juggled and bounced it back to them. The Democrats were also loudly disclaiming responsibility, and sought to place the blame on the Republicans. None of the people with whom I talked had any confidence that the measure finally passed would have beneficial results. All expressed a feeling of distaste at the way we handled the situation, and especially at the attempt to shift blame and responsibility from one party to the other. The people are not interested in fixing blame. They want constructive action.

One man said the charges and countercharges of who killed OPA reminded him very much of the nursery story Who Killed Cock Robin? "Not I," shouted the Democrats. "Not I," echoed the Republicans, and all the time prices were, and are, going higher and higher.

It is against all of this kind of thing and against the creation of such an impression throughout the country that I speak today. Early as it is in the session, it is not too early to speak and to voice our views against partisan politics in connection with these matters. Already there are trends which indicate that party lines are being drawn on both these issues. Even this week, I understand, the Republican Policy Committee has met to determine Republican policy and attitude on these questions. Soon the Democratic Policy Committee, of which I am a member, will in all likelihood meet, perhaps to determine the Democratic policy or position.

Last week in New Mexico I read an Associated Press story to the effect that the distinguished Senator from Ohio [Mr. TAFT] was urging the Republican Members of the Senate to present a Republican European recovery program. It is true, Mr. President, that the news

article itself hardly bore out the headlines, which indicated the impression of the story as I have given it; but unfortunately a great many people read only headlines, and from the headlines which appeared in the paper I read, it was plainly expressed that the Republican members of this body were to submit a separate, Republican program for European recovery.

Mr. SALTONSTALL. Mr. President, will the Senator yield for a brief statement in regard to what he has just said?

Mr. HATCH. I prefer to wait until I complete my statement, and then I shall be glad to answer questions.

Mr. President, such a party program, whether it comes from the Republicans or whether it comes from the Democrats, is exactly what this country does not want and does not need. The people do not want a Republican European recovery policy. With equal vigor I assert that the country does not want a Democratic European program. What the country wants and what the country needs and what the people are demanding is a united American program. Not only is this true as to the European recovery program, but the people also want an honest effort made to halt the boom which nearly all people are beginning to believe will sooner or later result in the "bust" of which they are afraid, and upon which some countries are relying to force us to withdraw from Europe.

Is it necessary to say, Mr. President, that on these highly important issues there is no room for party politics? Of course there is a time, a place, and a season for party politics, just as there is for everything; but on these issues, in this session of the Congress, in this new year of 1948, it is not the time, it is not the season, and it is not the place for party politics. Politics naturally must prevail on some issues. National campaigns are a necessary part of our system of government. I would not abolish politics, but I would confine politics to proper issues. They should never, Mr. President, enter the life stream of the Republic.

On other issues and lesser matters we can draw party lines, if we desire; but not on these. There is too much at stake here to indulge in political bickering or jockeying for position in the Presidential race.

I have said what people are thinking. It is not only the rank and file of the people who are having these disturbing thoughts. Practically every editor, every columnist, and every commentator in the country has pointed out the danger of politics in the consideration of these matters. All deplore the situation, and nearly all are calling for what Mr. Lippmann calls an agreed national policy. In his article he points out, on the inflation issue, that if measures for allocation, priorities, and rationing recommended by the President, were adopted, against the opposition of most of the business communities and of the Republican Party, they would be unworkable, and it would be dangerous for the administration to possess such powers if they could not be used successfully. He also said, and now I quote his exact words:

> The Republicans, on the other hand, realize that to refuse these powers would be dangerous too. For then if the inflation gets out of hand and brings on an economic crisis, they will be the popular scapegoats.

Mr. Lippmann adds that hesitation and reluctance could lead only to "indecision, inaction, and so far as the inflation goes, to a policy of let her rip." He further suggests, and I quote his words:

> But it can also lead to an agreed national policy—which is the only kind of policy that can be made to work.

Others have made similar suggestions. One newspaper, the Detroit Free Press, in an excellent editorial on the inflation issue, asks Congress to seek the best expert advice and guidance from the top-ranking authorities of the Nation, representatives of every shade of economic thought, and to have those authorities selected by a nonpolitical agency, such as the Brookings Institution. The editorial suggests that with such advice and with such a united effort of Congress and the administration, business and labor and all the public would accept the advice as the best possible way out of a dangerous situation.

I agree wholeheartedly that what this country needs more than anything else on both of these issues is an agreed national policy. With such an agreement in the Congress and with cooperation from the executive branch on both issues, whatever decision they reached could be placed before the American people and before the world as one strong, united, national policy having the support of Republicans and Democrats alike. Inevitably such a policy, so adopted, would soon be accepted and would have the support of the people of America. By such a process we could remove the threat of partisan politics; and whatever the final outcome might be, whether of credit or of blame, neither party would gain and neither party would lose. After all, it would be the smartest and best politics both parties could play.

But how all this is to be brought about is a perplexing question. How will it be possible to achieve such an agreed national policy? Wise indeed it would be to call in the experts and to confer with a nonpolitical organization, such as the Brookings Institution, from which as to administrative matters of the Marshall plan the Senator from Michigan [Mr. VANDENBERG] has already requested advice. Wise as is that procedure, it is not enough. There must be some medium or method by which party lines may be obliterated, some opportunity given for the leadership from both parties to get together, resolve their differences, and decide on an agreed national policy. I say leadership, because it is manifestly impossible to invite all the committees or all the members having to do with these important subjects to one conference.

In this regard I have a suggestion to make, Mr. President. It is only a suggestion—something to ponder over and think about. If anyone else has a better idea or thought, I hope it will be forthcoming quickly.

On foreign affairs—which will be the first issue we shall consider—the Senate Committee on Foreign Relations rightfully has exclusive jurisdiction. Incidentally, I should add here that I have no fear that party politics will enter into the discussions in the Foreign Relations Committee. Always in that committee—at least, since I have been a member of it—party politics have seldom appeared, if ever, and have had little, if any, weight. However, to reach an agreed national policy, others should be called into consultation, to work out and determine what that agreed national policy should be.

It will be recalled that under the Reorganization Act the law sets up policy-making committees. One is the Democratic policy committee, the other is the Republican policy committee. It has never been my thought that these policy committees were set up solely to promote party-policy programs. Such would be a prostitution of the purposes of the Reorganization Act. Regardless of the intention of the authors, those should be instruments to determine policies for the welfare of the country, not for parties alone. In my judgment, it was the necessary recognition of party dividing lines that called for two committees, rather than one general policy committee, composed of both Democrats and Republicans. But on the two issues of which I speak, why not strike out that party line and have agreement between and with the two policy committees? Let us unite them for this purpose, and have one policy committee for the Nation.

That is my suggestion: That the two policy committees, Republican and Democrat, join with the Foreign Relations Committee and sit with it throughout the hearings and discussions on the European recovery program. Of course, under the Senate rules and the terms of the Reorganization Act, Senators who are not members of the committee could not be permitted to vote or otherwise exercise full powers as committee members. Were it otherwise, I would suggest that the members of the two policy committees be given equal authority with members of the Foreign Relations Committee; but of course that is impossible. However, that is no particular deterrent to what I have in mind. If the members of the two policy committees would forego all other duties and would give their full time to the committee hearings, in completely unprejudiced and unbiased consideration of the facts adduced at the hearings, I cannot help but believe, Mr. President, that under such circumstances, and foregoing, of course, political considerations, all would reach approximately the same conclusion. There is no reason why men of equal ability, equal integrity, equal patriotism, and proceeding without any consideration of politics, should widely differ in ultimate conclusions. Of course, sometimes there is a small minority which honestly differs from the majority. Unfortunately, such differences cannot always be avoided, but, on supreme issues such as the ones I have mentioned, I cannot help entertaining strong faith that differences could be resolved and agreement reached.

It would even be my hope that with a full, frank, and nonpolitical approach, it would be possible to reach an almost unanimous decision. If such agreement could be reached, those powerful committees could come to the floor of the Senate and throw the strength of their united decision and action behind the

plan agreed upon. Without any doubt, whatever, I say, unhesitatingly, such a plan so agreed upon would be adopted, and in all probability the House would concur. Likewise, the President would, in my judgment, cooperate to the fullest degree, and for once we would have an agreed national policy. Furthermore, it would be one which would be accepted by the country. On both issues, with such passage and support, any plan could be administered without the opposition and griping which inevitably follow any measure half-heartedly and unenthusiastically passed. Moreover, the whole world would know that the full strength of America and all her resources were behind and strongly supporting without division the national policy, or better, the American plan.

The same procedure could be followed with legislation to curb inflation. The only difference would be the substitution of the Committee on Banking and Currency for the Committee on Foreign Relations. The best advice and help in America could be obtained for such a nonpolitical effort. Difficult as it may be to stop inflation without promoting deflation, it could be done by a united, unselfish, and nonpolitical approach. But it is also as true as that I speak today, that without such approach, a disastrous crash is bound to come. Let that happen, let depression sink to the depths where it may well go, and there will be no escaping responsibility. Democrats and Republicans alike may and perhaps should feel the righteous wrath of an outraged public—a public which is already sick and tired of politics taking precedence over the country's welfare.

Mr. President, it has not been my purpose today to argue for or in support of any plan, either for European aid or to curb inflation. My only desire is to urge avoidance of party politics and to plead for united support on both these issues for whatever plan may be finally agreed upon in the manner suggested.

While I have spoken rather frankly, I have not said one-half of what I wanted to say or perhaps should have said. Not my words, but the situation before us, presents a challenge to the Congress. It is not a challenge to Republicans any more than it is a challenge to Democrats. It is a challenge to us all.

I have tried to meet that challenge by offering the suggestion made today. It is not proposed as a final answer. It is made as a tentative proposal, to be adopted only if something better cannot be found or devised. It is the objective to be achieved that I emphasize, rather than the method.

I realize full well that the suggestion made or any other similar suggestion may not be heeded. Such is usually the case when anyone attempts to resist or uproot the political party system, which is so deeply entrenched in every governmental activity, especially when a Presidential election year presents so many tempting political morsels. Generally, efforts to avoid politics are called impractical and unrealistic. Too often, and because of so-called realism and practical politics, efforts to unite upon any subject without regard to political considerations fail. Such fate may await the proposal made today.

I do not know whether the suggestion is politically realistic and practical or not; frankly, I do not care. I do know that the people of America want action on both the problems I have discussed and that they want it now. The man in the street, who is not too much interested in practical politics, is vitally interested in the cost of living, which is already far too high. Why should he not be interested? Many of our citizens, both men and women, I am told, are selling war bonds to meet living expenses. And the man in the street is also firmly grounded in the belief that conditions abroad contain the seeds of another terrible and deadly war. He wants something done about that; and he should want something done, for, if worst comes to worst, it is the average American citizen who will furnish the material, do the work, and pay the taxes. It will be the sons of the men in the street who will be called into service to fight and perhaps die upon inglorious and unnecessary battlefields.

In these most grave matters, the citizen can look only to his Congress and to the Executive to find the right and proper answer to his and to the Nation's problems. In his search he is looking neither to Republicans nor to Democrats. He looks to his Government, composed of both Democrats and Republicans, and there he has a right to look. To the average citizen, the man who represents all America, we are under heavy responsibility in this hour of crisis—for such it is. Our high obligation is to discharge our duty to him and to all the country, without thought of political gain or advantage. That obligation transcends party loyalty or party gain. Our duty to him and all Americans can best be summed up with a quotation from one of America's greatest, the founder of the Republican Party, Abraham Lincoln. The words were brought to memory by a Christmas card sent out this year by one of our own Members. In a time of great crisis, when the possibility of war threatened and the fate of the Union hung in the balance, Mr. Lincoln, speaking in Cooper Union Hall, New York City, on February 27, 1860, said:

> Let us have faith that right makes might, and in that faith let us to the end dare to do our duty as we understand it.

In that same spirit, in this hour of crisis, when again the fate of our country may hang in the balance and when the threat of war hangs heavy over all the world, may we also have faith that right makes might, and in that faith, to the end, may we also dare to do our duty as we understand it.

Nothing more than intelligent performance of simple duty is required of us. We dare do nothing less.

Mr. President, I have concluded my remarks, but, as I left my office, I picked up several recent editorials commenting on the present situation. I ask unanimous consent to have three of them printed in the body of the RECORD following my remarks. One of them I wish to read.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

(See exhibits A, B, and C.)

Mr. HATCH. The editorial which I desire to read is entitled "Challenge to Congress," from the Christian Science Monitor of January 6, 1948. It reads as follows:

The session of Congress opening today is going to enable us to tell men from boys. The National Legislature faces tests such as it has rarely known in peacetime—and all the harder because not dramatized by war. Also at the very time when partisanship is particularly tempting—an election year—petty politics has become most dangerous.

The times cry out for men. For men with vision enough to grasp world issues. For men with patience enough to persuade opponents and the uninformed—and persuade again. For men with courage enough to stand against the demagogue. For men with compassion enough to feel humanity's need. For men with wisdom enough to cleave through confusions. For men with godliness enough to put principle before party.

We hope the event will prove that many of the "boys" in Congress have grown up. For puerile qualities—heedlessness, ignorance, rashness, irresponsibility—will not meet the challenge of today. America has come of age as a world power, indeed, as a world leader. Those who would lead America must display the bigness, the judgment, the steadiness of maturity.

Of course, the challenge is not alone to Congress. The people of the United States as a whole have suddenly been thrust into the midst of tremendous events. Without the centuries of preparation other nations have had for a role of world leadership, they find themselves pushed upon the stage.

In an election year the temptation to dodge that role is going to be doubly strong. The high cost of living at home will be much closer to most citizens—and may appear more dangerous—than the hunger and desperation which foster communism abroad. The desire for tax cuts may seem to many to outweigh the advantages of defending democracy by aiding the reconstruction of Europe. And always there will be the temptation to put politics ahead of patriotism, self-interest ahead of the general welfare.

The Marshall plan will be the biggest single question before Congress. And the big question about the Marshall plan is whether it is going to be too little, too late. We can't guarantee that it will succeed. But as Warren Austin, United States representative to the United Nations, said, a farmer doesn't know that he is going to get a crop when he plants, but he can be sure he won't get one if he doesn't.

The Marshall plan should be put first. It should be rigorously examined and perfected—although it has had 6 months of study and revision. And it is well for the American people to realize that they will have to put more than dollars into it. They will have to put imagination, courage, unselfishness, and understanding into their new world role. But mere doubts, mere appeals to prejudice or selfishness which would dangerously delay or hamstring an effective recovery program—those things the American people should reject emphatically.

Let the people insist that Congress and the administration measure up to the challenge which now confronts them. Doing so they can turn danger into opportunity.

EXHIBIT A

[From the St. Louis Post-Dispatch of January 4, 1948]

UP TO THE PEOPLE

What will the second session of the Eightieth Congress be?

Will it be a shining demonstration of democracy at work—the kind of performance which will impress weary peoples abroad that we practice what we preach about representative government?

Or will it be merely the warm-up for the 1948 Presidential race with all the playing of politics that habitually has preceded such campaigns?

Will Republican and Democratic Party leaders recognize the tinder-box state of the world? Will they accept their obligation to work together in the solution of pressing domestic and international problems for the benefit of peoples everywhere?

Or will the chief aim of these party leaders be to put the other in the hole, to pass the buck, to unload responsibility—all with one purpose and one purpose alone, to get the most votes in November?

Every Member of the Eightieth Congress and every member of the Truman administration, from the President down, whose duty it is to work with Congress should ask himself such questions as the session convenes.

Now is the time—now and in the first few days of the session. It will be too late 2 or 3 months from now after interparty warfare and personal ambitions have been allowed to compile a bitter political record.

There is no doubt as to the kind of session the country will be saddled with if our political leaders are left to their own devices. The usual disposition of professional politicians is to do as little as possible and to play politics in any event. Such a disposition will be all the more pronounced in a Presidential year which sees Congress in the hands of one party and the Presidency in the hands of the other.

The timid, feeble approach to inflation is more than enough evidence of this. As everyone knows, the price spiral and all that it entails is the No. 1 domestic problem. It has ramifications which reach around the world.

Yet even though the Truman administration came up with an inadequate program of inflation control, the Republican congressional leaders would not go that far. The intent of each party in the special session was to commit itself as little as possible and to make it appear that the other party was responsible for not halting the upward rush of living costs.

Bad as it is for politics to be played on vital domestic issues, it is worse to mix Presidential campaign maneuvers into international problems. Yet clearly there are those who would not stop short of that. Already we have the announcement by the chairman of the House Foreign Affairs Committee that it is doubtful whether the Marshall plan can be fully considered by June 1.

For many citizens the question about the Marshall plan is whether it should not be in operation before April 1 if it is to be effective. Certainly it will have no chance at all if it is delayed and delayed into the future all the while the Communists are infiltrating themselves as they are throughout Europe today.

This session of Congress is an instrument of the people just as the executive branch of the Government is also an instrument of the people. Neither has any validity except as it comes from the citizens. Both will stand in judgment before the voters this year.

But the people do not need to wait until November to exert their control. They—individually and collectively through groups and organizations—can advise Congress and President alike that first things are to be put first in Washington. They can demand a higher level of political performance than they have had in Presidential election years.

They can order it and they can get it if they will use the power of public opinion.

EXHIBIT B

[From the Christian Science Monitor of January 5, 1948]

STATE OF THE NATION

(By Roscoe Drummond)

The whole atmosphere in Washington now is heavily political. A dozen Presidential aspirants, a hundred Vice Presidential aspirants are maneuvering for the inside lane. Both parties and the liberal and conservative forces within both parties are maneuvering for what they consider the most advantageous positions. The record of the President, whether supported or rejected by Congress, and the record of Congress, however much vetoed by the President, are seen as contributing major campaign ammunition for this fall.

Only if the country makes it unmistakably clear that it wants the best from Congress, not the political worst, will there be much chance of Congress giving it the best in 1948—the year of great decision.

EXHIBIT C

[From the Washington Daily News of January 6, 1948]

THE BEST POLITICS

The Eightieth Congress begins its second regular session today. It faces many tough problems, many grave responsibilities. The way it tackles the problems, the way it shoulders the responsibilities, may spell the difference between prosperity and depression for America, between peace and war for the world.

Republicans control House and Senate, and a Democrat sits in the White House. And 1948 is a Presidential election year. So there are predictions that this session of Congress will be a continual struggle for political advantage—that everything done or attempted will be influenced by partisan motives.

We do not expect Congress or the President to forget the campaign or to eschew partisanship.

But we believe the American people do expect Republicans and Democrats alike to remember that neither party can win worthwhile advantage by scheming to put the other into a hole unless the country is kept out of one.

To ask for no politics would be too much. It is not too much to ask for the kind of politics which puts the true welfare of the United States above the ambitions of any and all politicians. That is the best politics, in any year. It is the only sort of politics which seems likely to insure that, to either party, next November's election will be worth winning.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. HATCH. I yield.

Mr. SALTONSTALL. I believe I understood the Senator from New Mexico to say at one place in his remarks that he had read in a newspaper a statement that the question of foreign policy had been discussed in a Republican policy committee meeting or in a meeting of the Republican conference.

Mr. HATCH. No; that was not it. The headline or caption of the article I read was not borne out by the statement which appeared in the body of the article itself. I regret that apparently I did not make that clear. The headline said the Republican policy committee was going to meet in order to determine a Republican European recovery program.

Mr. SALTONSTALL. I merely wish to say to the Senator from New Mexico that I am a member of that committee, and I have attended most of its meetings. When I have not attended its meetings I have checked on what occurred at them. The question to which the Senator refers has never been discussed in that committee's meetings. We have not discussed foreign policy in the committee, except when we listened to the distinguished Senator from Michigan [Mr. VANDENBERG] last spring.

Mr. President, I wish to say that with much of what the Senator from New Mexico has said I am in hearty accord, and I commend him for his high ideals, for the high plane on which he has placed the question of the determination of our foreign policy, and, if there has been a misapprehension in his mind respecting the matter to which he alluded, I should want to correct that misapprehension.

Mr. HATCH. Mr. President, it was not a misapprehension on my part. I thought I made clear that the body of the article did not bear out what was said in the headline. I thank the Senator from Massachusetts for his statement.

AMERICAN DOMESTIC AND FOREIGN ISSUES—ADDRESS BY SENATOR TAFT

Mr. WHERRY. Mr. President, we have all been very much interested in the remarks which were just made by the distinguished Senator from New Mexico [Mr. HATCH]. It is the American way that Congress and the people should be given the viewpoint of all those who are to provide the leadership in the Senate and country to effect a settlement of our domestic policy, as well as our foreign policy. Senators have not only heard the great address just delivered by the Senator from New Mexico, but also heard what was said by the President of the United States at the joint meeting of the House and Senate last Wednesday, when the President delivered his message on the state of the Union.

Last night there was broadcast over the ABC network a very able address to the American people by the distinguished senior Senator from Ohio [Mr. TAFT], who also expressed his views on the great issues, both domestic and foreign, now before the American people, upon which we all desire as much light as possible. I ask unanimous consent that at this point, following the address delivered by the Senator from New Mexico, the most able address delivered last night by the Senator from Ohio over the radio be printed in the body of the RECORD.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. BARKLEY. Mr. President, reserving the right to object, I ask the Senator if he can assure us that the address in question was a nonpartisan one.

Mr. WHERRY. I can assure the distinguished Senator from Kentucky that it was just as nonpartisan as the speech delivered by the President of the United States before the joint session of Congress Wednesday and the speech just made by the distinguished Senator from New Mexico.

Mr. BARKLEY. In other words, it was delivered over the radio as part of a sort of joint debate between the President

and the Senator from Ohio, who aspires to occupy the place now occupied by the President of the United States.

Mr. WHERRY. I will say that I am in complete agreement with the Senator from Ohio——

Mr. BARKLEY. As to his candidacy? [Laughter.]

Mr. WHERRY. No; with respect to the statements made by him in his radio address. I am glad to say that I am convinced that the distinguished Senator from Ohio is one amongst many in the Republican Party who, if he were elected President of the United States, would grace the President's chair.

Mr. BARKLEY. Mr. President, let me say that far be it from me to throw a straw in his way as a candidate for the Republican nomination.

Mr. WHERRY. We on this side deeply appreciate that statement, and I hope the Senator from Kentucky will go further and say that a great man like the senior Senator from Ohio might also be acceptable to him as President of the United States.

Mr. BARKLEY. That calls for further discussion. [Laughter.]

Mr. LUCAS. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. LUCAS. I should like to ask my able friend just one question, whether or not the Senator from Ohio, in delivering his radio address last night, spoke as a candidate for the Presidency or as an individual Senator, or did he speak as a result of action taken by the Republican policy committee of the Senate?

Mr. WHERRY. Mr. President, I have not consulted with the able Senator from Ohio as to whether he spoke as a candidate, or in his capacity as chairman of the policy committee. I am, however, quite satisfied that if I were to put the question to him he would very frankly state that the views he expressed last night represented his deep convictions on the paramount domestic and national issues involved.

Mr. LUCAS. Mr. President, will the Senator yield further?

Mr. WHERRY. I will yield in just a moment. I am satisfied that the distinguished Senator from Illinois will agree with me that when it comes to a decision on a nonpartisan basis respecting our foreign policy, the cooperation of the Republican Party on these great issues can be assured. No one would deny the high purposes expressed by distinguished statesmen in presenting their views on the great issues now before the Senate and the country. Naturally, however, there are those who believe that the issues involved should be settled in accordance with the respective questions involved. My purpose in asking that the address made by the distinguished Senator from Ohio be printed in the RECORD is of a constructive nature, namely, in order that the views of the Senator from Ohio may be made available to readers of the RECORD. It is my thought that this very forcible and clear analysis of the issues should follow the able address made by the distinguished Senator from New Mexico, so the public can read the RECORD and see how these leaders present their viewpoints and offer solutions of the important problems now confronting us.

Mr. LUCAS. Mr. President, will the Senator yield further?

Mr. WHERRY. I yield.

Mr. LUCAS. I should like to say to my able friend from Nebraska that I heard on the air last night the very pleasant, refreshing, and dulcet voice of my distinguished friend, the Senator from Ohio. He speaks frequently over the air in answer to what the President of the United States has said. I wonder whether the acting majority leader, the Senator from Nebraska, would care to tell us if there is anyone else on the Republican side interested in the Republican nomination for President who sometimes may have an opportunity to answer the President of the United States, or does the Senator from Ohio have a monopoly on that privilege?

Mr. WHERRY. Mr. President, I am not speaking in behalf of any individual who may aspire to the office of the Presidency. We have in the Republican Party a number of men who might aspire to be President of the United States, who could very ably answer the President of the United States or the Senator from New Mexico, or even my distinguished friend, the Senator from Illinois, on the great issues now before us.

Mr. LUCAS. I agree with the Senator from Nebraska, and I simply wonder why answer is not made once in a while by others than the Senator from Ohio. I see in the chair, presiding over the Senate, my good friend the junior Senator from New York [Mr. IVES] who was sent to the Senate from the great State of New York. He has made an enviable and commendable record in the Senate. He comes here through the grace and good will of the distinguished Governor of New York, who, I understand, is a candidate for nomination on the Republican ticket.

The ACTING PRESIDENT pro tempore. The Chair regrets that the Chair cannot enter into the debate. The Senator from Illinois will proceed.

Mr. LUCAS. The Chair can call some other Senator from the floor to take his place and then enter the debate. That is the Chair's privilege, under the rules.

The ACTING PRESIDENT pro tempore. The Senator from Illinois is doing very nicely.

Mr. LUCAS. I thank the Senator from New York.

Mr. President, in view of the fact that there are so many outstanding Republicans mentioned as candidates for nomination for the Presidency on the Republican ticket, including the Senator from Nebraska, I have often wondered why it is that the Senator from Ohio is the only one who apparently ever answers any of the arguments which have been presented by the President of the United States. I do not think it is fair to Governor Dewey, I do not think it is fair to Governor Stassen and other distinguished individuals who are out in the open seeking nomination on the Republican ticket for the Presidency, that our distinguished friend from Ohio should consume all the time that is being taken to answer the President of the United States. As a matter of fair treatment, I am interested in Governor Dewey, and I am interested in Governor Stassen and others having an opportunity to reply to the President. I cannot understand why the distinguished Senator from Minnesota [Mr. BALL] who is my close personal friend, and the Senator from New York [Mr. IVES], who now occupies the chair, do not interest themselves to see that the candidates from their respective States or some of their capable representatives are given the privilege of answering the President of the United States. In view of the fact that the Senator from Nebraska has made much ado about the speech which was delivered last night, I thought perhaps he could throw a bit of light on that situation, because I am sure the country is more than anxious about it.

Mr. WHERRY. Perhaps I could throw a little light on it by asking the Senator from Illinois a question. The Senator from Illinois is speaking as a Vice Presidential candidate on the Democratic ticket?

Mr. LUCAS. I thank the Senator from Nebraska. I did not know he had such a warm interest in the political side of the Senator from Illinois.

Mr. WHERRY. The Senator from Illinois is much concerned about the problems of the Republican Party, but I think that party will take care of itself. I was wondering if the Senator from Illinois was not worrying about the Democratic Party, and if the needling which comes from my distinguished friend is not due, perhaps, to the fact that he also is in the limelight as a candidate—a candidate for Vice President on the Democratic ticket.

Mr. LUCAS. The Senator from Nebraska has a right to draw any assumption he desires. As usual, he reaches erroneous conclusions upon supposed facts about which he knows nothing.

Mr. WHERRY. Then the Senator is not a candidate?

Mr. LUCAS. It is slightly premature to discuss something about which the Senator knows nothing.

Mr. WHERRY. Oh, the Senator does not know anything about it?

Mr. LUCAS. While speaking of candidates, may I remind my good friend that I remember distinctly that the Senator from New Hampshire [Mr. TOBEY], in the early part of the Eightieth Congress, said on the floor of the Senate that if a reporter from the Press Gallery threw a pebble down on the other side of the aisle, whatever Republican Senator it might strike would be found to be a candidate for high office, either for the Presidency or the Vice Presidency. The Senator from Nebraska, I believe, was present and did not deny that assertion. I presume, in view of the tremendous leadership he is exerting here as the acting majority leader, that probably if such a pebble were to hit him he would become a candidate without serious protest.

Mr. WHERRY. We will let that leadership take care of itself. As far as candidates from either party are concerned, in due time they will be able to take care of themselves.

The ACTING PRESIDENT pro tempore. If the Senator from Nebraska will

permit the Chair to interrupt for a moment, the Chair will act on the request made that the address delivered by the Senator from Ohio be printed in the RECORD. Is there objection? The Chair hears none, and the address will be printed in the RECORD as requested.

The address is as follows:

ADDRESS OF SENATOR ROBERT A. TAFT, BROADCAST OVER ABC NETWORK JANUARY 8, 1948

I listened with great interest to the message of the President of the United States on the state of the Union. The message states in general terms the ideals and principles and program of the present administration. The detailed specifications for some actions have been already filled in by measures proposed, or presumably will be filled in by later messages. No one can fail to agree with most of the ideals expressed by the President. No one can fail to agree with his general desire to bring about improved conditions in this country and throughout the world. No one can fail to agree with the five goals which he seeks. We all join with him in wishing the country a happy new year and a happy new 10 years, happier than the 15 years of New Deal administration.

But when the President comes to fill out the measures by which he hopes to accomplish this happiness and these great purposes, while he still speaks in general terms, we see that, under the guise of American ideals the old New Deal has been revived in a more global form than ever before. In this message the Federal Government comes forward as Santa Claus himself, with a rich present for every special group in the United States, and for everyone else who may not be included in any special group.

If anyone has expressed a desire in a letter to Santa Claus, that desire is to be promptly fulfilled.

One cannot but feel that the recent announcement of Mr. Henry Wallace has had a substantial effect on the state of the Union. Henry himself will have a hard time to find anything to promise the people of this country which is not promised in this message.

The President is apparently determined that the right wing of the American Labor Party and its labor union friends throughout the country shall be bound to him and shall have no excuse to stray into the Wallace camp. He has raised all the ghosts of the old New Deal with new trappings that Tugwell and Harry Hopkins never thought of.

The first point that occurrs to me is that the New Deal administration has been in control of this Government for 15 years. If the country is crying for all these improvements in social welfare and every other field, what has the New Deal administration been doing for 15 years? They demanded and obtained from Congress infinite power so great that President Roosevelt said it would only be safe in his hands and not in those of the Republicans. They demanded and received huge sums of money. Plenty of that money was spent, but apparently little was accomplished. The President admits it. He says our social-security system has gaps and inconsistencies and is only half finished. As a matter of fact, the old-age-insurance system is utterly and completely inadequate. Today, men who have contributed to that system all their lives receive less in their old age than many receive from old-age assistance who have contributed nothing.

The President says there is still "lack of provision for the Nation's health," and "that most of our people cannot afford to pay for the care they need." This is a gross exaggeration, but what has the New Deal been doing with all our money?

He says that millions of children do not have adequate schoolhouses or enough teachers, and that millions of our youth live in city slums and country shacks. Surely, this is a more severe indictment of the Roosevelt administration than any Republican has made, for that administration had more power and more money to accomplish its purposes, widely advertised for political effect, than any administration in the history of the United States.

Of course, the problem is not so simple as that. An improvement in social and economic welfare depends on intelligent planning, wise leadership, sound principles, and sound constructive work. Those we have not had. Both parties—and Henry Wallace—wish to improve the condition of the people in the United States. That can be the only aim of anyone truly interested in government. The Republican Party is just as much concerned as Mr. Truman with speeding up and stabilizing the great economic machine which creates prosperity for this country. It wishes to adopt those measures which will bring the greatest good to the greatest number of people, and then alleviate the condition of the few who, through misfortune, may not benefit from that prosperity. There are few indeed in public life who have the slightest interest in whether a few rich men prosper or do not prosper, whether corporations make profits or don't make profits, except as their status may affect the people of the country and the welfare of their employees. There are few indeed who don't equal the New Dealers in their sincere and earnest desire for uplift and progress in America.

But we do question the effect of New Deal measures and philosophy. Most of their plans are more likely to interfere with prosperity than they are to bring it about, first, because they ignore the fundamental economic principles necessary for prosperity, second because they promise something for nothing, and third because they ignore the vital necessity of maintaining the principles of freedom and justice to which they give a general lip service. Measures which destroy the freedom of the individual, freedom of States and local communities, freedom of the farmer to run his own farm and the workman to do his own job, in the end do more harm than good, even to those supposed to be benefited. Measures which reduce the field in which the free competition of private enterprise can operate, reduce both freedom and production. Measures which ignore justice for social ends destroy the fundamental purpose of the American Government.

The first principle of the New Deal was the spending of money. This message, in tax recommendations, admits that taxation is already too heavy on millions of people. Yet, strangely enough, the message proposes additional expenditures far beyond the $40,000,000,000 which is said to be included in the budget still to come. Nothing is said of additional taxation to take care of all the handouts that are proposed. The people are to get something for nothing from dear old Santa Claus.

What are these proposals likely to cost? They are so vague it is impossible to do more than make an intelligent guess. The level of benefits is to be raised for all unemployment compensation, old-age benefits, and survivors benefits. In years to come this would amount to billions of dollars, mostly to be collected from employers, employees, and general taxation.

The national health insurance system, which is not insurance at all, but the providing of free medical care to all the people of the United States, would require taxes, probably pay-roll taxes, in the neighborhood of four or five billion dollars a year.

The President says: "Our ultimate aim must be a comprehensive insurance system to protect all our people equally against insecurity and ill health." This seems to be a kind of catch-all Beveridge plan for the United States which would take about 18 percent of pay roll, or about $20,000,000,000 (including health insurance and present levies for old-age insurance and unemployment compensation). Of course, it would be taxation, not insurance.

The various proposals for aid to education are vaguely stated, but I would guess they might amount to a billion dollars a year. The housing program might cost two hundred million. From the message we cannot judge the estimate of the additional public works, but the reclamation program is to be expended, although the Republican Congress in 1947 appropriated more money than has ever been appropriated before in a single year. In some manner not defined, the average income of farmers is to be raised well above that which exists at present. Any such agricultural program as the President seems to envision will certainly take cash from the Federal Treasury in large hunks. More money is asked for the school-lunch program, the electrification program, the soil-conservation program, and adequate diets for every American family.

Then in the field of foreign affairs we come to the Marshall plan, involving about $3,000,000,000 a year more than we are now spending, but apparently included in the new budget. The President states that we must maintain strong armed forces and must add to our present system at least compulsory universal military training. The cost of that is estimated anywhere from two billion to four billion dollars. The President's Air Commission is about to recommend an increase of $2,000,000,000 a year in the expenditures for our Air Force. If war with Russia is our present concern, then certainly the Air Force is going to play a much more effective part both in defending this country and attacking Russia than universal military training.

Altogether, I would estimate that if we follow the President's recommendations we would spend almost at once $10,000,000,000 a year more than we are now spending, with later increases to come. Where is this money coming from? We raise today about $20,000,000,000 from the personal income tax. If we want to get the money from that personal tax, we will have to increase it by about 50 percent. Since you can't increase by 50 percent the taxes of the wealthy, who pay 80 percent already, most of the burden will have to fall on the lower- and middle-income groups. If the money is collected from more pay-roll taxes, it will certainly fall on the lower incomes. If more business taxes and taxes on corporations are levied, they are paid in the last analysis by individuals, through higher prices or otherwise. So in one way or another the 60,000,000 workers in this country are going to pay those additional taxes, either directly or through a further increase in prices. In short, the President is simply following the old New Deal principle of promising the people something for nothing without telling them of the real cost. I do not mean to say that all the features of the President's program are to be condemned. I only point out that taken together they add up to national bankruptcy.

The President in some parts of his message compares the condition of our people favorably with 1938, incidentally in the midst of a New Deal depression. At other points he pictures the condition of our people as about equal to what prevails in Russia. What have we got for all the New Deal spending of the past 15 years, except taxes and rising prices and war? Now the President talks about a new 10-year plan, doubling Joe Stalin's bid. What reason have we to think that the social welfare of our people would improve any more in the next 10 years than it has in the last 15 years?

The other feature of the message which stands out is the New Deal request for more power and more interference with the daily lives of the people. The message asks again for rationing, for price control, for wage control, and for complete power to allocate the products of industry.

It asks again the power to draft 1,200,000 boys a year out of their homes and schools and trades and professions into military training.

It asks again for power to socialize and nationalize medicine. Under the President's health program three or four billion dollars would pour into Washington from pay-roll taxes or other taxes to be used by a Washington bureau to pay all the doctors in the United States to give free medical service to all the people in the United States. That means, in effect, that all the doctors would become employees of the Federal Government. It means that the Government by regulation would determine when any family could have a doctor come to his home, and when they would have to go to the clinic or the hospital, whether they could have X-ray treatments or special medicine and the whole character of their medical treatment. Certainly, nothing could more intrude into the freedom of the American family than Government medicine of this kind.

Throughout the message all the emphasis is on action by the Federal Government. Not a word is said anywhere of preserving the power of the States and local communities to improve their own affairs or direct their own education, health, welfare, and housing. The message follows the standard New Deal line that places all power in Washington bureaus. If we destroy the independence of our communities, I don't believe we can retain any real popular freedom in a country the size of the United States. Again, I do not mean to condemn all of the projects. I only point out that taken together they will add up to a totalitarian state.

The Truman plan for control and rationing would leave about as much freedom in this country as Stalin's 5-year plan has left in Russia. Not only do control measures destroy freedom, but they don't get the results. President Truman himself said that rationing and price control are police state methods. Such methods won't work in the United States in peacetime, as we saw under OPA. They can't be enforced. Black markets spring up overnight.

If these controls could be enforced they would stifle production as they have in Europe and did here—and more production is the ultimate solution. Freedom and free competition made America the greatest producer in the world; and have made it possible for us to help Europe. The President shows no sense of the real causes of inflation. Prices go up when there is more money to buy things than there are things to buy. We are producing more today than ever before, but the Government has created still more paper dollars. The ultimate solution of inflation is to increase production and that is what controls always prevent. Then, while you are increasing production, you have to cut down spending; and that is what price control has always encouraged.

The President doesn't say a word about the need for economy. He claims credit for cutting the budget from 63 billion in the fiscal year 1946 when we were engaged in war against Japan, to 38 billion 2 years later when we are in peace. Not much credit in that. In 1948 we are still spending four times what was ever spent before the war.

The first step to stop spending is for the Government to stop spending. That will set an example and enable it to get some cooperation from the people so that they can spend less and save more. The biggest inflationary element has been the export of goods and services in 1947 up to $18,000,000,000 against only $8,000,000,000 of imports. Ten billion dollars came in here, mostly loaned by us, to compete with our citizens for goods and services produced here. Of course prices have gone up. Of course wheat is at $3 a bushel. The President had full power to limit exports, but he hasn't used the power and he doesn't say a word about using it in his message.

Furthermore, the administration let bank loans increase in a year by $5,000,000,000, creating that many more paper dollars, and failed to use the powers it has always had to restrict bank credit. The President doesn't say a word about any of these American methods of preventing inflation.

Outside of controls, his only suggestion is that taxes must remain high. Our tax burden today is about $40,000,000,000. With the State and local taxes, it amounts to about 30 percent of our national income. This cost of Government is a burden on the other 70 percent of the productive workers. The tax burden is passed on for the most part into higher prices paid by every consumer for the food, clothing, and shoes that he buys. Less Government spending and less taxation are the most obvious of the methods of dealing with the price situation. The President recognizes that taxes are unbearably high and proposes a credit of $40 to each individual taxpayer plus $40 for each dependent. This will take about 11,000,000 taxpayers off the rolls altogether. It is equivalent to a $200 additional exemption for persons in the low-income groups and less than $50 additional exemption for those in the higher groups. It is about as discriminatory a proposal as could be made, and if followed to its logical conclusion will ultimately exempt a large proportion of all income and shift all taxes into a very small proportion of the population. Up to now we have gone on the theory that each citizen owes an obligation to his Government to contribute according to his means.

The President says a straight tax reduction would be inflationary, but if so, his proposal is equally inflationary at this crucial time because the reduction takes effect at once, whereas the proposed increase in corporation taxes won't be paid until 1949. In any event it is the total tax burden which increases prices, and that the President refuses to lower.

Of course, the increase in corporation taxes from 38 to 50 percent is another discouragement to any increase in production needed for full employment and lower prices. New enterprises are less likely to be started if persons feel that the Government is going to take half the possible profits. Of course, many new enterprises fail and the people who start them lose all the money they have put in. It would be "heads you win, tails I lose." In one place in his message the President says: "We are today far short of the industrial capacity we need for a growing future. At least $50,000,000,000 should be invested by industry to improve and expand our productive facilities over the next few years." In his midyear economic report last July the President said: "High corporate profits have provided funds for a substantial proportion of the heavy volume of business investment during the first half of 1947."

How does the President expect business to make this great investment of $50,000,000,000 if taxes take away the profits and makes it unprofitable for new money to go into business? It is estimated today that it costs $6,000 of new investment to create one new job in industry. If we want to keep full employment going, that investment must continue. I suppose it is smart politics to take money out of corporation profits and divide it up among the voters at $40 a head, but sometimes I doubt whether smart politics is smart.

Twice last year President Truman vetoed tax reduction bills on the pretense that they would increase inflation. Now in a message in which he says inflation is worse, he asks for tax reduction. Probably you will get tax reduction now, but what about the reduction you were entitled to last year and didn't get? The President has followed the prediction of every Member of Congress, newspaper correspondent, and radio commentator. They all said that Truman vetoed the tax bills last year because of Republican sponsorship and that he would try to get credit this year—election year—for cutting taxes. It looks to me like playing politics with your money.

The Republican Congress proposes to go on with its program. It has consistently given the President all the powers he needs to stop inflation by American methods. We have given him everything except the OPA and wage fixing and rationing, police-state methods. All the important powers he has had ever since the war, but he hasn't used them. It doesn't look as if he wanted to reduce prices. Whenever any food price starts going down, or even threatens to go down, some Government department steps in and starts buying to keep up the price.

We will make every effort to cut Government expenditures, and really cut all taxes and the tax burden, and cut them for good.

We will scrutinize every expenditure, including the Marshall plan, so that it may include nothing which is not absolutely necessary.

We will proceed with a program of social welfare in health, education, and housing and social security. But our program will be based on State and local administration and control, and Federal aid in reasonable sums will be limited to those fields where the States and communities cannot adequately do the job which ought to be done, for the benefit of those of our population who cannot earn their own way. We will insist upon sound fiscal policies to keep the economic machine running at full speed to provide employment and prosperity on a permanent basis. We will work out our program of progress along those American lines, within the principles of freedom and justice which we followed for 150 years, and which have made this country the happiest on the face of the globe.

Mr. CHAVEZ. Mr. President, will the Senator from Nebraska yield?

Mr. WHERRY. I yield.

Mr. CHAVEZ. I am glad to enter into the debate. I think the request made by the Senator from Illinois was a fair one. I believe the American people are entitled to know from the candidates representing both parties how they stand on the important issues of the day. I also believe that those who are candidates for other offices than that of the Presidency, including the Vice Presidency, should make known their views to the people.

Mr. President, in order that there shall be no misunderstanding, so far as I am concerned, I wish to make one statement. I do not know whether the Senator from Illinois is a candidate or not. If he is, I think he should speak out for himself. But right now, so far as the Democrat who is now addressing the Senate is concerned, I am for Secretary Marshall, and for no one else.

Mr. WHERRY. As the debate proceeds we receive a number of ideas, and we are all glad to have them.

Mr. TOBEY. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. TOBEY. I beg of Senators not to begin enumerating the names of prospective candidates for President and Vice President. If that is done, we shall not get through until the early hours of the morning.

Mr. WHERRY. Mr. President, I am very glad to yield the floor, so that the able Senator from South Carolina may address the Senate.

IMPORTATION OF JAPANESE TEXTILES

Mr. MAYBANK. Mr. President, I ask unanimous consent, on behalf of the senior Senator from Georgia [Mr. GEORGE] and myself, to have printed in the RECORD an article entitled "Jap Cottons Head for United States Market," published in the Journal of Commerce of January 8, 1948. I intend to speak at length on this subject, because it affects the textile mills of New England and the South, the cotton farmers, and the textile workers throughout the United States.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JAP COTTONS HEAD FOR UNITED STATES MARKET

(By Daniel Small)

For the first time since before the war, Japanese cotton textiles are to be made available for sale to domestic users. Prices will be competitive with comparable constructions in the domestic market, it was learned yesterday.

Civil affairs officials of the Department of the Army in Washington confirmed that cotton goods no longer need be brought here for reexport only but will be sold in the American market. This decision to remove domestic restrictions was reported to have been arrived at after joint conversations between Army, Agriculture, and State Departments.

RAYONS, SILKS IMPORTED

Under previous arrangements only rayon-finished fabrics, raw silk, silk habutai had been permitted entry for use in this country. Cotton goods of all descriptions have been traded through United States firms, but have been only for export to other countries either directly from Japan or by passing through this country.

At present, it was learned, about 2,000,000 yards of Jap cotton goods have been passing through the United States in bond each month. Government officials agreed that this figure could be easily increased and some spoke in terms of reaching about 10,000,000 yards per month for use in this country.

Government officials believe that the goods now in bond, which include sheetings, poplins, print cloths, and other cheap carded constructions may be made immediately available for sale in this market although they had been brought here with the intention of reexporting them.

Although some Army spokesmen declared that the quality of most of these goods was too poor to attract much attention in this market, private traders who have been surveying the Jap industry recently stated that quality is far better than before the war, inspection is up to American standards in most instances and constructions can easily be made suitable for the American market if SCAP officials in Tokyo decide to really shoot for sales here.

BETTER FINISHES

In certain types of finishing, the Japs have also advanced considerably over prewar standards, traders asserted, and finished goods may also be adapted to American needs if this business is found desirous.

The decision to permit Jap cottons to be sold here has been made over heavy opposition from United States millmen who remember vividly the flood of cheap Jap goods which were endangering domestic manufacturers in the years immediately preceding Pearl Harbor.

This opposition has come from many industry spokesmen and because of them it was understood that at least one of the departments whose approval was needed has held up the decision until now.

RESULT OF STEADY PRESSURE

The pressure to permit such a move has been building up steadily, however, and the final decision in the form of a new directive should be issued shortly, it was reported yesterday.

In view of the fact that cotton goods have been scheduled as the principal export item for Japanese industry, SCAP has been hard-pressed to secure sufficient dollars to keep this industry going and the sale of textiles here has presented itself as the most obvious method, it was pointed out.

With the Jap industry depending largely upon American cotton to keep it going, the need for American dollars has become acute at times. In order to obtain these dollars, even cottons for reexport have been sold only to those countries which could pay for them in dollars. It has become increasingly difficult in recent months to find sufficient dollars to pay for all of the Jap textiles available, although world demand for textiles is still very great.

REVISING PRICES

In order to bring cotton goods into a more salable position in the domestic market, it was understood that SCAP officials in New York are revising price lists to bring quotations more into line with those of selling houses in the Worth Street market. These new price lists will probably supersede the current ones which were prepared by USCC some time back.

The revisions will mean that some prices will be brought up while others will be reduced somewhat. Currently, private traders are quoting such prices as the following for goods to be shipped from Japan to the country of destination. These prices include C & F plus a profit of about 3 percent on gray goods but do not include a duty of about 15 percent which would have to be added on most types of cloth if sold here:

For a 38-inch 64-by-56 5.19-yard print cloth, 21 to 21¼ cents.

Thirty-eight-inch 60-by-48 5.72-yard print cloth, 19 to 19¾ cents.

Thirty-seven-and-one-half-inch 100-by-60 broadcloth, 28½ cents.

Thirty-six-inch 45-by-44 3.30-yard sheeting, 27½ cents.

Thirty-inch 70-by-48 drill, 24¼ cents.

Thirty-inch 131-by-71 combed broadcloth, 54¾ cents.

While some of these prices will be revised they can be considered fairly indicative of prices which will be quoted here with a duty of from 2 cents to 4 cents added to most staple constructions.

Mr. MAYBANK. The newspaper story which appeared in the Journal of Commerce of New York in the issue of January 8, 1948, announced the decision of the Departments of State, Agriculture, and the Army to authorize the sale of Japanese textiles in this country.

I have been much interested in this subject since the beginning of the rehabilitation of Japanese industry, when the distinguished senior Senator from Georgia [Mr. GEORGE] asked me to serve on a subcommittee to study the plan for sale of American raw cotton to the Army for use in making cotton cloth in the Japanese industry.

At that time it was generally agreed that none of the cloth made from American cotton would be sold back in this market. The reason for such a provision was simply that every yard of Japanese-made cloth which is sold in the United States would obviously replace a yard made in this country and would therefore reduce the domestic market for American cotton and reduce the jobs for American textile workers just that much.

It was my hope, and that of my distinguished colleagues who served on the subcommittee with me, that in rehabilitating the Japanese industry that our efforts would result in restoring the normal and natural markets of the Japanese in the Orient, where they are sorely needed, rather than in dumping Japanese goods on the American market.

I am particularly surprised, therefore, and deeply concerned, to read the announcement currently made that these three departments of the Government of the United States, without exhausting the possibilities of sale of products made in this captive country in its normal oriental markets, where the Japanese goods are greatly needed, are suddenly dumping them here in the United States, where there is much less need for them and where their only effect will be to demoralize the American market.

It should be remembered that never in the past have textiles from Japan been sold in this market successfully except when sold at a cut price. They are relatively inferior to our American textiles.

Mr. President, I am deeply sympathetic with the problem which those who operate the Japanese industry find in locating a market which will pay United States dollars for Japanese textiles. We all know that, if the Japanese industry is to use American raw cotton, it must pay United States dollars for our cotton, for our American farmers cannot and should not accept any other payment except United States dollars for the cotton which they sell. However, in my judgment, those who sell Japanese textiles can find dollar markets in the Orient in the very markets which were formerly normal Japanese markets. We know that our American industry is selling American textiles in export and in quantities far exceeding the proposed Japanese exports; and with modern merchandising methods our industry is finding many times the dollars which the Japanese need for the purchase of American cotton. It seems to me that it is simply a question of expert merchandising and selling to private interests in the export market, concerns which historically and professionally have bought and sold world textiles, including Japanese textiles.

Mr. President, I submit that probably the principal reasons for the failure of our governmental agencies to exhaust the normal market resources in the Orient are the inability of any army to convert itself into a skilled expert merchandising organization; the tendency of a government department, inexperienced in selling, to seek the easy, simple method of allocating goods to countries rather than selling them to private interests which operate professionally in the field, and possibly the attitude of our allies who have interests in the oriental markets, and who may be reluctant to cooperate with us in the rehabilitation of Japanese industry, which we as lovers of democracy know is absolutely necessary for the peace and security of the world.

As a Senator from a cotton-producing and manufacturing State, I am unwilling, without raising my voice in protest, to stand by and see departments of our

Government plan to jeopardize the interests of the cotton farmers of America and the jobs of the cotton-mill workers of our country by encouraging a flood of goods made by a captive industry in our domestic market.

Our textile workers cannot compete for the world market against the cheap wages of the Japanese workers, and we cannot help our American cotton farmers by bringing their cotton which is sold in foreign markets back into the American market to compete with the American cotton which is sold here.

At the outset the Japanese volume may be relatively insignificant, but when we let down the bars and establish a precedent, there is no telling how fast it will grow. Furthermore, Mr. President, if the Japanese demonstrate that they can find American dollars here at the expense of the American market, it will encourage every other impoverished nation in the world to do likewise, and we shall soon reduce our domestic market to a veritable hodge-podge of foreign merchandising throat-cutting which will demoralize the nearest, biggest, and best market which the American farmer has for his cotton, and the result will be a steady elimination of thousands of jobs of our American textile workers.

Mr. President, our Department of State and our Army may, if they wish, publicly show their compassion for the foreign governments which wish to keep the Japanese from reclaiming their oriental markets and force them into our own domestic market; but as for me, my compassion is for the American cotton farmer and the American textile worker, both of whom merit our full sympathy and protection.

Therefore, Mr. President, I wish to voice my protest against the announced determination of these three governmental departments. I insist that before taking such a step they should first exhaust every market resource in the areas where Japanese goods have always in the past found their natural markets.

In conclusion, I remind the Army, the State Department, and the Congress that it was our American textile mills which clothed the armies of all the Allies during the recent war. They furnished the cloth and much of the machinery needed in that branch of the war effort. They furnished the materials for tents for the armies of our allies and materials required by paratroops. The importation into this country of Japanese goods made from American cotton supplied by the Commodity Credit Corporation can have but one result, and that is to depress and destroy our textile industry, causing the loss of thousands of our good textile workers, and ruining an industry which, as I have said, clothed our allies in the war which has just ended.

Mr. HOEY. Mr. President, will the Senator yield?

Mr. MAYBANK. I yield.

Mr. HOEY. I wish to associate myself with the distinguished Senator from South Carolina in the views which he has just expressed. I think it is important to this country and vital to the cotton industry—both the producers of cotton on the farm and the manufacturers, as well as those who work in the mills—that our market be preserved. I think it is a mistaken policy to undertake to permit Japan to unload her manufactured goods on the American market in competition with the products of our own manufacturers. I believe that nothing but detriment would result, both to our producers and to our manufacturers, as well as to those who work in the mills. I am glad the Senator has presented this subject fully, and I heartily endorse what he has said.

Mr. MAYBANK. Mr. President, I greatly appreciate what the Senator from North Carolina has said. I remind my friends across the aisle that the great textile industry of New England will suffer severely when these Japanese goods enter our market.

INVESTIGATION OF THE APPOINTMENT OF POSTMASTERS

Mr. LANGER. Mr. President, from the Committee on Post Office and Civil Service, I report favorably Senate Resolution 186, and ask unanimous consent for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be read for the information of the Senate.

The resolution (S. Res. 186) submitted by Mr. LANGER on January 7, 1948, was read, as follows:

Resolved, That the last paragraph of Senate Resolution 81, Eightieth Congress, agreed to June 17, 1947 (authorizing an investigation of the appointment of postmasters), is hereby amended by striking out the date "January 15, 1948" and inserting in lieu thereof the date "February 28, 1948."

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. LANGER. Mr. President, I offer an amendment, in line 5, to strike out "February 28, 1948," and insert in lieu thereof "March 31, 1948."

At the time the investigation was ordered the expiration date for the making of a report was January 15, 1948. I may add that the overwhelming majority of the nominations of postmasters have already been reported and confirmed. There is some additional work to do with respect to approximately 37 nominations. A little time will be required to complete the work.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from North Dakota.

The amendment was agreed to.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution as amended.

The resolution as amended was agreed to.

ADJOURNMENT TO MONDAY

Mr. WHERRY. Mr. President, there apparently being no further business to come before the Senate at this time, I move that the Senate adjourn until Monday next, at noon.

The motion was agreed to; and (at 1 o'clock and 35 minutes p. m.) the Senate adjourned until Monday, January 12, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 9, 1948:

DEPARTMENT OF STATE

George V. Allen, of North Carolina, to be an Assistant Secretary of State.

DIPLOMATIC AND FOREIGN SERVICE

John M. Cabot, of Massachusetts, now a Foreign Service officer of class 1 and a secretary in the diplomatic service, to be also a consul general of the United States of America.

The following-named persons, now Foreign Service officers of class 3 and secretaries in the diplomatic service, to be also consuls general of the United States of America:

Wilson C. Flake, of North Carolina.
Nelson R. Park, of Colorado.
Carl W. Strom, of Iowa.
William T. Turner, of Georgia.

Glen W. Bruner, of Colorado, now a Foreign Service officer of class 4 and a secretary in the diplomatic service, to be also a consul of the United States of America.

The following-named persons, now Foreign Service officers of class 5 and secretaries in the diplomatic service, to be also consuls of the United States of America:

C. Vaughan Ferguson, Jr., of New York.
Delano McKelvey, of the District of Columbia.

The following-named Foreign Service reserve officers to be secretaries in the diplomatic service of the United States of America:

William L. Hamilton, Jr., of Iowa.
James L. Meader, of New York.

The following-named Foreign Service staff officers to be consuls of the United States of America:

Linton Crook, of Alabama.
Philip Ernst, of New York.
George F. Kelly, of Massachusetts.
L. Pittman Springs, of the District of Columbia.

Leslie A. Wheeler, of the District of Columbia, for appointment as a Foreign Service officer of class 1 and a secretary in the diplomatic service of the United States of America.

The following-named persons for appointment as Foreign Service officers of class 3, consuls, and secretaries in the diplomatic service of the United States of America:

Bernard Gufler, of Washington.
Oscar W. Meier, of Maryland.

The following-named persons for appointment as Foreign Service officers of class 4, consuls, and secretaries in the diplomatic service of the United States of America:

Francis O. Allen, of Pennsylvania.
Bryant Buckingham, of Illinois.
Wesley C. Haraldson, of Virginia.
John B. Holt, of Maine.

DEPARTMENT OF THE NAVY

Mark Edwin Andrews, of Texas, to be Assistant Secretary of the Navy.

FEDERAL POWER COMMISSION

Burton N. Behling, of the District of Columbia, to be a member of the Federal Power Commission for the remainder of the term expiring June 22, 1952.

FEDERAL COMMUNICATIONS COMMISSION

Wayne Coy, of Indiana, to be a member of the Federal Communications Commission for the unexpired term of 7 years from July 1, 1944, to which office he was appointed during the last recess of the Senate.

George E. Sterling, of Maine, to be a member of the Federal Communications Commission for the unexpired term of seven years from July 1, 1943, to which office he was

appointed during the last recess of the Senate.

HOUSING EXPEDITER

Tighe E. Woods, of Illinois, to be Housing Expediter, to which office he was appointed during the last recess of the Senate.

FEDERAL HOME LOAN BANK BOARD

J. Alston Adams, of New Jersey, to be a member of the Home Loan Bank Board for the term expiring June 30, 1950, to which office he was appointed during the last recess of the Senate.

William K. Divers, of Ohio, to be a member of the Home Loan Bank Board for the remainder of the term expiring June 30, 1951, to which office he was appointed during the last recess of the Senate.

WAR ASSETS ADMINISTRATION

Jess Larson, of Oklahoma, to be War Assets Administrator, to which office he was appointed during the last recess of the Senate.

Rear Adm. Paul L. Mather, United States Navy, retired, to be Associate War Assets Administrator, to which office he was appointed during the last recess of the Senate.

SUPERINTENDENT OF THE MINT

George B. Gillin, of San Francisco, Calif., to be Superintendent of the Mint of the United States at San Francisco, Calif., in place of Neal H. Callaghan, deceased.

COLLECTOR OF INTERNAL REVENUE

Walter R. Sturr, of Florida, N. Y., to be collector of internal revenue for the fourteenth district of New York, in place of Harry M. Hickey, resigned.

COLLECTOR OF CUSTOMS

Joseph A. Ziemba to be collector of customs for customs collection district No. 39, with headquarters at Chicago, Ill. (Reappointment.)

Alden H. Baker, of Noblesville, Ind., to be collector of customs for customs collection district No. 40, with headquarters at Indianapolis, Ind. (Reappointment.)

Elaine Beadling to be collector of customs for customs collection district No. 12, with headquarters at Pittsburgh, Pa. (Reappointment.)

UNITED STATES PUBLIC HEALTH SERVICE

The following-named candidates for appointment and promotion in the Regular Corps of the Public Health Service:

To be senior surgeon (equivalent to the Army rank of lieutenant colonel), effective January 5, 1948:

Jack Masur

To be surgeon (equivalent to the Army rank of major), effective January 5, 1948:

Robert L. Cherry

Senior surgeon to be temporary medical director (equivalent to the Army rank of colonel), effective January 5, 1948:

Jack Masur

Surgeon to be temporary senior surgeon (equivalent to the Army rank of lieutenant colonel), effective January 5, 1948:

Robert L. Cherry

The following-named candidates for promotion in the Regular Corps of the Public Health Service:

Senior assistant dental surgeon to be dental surgeon (equivalent to the Army rank of major), effective December 24, 1947:

Herbert A. Spencer, Jr.

Senior assistant surgeon to be temporary surgeon (equivalent to the Army rank of major), effective December 24, 1947:

Herbert Tabor

Assistant surgeons to be temporary senior assistant surgeons (equivalent to the Army rank of captain), effective December 24, 1947:

Elroy G. Burgwald

John H. Miller

(The above-named officers were appointed during the last recess of the Senate.)

COAST AND GEODETIC SURVEY

The following-named employees of the Coast and Geodetic Survey to the positions indicated:

To be ensigns in the Coast and Geodetic Survey, from the dates indicated:

Eugene W. Richards, December 20, 1947.
Samuel D. Parkinson, December 30, 1947.
Harrison F. Dunbrook, January 7, 1948.

UNITED STATES ATTORNEY

Percy C. Fountain, of Alabama, to be United States attorney for the southern district of Alabama, vice Albert J. Tully, term expired.

UNITED STATES MARSHAL

Felipe Sanchez y Baca, of New Mexico, to be United States marshal for the district of New Mexico. (Mr. Baca is now serving in this office under an appointment which expired October 1, 1947.)

IN THE NAVY

Capt. Homer N. Wallin, United States Navy, for temporary appointment to the grade of rear admiral in the Navy.

The following-named staff officers for appointment to the permanent grade of rear admiral in the Navy:

OFFICERS OF THE SUPPLY CORPS

Capt. Howard M. Shaffer

OFFICERS OF THE CHAPLAIN CORPS

Rear Adm. William N. Thomas
Capt. Thornton C. Miller

OFFICERS OF THE DENTAL CORPS

Rear Adm. Alfred W. Chandler
Capt. Spry O. Claytor

The following-named staff officers for appointment to the temporary grade of rear admiral in the Navy:

OFFICERS OF THE MEDICAL CORPS

Rear Adm. Herbert L. Pugh
Capt. Bertram Groesbeck, Jr.

OFFICERS OF THE SUPPLY CORPS

Capt. Howard M. Shaffer
Capt. Herbert C. Lassiter
Capt. John Ball

OFFICERS OF THE DENTAL CORPS

Capt. Clemens V. Rault

Midshipman John C. Shannon (Naval Academy) to be ensign in the Supply Corps of the Navy from the 6th day of June 1947 in lieu of appointment as ensign in the Navy as previously nominated and confirmed.

The following-named (Naval ROTC) to be ensigns in the Navy from the 6th day of June 1947:

Charles R. Mischke
Charles B. Teal

Jerry W. Bates to be an ensign in the Navy from the 6th day of June 1947 in lieu of appointment as ensign in the Supply Corps of the Navy as previously nominated and confirmed.

Edward F. Krueger to be an ensign in the Civil Engineer Corps of the Navy from the 4th day of June 1948 in lieu of appointment as ensign in the Navy as previously nominated.

The following-named (civilian college graduates) to be lieutenants (junior grade) in the Medical Corps of the Navy:

Lowell K. Cunningham	Robert W. Jessee
	Lee W. Stewart

James H. Harris

Marshall V. Perry (civilian college graduate) to be an ensign in the Civil Engineer Corps of the Navy.

The following-named (civilian college graduates) to be ensigns in the Supply Corps of the Navy:

Thomas H. Boothman	Fred L. Cofer, Jr.
James C. Carroll	Charles R. E. Deily
Earl F. Liebtag, Jr.	William D. Warne
Harold H. Reichert	

The following-named (civilian college graduates) to be lieutenants (junior grade) in the Civil Engineer Corps of the Navy:

Robert C. Doerpinghaus
William E. Nims

Patricia L. Ratcliffe to be ensign in the Nurse Corps of the Navy in lieu of ensign in the Nurse Corps of the Navy as previously nominated and confirmed, to correct spelling of name.

The following-named officers of the grades indicated in the line of the Navy:

COMMANDER

William L. Eagleton

LIEUTENANT COMMANDERS

Roger VanN. Powelson
Gerald V. Reynolds

LIEUTENANTS

Harold M. Gutekunst
Dick M. Wheat

The following-named officers to the grades indicated in the Medical Corps of the Navy:

LIEUTENANT COMMANDERS

Joseph A. Forte, Jr.
Henry W. Miller

LIEUTENANTS

Alfred J. DelRey
Dominic A. Kuljis

LIEUTENANTS (JUNIOR GRADE)

Jay S. Broadbent	John M. Jones
Carleton J. Brown	James M. Keirman
David M. Butler	Jay R. Longley
Richard B. Connor	John S. Neill
Kevin A. Doyle	John M. Packard
Adolphus W. Dunn	Bernard H. Pender
John G. Esswein	Robert W. Ratton
Frederick L. Evans	Stanley E. Reese
Mack M. Hill, Jr.	Lawrence F. Smith

The following-named officers to the grades indicated in the Dental Corps of the Navy:

LIEUTENANT COMMANDERS

John E. Carson
John R. Wible

LIEUTENANTS

William J. Harrison	Grant A. MacLean
James F. Keenan	Joe A. Teaff

LIEUTENANTS (JUNIOR GRADE)

Malcolm E. Boone	Charles E. Oxar
William J. Carter	Eugene P. Weigand, Jr.
Blayne A. Gumm	

The following-named officer to the grade indicated in the Medical Service Corps of the Navy:

LIEUTENANT COMMANDER

William P. Briggs

The following-named officers to the grades indicated in the Nurse Corps of the Navy:

LIEUTENANTS (JUNIOR GRADE)

Gladys LaV. Kennedy
Ruth C. Vickers

SENATE

MONDAY, JANUARY 12, 1948

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Lord Jesus, we need Thy power, obtained through prayer, to solve problems, decide issues, and to do Thy will. But let us not imagine that this formal prayer can take the place of private petition. May there arise from every desk

the silent prayer that seeks to know Thy will. We long for such guidance that when a thing is right, we shall all know it; and when it is wrong, it will not be proposed. We would not run away from truth, but find a refuge in it. We would not avoid the discipline of hard thinking, but deliver us, O Lord, from wrong thinking that leads to wrong conclusions. Guide us this day, for Thy mercy's sake. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
President pro tempore,
Washington, D. C., January 12, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. WILLIAM F. KNOWLAND, a Senator from the State of California, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. KNOWLAND thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Friday, January 9, 1948, was dispensed with, and the Journal was approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the Senate by Mr. Miller, one of his secretaries.

ATTENDANCE OF SENATORS

HUGH BUTLER, a Senator from the State of Nebraska; HOMER E. CAPEHART, a Senator from the State of Indiana; SHERIDAN DOWNEY, a Senator from the State of California; ALLEN J. ELLENDER, a Senator from the State of Louisiana; J. WILLIAM FULBRIGHT, a Senator from the State of Arkansas; J. HOWARD MCGRATH, a Senator from the State of Rhode Island; BRIEN MCMAHON, a Senator from the State of Connecticut; WARREN G. MAGNUSON, a Senator from the State of Washington; and WAYNE MORSE, a Senator from the State of Oregon, appeared in their seats today.

LEAVE OF ABSENCE

Mr. PEPPER. Mr. President, I find it necessary to go to Florida tomorrow upon public business. I may not be able to return before the end of the week. Therefore, I ask consent that I may be excused from attendance on the sessions of the Senate during the time of this necessary absence.

The ACTING PRESIDENT pro tempore. Without objection, consent is granted.

SEVENTY-FIFTH BIRTHDAY ANNIVERSARY OF CARL A. LOEFFLER

Mr. WHERRY. Mr. President, birthdays are happy occasions when they present themselves each year. Today marks the seventy-fifth anniversary of the birth of a man with whom we have all been closely associated for many years, Carl A. Loeffler, our distinguished Secretary.

Of his 75 years, he has served the Senate well for a total of 59 years. He first came to the Senate as a page in 1889 from the State of Pennsylvania and continued to serve in close relationship with the Republican Members of the Senate until his election as Secretary of the Senate on January 4, 1947. His devotion to duty has been constant and his friendship loyal.

I know I speak the sentiments of the entire membership of the Senate when I say to Mr. Loeffler that we extend to him our congratulations and good wishes and express the sincere hope that he may continue to enjoy the good health and happiness which have been his for so many years.

Mr. LUCAS. Mr. President, it gives me pleasure to join with the distinguished acting majority leader in paying tribute to Carl Loeffler and the high public service he has rendered to his country for such a long space of time. While I have not been a Senator as long as many of my colleagues, yet during my period of service I have not hesitated to seek Mr. Loeffler's counsel and advice on numerous occasions, not only while he was serving the minority party, but also during the time when the Republican Party was in the majority. I am happy to say that at all times Mr. Loeffler has uniformly been kind, courteous, and affable. During all the 9 years I have served as a Member of the Senate, I have never heard one unkind word spoken about him.

MEETING OF COMMITTEE DURING SESSION OF THE SENATE

Mr. WHERRY. Mr. President, I ask unanimous consent that the subcommittee of the Committee on Appropriations investigating commodity speculations be permitted to sit during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, permission is granted.

THE BUDGET

The ACTING PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read, and, with the accompanying document, referred to the Committee on Appropriations and ordered to be printed with illustrations.

(For President's message, see today's proceedings of the House of Representatives on p. 97.)

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON INSPECTION OF COAL AND LIGNITE MINES

A letter from the Secretary of the Interior, transmitting, pursuant to law, the second report covering conditions in all underground bituminous-coal and lignite mines inspected by Federal coal-mine inspectors during the 6-month period July 1, 1947, to December 31, 1947, inclusive (with an accompanying report); to the Committee on Labor and Public Welfare.

REPORT OF WAGE AND HOUR AND PUBLIC CONTRACTS DIVISIONS, DEPARTMENT OF LABOR

A letter from the Administrator of the Wage and Hour and Public Contracts Divisions, Department of Labor, transmitting, pursuant to law, a report of the Wage and Hour and Public Contracts Divisions of the United States Department of Labor for the year ended June 30, 1947 (with an accompanying report); to the Committee on Labor and Public Welfare.

REPORT OF GEORGETOWN BARGE, DOCK, ELEVATOR & RAILWAY CO.

A report of the Georgetown Barge, Dock, Elevator & Railway Co., pursuant to law, for the calendar year 1947; to the Committee on the District of Columbia.

PETITIONS AND MEMORIALS

The ACTING PRESIDENT pro tempore laid before the Senate petitions and a memorial, which were referred as indicated:

A resolution adopted by Hugh A. Carlisle Post, No. 13, the American Legion, Albuquerque, N. Mex., favoring the enactment of legislation to establish a commission to hear and adjudicate claims of American nationals who were prisoners of war of the Japanese; to the Committee on Armed Services.

A resolution adopted by the National Governors' Conference, Chicago, Ill., relating to the shortage of oil; to the Committee on Banking and Currency.

A resolution adopted by the Common Council of the city of Milwaukee, Wis., favoring adoption of measures recommended by the Special Committee on Living Costs and Food Conservation for the city of Milwaukee (with accompanying papers); to the Committee on Banking and Currency.

A letter in the nature of a memorial from the National Congress of American Indians, of Claremore, Okla., signed by Ruth Muskrat Bronson, secretary, remonstrating against the enactment of Senate Joint Resolution 162, to rescind certain orders of the Secretary of the Interior establishing Indian reservations in the Territory of Alaska; to the Committee on Public Lands.

A resolution adopted by the Hawaii Young Farmers Association, Honolulu, Hawaii, favoring statehood for Hawaii; to the Committee on Public Lands.

A resolution adopted by the Common Council of the city of Milwaukee, Wis., requesting the Congress to reconsider its action of 1945 by extending the time limit for local participation in Federal highway funds from June 30, 1948, to June 30, 1950; to the Committee on Public Works.

RENT CONTROLS

Mr. PEPPER. Mr. President, I believe that the veterans of the United States and the people generally are of the opinion that rent controls in some effective manner should be continued. I have good evidence of that before me, in the form of a resolution from the Edward C. DeSaussure Post, No. 9, of the American Legion, at Jacksonville, Fla., which is the largest veterans' organization in northern Florida. The resolution asserts that rent controls should be continued with proper adjustment of rent levels in hardship cases. I ask that the resolution be printed in the body of the RECORD, immediately following these remarks by me, and that it be referred to the appropriate committee.

There being no objection, the resolution was referred to the Committee on

Banking and Currency and ordered to be printed in the RECORD, as follows:

RESOLUTION

"Whereas the Duval County Rental Advisory Board is now considering the question of recommendations to be made to the Federal Housing Expediter regarding changes in rent levels or even the complete decontrol of all rents in this area; and

"Whereas the Edward C. DeSaussure Post, No. 9, of the American Legion, the largest veterans' organization in northern Florida, believes that the question of rent controls is a matter of vital concern to the veterans of this community: Be it therefore

"Resolved, That the Edward C. DeSaussure Post, No. 9, of the American Legion go on record as favoring, in the interest of veterans, the continuance in Duval County of rent controls at the present levels under the existing laws and regulations, with the adoption of a liberal policy of adjustments of rent levels in hardship cases: Be it further

"Resolved, That copies of this resolution be forthwith sent to the Duval County Rental Advisory Board, the Federal Housing Expediter, the Congressman from this District, and the Senators from Florida."

I, F. Tom Nooney, adjutant of the Edward C. DeSaussure Post, No. 9, of the American Legion, certify that the foregoing is a true and correct copy of a resolution duly and unanimously passed at a regular meeting of said post held at Jacksonville, Duval County, Fla., on the 4th day of December 1947.

[SEAL] F. TOM NOONEY,
Adjutant.

REPORTS OF COMMITTEES ON PERSONNEL AND FUNDS

Pursuant to Senate Resolution 123, Eighteenth Congress, first session, the following reports were received by the Secretary of the Senate:

REPORT OF COMMITTEE ON CIVIL SERVICE

UNITED STATES SENATE,
January 12, 1948.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eighteenth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from July 1, 1947, to December 31, 1947, together with the funds available to and expended by it and its subcommittees:

Name	Profession	Rate of gross annual salary	Total salary received
Anna Baca	Clerical	$3,626.56	$1,813.28
Lorena Betsch	do	3,626.56	141.04
Frank Burnett	Staff member.	7,075.06	2,947.94
Costas D. Chrissos	Clerical	3,626.56	1,339.81
Thomas F. Fox	do	4,288.68	95.30
Colette E. Homan	Chief Clerk	5,695.66	2,847.83
Mary Irwin	Assistant Chief Clerk.	4,288.68	1,953.73
Dorothy Lynott	Clerical	3,626.56	1,813.28
Esther Petersen	do	3,626.56	1,662.17
John D. Phenix	Actuary and statistician.	10,000.00	5,000.00
William Posey	Staff member.	7,075.06	589.59
George D. Riley	Staff director.	10,000.00	5,000.00
Frank A. Vogel	Staff member.	10,000.00	5,000.00

Funds authorized or appropriated for committee expenditure	$10,000.00
Amount expended	6,503.02
Balance unexpended	3,496.98

WILLIAM LANGER, *Chairman.*

REPORT OF COMMITTEE ON CIVIL SERVICE—SUBCOMMITTEE OF THE COMMITTEE ON CIVIL SERVICE INVESTIGATING APPOINTMENT OF POSTMASTERS UNDER SENATE RESOLUTION 81

UNITED STATES SENATE,
January 12, 1948.

To the SECRETARY OF THE SENATE:

Name	Profession	Rate of gross annual salary	Total salary received
H. Ralph Burton	Chief investigator.	$7,628.08	$3,199.53
Thomas F. Fox	Investigator	5,530.14	2,642.15
John M. Henshaw	Research worker.	6,540.00	50.27
Arthur P. Lamneck, Jr.	Investigator	5,695.66	1,392.25
Emil Levin	Counsel	10,000.00	777.76
Myrtle Paynter	Clerk	2,964.65	1,235.15
John R. Risher, Jr.	Assistant investigator.	5,116.32	1,776.50
Dillard C. Rogers	do	5,116.32	1,478.04
Mrs. Jennie Ulsrud	Clerk	2,964.65	1,548.03
Walter K. Van Olinda	Assistant investigator.	5,116.32	2,060.74

Funds authorized or appropriated for committee expenditure	$35,000.00
Amount expended	18,584.15
Balance unexpended	16,415.85

WILLIAM LANGER, *Chairman.*

REPORT OF COMMITTEE ON PUBLIC WORKS

UNITED STATES SENATE,
January 5, 1948.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eighteenth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from July 1, 1947, to December 31, 1947, together with the funds available to and expended by it and its subcommittees:

Name	Profession	Rate of gross annual salary	Total salary received
Orren L. Jones	Clerk	$10,000.00	$4,326.65
Wm. A. Stevens	Assistant clerk.	10,000.00	4,871.07
Eloise Porter	do	5,281.84	2,640.86
Frances Stovall	do	4,619.73	2,309.86
Jeanette Grooms	do	2,964.45	1,482.22
Mary Batalo	do	2,964.45	494.00
E. W. Bassett	Professional staff.	10,000.00	5,000.00
Ronald Moist	do	10,000.00	5,000.00

Funds authorized or appropriated for committee expenditure, 80th Cong	$10,000.00
Amount expended (previous to June 30, $2,251.62) since June 30, $105.96	2,357.58
Balance unexpended	7,642.42

CHAPMAN REVERCOMB, *Chairman.*

REPORT OF COMMITTEE ON RULES AND ADMINISTRATION

UNITED STATES SENATE,
December 31, 1947.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eighteenth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it for the period from July 1, 1947, to December 31, 1947, together with the funds available to and expended by it:

Name	Profession	Rate of gross annual salary	Total salary received
Albert L. Seidel	Chief Clerk	$10,000.00	$5,000.00
Nelson Deranian (July 17, 1947.)	Professional staff.	10,000.00	4,555.53

Ela N. Hathaway	Clerk (research.)	3,461.04	1,730.52
Phyllis M. Wherry	Clerk (stenographic.)	3,129.98	1,564.99
B. Floye Gavin	Clerk (research.)	4,868.02	2,434.01

Funds authorized or appropriated for committee expenditure remaining July 1, 1947	$9,414.17
Amount expended July 1, 1947, through Dec. 31, 1947	7.30
Balance unexpended	9,406.87

C. WAYLAND BROOKS, *Chairman.*

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BUSHFIELD:

S. 1965. A bill to provide for the payment of Sioux benefits to certain women of the Sioux Tribe of Indians; to the Committee on Public Lands.

By Mr. MORSE:

S. 1966. A bill to authorize the Secretary of the Navy to cooperate with the city of Astoria, Oreg., in the improvement and expansion of its water-distributing system for the purpose of assuring an adequate supply of water for the Tongue Point naval base; to the Committee on Armed Services.

(Mr. MORSE also introduced Senate bill 1967, to provide for a coordinated anti-inflation program, which was referred to the Committee on Banking and Currency, and appears under a separate heading.)

(Mr. BALL introduced Senate bill 1968, to provide for home rule and reorganization in the District of Columbia, which was referred to the Committee on the District of Columbia, and appears under a separate heading.)

Mr. TAFT. Mr. President, by request of the Secretary of State, I introduce for appropriate reference two bills, and at the request of the Public Health Service I introduce for appropriate reference a bill.

The ACTING PRESIDENT pro tempore. The bills will be received and appropriately referred.

By Mr. TAFT (by request):

S. 1969. A bill to amend the Philippine Rehabilitation Act of 1946 in connection with the training of Filipinos as provided for in title III; and

S. 1970. A bill to provide for the refund of the taxes deducted pursuant to the provisions of the Railroad Retirement Act of 1937, as amended, from the wages of Mexican railroad workers employed in the United States under the agreement of April 29, 1943, between the United States of America and the United Mexican States and for other purposes; and

S. 1971. A bill to amend the Public Health Service Act to permit certain expenditures, and for other purposes; to the Committee on Labor and Public Welfare.

(Mr. FLANDERS introduced Senate bill 1972, to amend the Social Security Act to permit an adopted child of a deceased individual to receive benefits thereunder without

regard to the period during which he shall have occupied such status, which was referred to the Committee on Finance, and appears under a separate heading.)

By Mr. McCARRAN:

S. 1973. A bill for the relief of certain Basque aliens; to the Committee on the Judiciary.

By Mr. CAPEHART:

S. 1974. A bill to establish a United States Air Force Academy; to the Committee on Armed Services.

By Mr. McGRATH:

S. 1975. A bill to provide for a service credit for veterans for the purposes of title II of the Social Security Act; to the Committee on Finance.

S. 1976. A bill to amend section 7 of the District of Columbia Traffic Act, 1925, as amended, to provide for learners' permits, and for other purposes; to the Committee on the District of Columbia.

COORDINATED ANTI-INFLATION PROGRAM

Mr. MORSE. Mr. President, I introduce for appropriate reference a bill to provide for a coordinated anti-inflation program. The bill proposes to set up an economic stabilization coordinator, and I have these comments to make on the bill in explanation.

During recent weeks the lack of coordination among the Government agencies that are supposed to be fighting inflation has become increasingly evident. In their appearances before congressional committees, agency heads have given conflicting testimony and contradictory interpretations of President Truman's program.

If there is such a lamentable lack of coordination in testimony before congressional committees, what but confusion can be expected in the administration of the anti-inflation program? That is just exactly what we have—utter confusion.

Irrespective of what specific anti-inflation measures are passed by Congress—and it is obvious that some measures which really will be effective should be enacted—it is essential that there be a coordinated administrative set-up. Otherwise, any acts that Congress may pass are doomed to failure. This is a problem that calls for high-minded, nonpartisan action by the Congress.

It is ridiculous to think that a coordinated program to fight inflation can be developed merely by giving separate jobs to the Commerce Department, the Agriculture Department, the Federal Reserve Board, the Treasury Department, and other agencies as the administration apparently proposes to do. It will result in a most noneffective program, as the administration's program has been to date.

It is just as ridiculous to assume that the President can take on the full-time task of coordination. Nor can any coordinator operating merely under an Executive order be expected to do an effective job. What is needed is an Economic Stabilization Coordinator set up under congressional authority to sit in the executive offices and keep all the agencies working together as a team under principles of administration laid down by Congress. This was the lesson learned during the war. If it is forgotten now, our program of aid to Europe may be wrecked by rampant inflation in America and our free-enterprise economy may once again go down the boom-and-bust road to economic collapse.

My bill does not give the executive branch any price control, rationing or allocation powers. Its purpose is to provide for the coordinated administration of emergency powers already exercised by the executive branch or to be delegated to the executive branch under future emergency legislation, so sorely needed.

Nor does the bill provide for setting up a large superagency. The Economic Stabilization Coordinator is to work through the existing departments and agencies. His major responsibility would be to plan a consistent attack on inflation, to provide a clearinghouse for plans developed by individual executive agencies, to issue directives to individual agencies and settle disputes among them, and to prepare legislative recommendations to Congress. He would also be required to submit a full report to Congress every 3 months.

The Coordinator would be subject to Senate confirmation, and hold office until December 31, 1949.

The bill also sets up an Anti-Inflation Advisory Board composed of 12 persons appointed by the President and confirmed by the Senate. Three would have special experience in business, three in agriculture, three in labor, and three would be chosen as public representatives without reference to any special field. The Board would advise with the Coordinator in the preparation and administration of the anti-inflation program.

The bill (S. 1967) to provide for a coordinated anti-inflation program, introduced by Mr. MORSE, was read twice by its title, and referred to the Committee on Banking and Currency.

HOME RULE AND REORGANIZATION IN THE DISTRICT OF COLUMBIA

Mr. BALL. Mr. President, I introduce for appropriate reference a bill to provide for home rule and reorganization in the District of Columbia. It is a bill, I may say, which was drafted by the Subcommittee on Home Rule of the House District Committee headed by Representative AUCHINCLOSS, of New Jersey, as a result of extensive hearings and a quite extensive study by the staff of that subcommittee. For the information of the Senate, I will say it is the plan of the Home Rule Subcommittees of the House and Senate District Committees to hold joint hearings on this bill beginning February 2, and to attempt to secure enactment of legislation granting home rule to the District at this session of the Congress. I think it is becoming more and more apparent to all of us in the Senate that Congress is too busy with national affairs to devote to the problems of the District the attention which they deserve and need.

The bill (S. 1968) to provide for home rule and reorganization in the District of Columbia, introduced by Mr. BALL, was read twice by its title, and referred to the Committee on the District of Columbia.

AMENDMENT OF SOCIAL SECURITY ACT RELATING TO ADOPTED CHILDREN OF DECEASED INDIVIDUALS

Mr. FLANDERS. I introduce for appropriate reference a bill to amend the Social Security Act to permit an adopted child of a deceased individual to receive benefits under the act, without regard to the period during which he shall have occupied such status. I will say, briefly, that there are a number of serious injustices in connection with adopted children, and that in attempting to remedy them by this bill I have the support of the Social Security Administration.

The bill (S. 1972) to amend the Social Security Act to permit an adopted child of a deceased individual to receive benefits thereunder without regard to the period during which he shall have occupied such status, introduced by Mr. FLANDERS, was read twice by its title, and referred to the Committee on Finance.

CHANGES OF REFERENCES

Mr. TAFT. Mr. President, I ask unanimous consent that the Committee on Labor and Public Welfare be discharged from the further consideration of the bill (S. 1657) to enable veterans who are civil-service employees to take advantage of the Servicemen's Readjustment Act of 1944, and that it be referred to the Committee on Post Office and Civil Service.

I also ask unanimous consent that the Committee on Labor and Public Welfare be discharged from the further consideration of the bill (S. 1458) providing for the continuance of compensation or pension payments and a subsistence allowance for certain children of deceased veterans of World War I or II during education or training, and that it be referred to the Committee on Finance.

Mr. LUCAS. Mr. President, will the Senator from Ohio yield?

Mr. TAFT. I yield.

Mr. LUCAS. With respect to the two referrals, does the Senator from Ohio think that under the rules of the Senate the Presiding Officer has the power to change the reference of a measure?

Mr. TAFT. I have consulted the Presiding Officer and the Parliamentarian, and they feel the bills should be referred to the two committees I have indicated.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Ohio? The Chair hears none, and it is so ordered.

MOTION PICTURES, RADIO BROADCASTING, AND COMIC STRIPS IN RELATION TO THE ADMINISTRATION OF JUSTICE—ADDRESS BY ARTHUR J. FREUND

[Mr. MORSE asked and obtained leave to have printed in the RECORD an address delivered by Arthur J. Freund at a meeting of the criminal-law section of the American Bar Association at Cleveland, Ohio, on September 24, 1947, which appears in the Appendix.]

THE HIGH-SCHOOL GRADUATE FACES THE ATOMIC FUTURE—VALEDICTORY ADDRESS BY JAMES D. DANLEY

[Mr. PEPPER asked and obtained leave to have printed in the RECORD a valedictory address entitled "The High-School Graduate Faces the Atomic Future," delivered by James

D. Danley at the commencement exercises at the Turkey Creek High School, Hillsborough County, Fla., on December 18, 1947, which appears in the Appendix.]

TRIBUTE TO CONFEDERATE VETERANS OF THE WAR BETWEEN THE STATES—ADDRESS BY HON. JOHN H. PINSON

[Mr. SPARKMAN asked and obtained leave to have printed in the RECORD an address delivered by Hon. John H. Pinson before the Alabama House of Representatives on June 13, 1947, which appears in the Appendix.]

ECONOMIC PROBLEMS OF THE NETHERLANDS IN THE POSTWAR PERIOD—ADDRESS BY DR. A. H. PHILIPSE

[Mr. SPARKMAN asked and obtained leave to have printed in the RECORD an address entitled "Some Economic Problems of the Netherlands in the Postwar Period," by Dr. A. H. Philipse, commercial counselor of the Netherlands Embassy, delivered before the Women's National Democratic Club on December 8, 1947, which appears in the Appendix.]

EVERETT DIRKSEN'S ANNOUNCEMENT—EDITORIAL FROM THE PEORIA JOURNAL-STAR

[Mr. BROOKS asked and obtained leave to have printed in the RECORD an editorial entitld "EVERETT DIRKSEN'S Announcement," published in the Peoria Journal-Star for January 4, 1948, which appears in the Appendix.]

MR. TRUMAN'S PLATFORM—EDITORIAL FROM OMAHA WORLD-HERALD

[Mr. WHERRY asked and obtained leave to have printed in the RECORD an editorial entitled "Mr. Truman's Platform," from the Evening World-Herald of Omaha, Nebr., of January 8, 1948, which appears in the Appendix.]

ONE HUNDRED AND ONE DISPLACED PERSONS VERSUS SIXTY MILLION EMPLOYED

[Mr. BROOKS asked and obtained leave to have printed in the RECORD an article entitled "One Hundred and One Displaced Persons Versus Sixty Million Employed," by William E. Zipp, president of the Ceco Steel Products Corp., of Chicago, which appears in the Appendix.]

GOD BLESS AMERICA—ARTICLE BY REV. FREDERICK BROWN HARRIS

[Mr. HILL asked and obtained leave to have printed in the RECORD an article entitled "God Bless America," by Rev. Frederick Brown Harris, published in the Washington Sunday Star for January 11, 1948, which appears in the Appendix.]

TRADING IN GRAIN FUTURES—NEWSPAPER COMMENT

[Mr. BALL asked and obtained leave to have printed in the RECORD an article entitled "Grain Trading Cuts Your Bread Bill," by Harry A. Bullis, and an editorial entitled "Trading in Futures," from the Washington Post of January 11, 1948, which appear in the Appendix.]

THE PRESIDENT'S 1949 BUDGET ESTIMATES

Mr. BYRD. Mr. President, I ask unanimous consent to have printed in the body of the RECORD as a part of my remarks a statement I have made regarding the budget.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

COMMENT BY SENATOR HARRY F. BYRD, OF VIRGINIA, ON THE PRESIDENT'S 1949 BUDGET ESTIMATES, JANUARY 12, 1948

A budget of nearly $40,000,000,000, 3 years after the war, compared with nine billion before the war, is a dangerous gamble with our national solvency, especially with the continuation of imprudent and wasteful expenditures which are contemplated.

The failure of the President to recommend retrenchment in the existing bloated Federal spending places the job of eliminating wasteful and unnecessary expenditures squarely upon the shoulders of Congress, and unless there is a reduction in Federal expenditures, a financial crisis in America such as now exists in England is within the realm of possibility. This would mean world chaos.

To emphasize the fact that we are skating on thin fiscal ice, a 10-percent recession in the national income (the aggregate income of all citizens)—and this is more than likely in the near future—would mean a loss of $5,000,000,000 in Federal tax revenue. Such a reduction would put us in the red again on the basis of the President's budget estimates today, and that makes no allowance for any tax reduction.

Our greatest responsibility is to keep America strong at home. Fiscal instability here would serve the enemies of democracy far more than any weapon that could be devised. Our financial soundness is the only hope for world stability. Without it there would be no bulwark against communism and freedom could not survive either here or elsewhere.

ACTION BY UNITED NATIONS ORGANIZATION ON GRECIAN-TURKISH PROBLEM—RESOLUTION POSTPONED

The ACTING PRESIDENT pro tempore. The Chair wishes to advise the Senate that with respect to Senate Resolution 101 coming over from a previous day, favoring action by the United Nations Organization looking to a solution of the Grecian-Turkish problem, submitted by the senior Senator from Virginia [Mr. BYRD], the Senator from Virginia has requested that the resolution be indefinitely postponed. Without objection, it is so ordered.

THE CALENDAR

The ACTING PRESIDENT pro tempore. Morning business is closed. Under the order of Friday last, the Senate will now proceed to the consideration of measures on the calendar to which there may be no objection, beginning with the first order number thereon. The Chair calls attention to the fact that, under the rule, a Senator is entitled to speak once and for 5 minutes only upon any question.

Mr. WHERRY. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Chavez	Gurney
Ball	Connally	Hatch
Barkley	Donnell	Hawkes
Brewster	Downey	Hayden
Bricker	Dworshak	Hickenlooper
Brooks	Eastland	Hill
Buck	Ecton	Hoey
Bushfield	Ellender	Holland
Butler	Ferguson	Ives
Byrd	Flanders	Jenner
Cain	Fulbright	Johnson, Colo.
Capehart	George	Johnston, S. C.
Capper	Green	Kem
Knowland	Moore	Stewart
Langer	Morse	Taft
Lodge	Murray	Taylor
Lucas	O'Conor	Thomas, Okla.
McCarran	O'Daniel	Thomas, Utah
McCarthy	O'Mahoney	Thye
McClellan	Pepper	Tobey
McFarland	Reed	Vandenberg
McGrath	Revercomb	Watkins
McKellar	Robertson, Va.	Wherry
McMahon	Robertson, Wyo.	Wiley
Magnuson	Russell	Williams
Malone	Smith	Wilson
Maybank	Sparkman	Young
Millikin	Stennis	

Mr. WHERRY. I announce that the Senator from Connecticut [Mr. BALDWIN], the Senator from Kentucky [Mr. COOPER], and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent.

The Senator from New Hampshire [Mr. BRIDGES] is necessarily absent on official business.

The Senator from Oregon [Mr. CORDON] is necessarily absent on official business of the Committee on Public Lands.

The Senator from Pennsylvania [Mr. MARTIN] is absent by leave of the Senate.

Mr. LUCAS. I announce that the Senator from West Virginia [Mr. KILGORE], the Senator from Pennsylvania [Mr. MYERS], and the Senator from Louisiana [Mr. OVERTON] are absent on public business.

The Senator from Maryland [Mr. TYDINGS], the Senator from North Carolina [Mr. UMSTEAD], and the Senator from New York [Mr. WAGNER] are necessarily absent.

The ACTING PRESIDENT pro tempore. Eighty-three Senators having answered to their names, a quorum is present.

For the benefit of Senators who were not present when the previous announcement was made, the Chair will state that under the order of Friday last the Senate will now proceed to the consideration of bills on the calendar to which there may be no objection, beginning with the first order number thereon. The Chair calls attention to the fact that under the rule a Senator is entitled to speak once and for 5 minutes only upon any question.

The clerk will state the first order of business on the calendar.

BILL PASSED OVER

The bill (S. 27) to provide for suspending the enforcement of certain obligations against the operators of gold and silver mines who are forced to cease operations because of the war was announced as first in order.

Mr. WHERRY. Let the bill go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

COMMEMORATIVE MEDALS IN LIEU OF COINS

The Senate proceeded to consider the bill (S. 865) to provide for the striking of medals in lieu of coins for commemorative purposes.

Mr. LUCAS. Mr. President, may we have an explanation of the bill?

Mr. FLANDERS. Mr. President, I urge the passage of this bill, which is a bill to end all bills for the striking of

commemorative coins. It provides for the striking of medals in lieu of coins for commemorative purposes.

Mr. LUCAS. I should like to ask the Senator a question. Am I to understand that this bill is one of a number of such bills?

Mr. FLANDERS. No. This is a bill to end special coinage bills.

Mr. LUCAS. I am in favor of such a bill.

The ACTING PRESIDENT pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That in order to promote uniformity in the designs of the various coins of the United States, to facilitate their proper use as circulating media, to enable counterfeit pieces to be readily detected, and to avoid the confusion which arises from special issues of commemorative coins, it is declared to be the policy of the United States to authorize the striking of commemorative medals in lieu of commemorative coins and to discontinue the striking of such coins.

SEC. 2. The director of the Mint shall enter into contracts subject to such terms and conditions as the Director shall prescribe, with the approval of the Secretary of the Treasury, for the striking and furnishing of such commemorative medals as may be authorized from time to time by law. The striking and furnishing of medals pursuant to this section shall be subject to the provisions of section 3551 of the Revised Statutes, except that the dies necessary for the preparation of such medals may be prepared at the mint, with the machinery and apparatus thereof, from suitable models submitted to and approved by the Director of the Mint. The Director of the Mint shall cause such medals to be struck and furnished at not less than the estimated cost of manufacture, including labor, materials, dies, use of machinery, and overhead expenses; and security satisfactory to the Director of the Mint shall be furnished to indemnify the United States for the full payment of such cost. Notwithstanding the provisions of section 3552 of the Revised Statutes (U. S. C., title 31, sec. 369), all proceeds received from the manufacture of such medals shall be credited to the appropriation against which the cost of manufacture has been charged.

BILLS AND RESOLUTION PASSED OVER

The bill (S. 669) to provide for the payment of a bonus of 30 cents per bushel on wheat and corn produced and sold between January 1, 1945, and April 18, 1946, was announced as next in order.

Mr. LUCAS. Let the bill go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The resolution (S. Res. 25) amending rule XXII relating to cloture was announced as next in order.

Mr. LUCAS. Let the resolution go over.

The ACTING PRESIDENT pro tempore. The resolution will be passed over.

The bill (S. 354) to incorporate the Federal City Charter Commission, was announced as next in order.

Mr. WHERRY, Mr. JOHNSTON of South Carolina, and other Senators: Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 866) to establish a national housing objective and the policy to be followed in the attainment thereof, to facilitate sustained progress in the attainment of such objective and to provide for the coordinated execution of such policy through a National Housing Commission, and for other purposes, was announced as next in order.

Mr. WHERRY. Let the bill go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 637) to amend the Civil Service Retirement Act of May 29, 1930, as amended, was announced as next in order.

Mr. WHERRY. Let the bill go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

Mr. TAFT. Mr. President, we hope to call up this bill or the Stevenson bill sometime during the month of January. However, I believe that this bill should be passed over at the present time.

The bill (S. 408) to repeal section 13b of the Federal Reserve Act, to amend section 13 of the said act, and for other purposes, was announced as next in order.

Mr. TAFT. Let the bill go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 299) to extend the reclamation laws to the State of Arkansas was announced as next in order.

Mr. LUCAS. Let the bill go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 309) designating American Indian Day was announced as next in order.

Mr. HATCH. Mr. President, reserving the right to object, I have heretofore objected to this bill, and there has been some question as to why I objected to it. On a previous occasion I stated that I would be glad to honor the Indians by designating some special day for paying proper tribute to them. However, until the obligation which this Government owes to the Indians in my State and elsewhere throughout the Nation is fulfilled, I do not feel that the passage of a bill setting aside an Indian Day means anything. It is but an empty gesture. I do not wish to make empty gestures. Therefore I object.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

EXPENSES OF SEVENTEENTH TRIENNIAL CONVENTION, WORLD'S WOMAN'S CHRISTIAN TEMPERANCE UNION

The bill (H. R. 1179) to aid in defraying the expenses of the Seventeenth Triennial Convention of the World's Woman's Christian Temperance Union to be held in this country in June 1948, was announced as next in order.

Mr. WHERRY and other Senators. Over.

Mr. THOMAS of Utah. Mr. President, will the Senator who objected to consideration of the bill withhold his objection for just a moment?

The ACTING PRESIDENT pro tempore. Without objection, the Senator may proceed.

Mr. THOMAS of Utah. Mr. President, this is a very small and unimportant bill from the standpoint of the money proposed to be appropriated. However, it is an exceedingly important bill from the standpoint of what we have done in the past, and the reason for which the appropriation is asked.

For more than 51 years international conferences of women who have been working for temperance throughout the world have been held. This is the second time the conference has come to the United States. The first time the Congress of the United States appropriated $10,000 to help defray expenses. This time the State Department recommended an appropriation of $5,000, which would be adequate, because fewer persons attended the conference.

The House passed the bill. The Secretary of State recommended passage of the bill, and in its recommendation attention was called to the fact that we are trying to teach democracy throughout the world, and that international conferences of people always contribute to that end. I think it would be extremely improper, and not the right thing to do on the part of the Senate, to hold up this small appropriation. I trust that objection will be withheld, and that the bill will be passed. The appropriation asked for is $5,000. The convention has already been held. However, certain obligations were incurred, and I think we owe some sort of moral obligation, in view of what the House of Representatives has already done.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

Mr. McMAHON. Mr. President, will the Senator yield for a question?

Mr. THOMAS of Utah. I yield.

Mr. McMAHON. Will the Senator tell me why Congress should pay the expenses of any private group which might see fit to hold a convention? Why do we not pay the expenses of other international conventions?

Mr. THOMAS of Utah. The Congress has paid the expenses of other international conventions. This is no new thing. The idea of international conventions has been to bring together the peoples of many nations to discuss problems which are common to all of them. While most of the international meetings are official in nature, many international meetings are unofficial. Very often the problems discussed in international meetings affect the governments themselves. Nearly always the purposes of the meetings are for the benefit of the people of the various countries. I hope there will be no objection to the passage of this bill.

Mr. LUCAS. Mr. President, a Senator who had previously objected to consideration of the bill has stated to me that if he were present he would ask that the bill be passed over. Under the circumstances I regret that I feel obliged to ask that the bill be passed over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

BILL PASSED OVER

The bill (S. 1125) to amend the act entitled "An act to define the real property exempt from taxation in the District of Columbia," approved December 24, 1942, was announced as next in order.

Mr. McCARRAN. Let the bill go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

INCREASE IN PER DIEM SUBSISTENCE ALLOWANCES

The Senate proceeded to consider the bill (S. 544) to further amend section 3 of the Subsistence Expense Act of 1926, as amended, which had been reported from the Committee on Expenditures in the Executive Departments with an amendment, to strike out all after the enacting clause and insert:

That the Subsistence Expense Act of 1926, as amended, is repealed and that this act may be cited as the "Subsistence Expense Act of 1947."

SEC. 2. When used in this act—

(1) The term "departments and establishments" means any executive department, independent commission, board, bureau, office, agency, or other establishment of the Government, including the services included in the Pay Readjustment Act of 1942, as amended, and including wholly owned Government corporations and the municipal government of the District of Columbia.

(2) The term "subsistence" means lodging, meals, and other necessary expenses incidental to the personal sustenance or comfort of the traveler.

(3) The term "actual expenses" means the actual amounts necessarily expended by the traveler for subsistence.

(4) The term "per diem allowance" means a daily flat rate of payment in lieu of actual expenses.

SEC. 3. Officers and employees of the departments and establishments, while traveling on official business and away from their designated posts of duty, shall be allowed, in lieu of their actual expenses for subsistence and all fees or tips to porters and stewards, a per diem allowance at a rate not to exceed $8 within the limits of the continental United States and in case of travel beyond the limits of the continental United States not to exceed rates to be established by the Director of the Budget under authority of this section. Such allowances shall be uniform for all officers and employees of the departments and establishments, and shall be established by the Director of the Bureau of the Budget after giving due consideration to geographical location and cost of living studies and to type of work of the traveler and conditions under which the traveler operates.

SEC. 4. The fixing and payment, under section 3 of this act, of per diem allowances, or portions thereof, shall be in accordance with regulations which shall be promulgated by the Director of the Bureau of the Budget.

SEC. 5. The heads of departments and establishments, under regulations which shall be prescribed by the Secretary of the Treasury for the protection of the United States, may advance through the proper disbursing officers from applicable appropriations to any person entitled to per diem allowances under this act such sums as may be deemed advisable considering the character and probable duration of the travel to be performed. Any sums so advanced and not used for allowable travel expense shall be recovered from the person to whom advanced, or his estate, by deduction from any amount due from the United States or by such other legal method of recovery as may be necessary.

SEC. 6. This act shall not be construed to modify or repeal any act providing for the traveling expenses of the President of the United States.

SEC. 7. The following acts and parts of acts and all other acts, general or special, which are inconsistent with or in conflict with the provisions of this act (except such acts or parts of acts as specifically fix or now permit rates higher than the maximum rates established under this act), insofar as they provide for per diem allowances in lieu of subsistence, including mileage allowances, are hereby repealed or modified but only to the extent of inconsistency or conflict with the provisions of this act: The Subsistence Expense Act of 1926, as amended; section 12 of the Pay Readjustment Act of 1942, as amended.

SEC. 8. Wherever provision is made in any law for the payment of per diem allowances to officers and employees in any branch or establishment of the Government not covered by this act, in accordance with the rates provided in the Subsistence Expense Act of 1926, such law is hereby amended to provide for payment at the rates prescribed in or under this act.

SEC. 9. Nothing in this act shall be construed to authorize any department or establishment to exceed its appropriation for subsistence expense in any fiscal year.

SEC. 10. This act shall take effect upon the expiration of 90 days after the date of its enactment.

Mr. AIKEN. Mr. President, the Senator from Ohio [Mr. BRICKER] has submitted several amendments to the committee amendment. The bill had been objected to by the armed services. The amendments submitted by the Senator from Ohio were aimed at meeting the objections of the armed services. On behalf of the Senator from Ohio, I offer the amendments which he has submitted.

The ACTING PRESIDENT pro tempore. There is a committee amendment striking out all after the enacting clause and inserting new language. The amendments offered by the Senator from Vermont on behalf of the Senator from Ohio [Mr. BRICKER] will be stated.

The LEGISLATIVE CLERK. It is proposed, on page 2, line 14, after the comma, to strike out the phrase reading, "including the services included in the Pay Readjustment Act of 1942, as amended, and."

The amendment to the amendment was agreed to.

The LEGISLATIVE CLERK. On page 2, line 25, to insert the word "civilian" before the word "officers."

The amendment to the amendment was agreed to.

The LEGISLATIVE CLERK. On page 4, line 9, to strike out section 7 and insert the following:

SEC. 7. All acts, general or special, which are inconsistent with or in conflict with the provisions of this act (except such acts or parts of acts as specifically fix or now permit rates higher than the maximum rates established under this act) are hereby repealed or modified but only to the extent of inconsistency or conflict with the provisions of this act.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Subsistence Expense Act of 1926, as amended, is repealed and that this act may be cited as the "Subsistence Expense Act of 1947."

SEC. 2. When used in this act—

(1) The term "departments and establishments" means any executive department, independent commission, board, bureau, office, agency, or other establishment of the Government, including wholly owned Government corporations and the municipal government of the District of Columbia.

(2) The term "subsistence" means lodging, meals, and other necessary expenses incidental to the personal sustenance or comfort of the traveler.

(3) The term "actual expenses" means the actual amounts necessarily expended by the traveler for subsistence.

(4) The term "per diem allowance" means a daily flat rate of payment in lieu of actual expenses.

SEC. 3. Civilian officers and employees of the departments and establishments, while traveling on official business and away from their designated posts of duty, shall be allowed, in lieu of their actual expenses for subsistence and all fees or tips to porters and stewards, a per diem allowance at a rate not to exceed $8 within the limits of the continental United States and in case of travel beyond the limits of the continental United States not to exceed rates to be established by the Director of the Budget under authority of this section. Such allowances shall be uniform for all officers and employees of the departments and establishments, and shall be established by the Director of the Bureau of the Budget after giving due consideration to geographical location and cost of living studies and to type of work of the traveler and conditions under which the traveler operates.

SEC. 4. The fixing and payment, under section 3 of this act, of per diem allowances, or portions thereof, shall be in accordance with regulations which shall be promulgated by the Director of the Bureau of the Budget.

SEC. 5. The heads of departments and establishments, under regulations which shall be prescribed by the Secretary of the Treasury for the protection of the United States, may advance through the proper disbursing officers from applicable appropriations to any person entitled to per diem allowances under this act such sums as may be deemed advisable considering the character and probable duration of the travel to be performed. Any sums so advanced and not used for allowable travel expense shall be recovered from the person to whom advanced, or his estate, by deduction from any amount due from the United States or by such other legal method of recovery as may be necessary.

SEC. 6. This act shall not be construed to modify or repeal any act providing for the traveling expenses of the President of the United States.

SEC. 7. All acts, general or special, which are inconsistent with or in conflict with the provisions of this act (except such acts or parts of acts as specifically fix or now permit rates higher than the maximum rates established under this act) are hereby repealed or modified but only to the extent of inconsistency or conflict with the provisions of this act.

SEC. 8. Wherever provision is made in any law for the payment of per diem allowances to officers and employees in any branch or establishment of the Government not covered by this act, in accordance with the rates provided in the Subsistence Expense Act of 1926, such law is hereby amended to provide for payment at the rates prescribed in or under this act.

SEC. 9. Nothing in this act shall be construed to authorize any department or establishment to exceed its appropriation for subsistence expense in any fiscal year.

SEC. 10. This act shall take effect upon the expiration of 90 days after the date of its enactment.

The title was amended so as to read: "A bill to regulate subsistence expenses of officers and employees in the executive branch of the Government while absent from their designated posts of duty on official business."

Mr. GURNEY. Mr. President, I should like to direct a question to the Senator

from Vermont. As I understand, the Senator from Ohio [Mr. BRICKER] had two amendments to this bill. Am I wrong in that statement?

Mr. AIKEN. They were just alike. There were two copies of one amendment. The Senator from North Carolina [Mr. HOEY] worked on the bill with the Senator from Ohio, and I would like to ask him to confirm the statement. I thought there were two amendments, but when I looked into it I found I had two copies of the same amendment.

Mr. HOEY. The Senator is correct.

BILL PASSED OVER

The bill (S. 140) to create an executive department of the Government to be known as the Department of Health, Education, and Security was announced as next in order.

Mr. McCARRAN. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

BILL INDEFINITELY POSTPONED

The bill (S. 1297) to extend certain powers of the President under title III of the Second War Powers Act was announced as next in order.

Mr. REED. Mr. President, Senate bill 1297 was introduced by me last June at the direction of the Committee on Interstate and Foreign Commerce.

The subject matter of the bill was included in the general bill extending the war powers of the President, so that it is unnecessary to pass this bill. The same extension of the President's war powers was made at the extra session of the Eightieth Congress, and there is no necessity for this bill to be kept on the calendar. I therefore ask unanimous consent that it be indefinitely postponed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

BILLS PASSED OVER

The bill (S. 829) to provide for control and regulation of bank holding companies, and for other purposes, was announced as next in order.

Mr. McCARRAN. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 18) to establish uniform qualifications of jurors in Federal courts, and for other purposes, was announced as next in order .

Mr. RUSSELL. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

AMENDMENT TO NATIONALITY ACT OF 1940

The bill (S. 489) to amend the Nationality Act of 1940 to preserve nationality of naturalized veterans, their wives, minor children, and dependent parents, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That subsection (h) of section 406 of the Nationality Act of 1940, approved December 24, 1942 (56 Stat. 1085; 8 U. S. C. 806), is hereby amended to read as follows:

"(h) Who is a veteran of the Spanish-American War, of World War I, or of World War II, his wife, minor children, or dependent parents."

BILLS PASSED OVER

The bill (S. 518) to amend the Nationality Act of 1940 to preserve the nationality of citizens who were unable to return to the United States prior to October 14, 1946, was announced as next in order.

Mr. RUSSELL. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 3484) to transfer the Remount Service from the War Department to the Department of Agriculture, was announced as next in order.

Mr. THOMAS of Oklahoma. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 612) to amend section 35 of chapter III of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," was announced as next in order.

Mr. McCARRAN. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 1634) to amend section 1 and provisions (6), (7), and (8) of chapter III, and provision (c) of section 47 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," was announced as next in order.

Mr. McCARRAN. Mr. President, in view of the fact that the author of the bill is not here, and it is a bill which has had considerable study in the District Building, I suggest that it go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1038) to amend the Federal Airport Act was announced as next in order.

Mr. LUCAS. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

CONCURRENT RESOLUTION INDEFINITELY POSTPONED

The resolution (S. Con. Res. 11) creating a joint committee to investigate certain matters affecting agriculture was announced as next in order.

Mr. THYE. Mr. President, there is no need for Senate Concurrent Resolution 11. It has been taken care of by another Senate concurrent resolution, and for that reason I ask that this resolution be indefinitely postponed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

BILLS AND CONCURRENT RESOLUTION PASSED OVER

The resolution (S. Con. Res. 6) to include all general appropriation bills in one consolidated general appropriation bill was announced as next in order.

Mr. McCARRAN. Over.

Mr. TAFT. Mr. President, we hope we may be able to work out something on this subject in connection with the possible amendment of the La Follette-Monroney Act, to postpone the date on which the budget resolution is to be passed, but at the present time I agree that the resolution should go over.

The ACTING PRESIDENT pro tempore. The resolution will be passed over.

The bill (S. 493) to provide for the coordination of agencies disseminating technological and scientific information, was announced as next in order.

Mr. WHERRY. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 1389) to amend the Veterans' Preference Act of 1944 was announced as next in order.

Mr. FLANDERS. Mr. President, after the bill went through the committee, I became convinced that while there were persons who were improperly classified for veterans' preference, there were also in the Coast Guard Reserve officers who were properly classified as qualified for veterans' preference. I therefore ask that the bill go over until I can investigate the matter further.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

PAYMENT OF SALARIES COVERING PERIODS OF SEPARATION FROM GOVERNMENT SERVICE

The Senate proceeded to consider the bill (S. 1486) to provide for payment of salaries covering periods of separation from the Government service in the case of persons improperly removed from such service.

Mr. WHERRY. Mr. President, I ask for an explanation of the bill.

Mr. THYE. The purpose of the bill is to provide that in the case of a Federal employee whose service has terminated and the Civil Service Commission has found that such termination was in error, and the individual has been reinstated, he can then be paid without a bill being introduced to cover the matter. It is a simple amendment of the law.

The ACTING PRESIDENT pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That (a) section 6 of the act of August 24, 1912 (37 Stat. 555; 5 U. S. C. 653), is hereby amended by inserting at the end of the first sentence thereof the following: "Any person removed or suspended without pay from the classified civil service, who upon appeal through proper authority is subsequently reinstated or restored to duty on the ground that such removal or suspension was unjustified or unwarranted, shall be entitled to compensation for the period of such removal or suspension less any amounts earned by him through other employment during such period of discharge or suspension, and shall for the purpose of the civil-service rules be deemed to have rendered service during such period."

(b) The amendment made by this section shall take effect, retroactively, as of January 1, 1947.

BILLS PASSED OVER

The bill (S. 472) to authorize the appropriation of funds to assist the States and Territories in financing a minimum foundation education program of public elementary and secondary schools, was announced as next in order.

Mr. WHERRY. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 249) to amend the Interstate Commerce Act, as amended, and

for other purposes, was announced as next in order.

Mr. WHERRY. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1502) to authorize contribution to the International Children's Emergency Fund, was announced as next in order.

Mr. WHERRY. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

PROMOTIONS OF PUBLIC HEALTH SERVICE COMMISSIONED OFFICERS

The Senate proceeded to consider the bill (S. 1454) to amend the Public Health Service Act, which had been reported from the Committee on Labor and Public Welfare with amendments.

The first amendment of the committee was, in section 3, page 2, line 2, to strike out "subsections" and insert in lieu thereof "subsection."

The amendment was agreed to.

The next amendment was, on page 2, line 25, to strike out "allowances," and insert in lieu thereof "allowances."

The amendment was agreed to.

The next amendment was, on page 3, line 6, to strike out "officers" and insert in lieu thereof "Assistant Surgeons General."

The amendment was agreed to.

The next amendment was, on page 3, line 8, to strike out "either."

The amendment was agreed to.

The next amendment was, on page 8, between lines 23 and 24, to insert the following:

(g) Subsection (b) of the section herein redesignated as section 208 is amended to read:

(b) Reserve officers, except when otherwise provided by law, shall receive the same pay and allowances when on active duty as commissioned officers of the Regular Corps, including allowances for travel and transportation of household goods and effects.

The amendment was agreed to.

The next amendment was, on page 8, line 24, to strike out "(g)" and insert in lieu thereof "(h)", and on page 9, line 3, strike out "(h)" and insert in lieu thereof "(i)."

The amendment was agreed to.

The next amendment was, on page 9, between lines 5 and 6, to insert the following: "Professional categories."

The amendment was agreed to.

The next amendment was on page 23, line 20, to strike out "subsections (b) or" and insert in lieu thereof "subsection."

The amendment was agreed to.

The next amendment was on page 23, line 24, to strike out "renumbering" and insert in lieu thereof "sections 711 and 712, and references thereto, as sections 713 and 714, respectively,".

The amendment was agreed to.

The next amendment was on page 24, to strike out lines 24 and 25; on page 25, to strike out lines 1 to 10, inclusive; and on page 25, line 12, to strike out "713" and insert in lieu thereof "712."

The amendment was agreed to.

Mr. SMITH. Mr. President, this bill, which amends the Public Health Service Act, is mainly a technical bill to aid the Public Health Service in overcoming its professional personnel problems. Most of these problems relate chiefly to the difficulties experienced by the Service in securing and retaining adequately trained physicians and other technical and professional personnel for work in the field of public health.

In the past, the Congress has kept the commissioned corps of the Public Health Service on a parity with the Army and Navy in regard to rates of pay and rates of promotion. The Public Health Service Act provides specifically that Public Health Service officers shall be promoted after the same length of service as officers of the Medical Corps of the Army. The Army promotion bill—H. R. 4830—recently passed by the Congress provides substantial revisions of the Army system, and a substantial portion of the amendments proposed by S. 1454 are attributable to these revisions. The bill as reported also requires some additional amendments necessitated largely by failure to obtain its enactment during the last session of the Congress and to correct obvious typographical errors. Additional minor amendments of substance are also recommended to make S. 1454, as reported, conform generally with H. R. 3924, as reported.

I have certain recommended amendments which are purely technical, and which I should like to have stated, in the hope that we can get the bill passed. Let me say that the Committee on Labor and Public Welfare considered this matter, referred it to its staff, and had it carefully checked, and the members of the committee felt that they were prepared to report the bill with the recommendation that it pass. I offer these technical amendments in order to perfect the bill, and I ask that the amendments be read at the desk.

The ACTING PRESIDENT pro tempore. If the Senator will send the amendments to the desk, they will be stated.

Mr. SMITH. I should like to have the amendments considered and adopted en bloc. If that is done, I shall have a final amendment to offer, in addition to the others.

Mr. WHERRY. Mr. President, have the committee amendments been agreed to?

The ACTING PRESIDENT pro tempore. They have been agreed to. The clerk will proceed to state the amendments offered en bloc by the Senator from New Jersey.

The amendments were read, as follows:

1. Page 1, line 7, insert immediately after the semicolon and before the quotation marks: "opiates (as defined in section 3228 (f) of the Internal Revenue Code):".

2. Page 3, line 7, strike out "officers" and insert in lieu thereof "Assistant Surgeons General."

3. Page 4, line 21, strike out "surgery" and insert in lieu thereof "surgery,".

4. Page 7, line 11, strike out the word "plus."

5. Page 17, line 9, insert after the word "corps" the following: "(above the grade of junior assistant)."

6. Page 24, line 4, strike out "such subsection (b)" and insert in lieu thereof "subsection (b) of such section."

7. Page 24, line 8, strike out "as" and insert in lieu thereof "to."

1. Page 8, line 8, strike out "January" and insert in lieu thereof "July."

2. Page 19, line 12, strike out "January" and insert in lieu thereof "July."

3. Page 19, line 19, after the period, insert the following new sentence: "Any officer holding, on June 30, 1948, an appointment pursuant to such section to a higher temporary grade shall continue in such grade until such appointment is terminated, as the President may direct."

4. Page 19, line 20, through page 20, line 2, amend subsection (c) of section 6 to read:

"Effective as of the date of the enactment of this Act, each officer of the Regular Corps on such date, in addition to the credit he has under preexisting legislation for purposes of promotion, shall be credited with 3 years of service."

5. Page 20, lines 3 to 21, amend subsection (d) of section 6 to read:

"(d) (1) Officers of the Regular Corps who have, or who on or before July 1, 1948, will have, the years of service prescribed in paragraph (2) of section 210 (d) of the Public Health Service Act, as amended by this act, for promotion to the senior assistant, full, or senior grade, shall be recommended to the President for such promotion, to be effective as of July 1, 1948, whether or not vacancies exist in such grade. Such promotions shall be made without examination, except that no promotions shall be made to the senior grade or any grade immediately below a restricted grade until the officer is found qualified for promotion pursuant to subsection (c) of section 210 of the Public Health Service Act, as amended by this Act. No promotion shall be made pursuant to this paragraph to any grade in any professional category if such grade has been made a restricted grade pursuant to subsection (b) of section 210 of the Public Health Service Act, as amended by this Act. For purposes of seniority an officer promoted under this paragraph shall be credited with the years of service in the grade to which promoted equal to the excess of his years of service on the date of promotion over the years of service required for promotion to such grade under paragraph (2) of section 210 (d) of the Public Health Service Act, as amended by this Act.

"(2) Officers in the junior assistant grade in the Regular Corps who have, or who on or before July 1, 1948, will have four or more years of service in the junior assistant grade, shall be recommended to the President for promotion to the assistant grade, to be effective as of July 1, 1948, without examination and whether or not vacancies exist in such grade. For purposes of promotion and seniority in grade, an officer promoted under this paragraph shall be credited with the years of service equal to the excess of his years of service on the date of promotion over 4 years."

6. Page 21, line 5, strike out "January" and insert in lieu thereof "July."

The ACTING PRESIDENT pro tempore. The Chair understands from the Senator from New Jersey that these are a series of technical amendments which he desires to have considered and adopted en bloc.

Mr. SMITH. That is correct. All of them are set out on the memorandum which has been furnished me by the Public Health Service.

Mr. RUSSELL. Mr. President, will the Senator yield to me?

Mr. SMITH. I am glad to yield.

Mr. RUSSELL. I should like to ask whether the amendments have been considered by the standing committee which reported the bill.

Mr. SMITH. All of them have been considered by the Committee on Labor and Public Welfare. We referred all these amendments to our staff, for the

staff to check up on them. The staff reported to the committee that all the amendments were technical, having to do with typographical changes, and modifications of that nature, in order to make the bill conform, first, to the Army promotion bill, and, second, to House bill 3924. We are trying to make the bill conform to them.

Mr. RUSSELL. I have no objection to the Senator's purpose; but the question in my mind is whether the amendments were approved by the committee or were approved by the staff. Those are different things.

Mr. SMITH. I agree with the Senator as to that.

Mr. TAFT. Mr. President, will the Senator yield to me, to permit me to make a statement in regard to this matter?

Mr. SMITH. I yield.

Mr. TAFT. Let me say that the amendments were presented to the committee by the staff, and the committee approved the amendments. These amendments are purely technical in nature. There are one or two other amendments which the committee recommended, which make slight changes in the bill.

Mr. RUSSELL. The committee then took formal action in approving the amendments; did it?

Mr. TAFT. That is my recollection.

Mr. SMITH. Yes; that is my recollection.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. MORSE. I submit that it is not good parliamentary practice to pass on a bill in this way during the call of the calendar. I respectfully suggest that the bill should be reprinted, so that all Members of the Senate may see it in its final form, with all the so-called technical amendments printed and the bill prepared in its final form with the amendments. I do not think there will be a very costly lapse of time if we proceed in that way.

So, Mr. President, although I am in favor of the bill, I am opposed to having the Senate follow the procedure presently being followed; because when we begin to adopt amendments en bloc in the Senate of the United States, it is time to call a halt. Therefore I object.

Mr. TAFT. Mr. President, let me suggest that the amendments be adopted and the bill printed with the amendments appearing as if they were committee amendments, and then the bill can be considered at the next session.

Mr. MORSE. I think the procedure suggested by the Senator from Ohio is proper. It gives the Senate a chance to object to the bill when the question of its final passage is before the Senate, if Senators do not like the bill as they see it when it is reprinted.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendments which have been offered en bloc by the Senator from New Jersey.

Mr. SMITH. I should like to know whether the bill will remain on the calendar.

The ACTING PRESIDENT pro tempore. The bill will remain on the calendar, with the amendments printed.

The question is on agreeing to the amendments submitted en bloc by the Senator from New Jersey.

The amendments were agreed to en bloc, and the bill was ordered to be reprinted showing the amendments, and to be placed on the calendar.

BILLS AND RESOLUTION PASSED OVER

The bill (S. 1481) to authorize the Board of Commissioners of the District of Columbia to establish daylight-saving time in the District was announced as next in order.

SEVERAL SENATORS. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 2298) to amend the Interstate Commerce Act, as amended, and for other purposes, was announced as next in order.

Mr. WHERRY. Let the bill be passed over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 84) to amend the Nationality Act of 1940, as amended, was announced as next in order.

Mr. RUSSELL. Let the bill go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1372) authorizing the Wyandotte Tribe of Oklahoma to sell tribal cemetery, was announced as next in order.

Mr. WHERRY. Let the bill go over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The resolution (S. Res. 150) to discharge the Committee on the Judiciary from the further consideration of Senate Resolution 116 was announced as next in order.

Mr. McCARRAN. Let the resolution be passed over.

The ACTING PRESIDENT pro tempore. The resolution will be passed over.

The bill (H. R. 966) to amend section 14 of the Veterans' Preference Act of June 27, 1944, was announced as next in order.

Mr. LANGER. Mr. President, I hope this bill may be passed at this time. It simply provides that these veterans, who have been given the run-around by various agencies of the Government, shall be able to go to someone to see about getting jobs.

The ACTING PRESIDENT pro tempore. The Chair wishes to call the attention of the Senator from North Dakota to the fact that the Chair is advised by the clerks that this bill is a companion measure to Senate bill 1494, which has already been passed and has become law.

Mr. LANGER. Mr. President, it is an entirely different bill.

The ACTING PRESIDENT pro tempore. It is marked on the Senate Calendar as being a corresponding bill to Senate bill 1494, which has become Public Law 325.

Does the Senator from North Dakota wish to have that matter checked, and to have the bill passed over temporarily? There would be no reason to pass it, if it is identical with the other bill.

Mr. LANGER. Let me inquire who objected to the other bill.

The ACTING PRESIDENT pro tempore. No one has objected to the other bill. The Chair is advised by the clerks that it is their information that the companion bill has already been passed and has become law.

Mr. WHERRY. Mr. President, I suggest that the distinguished Senator from North Dakota check on that matter; and if he finds, before the call of the calendar is concluded, that the bill has been passed, as has been stated by the Chair, then I assume there would be no objection to having this bill passed over or indefinitely postponed.

The ACTING PRESIDENT pro tempore. Under the circumstances, the bill will be temporarily passed over, so as to give the Senator from North Dakota an opportunity to examine into it.

The bill (S. 1089) to amend the Civil Service Retirement Act of May 29, 1930, as amended, was announced as next in order.

Mr. WILLIAMS. Let the bill be passed over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

FACILITATION OF PROCUREMENT OF SUPPLIES AND SERVICES BY THE WAR AND NAVY DEPARTMENTS

The bill (H. R. 1366) to facilitate procurement of supplies and services by the War and Navy Departments, and for other purposes, was announced as next in order.

Mr. AIKEN. Mr. President, I shall ask that this bill be passed over today, not because I object to it so far as it goes, but because there are other agencies of the Government which also should have the same right to make purchases in case of an emergency.

If this bill is passed over today, by the time the calendar is next called we can have those additional matters ironed out. But other agencies are concerned; some of them buy technical materials for the development of air transportation, for instance. I may also cite the Department of Agriculture and the Public Health Services, which ofttimes have to purchase serums or medicines in a great hurry. Provision for such matters and similar matters should be included in the bill.

So, as I have stated, I have no objection to the bill so far as it goes, but I hope we may postpone the passage of the bill until provision for the additional matters is included, so that it will not be necessary for us to introduce two or three other bills, or even one other bill, in order to cover other departments or agencies of the Government in connection with this matter.

Mr. GURNEY. Mr. President, will the Senator yield to me?

Mr. AIKEN. I yield.

Mr. GURNEY. I had understood in advance that the Senator from Vermont had the intention of adding to the bill a provision to include the Treasury Department along with the National Mili-

tary Establishment. I am wondering whether the Senator is familiar with the fact that the Treasury Department now has before the Bureau of the Budget, and probably will present to us soon, its idea regarding the modernization of its procurement system.

Mr. AIKEN. No; I have not. In fact, I had not given this bill a single thought until I saw it on the calendar today.

I have no objection to the provisions of the bill. I simply hope that we can iron out the situation so that other departments which have to make emergency purchases, or purchases of a technical nature, or purchases of such nature that there cannot possibly be any competition in the bidding, may also come under the bill. I hope we can get the matter straightened out by the next time the calendar is called.

The ACTING PRESIDENT pro tempore. The Chair understands that the Senator from Vermont rather objects to the present consideration of the bill than to the bill itself.

Mr. AIKEN. That is correct; and I wish to explain that my objection is not to the provisions of the bill itself.

Mr. GURNEY. Mr. President, inasmuch as the Senator from Vermont has yielded to me, I should like to suggest that he have such amendments as he has in mind ready as soon as possible, for the passage of the bill is important to the armed services. Certainly we cannot expect them to carry on much longer without this authority. So I should like to give notice that I shall seek to have the bill called up in the very near future, in case there is too long a delay on the part of the other departments.

Mr. AIKEN. I assure the Senator from South Dakota that if the matter cannot be ironed out at a reasonably early date, I shall not continue to object to the passage of this bill.

Mr. GURNEY. I thank the Senator.

Mr. BYRD. Mr. President, I hope the Senator from Vermont will withhold his objection, in order to permit me to offer some amendments, all of which are of a technical character, except for one amendment which relates to subcontractors, an amendment designed to remedy the situation created by General Meyers in connection with the fraud he perpetrated on the Government. The only purpose is to offer the amendments in order to have them adopted at this time, and then to let the bill remain on the calendar.

Mr. AIKEN. That will be satisfactory.

The ACTING PRESIDENT pro tempore. The Chair wishes to call attention to the fact that prior to the consideration of amendments, it will be necessary to have the bill considered by the Senate.

Mr. AIKEN. Mr. President, I withdraw my objection, with the understanding that the technical amendments may be adopted, and that the bill then will be passed over.

Mr. BYRD. Mr. President, I also ask that the bill be printed, with the amendments appearing as committee amendments, and that the bill then remain on the calendar.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill (H. R. 1366) to facilitate procurement of supplies and services by the War and Navy Departments and for other purposes, which had been reported from the Committee on Armed Services with amendments.

The ACTING PRESIDENT pro tempore. Will the Senator now send the amendments to the desk?

Mr. BYRD. Mr. President, I now submit the several amendments and send them to the desk.

The ACTING PRESIDENT pro tempore. The amendments will be stated.

The LEGISLATIVE CLERK. On page 15, line 20, it is proposed to strike out "War Department" and insert in lieu thereof "Department of the Army."

On page 15, line 20, strike out "and" and insert in lieu thereof "the Department of the Air Force."

On page 15, line 21, immediately following "Coast Guard", insert a comma and the following: "and the National Advisory Committee for Aeronautics."

On page 15, line 22, immediately following "any," strike out "of."

One page 17, line 4, strike out "or" and insert in lieu thereof "for."

On page 18, line 16, strike out the period and insert in lieu thereof a semicolon.

On page 22, line 17, add a new sentence as follows:

All cost and cost-plus-a-fixed-fee contracts shall provide for advance notification by the contractor to the procuring agency of any subcontract thereunder on a cost-plus-a-fixed-fee basis and of any fixed-price subcontract or purchase order which exceeds in dollar amount either $25,000 or 5 percent of the total estimated cost of the prime contract; and a procuring agency, through any authorized representative thereof, shall have the right to inspect the plants and to audit the books and records of any prime contractor or subcontractor engaged in the performance of a cost or cost-plus-a-fixed-fee contract.

On page 25, line 17, strike out "War" and insert in lieu thereof "the Army."

On page 25, line 17, strike out "or" and insert in lieu thereof a comma.

On page 25, line 17, strike out "and" and insert in lieu thereof "or of the Air Force" and a semicolon.

On page 25, line 18, immediately following "Treasury Department", insert a semicolon and the following: "and the Executive Secretary, National Advisory Committee for Aeronautics."

On page 28, line 12, strike out "War Department" and insert in lieu thereof "Department of the Army."

On page 28, line 13, strike out "Navy Department or" and insert in lieu thereof "Department of the Navy, the Department of the Air Force" and a comma.

On page 28, line 14, immediately following "Treasury Department", strike out the colon and insert "or the National Advisory Committee for Aeronautics" and a semicolon.

On page 30, line 24, strike out "War" and insert in lieu thereof "the Army."

On page 30, line 25, strike out "War Department" and insert in lieu thereof "Department of the Army."

On page 31, line 3, strike out "War" and insert in lieu thereof "the Army."

On page 31, lines 8 and 9, strike out the words "on October 1, 1947" and insert in lieu thereof "90 days after the date of enactment."

Amend the title so as to read: "An act to facilitate procurement of supplies and services by the Departments of the Army, the Navy and the Air Force, the Coast Guard, and the National Advisory Committee for Aeronautics, and for other purposes."

Mr. WHERRY. Is it the desire of the distinguished Senator from Virginia that the amendments be adopted, and that the bill then go over until it is printed?

The ACTING PRESIDENT pro tempore. That is the understanding of the Chair. The question is on agreeing en bloc to the amendments submitted by the Senator from Virginia.

The amendments were agreed to.

The ACTING PRESIDENT pro tempore. The bill will be printed as amended, will remain on the calendar, and will be passed over.

RESOLUTION PASSED OVER

The resolution (S. Res. 144) authorizing an investigation of law enforcement and police administration in the District of Columbia was announced as next in order.

Mr. JOHNSTON of South Carolina. Over.

The ACTING PRESIDENT pro tempore. The resolution will be passed over.

BILLS PASSED OVER

The bill (S. 48) to provide for the demonstration of public library service in areas without such service or with inadequate library facilities was announced as next in order.

Mr. BALL. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 551) for the relief of the Tivoli Brewing Co. was announced as next in order.

Mr. JOHNSTON of South Carolina. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

VETERANS' PREFERENCE ACT—RESCISSION OF PRIOR AGENCY ACTION

The bill (S. 1644) to amend the Veterans' Preference Act of 1944 so as to permit rescission of prior agency action in complying with recommendations of the Civil Service Commission pursuant to appeals taken by preference employees was announced as next in order.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

Mr. REVERCOMB. May we have an explanation of the bill?

Mr. O'CONOR. The purpose of the bill is to grant authority to any Federal agency to rescind its order terminating

the service of a veteran in its employ. As the law now stands, as interpreted by counsel for the Civil Service Commission, there is no authority for the agency to rescind its order, even though it may desire to do so. It must reemploy the veteran as if he were a new employee, as a result of which he would lose a number of within-grade increments and other benefits that would accrue from the length of his service. The bill merely gives the agencies the right to rescind the order if they desire to do so.

Mr. REVERCOMB. Does the bill improve the position of the veteran?

Mr. O'CONOR. It does, appreciably. It is sponsored and approved by veteran's organizations.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 19 of the Veterans' Preference Act of 1944 (58 Stat. 387) is hereby amended by inserting before the period at the end of such section a colon and the following: "*Provided*, That any recommendation submitted to a Federal agency by the Civil Service Commission, pursuant to an appeal by any preference employee or former employee, shall be complied with by such agency; and any such Federal agency may, or shall if so directed by the Civil Service Commission, rescind any previous action taken by it as to any preference employee or former employee."

BILL PASSED OVER

The bill (H. R. 3051) to amend the act of July 19, 1940, and to amend section 2 and repeal the profit-limitation and certain other limiting provisions of the act of March 27, 1934, was announced as next in order.

Mr. MAGNUSON. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

CONSTRUCTION OF PUBLIC WORKS BY THE NAVY

The bill (S. 1675) to authorize the Secretary of the Navy to proceed with the construction of certain public works, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Navy is hereby authorized to establish or develop naval installations and facilities by the construction, installation, or equipment of temporary or permanent public works, including buildings, facilities, appurtenances, and utilities; or by the completion of such construction, installation, or equipment specifically approved by the Secretary of the Navy and heretofore undertaken as follows:

CONTINENTAL UNITED STATES

Naval air station, Alameda, Calif.: Test cells for turbine engines; $230,000.

Naval research laboratory, Anacostia, District of Columbia: Correction of deficiencies in existing utilities; $340,000.

National Naval Medical Center, Bethesda, Md.: Chapel; $205,000.

Marine training and replacement command, Camp Joseph H. Pendleton, Oceanside, Calif.: Acquisition of land, 575 acres; $46,500.

David Taylor Model Basin, Carderock, Md.: Wind tunnels and associated facilities; $1,410,000.

Naval aviation ordnance test station, Chincoteague, Va.: Acquisition of land, 6,740 acres; completion of range facilities; $1,648,800.

Naval amphibious base, Little Creek, Va.: Acquisition of land, 4,000 acres, on Bloodsworth Island, Dorchester County, Md.; $120,000.

Naval supplementary radio station, Dupont, S. C.: Radio operating building; $74,000.

Naval ordnance test station, Inyokern, Calif.: Acquisition of land, 60,000 acres; aerodynamics field laboratory (aerodynamics range), ground range, external ballistics, and electronics experimental installation; 115 duplex houses (230 family units); $5,303,000.

Naval aircraft modification unit, Johnsville, Pa.: Acquisition of navigation easements over approximately 250 acres of land in runway approach zone; $103,500.

Naval air station, Key West (Boca Chica), Fla.: Acquisition of land, approximately 1,000 acres; $60,000.

Naval ammunition depot, Jersey City, N. J.: Liquid fuel rocket test laboratory; $306,000.

Naval Reserve Armory, Lawrence, Mass.: Acquisition of land, 5.7 acres; $100.

Naval Reserve Armory, Lowell, Mass.: Acquisition of land, 4 acres; $800.

Naval ammunition depot, Mare Island, Calif.: Vacuum system housing, building A-216; $64,000.

Naval air station, Mojave, Calif.: Acquisition of land, 28 acres; $500.

Naval magazine, Montauk, Long Island, N. Y.: Acquisition of land, 44 acres; $53,300.

Postgraduate school, Monterey, Calif.: Development of postgraduate facilities, including buildings and accessories; $2,500,000.

Amphibious training base, Morro Bay, Calif.: Acquisition of land, 96.23 acres; $12,500.

Naval auxiliary air station, Oceana, Va.: Acquisition of navigation easements over approximately 400 acres of land; $46,000.

Naval air station, Patuxent River, Md.: Facilities for bombing target; $309,000.

Naval air missile test center, Point Mugu, Calif.: Sea test range, and test and evaluation facilities, including supporting facilities, services, and accessory construction; $34,520,000.

Naval construction battalion center, Port Hueneme, Calif.: Acquisition of land and improvements, 62.45 acres; $150,000.

Naval electronics laboratory, Point Loma, San Diego, Calif.: Laboratory supply and utility buildings, including services and accessories; $2,590,000.

Norfolk naval shipyard, Portsmouth, Va.: Acquisition of land, 4.857 acres; $4,370.

Naval research laboratory, Chesapeake Bay Annex, North Beach, Md.: Correction of deficiencies in existing utilities at Randle Cliffs, Md.; $340,000.

Special devices center, Sands Point, Long Island, N. Y.: Acquisition of land and buildings, 161.54 acres; $350,000.

Naval radio station, Skaggs Island, Sonoma, Calif.: addition to radio-operating building; $315,000.

Naval supply annex, Stockton, Calif.: Acquisition of land (small island), 3.88 acres; $1,800.

Aeronautical turbine laboratory, Trenton, N. J.: Laboratory buildings and facilities, including collateral equipment and accessory construction; $26,750,000.

Naval ordnance laboratory, White Oak, Md.: Completion of supersonic wind tunnels and aerodynamics range; explosives research facility; $2,275,000.

Naval unit, White Sands Proving Ground, Las Cruces, N. Mex.: Additional housing facilities; instrumentation of the 100-mile range and camp facilities; facilities for pilotless aircraft test range; $8,936,630.

Radio transmitting station (location to be determined): Radio transmission facilities, including collateral equipment and accessory construction; $7,000,000.

Naval research laboratory (location to be determined): Underwater sound reference laboratory; $1,120,000.

For correction of deficiencies in existing or approved facilities, for emergency projects authorized by the Secretary of the Navy, and repairs incident to casualties thereto within the continental United States, for the fiscal year 1948; $3,000,000.

OUTSIDE CONTINENTAL UNITED STATES

Naval operating base, Adak, Alaska: Ship-repair facilities; cold-storage building, ice-cream plant and milk facilities; two storehouses; dispensary; utility distribution systems, including water, sewer, electric power, heating plant, roads, walks, and drainage; $11,296,000.

Naval supplementary radio activity, Adak, Alaska: Operations building and associated facilities; $2,500,000.

Naval radio station, Adak, Alaska: Consolidated communication facilities, including buildings and accessories; $2,395,000.

Naval operating base, Argentia, Newfoundland: Facilities for fixed operation of mobile ground approach unit; water-treatment plant; $109,200.

Naval radio station, Argentia, Newfoundland: Consolidated communication facilities, including buildings and accessories; $2,385,000.

Submarine base, Balboa, C. Z.: Fire-alarm and sprinkler systems for buildings and piers; $222,500.

Naval radio station, Greenland, Consolidated communication facilities, including buildings and accessories; $1,020,000.

Naval operating base, Guam: Dredging and filling at Apra Harbor; utility distribution systems, including electric transmission, steam-generating plant, island water supply system, water storage and distribution, sewage and drainage systems, and extension of roads; barracks, mess hall, and galley; $24,040,000.

Naval medical center, Guam: Development of hospital facilities, including buildings and accessories; $30,000,000.

Naval air station, Guam: Facilities for fixed operation of mobile ground control approach unit; $16,500.

Naval ammunition depot, Guam: High explosive storage facilities and accessories; $14,000,000.

Naval supplementary radio activity, Guam: Bombproof communication facilities and accessories; $6,750,000.

Naval radio station, Guam: Permanent communication facilities, including buildings and accessories; $5,750,000.

Naval supply center, Guam: Permanent facilities, including storage buildings, fuel pipe lines, and accessories; $14,675,000.

Fleet Marine Force base, Guam: Development of facilities, including buildings, service depot facilities, and accessories; $9,823,000.

Submarine base, Guam: Marginal bulkhead, including base site preparation and accessory construction; $1,670,000.

Naval ammunition depot, Oahu, Hawaii: Acquisition of land, 520 acres at Waikele and Kipapa Gulches; acquisition of land at West Loch for barricaded sidings, 159.14 acres; $270,000.

Naval air station, Kodiak, Alaska: Facilities for fixed operation of mobile ground control approach unit; $16,500.

Naval radio station, Kodiak, Alaska: Consolidated communication facilities, including buildings and accessories; $2,225,000.

Naval shipyard, Pearl Harbor, Hawaii: Fire protection for drydock No. 2; modernization of water-front lighting, $143,700.

Naval base, Pearl Harbor, Hawaii: Water pumping station at Wahiawa Gulch; $3,575,000.

Naval station, Roosevelt Roads, Puerto Rico: Acquisition of land, Culebra Island; $110,000.

Naval operating base, Saipan: Air intercept training facilities; facilities for fixed operation of mobile ground approach unit; $165,000.

Naval radio station, Summit, C. Z.: Increase transmitter power output; $612,000.

Supplementary naval radio activity, Wahiawa, Hawaii: Permanent facilities for supplemental radio activity and accessories; $3,000,000.

For correction of deficiencies in existing or approved facilities, for emergency projects authorized by the Secretary of the Navy, and repairs incident to casualties thereto outside the continental United States, for the fiscal year 1948; $3,000,000.

SEC. 2. To accomplish the above authorized construction the Secretary of the Navy is authorized to acquire lands and rights pertaining thereto, or other interests therein, including the temporary use thereof, by donation, purchase, or otherwise.

SEC. 3. Family quarters for personnel of the Navy constructed on or subsequent to the effective date of this act whether heretofore, herein, or hereafter authorized shall not be of greater net floor area per unit than the following:

For flag officers, 1,100 square feet.

For captains, 1,670 square feet.

For commanders and lieutenant commanders, 1,400 square feet.

For warrant officers, commissioned warrant officers, and commissioned officers through the rank of lieutenant, 1,250 square feet.

For enlisted personnel and noncommissioned officers, 1,080 square feet.

For the purposes of this act, net floor area is defined as all floor space inside the exterior walls, excluding basement (or service space in lieu of basement), attic, garage, and porches.

The above area allowances shall supersede the limitations contained in the Act of July 8, 1946 (Public Law 492, Seventy-ninth Congress), and may be increased by not to exceed 10 percent for all quarters outside continental United States and by not to exceed 10 percent for quarters of commanding officers of stations or installations over and above that to which his rank would entitle him. Quarters for civilians shall be limited to conform to the allowances for officers or men of comparable status according to responsibility, rating, and pay, as determined by the Secretary of the Navy to be appropriate.

SEC. 4. There is hereby authorized to be appropriated, out of any money in the Treasury of the United States not otherwise appropriated, such sums of money as may be necessary for the purposes of this act, but not to exceed $69,800,000, for public works in continental United States during the fiscal year 1948, and $59,971,160 for public works outside continental United States during the fiscal year 1948. With respect to projects within and without continental United States, the approximate cost for each project enumerated in section 1 of this act may, in the discretion of the Secretary of the Navy, be varied upward or downward 10 percent, but the total cost of projects in continental United States authorized by this act shall not exceed $100,185,800, and the total cost of projects outside continental United States authorized by this act shall not exceed $139,769,400. Any such appropriation shall be available under the direction of the Secretary of the Navy for expenses incident to construction including administration, overhead, planning, and surveys, and shall be available until expended.

CONSTRUCTION AT MILITARY INSTALLATIONS BY THE ARMY

The bill (S. 1676) to authorize the Secretary of War to proceed with construction at military installations, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of War is hereby authorized to establish or develop military installations and facilities by the construction, installation, or equipment of temporary or permanent public works, including buildings, facilities, appurtenances, and utilities; or by the completion of such construction, installation, or equipment specifically approved by the Secretary of War and heretofore undertaken as follows:

CONTINENTAL UNITED STATES

Alamogordo Army Airfield, N. Mex.: Family quarters, rocket-firing facilities, and utilities; $1,622,720.

Andrews Field, Md.: Family quarters and utilities; $3,143,630.

Army War College, Washington, D. C.: Family quarters and utilities; $125,700.

Army and Navy General Hospital, Hot Springs, Ark.: Family quarters, barracks, and utilities; $852,100.

Army and Navy Medical Procurement Office, Engineering and Development Division, Fort Totten, N. Y.: Medical equipment laboratory; $390,000.

Anniston Ordnance Depot, Ala.: Waste disposal facilities; $60,000.

Fort Belvoir, Va.: Family quarters and utilities; $1,188,570.

Fort Benning, Ga.: Family quarters and utilities; $1,466,050.

Bergstrom Field, Tex.: Family quarters and utilities; $1,501,970.

Biggs Field, Tex.: Family quarters and utilities; $1,310,800.

Fort Bliss, Tex. (including William Beaumont General Hospital): Family quarters and utilities; $2,000,200.

Fort Bragg, N. C.: Family quarters and utilities; $1,778,400.

California Institute of Technology, California: Completion of supersonic wind tunnel; $410,700.

Chanute Field, Ill.: Family quarters and utilities; $1,310,800.

Craig Field, Ala.: Crash station; $26,370.

Camp Detrick, Md.: Family quarters, munitions-loading building, crop research and decontamination facilities, and utilities; $1,115,330.

Edgewood Arsenal, Md. (including Technical Command, Army Chemical Center, and Chemical Corps School): Family quarters, chemical laboratory facilities, and utilities; $959,950.

Eglin Field, Fla.: Family quarters, dock-warehouse facilities and utilities; $3,136,980.

Fitzsimons General Hospital, Denver, Colo.: Family quarters and utilities; $611,500.

Forest Glen, Md.: Complete plans and specifications for construction of an Army Institute of Pathology Building and a new 1,000-bed general hospital (on a 1,500-bed chassis), including all necessary auxiliary facilities; $850,000.

Goodfellow Field, Tex.: Family quarters and utilities; $1,310,800.

Hamilton Field, Calif.: Family quarters, additional fire station, and utilities; $1,372,600.

Fort Hamilton, New York Port of Embarkation, N. Y.: Family quarters and utilities; $575,230.

Camp Hood, Tex.: Family quarters and utilities; $4,455,950.

Fort Sam Houston, Tex. (including Brooke Army Medical Center): Family quarters and utilities; $2,009,900.

Huntsville Arsenal, Ala.: Reservation fencing; $20,600.

Fort Jay, N. Y.: Family quarters and utilities; $682,700.

Kearney Army Airfield, Nebr.: Family quarters and utilities; $1,511,840.

Keesler Field, Miss.: Family quarters and utilities; $1,356,700.

Kelly Field, Tex.: Helicopter engine testing facilities; $152,000.

Fort Knox, Ky.: Family quarters and utilities; $4,595,300.

War Department New Receiving Station, La Plata Md.: Family quarters and utilities; $52,330.

Fort Leavenworth, Kans.: Printing plant, library addition, cell-locking system, electrical supply and distribution facilities; $1,714,500.

Camp Lee, Va.: Family quarters, bachelor quarters, barracks, and utilities; $4,202,600.

Letterman General Hospital, San Francisco, Calif.: Family quarters and utilities; complete plans and specifications for construction of a new 1,500-bed general hospital, including all necessary auxiliary facilities; $1,392,820.

Fort Lewis, Wash.: Family quarters and utilities; $4,244,450.

Lexington Signal Depot, Ky.: Garage and equipment storage facilities; $25,000.

Lockbourne Army Airfield, Ohio: Family quarters and utilities; $739,840.

Lowry Field, Colo.: Family quarters and utilities; $1,310,800.

MacDill Field, Fla.: Family quarters, control tower, crash station, and utilities; $1,030,380.

Madigan General Hospital, Fort Lewis, Wash.: Family quarters and utilities; $565,000.

Malta Test Station, N. Y.: Hydraulic test laboratory; $205,000.

Marieta Army Airfield, Ga.: Control tower; $54,500.

Fort Mason, San Francisco Port of Embarkation, Calif.: Family quarters and utilities; $401,750.

Fort McPherson, Ga.: Family quarters and utilities; $541,350.

Fort George G. Meade, Md.: Family quarters and utilities; $995,800.

Mountain Home Army Airfield, Idaho: Family quarters and utilities; $940,880.

Muroc Army Airfield, Calif.: Family quarters, rocket static test facilities, control tower, all-altitude speed course and utilities; $4,057,300.

Fort Myer, Va.: Replace field commissary refrigerator facilities; $108,000.

Oakland Army Base, San Francisco Port of Embarkation, Calif.: Family quarters, barracks, and utilities; $907,580.

Oliver General Hospital, Augusta, Ga.: Family quarters and utilities; $231,000.

Percy Jones General Hospital, Battle Creek, Mich.: Family quarters and utilities; $231,000.

Picatinny Arsenal, N. J.: Research and development facilities for high explosives, completed bombs, rockets, and rocket powders, and laundry; $1,978,800, of which $1,228,800 is authorized to be expended during the fiscal year 1948.

Presidio of San Francisco, Calif.: Family quarters and utilities; $709,750.

Randolph Field, Tex.: Family quarters, control tower, and utilities; $1,465,300.

Rapid City Army Airfield, S. Dak.: Development of facilities for VVHB, including family quarters, and utilities; $6,501,970.

Fort Riley, Kans.: Family quarters and utilities; $826,300.

Roswell Army Airfield, N. Mex.: Training facilities; $95,790.

Sacramento Signal Depot, Calif.; Irrigation and sprinkling; $47,970.

San Antonio Army Airfield, military training center, Texas: Family quarters and utilities; $1,310,800.

Scott Field, Ill.: Family quarters and utilities; $1,316,500.

Selfridge Field, Mich.; Family quarters, crash-truck station, and utilities; $800,840.

Fort Sheridan, Ill.: Family quarters and utilities; $360,900.

Fort Sill, Okla.: Family quarters and utilities; $765,000.

Camp Stoneman, San Francisco port of embarkation, Calif.: Family quarters and utilities; $878,570.

Tinker Field, Okla. (including Oklahoma City Air Depot): Jet engine test facilities; $362,000.

Two Rock Ranch station, Calif.: Family quarters, water pipe line, and utilities; $149,800.

United States Military Academy, West Point, N. Y.: Family quarters and utilities; complete plans and specifications for a new academic building; $3,249,750.

Valley Forge General Hospital, Phoenixville, Pa.: Family quarters and utilities, $231,000.

Vint Hill Farms station, Va.: Family quarters and utilities; $1,319,100.

Watertown Arsenal, Mass.; Magnesium shop building; $87,000.

White Sands Proving Ground, N. Mex.: Family quarters, laboratory, storage and testing facilities for rocket development, administration facilities, central fire station, hospital expansion, and utilities; $3,887,430.

Williams Field, Ariz.: Single-engine gunnery range; $51,500.

Wingate Ordnance Depot, N. Mex.: Additional well; $20,000.

Fort Worth Army Airfield, Tex.: Family quarters, ammunition storage, training facilities, and utilities; $2,394,770.

Wright Field, Ohio: Rotor wing-testing facilities, testing laboratory facilities, central heating plant, and scavenging building for wind tunnels; $2,038,500.

Yuma test branch of the Engineer Board, Arizona: Family quarters, bachelor quarters, infirmary, post exchange, roads, and utilities; $488,850.

Various Army Air Forces stations: Removal of flight hazards, and construction of night lighting systems, low approach instrument landing systems, high frequency direction finding systems, radio range stations, sprinkler systems, and fire-prevention facilities; $5,085,500.

OUTSIDE CONTINENTAL UNITED STATES

Whittier, Alaska: Development of port facilities; $5,332,277.

Army Airfield at Mile 26, near Fairbanks, Alaska: Family quarters, barracks, and utilities; $2,021,118.

Ladd Field, Alaska: Family quarters, bachelor quarters, barracks, operational facilities, hospital, community facilities, and utilities; $20,694,850, of which $11,694,850 is authorized to be expended during the fiscal year 1948.

Fort Richardson-Elmendorf Field, Alaska: Family quarters, bachelor quarters, barracks, storage facilities, communication facilities, school, motor pool facilities, and utilities; $10,190,375.

Adak Army Base and Airfield, Aleutian Islands: Family quarters, barracks, communication facilities, and utilities, $4,334,600.

Army airfield, Fort Yukon, Alaska: Establishment of fighter field with necessary operational facilities, bachelor quarters, barracks, mess hall, and utilities; $4,160,950.

Army airfield, Nenana, Alaska: Operational facilities, barracks, and utilities; $505,000.

Adak ACS station, Aleutian Islands: Family quarters, operational buildings, garages, and utilities; $950,050.

Anchorage ACS station, Alaska: Family quarters and utilities; $514,280.

Big Delta ACS station, Alaska: Family quarters and utilities; $57,410.

Ketchikan ACS station, Alaska: Family quarters, operational buildings, and utilities; $114,160.

Cathedral Bluff ACS station, Alaska: Family quarters and utilities; $56,160.

Fort Randall ACS station (Cold Bay), Alaska: Family quarters and utilities; $57,410.

Juneau ACS station, Alaska: Family quarters and utilities; $56,160.

Northway ACS station, Alaska: Family quarters and utilities; $56,160.

Naknek ACS station, Alaska: Family quarters, operational buildings, garage, and utilities; $79,760.

Skagway ACS station, Alaska: Family quarters, operational buildings, and utilities; $107,750.

Lena Point ACS station, Alaska: Operational buildings, quarters, and utilities; $46,000.

ACS station between Haines and Juneau, Alaska (location to be determined): Operational buildings, quarters, and utilities; $46,000.

Bethel ACS station, Alaska: Operational buildings; $30,000.

Kodiak ACS station, Alaska: Operational buildings; $14,420.

Nome ACS station, Alaska: family quarters, operational building, and utilities; $77,944.

Sitka ACS station, Alaska: Operational building and garage; $8,600.

New Tripler General Hospital, Territory of Hawaii: Family quarters, bachelor quarters, and utilities; $3,472,960.

Hickam Field, T. H.: Family quarters (conversions) and barracks (reconstruction); $2,242,200.

Fort Armstrong, T. H.: Telephone-exchange building; $55,000.

Helemano, T. H.:Family quarters and utilities, $473,415.

Waipio, T. H.: Family quarters and utilities; $207,760.

Fort DeRussey, T. H.: Family quarters and utilities; $528,220.

Army Ground Force bases, Marianas: Housing, storage, technical and operational facilities, and utilities; $5,983,720.

Army airfields, Marianas: Housing, storage, technical and operational facilities, and utilities; $12,270,677.

Clark-Stotsenberg area, Philippine Islands (Army Security Agency): Barracks and utilities; $669,300.

Kadena Field, Okinawa: Barracks and utilities; $3,681,000.

Sukiran, Okinawa: Barracks and utilities; $1,320,350.

Albrook Field, C. Z.: Sewerage; $310,400.

France Field, C. Z.: Family quarters and utilities; $172,120.

Howard Field, C. Z.: Operational facilities, supply and maintenance building, and rehabilitation of gasoline storage and distribution system; $714,800.

Fort Davis, C. Z.: Family quarters and utilities; $1,753,800.

Fort Brooke, P. R.: Family quarters, water storage, and utilities; $324,100.

Fort Buchanan, P. R.: Bachelor quarters, water storage, refrigeration plant, and utilities; $1,267,000.

Borinquen Field, P. R.: Water storage and distribution facilities; $165,000.

Henry Barracks, P. R.: Barracks, water storage, and utilities; $716,200.

Salina training area, Puerto Rico: Rifle range and training area; $82,400.

San Jose Island, Republic of Panama: Family quarters, utilities, and dock; $221,830.

Panama Canal Zone and vicinity: Regional project for malaria control; $195,400.

Keflavik Airport, Iceland: Development of Keflavik Airport, $10,352,100.

Harmon Field, Newfoundland: Family quarters, operational facilities, laundry, and dry-cleaning facilities, warehouses, and utilities; $12,087,100.

Frobisher Bay (Upper Frobisher), Canada: Family quarters and utilities; $396,905.

Fort Chimo, Canada: Family quarters and utilities; $214,570.

Kindley Field—Fort Bell, Bermuda: Family quarters (including conversions), water evaporation building, and utilities; $2,359,938.

Alaska: Classified installation for Army Air Forces; $5,000,000.

Newfoundland: Two classified installations for Army Air Forces; $3,500,000.

SEC. 2. To accomplish the above-authorized construction the Secretary of War is authorized to acquire lands and rights pertaining thereto, or other interest therein, including the temporary use thereof, by donation, purchase, exchange of Government-owned lands, or otherwise, without regard to section 3648, Revised Statutes, as amended, in administering the provisions of the act of July 9, 1942 (56 Stat. 654; 43 U. S. C. Supp. 315q).

SEC. 3. There is hereby authorized to be appropriated, out of any money in the Treasury of the United States not otherwise appropriated, such sums of money as may be necessary toward meeting the purposes of this act, but not to exceed $100,000,000 for public works in the continental United States during the fiscal year 1948, which includes $5,000,000 for emergency projects within the United States as may be authorized by the Secretary of War, and $125,000,000 for public works outside continental United States during fiscal year 1948, which includes $20,000,000 for emergency projects outside the United States as may be authorized by the Secretary of War. With respect to projects within and without continental United States, the approximate partial cost for each project enumerated and authorized in section 1 of this act may, in the discretion of the Secretary of War, be varied upward or downward 10 percent, but the total cost of the work on the projects in continental United States authorized by this act shall not exceed $107,280,960 and the total cost of the work outside continental United States authorized by this act shall not exceed $140,249,699. Any such appropriation shall be available under the direction of the Secretary of War for expenses incident to construction, including administration, overhead, planning, and surveys, and shall be available until expended: *Provided*, That any work undertaken under this authorization may be prosecuted by direct appropriations, or by both direct appropriations and continuing contracts subject to the availability of subsequent appropriations: *Provided further*, That no money from current or future appropriations for the Army shall be expended for the construction of family quarters for personnel of the Army of greater net floor area in square feet per unit than the following:

For enlisted men, 1,080.

For warrant officers, flight officers, and commissioned officers of and below the rank of captain, 1,250.

For majors and lieutenant colonels, 1,400.

For colonels, 1,670.

For general officers, 2,100.

For the purposes of this act, net floor area is defined as the space inside the exterior walls, excluding basement (or service space in lieu of basement), attic, garage, and porches: *Provided*, That these areas may be increased not to exceed 10 percent at activities outside the continental United States, and not to exceed 10 percent for quarters of commanding officers of stations, bases, or installations based on the normal rank of such officers: *Provided further*, That quarters for civilians shall be limited to conform to the allowances for officers or men of comparable status according to responsibility rating, and pay as determined by the Secretary of War to be appropriate.

SEC. 4. The following laws and parts of laws are hereby repealed: That part of the act of March 2, 1905 (33 Stat. 836; 10 U. S. C. 1331) reading as follows: "No military post within the United States shall be established without the express authority of Congress"; that

part of the act of May 12, 1917 (40 Stat. 74; 10 U. S. C. 1333) reading as follows: "No expenditure exceeding $5,000 shall be made upon any building or military post or grounds about the same without the approval of the Secretary of War, upon detailed estimates submitted to him"; that part of the act of February 27, 1893 (27 Stat. 484; 10 U. S. C. 1336) reading as follows: "The erection, construction, and repair of all buildings and other public structures in the Quartermaster Corps shall, as far as may be practicable, be made by contract, after due legal advertisement"; and that part of the act of May 12, 1917 (40 Stat. 58; 24 U. S. C. 21), reading as follows: "No building or structure of a permanent nature, the cost of which shall exceed $30,000, shall be erected for use as an Army hospital unless by special authority of Congress." Revised Statutes, 1136, as amended by section 1 of the act of February 27, 1877 (19 Stat. 242; 10 U. S. C. 1339), is hereby further amended by deleting the figure "$20,000" and inserting the figure "$100,000." The following parts of acts are hereby repealed, and shall not be applicable to contracts or expenditures under the appropriations "Engineer Service, Army," contained in the Military Appropriation Acts, 1946 and 1947: That part of section 1 of the act of June 25, 1910 (36 Stat. 721), which reads as follows: "*Provided*, That hereafter no money appropriated for military posts shall be expended for the construction of quarters for officers of the Army, or for barracks and quarters for the artillery the total cost of which, including heating and plumbing apparatus, wiring and fixtures, shall exceed, in the case of quarters of a general officer, the sum of $15,000, of a colonel or an officer above the rank of captain, $12,000, and of an officer of and below the rank of captain, $9,000," as modified by section 1 of the act of February 25, 1927 (44 Stat. 1235), which reads as follows: "*And provided further*, That hereafter no part of this appropriation or any appropriation hereafter made shall be expended for the construction of quarters for officers of the Army in the United States or its possessions, the total cost of which, including heating and plumbing apparatus, wiring and fixtures, shall exceed in the case of an officer above the rank of captain, $14,500, and of an officer of and below the rank of captain, $12,500."

BILLS AND JOINT RESOLUTION PASSED OVER

The bill (S. 1493) to amend section 19 of the Veterans' Preference Act of June 27, 1944, and for other purposes, was announced as next in order.

Mr. IVES. Over.

The ACTING PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1356) providing for the incorporation of the Franco-American War Veterans was announced as next in order.

Mr. MAGNUSON. Mr. President, I ask that the bill go over, not that I am opposed to it, but because the Committee on the Judiciary has had difficulty in establishing a policy under which such groups would be allowed incorporation.

The PRESIDING OFFICER (Mr. IVES in the chair). The bill will be passed over.

The bill (S. 430) to amend the Civil Service Retirement Act, approved May 29, 1930, as amended, so as to make such act applicable to officers and employees of national farm loan associations and production credit associations, was announced as next in order.

Mr. TAFT. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1557) to incorporate the Catholic War Veterans of the United States of America was announced as next in order.

Mr. MAGNUSON. I make the same objection I made to the former bill.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1375) to incorporate the Jewish War Veterans of the United States of America was announced as next in order.

Mr. MAGNUSON. I make the same objection.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 3978) to provide for the temporary advancement in ranks and increase in salary of lieutenants in the Metropolitan Police Force of the District of Columbia, serving as supervisors of certain squads, was anounced as next in order.

Mr. AIKEN. Over.

The PRESIDING OFFICER. The bill will be passed over.

SURVEYS OF NAVIGABLE STREAMS

The bill (H. R. 3146) to amend section 3 of the Flood Control Act approved August 28, 1937, and for other purposes, was announced as next in order.

Mr. LUCAS. Over.

Mr. REVERCOMB. Would the Senator who made objection permit an explanation of the bill?

The PRESIDING OFFICER. Does the Senator from Illinois withdraw his objection temporarily?

Mr. LUCAS. I withdraw the objection temporarily.

Mr. REVERCOMB. Mr. President, at this time, under the law the Secretary of War is authorized to make surveys of navigable streams to determine whether improvements should be made upon those streams for purposes of navigation and flood control. The bill simply authorizes the Secretary of Agriculture to examine and report upon watersheds affecting such streams, so that the Congress and its committees dealing with the subject may know whether or not there is work that should be done with respect to conserving the waters, and whether legislation should be enacted with respect to water upon those watersheds affecting agriculture. At one time in the past I think such a report was made by the Secretary of Agriculture, but for some reason the provision was omitted from one of the later bills. At the present time, unless authorization bills dealing with flood control specifically authorize the Secretary of Agriculture to make surveys, they cannot be made. The bill would permit them to be made upon the request of committees dealing with the subject. In the light of that explanation, does the Senator desire to object?

Mr. LUCAS. May I inquire whether or not the Senator from West Virginia has discussed the matter with the Senator from Louisiana [Mr. OVERTON]?

Mr. REVERCOMB. Oh, yes. The bill was considered before the committee of which the Senator from Louisiana was a member. I do not have the record before me, and I do not recall the discussions that were had at the time. I note the presence in the Senate Chamber of the chairman of the subcommittee which dealt with the subject and which reported the bill. I should like to ask the Senator from Nevada whether or not the Senator from Louisiana participated in discussions of the matter.

Mr. MALONE. The Senator from Louisiana was present. This particular measure would empower the Secretary of Agriculture to make the surveys, but, in the absence of the words "or hereafter", he was not sure of his authority with respect to anything that might arise subsequently. The amendment of the law would clarify the matter, so that the Secretary could make such surveys, that having been intended, obviously, by the original bill. Through a weakness in the wording of the law, there was confusion as to whether the Secretary was authorized to make such surveys following the passage of the act, or was limited to making surveys previously authorized. The pending measure clarifies the matter so that the Secretary would know he could make the surveys independently.

Mr. LUCAS. I should like to inquire whether the Senator from Louisiana approved the pending bill.

Mr. MALONE. I am sure he approved it; otherwise, it would not be here.

Mr. LUCAS. I am not so sure of that, since the Senator from Louisiana is but one member of the committee.

Mr. REVERCOMB. It is entirely satisfactory with me to have the matter go over. May I suggest that it go over temporarily until the Senator from Illinois can be advised from the record vote of the committee whether or not the Senator from Louisiana acted upon it?

Mr. LUCAS. Over.

The PRESIDING OFFICER. The bill will go over.

BILLS AND JOINT RESOLUTION PASSED OVER

The bill (S. 1663) to prohibit the payment of retirement annuities to former Members of Congress convicted of offenses involving the improper use of authority, influence, power, or privileges as Members of Congress, was announced as next in order.

Mr. JOHNSTON of South Carolina. Over.

The PRESIDING OFFICER. The bill will be passed over.

The joint resolution (H. J. Res. 231) providing for membership and participation by the United States in the Caribbean Commission and authorizing an appropriation therefor was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDING OFFICER. The joint resolution will be passed over.

The bill (S. 968) to authorize the Public Utilities Commission of the District of Columbia to limit the number of taxicabs licensed and operated in the District of Columbia was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 4042) to control the export to foreign countries of gasoline

and petroleum products from the United States was announced as next in order.

Mr. LUCAS. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1653) to control the export to foreign countries of gasoline and petroleum products from the United States was announced as next in order.

Mr. LUCAS. Over.

The PRESIDING OFFICER. The bill will be passed over.

Mr. TAFT. I may say that both bills are covered by the general extension of power to control exports, so they are unnecessary. Neither of the bills is necessary, and I think perhaps they can be removed from the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUCAS. Mr. President, with respect to Calendar No. 732, House bill 4042, and Calendar No. 733, Senate bill 1653, what the Senator from Ohio has said may be accurate; I am not sufficiently advised upon the question involved to determine whether it is. It does seem to me, however, that the bills should not be stricken from the calendar at this time without consultation with the Senator from Indiana [Mr. CAPEHART], who reported both bills from the Committee on Interstate and Foreign Commerce, and who is author of the Senate bill.

The PRESIDING OFFICER. Does the Senator from Illinois desire that the action by which the bills were removed from the calendar be reconsidered?

Mr. LUCAS. I think I should like to make such a motion. I see the Senator from Indiana now in the Chamber. I did not know he was present.

Mr. TAFT. Mr. President, I should say that I did not move that the bills be postponed indefinitely. I simply suggested that they might be. I was going to say that perhaps the bills could be removed from the calendar if that would be agreeable to the proponent of the bills, the Senator from Indiana [Mr. CAPEHART].

The PRESIDING OFFICER. By indirection the Chair made the order.

Mr. LUCAS. I think it all occurred by indirection. The Senator from Indiana is present and can speak for himself.

Mr. CAPEHART. By indirection I suggest that the Chair withdraw his order, and that the action which was taken be reconsidered.

The PRESIDING OFFICER. The Senator from Indiana asks that the action by which the bills in question were removed from the calendar be reconsidered. Is there objection? The Chair hears none, and the bills will be restored to the calendar, and will be passed over.

The bill (H. R. 1350) to amend the act to establish a National Archives of the United States Government, and for other purposes, was announced as next in order.

Mr. CHAVEZ. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1015) to amend section 7 of the act of June 25, 1910, as amended, to reduce the interest rate on postal-savings deposits to 1 percent per annum was announced as next in order.

Mr. LANGER. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 1826) making it a petty offense to enter any national forest land while it is closed to the public, was announced as next in order.

Mr. MAGNUSON. Over.

Mr. CAPPER. Mr. President, the bill originated with the Department of Agriculture and has the hearty support of the Department. The bill was passed by the House without objection. The Senate Committee on Agriculture and Forestry was unanimously in favor of it. It really is important that the bill be passed. I certainly hope the objection will be withdrawn.

The PRESIDING OFFICER. Is there objection?

Mr. MAGNUSON. Over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (H. R. 4127) to amend the Civil Service Retirement Act of May 29, 1930, as amended, was announced as next in order.

Mr. TAFT. Mr. President, may we have an explanation of the bill? Is this the Stevenson bill?

Mr. CHAVEZ. I make the request that the bill go over temporarily in order that I may be able to orient myself with respect to the general situation in connection with similar legislation.

The PRESIDING OFFICER. The bill will be passed over temporarily.

BOUNDARY OF THE UINTAH AND OURAY INDIAN RESERVATION IN UTAH

The Senate proceeded to consider the bill (S. 1698) to define the exterior boundary of the Uintah and Ouray Indian Reservation in the State of Utah, and for other purposes, which had been reported from the Committee on Public Lands with amendments.

The first committee amendment was on page 3, line 2, after "quarter", to strike out "said."

The amendment was agreed to.

The next amendment was on page 3, line 18, after "quarter", to strike out "said."

The amendment was agreed to.

The next amendment was page 3, line 20, after "quarter", to strike out "said."

The amendment was agreed to.

The next amendment was on page 5, line 25, after "quarter", to strike out "said."

The amendment was agreed to.

The next amendment was on page 11, line 7, after the word "along" to strike out "Mill" and insert "Hill."

The amendment was agreed to.

The PRESIDING OFFICER. That completes the committee amendments. The question is on the engrossment and third reading of the bill.

Mr. MORSE. Mr. President, in keeping with the objection I raised a while ago I ask that the bill, as it is now amended, be reprinted with the amendments, and that it be returned to the calendar for consideration at the next call of the calendar.

The PRESIDING OFFICER. The Chair is advised that the bill as it is now printed contains the committee amendments. The amendments which have been acted upon are all committee amendments.

Mr. MORSE. I spoke under a misapprehension. Then I have no objection.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 1698) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the exterior boundary of the Uintah and Ouray Reservation in Grand and Uintah Counties, in the State of Utah, for the benefit of the Ute Indian Tribe of the Uintah and Ouray Reservation, is hereby extended to include the following area:

Beginning at the northwest corner of section 18, township 9 south, range 20 east, Salt Lake meridian, and running thence west to Green River;

Thence northeasterly up Green River approximately thirteen miles to a point where said river intersects the north line of section 11, township 8 south, range 20 east;

Thence east along said section line seven miles to the northeast corner of section 12, township 8 south, range 21 east, Salt Lake meridian;

Thence south along section line two miles to the northeast corner of section 24, township 8 south, range 21 east, Salt Lake meridian;

Thence east one mile to the northeast corner of section 19, township 8 south, range 22 east; thence south one mile to the southeast corner of said section 19; thence east two miles to the northeast corner of section 28;

Thence south six miles to the southeast corner of section 21, township 9 south, range 22 east, Salt Lake meridian;

Thence west eleven miles to the northeast corner of section 27, township 9 south, range 20 east, Salt Lake meridian;

Thence south eight miles to the southeast corner of section 34, township 10 south, range 20 east;

Thence west one and one-half miles to the south quarter corner of section 33;

Thence north one-half mile to the center of said section 33;

Thence east one-fourth of a mile to the southwest corner of the southeast quarter northeast quarter, said section 33;

Thence north one mile to the southeast corner of the southwest quarter northeast quarter, section 28;

Thence west one-quarter of a mile to the center of said section 28;

Thence south one-fourth of a mile to the southeast corner of the northeast quarter southwest quarter, said section 28;

Thence west one-fourth of a mile to the north rim of Big Pack Mountain;

Thence southwesterly along said rim approximately one and one-half miles to the north quarter corner of section 4, township 11 south, range 20 east;

Thence south three-fourths of a mile to the southeast corner of the northeast quarter southwest quarter, said section 4;

Thence west one-fourth of a mile to the northeast corner of the southwest quarter southwest quarter, said section 4;

Thence south one-half mile to the southeast corner of the northwest quarter northwest quarter, section 9;

Thence west one-half mile to the southwest corner of the northeast quarter northeast quarter, section 8;

Thence south three-fourths of a mile to the southeast corner of the southwest quarter southeast quarter, said section 8;

Thence west three-fourths of a mile to the northeast corner of section 18;

Thence south along section line to the southeast corner of said section 18;

Thence southerly along the west rim of Big Pack Mountain approximately three and three-fourths miles to the northeast corner of the southeast quarter southeast quarter, section 1, township 12 south, range 19 east, Salt Lake meridian;

Thence south along the township line five and one-fourth miles to the southeast corner of township 12 south, range 19 east;

Thence following the north and east boundary of Indian Allotment Numbered 353 Uncompahgre on Hill Creek to the southeast corner of said allotment;

Thence along the east line of township 13 south, range 19 east, approximately one and one-half miles to the north rim of East Squaw Canyon;

Thence southeasterly along said rim and up said canyon approximately three and three-fourths miles to the northeast corner of section 33, township 13 south, range 20 east.

Thence south along the section line 6 miles to the northeast corner of section 33, township 14 south, range 20 east;

Thence along the north rim of Flat Rock Mesa approximately six miles to the west quarter corner of section 24;

Thence easterly along the north rim of Ute Canyon approximately two miles to the north quarter corner of section 19, township 14 south, range 21 east, Salt Lake meridian;

Thence continuing along the north rim of said canyon approximately three miles to the center of section 21;

Thence south one mile to the center of section 28;

Thence west one-half mile to the west line of said section;

Thence south one and one-half miles to the southeast corner of section 32;

Thence west along the south line of said township two miles to the southwest corner of township 14 south, range 21 east;

Thence south six miles along the east line of township 15 south, range 20 east, to the southeast corner of said township;

Thence east one-half mile to the center of the north line of section 33, township 15½ south, range 21 east, Salt Lake meridian;

Thence south approximately one and one-half miles to the south quarter of section 4, township 16 south, range 21 east, Salt Lake meridian;

Thence west one-half mile to the southwest corner of said section 4;

Thence north one-fourth of a mile to the southeast corner of the northeast quarter southeast quarter, section 5;

Thence west one-half mile to the northeast corner of the southeast quarter southwest quarter, said section 5;

Thence south two and one-fourth miles to the south quarter corner of section 17;

Thence west one-half mile to the northeast corner of section 19;

Thence south one-half mile to the east quarter corner of said section 19;

Thence west one-half mile to the center of said section 19;

Thence south two and one-half miles to the south quarter corner of section 31;

Thence west one-half mile to the southwest corner of said township 16 south, range 21 east;

Thence south one and one-half miles to the east quarter corner of section 12, township 17 south, range 20 east, Salt Lake meridian.

Thence west one mile to the east quarter corner of section 11

Thence south one-half mile to the southeast corner of said section 11;

Thence west one-half mile to the south quarter corner of said section 11;

Then south one mile to the south quarter corner of section 14;

Thence west one-half mile to the southwest corner of said section 14;

Thence south one mile to the southeast corner of section 22;

Thence west one mile to the southwest corner of section 22;

Thence south approximately one and one-half miles to a point where the section line intersects the ridge between Supply Canyon and West Willow Creek;

Thence southwesterly along said ridge approximately two and one-half miles to the south quarter corner of section 8, township 18 south, range 20 east;

Thence south to the center of section 17;

Thence east one-half mile to the east quarter corner of said section 17;

Thence south to the southeast corner of said section 17;

Thence east approximately one-third of a mile to the top of the ridge between Clear Creek and West Willow Creek;

Thence southerly along the top of said ridge approximately three miles to the center of section 33;

Thence south one-half mile to the south quarter corner of said section 33;

Thence east one-fourth of a mile;

Thence south two miles to the southeast corner of the southwest quarter southeast quarter, section 9, township 19 south, range 20 east, Salt Lake meridian;

Thence east one-fourth of a mile to the northeast corner of section 16;

Thence south one mile to the southeast corner of said section 16;

Thence west three miles to the southwest corner of section 18;

Thence north 2 and three-fourths miles;

Thence west one-fourth of a mile.

Thence north one-fourth of a mile to the southwest corner of the southeast quarter southeast quarter, section 36, township 18 south, range 19 east;

Thence west three-fourths of a mile to the southwest corner of said section 36;

Thence northwesterly along the watershed divide of Book Cliff Mountains approximately twelve and one-half miles to the east quarter corner of section 6, township 18 south, range 19 east;

Thence southwesterly down Coal Creek Canyon approximately thirteen miles to Green River at a point approximately one-fourth of a mile west of the southeast corner of section 18, township 18 south, range 17 east, Salt Lake meridian;

Thence northerly up Green River to a point two and one-half miles north eighty degrees west from the southwest corner of section 7, township 12 south, range 19 east, Salt Lake meridian;

Thence southwesterly along the east rim of Main Tabyago Canyon approximately three and one-half miles;

Thence south five-eighths of a mile to the rim of the ridge;

Thence southwesterly across West Tabyago Canyon approximately one-half mile to the ridge;

Thence southwesterly along the north rim of the ridge approximately two and one-fourth miles to Rock House Canyon;

Thence southwesterly across Rock House Canyon approximately three-fourths of a mile to the top of knoll in Rock House Canyon;

Thence southeasterly along the south rim of Rock House Canyon approximately two and three-fourths miles to a point approximately one mile north of Gray Knoll;

Thence south one-half mile across bench to north rim of Big Canyon; thence southeasterly along the north rim of Big Canyon approximately two miles to the head of draw approximately one mile east of Gray Knoll;

Thence southeasterly one-fourth of a mile across bench to the north rim of Big Canyon Flat;

Thence southeasterly along north rim of Big Canyon Flat approximately three and one-fourth miles;

Thence east approximately one-fourth of a mile across bench to the north rim of Big Canyon Flat;

Thence southeasterly along the north rim of Big Canyon Flat approximately one mile;

Thence east approximately one-fourth of a mile across bench to north rim of Big Canyon Flat;

Thence southeasterly along the north rim of Big Canyon Flat approximately two and one-half miles;

Thence east approximately one-fourth of a mile across bench;

Thence southeasterly along the north rim of Big Canyon Flat approximately one and three-fourths miles;

Thence east to northwest corner of section 31, township 13 south, range 19 east, Salt Lake meridian;

Thence east one mile;

Thence south one mile;

Thence east one mile to the southeast corner of section 32;

Thence east on section line to CCC road;

Thence northerly along said CCC road to point where said road intersects rim of a mesa south of the north line of township 13 south, range 19 east, Salt Lake meridian;

Thence northeasterly along said rim to the northeast corner of section 26 of said township and range;

Thence north one-fourth of a mile;

Thence east one-fourth of a mile;

Thence north one-fourth of a mile to the northwest corner of the northeast quarter southwest quarter, section 24;

Thence northerly along Hill Creek approximately one and one-fourth miles;

Thence west one-fourth of a mile;

Thence south one-fourth of a mile to the quarter corner between sections 13 and 14;

Thence west two miles to the quarter corner between sections 15 and 16;

Thence north along the section line one-half mile to the southeast corner of section 9 to the top of the ridge;

All of the foregoing descriptions being in township 12 south, range 19 east, Salt Lake meridian;

Thence northerly along the top of said ridge three and three-fourths miles to the center of section 28, township 11 south, range 19 east, Salt Lake meridian;

Thence northwesterly to the CCC road;

Thence northwesterly along said road to the top rim of Wild Horse Bench;

Thence northeasterly along the top rim of Wild Horse Bench to the southeast corner of section 21;

Thence north one mile;

Thence diagonally northeast to the southwest corner of section 1;

Thence northeasterly to the north quarter corner of said section 1;

Thence east one-half mile to the intersection of CCC road at the northeast corner of said section 1;

Thence northeasterly along said road approximately four miles to where said road intersects the east line of section 20, township 10 south, range 20 east, Salt Lake meridian;

Thence north along said section line to the east quarter corner of section 8, township 10 south, range 20 east, Salt Lake meridian;

Thence northeasterly to the northwest corner of Indian Allotment Numbered 326 Uncompahgre;

Thence east to Willow Creek;

Thence northwesterly down Willow Creek to the west line of section 4, township 10 south, range 20 east, Salt Lake meridian;

Thence south along said section line to the southwest corner of section 4, said township and range;

Thence west one mile;

Thence north four miles to the northwest corner of section 20, township 9 south, range 20 east, Salt Lake meridian;

Thence west one mile;

Thence north one mile to point of beginning.

Valid rights and claims of individuals initiated under the public-land laws or otherwise involving any lands within said boundary shall not be affected by this Act.

The foregoing reservation shall only include, in areas where there has heretofore been reserved by the Federal Government oil, gas, or oil shale, the nonmineral uses of the land.

There is hereby reserved, within the area above described, for the benefit and use of grazing-district permittees, a free right-of-way for trailing and watering purposes, subject to the usual and customary rules and regulations concerning stock driveways within grazing districts, the use of said right-of-way for watering purposes being limited to the usual and customary use of grazing-district permittees adjacent to said right-of-way, over the following lands:

(a) A stock driveway one mile wide along the north side of the White River Road running east from Ouray;

(b) A stock driveway described as beginning at the east quarter corner of section 3, township 9 south, range 20 east, Salt Lake meridian; running thence south eleven and one-half miles to the southeast corner of section 34, township 10 south, range 20 east, Salt Lake meridian; thence west to Willow Creek; thence northerly down Willow Creek to Black Bridge situated in the northwest quarter northeast quarter, section 22, township 10 south, range 20 east, Salt Lake meridian; thence northwesterly following the north and east boundaries of Indian allotments and tribal lands on east side of Willow Creek to the southwest corner of section 32, township 9 south, range 20 east, Salt Lake meridian; thence north five and one-fourth miles to Green River; thence up Green River and White River and on the south side of Indian allotments to point of beginning;

(c) A stock driveway one-half mile on each side of the road running southwesterly from what is known as Squaw Crossing on Willow Creek to the south rim of Wild Horse bench insofar as said road enters or crosses the said reservation;

(d) A stock driveway running from the head of Brown Canyon near the northeast corner of township 11 south, range 19 east, Salt Lake meridian, southeasterly down Brown Canyon across Hill Creek to Big Pack Mountain;

(e) A stock driveway one mile wide across Hill Creek immediately south of Rock House situated in the south half of section 13, township 12 south, range 19 east, Salt Lake meridian.

There is also reserved a watering right on Hill Creek between the Black Bridge and the Brown Ranch for the permittee using the public domain immediately west of said water place.

SEC. 2. The Secretary of the Interior is hereby authorized and directed to revoke the order dated September 26, 1933, temporarily withdrawing in aid of legislation certain lands in the former Uncompahgre Indian Reservation.

SEC. 3. The State of Utah may relinquish to the United States for the benefit of the Indians of the said Ute Reservation such tracts of school or other State-owned lands, surveyed or unsurveyed, within the said reserved area, as it may see fit, reserving to said State, if it so desires, such rights as it may possess to any minerals underlying such State lands as may be relinquished, and said State shall have the right to make selections in lieu thereof outside of the area hereby withdrawn, equal in value to the lands relinquished, from the vacant, unappropriated, nonmineral public lands, within the State of Utah, such lieu selections to be made in the manner provided in the enabling Act pertaining to said State, except as to the payment of fees or commissions, which are hereby waived. The value of improvements owned by the State on lands relinquished to the United States for the benefit of said Indians shall be taken into consideration and full credit in the form of lands shall be allowed therefor. Authority is hereby granted for the purchase of privately owned and State-owned lands, including the improvements thereon, and improvements heretofore placed on public lands, together with water rights and water holes, within said boundary: *Provided*, That title to lands purchased under this authorization may, in the discretion of the Secretary of the Interior, be taken for the surface only.

REHABILITATION OF CERTAIN WORKS OF THE FORT SUMNER IRRIGATION DISTRICT IN NEW MEXICO

The bill (H. R. 3834) to authorize a project for the rehabilitation of certain works of the Fort Sumner irrigation district in New Mexico, and for other purposes, was announced as next in order.

Mr. WHERRY. Mr. President, may we have an explanation of the bill?

Mr. HATCH. The bill has been on the calendar for some time. It is merely an authorization bill. It has been passed by the House. I should like very much to have it passed at this time.

Mr. WHERRY. Does the bill deal with an irrigation project which has been considered and approved by the Reclamation Bureau?

Mr. HATCH. Yes. It is a private project which the Bureau is considering taking over.

Mr. WHERRY. Did the Senator say the bill had been passed by the House?

Mr. HATCH. Yes.

Mr. WHERRY. I take it the Committee on Public Lands has approved the bill.

Mr. HATCH. Yes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill (H. R. 3834) to authorize a project for the rehabilitation of certain works of the Fort Sumner irrigation district in New Mexico, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

JOINT RESOLUTION PASSED OVER

The joint resolution (S. J. Res. 37) requesting the President to proclaim February 1 as National Freedom Day, was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDING OFFICER. The joint resolution will be passed over.

PROPOSED INCORPORATION OF CERTAIN ORGANIZATIONS OF WAR VETERANS

Mr. MAGNUSON. Mr. President, before we proceed to consider the bills placed on the calendar after the call of the calendar on July 26, 1947, I wish to say that when it was reached on the call of the calendar I objected to Senate bill 1356, Calendar No. 696, a bill providing for the incorporation of the Franco-American War Veterans, and I also objected to Senate bill 1557, Calendar 702, a bill to incorporate the Catholic War Veterans of the United States of America, and Senate bill 1375, Calendar No. 704, a bill to incorporate the Jewish War Veterans of the United States of America.

At that time I said I had no objection to the three bills, but based my objection on the ground that the Committee on the Judiciary was considering several similar bills and was attempting to determine upon a policy with respect to bills of such a nature. I have since been informed that toward the end of the session of Congress last July a policy with respect to such matters was determined upon, and several other veterans' organizations were incorporated. In view of that fact, I now withdraw my objection to the three bills to which I just referred and ask that they may be considered and passed.

The PRESIDING OFFICER. Without objection, the clerk will state by title Senate bill 1356, Calendar 696.

The LEGISLATIVE CLERK. A bill (S. 1356) providing for the incorporation of the Franco-American War Veterans.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. LUCAS. Mr. President, I am not going to object to the bill, but I will say that if we should pass the bills now we would set a precedent under which practically any veterans' organization in America, regardless of its size, regardless of its membership, would be able to come to the Congress of the United States and obtain a charter of incorporation.

I know how difficult it was in the beginning to secure a charter from Congress to incorporate the American Legion, which has since been recognized, of course, as one of the great patriotic organizations of the country. I do not question the patriotism of any of these groups which are seeking recognition in the bills before us. No doubt the members of all the groups in question are all good Americans. The point I make, however, is that by passing these bills we will be setting a precedent whereby we shall not be able in the future to deny any organization, whether it be the Thirty-third—Illinois—Division, the Thirty-second Division, or the Thirty-fourth Division, or any other group which acted together in the last war, which covers thousands of different organizations, to come to Congress and obtain charters of this nature.

Mr. CHAVEZ. Mr. President, I wish to say a word on this particular subject. The Senator from Kentucky [Mr. COOPER] and the Senator from Washington [Mr. MAGNUSON] were in my State during the Christmas holidays. They took time off at that particular period to go down and listen to tales of woe from boys of my State who had been prisoners of the Japanese in the Philippine Islands and in Japan. Some of those boys told stories which were pathetic, to say the least, but none of them said they were fighting in the Philippine Islands, or on Bataan Peninsula, as Spanish-Americans, Italian-Americans, Chinese-Americans, or as anything other than as Americans. The bill in question may eventually be passed, but not today. I object.

The PRESIDING OFFICER. Objection is heard, and Senate bill 1356 will be passed over.

Mr. MAGNUSON. Mr. President, in order that the record may be made consistent, I then ask for the present consideration of Senate bill 1557, Calendar No. 702, to incorporate the Catholic War Veterans of the United States of America, which is a bill similar to that just passed over, and also Senate bill 1375, Calendar No. 704, to incorporate the Jewish War Veterans of the United States of America. I presume, of course, the same objection will be made, and that the two bills will also be passed over.

The PRESIDING OFFICER. Without objection, both bills will be passed over.

SURVEYS AND INVESTIGATIONS FOR WATER FLOW RETARDATION AND SOIL EROSION PREVENTION

Mr. MALONE. Mr. President, I ask for reconsideration of the action previously taken with respect to House bill 3146, Calendar No. 713, to amend section 3 of the Flood Control Act approved August 28, 1937, and for other purposes.

The PRESIDING OFFICER. The Chair will advise the Senator from Nevada that when the bill was reached on the calendar it was passed over. The bill was not passed.

Mr. MALONE. Am I out of order in asking for reconsideration?

The PRESIDING OFFICER. It will be necessary that the Senator who objected when the bill was reached on the calendar withdraw his objection, in order that consideration may be given to the bill.

Mr. MALONE. The Senator from Illinois [Mr. LUCAS] objected.

The PRESIDING OFFICER. Does the Senator from Illinois withdraw his objection?

Mr. LUCAS. I withdraw my objection.

Mr. MALONE. Mr. President, I have made a check of what is involved in connection with the bill, and can say that the only matter at issue is as to whether or not the senior Senator from Louisiana [Mr. OVERTON] objected to the bill. The senior Senator from Louisiana himself signed the favorable report on the measure. I ask for present consideration of the bill.

The PRESIDING OFFICER. Is there objection to the present consideration of House bill 3146?

Mr. MORSE. Mr. President, I am very much for the bill, but it is my recollection that in addition to the objection raised by the Senator from Illinois [Mr. LUCAS] against consideration of the bill, another Senator registered objection. I want to make certain that the other Senator who objected is on the floor. Can the Chair advise the Senate as to which other Senator it was who made objection to the bill?

The PRESIDING OFFICER. The Chair will say that he is moving very slowly in the matter of objections to bills in order to make sure that no objection is overlooked. Is there objection to the present consideration of the bill?

Mr. MORSE. Mr. President, reserving the right to object I will say that is not the point I am raising. It is now proposed to consider a bill to which objections had previously been made. Objections were raised against the bill when it was reached on the calendar. I do not know whether the Senator, other than the Senator from Illinois, who made objection, has left the floor or not. If he has left the floor, I think he is entitled to be called back by way of suggestion of the absence of a quorum, if necessary, in order that the Senate may be advised as to whether any Senator other than the Senator from Illinois has objection.

The PRESIDING OFFICER. There is no record at the desk of any objection other than that made by the Senator from Illinois [Mr. LUCAS].

Mr. MORSE. That is what I sought to find out.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill (H. R. 3146) to amend section 3 of the Flood Control Act approved August 28, 1937, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 2029) to provide for the free importation of synthetic rubber scrap was announced as next in order.

Mr. MILLIKIN. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

INCREASE OF PENSIONS TO INDIAN WARS VETERANS

The Senate proceeded to consider the bill (H. R. 4055) to provide increases in the rates of pension payable to veterans of Indian wars and the dependents of such veterans, which had been reported from the Committee on Finance with an amendment, in line 5, after the word "any", to insert "public."

The amendment was agreed to.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

RUTH GROSSMAN

The Senate proceeded to consider the bill (S. 922) for the relief of Ruth Grossman, which had been reported from the Committee on the Judiciary, with an amendment on page 1, line 6, after the words "the sum of", to strike out "$10,000" and insert "$5,463.09", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Ruth Grossman, of Miami Beach, Fla., the sum of $5,463.09. The payment of such sum shall be in full settlement of all claims of the said Ruth Grossman against the United States on account of personal injuries sustained on May 9, 1944, when a United States Army truck collided with an automobile at the intersection of Meridian Avenue and Sixteenth Street, Miami Beach, Fla., overturned and fell upon the said Ruth Grossman, a pedestrian: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ORAN CURRY

The Senate proceeded to consider the bill (S. 944) for the relief of Oran Curry, which had been reported with amendments, on page 1, line 6, after the words "the sum of", to strike out "$652.17" and insert in lieu thereof "$587.33"; on page 2, line 1, after the word "through", to strike out "November" and insert "March"; and on page 2, after line 12, to insert:

SEC. 2. No charge shall be made against the disbursing officer or the certifying officer nor shall any claim be made against Oran Curry, for the amount of the overpayment of $35 made on certificate of settlement No. 0858898, dated August 21, 1944.

So as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, to Oran Curry, of Neola, Utah, the sum of $587.33, in full satisfaction of his claim against the United States as compensation for quarters in connection with services rendered the Bureau of Indian Affairs, Department of the Interior, at the Uintah-Ouray Indian Agency and Reservation in Utah, from May 1926 through March 1933, inclusive, this being the amount due him and remaining unpaid under his contract of employment, as certified by the Commissioner of Indian Affairs: *Provided*, That no part of the amount appropriated by this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in a sum not exceeding $1,000.

SEC. 2. No charge shall be made against the disbursing officer or the certifying officer nor shall any claim be made against Oran Curry, for the amount of the overpayment of $35 made on certificate of settlement No. 0858898, dated August 21, 1944.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ANTONIO ZAMORA AND OTHERS

The Senate proceeded to consider the bill (S. 1031) for the relief of Antonio Zamora; Mrs. Antonio Zamora; Antonio Zamora, Jr.; Mrs. Juan Chavez; John Chavez, Jr.; Roland Chavez; Helso Trujillo; and Dr. M. G. Wright, which had been reported from the Committee on the Judiciary, with amendments.

Mr. CHAVEZ. Mr. President, if Senators will turn to page 2, line 6, they will note that the committee struck out item numbered (8), for Dr. M. G. Wright, of Winslow, Ariz., in the sum of $516.

This is a bill involving the claims of several persons who were injured at the time an Indian Bureau truck, being

driven by a drunken Indian, ran into several persons. The Interior Department has accepted the liability, and has submitted the figure which it thinks each individual claimant should receive. I have agreed to those figures, notwithstanding the fact that I believe the original figures were correct.

As a result of the accident in which these persons were injured, liability for which the committee and the Interior Department accept, they had to call a doctor. They called a doctor in the vicinity of the little town of Winslow, Ariz. Those persons would have had no need to call a doctor if they had not been injured. The Government was liable for the injury. I believe it is very unfair to Dr. Wright to eliminate from the bill payment for his services. I do not know the gentleman. I do not know any of the claimants, but I believe it is very unfair to say to Dr. Wright, "This Indian was drunk. He was driving a Government truck and he injured seven persons. You attended them, but we are not going to pay you." I hope the committee amendment on page 2, line 6, relating to Dr. M. G. Wright, of Winslow, Ariz., will be rejected.

Mr. McFARLAND. Mr. President, will the Senator yield?

Mr. CHAVEZ. I yield.

Mr. McFARLAND. That sum will have to be paid by the injured persons.

Mr. CHAVEZ. Yes. It will be noted that the committee amendments have reduced the awards to the minimum. It is very unfair to ask the injured persons, among whom $6,500 is to be divided, to pay Dr. Wright, of Winslow, the sum of $516 when the Government accepts responsibility for the injuries.

Mr. President, I hope the committee amendment on page 2, line 6, will be rejected.

The PRESIDING OFFICER. The clerk will state the committee amendments one by one.

The first amendment of the Committee on the Judiciary was, on page 1, line 6, after the words "the sum of", to strike out "$5,000" and insert "$2,500."

The amendment was agreed to.

The next amendment was, on page 1, line 7, after the words "the sum of", to strike out "$5,000" and insert "$1,500."

The amendment was agreed to.

The next amendment was, on page 2, line 1, after the words "the sum of" to strike out "$1,000" and insert "$500."

The amendment was agreed to.

The next amendment was, on page 2, line 2, after the words "the sum of" to strike out "$5,000" and insert "$1,000."

The amendment was agreed to.

The next amendment was, on page 2, line 3, after the words "the sum of" to strike out "$1,000" and insert "$250."

The amendment was agreed to.

The next amendment was, on page 2, line 4, after the words "the sum of", to strike out "$1,000" and insert "$250."

The amendment was agreed to.

The next amendment was, on page 2, at the beginning of line 6, to strike out "$1,000" and insert "$500."

The amendment was agreed to.

The next amendment was, on page 2, line 6, after the word "and," to strike out "(6) Dr. M. G. Wright, of Winslow, Ariz., the sum of $516."

Mr. CHAVEZ. Mr. President, this is the amendment to which I am objecting. I hope the committee amendment will be rejected. This poor man went to the expense of treating several persons who were injured in an accident for which the Government was responsible. I ask that the Senate disagree to the committee amendment.

Mr. WHERRY. Mr. President, I did not hear all the explanation from the distinguished Senator from New Mexico. As I understand, these amendments have all been approved by the committee. Is that not true?

Mr. CHAVEZ. That is correct.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment on page 2, line 6, relating to Dr. M. G. Wright, of Winslow, Ariz.

The amendment was rejected.

Mr. WHERRY. Mr. President, returning to the amendment which has just been disposed of, what is the amount remaining in the bill, now that the committee amendment in question has been rejected?

Mr. CHAVEZ. The amount for non-Indians is $6,500.

Mr. WHERRY. I was referring to the amendment just disposed of.

Mr. CHAVEZ. The amount is $516.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The next amendment was, on page 2, line 7, after the numerals "$516", to insert "(8) the heirs of Keith Lane (Gray Whiskers), Navajo Indian Census No. 91989, the sum of $5,000."

The amendment was agreed to.

Mr. McFARLAND. Mr. President, the second item numbered "(8)" will now become "(9)", now that the previous committee amendment has been rejected.

The PRESIDING OFFICER. Without objection, the bill will be appropriately amended so as to bring the item numbers into line.

Mr. WHERRY. Mr. President, as I understand, the only change is in the total figure. There is no addition to the bill except the $516.

Mr. McFARLAND. That is correct.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The next amendment was, on page 2, line 15, after the numerals "1940", to strike out ", and of the claim of the said Dr. M. G. Wright against the United States for payment for medical services rendered by him to said seven claimants in the treatment of injuries sustained by them as a result of such accident."

The amendment was agreed to.

The next amendment was, on page 2, after line 18, to insert "and in full satisfaction of the claim of the heirs of said Keith Lane against the United States for compensation for the death of said Keith Lane who was killed while riding as a passenger in such truck."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to (1) Antonio Zamora, of Winslow, Ariz., the sum of $2,500; (2) Mrs. Antonio Zamora, of Winslow, Ariz., the sum of $1,500; (3) Antonio Zamora, Jr., of Winslow, Ariz., the sum of $500; (4) Mrs. Juan Chavez, of Winslow, Ariz., the sum of $1,000; (5) John Chavez, Jr., of Winslow, Ariz., the sum of $250; (6) Roland Chavez, of Winslow, Ariz., the sum of $250; (7) Selso Trujillo, of Winslow, Ariz., the sum of $500; (8) Dr. M. G. Wright, of Winslow, Ariz., the sum of $516; and (9) the heirs of Keith Lane (Gray Whiskers), Navajo Indian census number 91989, the sum of $5,000. The payment of such sums shall be in full satisfaction of the respective claims of said seven first-named claimants against the United States for compensation for personal injuries sustained by them when the automobile in which they were riding was struck by an Indian Service truck about 5 miles east of Winslow, Ariz., on August 6, 1940, and in full satisfaction of the claim of the heirs of said Keith Lane against the United States for compensation for the death of said Keith Lane who was killed while riding as a passenger in such truck: *Provided*, That no part of the amounts appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with such claims, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The title was amended so as to read: "A bill for the relief of Antonio Zamora; Mrs. Antonio Zamora; Antonio Zamora, Jr.; Mrs. Juan Chavez; John Chavez, Jr.; Roland Chavez; Selso Trujillo; Dr. M. G. Wright; and the heirs of Keith Lane."

DEPENDENTS OF CARL B. SANBORN

The bill (H. R. 389) for the relief of the dependents of Carl B. Sanborn was considered, ordered to a third reading, read the third time, and passed.

ELEONORE M. HANNON

The Senate proceeded to consider the bill (S. 1267) for the relief of Eleonore M. Hannon, which had been reported from the Committee on the Judiciary with an amendment, on page 1, line 6, after the words "the sum of", to strike out "$3,601" and insert "$1,101", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Eleonore M. Hannon, of Coquille, Oreg., the sum of $1,101, in full satisfaction of all claims against the United States for personal injuries to Eleonore M. Hannon as the result of the crash of a United States Navy airplane on October 15, 1944: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BURKS L. FIELDER

The Senate proceeded to consider the bill (S. 1347) for the relief of Burks L. Fielder, which had been reported from

the Committee on the Judiciary, with an amendment on page 1, line 4, after the words "the sum of" to strike out "$789.15" and insert "$699.15", so as to make the bill read:

Be it enacted, etc., That the Postmaster General is authorized and directed (1) to cancel all claims for repayment of the sum of $699.15, representing the aggregate of amounts erroneously paid to Burks L. Fielder, assistant postmaster at Vicksburg, Miss., for the period from December 1, 1942, to August 12, 1946, as a salary increase under the provisions of section 3 of the act of February 28, 1925 (43 Stat. 1058; U. S. C., title 39, sec. 92); and (2) to pay to the said Burks L. Fielder, out of any money available for the pay of employees in the postal service, an amount equal to any portion of such sum heretofore repaid by him pursuant to such claims.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

WILLIAM P. GILLINGHAM

The bill (H. R. 1531) for the relief of William P. Gillingham was considered, ordered to a third reading, read the third time, and passed.

EVA L. DUDLEY AND OTHERS

The Senate proceeded to consider the bill (H. R. 1799) for the relief of Eva L. Dudley, Grace M. Collins, and Guy B. Slater, which had been reported from the Committee on the Judiciary with an amendment, on page 1, line 6, after the numerals "$2,000" to strike out "to pay to Grace M. Collins, of Lima, Ohio, the sum of $2,000, and to pay to Guy B. Slater, of Ada, Ohio, the sum of $2,000."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "An act for the relief of Eva L. Dudley."

WILLIE RUTH CHAPMAN

The bill (S. 1411) for the relief of Willie Ruth Chapman was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Willie Ruth Chapman, of Ethridge, Tenn., the sum of $5,000, in full satisfaction of her claim against the United States for compensation for personal injuries and loss of earnings sustained by her as a result of an accident which occurred on December 2, 1944, in Lawrenceburg, Tenn., when the automobile driven by her was struck by a United States Army vehicle: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

BEN W. COLBURN

The bill (H. R. 645) for the relief of Ben W. Colburn was considered, ordered to a third reading, read the third time, and passed.

J. C. BATEMAN

The bill (H. R. 2056) for the relief of J. C. Bateman was considered, ordered to a third reading, read the third time, and passed.

ESTATE OF RUTH HORTON HUNTER

The bill (H. R. 769) for the relief of the estate of Ruth Horton Hunter was considered, ordered to a third reading, read the third time, and passed.

ESTATE OF DAPHNE WARD POPE

The bill (H. R. 1175) for the relief of the estate of Daphne Ward Pope, deceased, was considered, ordered to a third reading, read the third time, and passed.

CALVIN J. FREDERICK

The bill (H. R. 1319) for the relief of Calvin J. Frederick was considered, ordered to a third reading, read the third time, and passed.

MRS. ELIZABETH F. McCOMBIE

The bill (H. R. 1933) for the relief of Mrs. Elizabeth F. McCombie was considered, ordered to a third reading, read the third time, and passed.

CHARLES J. SMITH

The bill (H. R. 2348) for the relief of Charles J. Smith was considered, ordered to a third reading, read the third time, and passed.

ALFRED THOMAS FREITAS

The bill (H. R. 3068) for the relief of Alfred Thomas Freitas was considered, ordered to a third reading, read the third time, and passed.

ESTATE OF W. H. RODGERS

The bill (H. R. 1155) for the relief of the estate of W. H. Rodgers, deceased, was considered, ordered to a third reading, read the third time, and passed.

MRS. LEONA McMINN WINKLER

The bill (H. R. 1645) for the relief of Mrs. Leona McMinn Winkler was considered, ordered to a third reading, read the third time, and passed.

MATTIE A. HORNER

The bill (H. R. 2891) for the relief of Mattie A. Horner was considered, ordered to a third reading, read the third time, and passed.

LOUIS H. DEAVER

The Senate proceeded to consider the bill (H. R. 311) for the relief of Louis H. Deaver, which had been reported from the Committee on the Judiciary with an amendment on page 1, line 3, after the word "the" to strike out "United States Employees' Compensation Commission" and insert in lieu thereof "Bureau of Employees' Compensation, Federal Security Agency."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

OSCAR AND ANNA CARLBLOM

The bill (H. R. 3754) for the relief of Oscar and Anna Carlblom was considered, ordered to a third reading, read the third time, and passed.

MRS. IOLA VEACH

The Senate proceeded to consider the bill (S. 1716) for the relief of Mrs. Iola Veach, which had been reported from the Committee on the Judiciary with an amendment on page 1, line 5, after the words "sum of" to strike out "$5,200" and insert "$1,186.55," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $1,186.55 to Mrs. Iola Veach, of Louisville, Ky., in full settlement of all claims against the United States for personal injuries, hospital and medical expenses, and property damage sustained as the result of an accident involving a United States Army vehicle on North Third Street, Louisville, Ky., on April 7, 1942: *Provided,* That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MASSMAN CONSTRUCTION CO.

The Senate proceeded to consider the bill (H. R. 2192) for the relief of the Massman Construction Co., which had been reported from the Committee on the Judiciary with an amendment on page 1, line 6, after the words "the sum of", to strike out "$88,000" and insert "$28,623.12."

Mr. LUCAS. Mr. President, this seems to be an unusually large sum of money, and since these are the days of economy, I should like to listen to an explanation of the bill.

Mr. KEM. Mr. President, I did not know that the bill was coming up today. I have not the exact facts in mind, but they are approximately as follows: The Massman Construction Co. was the successful bidder in connection with a certain public improvement. After the work was undertaken it was found that a mistake had been made in preparing the specifications. Through no mistake of the bidder, the specifications had been misunderstood. The Committee on the Judiciary has gone into the question, and has found that there was an error for which the Massman Construction Co. should not be held responsible; and in fairness and equity it should be reimbursed.

Mr. LUCAS. I know how much interest the Senator from Missouri has in looking into the facts. Since he has made a satisfactory explanation, I have no objection.

Mr. KEM. I think the claim is just and fair.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

COMPENSATION TO FOREIGN COUNTRIES FOR LOSSES AND DAMAGES CAUSED BY UNITED STATES ARMED FORCES

The Senate proceeded to consider the bill (S. 1605) to provide for payment of compensation to the governments of foreign countries for losses and damages inflicted on neutral territory during World War II by United States armed forces in violation of neutral rights, and authorizing appropriations therefor, which had been reported from the Committee on Foreign Relations, with amendments.

Mr. LUCAS. Mr. President, I ask for an explanation of the bill.

Mr. SMITH. Mr. President, this is a bill reported out of the Committee on Foreign Relations. It speaks for itself. It is very short, and reads as follows:

Be it enacted, etc., That the Secretary of State is authorized to pay to the governments of foreign countries such sums as the Secretary of State, in consultation with the Secretary of National Defense, shall determine to be necessary to provide compensation, including interest, for losses and damages inflicted on persons or property in neutral territory during World War II by units of the United States armed forces in violation of neutral rights: *Provided, however,* That no compensation shall be paid under this act unless the claim shall have been presented prior to July 1, 1948: *And provided further,* That the total amount of compensation authorized herein shall not exceed $21,000,000.

SEC. 2. Appropriations are hereby authorized to carry out the purpose of this act.

The Swiss claims amount to $19,500,000, and since we have admitted liability for $16,000,000 already, part of which has been paid, but the bulk of which is due, I think the Swiss Government is entitled to immediate consideration, because we admit we should at once pay them in the neighborhood of $10,000,000.

Mr. LUCAS. Did the Senator say that we have admitted liability for approximately $16,000,000?

Mr. SMITH. The status of the claims at the present moment may be summarized as follows: Switzerland has claimed $19,500,000 of which the United States admits to date a liability for $16,000,000. Portugal has presented claims for $800,000, of which the United States has offered to pay $300,000. The Vatican City has requested $750,000, and San Marino $1,200,000. These last two sets of claims are in the process of investigation.

Mr. LUCAS. May I inquire what the evidence before the Committee on Foreign Relations showed with reference to what agency of the Government made the examination and agreed upon the amount for which the Senator now says the United States is liable?

Mr. SMITH. The Senator's question is a very appropriate one. The Swiss nationals who were injured made their claims against the Swiss Government. The Swiss Government set up a commission to recognize the claims and determine them, and when the Swiss Government had recognized the claims, it made a corresponding claim to the United States Government. As it was admitted that our bombers had inflicted damage, we set up a regular Army claims commission.

The record shows that on December 21, 1945, the Secretary of War of the United States proposed that an Army claims mission be sent to Switzerland to determine the amount of damage done by American Air Forces during the war. The necessary arrangements were made by the Secretary of State with the Swiss Government, and an Army claims mission, under the Chief of Claims, European theater, began its investigations in May 1946 with a study of the bombing damage done.

The procedure followed was for the commission to select certain claims, which were then checked by its experts. The findings of the experts in general agreed with the claims submitted by the Swiss Government, and the United States liability was fixed accordingly by the Army claims mission. Reports were made, and certain advance payments were made, with an admission of a liability of approximately $16,000,000 out of a total claim of $19,500,000.

Mr. LUCAS. May I further inquire as to what kind of property was damaged by our bombers, and as to whether there is any question in the minds of the members of the committee that this country is responsible?

Mr. SMITH. There is no question whatsoever. Here is the story of what happened. The intent was to bomb some strategic areas in Germany close to the Swiss border. Unfortunately, we did some damage to the city of Schaffhausen. That is where the damage was done. The claims were very carefully studied, and the committee was satisfied that there should be no further delay in compensating the Swiss Government.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. WHERRY. I notice, from what appears on page 1 of the report, that originally the Department intended asking for an appropriation amounting to $10,000,000, but because of certain claims processed since that time they have felt since that date they should ask for a ceiling of $12,000,000. It is now estimated that the total of claims to be compensated under this authorization will not exceed $21,000,000. What was the cause of the change in the recommendation from $12,000,000 to $21,000,000?

Mr. SMITH. I will say to the Senator from Nebraska that originally a bill for an appropriation of $10,000,000 was introduced to cover what was thought to be the claim of Switzerland. It was then discovered that there was further and more extensive damage done, and the question was whether we should simply pass legislation to take care of the Swiss Government and try to ascertain the extent of the total damage done by accidental bombings during the war. The Army reported that other claims had been filed. Therefore we have prepared an over-all bill, with a ceiling, covering all those claims, leaving it up to the Secretary to adjust damages.

Mr. WHERRY. On page 3 of the report there is apparently a conclusion drawn by the committee, that the United States admits a liability for $16,000,000.

Mr. SMITH. That relates to Switzerland.

Mr. WHERRY. What makes up the difference between that amount and the $21,000,000?

Mr. SMITH. Portugal has presented claims for $800,000.

Mr. WHERRY. But they have not been considered?

Mr. SMITH. The claims are pending. We want in one piece of legislation to have an over-all ceiling and to fix a date for the claims to be filed, and to cover the whole subject with one piece of legislation.

Mr. WHERRY. I am not objecting to paying any claims which the United States should pay. As I understand, the Committee on Foreign Relations has voted unanimously that we owe this money. But I am at a loss to understand why the amount has risen from $12,000,000 to $21,000,000. I can see that other claims have been added. I can see that the over-all amount is $16,000,000. Portugal has presented a claim which is not admitted. Vatican City has requested $750,000, and San Marino has presented a claim for $1,200,000. It seems to me that if we are intending to pay, we should pay what has been definitely agreed upon after the committee has studied the situation, which amount should not be in excess of $16,000,000.

Mr. SMITH. I understand that there will not be more than $10,000,000 asked immediately from the Committee on Appropriations.

Mr. WHERRY. Of course, I realize that this is only an authorization, but I know the distinguished Senator will agree with me that when the claim comes before the Committee on Appropriations, of which I happen to be a member, he will say that Congress authorized it and therefore we should have the money for it. It seems to me the proper place for inquiry is on the floor of the Senate, where the authorization is made. Is there anything in the report to indicate that there has been any agreement that the United States owes the difference between $16,000,000 and $21,000,000?

Mr. SMITH. I do not think I get the point of the Senator's question.

Mr. WHERRY. On page 3 of the report it is stated:

> Switzerland has claimed $19,500,000, of which the United States admits to date a liability for $16,000,000.

Mr. SMITH. Will the Senator stop there? It will be noted that those claims are being studied at this time. We expect that we shall have to pay the full amount. The Army estimates that the final total of all claims will not exceed $21,000,000, of which it is expected $19,500,000 will be paid to the Swiss Government. Those claims are being studied right now. All we are trying to do is to authorize the Secretary of State and the Secretary of Defense, working with the Army, to determine what the figures are and to make settlement. The Committee on Appropriations will have to be satisfied that the amounts which are asked to be appropriated are proper.

Mr. WHERRY. I do not want to detain the Senate longer. I do not wish to put my judgment up against that of the Committee on Foreign Relations, but I do not understand why there is an appropriation

asked for a greater amount than is involved in the claim submitted. I would not be averse, in view of the statement of the Senator and of the committee, to our acknowledging a claim of $16,000,000. But why make a ceiling of $21,000,000 when the admitted claim to date is only $16,000,000?

Mr. SMITH. Let me call the attention of the distinguished Senator to this language of the bill:

That the Secretary of State is authorized to pay to the government of foreign countries such sums as the Secretary of State, in consultation with the Secretary of National Defense, shall determine to be necessary to provide compensation—

And so forth. Then it is provided—

That the total amount of compensation authorized herein shall not exceed $21,000,000.

We are not authorizing the payment of $21,000,000, but are simply saying that that amount shall not be exceeded.

Mr. WHERRY. The Senator cannot say what the additional amount will be until the claims are all accepted?

Mr. SMITH. We are authorizing the Secretary of State to settle these matters, which are now 2 or 3 years overdue, especially having in mind the situation of the Swiss Government, which is a friendly government, and which has been asking us why they cannot receive a payment on their claims.

Mr. WHERRY. Mr. President, I am not objecting to the judgment of the committee or to the argument presented by the distinguished Senator, but it seems to me that we would simply be taking a leap in the dark if we were to make a ceiling appropriation of $21,000,000 or $25,000,000 or $19,000,000, or whatever the proposed amount may be. It seems to me that the proper procedure would be to pay the amount which the Foreign Relations Committee has now decided is due, and then make further investigations in regard to any other cases which may arise. Such matters must come before the Foreign Relations Committee, anyhow, for its approval.

Mr. SMITH. Then the procedure the Senator suggests is that each time one of these claims is settled, if another claim is made, another bill should be introduced; is that correct?

Mr. WHERRY. Certainly.

Mr. SMITH. Our feeling was that we should give an over-all authorization, with a ceiling, to the Secretary of State, to permit him to act in connection with the Secretary of Defense, so as to enable them to settle these routine claims, which we do not doubt for a minute we are liable for.

Mr. WHERRY. That would simply establish a precedent; and if thereafter any country thought it had even a color of title under the $21,000,000 ceiling so authorized, it would make the claim.

It seems to me that the proper procedure is to settle the present claim, and then let other claims be handled as they may arise.

Mr. ROBERTSON of Wyoming. Mr. President, I should like to ask the Senator from New Jersey whether I am correct in my understanding that this measure proposes an over-all authorization, and would apply equally to nations that are not cited in the bill at present, should they in the future find that they have claims for damages against the Government of the United States.

Mr. SMITH. If they file such claims prior to July 1, 1948; yes. The bill provides a final date, as well as a ceiling as to the total amount of dollars.

Mr. ROBERTSON of Wyoming. But any other nation that might be damaged is to be included under the provisions of the bill, although that nation has not filed its claim today; but it would have until July 1, 1948, in which to do so; is that correct?

Mr. SMITH. Yes. I wish to say to the Senator that we asked the National Military Establishment carefully about that matter. They have not had other claims filed, and they say there is no possibility that other claims will be filed, except those set forth in the report.

Mr. ROBERTSON of Wyoming. But under the provisions of this measure, if other nations have such claims, they may file them at any time prior to July 1, 1948; is that correct?

Mr. SMITH. Yes; they can make such claims, of course.

Mr. ROBERTSON of Wyoming. Mr. President, I object.

The PRESIDING OFFICER. Objection being made, the bill will be passed over.

The next measure on the calendar will be stated.

BILL AND JOINT RESOLUTION PASSED OVER

The bill (H. R. 3342) to enable the Government of the United States more effectively to carry on its foreign relations by means of promotions of the interchange of persons, knowledge, and skill between people of the United States, and other countries, was announced as next in order.

Mr. TAFT. Let the bill be passed over.

The PRESIDING OFFICER. The bill will be passed over.

The joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-Saint Lawrence Basin with the exception of certain provisions thereof, was announced as next in order.

Mr. WHERRY. Let the joint resolution be passed over.

The PRESIDING OFFICER. The joint resolution will be passed over.

That concludes the calendar.

LEGISLATIVE PROGRAM—THE MUNDT BILL

Mr. WHERRY. Mr. President, for the RECORD, and also to point out the program again to the Members of the Senate who are present at this time, let me say it is our intention, if it meets with the approval of the Senate, at the close of the session of the Senate on Wednesday, just before a motion to take a recess is made, to move that Calendar No. 861, House bill 3342, be made the unfinished business, so that at the next session following the recess on Wednesday, which we anticipate will be on Friday, the debate on that measure will occur.

The PRESIDING OFFICER. Does the Senator from Nebraska desire to request unanimous consent for that purpose?

Mr. WHERRY. No, Mr. President; I simply make that statement for the RECORD, so that Senators who are making their plans may know what the intention is.

Mr. LUCAS. Mr. President, will the Senator yield to me?

Mr. WHERRY. I yield.

Mr. LUCAS. The bill to which the Senator has referred is generally known as the Mundt bill; is it not?

Mr. WHERRY. That is correct. In order that Senators may be informed, I make this announcement for the RECORD, and I also make it to the Senators who are present at this time, namely, that at the conclusion of the session on Wednesday, just before the recess is taken, we propose to make that bill the unfinished business, and have the Senate take a recess until Friday; and it is intended that the bill will be taken up at the beginning of the session on Friday.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Swanson, one of its reading clerks, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 1426) to extend veterans' preference benefits to widowed mothers of certain ex-servicemen.

ADJOURNMENT TO WEDNESDAY

Mr. WHERRY. Mr. President, I now move that the Senate adjourn until Wednesday next at 12 o'clock noon.

The motion was agreed to; and (at 3 o'clock p. m.) the Senate adjourned until Wednesday, January 14, 1948, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

MONDAY, JANUARY 12, 1948

The House met at 12 o'clock noon.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. HALLECK) laid before the House the following communication from the Speaker:

JANUARY 12, 1948.

I hereby designate Hon. CHARLES A. HALLECK to act as Speaker pro tempore today.

JOSEPH W. MARTIN,
Speaker.

PRAYER

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Father, infinite and eternal, in an olden time Thou didst speak, "When thou passest through the waters I will be with thee; and through the rivers, they shall not overflow thee. For I am the Lord thy God, thy Saviour." Speak to us now, as we bow a moment in prayer; speak to us and shed light upon the problems that perplex us. Help us to be worthy of those who love us and ready to forgive those who wrong us. Write the spirit of benevolence in our hearts, that we may be the helping hand to the weak and a comfort to the afflicted and the distressed. O may the whole human

race be filled with the blessings of Thy truth and the vision of Thy approaching kingdom. In our Saviour's name. Amen.

The Journal of the proceedings of Thursday, January 8, 1948, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the President pro tempore had appointed Mr. LANGER and Mr. CHAVEZ members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers in the following departments and agencies:

1. Department of the Army.
2. Department of Commerce.
3. Department of Justice.
4. Department of the Navy.
5. Department of State.
6. Department of the Treasury.
7. Civil Service Commission.
8. Federal Works Agency.
9. Housing and Home Finance Agency.
10. National Archives.
11. Office of Government Reports.
12. Reconstruction Finance Corporation.
13. United States district court (eastern district of North Carolina).
14. Veterans' Administration.

RULES COMMITTEE

Mr. ALLEN of Illinois. Mr. Speaker, I ask unanimous consent that the Rules Committee may have until midnight tonight to file any rules or reports.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

THE ANNUAL MESSAGE OF THE PRESIDENT OF THE UNITED STATES

Mr. BYRNES of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. BYRNES of Wisconsin. Mr. Speaker—

> The President is in no wise satisfied with his own positions. First he takes up one, and in attempting to argue us into it he argues himself out of it, then seizes another and goes through the same process, and then, confused at being able to think of nothing new, he snatches up the old one again, which he has some time before cast off. His mind, taxed beyond its power, is running hither and thither, like some tortured creature on a burning surface, finding no position on which it can settle and be at ease.
>
> * * * He is a bewildered, confounded, and miserably perplexed man.

Mr. Speaker, those are not my words. I am echoing the words of Abraham Lincoln which he uttered on the floor of the House of Representatives 100 years ago, January 12, 1848. I think if he were here today he would repeat them.

EXTENSION OF REMARKS

Mr. GOODWIN asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. SARBACHER asked and was given permission to extend his remarks in the RECORD.

Mr. COLE of Kansas asked and was given permission to extend his remarks in the RECORD and include an address he delivered last Friday.

Mr. AUCHINCLOSS asked and was given permission to extend his remarks in the RECORD in two instances; to include in one an editorial, and in the other an article.

Mr. ROBERTSON asked and was given permission to extend his remarks in the RECORD in two instances; to include in one a letter from the Dairy Commissioner of the State of North Dakota, and in the other an editorial by David Lawrence.

CHARTER OF THE DISTRICT OF COLUMBIA

Mr. AUCHINCLOSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. AUCHINCLOSS. Mr. Speaker, I have asked for this brief time in order to announce to the Members of the House that I have this day introduced a bill which in accordance with its short title will be known as the Charter of the District of Columbia. This bill is the product of work which has been done during the past 8 months by the Subcommittee on Home Rule and Reorganization of the District of Columbia of the House District Committee, and was authorized by the House of Representatives under House Resolution 195.

The subcommittee first addressed its attention to a review of the previous studies of the District government, and an up-to-date report on the present organization and administration of the government was prepared. After intensive study of this report, the committee and its staff considered the problem of not only simplifying the government in the District, but also the adoption of what are considered good practices in the management of municipal affairs.

From the beginning the subcommittee had three objectives in mind: First, the relief of Congress from the burdensome housekeeping functions of the District of Columbia while still retaining its control over District affairs as required by the Constitution of the United States; second, the creation of a representative local government for the District by qualified electors; and, third, the provision of an efficient and economical government for the District of Columbia. It is obvious that if all three of these objectives are to be achieved the problems of home rule and reorganization of the District government are inextricably tied together. Home rule by itself might accomplish the first and second objectives but not necessarily the third, while reorganization by itself might achieve the third but not effect the first or second.

A complete report of the work of the subcommittee will be submitted to the Congress in about a week or 10 days, and I urge that every Member of Congress read this report. I feel it safe to say that due to the work of the subcommittee an opportunity will be offered to the Congress to enact a sensible, modern, and American plan of government for the Capital City of the United States, and I am pleased to announce that the corresponding subcommittee of the District Committee of the Senate has agreed to work wholeheartedly to that end with your committee.

EXTENSION OF REMARKS

Mr. BUSBEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the Appendix of the CONGRESSIONAL RECORD and include therein a report entitled "Report on the United Public Workers—CIO and Its Affiliates." I had an original estimate from the Public Printer estimating the cost at $301.75, but since then the material has been shortened and the cost should run considerably under that amount.

The SPEAKER pro tempore. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

DEVELOPMENT AND CONSERVATION OF WATER, POWER, AND OIL

Mr. WELCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WELCH. Mr. Speaker, the most serious problem facing large sections of our Nation today is the proper development and conservation of water, power, and oil. There is a critical shortage of water and power from one end of the State of California to the other. There is an absolute shortage of power in the States of Oregon and Washington.

The population of the State of California has increased 43 percent since 1940 and it continues to increase at the rate of more than 6,000 persons per week. The population of the State of Oregon has increased 39 percent and the population of the State of Washington has increased 29 percent during the same period.

California produces no coal, and the State's known oil reserves will be exhausted within 10 years; therefore there is an urgent necessity for impounding every acre-foot of water and developing every possible potential kilowatt of hydroelectric power in the State.

Mr. Speaker, there is at the present time a critical shortage of power in the States of Oregon and Washington, and a severely critical shortage of both water and power throughout the entire State of California.

For years past, men of foresight and vision saw the need of greatly increasing our hydroelectric power potential. They not only urged maximum expansion of the Tennessee Valley Authority,

and the completion of such projects as Grand Coulee, Bonneville, Colorado River-Hoover Dam, and Shasta Dam, but sought to persuade the private power companies to increase and expand their facilities to meet the growing demands for power.

Production necessary to win the war would not have been possible without the electric power generated by public hydroelectric power projects. Power plants throughout the West are producing at their full capacity at present but are far short of meeting the demand. This is particularly true in California, Oregon, and Washington. No appreciable amount of coal is produced in California or Oregon. Some coal of an inferior grade is mined in the State of Washington. Washington and Oregon produce no oil. California's known oil reserves will be exhausted within 10 years.

Every kilowatt of hydroelectric power that can now be produced in the Government-built Grand Coulee and Bonneville power plants on the Columbia River is already under contract, and there is great demand for more power to meet the fast-growing needs of the two States of Oregon and Washington.

In the State of California where there is almost entire dependency upon seasonal rain and snowfall, water must be stored for continuous availability throughout the entire year for both the development of hydroelectric power and irrigation of otherwise semiarid lands.

A primary cause of the growing demands for both water and power in the Pacific Coast States is the tremendous increase in population taking place in California, Oregon and Washington. Census statistics for July 1, 1940, show there were 6,907,387 persons in the State of California. By July 1, 1947, this population had increased 43 percent to 9,876,000 persons, and it continues to increase at the rate of more than 6,000 persons per week.

The State of Oregon had a population of 1,089,684 people on July 1, 1940. By July 1, 1947, its population had increased 39 percent to 1,517,000. The State of Washington had a population of 1,736,-191 in the census of July 1, 1940, and it increased 29 percent to 2,233,000 by July 1, 1947.

This large movement of population westward has increased the need for both water and power beyond expectancy to an alarming degree. Increases in population mean an increase in the industrial economy and the demand for both water and power. The tremendous demands for power during the past year have necessitated the use of some 40,000,000 barrels of oil for the production of electrical energy, a large part of which should be produced by hydroelectric power plants. Our national petroleum resources are limited and every barrel of oil taken from the ground is gone forever. It is a woeful waste of irreplaceable oil to use it for manufacturing electricity in areas where hydroelectric power can be developed. Hydroelectric power is inexhaustible. Every reclamation, conservation project developing hydroelectric power builds our national peacetime economy just that much stronger and strengthens our national defense.

The use of oil to generate electricity, or the shipment of oil out of the United States to foreign countries, weakens our national defense and dissipates our known oil reserves to just that extent. During the past year we have been shipping irreplaceable oil to foreign countries at the rate of 140,000,000 barrels a year. The American Petroleum Institute estimated that known petroleum reserve deposits in this country at the end of 1946 amounted to 20,000,000,000 barrels of crude oil. It has been testified before congressional committees that we are now consuming 2,000,000,000 barrels of oil each year and this consumption is increasing. This means that our known oil reserves will be exhausted in 10 years or less.

It is time for action.

INCOME-TAX REDUCTION

Mr. LOVE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. LOVE. Mr. Speaker, all taxes are, in the end, paid by the people and cannot, in reality, be shifted to artificial entities. The only sound method of tax relief is to subtantially cut the total amount of taxes paid to the Government.

As often as a part of our tax burden is attempted to be shifted to imaginary taxpayers, as has recently been suggested, just that often will the same tax burden come back to the people, hidden in the price of food, clothes, and other commodities that average people buy.

Experience has proven that increased taxes on the cost of production result either in higher prices or inferior merchandise and as usual the people again pay the bill. There is only one answer for actual tax relief to the people and that is, I repeat, to cut the total amount of taxes and not by foolishly trying to shift tax burdens.

Whatever amount of tax that is actually cut from the total taxes paid to the Government can never boomerang to the people.

As a result of the cuts in appropriations made by the Eightieth Congress, together with additional unestimated revenue, the Federal surplus for the current fiscal year will be approximately $5,000,000,000. This surplus should unqualifiedly be passed along to our own people in the form of tax relief and should positively not be given away by our Government in the form of blank checks under the guise of foreign relief.

In February 1947, I introduced an income-tax reduction bill known as H. R. 2171. My bill would increase all Federal income-tax exemptions from $500 to $700, thereby giving substantial tax relief to those of the lower income groups. My bill would also cut all Federal income taxes by 10 percent, thereby relieving taxpayers in the upper income brackets. Such a tax reduction would amount to a sum greater than the total cost of all bread and wheat products purchased by our people. It would also encourage venture capital and be an incentive to new enterprise and consequently result in additional jobs. This plan could not result in higher prices or inferior merchandise because taxes would be actually cut and not just temporarily shifted.

I have been working for such a tax reduction plan for the past 10 months and I am delighted that the Ways and Means Committee of the House of Representatives is about to report a bill that substantially follows the plans of tax reduction that I have outlined.

When this bill is enacted into law, I am confident it will result in a substantial and actual tax reduction for all our people.

AMERICAN RED CROSS

Mr. CLEVENGER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks, and to extend my remarks in the Appendix of the RECORD in two instances and include two articles. Should either of these articles slightly exceed the two-page limit I ask that it be printed notwithstanding that fact.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. CLEVENGER. Mr. Speaker, I have the following letter addressed to me from my district:

Hon. CLIFF CLEVENGER,
Member of Congress,
Washington, D. C.

DEAR SIR: The enclosed news item would indicate that the dictatorial methods of a police state are being extended to welfare and relief work. We are doing our best to check it. Can you help?

Sincerely,

W. E. SHACKLEY.

For the benefit of the House, may I say that this is from the city of Van Wert, in my district. For a number of years this city of some 10,000 people has raised the funds for the Red Cross, and for the YWCA, the YMCA, the Boy Scouts, and the general charities by a Community Chest drive. Unlike the city of Washington, theirs is oversubscribed. However, the American Red Cross have refused to have their funds raised in this way and have canceled the charter for the Red Cross in the county of Van Wert, not bebecause they did not raise the quota but because they did not dot their i's and cross their t's in accordance with the control of the National Red Cross. I extend under consent these articles from the Van Wert Times-Bulletin—can the top command of Red Cross be losing their sense of proportion?

NO ONE CAN BLAME THE NAM FOR THIS ONE

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. MURRAY of Wisconsin. Mr. Speaker, I repeat there is not any doubt but what the President has the power, the authority, and the funds to control food prices.

Example No. 1 was when Mr. Luckman was projected into the poultry picture. What happened to poultry prices? Week after week chickens have been selling for 50 to 60 percent of parity when the law states "not less than 90 percent of parity." Eggs are on this day and hour selling in the West and Midwest at 50 to 60 percent of parity. Nothing is being done about it either. This is an example of what happens to a livestock product.

Let us take a look at another product. On January 10, 1947, the Secretary of Agriculture announced a $6 per bushel support price for flaxseed. On that date the parity price of flaxseed was $3.63 per bushel. This support floor was 165 percent of parity on January 10, 1947. The parity price of flaxseed today is $4.14 per bushel and the support price is continued at $6 per bushel. What effect did this 165 percent of parity have on the price of other grains? What do you think? What effect did it have on other vegetable oils?

This $6 floor price on flaxseed provides a 25 to 30 cents per pound floor price on linseed oil. Do you think that a 25- to 30-cent support price on this vegetable oil had any influence on the price on other vegetable oils? Vegetable oils and animal fats like lard have always had a close price relationship. Do you think the 25- to 30-cent support price on a vegetable oil strengthened or weakened lard prices? Last spring lard was 17.5 cents per pound and advanced to 27 cents per pound or by over 50 percent. There were, of course, other contributing causes for the price advance.

The point, Mr. Speaker, is that the administration dominates the food prices—whether one thinks they are too low or whether one thinks they are too high.

There is not much sense to be blaming the NAM, nor any sense in wishing to restore the police state OPA. Again I state that the President has the power, authority, and the money, as long as it lasts, to control prices, and he has the responsibility if and when he wishes to assume the responsibility.

RIVERS AND HARBORS AND FLOOD-CONTROL PROJECTS

Mr. ENGEL of Michigan. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, revise and extend my remarks, and include therein a statement containing the flood-control and river and harbor projects which were approved by the Budget and which will be considered in the budget hearings.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. ENGEL of Michigan. Mr. Speaker, the President's budget message is coming up today. I am placing into the RECORD the list of the projects of both rivers and harbors and flood control which were approved by the Budget and showing the amounts which were approved for each project. I am doing this with the distinct understanding that the committee and the Congress are not bound by the Budget, and that Congress and the committee will write their own bill. I am placing this list into the RECORD to make it unnecessary for Members to come to the committee or to the War Department to find out what has been approved for a particular project. I feel they are entitled to that information.

Last year—fiscal year 1948—Congress approved $415,553,525 for rivers and harbors and flood control, this included construction, maintenance, planning, and so forth. The President's budget for 1949, including all the above items, totals $663,219,000, or an increase of $247,600,000 over 1948 fiscal year. Congress approved $116,718,700 for rivers and harbors for 1948 fiscal year. The President is asking for $191,267,000 for 1949, an increase of $74,548,300 over 1948 fiscal year. Congress approved $298,835,000 for all items of flood control for 1948 fiscal year.

The President is asking for $472,000,000 for the same purpose for 1949, an increase of $174,000,000 over 1948 fiscal year. While I feel that some increase is justified, I have a firm conviction that it will be difficult to justify an increase of a quarter of a billion dollars even for flood control and rivers and harbors.

River and harbor construction

PROJECT AND AMOUNT	
Portland Harbor, Maine	$1,600,000
New Haven Harbor, Conn	1,500,000
Bridgeport Harbor, Conn	100,000

COMMITTEE ON EDUCATION AND LABOR

Mr. LANDIS. Mr. Speaker, I ask unanimous consent that the Committee on Education and Labor may sit during this week while the House is in session at such times as the House shall be engaged in general debate or on special orders.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

EXTENSION OF REMARKS

Mr. BANTA asked and was given permission to extend his remarks in the RECORD and include an editorial from the Rolla Daily News.

SPECIAL ORDER GRANTED

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent that on Tuesday, the 20th of January, after the disposition of business on the Speaker's desk and the conclusion of special orders heretofore entered, I may be permitted to address the House for 30 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

EXTENSION OF REMARKS

Mr. RICH. Mr. Speaker, I ask unanimous consent to extend my remarks in the Appendix of the RECORD and include a statement by the Economists National Committee on Monetary Policy and the recommendation of 53 members on how to combat inflation in the United States, and the first way is a radical reduction of Government expenditures. I hope the membership will read the statement when it is printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD and include an article.

Mr. BUCK asked and was given permission to extend his remarks in the RECORD and include an editorial from the New York Times on oleomargarine and in a second instance to include an article from the New York Journal of Commerce.

SHOCKING WASTE OF WHEAT AND FLOUR

Mr. BUCK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BUCK. Mr. Speaker, to save grain the Secretary of Agriculture, pursuant to Public Law 395, has limited the production of distilled spirits. I salute him.

A more fruitful field for saving wheat and flour, however, has yet to receive the attention it deserves. A sizable segment of the baking industry sells bread on consignment which means that retail outlets are constantly oversupplied. Unsold bread returned by retailers entails, I am advised, a loss of some 5 percent of total production or roughly 600,000,000 loaves of bread a year. Enough flour is therein contained to feed hungry people for a substantial period.

Voluntary agreements to end this practice are permissible under Public Law 395. Accordingly, I have called upon the American Bakers Association to take the initiative in the premises. I have also asked the Secretaries of Agriculture and Commerce to encourage and implement such agreements. The support of Members of the House in this endeavor is solicited.

EXTENSION OF REMARKS

Mr. SEELY-BROWN asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. RANKIN asked and was given permission to extend his remarks in the RECORD and include an article written by Gen. H. H. Arnold.

SPECIAL ORDER GRANTED

Mr. SIKES. Mr. Speaker, I ask unanimous consent that the special order assigned to me for today be vacated, and that I may be permitted to address the House for 15 minutes on Thursday after the disposition of business on the Speaker's desk and the conclusion of special orders heretofore entered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

EXTENSION OF REMARKS

Mr. MADDEN asked and was granted permission to extend his remarks in the RECORD and include an editorial from the Gary Post-Tribune, of Gary, Ind.

Mr. STIGLER asked and was granted permission to extend his remarks in the RECORD and include a newspaper article.

Mr. DAVIS of Georgia asked and was granted permission to extend his remarks in the RECORD and include a speech.

Mr. DORN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include an article by Maj. Alex P. de Seversky, We Are Preparing for the Wrong War. I have an estimate from the printer that it will cost $195.25. Notwithstanding the additional cost, I ask that the extension may be made.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina [Mr. DORN]?

There was no objection.

COMPENSATION FOR POSTAL EMPLOYEES

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. MADDEN. Mr. Speaker, this week more than 700 delegates, representing postal employees from 44 States, are convening in Washington. The National Association of Letter Carriers wish to bring to the attention of Congress the total inadequacy of their present wage and salary income to cover the inflationary high cost of living. Today the postal employee on the beginner's salary of $2,100 a year, finds that it is impossible to provide his family with the bare necessities of life. The Members of Congress realize how much the cost of living has skyrocketed in the last 18 months since price control was removed. In June 1946, the cost of living was then unreasonably high and up until that time the postal employees of this country had received but one salary raise in 23 years. The postal employees during the war, contributed greatly to America's victory. Owing to depleted personnel who were called to the armed services, thousands of postal employees carried on the added burden of delivering the mail and other duties incident thereto. During the war rush period, they willingly worked overtime to a degree that impaired the health of a great number of postal employees. I think every Member of Congress who is familiar with the postal service in metropolitan areas, realizes that special consideration should be given toward increasing the salary in order to meet the present inflationary prices.

Legislation to increase retirement annuities which have not been increased since 1930 will also be considered by the convention this week. Because of inadequacy of present retirement rates, thousands of carriers, clerks, and other postal employees are remaining in service despite their eligibility for pensions. Should this be corrected, thousands of jobs will be opened for younger men who thus far have been unable to get into the service. The morale of employees in post offices throughout the country is running at a very low ebb and our postal service is not up to standard because of economic conditions under which so many postal employees are now struggling.

DISCHARGE PETITION, UNIVERSAL MILITARY TRAINING

Mr. LARCADE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. LARCADE. Mr. Speaker, I wish to call attention to the fact that I have this morning placed on the Speaker's desk a discharge petition on the bill known as the universal military training bill. This bill is the version approved by the American Legion. I understand the Veterans of Foreign Wars and the AMVETS have also approved this draft.

I am filing this discharge petition in the hope that a majority of the Members of the House who are in favor of this legislation will sign this discharge petition in order that the matter may be brought to the floor of the House without further delay.

The SPEAKER pro tempore. The time of the gentleman from Louisiana has expired.

THE LATE HONORABLE GUINN WILLIAMS

Mr. FISHER. Mr. Speaker, I ask unanimous consent to proceed for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. FISHER. Mr. Speaker, it is my unpleasant duty to announce to the House the death on Friday last, of the Honorable Guinn Williams, a former Member of this body from the State of Texas. Mr. Williams was first elected a Member of the Sixty-Seventh Congress from the Thirteenth Texas District, and was reelected four succeeding times after that.

He voluntarily retired from the House in 1933 to become the director of the Regional Agricultural Credit Corporation, in San Angelo, a loan agency of the Reconstruction Finance Corporation, which saved many farmers and ranchmen from bankruptcy during the depression. Before that time his home had been at Decatur, Tex.

In Congress, Mr. Williams served as chairman of the House Committee on Territories and he was sponsor of a bill to grant independence to the Philippines.

A native of Calhoun County, Miss., Mr. Williams settled in Texas in 1877. He served in the State Senate of Texas before coming to Congress. In private life he was a successful banker, farmer, and ranchman.

This distinguished Texan will also be remembered for his fraternal interests. He once served as grand master of the Masonic Order in Texas, and was honored with a thirty-third degree in the Scottish Rite.

Mr. Speaker, Guinn Williams was not a seeker of praise. He lived the simple American life, measuring any right to fame in the amount of service he could render to his fellow man, and that was done in great abundance.

America has lost a great man, and I and many of you have lost a friend. Few men have contributed more to the preservation of our institutions than Guinn Williams. We can all be inspired by the high principles to which he devoted his long and useful life.

To the widow and the family I extend my heartfelt sympathy.

Mr. RAYBURN. Mr. Speaker, will the gentleman yield?

Mr. FISHER. I yield.

Mr. RAYBURN. I simply want to say, Mr. Speaker, that during the 10 years of the service of Mr. Williams, of Texas, I was a Member of this House. In my opinion he was one of the most typical Texans I have seen on this floor. He was a man of sterling character, a splendid legislator, fair, and a wonderfully fine gentleman. In time like these we can ill afford to lose men of the high character and patriotism of Guinn Williams.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. FISHER. I yield.

Mr. RANKIN. It was my pleasure and privilege to serve with Guinn Williams for 10 years in this House.

Instead of being a typical Texan, Mr. Williams was a typical Mississippian who went to Texas and helped upbuild that great State.

He was one of the finest men with whom I have ever served, and one of the most conscientious public servants. When he left this House it was a great loss to the country.

His passing is mourned by everyone who knew him.

EXTENSION OF REMARKS

Mr. REEVES asked and was given permission to extend his remarks in the Appendix of the RECORD and include an address made in New Orleans on January 8.

Mr. WOODRUFF asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances; in one to include an editorial and in the other to include a newspaper article.

Mr. NIXON asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances and in each to include editorials.

Mr. EDWIN ARTHUR HALL asked and was given permission to extend his remarks in the Appendix of the RECORD and include a radio speech.

Mr. TEAGUE asked and was given permission to extend his remarks in the Appendix of the RECORD and include a letter.

Mr. MANSFIELD asked and was given permission to extend his remarks in the Appendix of the RECORD covering the activities of the Butte High School band in Salt Lake City, Las Vegas, and Los Angeles, where they participated in the Tournament of Roses.

BUDGET MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read and together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

I am transmitting my recommendations for the Budget of the United States for the fiscal year ending June 30, 1949, together with revised estimates for the fiscal year 1948. This Budget includes estimates to carry out both existing laws and proposed legislation.

The realities of our existing international and domestic requirements account for the size of this Budget. It affords essential support to the foreign policy of the United States by encouraging widespread international economic cooperation while maintaining our armed strength. It affords essential support to our domestic policies by advancing the development of human and material resources within a fiscal plan designed to help combat inflation.

The expenditures of the Federal Government are still inescapably dominated by the war and its aftermath. In the fiscal year 1949, 79 percent of our expenditures directly reflect the costs of war, the effects of war, and our efforts to prevent a future war: National Defense—International Affairs—Veterans' Benefits—Interest on the Public Debt—Tax Refunds. This should be a sobering thought to all of us as we strive for the creation of lasting peace among the nations of the world. Only 21 percent of our expenditures finance the Government's programs in the broad areas of: Social Welfare—Housing—Education—Research — Agriculture — Natural Resources — Transportation — Finance — Commerce— Industry— Labor—General Administration.

In the 2 years since the surrender of the Axis Powers, expenditures of the Federal Government have decreased sharply from 63.7 billion dollars in the fiscal year 1946, to 42.5 billion dollars in the fiscal year 1947, and an estimated 37.7 billion dollars in the current fiscal year. Were the Budget for the fiscal year 1949 to be confined solely to carrying out existing laws, there would be a further decrease to slightly below 34 billion dollars.

It would be gratifying if I could say to the American people and to their Senators and Representatives in the Congress that our existing programs fulfill our national requirements. But this is not the case. Our national and international responsibilities demand that we undertake new activities and expand some activities in which we are already engaged.

Expenditures of 5.7 billion dollars will therefore be required for the fiscal year 1949 to finance programs under proposed legislation. Of this, 4.4 billion dollars is needed for our aid to the European recovery program and for aid to other countries, including China. Most of the remainder is for the development of our human and material resources through universal training, aid to education, expansion of social security, health insurance, housing, and scientific research.

Thus the Budget for the fiscal year 1949 calls for total expenditures of 39.7 billion dollars. Receipts during this period are estimated under existing tax laws at 44.5 billion dollars. This will balance the Budget and provide 4.8 billion dollars which should be used to reduce the public debt.

For the current fiscal year, 1948, the revised estimates included in this Budget indicate expenditures of 37.7 billion dollars and receipts of 45.2 billion dollars. This indicates a surplus of 7.5 billion dollars which should be used to reduce the public debt.

Our 1949 Budget reflects a number of important decisions involving Government policies which deserve special attention.

National defense, amounting to 11 billion dollars, accounts for 28 percent of the 1949 Budget, as it will in 1948. The net increase over 1948 is 279 million dollars, which is less than the amount needed to inaugurate the program of universal training. The total for all other defense activities has been held below the 1948 level. Increases in the most essential activities, such as aircraft procurement and civilian reserves, will be offset by economies and reductions elsewhere. This Budget emphasizes progress toward a modern and balanced armed force.

International affairs and finance, amounting to 7 billion dollars, accounts for 18 percent of Budget expenditures in 1949 as compared with 15 percent in 1948. The cost of the new aid programs will be largely counterbalanced by completion or sharp reduction of expenditures for the British loan, UNRRA, post-UNRRA relief, and certain other programs. There will therefore be a net increase in this category of less than 1.5 billion dollars. The new international program is our answer to an unprecedented challenge. We are undertaking it under conditions basically different from any which we have experienced before. I have repeatedly stressed the critical importance of our aid to European recovery, which represents the bulk of this expenditure. The sums requested are vital to the success of this program.

The budgetary implications of failure to achieve recovery in Europe and other crucial areas deserve additional emphasis. Should failure of these programs result in a further extension of totalitarian rule, we would have to reexamine our security position and take whatever steps might be necessary under the circumstances. The costs of added military strength, if Europe should succumb to totalitarian rule, would far exceed the costs of the program of economic aid now before the Congress.

Expenditures for national defense and international activities constitute 46 percent of the total Budget for the fiscal year 1949. The increases in national defense and international aid programs total almost 1.8 billion dollars, which is close to the increase of the entire Budget over 1948.

All other expenditures of the Government in the fiscal year 1949 are estimated at 21.6 billion dollars, about the same as the 1948 expenditures in these categories. Within this total, which includes 6.1 billion dollars for veterans, over 5.2 billion dollars for interest, and nearly 2 billion dollars for refunds, there are a number of reductions resulting from declining programs and a number of increases to finance activities which should not be deferred.

During the fiscal year 1949, fewer veterans will be requesting educational aid and needing unemployment compensation benefits than in 1948, but expenditures for hospital construction will increase, leaving a net reduction of 530 million dollars for veterans' activities. This reduction contemplates continuation of existing veterans' programs with the same types of benefits as have been available this year. The surplus property disposal program is nearing completion, and under revised legislation should cost about 200 million dollars less than in the current year.

New legislative proposals, together with expansions in present programs

necessary to carry out the intent of existing laws, account for the increases in expenditures.

Failure to improve our educational system or to expand flood-control work would mean risking the loss of precious resources—human and material. Failure to adopt a program of health insurance would mean that many families will continue to go without adequate medical care. Failure to broaden the coverage of present social insurance and to increase benefits on a permanent basis would mean too much reliance upon relief, whereas more reliance on insurance is our national objective. Failure to adopt a long-range housing program would mean further delay in achieving decent housing standards. Failure to devote needed sums to our atomic plant would mean that we would be derelict in the use of one of our most valuable resources. Each of these proposed new and expanded programs has been most carefully weighed. All these programs directly support the twofold objective of building economic and individual strength and health in this Nation, and of better preparing this Nation to discharge its increased responsibilities in the family of nations.

We are all aware of the imperative necessity for preventing further inflation. Both the expenditure and revenue proposals of this Budget are designed to avoid inflationary effects wherever possible.

To this end, Government purchases of materials in short supply are being deferred where feasible. The expansion of Government credit and of Government guarantees of private credit is being restricted. Further, I am not recommending at this time cost-of-living increases in pay for military and civilian Government personnel, nor cost-of-living increases in benefits for our veterans, social insurance beneficiaries, retired Federal employees, and other similar groups.

The rapid increase in living costs during the last 18 months has placed a serious burden on these groups. Yet, to offset the cost-of-living increase since the last time pay or benefit rates were advanced for each group would add at least 2.4 billion dollars to Budget expenditures in 1949—apart from increases that would be paid from the trust funds. This large expenditure would add greatly to the inflationary pressures in our economy.

The wiser approach, which I have proposed to the Congress, is to enact a comprehensive program to hold living costs down. Enactment of that program will give relief not only to Federal personnel and annuitants, but to our citizens generally. In the event that the Congress does not provide controls adequate for this purpose, I may have to recommend further adjustments in pay and benefit rates.

The question of taxation must be considered in the framework of the budgetary program and the danger of further inflation. One of our most effective weapons in fighting inflation is a substantial Budget surplus for reduction of the national debt. If we make this protection less effective, we shall have to rely much more heavily on direct price, wage, and rationing controls, which we all agree should be held to a minimum.

Some readjustment is required to afford relief to many families who are suffering great hardship from the present tax structure. But total receipts should not be reduced, and the surpluses for 1948 and 1949 should be used to decrease the national debt.

This Budget reveals the magnitude of the problems with which the Federal Government must deal. It demonstrates alike the heavy responsibilities of our international position and our concern for the maintenance of a sound domestic economy. The plain fact is that our Budget must remain high until we have met our international responsibilities and can see the way clear to a peaceful and prosperous world. Prudence demands that we plan our national finances in full recognition of this fact.

BUDGET RECEIPTS

Net tax revenues for the fiscal year 1949 are estimated at 1.3 billion dollars higher than the present estimate for 1948, and 3.7 billion dollars higher than in 1947. The estimates assume continuation of the present high levels of business activity and incomes, continued full employment, and stable prices close to the present level. These assumptions presuppose an effective anti-inflation program.

Budget receipts, however, will decline from 1948 to 1949, because of an estimated reduction of 2 billion dollars in miscellaneous receipts, most of which is due to a decline in receipts from sales of surplus property.

The tax adjustment I am proposing will mean a reduction in personal income taxes and a corresponding increase in corporation taxes. The estimates in the Budget for these taxes are based on existing legislation.

Budget receipts

[Fiscal years. In millions]

Source	Actual, 1947	Estimate, 1948	Estimate, 1949
Direct taxes on individuals:			
Individual income tax	$19,629	$21,951	$22,506
Estate and gift taxes	779	842	816

Excise taxes	7,270	7,320	7,476
Employment taxes:			
Existing legislation	2,039	2,409	2,493
Proposed legislation			350
Customs	494	394	378
Deduct (appropriations to trust funds):			
Existing legislation	1,459	1,627	1,672
Proposed legislation			350
Subtotal, net tax revenues	38,428	40,837	42,155
Miscellaneous receipts	4,831	4,373	2,322
Budget receipts	43,259	45,210	44,477

Between 1947 and 1948, revenues from corporation and individual income taxes combined increased by 5.5 billion dollars, more than offsetting the decline of 3.2 billion dollars in excess profits tax revenues. Between 1948 and 1949, revenues from the two types of income taxes will increase by an added 1.3 billion dollars. These increases are largely the result of inflation during the past 18 months, which has swelled corporation profits and aggregate personal incomes. Because the increase in tax collections lags behind the rise in profits and incomes, the 1948 increase in tax collections will be followed by a further rise in 1949.

Excise tax and employment tax receipts are expected to increase slightly in the fiscal year 1949 as a result of continued high levels of production and income. Receipts from customs, however, have been declining in recent months. The international trade agreements which recently became effective may cause a further slight drop in these receipts in 1949.

The expansion of existing social insurance programs and introduction of a health insurance program, under proposed legislation, will add an estimated 350 million dollars of employment taxes to gross Budget receipts, but this will all be transferred directly to the trust accounts without reflection in Budget totals.

RETIREMENT OF THE PUBLIC DEBT

The public debt on June 30, 1947, was 258 billion dollars. Budget surpluses of over 7 billion dollars in the current fiscal year and nearly 5 billion dollars next year should permit further reduction to 246 billion dollars by June 30, 1949. As long as employment and income continue at record levels—and especially while inflationary dangers threaten—we must make the most of our opportunity for debt retirement.

The retirement of public debt held by banks, other private institutions, and individuals will be considerably greater than the 12-billion-dollar reduction in the total, since trust accounts and other Government agencies will accumulate about 6 billion dollars during the two fiscal years. The investment of these accumulations in Federal securities will permit the Treasury to retire securities in the possession of other holders.

In management of the public debt, the major goal will be the achievement of the maximum anti-inflationary effect. This has been our policy since the debt reached its peak in February 1946.

Debt held by the commercial banks and the Federal Reserve banks has been repaid out of excess Treasury balances, the Budget surplus, trust fund accumulations, and the sale of savings and investment bonds to the public. The whole process reduces the volume of private bank deposits and so combats inflationary pressure.

At the same time, we shall do our utmost to increase voluntary savings in all forms, particularly the purchase of savings bonds.

To curtail bank credit expansion, the Federal Reserve System and the Treasury have progressively tightened the money market. This has been reflected in an adjustment in interest rates and a better balance between short- and long-term rates. However, by refunding long-term securities into short-term securities we have minimized the increase in the average interest rate paid by the Government on market debt.

BUDGET EXPENDITURES AND APPROPRIATIONS

The Budget total includes expenditures from the general and special accounts of the Treasury and also the net expenditures from checking accounts of

Government corporations and enterprises. It does not include trust account expenditures.

Budget expenditures and appropriations by major programs

[Fiscal years. In millions]

Program	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
National defense	$14,281	$10,746	$11,025	$10,295
International affairs and finance	6,540	5,533	7,009	2,104

Adjustment to daily Treasury statement basis	+464	-------	-------	-------
Total	42,505	37,728	39,669	32,930

Expenditures in relation to authorizations: Expenditures in the fiscal year 1949 will exceed appropriations for that year by 6.7 billion dollars. Of the 1949 expenditures, 28.4 billion dollars will be made from appropriations recommended in this Budget, including 5.4 billion dollars under permanent appropriations. Expenditures of more than 10.5 billion dollars, including 5 billion dollars for international programs, will be financed by appropriations for 1948 or earlier years. The remaining expenditures of about 700 million dollars, principally net expenditures of Government corporations and credit agencies, will be made under other types of congressional authorizations.

The Budget also includes recommended new authority for Government agencies to make contracts amounting to 1.9 billion dollars. Before expenditures are made in payment of these contracts, the funds must be provided by appropriations, but this will not be necessary until later years. Within the 32.9 billion dollars of appropriations recommended for the fiscal year 1949, nearly 1.7 billion dollars are for the liquidation of prior contract authorizations.

Changes in expenditures: The major reasons for the changes in the national defense, international, and veterans' programs have already been summarized.

The 1949 Budget expenditures for social welfare, health, and security involve increases for the public health and public assistance programs, and initial administrative costs of the proposed health insurance program. Trust account expenditures for benefit payments will also increase.

Expenditures for housing and community facilities decrease. Completion of veterans' re-use housing and curtailment of mortgage purchases more than offset the first-year costs of the proposed long-range housing program.

The increases for education and general research result mainly from the proposed grants by the Federal Government to the States to aid elementary and secondary education, and from the proposed establishment of the National Science Foundation.

The increase in expenditures for agriculture is accounted for mainly by decreased net receipts of the Commodity Credit Corporation. Proposed revisions in price support will bring some savings in 1949. More adequate provision for the conservation and use program is recommended for the 1949 crop year.

Natural resources expenditures will increase chiefly because of higher expenditures for atomic energy, flood control, and reclamation.

Major increases in expenditures for transportation are in grants for highway and airport construction, and direct improvement of rivers and harbors. These are offset in part by lower Maritime Commission expenditures.

While the anti-inflation program will require higher expenditures, the total for finance, commerce, and industry will fall sharply because the current year total includes the nonrecurring payment of war damage insurance profits to the Treasury.

The increase for labor is required to carry out the provisions of the Labor Management Relations Act of 1947, to restore essential services in the Department of Labor, and to cover increased costs of the public employment offices.

General government expenditures will decrease, chiefly because of lower expenditures for the disposal of surplus property.

Although the public debt will be lower, interest payments will increase somewhat, chiefly as a result of higher accruals on savings bonds as they approach maturity.

Tax refunds will decrease mainly because of lower refunds arising from adjustment of wartime corporate tax liabilities.

In the preparation of this Budget I directed all departments and agencies to plan to continue their programs for the fiscal year 1949 at or below their operating levels in 1948. Exceptions were made only where activities could no longer be deferred. Many departmental requests to perform desirable services have been refused. Throughout the Federal Government changes in activities will be made to achieve the rigid standards of operating economy which have governed the preparation of this Budget.

SPECIFIC PROGRAMS

National defense

Since the close of hostilities, we have reduced our armed services to a small fraction of their wartime strength. Nevertheless, national defense remains the largest single Government program. The defense of the United States and the task of administering the affairs of 140 million people in the occupied areas require heavy expenditures.

The enactment of the National Security Act of 1947 will enable us to move more rapidly toward an integrated and balanced national defense program. The amounts we can afford to spend for national defense, as for any other program, are necessarily limited. The Secretary of Defense and the coordinating agencies provided by this act are now engaged in reviewing the missions and programs of the services in order to attain the most effective defense possible within these limits.

In this Budget, we provide only for the minimum requirements of the National Military Establishment. For the Air Force, the Budget will permit a higher level of maintenance and operation, with a considerable increase in aircraft procurement. For the Army, it will provide for improved equipment for small, highly mobile tactical ground forces, as well as for occupation troops and their support. For the Navy, it will provide for maintaining the fleet and naval aviation at the 1948 strength, but with increased aircraft procurement.

One basic element of a balanced national security program which I have repeatedly urged—universal training—is still lacking. A national program of broad training for all young men is necessary to provide a firm base for small standing forces to be augmented, when necessary, by trained reserve components. Such training should make possible an ultimate reduction in our standing forces. In anticipation of early approval by the Congress of a program of universal training along the lines recommended by the Advisory Commission on Universal Training, I have included 400 million dollars in the expenditure estimate for the fiscal year 1949. This is the first-year cost of a program which in full operation will cost about 2 billion dollars annually.

National defense

Other	31	9	4	4
Universal training (proposed legislation)	-------	-------	400	500
Total	14,281	10,746	11,025	10,295

Expenditures: A net increase of 279 million dollars in total national defense outlays is estimated in fiscal year 1949. Apart from readjustments in the expenditures of the Air Force, Army, and Navy, the most substantial increases are for universal training and stockpiling, and the largest decreases are in terminal-leave payments and other war liquidation expenses.

This Budget is the first to provide for a full year's operation of the facilities established by the National Security Act of 1947 for coordination and direction of our defense, both within the National Military Establishment and by the National Security Council and the National Security Resources Board.

Expenditures for Air, Army, and Naval defense are estimated at more than 10.3 billion dollars for the fiscal year 1949—slightly less than in the present year. These expenditures cover pay and maintenance of military personnel, civilian-reserve components, research and development, aircraft procurement, naval ship construction, and military and naval public works, as well as other equipment and general operating expenses. Each of these is discussed in the following paragraphs.

Pay and maintenance of military personnel, excluding civilian reserves, in the fiscal year 1949 will require an estimated 4.7 billion dollars, or 45 percent of the 10.3 billion dollars. This estimate will provide for an average military strength of 1,423,000 officers and enlisted personnel in the Air Force, Army, and Navy for the fiscal year 1949, about the same as the current strength of the armed forces. Existing recruitment inducements appear to be adequate to maintain these forces. Pay, subsistence, travel, welfare, training, clothing, and medical expenditures will average about 3,300 dollars a man in the armed forces—nearly two and one-half times the cost a decade ago.

For the civilian-reserve components, estimated expenditures for the fiscal year 1949 are nearly 600 million dollars, an increase of about one-half from the present year. This includes 13 million dollars under proposed legislation, mainly for additional drill pay. These organizations are also being provided with equipment, facilities, and supplies procured and paid for during the war.

Expenditures for military research and development—exclusive of those for atomic weapons, construction of facilities, and pay of military personnel engaged on research projects—will remain at about 550 million dollars in the coming year. A large proportion of these expenditures will be in aviation and related fields.

Increased replacement of aircraft is essential in the fiscal year 1949 to support our air arms at the planned levels. Wartime reserves of planes and parts are becoming depleted or obsolete. Expenditures for procurement of complete aircraft in fiscal year 1949 are estimated at 900 million dollars—an increase of about 150 million dollars over the current year. Expenditures in 1950 for this purpose will rise again as a result of the proposed increase of over 30 percent in 1949 authorizations. The plans for the Air Force contemplate operation of 55 combat groups and 17 separate squadrons.

Estimated expenditures for naval ship construction will amount to 312 million dollars in the fiscal year 1949, an increase of 34 million dollars over 1948. At present the Navy is required by law to complete certain ships authorized and started during the war. To assist in modernizing the fleet, I recommend that this provision be repealed. The partially completed ships would then be held in reserve. I also recommend that 230 million dollars of the money that would have been spent to complete these ships and convert them to advanced design be used for the construction, during the next few years, of improved types of vessels. This substitution will mean a more efficient fleet.

For construction of military and naval public works, expenditures for fiscal year 1949 are estimated at 334 million dollars, as compared with 409 million dollars in the current year. Both estimates include anticipated expenditures under legislation now pending before the Congress to provide essential housing for troops in the United States and overseas and other construction of high priority, such as research facilities.

The remaining expenditures of about 2.9 billion dollars for the defense activities of the National Military Establishment are for equipment, supplies, and civilian pay roll for maintenance and operation. In the fiscal year 1949 the bulk of this expenditure will be to pay civilian workers engaged in industrial, supply, maintenance, and administrative activities, overseas and in the United States, on defense programs. About 40 percent of all Federal civilian employees will be engaged in defense activities. Procurement of equipment and supplies other than aircraft will be limited chiefly to developmental and test items and some new equipment for ground force units. Limited provision is made for the maintenance of stand-by plants and facilities and for industrial mobilization planning.

Aside from the National Military Establishment, the most important expenditures for defense activities in 1949 will be for military stockpiling, particularly to build up reserves of those raw materials and supplies which must be obtained from overseas sources that might be cut off in time of war. Although procurement of materials for the strategic stockpile is behind schedule, the estimated expenditures for procurement in the fiscal year 1949 are held to 285 million dollars because of the urgent need for such materials to promote world recovery, and the prevailing shortages with attendant high prices. In addition to the new procurement, transfers from Government-owned stocks to the stockpile which began in 1947 will continue, with expenditures of 20 million dollars for processing in fiscal year 1949. The value of these transferred materials will amount to an estimated 400 million dollars in all by the end of the fiscal year 1949.

Appropriations and other authorizations: Appropriations of 10.3 billion dollars will be necessary for national defense in the fiscal year 1949. This amount includes estimates of 500 million dollars in appropriations for universal training and 61 million dollars for other proposed legislation, largely for military construction.

Excluding 565 million dollars in appropriations to liquidate obligations under prior contract authorizations, the new appropriations recommended for the fiscal year 1949 amount to 9.7 billion dollars. In addition, new contract authorizations of about 1.2 billion dollars are required—923 million dollars for aircraft procurement, 65 million dollars for public works, and 230 million dollars for naval ship construction.

Thus, I am recommending new authority to obligate totaling 10.9 billion dollars in the fiscal year 1949, which will permit expenditures both in 1949 and later years. Of this amount nearly 50 percent will be devoted to defense aviation. For 1948, the corresponding total authority to obligate is 10.4 billion dollars. The increase is mainly for the proposed universal training program and for strategic stockpiling.

I am also requesting authority to continue available for expenditure an estimated 380 million dollars of appropriations obligated in the fiscal year 1946 and earlier years, largely for aircraft procurement contracts and for military construction. This extension will permit liquidation of outstanding contracts on which deliveries have been delayed.

Appropriations for major activities of the Air Force and the Army have not yet been separated. In addition to obligations under direct appropriations to the Department of the Air Force, about half of those by the Department of the Army in the fiscal year 1949 will be for the Air Force. The complete recasting of the appropriations structure necessary to separate the accounts of these two Departments is now in process, but could not be completed in the short time since the passage of the National Security Act.

International affairs and finance

Our new international programs for European aid have been fully presented to the Congress in recent messages. The appropriation already enacted will provide "stopgap" assistance through next March to the European countries in most urgent need—France, Italy, and Austria—as well as aid to China. It is essential that we move as soon as possible to a positive program for promotion of European recovery.

In addition to the European recovery program, other international-aid programs for several countries, including China, are provided for under proposed legislation. Definite recommendations on these programs will be transmitted shortly. Also, I urge again enactment of the inter-American military cooperation bill proposed last May. Estimates of appropriations and expenditures for this group of programs have been included in the Budget.

Expenditures: By far the largest international expenditures in the fiscal year 1949 will be under the European recovery program—4 billion dollars, in addition to 500 million dollars in the fiscal year 1948. Expenditures under other proposed legislation for aid are estimated at 60 million dollars in the fiscal year

1948 and 440 million dollars in the fiscal year 1949.

The Export-Import Bank will continue in the fiscal year 1949 to make loans to expand international trade and promote economic development, particularly in the Western Hemisphere. The need for such loans will decline, however, when the dollar problem of Western Hemisphere countries is eased as a result of purchases in these countries under the European recovery program. Disbursements of the Bank's funds will also decline because its large loan authorizations to several European countries are rapidly being exhausted during the current fiscal year. Plans for the European recovery program call for use of the Bank's facilities to administer loans made under the new program.

The largest expenditures for foreign relief now fall under the occupied-areas program. These expenditures are handled by the Army and are chiefly for shipments of goods to prevent disease and unrest. They will increase in both the 1948 and 1949 fiscal years. The increase in 1948 will be caused largely by sharply higher prices, a severe German crop failure, extensive storm damage to Japanese crops, and the British dollar shortage. Since the United Kingdom is no longer able to meet dollar costs for essential supplies for the bizonal area of Germany the United States is now assuming this expense. The British will continue to finance purchases from sterling areas. Expenditures under this program will increase still further in the fiscal year 1949 because all dollar costs of imports for relief in the bizonal area must be paid by the United States for the entire fiscal year.

[1] A 1948 supplemental appropriation of $6,800,000,000 is anticipated for the period from Apr. 1, 1948, to June 30, 1949.

[2] A 1948 supplemental appropriation of $300,000,000 is also included in this budget.

[3] Less than one-half million dollars.

International affairs and finance—Continued

[Fiscal years. In millions]

Program or agency	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
Philippine war damage and rehabilitation:				
Present programs	$73	$95	$180	$116
Proposed legislation for veterans' benefits	-------	-------	16	16
Membership in international organizations:				
Present programs	17	25	24	24
Proposed legislation	-------	15	34	4
Foreign relations:				
Department of State:				
Present programs	111	160	164	151
Proposed legislation	-------	20	16	20
Other	6	7	7	1
Total	6,540	5,533	7,009	2,104

Expenditures under the interim-aid and post-UNRRA programs will be completed in the fiscal year 1949. Most of the shipments under these programs will be made in the current fiscal year, but expenditures lag behind shipments.

Payments to the Philippine Republic to make partial compensation for war damage and to aid in its rehabilitation are now increasing. I renew the recommendation that the Congress enact legislation to carry out our pledge to provide certain benefits to Philippine veterans.

Estimates for the fiscal years 1948 and 1949 for membership in international organizations include disbursement of part of a proposed loan to the United Nations for construction of permanent headquarters.

The budget for the Department of State includes amounts needed under proposed legislation to carry out an effective foreign informational and cultural program. This program is essential in order to present to the world an accurate picture of United States policies and to counter misleading propaganda. An adequate information program will greatly increase the effectiveness of our international political and economic policies, especially in Europe.

Appropriations: A supplemental 1948 appropriation of 6.8 billion dollars is included in this Budget for the first 15 months of the European recovery program. This appropriation would be available for obligation through the fiscal year 1949, and would be used mainly in that year. Experience with programs involving similar procurement problems indicates that the margin between the recommended appropriation and the 4.5 billion-dollar expenditure estimate during the same period is reasonable. To permit systematic and economical placement of orders for later delivery, appropriations must be substantially greater than expenditures in the initial phase of the program. In addition, bills for a portion of the goods shipped in one fiscal year are not paid until the following year, and this lag of expenditures is particularly significant in a large new program.

Other recommended 1948 supplemental appropriations, to be spent mainly in 1949 and later years, include 300 million dollars for other foreign-aid programs, 65 million dollars for the loan to the United Nations for headquarters construction, and smaller amounts for Department of State programs.

Because of the large supplemental appropriations for international activities recommended for the fiscal year 1948, appropriations for 1949 total only 2.1 billion dollars. The two main items are 1,250 million dollars for the Army programs in occupied areas and an estimate of 450 million dollars for aid programs under proposed legislation. Recommended appropriations totaling 133 million dollars for Philippine programs are below estimated expenditures because a portion of the appropriations for the current year will remain available for expenditure next year.

Veterans' services and benefits

During the past year about 900,000 World War II servicemen returned to civilian life, increasing the number of World War II veterans to 14.7 million and the total veteran population to 18.6 million. Within a decade, veterans and their immediate dependents will constitute more than two-fifths of our entire population. Many of our veterans have rights under more than one provision of Federal law and, although the readjustment program has now passed its peak, veterans' benefits will remain a large part of the Federal Budget for many years to come.

Veterans' services and benefits (excluding trust accounts)

[Fiscal years. In millions]

Program or agency	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
Readjustment benefits (Veterans' Administration):				
Education and training	$2,122	$2,532	$2,029	$1,971
Unemployment and self-employment allowances	1,444	669	412	
Loan guarantee	75	79	87	
Other	-------	71	67	
Pensions (Veterans' Administration)	1,929	2,055	2,105	1,948
Insurance (Veterans' Administration)	840	154	60	58
Hospitals, other services, and administrative costs:				
Construction:				
Veterans' Administration	19	50	112	230
Corps of Engineers (Army)	9	77	300	-------
Federal Works Agency	26	52	6	-------
Current expenses:				
Veterans' Administration:				
Hospital and medical care	425	520	615	639
Other activities	472	368	308	306
All other agencies	9	4	2	2
Total	7,370	6,632	6,102	5,154

While the veterans' program has largely accomplished its original purposes, certain aspects of the Servicemen's Readjustment Act need modification. The law is being used in some cases to provide training for avocational or leisure-time activity at high cost to the Government and without commensurate benefit to veterans. The Veterans' Administration does not have adequate authority to limit the expenditure of funds under this act to constructive educational and vocational programs. A reexamination of the basic purposes of the law and suitable modification of its provisions should result in substantial savings. These savings should more than offset

such limited increases of other benefits as may be justified.

Expenditures: Expenditures for readjustment benefits in the fiscal year 1949 will amount to an estimated 2.6 billion dollars—a decline of 756 million dollars from expenditures in the current year.

College, school, and job training is now expected to reach its peak in the fiscal year 1948, with an average of 2,250,000 veterans enrolled. For the fiscal year 1949, average enrollment is expected to fall to 1,730,000 students and trainees. The number will decline in all programs except institutional on-the-farm training.

In recent months the number of veterans drawing unemployment and self-employment allowances has been substantially smaller than previously expected. The 1948 appropriations approved by the Congress provided for an average of 925,000 on the rolls. The present estimates provide for an average of 625,000 in the fiscal year 1948, with a further reduction to 390,000, on the average, in the fiscal year 1949.

Under the loan-guarantee provisions of the Servicemen's Readjustment Act, veterans obtained about 635,000 loans amounting to 3.6 billion dollars in the fiscal year 1947. About 90 percent of the loans are on residential property and the remainder are for business or farm purposes. The Government's obligation under the guarantee and insurance provisions runs to nearly one-half of the face value of these loans. In addition, the Government makes on behalf of the veterans a principal payment equal to 4 percent of the guaranteed portions of the loans. The estimates provide for continuation of the 1947 rate for the loan-guarantee program in both the fiscal years 1948 and 1949. However, in both years higher expenditures will be required to meet losses and to permit property acquisitions under loan defaults.

Compensation and pension payments to veterans and their dependents are estimated on the basis of an average of 2,923,000 claimants in fiscal year 1948 and 3,010,000 claimants in fiscal year 1949. The expenditure estimate of 2.1 billion dollars for 1949 includes 242 million dollars for subsistence allowances for disabled trainees and students.

New hospitals and domiciliary facilities are necessary to provide for the increasing number of veterans who apply for care. The construction and improvement of facilities to cost over 1.1 billion dollars has already been authorized by the Congress, but has been delayed by unduly high bids and by shortages of materials. The present expenditure estimates assume that one-half of the work on the total-authorized program will be completed by the end of the fiscal year 1949.

The operating expenses of the medical, hospital, and domiciliary-care program of the Veterans' Administration will increase substantially again in the fiscal year 1949, largely because of the steady rise in patient load, which will average 148,000 in fiscal year 1949. The out-patient care program will cost slightly less in the fiscal year 1949 than in the current year, but will provide treatment for over 6,000,000 veterans.

Declining work loads and improvements in administrative procedures will reduce operating and administrative expenditures for other programs.

Expenditures for insurance, mostly transfers to the national service life insurance trust fund, will continue to decline in 1949. The cumulative cost to the Government of insurance due to war hazards in World War II will exceed 3.6 billion dollars by the end of the fiscal year 1949.

Trust accounts: Premiums from veteran policyholders, supplemented by Government payments to cover war hazards, have resulted in substantial accumulations in the national service life insurance and Government-life insurance trust funds. The assets of the national service-life insurance trust fund will reach an estimated 7.3 billion dollars by June 30, 1949.

Veterans' life-insurance funds (trust accounts)

[Fiscal years. In millions]

Item	Actual, 1947	Estimate, 1948	Estimate, 1949
Receipts:			
Transfers from general and special accounts	$822	$147	$46
Premiums, interest, and other	816	659	698
Total	1,638	806	744
Expenditures for benefits, refunds, and other (deduct)	349	372	376
Net accumulation	1,289	434	368

A dividend estimated at between 1 and 2 billion dollars will probably become payable to the servicemen who hold or have held national service life insurance. This dividend cannot be paid, however, until the financial liabilities of the fund and its legal status are determined. Because of these uncertainties, the payment of the dividend is not now included in estimated trust account expenditures. The Veterans' Administration is gradually catching up on the processing of the basic insurance records. The general contingency reserve includes expenditures to administer payment of the dividend if the exact status of the fund is clarified during the fiscal year 1949.

Appropriations and other authorizations: To cover the expenditures necessary for veterans' programs, appropriations of 5.2 billion dollars are recommended for the fiscal year 1949. The difference of about 950 million dollars between estimated expenditures and appropriations will be covered by unexpended balances from fiscal year 1948 and prior appropriations.

The appropriations estimated for the fiscal year 1949 include 230 million dollars to liquidate obligations incurred under contract authorizations for the hospital and domiciliary construction program. New contract authorizations of 43 million dollars are also requested, in part for modernization of hospital facilities and in part to cover the increased construction cost of previously authorized hospitals.

Social welfare, health, and security

In the existing social security programs we have a tried and successful framework within which to construct an integrated, comprehensive system providing for all citizens some protection against the major economic hazards of our society. We have made real progress toward our objective, but it is still far from realized.

From time to time I have proposed measures which, taken together, would complete our present system to a substantial degree and would provide protection increasingly on a social insurance basis. I intend shortly to discuss this legislative program in a special message to the Congress. Some of the proposals would have immediate fiscal effects, and I have accordingly included estimates for the following items:

Old-age and survivors insurance: Extension of coverage to all gainful workers, including agricultural and domestic employees, farmers, and other self-employed persons.

Increases in individual benefit amounts and in the maximum amount of earnings taxable.

Health program: Provision of a national system of health insurance and improved services and facilities for public health and medical care.

Unemployment compensation: Extension of coverage to employees of small businesses and as many other groups as feasible.

Public assistance: Broadening of Federal aid to include general assistance, and allotment of Federal grants for public assistance so as to relate them to the financial resources and needs of each State.

Other proposals, such as temporary and permanent disability insurance benefits, would not affect estimates for the fiscal year 1949.

Social welfare, health, and security (excluding trust accounts)

[Fiscal years. In millions]

Crime control and correction	79	87	84	82
Other	12	11	13	4
Total	1,379	1,960	2,028	2,077

Expenditures: My recommendations for legislation involve Budget expenditures estimated at 116 million dollars in the fiscal year 1949, mainly for revisions of public assistance and initial administrative costs of the medical-care program. The other proposals would be self-financed through trust accounts.

Federal grants to States for the administration of unemployment compensation—the only Budget expenditure for this Federal-State program—are projected for fiscal year 1949 at slightly above the level for the current year. This rise reflects higher State salaries and operating costs.

Railroad retirement expenditures for retirement and dependency insurance, which consist almost entirely of transfers to the railroad retirement trust account, are determined by railroad pay-roll tax receipts. These are expected to remain at their present high level throughout the fiscal year 1949. The estimate for the current year is unusually high because it includes approximately 200 million dollars properly allocable to previous years' operations which could not be transferred until the necessary appropriation was enacted early in the fiscal year 1948.

An increase in expenditures for assistance to the aged and other special groups in the fiscal year 1949 is occasioned by higher anticipated public assistance payments. Recently the Congress extended until 1950 the temporary increase in the Federal share of these payments. In view of the upward trend in both benefit levels and case loads, the Federal expenditures for this purpose under existing legislation are expected to continue to rise. An additional 100 million dollars for public assistance has been included as an estimate of expenditures under the proposed legislation for improving this program.

An increase in Federal Security Agency expenditures for public health work in 1949 results primarily from progress in the Federal-aid hospital construction program, and from some expansion in other grants-in-aid and in research activities. The expenditure estimates include 1.4 million dollars for surveys under the stream pollution abatement program now under consideration by the Congress. The rise in Federal Works Agency expenditures for health purposes is in items for construction of hospital and research facilities in and near the District of Columbia.

Trust accounts: All social insurance benefit payments are made directly from trust funds. The handling of contributions varies. Thus, the pay-roll taxes collected by the States to finance unemployment compensation are deposited directly in a Federal trust account, as are nearly all the taxes collected for railroad unemployment insurance. For the railroad retirement system, pay-roll tax collections are included in Budget receipts and the transfers to the trust account appear as Budget expenditures. The proceeds of Federal pay-roll taxes which finance old-age and survivors insurance are transferred to the trust account without affecting expenditures; the transfer is made through a deduction from receipts and an equal credit to the trust account.

Social welfare, health, and security (major trust accounts)

[Fiscal years. In millions]

Fund and item	Actual, 1947	Estimate, 1948	Estimate, 1949
Unemployment trust fund:			
Receipts:			
Deposits by States and railroad unemployment taxes	$1,143	$1,238	$1,231
Interest	147	166	186
Extension of coverage (proposed legislation)	-------	-------	20
Payments: State and railroad unemployment withdrawals	869	814	906
Net accumulation (including proposed legislation)	420	590	531
Federal old-age and survivors insurance trust fund:			
Receipts:			
Appropriation from general receipts	1,459	1,627	1,672
Interest and other	163	193	222
Extension of coverage and raising of tax base (proposed legislation)	-------	-------	200
Payments of benefits and administrative expenses:			
Existing legislation	466	556	649
Proposed legislation	-------	-------	175
Net accumulation (including proposed legislation)	1,157	1,264	1,270
Railroad retiremen' account:			
Receipts:			
Transfers from Budget accounts	298	758	575
Interest	24	40	55
Payments of benefits	173	229	232
Net accumulation	149	570	398
Federal employees' retirement funds:			
Receipts:			
Salary deductions and transfers from Budget accounts	483	470	465
Interest	95	105	11
Payments of annuities and refunds	323	241	250
Net accumulation	255	333	330
Health insurance trust fund (proposed legislation):			
Receipts from pay-roll contributions	-------	-------	150
Payments of benefits	-------	-------	-------
Net accumulation	-------	-------	150

All major social welfare trust funds will continue to accumulate assets in the fiscal year 1949. Excepting the unemployment trust fund, they are retirement funds which will, for some time, accumulate reseves against future benefit payments. By the end of the next fiscal year, these assets should reach 16 billion dollars.

The unemployment insurance system is related more immediately than the others to the level of economic activity. With continuing full employment, its assets should continue to accumulate, bringing the total up to approximately 9 billion dollars by the end of fiscal year 1949.

Broader coverage under old-age and survivors insurance would be financed by extending the pay-roll tax at the rates provided by present law to the newly insured persons and their employers. These old-age pay-roll tax collections would suffice for several years to finance more liberal benefits for both present and prospective beneficiaries.

The estimates for the health insurance program assume a total initial pay-roll tax of one-half of 1 percent of individual salaries up to 4,800 dollars a year, effective January 1, 1949, to furnish a basis for establishing eligibility for benefits and to build up an operating reserve. After a year or two of accumulation at this low rate, the permanent contribution rate would go into effect and the system would begin to provide benefits on a basis which is mainly self-financing.

The recommended broadening of social insurance would increase both the receipts and expenditures of the trust accounts over what they otherwise would have been. For the immediate future, however, these increases would be greater in pay-roll contributions than in benefits. This net accumulation is useful at this time as an anti-inflation measure.

Appropriations and other authorizations: Appropriations recommended for social welfare, health, and security exceed estimated expenditures for the fiscal year 1949 principally because the appropriation requested for the Railroad Retirement Board includes authorization to transfer to the trust account during the current fiscal year part of the taxes to be collected in this year. Wage increases in the railroad industry have resulted in higher pay-roll tax collections than were estimated when the appropriation for the current year was enacted.

Besides the appropriations, contract authorizations of 119 million dollars are recommended for public health programs. This total includes 75 million dollars for the Federal-aid hospital construction program, 26 million dollars for research and hospital facilities for the Public Health Service, and 18 million dollars for the District of Columbia hospital center. Included in the recommendations for 1949 is an appropriation of 60 million dollars to liquidate the prior year's contract authorization for Federal-aid hospital construction.

Housing and community facilities

Since last fall the number of dwelling units built has been greater than in any comparable period in our history. But many families most in need of housing, particularly veterans, cannot afford to pay present high prices.

The Federal housing program, under present legislation, places primary emphasis upon assuring adequate credit through guarantees of mortgage loans for builders and veterans—including guarantees by the Veterans' Administration, classified under veterans' pensions and benefits. These credit aids have accelerated construction and increased the proportion of old and new homes going to veterans. These emergency aids have temporarily replaced most of the activity under the permanent mortgage insurance program.

In recent months, however, available credit has tended to outrun available production, and thus has helped to keep construction costs and housing prices at unreasonably high levels. The Housing and Home Finance Administrator, with the assistance of the National Housing Council, is tightening standards employed in administration of existing loan-guarantee programs—including guarantees of loans both on new construction and on existing homes. He is also preparing legislative proposals designed to strengthen the permanent programs and to taper off

the special credit aids necessary during the war and reconversion periods. As long as inflation persists, such emergency aids should be limited to the types of construction most urgently needed, particularly rental housing and lower-cost housing.

Both private enterprise and local public agencies need a broader long-range program of assistance from the Federal Government. I again recommend enactment of comprehensive housing legislation. Besides establishing a better basis for Government assistance to private enterprise, such legislation is necessary to provide Government assistance through local public agencies for the sizable minority of our people whose incomes are insufficient to pay the full cost of decent housing. The Budget includes estimated first-year expenditures under such proposed legislation. These expenditures would largely prepare the way for later expansion in loans and grants for low-rent housing, urban redevelopment, and farm housing; for insurance of direct investments in large-scale rental housing; and for basic technical and economic research.

Fundamental to all progress in raising the housing standards of our people is a substantial reduction in the current excessive level of housing costs. While cost reductions are primarily the responsibility of private industry and labor, the Federal Government should provide assistance wherever possible. The Housing and Home Finance Administrator is organizing a series of conferences with representatives of local government, industry, and labor, designed to speed the removal of existing obstacles to lower costs.

The greatest promise of additional cost reduction lies in development and use of improved materials and methods, and in revision of obsolete building codes to permit their use. With the assistance of the Bureau of Standards and other Federal agencies, the Housing and Home Finance Administrator is working out a program of technical research to supplement industry programs. The Administrator will make the results of these studies available in usable form to builders, local public agencies, and others who can translate them into actual cost savings or quality improvements.

I also urge the Congress to authorize the Federal Works Agency to make additional commitments for repayable advances to States and localities for planning community facilities and other nonhousing public works. This would revive the authority which expired on June 30, 1947. Detailed public works plans are indispensable if State and local governments are to apply public funds efficiently in construction work. Only through such advance planning can useful public works be ready to initiate when needed, and when conditions are favorable for their construction.

Expenditures: All Federal programs to furnish financial aids to private housing will show net receipts in the fiscal year 1949. With continuing high prosperity, liquidation of previous loans will remain high, and disbursements to cover losses on guarantees of private loans will be low.

The 1949 budget of the Federal Housing Administration assumes that new insurance commitments will be limited to mortgages which do not exceed a reasonable percentage of long-run value. The emergency program permitting insurance of mortgages on the basis of current costs expires on March 31, 1948. It is my hope that, if further extension proves necessary, it will be for a very limited period and that the emergency program can be progressively curtailed. Even with more conservative operations, the Federal Housing Administration expects to aid in financing almost a quarter of the houses built in the fiscal year 1949. As long as employment and income continue high, foreclosures will be few, and receipts from insurance premiums and other sources will continue to exceed expenditures (excluding investments). Thus, further substantial additions can be made to reserves available to meet future losses.

Housing and community facilities

[1] Less than one-half million dollars.

The Federal Savings and Loan Insurance Corporation, under the supervision of the Home Loan Bank Board, now insures over 7 billion dollars in share accounts of savings and loan associations. The Federal home loan banks, also under the supervision of the Home Loan Bank Board, supervise the operations of member savings and loan associations and provide a reservoir of credit to meet the needs of such associations. To minimize demands upon the Corporation and the banks in future years, extension of excessive or unsound mortgage credit must be avoided. As part of the anti-inflation program, I have requested the Housing and Home Finance Administrator to review existing regulations and policies with the Home Loan Bank Board and to propose any legislation that may be necessary to strengthen this important part of our financial structure.

Repayments are continuing on the depression loans made by the Home Owners' Loan Corporation, but at a diminishing rate as the outstanding loans decrease. By the close of the fiscal year 1949, borrowers will have repaid all but 309 million dollars of the 3.5 billion dollars advanced by the Corporation.

The new charter of the Reconstruction Finance Corporation drastically curtails the Corporation's authority to purchase mortgages. The authority to make premium payments to stimulate building-materials production has expired.

Management and disposition of war housing accounts for most of the expenditures estimated for public housing programs in the fiscal year 1949. Almost all of the 18-million-dollar increase of expenditures for low-rent housing represents net purchase of local housing authority obligations in order to refinance war-built projects on a permanent basis. Annual contributions to local authorities will increase moderately as projects are returned to low-income occupancy.

Federal expenditures for construction of public housing in the fiscal year 1949 will be limited to small amounts for resumption of a few low-rent projects authorized before the war. Construction of temporary re-use housing for veterans will be virtually completed in the current fiscal year.

Liquidation of the Defense Homes Corporation will be completed by the end of the current fiscal year. The Corporation will return to the Treasury the entire capital investment of 10 million dollars and also an estimated earned surplus of more than 2 million dollars.

This Budget provides for a small staff under the Housing and Home Finance Administrator to coordinate Government housing activities and to make technical information and assistance generally available to the housing industry and State and local officials. Except for proposed extension of rent control, classified under finance, commerce, and industry, the functions of the Housing Expediter terminate in the current fiscal year.

Repayable advances under the original authorization by the Federal Works Agency to State and local governments for planning nonhousing public works projects will amount to 16 million dollars

in 1948 and 12 million dollars in 1949. The Budget provides for an additional 10-million-dollar expenditure under the proposed renewal of this authority. Other community facility programs of the Agency are relatively small.

The Reconstruction Finance Corporation, in the fiscal year 1949, will disburse an estimated 32 million dollars in excess of repayment on loans to local public agencies for public works construction.

Appropriations: Of the 292 million dollars in appropriations required to finance existing and proposed programs in 1949, an estimated 57 million dollars will be necessary to inaugurate the proposed long-range housing program and to make advances for State and local public works planning under proposed legislation. Annual appropriations of 8 million dollars are recommended under existing legislation mainly to provide for annual contributions for low-rent housing projects.

Five permanent indefinite appropriations account for the remaining 227 million dollars. Of this total, 54 million dollars covers current expenses for management and disposition of war housing and veterans' re-use housing. The remaining 173 million dollars in the permanent indefinite appropriations is the estimated excess of current receipts from rental and sales of war housing and veterans' re-use housing over current expenses, to be deposited in miscellaneous receipts in the fiscal year 1950 without being reflected in expenditures.

Education and general research

The American people have long recognized that provision of an adequate education for everyone is essential in a democratic system of government. It has become evident in recent years that the financial resources of many States and their subdivisions are not sufficient to meet minimum educational standards. Therefore, I urge the Congress to take prompt action to provide grants from the Federal Government to the States for elementary and secondary education. The Budget estimates provide for beginning this program in the fiscal year 1949.

The Budget estimates also assume the creation of a National Science Foundation. In the Budget message last year, I recommended the establishment of an agency to encourage fundamental scientific research. The Congress passed a bill to create a National Science Foundation, but the bill included unacceptable administrative provisions and I was obliged to disapprove it. I hope that the Congress in this session will pass a bill for this purpose in keeping with the principles of responsible and efficient administration.

Expenditures: Apart from the proposed grant program, nearly all the estimated increase in 1949 in expenditures for the general promotion of education is due to the increase in vocational education grants authorized by the Congress in 1946. Expenditures of the Federal Works Agency for the maintenance and operation of schools in war-affected communities will be practically completed during the current fiscal year.

Education and general research

[Fiscal years. In millions]

Program or agency	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
Promotion of education:				
Office of Education (Federal Security Agency):				
Aid for education (proposed legislation)	-------	-------	$290	$300
Present programs	$28	$34	42	44
Federal Works Agency and other	5	4	(1)	(1)
Educational aid to special groups:				
Bureau of Indian Affairs (Interior)	11	12	12	12
Howard University (Federal Security Agency) and other	3	4	7	4
Library and museum services	8	9	10	10
General-purpose research:				
Department of Commerce:				
Radio propagation building (proposed legislation)	-------	-------	1	1
Other	15	15	19	20
Office of Scientific Research and Development (Office for Emergency Management)	5	(1)	-------	-------
National Science Foundation (proposed legislation)	-------	-------	5	15
Other agencies	(1)	(1)	1	1
Total	76	77	387	407

[1] Less than one-half million dollars.

The increase in expenditures for library and museum services is due to a slight expansion in activities in the Library of Congress and the Smithsonian Institution.

For general-purpose research, the principal expenditures are by the Bureau of the Census and the Bureau of Standards, both in the Department of Commerce. The increase for the fiscal year 1949 arises chiefly from preparatory work in the Bureau of the Census for the seventeenth decennial census in 1950 and from expenditures for the research and standards work of the radio propagation laboratories of the Bureau of Standards.

In addition to the expenditures for general and multipurpose programs included in this function, many agencies of the Federal Government carry on education or research activities which are a part of their specialized activities and which are, therefore, included as expenditures for other functions. For example, there are the education benefits of the Veterans' Administration, the scholarship programs of the State and Navy Departments, the Agricultural Extension Service, the fellowship program of the Public Health Service, and the research activities of the National Military Establishment, the Atomic Energy Commission, and the Departments of Agriculture and Interior.

Appropriations: For the fiscal year 1949, the total of appropriations for education and general research is 407 million dollars, of which 316 million dollars is an estimate of supplemental appropriations which will be required under proposed legislation and 91 million dollars is for programs under present law. The estimated appropriation for the National Science Foundation is 10 million dollars above the estimated expenditure because contracts to be made in the first year of operation will require expenditures in later years. Only 3 million dollars of appropriations is required for Howard University, since expenditures for construction will be financed in part from earlier-year appropriations.

Agriculture and agricultural resources

At the present time, American agriculture is in the best financial condition in history. Agricultural prices in recent months have been at an all-time high—nearly three times the level of 1940. Net farm income in 1947 was approximately 18 billion dollars—three and one-half times the average net farm income in the years 1935–39. Farm debts were reduced greatly during the war years and have remained at low levels.

The Government's present commitment to support the prices of most agricultural commodities at not less than 90 percent of parity will continue until December 31, 1948. At present, however, the world-wide shortage of food has raised the prices of all but a few agricultural commodities well above support levels.

Price support will be needed in the future, but the parity formula should be revised to reflect basic changes in price relationships and improvements in agricultural technology. Price supports should be regarded chiefly as devices to safeguard farmers against forced selling under unfavorable conditions and economic depression. However, they should be revised so as not to be so high as to encourage overproduction of particular commodities, which sometimes can occur even under conditions of full employment.

The authority of the Commodity Credit Corporation, which is the principal agency for carrying out our price support programs, was temporarily extended to June 30, 1948. I recommended a year ago, and I recommend again, that the Corporation be rechartered by act of Congress with a Federal charter in place of its present State charter, and that its present capital and borrowing authority be renewed.

Agriculture and agricultural resources

[Fiscal years. In millions]

Exportation and domestic consumption	77	57	47	[1] 135
Sugar Act	55	55	69	72
Food subsidies (Commodity Credit Corporation and Reconstruction Finance Corporation)	222	8	-------	-------
Agricultural land and water resources	49	50	51	50
Development and improvement	142	131	125	121
Total	1,248	614	906	655

[1] Rescission of 91 million dollars of this permanent appropriation is proposed.

Expenditures: The largest factor in the fluctuation of total agricultural expenditures is the change in the various price support, supply, and purchase programs of the Commodity Credit Corporation. Advances under the contract to purchase Cuban sugar in June 1947, for example, largely account for net expenditures of 264 million dollars in the fiscal year 1947, and likewise, the subsequent sale is largely responsible for the net receipts now expected for 1948.

By 1949, net cash outlays for price support and supply programs will be small because agricultural prices on the whole are expected to be above support levels, and reimbursements from other agencies and cash-paying foreign governments should offset expenditures for procurement of agricultural commodities. However, price support will probably be required for commodities such as potatoes, eggs, wool, and tobacco.

Under proposed legislation, a saving of 50 million dollars has been included as an estimate of the possible effects of revision of the parity formula and the level of price support.

The programs of the Farmers' Home Administration were greatly curtailed during the war period. I am asking for a small increase in administrative funds and a 15-million-dollar increase in funds for production and subsistence loans in order to meet a small part of the need for essential production credit for low-income farmers. The increase in expenditures of the Farmers' Home Administration does not reflect changes in its program, but is due primarily to changes in the method of accounting for loan repayments by farmers. In 1949 such repayments, made directly to the Treasury, will amount to an estimated 111 million dollars.

Electrification of rural areas, held back during the war years, has greatly accelerated since 1945, and will continue to expand in the fiscal year 1949 as rapidly as materials become available. Except for administrative expenses, the entire expenditure figure represents loan disbursements to local cooperatives and other borrowers.

Other corporate transactions reflect the high level of farm prosperity, which has enabled farmers in recent years to make large repayments on their mortgage indebtedness. Repayments will continue in 1949, though at a reduced rate.

In accordance with the 1948 Agriculture Appropriation Act, commitments for payments to farmers under the conservation and land-use program will be reduced for the crop-year 1948, causing a decline in expenditures in the fiscal year 1949. It is necessary, however, that this program be restored in order to prevent a serious reduction in the fertility of our soil as a result of the high production induced by heavy foreign and domestic demands for agricultural products. I therefore ask the Congress to make more adequate provision for the conservation and use program by authorizing a 300-million-dollar program for the 1949 crop year. Expenditures under this program will occur largely in the fiscal year 1950.

With the present high agricultural prices, expenditures for various surplus disposal programs under the permanent appropriation for exportation and domestic consumption of agricultural commodities can be reduced in the fiscal year 1949. On the other hand, expenditures under the Sugar Act of 1948 will be increased to make payments to sugar growers at the rates specified in the act and to cover payments owed to sugar producers in Puerto Rico—payments which were not made because of the appropriation limitation of 55 million dollars previously in effect.

The programs of the Federal Government to encourage research, education, and demonstration work, which are carried on by the Extension Service, the Soil Conservation Service, and the scientific research agencies of the Department of Agriculture, are included in "agricultural land and water resources" and "development and improvement." Expenditures for these two categories show a small net decline in 1949.

Appropriations and other authorizations: To carry out our agricultural programs, I recommend that the Congress appropriate 655 million dollars for the fiscal year 1949. This includes 150 million dollars for conservation and use to carry out the commitment authorized by the Congress for the 1948 crop year. In addition, I recommend new borrowing authority of 300 million dollars to finance Rural Electrification Administration loans—an increase of 75 million dollars over the amount authorized for 1948. On the other hand, since not all of the permanent appropriation of 135 million dollars for exportation and domestic consumption of surplus agricultural commodities will be required, I recommend the return to the Treasury of 91 million dollars of this permanent appropriation.

The recommended appropriation of 121 million dollars for the various programs included in development and improvement of agriculture reflects several changes. It contemplates an increase of 10 million dollars for grants to States, marketing research, and other research under the Research and Marketing Act of 1946. This increase will be offset by a decline of 10 million dollars in the appropriation for the Bureau of Animal Industry. Other increases and decreases will be small.

Natural resources

The key objectives of the natural resources program in the fiscal year 1949 are to find new reserves, to reduce destruction and waste, to discover new applications of resources, to promote greater reliance on resources known to be abundant, and particularly to develop the use of atomic energy.

Heavy demands on our natural resources during and since the war have made it necessary for us to take action aimed at more careful husbandry of these resources. In achieving new high levels of industrial production we have depleted our storehouse at a faster rate than ever before. In addition, our soils, water supplies, minerals, and forests available for constructive use are being diminished by avoidable wastage.

Our heritage is not so great that we can afford to overlook the growing deficiencies. Although some of our resources are practically inexhaustible, others are rapidly being depleted. Still other resources we possess only in insignificant quantity or lack completely.

The expenditures included in the Budget for 1949 are not sufficient to provide all the conservation and new development necessary to prevent a further decline in our available resources. They will, however, enable us to make moderate progress toward a more nearly sustaining basis.

Natural resources

[Fiscal years. In millions]

Program or agency	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
Atomic energy:				
Atomic Energy Commission	[1] $170	$456	$660	$625
Other agencies	4	20	14	-------
Land and water resources:				
Corps of Engineers (Army, civil functions)	180	314	449	472
Bureau of Reclamation (Interior)	121	183	268	269
Bonneville Power Administration and southwestern power transmission system (Interior)	16	20	32	27
Tennessee Valley Authority	18	46	35	35

Total	628	1,179	1,626	1,581

Expenditures: Our responsibilities for safeguarding the national defense and developing peacetime applications of atomic energy require new laboratories, new production plants, and training of an increasing number of scientists and technicians. Increased expenditures in the fiscal year 1949 are required.

Last July the Congress provided for acceleration of our program for flood control and stream-flow regulation. This action was based in large part on the recommendations which I submitted at that time. The increases estimated for the Corps of Engineers in the fiscal year 1949 are needed for the orderly execution of this program. Almost all of the expenditures will be required to carry forward projects under way in the fiscal year 1948.

The reclamation program brings new resources into use. The base has already been set for this program. Even without the addition of any new major projects, expenditures of the Bureau of Reclamation will increase by 85 million dollars in the fiscal year 1949 if construction is to proceed at a rate which will yield irrigation and power benefits without undue delay.

In order to distribute hydroelectric power as it becomes available from Government dams, expansion of transmission facilities is needed by the Bonneville Power Administration and certain extensions should be made in the southwestern area, also by the Department of the Interior. These facilities, for which increased expenditures of 12 million dollars are estimated for 1949, are essential to deliver power to areas of shortage.

Net expenditures for the Tennessee Valley Authority program in 1949 will decrease from the 1948 level. Estimated net proceeds of 750,000 dollars from power operations will be paid into miscellaneous receipts in 1949, as compared with 8 million dollars in 1948. This reduced payment is recommended in order to permit the Tennessee Valley Authority to retain corporate funds urgently needed to finance facilities required to avoid power shortages.

Construction will go forward more rapidly on the Rio Grande dams provided for in the 1944 treaty with Mexico. This will mean increased expenditures by the International Boundary and Water Commission in 1949.

Ownership of large public-domain and acquired-land holdings places on the Federal Government a direct responsibility for land conservation and management. Most of the lands administered by the Department of the Interior are unforested range lands. Expenditures on these lands in the fiscal year 1948 are inadequate for proper conservation and protection. Outlays for the land-management activities of the Department of the Interior increase from 10 million dollars in the fiscal year 1948 to 13 million dollars in the fiscal year 1949.

Our national forests, which are mostly under the jurisdiction of the Department of Agriculture, must be protected from fire, disease, and other losses, and administered so as to yield an assured timber supply for the future. Expenditures for these resources are continued at the 1948 level.

Depletion of our petroleum reserves is one of our most serious and far-reaching problems. Although discoveries of new oil pools are being made each year, reserves are becoming inadequate to match our rapidly growing requirements. Fortunately we have large supplies of coal and oil shale and moderate supplies of natural gas, which can be converted into liquid fuel. The Budget contemplates appropriation to the Bureau of Mines in 1949 of all the remaining funds authorized for the present 5-year synthetic liquid fuels program which expires in the fiscal year 1949. I recommend extension of this program for a period of 3 years and an additional authorization of 30 million dollars.

Knowledge of our natural resources is still far from complete, and cannot be made complete in a single year or even several years. The 1949 Budget provides for basic mapping and investigations only as part of a long-term program. An increase from 10 million dollars in 1948 to 15 million dollars in 1949 is needed for the basic surveys and mapping of the Geological Survey. Expenditures of the Bureau of Mines and Geological Survey for limited exploration and development, mostly for strategic and critical mineral supplies, will continue in 1949 at a slightly increased level. Since these efforts cannot result in the discovery of resources for all foreseeable requirements, we must supplement them by stockpiling materials likely to become deficient, as I have already stated in reviewing the national defense program.

Development and upkeep of our national parks, fish hatcheries, and wildlife reservations have been deferred because of the requirements of war and postwar adjustments. Increased expenditures are needed for administration and maintenance of the national parks as well as for improvement of roads, trails, parkways, and other facilities for public use and safety. The additional outlays for fish and wildlife are needed for the preservation and development of these valuable resources, including the salmon and fur-seal resources of Alaska.

The expenditure estimates for 1949 include increased allowances for development of the strategically important Alaskan area, where proved and probable resources may help to compensate for shortages in the United States.

Appropriations and other authorizations: Of the total 1.6 billion dollars of appropriations recommended for 1949, 338 million dollars will be required to liquidate prior-year contract authorizations, largely by the Atomic Energy Commission. New contract authorizations recommended for 1949 include 400 million dollars for the Atomic Energy Commission, 13 million dollars for the Bonneville Power Administration, and 4 million dollars for the National Park Service. Estimated expenditures for natural resources are 45 million dollars above the recommended appropriations, because of the carry-over of funds for some programs.

Additional contract authority of 200 million dollars is recommended for the Atomic Energy Commission in 1948 to supplement the part-year appropriation allowed by the Congress.

Transportation and communication

The current high level of economic activity makes heavy demands upon the Nation's transportation system. To meet these demands, the Federal Government must not only perform its regulatory functions but must provide basic facilities and services on an expanded scale for highway, air, and water transport. Most of the Government's activity in these fields since the war represents deferred maintenance. Little has been done so far to effect the long-run improvements that are needed.

The country's airways system is in urgent need of improvement. The installation of landing aids and the modernization of other aids to air navigation must be accelerated in order to assure increased safety and regularity of air transportation, and thus provide a solid foundation on which private capital investment can carry this industry forward. I strongly urge the Congress to provide the funds recommended for this purpose.

Expanding aviation activities also have rendered inadequate many existing airports and have pointed up the need for new ones. The amount in the Budget for the Federal-aid airport construction program represents the minimum level consistent with continued aviation development.

The Nation's highway system needs extensive improvement and modernization. While expenditures under the present Federal-aid program will continue at a high level through 1950, the fiscal year 1948 is the last for which new contract authorization is provided. The development of an adequate highway system will require continued Federal aid. In order to assure continuity in programing, I shall submit at an early date specific proposals designed to meet this need.

New ship construction by the Maritime Commission has been limited in this Budget because of the present scarcity

of steel, the large surplus of war-built tonnage, and uncertainties regarding the future economic requirements for shipping. Expenditures, though somewhat higher than in 1948, will be largely for construction previously authorized. In view of present uncertainties, it would be unwise for the Maritime Commission to start construction of ships unless it had already concluded contracts for their sale to private operators.

In the 1948 appropriation act, the Maritime Commission was placed on an annual appropriation basis and its revolving fund was abolished. As a result, the Commission has general authority to enter into long-term subsidy contracts under the Merchant Marine Act of 1936, but has neither specific authority to incur financial obligations extending into future years nor funds for payment of them. Although the Commission could still enter into long-term contracts contingent upon implementation through future appropriations, the Commission considers that this might have an adverse effect on ship construction. While restoration of the revolving fund is not recommended, I urge the Congress to provide for the financing of long-term contracts under the 1936 act. The present Budget includes an amount for operating subsidies to cover obligations under these contracts in 1949.

The subject of a sea-level canal connecting the Atlantic and Pacific Oceans and its location is under study, and my recommendations thereon will be submitted to the Congress at a later date.

The St. Lawrence waterway and power project is needed for both transportation and industry. As an important step in advance planning, the Congress should now authorize this project in order that international treaty provisions and other arrangements can be worked out.

Expenditures: To a large extent the increase in Maritime Commission expenditures after 1947 reflects the elimination of its revolving fund, and is offset by increases in miscellaneous receipts of the Treasury.

Continued emergency conditions, including the large-scale relief shipments to Europe, make it necessary for the Maritime Commission to continue to operate, sell, and charter war-built vessels beyond February 29, 1948, when its present authority expires. The estimates for 1949 assume extension of this authority to June 30, 1949, as recommended in my recent message. The drop in expenditures below 1948 is due largely to an anticipated reduction in operation under general agents. Such operation is now limited to a few specialized services, and these will be terminated as rapidly as possible. In the coastwise and intercoastal services, the Commission has entered into special chartering arrangements looking toward the eventual return to completely private operations.

The maintenance and improvement of rivers and harbors by the Corps of Engineers will call for an increase in expenditures in 1949, principally for projects already under way. Only a very few urgently needed new projects are proposed to be started in 1949.

Proposed legislation not included above	-------	-------	2	3
Total	587	1,563	1,646	1,549

(1) Less than one-half million dollars.

The reduction in Coast Guard expenditures is due principally to a lower level of construction activity in 1949. Pending legislation, for which expenditures are included in this Budget, would give the Coast Guard specific authority to operate additional ocean weather stations. This program is important to safe and regular overseas air operations and is provided for in an international agreement to which the United States is a party. I urge the Congress to take early action.

The postwar highway aid program, which has been retarded by high costs and material shortages, is now more fully under way, as is evident in the sharp increase in expenditures above the 1947 level. To avoid bidding up costs, however, the expenditures contemplated for 1949 are at a level somewhat lower than could be supported by existing authorizations.

The Budget provides for additional highway construction in Alaska and for the improvement of the Alaska Railroad. These transportation facilities are essential in the development program for the Territory.

An increase is required in expenditures of the Department of Commerce for civil aviation in keeping with the growing importance of this industry to the Nation's economy and security. The establishment and operation of air navigation facilities, and grants-in-aid for airport construction, account for most of this increase.

A moderate increase is recommended in expenditures for the National Advisory Committee for Aeronautics. The basic aeronautical research program of the Committee is of vital importance to the development of advanced types of civilian as well as military planes. The 1949 estimate also include first-year expenditures of 2 million dollars under a proposed program for construction facilities required for research in supersonic aeronautics.

The many economic problems faced by all forms of transportation and communication since the end of the war have imposed an unusually heavy work load upon the regulatory agencies in this field. Moderate increases in staff are provided in order to permit more rapid handling of regulatory proceedings.

The postal deficit is running higher in the current year than was previously anticipated. This results from a larger volume of mail, much of which is carried at rates which do not cover operating costs. Recent price advances for supplies and services have also added to the postal deficit. In addition to the deficit specifically included in the Budget, provision is made in the contingency reserve for 1948 and 1949 to cover pending increases in rail and air charges. I strongly urge early action on the recommendation contained in last year's Budget message that postage rates be revised so as to permit operation of the postal service without a deficit.

Appropriations and other authorizations: For carrying out the transportation and communication programs, I am recommending appropriations of 1,549 million dollars for fiscal year 1949, including 28 million dollars in supplemental appropriations which will be submitted upon passage of proposed legislation. Appropriations are running somewhat lower than expenditures principally because of the carry-over funds in the Maritime Commission shipbuilding program and the liquidation of prior years' obligations by the Commission. In 1948, a supplemental appropriation of 89 million dollars will be needed for the postal service, in addition to the amount included in the contingency reserve for the increase in rail and air charges.

The Budget for the fiscal year 1949 includes recommended contract authorizations of 15 million dollars for shipbuilding, about 7 million dollars each for Alaska highways and the Alaska Rail-

road, 11 million dollars for Alaska airports under proposed legislation, and 48 million dollars for construction of facilities for the National Advisory Committee for Aeronautics (including 30 million dollars under proposed legislation). The appropriation recommended for Public Roads Administration and part of the appropriation for the Department of the Interior are for liquidation of prior years' contract authorizations.

Finance, commerce, and industry

The need to control inflation has made it impossible to eliminate the few wartime controls that still remain in force. Consequently I have requested legislative authority for their extension and for the provision of additional, more effective, and urgently needed anti-inflation measures.

Legislation is now under consideration to extend rent controls, to restore controls over consumer credit, and to provide on a limited basis for mandatory allocations, price controls, rationing, and wage controls. The Congress has already extended export and import controls. Budget expenditures for administering all these controls are reflected in the estimates for this function.

While the immediate emergency of inflation demands our primary attention, we must not neglect our programs for protecting and encouraging competition and individual initiative through the established regulatory and promotional programs.

Finance, commerce, and industry

[Fiscal years. In millions]

Program or agency	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
Promotion and regulation of business:				
Wartime and other temporary controls:				
Office of Temporary Controls	$118	$2	(1)	-------
Housing Expediter:

[1] Less than one-half million dollars.

Finance, commerce, and industry—Continued

[Fiscal years. In millions]

Program or agency	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
War damage insurance (War Damage Corporation):				
Payment of profits to miscellaneous receipts	-------	$210	-------	-------
Other	$1	20	-------	-------
Control of private finance (Securities and Exchange Commission)	6	6	$6	$6
Total	238	372	190	171

Expenditures: Expenditures for finance, commerce, and industry will fall sharply in the fiscal year 1949, primarily because of the 210-million-dollar payment in 1948 of war damage insurance profits to miscellaneous receipts. The proposed anti-inflation program accounts for the major increases.

The Office of Temporary Controls was abolished June 1, 1947. All remaining wartime controls administered by this Office have been transferred to other departments or agencies. Estimates for these programs for the 1948 and 1949 fiscal years are included principally in the budgets of the Housing Expediter and the Department of Commerce.

With the housing shortage still acute, the extension of rent control beyond the present expiration date of February 29, 1948, is essential. The estimates assume that these controls, administered by the Housing Expediter, will be strengthened and will remain effective throughout the rest of the current fiscal year and for the fiscal year 1949.

In addition to expenditures of 33 million dollars for rent and export controls, an estimated 80 million dollars will be required to administer and enforce the rest of the anti-inflation program. Price and rationing controls, together with allocation and inventory controls, account for almost all of this total, with minor amounts for wage control and the regulation of speculative trading on the commodity exchanges.

I am requesting further increases for the Antitrust Division of the Department of Justice and the Federal Trade Commission to strengthen enforcement of the antitrust laws, and resist the growing concentration of economic power in many important industries. The increased funds requested for the Federal Trade Commission will also permit inauguration of a new research program designed to develop more effective techniques for identifying and combating monopolistic practices.

I repeat my earlier recommendation for passage of legislation authorizing the Department of Commerce to conduct a new census of business and other surveys. Legislation embodying this recommendation has been approved by the Senate and now awaits consideration in the House. Up-to-date information in this area is essential to assure intelligent action by both business and Government.

New authorizations of Reconstruction Finance Corporation business loans and participations in private bank loans, while somewhat higher than in the fiscal year 1947, are being held down to levels consistent with the anti-inflation program. It would be inappropriate for the Government to restrain inflationary increases in private credit while permitting a substantial expansion in its own credit aids. The Board of Directors of the Corporation has instructed its loan agencies to scrutinize all applications in order to avoid direct loans or guarantees of private loans which create inflationary pressures.

The Corporation is also continuing to press for the early retirement of preferred stock and capital notes in banks and trust companies. Repayment of defense loans made to business is progressing. Prompt repayment of these loans and investments is not only sound business practice, but is also anti-inflationary.

Accumulated profits of the War Damage Corporation totaling 210 million dollars have already been paid to the Treasury. All remaining obligations, including those owed to participating insurance companies, will be liquidated and the Corporation dissolved before June 30, 1948.

The Budget provides for a small increase in personnel for the Securities and Exchange Commission to improve handling of its continuing heavy work load.

Appropriations: Appropriations of 171 million dollars for the fiscal year 1949 are recommended for these programs. This total includes 133 million dollars in supplemental appropriations—5 million dollars for export and import controls under legislation recently enacted, 115 million dollars for rent control and other proposed anti-inflation activities, and 13 million dollars for new censuses of business and mineral industries. Expenditures for loans and investments by the Reconstruction Finance Corporation do not require appropriations.

During the current fiscal year, supplemental appropriations of 29 million dollars are recommended to continue some of the anti-inflation controls and to initiate others.

Labor

The training and placement of workers, the promotion of sound labor relations, and the maintenance of safe and healthful working conditions are of special importance in this period when uninterrupted full production is so vital to the United States.

The reduced appropriations to the Department of Labor in the fiscal year 1948 have impaired its capacity to perform some of its statutory functions. I am recommending increases in the Department's total appropriation for the fiscal year 1949 sufficient to enable it to carry out efficiently its statistical and labor information services to the general public and to the labor mediation and regulatory agencies, and also to carry out adequately its functions in connection with the administration of the State employment offices.

As I have previously indicated to the Congress, there is a need for legislation to establish a Federal program for the elimination of discriminatory employment practices based on race, religion, color, or national ancestry. A year ago I recommended to the Congress that funds be authorized for grants to States for a program fostering safe working conditions. This Budget includes estimates for this proposed legislation.

Expenditures: Expenditures of the National Labor Relations Board will rise considerably from the fiscal year 1948 to 1949, because of the expanded responsibilities placed upon this agency by the Labor Management Relations Act of 1947.

Labor

[Fiscal years. In millions]

Program or agency	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
Mediation and regulation:				
Department of Labor:				
Present programs	$12	$6	$6	$6
Industrial safety program (proposed legislation)	-------	-------	6	6
National Labor Relations Board	5	6	9	9
Federal Mediation and Conciliation Service	-------	2	3	3
National Commission Against Discrimination in Employment (proposed legislation)	-------	-------	1	1
Other	3	4	5	5
Training and placement:				
Public employment offices	87	69	77	77
Other	2	2	2	2
Labor information, statistics, and general administration	11	9	8	8
Total	120	97	117	117

Expenditures by the State public employment offices, which are fully financed by Federal funds through the fiscal year 1949, will rise by about 10 percent, or 7 million dollars. More than 2 million dollars of the increase is required to finance on a full-year basis the operation of the farm placement program. In addition, State salaries, rentals, and other costs have increased materially.

The apparent decrease for 1949 in the estimated expenditures for "labor information, statistics, and general administration" results from reclassification to specific programs of certain expenditures which for 1948 are shown under general administration.

Appropriations: The 117-million-dollar appropriation recommended for fiscal year 1949 includes 6.2 million dollars for proposed legislation, of which 5.6 million dollars is for the safety program.

Because of the expanding activities of the National Labor Relations Board and the difficulty of forecasting the size of its case load, I am recommending that the Congress appropriate 9.4 million dollars at the present time, with the entire amount made available for obligation if needed prior to April 1, 1949.

When the Federal Mediation and Conciliation Service came into existence in August 1947 it was granted a part-year appropriation, which will be exhausted during February 1948. The appropriations recommended in this Budget include a supplemental appropriation of 1 million dollars for the remainder of the 1948 fiscal year.

General government

"General government" comprises most of the expenditures of the legislative and the judicial branches of the Federal Government, as well as some expenditures of the executive branch. The costs of financial management, the Government payment toward the civilian employees' retirement system, and nonrecurring expenditures for certain war liquidation programs make up the greater portion of the total.

The major legislative recommendation in this category relates to surplus property disposal. By the end of the present fiscal year the disposition of war surpluses will have been nearly completed. The inventories of surplus personal property will then have been so reduced that costs connected with the disposal of this property under the provisions of existing legislation will approach and may even exceed proceeds from their sale. There will remain, however, certain surplus real properties which will present problems in lease and property management and require a continuing disposal program.

The time is now at hand to liquidate the temporary disposal agencies, further consolidate and improve the central supply services of the Government, and establish a permanent, modern, and economical system of property management. A program for the accomplishment of these objectives will be submitted to the Congress at an early date.

Expenditures: In view of the administrative changes to be recommended, no estimates are included in the 1949 Budget for the continued operation of the present surplus property disposal agencies. Instead, 94 million dollars is included under proposed legislation as an estimate of the expenditures that will be required for surplus disposal activities in the fiscal year 1949 under the new system of property management and disposal. Of this amount, 81 million dollars is for domestic and 13 million dollars for foreign disposal programs. In addition, 56 million dollars will be spent to liquidate obligations incurred during the current year by the present disposal agencies.

The Bureau of Internal Revenue still has a large volume of work, not only in handling current collections, but also in reviewing wartime tax returns before statutory limitations intervene. Expenditures for tax collection are presently estimated at the same level as in the current fiscal year. I am confident that this level of expenditures is not sufficient to assure complete and equitable application of the tax laws, but the matter is now under investigation by congressional committees as well as by staff of the executive branch. I hope that these studies will result in recommendations for improving tax administration.

General government

[Fiscal years. In millions]

Program or agency	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
Legislative functions	$28	$34	$33	$33
Judicial functions	16	19	19	19
Executive direction and management	7	7	7	7
Federal financial management:				
Bureau of Internal Revenue	200	199	187	188
Other Treasury bureaus	171	136	130	132
General Accounting Office	39	37	33	33
Other	5	4	4	1
Government payment toward civilian employees' general retirement system	220	244	259	259
Other general government:				
Surplus property disposal, foreign and domestic:				
Present disposal programs (mainly War Assets Administration)	440	357	56	-------
Proposed legislation	-------	-------	94	105
Deposits and transfers of receipts, foreign sales (Army, clearing account)	−19	75	30	-------
Federal Works Agency (mainly Public Buildings Administration)	67	78	75	65
Reconstruction Finance Corporation:				
Payment of interest to miscellaneous receipts	91	97	2	-------
Other	−76	−17	−12	-------
Cemeteries and return of war dead (Army, civil functions):				
Present programs	12	80	77	46
Proposed legislation	-------	-------	2	2
Other:				
Present programs	118	133	164	174
Proposed legislation	-------	-------	1	1
Total	1,318	1,473	1,157	1,065

Estimated expenditures of the other Treasury bureaus engaged in financial management are reduced slightly for the fiscal year 1949. The organization and operating procedures of the Customs Bureau are the subject of a special survey which will soon be completed. The findings should be helpful to both the Bureau and the Congress.

The cancellation of notes of the Reconstruction Finance Corporation, which I recommend elsewhere in this Message, will almost eliminate payments of interest by the Corporation to miscellaneous receipts.

The estimate for the Government contribution to the Federal employees' retirement system for the fiscal year 1949 is based on an increase in the number of Federal civilian employees who have served in the Government for 5 years and have thereby become potential applicants for benefits.

Expenditures estimated for other general government activities in the fiscal year 1949 include an increase of over 6 million dollars in expenditures of the

Civil Service Commission to verify the loyalty of persons entering the Federal service. Also included is 10 million dollars to augment the working capital in the general supply fund of the Bureau of Federal Supply.

Appropriations: Anticipated supplemental appropriations based on proposed legislation amount to 108 million dollars of the appropriation total for general government for the fiscal year 1949. The total of estimated expenditures for the year is considerably above the appropriation total, principally because it includes expenditures to liquidate obligations against appropriations of prior years for the disposal of surplus property and for bringing home our war dead.

Interest on the public debt

Interest on the public debt represents a fixed obligation of the Federal Government, subject to change only as securities are retired or refunded and interest rates changed. Assuming continued high employment and present tax rates, debt retirement will be substantial during the fiscal years 1948 and 1949. However, other factors will cause some increase in interest payments.

Interest on the public debt

[Fiscal years. In millions]

	Actual, 1947	Estimate, 1948	Estimate, 1949	
Treasury Department...	$4,958	$5,200	$5,250	$5,250

Expenditures: The increase in interest costs in 1948 and 1949 is the net result of divergent trends in payments on the various types of debt. Interest on nonmarketable obligations, principally savings bonds, and special issues to Government trust funds is rising. Interest on marketable debt is declining.

Increasing numbers of savings bonds purchased during the war are now reaching higher accrual brackets. At the same time net accumulations of Government trust funds will cause further increases in the amount of special issues outstanding. The relatively high rates on these issues are for the most part fixed by statute. Interest payments on nonmarketable debt during 1948 also reflect nonrecurring interest payments on the large volume of armed forces leave bonds redeemed during the year.

The decline in interest payments on the marketable debt arises from two factors. In addition to the substantial debt-reduction program, maturing bonds with high coupon rates of interest are being paid off where possible, or are being refunded into issues with lower rates. On the other hand, short-term interest rates have increased. About 40 percent of short-term Treasury bills, certificates, and notes are held by the Federal Reserve banks. A considerable part of the interest costs on these securities will come back to the Government, since in effect about 90 percent of Federal Reserve bank earnings are currently being paid into the Treasury as miscellaneous receipts.

Appropriations: Interest payments represent contractual commitments which are financed by permanent indefinite appropriations not requiring annual congressional action.

Refunds of receipts

The principal items under refunds of receipts are corporate profits tax refunds and individual income tax refunds.

Refunds of receipts

[Fiscal years. In millions]

Agency	Expenditures			Appropriations, 1949
	Actual, 1947	Estimate, 1948	Estimate, 1949	
Treasury Department...	$2,897	$2,049	$1,990	$1,990

Expenditures: Estimated refunds for the fiscal years 1948 and 1949 are more than 800 million dollars below actual refunds in 1947. This decline results principally from the estimated drop in corporate income and profit tax refunds arising out of the adjustment of wartime tax liabilities. These corporate refunds, which were 1.1 billion dollars in the fiscal year 1947, are not expected to exceed one-third of this total during each of the fiscal years 1948 and 1949. Estimated refunds to individuals—mainly due to overpayment of individual income tax under the current payment system—which totaled 1.7 billion dollars in 1947, are estimated to be slightly less in 1948 and 1949. This decrease is due to accelerated refund payments in the fiscal year 1947.

Appropriations: The specific appropriations of 1,254 million dollars for refunds in the fiscal year 1948 will be inadequate and a supplemental appropriation of 800 million dollars will be required.

GOVERNMENT CORPORATIONS

The Government Corporation Control Act requires that no wholly owned Government corporation not now possessing a Federal charter shall continue after June 30, 1948, unless reincorporated by act of Congress. Two of the State-chartered corporations, the Export-Import Bank and the Institute of Inter-American Affairs, have already been reincorporated by the Congress. I recommend early action by the Congress on pending legislation to reincorporate the Commodity Credit Corporation and the Virgin Islands Company, and on legislation which will be introduced to recharter the Panama Railroad Company.

I recommend extension of the Reconstruction Finance Corporation beyond the present expiration date of June 30, 1948. In revising the Corporation's charter last year, the Congress restricted its lending authority mainly to business and financial institutions, the area of its major prewar activities. I also recommend that the Congress authorize cancellation of an estimated 9.3 billion dollars in the notes of the Corporation held by the Treasury Department. This cancellation, representing in amount the unrecovered costs to the Corporation of its wartime and reconversion operations through June 30, 1947, will permit a clearer appraisal of its active programs. Since the cancellation is merely a bookkeeping operation, it will have no net effect on the Budget.

In accordance with the provisions of section 107 of the Government Corporation Control Act, the Bureau of the Budget will soon complete studies of all wholly owned Government corporations to determine in which cases, if any, their fiscal affairs could be handled more appropriately as regular agencies. The Bureau is also studying agencies engaged in business-type activities to determine whether they might administer their programs more effectively and provide better service to the public if they had some or all of the attributes of corporations. These and future studies are designed not only to develop specific recommendations for submission to the Congress, but also to establish guides for determining when the corporate form of organization should be used.

As a part of the program to secure a more uniform approach to the Government's business activities, I recommend legislation to place the Federal Housing Administration under the Government Corporation Control Act. Under existing law, this agency possesses many of the significant attributes of a corporation and, in nearly all major respects, is treated as such by both the executive branch and the Congress.

PROPOSED LEGISLATION—A SUMMARY

Expenditures and appropriations for proposed legislation—apart from the extensions of authority for Government corporations—are listed in the following table. Expenditures under extensions of existing legislation are included. The proposed extensions of old-age and survivors insurance and unemployment compensation would be financed through trust accounts.

Proposed legislation (summary of amounts included in Budget)

[Fiscal years. In millions]

Function and program	Expenditure estimate, 1949	Anticipated supplemental appropriations	
		1948	1949
National defense:			
Universal training program	$400	-------	$500
Drill pay for military reserve components	13	-------	16
Military and naval construction	166	$165	45
International affairs and finance:			
European recovery program	4,000	6,800	-------
Other foreign aid (including China)	440	300	450
Foreign informational and cultural program	17	6	20
Loan for United Nations headquarters construction	30	65	-------
United States participation in international organizations	4	-------	4
Philippine war veterans' benefits	16	-------	16
Philippine rehabilitation	(1)	-------	(1)
War damage claims	-------	17	-------
Social welfare, health, and security:			
National health program, administrative expenses	15	-------	15
General public welfare program, public assistance benefits	100	-------	100
Stream pollution abatement	1	-------	1

Footnotes at end of table.

Proposed legislation (summary of amounts included in Budget)—Continued

[Fiscal years. In millions]

Function and program	Expenditure estimate, 1949	Anticipated supplemental appropriations 1948	Anticipated supplemental appropriations 1949
Housing and community facilities:			
Long-range housing program	$40	-------	$37
Advances for public works planning	10	-------	20
Education and general research:			
Aid for elementary and secondary education	290	-------	300
National Science Foundation	5	-------	15
Radio propagation building National Bureau of Standards	1	-------	1
Agriculture and agricultural resources: Revision of price support program	−50	-------	-------
Transportation and communication:			
Increase in postage rates to eliminate postal deficit [2]	-------	-------	-------
Alaska communications system	(1)	-------	1
Construction of Federal Communications Commission facilities	(1)	-------	(1)
Addition to Post Office equipment shops	1	-------	1
Coast Guard—additional ocean weather stations	12	-------	13
Census of transportation	1	-------	1
Extension of Maritime Commission's authority to operate and charter vessels [3]	-------	-------	-------
Alaskan airport construction	2	-------	2
Research facilities—National Advisory Committee for Aeronautics	2	-------	10
Finance, commerce, and industry:			
Census of business	9	-------	12
Census of mineral industries	(1)	-------	(1)
New anti-inflation program	80	$24	85
Extension of rent control	28	4	30
Labor:			
National Commission Against Discrimination in Employment	1	-------	1
Industrial safety program	6	-------	6
General government:			
Surplus property disposal	94	-------	105
Army cemeterial expense	2	-------	2
Weather Bureau—observers for additional ocean weather stations	1	-------	1
Total	5,735	7,381	1,811

[1] Less than one-half million dollars.
[2] Not included in Budget totals.
[3] Included with estimates for Maritime Commission programs under present laws.

This Budget is the measure of our responsibilities at home and abroad. Although these responsibilities are heavy, the economic strength of this country and the resolution of our citizens are great enough to permit us to discharge them.

HARRY S. TRUMAN.

JANUARY 6, 1948.

THE PRESIDENT'S BUDGET

Mr. TABER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TABER. Mr. Speaker, the President's budget calls for $43,182,000,000 in appropriations as against $36,100,000,000 last year, an increase of $7,082,000,000. We were able last year to cut $2,967,000,000. It is my expectation and my hope that we can do better this year. Every single departmental item has been padded with less to do. The solvency of the United States and the employment of our people at regular jobs depends upon our reducing the inflationary effect of the President's budget to the limit.

EXTENSION OF REMARKS

Mr. SMITH of Wisconsin (at the request of Mr. SCHWABE of Oklahoma) was given permission to extend his remarks in the Appendix of the RECORD and include extraneous matter.

Mr. SCHWABE of Oklahoma asked and was given permission to extend his remarks in the Appendix of the RECORD in four instances and include extraneous matter.

Mr. NORBLAD asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

Mr. LODGE asked and was given permission to extend his remarks in the RECORD in two instances and in each to include an article.

Mr. HAVENNER asked and was given permission to extend his remarks in the Appendix of the RECORD.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Illinois [Mr. MASON] is recognized for 30 minutes.

"COMING EVENTS CAST THEIR SHADOWS BEFORE" OR "OBSERVATIONS ON THE MARSHALL PLAN"

Mr. MASON. Mr. Speaker, we have all heard such sayings as, "Coming events cast their shadows before," and "History repeats itself." These sayings simply mean that if we want to know what the future holds for us we had better study the past. In my remarks today I propose to review the immediate past in the hope some light may be cast upon the immediate future.

Mr. Speaker, one of the greatest idealists this country ever produced was Woodrow Wilson. As President he persuaded this Nation to join in a crusade to "make the world safe for democracy." That crusade took the form of a "war to end all wars." After expending blood, sweat, tears, and lives, in addition to some $35,000,000,000, we "made the world safe for democracy" by winning the war to end all wars—at least that is what we thought. Then we washed our hands of it all, shrugged off all further responsibility, and turned our attention back to our own affairs, full of satisfaction in a job well done.

What happened? Four of the leading nations of the world—Russia, Germany, Italy, and Japan—immediately proceeded to set up dictator governments, the direct antithesis of democracies. By doing so they proved that the world had not been made safe for democracy, and they also set the stage for World War II. Russia, Germany, and Italy set up one-man dictatorships, but in Japan a military dictatorship was set up, using Emperor Hirohito as a puppet to carry out the program of the military clique.

Germany, Italy, and Japan based their expansionist ambitions on the claim that they were "have-not nations" and it was a matter of life and death with them to expand in order to obtain necessary raw materials. So, Japan proceeded to capture and overrun Manchuria, taking it by force from a weakened China, weakened by internal dissensions. Italy expanded in Africa, taking over Ethiopia. Germany pushed her boundary line outward in all directions—north, south, east, and west. Russia, although a "have nation," emboldened by the success that crowned the efforts of her three dictator partners, decided that she might as well get while the getting was good, so she proceeded to attack little Finland, and then Stalin teamed up with Hitler in the dismemberment of Poland.

Mr. Speaker, what were the so-called liberty-loving nations doing in the meantime? What were those nations doing that thought they had made the world safe for democracy? Well, our Mr. Stimson did register a protest in connection with Japan's unwarranted attack upon China, and he did urge Great Britain to join us in that protest. But Great Britain turned her back upon us and Secretary Stimson's protest was of no avail. From then on our foreign policy became a policy of appeasement, appeasement, and appeasement, in the hope that the dictator nations might be satisfied and a war might be averted. This appeasement program was carried on with Japan, with Italy, with Germany, and with Russia, until Chamberlain and his umbrella became synonomous with the weakness and indecision of all democracies. The result, of course, was inevitable. It was World War II.

Mr. Speaker, during all the time this was going on Franklin Delano Roosevelt, another American idealist, was in the White House. He took office at about the same time that Hitler grabbed power in Germany. F. D. R.'s first move was to appease Stalin by recognizing the Soviet dictatorship as a Soviet Republic entitled to representation among the family of nations. F. D. R. collaborated with Chamberlain in the appeasement program; but after war broke out he teamed up with Churchill. We were then led into World War II under the slogan, "Nazism is a threat to the world. We must help destroy it." Nothing was said about destroying communism.

Mr. Speaker, under the leadership of F. D. R. we again expended blood, sweat, tears, and lives, plus some $300,000,000,000, and again we won a war. By doing so we destroyed nazism in Germany, facism in Italy, and militarism in Japan. We rid the world of these three threats to democracy, but while doing so we built up Stalin and communism. We gave Stalin $11,000,000,000 worth of precious war material, scarce war material, war material we needed badly ourselves, especially in our war activities in Asia. We did this when Stalin had his back to the wall, when Moscow was threatened, when Stalingrad was in rubble, and we saved Stalin and communism for the world. Today communism is as great a menace to the peace and happiness of the world as nazism ever was.

Mr. Speaker, in our efforts to appease Stalin at Tehran, at Cairo, at Quebec, and again at Potsdam, President Roosevelt, and later on President Truman, made mistake after mistake, all of which have now become history. As a result of these mistakes we have thrown away in the two short years since hostilities

ceased almost every advantage we won in the war, and we have already handed out something over $20,000,000,000 to try to correct those mistakes. Now we are told that in the cold war in which we find ourselves, largely as a result of the mistakes our leaders made, we must adopt the Marshall plan and give away at least $25,000,000,000 more.

Henry Hazlitt, an international authority in the fields of politics, economics, and finance, writing for the Foundation for Economic Education, under the title "Will Dollars Save the World?" has the following to say concerning this proposal:

> The most important point in any foreign-aid program is to know where to begin. Marshall plan or no Marshall plan, Europe will not recover as long as European governments retain the economic policies they have been following since the end of the war.
>
> As long as socialization, general price-fixing, exchange control, etc., are retained any amount of dollars we pour in will be more than offset and neutralized by stifled production and chronic crises. Our experience with Great Britain will only be repeated on a much vaster scale. Europe will be in a much worse situation after our help is poured in than it was before it began. * * * What is most important to the revival of Europe is not American loans, but a complete change in the internal economic policies of Europe. Unless the political conditions of revival exist in Europe itself, Europe will not revive. There is only one way to restore production, and that is to restore the freedom to produce and the incentives to produce.

I am in full accord with Mr. Hazlitt's brilliant analysis of the European situation, and with his suggested remedy. I recommend it to my colleagues as must reading.

Mr. Speaker, I believe that all we are accomplishing by our generous gifts to European countries is to cushion for them the impact of socialism and communism. We are, I believe, weakening their moral fiber and encouraging acquiescence in "things as they are" instead of stimulating resistance to the spread of communism. I believe that unprejudiced records will show that France, for example, has been flirting with communism and radicalism for a long time—she is obviously decaying at the top. Germany is, as one of my refugee friends put it, "now little more than a stinking corpse," which can probably never be resurrected into anything but a second- or third-rate nation. The middle European countries have already been almost completely absorbed by Russia, and they, as well as others, will naturally tend to affiliate themselves with the strongest power which lies closest to them—that is, Russia.

I believe also, Mr. Speaker, that Americans have been sold one more false and misleading program: That if we do not throw substantial and continuing aid into the various European countries they will all go communistic, but that they can be saved from this fate by the extension of such aid. This line of chatter seems to me almost an insult to real intelligence, in view of the well-known long-time trends to the left in most of these countries.

In this connection I call to your attention the case of our mother country—England. Although for the second time in a generation we helped her win a world war, which initially was of no major concern to us; although we extended her between $25,000,000,000 and $30,000,000,000 of lend-lease goods, services, and munitions; although we have forgiven her all the debts of the previous war, and have made her an additional loan of $4,000,000,000, yet the good people of England saw fit to kick out the Churchill government and to vote in by an overwhelming majority the most radical government in her history—sworn to nationalize all the leading industries of Great Britain.

Furthermore, I also call your attention to the fact that many of the leaders of the Church of England, even before the Second World War began, had affiliated themselves closely with communism, and passed resolutions, made statements, and wrote books in favor of Moscow. In fact, the best-selling book ever written defending the Soviet philosophy of government and economics was written by the Dean of Canterbury, the titular head of the Church of England.

In view of all these things, why should any sane man believe that a few more millions or billions of dollars scattered around the fringes of Europe will save those countries from communism?

The conclusion of the matter, as I see it, Mr. Speaker, is that, if we continue to relieve Europe at anything like the present rate, we shall within a short time have a return of allocation and rationing in the United States, and probably many new drastic controls over industry and prices. Such moves are already being carefully considered and examined by various high officials in Washington and, as you know, were recommended by the President last Tuesday.

Our present strangely illogical and financially unsound policy can, in my judgment, lead to only one end—an undermining of the social and economic structure of the United States and a progressive strengthening of the Russian system. Russia has already taken over and expects to hold virtually all of the surplus producing territory of central Europe, including the agricultural territory of Germany. She can afford to be stubborn and to wait, knowing that her population is increasing very rapidly and that she can make full preparations for war behind the iron curtain; while we western peoples have no unanimity of policy or action and are floundering about in a bottomless sea of impractical idealism, which we still futilely believe can be imposed on an ancient world which has never understood any policy but the rule of force, or the Machiavellian duplicity of diplomats.

Mr. Speaker, if history does repeat itself, if coming events do cast their shadows before, then in the light of the events of the immediate past, as I have presented them to you, what can we expect to happen in the immediate future if we adopt the Marshall plan? Will the present cold war turn into a shooting war? Will the spread of communism in the world be checked? Or will we so weaken ourselves in our efforts to help others that we in turn will fall an easy victim to the Communist octopus? These are pertinent questions for the Congress to face, and for which we must find correct answers. Our future welfare, yes, our future existence, is at stake. I pray to God that we make the right decision.

Mr. BUSBEY. Mr. Speaker, will the gentleman yield?

Mr. MASON. I yield to the gentleman from Illinois.

Mr. BUSBEY. Mr. Speaker, I wish to commend my colleague from from Illinois [Mr. MASON] for one of the finest speeches I have ever listened to on the floor of the House. It is only too bad that every American could not have heard it.

Mr. MASON. I thank the gentleman. I have about 10 minutes left for questions if any one has questions on this matter. It is questions I want.

Mr. BUSBEY. I would like to ask the gentleman a question. We have before this Congress two momentous problems, tax reductions and the Marshall plan. Does the gentleman think that we can have both a tax reduction and the Marshall plan?

Mr. MASON. We cannot have both. We all know that. The question we must decide is which one, in the light of these past events, is the one that will strengthen and keep America strong, and not waste our substance in trying to do an impossible thing in Europe, which the people there do not want to have done judging by their past actions.

Mr. O'KONSKI. Mr. Speaker, will the gentleman yield?

Mr. MASON. I yield to the gentleman from Wisconsin.

Mr. O'KONSKI. I wonder if the gentleman from Illinois knows that one of the United States delegates to the United Nations organization, Mrs. Roosevelt, within the last 36 hours advocated that we make one more overture to Russia and send another economic mission to Russia to help strengthen her? That recommendation was made just a few hours ago by one of the United States delegates to the United Nations organization. What does the gentleman think of that?

Mr. MASON. I did not know that that had been done, but personally I feel that it is just another step in our program of appeasement which has gotten us into the position we are in today.

Mr. VURSELL. Mr. Speaker, will the gentleman yield?

Mr. MASON. I yield to the gentleman from Illinois.

Mr. VURSELL. In approaching aid to Europe through the Marshall plan we are constantly told that it will stop the march of communism in western Europe. From my observation and information I got from Europe, if we were to build up western Europe through this aid we still would have little hopes of stopping the expansion of communism to the west; we would have to rely largely on whether or not those directing the affairs of government in Russia wanted to come on west, because we would be left with western Europe clicking at the expense

of the United States, if it did click, without any armies or without any military force to prevent any further expansion to the west. Then I ask the question: Can you stop communism going west in Europe unless you have the power to stop the Russian Army?

Mr. MASON. Your question, really, summed up, means this: If we can—and I doubt if we can—but if we can strengthen western Europe and get it clicking, as the gentleman says, what is to stop communism or Stalin or the forces of the Soviet Republic from coming over and taking advantage of that added strength that we have given to them by weakening ourselves? Is that the sum and substance of your question? There is nothing that I can see, only our strength, which would prevent them from doing it, and we had better preserve that strength and get ready for the time we will need it, because communism today, in my opinion, is a much greater menace to the world and the peace and happiness of the world than nazism was even at its height.

Mr. LEWIS. Mr. Speaker, will the gentleman yield?

Mr. MASON. I yield to the gentleman from Ohio.

Mr. LEWIS. What does the gentleman have to say about communism in China?

Mr. MASON. Well, we all know that Communist influence has been permeating China for a good many years and has now taken over practically the whole of Manchuria, the best part of China, and from what we can see now Russia has practically got as much of a strangle hold upon China as it has upon eastern Europe. Personally I am more concerned with the situation in Asia, so far as the threat to the future peace and happiness of the United States, than I am with the situation in Europe.

Mr. PHILLIPS of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. MASON. I yield to the gentleman from Tennessee.

Mr. PHILLIPS of Tennessee. Before this Congress votes billions of dollars to aid these foreign countries, should they not be required to use up their investment of billions of dollars which they have in these United States today?

Mr. MASON. Yes, I would say that I would treat them as I have treated both of my sons, make them do everything possible they can to solve their own problems, and then maybe be ready to help them a little to carry on, but not before.

Mr. OWENS. Mr. Speaker, will the gentleman yield?

Mr. MASON. I yield to the gentleman from Illinois.

Mr. OWENS. Does the gentleman believe the nations of the world outside of our own country could believe that those who dropped the atomic bombs on two cities of Japan could be taken, with respect to Europe, as having true charity in their hearts?

Mr. MASON. Of course I could not say that because I cannot put myself in their place. I would have my doubts, though, that they could take us, and they are not taking us at face value.

Mr. RICH. Mr. Speaker, will the gentleman yield?

Mr. MASON. I yield to the gentleman from Pennsylvania.

Mr. RICH. How can we honestly and conscientiously try to drive communism out of foreign countries when we have a whole lot of it in our own country?

Mr. MASON. I would answer that by saying that charity begins at home, and so does housecleaning begin at home. That is where I, as one member of the Dies committee, tried to start it some 8 years ago, and we are just beginning to get around to the job now.

Mr. RICH. If it had not been for the members of the Dies committee and the Committee on Un-American Activities getting this thing started, we would be taken over by communism, because there was no one I could find in the administration that was trying to clean it out of this country. I take off my hat to the Dies committee and the Committee on Un-American Activities.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. MASON. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Insofar as the last observation of my friend from Pennsylvania is concerned, the gentleman overlooks the fact that over 10 years ago a bill passed this Congress compelling foreign agents engaging in propaganda to register. That is the McCormack Act. I say it with pride, being the author of that act. A bill was also introduced to make it a crime for any individual knowingly or wilfully to advocate the overthrow of the Government by force and violence. I also introduced a bill giving the Army and the Navy power to control subversive activities in camps and on ships. It took me 3 years to get that out of committee. I could not get two of the bills out of committee, and I had to wait until there was a bill before the House to which I could offer them as amendments. I was chairman of the first committee. We recommended legislation after a 6 months' investigation, and we got it through after 3 years.

Mr. MASON. That is history, that is a matter of record. I think the McCormack committee did do excellent work in getting a job started that needed to be started.

I also say this in response to the gentleman from Pennsylvania, the Dies committee did two things at least. One was to arouse the Nation to the Red menace. They perhaps did that with some spectacular work. The second thing they did the Nation does not even know about yet as a Nation. That was to compile, while they could get at the records, a card-index system naming these un-American activities groups and the members of them. This system contains over 1,000,000 card-index records. The very next day after Pearl Harbor happened, and every day, Sundays included, for the next year or more, there were special agents of the FBI, of military intelligence, of naval intelligence, and of the Secret Service combing those files for the information that was needed to go out and pick up these suspects and put them where they belonged. That was a job well worth doing. It was worth more than all the money that was appropriated for the Dies committee during the 6 years I was on it.

AMENDING VETERANS' PREFERENCE ACT

Mr. REES. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill, H. R. 1426, an act to extend veterans' preference benefits to widowed mothers of certain ex-servicemen, with Senate amendments thereto and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert "That section 2 of the Veterans' Preference Act of 1944 is amended by striking out the period at the end thereof and inserting a semicolon and the following: '(5) widowed mothers (if they have not remarried and were widows at the time of the death or disability of their ex-serviceman son or ex-servicewoman daughter)—

"'(A) of deceased ex-servicemen or ex-servicewomen who lost their lives while on active duty in any branch of the armed forces of the United States during any war, or in any campaign or expedition (for which a campaign badge has been authorized), or

"'(B) of service-connected permanently and totally disabled ex-servicemen or ex-servicewomen,'

if said ex-serviceman or ex-servicewoman was separated from such armed forces under honorable conditions; and (6) a mother of a deceased ex-serviceman or ex-servicewoman who lost his or her life while on active duty in any branch of the armed forces of the United States during any war, or in any campaign or expedition (for which a campaign badge has been authorized), or if a service-connected permanently and totally disabled ex-serviceman or ex-servicewoman, if (A) said ex-serviceman or ex-servicewoman was separated from such armed forces under honorable conditions, (B) the mother was divorced or legally separated from the father of said ex-serviceman son or ex-servicewoman daughter, and (C) said ex-serviceman son or ex-servicewoman daughter is the only child of said mother.

"SEC. 2. Section 3 of the Veterans' Preference Act of 1944 is amended by striking out 'and (3),' after the second comma in the first sentence, and inserting the following: '(3), (5), and (6).'

"SEC. 3. Section 10 of the Veterans' Preference Act of 1944 is amended by striking out 'and (3)' and inserting '(3), (5), and (6).'"

Amend the title so as to read: "A bill to extend veterans' preference benefits to widowed mothers of certain ex-servicemen and ex-servicewomen."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

THE LATE ROBERT L. NORTON

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 2 minutes and to include with my remarks an editorial and an article which recently appeared in the Boston Post.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, on Saturday last there was buried in Boston one of the most constructive figures in the molding of sound public opinion, a truly great newspaperman, Robert L. Norton, familiarly known to his many friends as Bob Norton. He was possessed of a brilliant and logical mind. For years Bob Norton's special articles appearing in the Boston Post wielded a powerful influence in the molding of sound public opinion. As a political commentator and analyst of international and national affairs, he was one of the outstanding members of his profession. Bob Norton was a constructive writer and constructive critic and by means of his pen and keen mind produced constructive results. In his chosen field, he was one of its leaders. He stood at the top of his profession. With years still ahead of him in which to carry on his outstanding work, his sudden death, particularly at this time in the world's history, will be felt keenly. His passing leaves a gap in an important field that will be hard to fill. His death is a distinct loss to our country and to the newspaper profession, as well as to the loved ones he leaves behind, Mrs. Norton and their children, his many friends, and to the thousands of readers of his frequent articles. To me, his death is a personal loss. In the death of Bob Norton, one of the mental giants of journalism has passed on. It is fitting and proper that we pause in our deliberations to pay tribute to such a man and to the contributions he has made during his span of life. To his widow and children I extend the deep sympathy of Mrs. McCormack and myself in their great loss and sorrow.

[From the Boston (Mass.) Post]

HAIL AND FAREWELL

Robert L. Norton, political commentator and analyst of national and international affairs, he was to the world. But to an army, truly a vast army of firm friends, he was always "Bob." He was a great newspaperman. Presidents and potentates, statesmen and business leaders, the man in the council chamber and the man in the street, respected him as such. For the same ability, fellow craftsmen of size on the Nation's leading newspapers, admired him. On the laurels in journalism which he accumulated through a long, topline career in that exacting profession, he merited the toasts and tributes raised to him in death.

But "Bob" Norton was more than that. A gentleman of high integrity, a gracious companion who would always aid a friend, kindly and generous, back from Washington, a swing of the Nation or a trip to Europe, he would rather discuss how a fellow reporter's children were getting on in school than relate what Baruch said or how fared it in the Balkans. At home in palace or White House, he enjoyed more leaning across someone's desk in the Post city room, chatting of spring on his farm in New Hampshire or describing the big one that got away on a far West fishing trip.

To his associates, he was truly the man Kipling praised, who walked with kings, yet kept the common touch. For them, in his going, there is a deep sense of loss, alleviated only by the thought that his was the good life. In that life was first his family and then his friends. The Post was the breath of being. His stellar "pieces for the paper," keen, capable, and outstanding, fashioned from vast experience in affairs of the Nation and the world, had warmth and vigor, penetration and astuteness, an ironclad regard for truth, fierce fire for the malefactor, unstinted applause for the good deed, and an abiding faith in his country. The devoted father, the talented newspaperman, the true American and fine human being—there was only one Bob Norton.

Mr. McCORMACK. Mr. Speaker, I include a tribute to the late Robert L. Norton of the Boston Post, written by Joe Harrington, an associate for years of the late Bob Norton:

[From the Boston Post of January 3, 1948]

AN ASSOCIATE'S TRIBUTE

(By Joe Harrington)

For a dozen years we shared an office in the Post with Bob Norton and a sturdy bridge of affectionate friendship grew between the two desks. The cluttered room didn't change when the news of his death came over the phone, but it will never be the same.

Though writing words on copy paper is the way we make our living, they turn out to be a feeble medium for expressing our appreciation of Bob. We cannot capture in a few paragraphs the essence of hundreds of conversations, jam sessions, arguments, and the views we swapped on everything from the price of a pair of shoes to what was happening to the world at the moment.

In an attempt to appraise an old friend objectively, we'd say that graciousness was his outstanding characteristic. His first words on entering the room on his return from a trip to Washington, a political conference or a swing around the doubtful States in an election were: Hello, you old Boll Weevil. * * * How are things with you? * * * Then: How's the family * * What are the kids doing?

We are sure everyone who knew Bob Norton will have the same report to make about this side of his character.

STOOD ALONE

He carried out his thoughtfulness in little things, too. He'd come back from a luncheon at the Parker House, where his opinions were frankly sought by bankers and industrialists, and patiently listen to a garrulous ward heeler, who wanted to tell him what was wrong with the country. He'd hear the fellow out, then pat him on the shoulder and thank him for his information.

Professionally, he stood alone. Commentators blossomed in droves during the war years, on the radio and in newspapers, and most of them remained with us. But none of them could approach Bob Norton's incisiveness in dealing with an involved situation where the arguments pro and con were flavored with the political considerations of the people involved. He had an amazing faculty for cutting through the hokum that beclouded an issue and serving up the meat to the readers of this newspaper, stripped of the confusing garnishes and sauces.

Always articulate, he talked like he wrote. His conversation, as well as the "pieces for the paper" as he called them, were frequently highlighted by parallel background incidents—something that happened in a previous administration or a remark that had been made to him by a President, for Bob was a top newspaperman.

DECIDED GREATNESS

There was a decided greatness about the man. Nothing irked him more than instances of human meanness or petty graft. Time and again when he was scanning the days' news, he come across an item from here in the city or from some distant capital that caused him to explode with wrathful indignation. With the prelude: "Listen to this * * *" he'd let himself go with a searing identification of the perpetrators involved. It wasn't the act so much as the small spirit behind it that always got him.

Not only will Bob be grievously missed in the room, in the building and wherever good newspapermen gather, but assorted down-and-outers in these environs will note his absence on the streets. Through his years in writing politics from the City Hall reporters' room to the international press galleries, he had a long list of fellows who had seen better days. For them he was a soft touch.

If you questioned the wisdom of his generosity he'd remind you that at one time the recipient was a nice fellow and quote the words of Joaquin Miller:

"For all that you hold in your cold, dead hand, is what you have given away."

SPECIAL ORDERS GRANTED

Mr. POAGE. Mr. Speaker, I ask unanimous consent that on Wednesday next, after the disposition of business on the Speaker's table and any other special orders, I may address the House for 30 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. KLEIN. Mr. Speaker, I ask unanimous consent that my colleague the gentleman from New York [Mr. CELLER] may address the House for 15 minutes on Wednesday next after any other special orders heretofore granted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York [Mr. KLEIN]?

There was no objection.

EXTENSION OF REMARKS

Mr. KLEIN asked and was granted permission to extend his remarks in the Appendix of the RECORD and include certain newspaper articles.

Mr. KERSTEN of Wisconsin asked and was granted permission to extend his remarks in the RECORD and include two newspaper articles.

Mr. MacKINNON asked and was granted permission to extend his remarks in the RECORD in two instances and include two articles.

Mr. RAMEY (at the request of Mr. MICHENER) was granted permission to extend his remarks in the RECORD in two instances and in each instance to include a petition.

Mr. DURHAM asked and was granted permission to extend his remarks in the RECORD and include an editorial.

Mr. KEFAUVER asked and was granted permission to extend his remarks in the RECORD and include an editorial; also to extend his remarks in the RECORD and include a short article from the Virginia Quarterly Review, although the estimated cost of the printer was $430; and also to extend his remarks in the RECORD and include an address which he made on needed anti-trust program.

AMENDING THE FEDERAL HOUSING ACT

Mr. KLEIN. Mr. Speaker, I ask unanimous consent to address the House for

1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KLEIN. Mr. Speaker, I have today introduced an amendment to the United States Housing Act of 1937. We all know that under the terms of the act, public housing which was intended to be available to people of the lower-income groups throughout the country, there is a definite maximum income that those people may have before they are eligible to come under the terms of this housing act and occupy low-rent living quarters. The unfortunate effect of that is that many disabled veterans who are receiving disability payments from the Government cannot get into these houses because the disability payment is included in their income, which takes them outside of the benefits of the act. That takes out the very people who need help most. Many of those veterans have been badly wounded. They cannot get apartments in these public housing projects. I think that is a crying shame and I am sure the Members will agree with me. My amendment would simply exclude from the income limitations of the act the amounts these people are receiving as disability payments from the Government as a result of the war. In other words, the amendment would read:

Excluding any amounts received from the United States Government for disability and disabilities incurred in connection with military service.

I think everybody here must agree with me on that, and I hope you will support this amendment when the matter comes up on the floor.

The SPEAKER pro tempore. The time of the gentleman from New York [Mr. KLEIN] has expired.

THE PRESIDENT'S BUDGET

Mr. RICH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RICH. Mr. Speaker, I was terribly disappointed, listening to the President's budget address this afternoon; to find that the President did not say something about economy in government shocked me. I wanted him so much to do so. After the Clerk read that document this afternoon, we find that the President has asked for more money than he did last year. The Republicans last year tried to cut that down by four or five billion dollars—last year's budget. Now it is up to the Republicans to cut this $39,700,000,000 budget, and take out all of the excess waste, extravagance, incompetence, and many functions that are requested in this budget and get it down so that we can save this Government from going into bankruptcy and ruin. It is only by the efforts of the Republican Party that that will happen. You can now depend on that. His whole theme is to spend, spend, spend, and elect, elect, elect.

I pray God that we will all get busy and sharpen up our knives and try to economize in the affairs of this Government by cutting out all unnecessary expenses of government that we can do without. The time is now.

JUVENILE HEROISM

Mr. CHELF. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. CHELF. Mr. Speaker, I know that all of you in the past few days have been very much discouraged by reading in the papers the alarming increase in juvenile delinquency. In practically every paper you see that there is an upsurge in this sort of thing. Accounts of vandalism are increasing at a most unusual rate. This no doubt is the aftermath of war; nevertheless, we must do something in order to impress upon the youngster of today that a Christian life is the only safe pattern to cut for his future.

Yes, we older folks are to blame and for this reason we must all follow the teachings of the Bible and let our light so shine that they might see our good works and glorify our Father who art in heaven.

Having seen so much bad publicity about teen-agers of late, it was therefore quite refreshing and greatly encouraging for me to see on the front page of the Louisville Courier-Journal some good publicity in the form of a statement about a youngster 9 years old. That news release bears repeating here at this particular time, for this youngster 9 years old saved a little girl aged 5, down at Aiken, S. C. I read from the article:

Tommy Gibbs, 9, was credited today with starting the New Year right by snatching a tiny playmate from death under the wheels of a speeding freight train.

Tommy and 5-year-old Pattie Luntz were playing near the tracks, which Pattie started to cross. As she reached the middle, she noticed the engine rushing toward her and became so terrified she was unable to move.

Calling to her and tugging at her sleeve, Tommy began to run to safety. Discovering she was not following him, he ran back to her side, grabbed her up, and began a second successful dash to safety.

I was so very much impressed with this article that I wrote this youngster a letter commending him for his action. I said:

DEAR TOMMY: I have just finished reading in the Louisville Courier-Journal the Associated Press story about your saving from certain death your little 5-year-old playmate, Pattie Luntz. I feel sure that my reaction to your daring deed of heroism represents that of all America. You are to be congratulated and commended for your presence of mind, your swiftness, and great courage. In my opinion you represent the caliber and fiber which is the pattern of our citizens of tomorrow. I shall be very happy if my little son, Frank, Jr., will grow up to be as brave, as fine, and as considerate of his fellow playmates and his fellow men such as you have demonstrated. Wishing you all of the success, happiness, prosperity, and good fortune possible in the years to come, I am genuinely yours,

FRANK L. CHELF,
Member of Congress.

I say to you quite frankly, Mr. Speaker, that it is high time for the Congress of the United States to give encouragement and some inducement to these brave youngsters who have the character and moral fiber which makes up the citizenry of tomorrow; and who will be the backbone of America. I say to you that on the one hand we have juvenile delinquency, and on the other juvenile heroism. In order to lend encouragement to juvenile heroism, I am today introducing a bill to authorize the Attorney General of the United States to award on behalf of the Congress of the United States a medal for outstanding bravery to any youngster who at the risk of his own life attempts to save the life of a fellow man or playmate. We want more citizens like little Tommy Gibbs.

JUVENILE BRAVERY

Mr. DORN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN. Mr. Speaker, I wish to compliment the distinguished gentleman from Kentucky [Mr. CHELF] on this noble effort on his part and also that he took time out from his duties to write a young citizen of South Carolina. I concur in what he says today and will support the legislation he is introducing. I commend him for his interest in youth.

Mr. Speaker, may I say that there is no such thing as juvenile delinquency; as far as I am concerned, it is parental delinquency. This is a problem that warrants the attention of Congress and a prayerful approach by every parent in America.

EXTENSION OF REMARKS

Mr. THOMAS of Texas asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial appearing in the Houston Post of December 28, 1947, concerning Jesse H. Jones and the RFC.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mrs. ROGERS of Massachusetts, for today, to attend the funeral of a friend.

To Mr. HOBBS (at the request of Mr. MANASCO), indefinitely, on account of illness.

ADJOURNMENT

Mr. MICHENER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 28 minutes p. m.) the House adjourned until tomorrow, January 13, 1947, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1199. A letter from the Secretary of Agriculture, transmitting a report of the opera-

tion of the agricultural conservation program for the program year 1946, with a financial report for the fiscal year ended June 30, 1947; to the Committee on Agriculture.

1200. A letter from the Secretary of Agriculture, transmitting a report of all claims paid by the Department of Agriculture for the period August 2, 1946, to the end of the fiscal year, June 30, 1947; to the Committee on the Judiciary.

1201. A letter from the Assistant Secretary of Agriculture, transmitting the Annual Report of the Extension Service for the Fiscal Year Ended June 30, 1947; to the Committee on Agriculture.

1202. A letter from the Administrator, Veterans' Administration, transmitting a report of activities of the Veterans' Administration as of June 30, 1947; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOFFMAN: Committee on Expenditures in the Executive Departments. Sixth intermediate report relating to investigation of the proposed sale of Naylor Gardens; without amendment (Rept. No. 1235). Referred to the Committee of the Whole House on the State of the Union.

Mr. REES: Committee on Post Office and Civil Service. House Joint Resolution 251. Joint resolution to authorize the issuance of a special series of stamps commemorative of the one hundredth anniversary of the coming of the Swedish pioneers to the Middle West; with an amendment (Rept. No. 1236). Referred to the Committee of the Whole House on the State of the Union.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 422. Resolution for consideration of H. R. 2759, a bill to amend the Interstate Commerce Act, as amended, so as to provide limitations on the time within which actions may be brought for the recovery of undercharges and overcharges by or against common carriers by motor vehicle, common carriers by water, and freight forwarders; without amendment (Rept. No. 1237). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 423. Resolution for consideration of H. R. 4071, a bill to amend section 301 (k) and 304 (a) of the Federal Food, Drug, and Cosmetic Act, as amended; without amendment (Rept. No. 1238). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SARBACHER:

H. R. 4900. A bill to increase World War I and II disability and death compensation and pension rates; to the Committee on Veterans' Affairs.

By Mr. ANDREWS of New York:

H. R. 4901. A bill to amend the act of December 3, 1945, so as to extend the exemption of Navy or Coast Guard vessels of special construction from the requirements as to the number, position, range, or arc of visibility of lights, and for other purposes; to the Committee on Armed Services.

By Mr. AUCHINCLOSS:

H. R. 4902. A bill to provide for home rule and reorganization in the District of Columbia; to the Committee on the District of Columbia.

By Mr. BUCK:

H. R. 4903. A bill to amend section 32 of the Trading with the Enemy Act; to the Committee on Interstate and Foreign Commerce.

By Mr. CASE of South Dakota:

H. R. 4904. A bill to provide for the inspection and transportation of clothing and food to encourage voluntary contributions to persons in occupied areas; to the Committee on Armed Services.

By Mr. DAVIS of Wisconsin:

H. R. 4905. A bill to provide that the rate of interest charged veterans of World Wars I and II on loans secured by their Government life insurance shall not exceed 3 percent; to the Committee on Veterans' Affairs.

By Mr. GARMATZ:

H. R. 4906. A bill to incorporate the Mothers of America; to the Committee on the Judiciary.

By Mr. HALE:

H. R. 4907. A bill making an initial appropriation to enable the Fish and Wildlife Service to carry on certain studies of the soft-shell clam; to the Committee on Appropriations.

H. R. 4908. A bill to provide for nautical education in the Territories, to facilitate nautical education in the States and Territories, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H. R. 4909. A bill directing the Fish and Wildlife Service to undertake certain studies of the soft-shell clam in Maine, Massachusetts, and Connecticut; to the Committee on Merchant Marine and Fisheries.

By Mr. JONES of Washington:

H. R. 4910. A bill to amend the act of July 6, 1945, relating to the compensation of postal employees; to the Committee on Post Office and Civil Service.

By Mr. KEOGH:

H. R. 4911. A bill to continue temporary authority of the Maritime Commission until May 31, 1948, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. LANDIS:

H. R. 4912. A bill to establish a United States Air Force Academy; to the Committee on Armed Services.

By Mr. McDONOUGH:

H. R. 4913. A bill to repeal the retailers' excise tax on toilet preparations and on luggage, purses, and similar articles; to the Committee on Ways and Means.

By Mr. PATTERSON:

H. R. 4914. A bill to establish a presumption of service connection for functional disorders of the nervous system and psychoses for certain veterans of World War II; to the Committee on Veterans' Affairs.

By Mr. CHELF:

H. R. 4915. A bill authorizing the Attorney General of the United States to recognize and to award to outstanding, courageous young Americans a medal for heroism, known as the Young American Medal of Honor; to the Committee on the Judiciary.

By Mr. KLEIN:

H. R. 4916. A bill to amend the United States Housing Act of 1937, as amended, to exempt from family-income requirements amounts received for service-connected disability or disabilities; to the Committee on Banking and Currency.

By Mr. REES:

H. R. 4917. A bill to provide further benefits for certain employees of the United States who are veterans of World War II and lost opportunity for probational civil-service appointments by reason of their service in the armed forces of the United States, and who, due to service-connected disabilities, are unable to perform the duties of the positions for which examinations were taken; to the Committee on Post Office and Civil Service.

By Mr. BLOOM:

H. J. Res. 291. Joint resolution requesting the President to proclaim January 13, 1948, Haym Salomon Day for the observance and commemoration of the one hundred and sixty-second anniversary of the death of Haym Salomon; to the Committee on the Judiciary.

By Mr. SMATHERS:

H. J. Res. 292. Joint resolution authorizing the President to proclaim the 7-day period beginning May 31, 1948, as National Airwomen's Week; to the Committee on the Judiciary.

By Mr. HAVENNER:

H. J. Res. 293. Joint resolution requesting the President to provide suitable recognition for persons serving as members on local draft boards of the Selective Service; to the Committee on Armed Services.

By Mr. AUCHINCLOSS:

H. Res. 421. Resolution providing additional funds for the conduct of the investigation and study of reorganization and home rule for the District of Columbia; to the Committee on House Administration.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEALL:

H. R. 4918. A bill to amend the act entitled "'An act to provide for the acquisition by the United States of certain real property in the District of Columbia," approved August 7, 1946; to the Committee on Armed Services.

By Mr. DIRKSEN (by request):

H. R. 4919. A bill for the relief of Alfred Brauchle, Jr.; to the Committee on the Judiciary.

By Mr. McDONOUGH:

H. R. 4920. A bill for the relief of Stefan Seidler and Klara von Csorba Seidler; to the Committee on the Judiciary.

By Mr. MILLER of Maryland:

H. R. 4921. A bill for the relief of C. T. Maddrix; to the Committee on the Judiciary.

By Mr. O'HARA:

H. R. 4922. A bill for the relief of Tanios Elias Rahme; to the Committee on the Judiciary.

H. R. 4923. A bill for the relief of Mihran Moses Koeroghlian, also known as M. M. Koeroghlian; to the Committee on the Judiciary.

H. R. 4924. A bill for the relief of Nagibe Chalhoub; to the Committee on the Judiciary.

By Mr. REED of New York:

H. R. 4925. A bill for the relief of Frank Healy; to the Committee on the Judiciary.

H. R. 4926. A bill for the relief of Mrs. Margaret D. Surhan; to the Committee on Veterans' Affairs.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1087. By Mr. COLE of Kansas: Petition of Marvin Goebel and others, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1088. By Mr. GRAHAM: Petition of 63 members of the Christian Temperance Union, of Mars, Pa., urging the adoption of the Christian amendment, House Joint Resolution 239 and Senate Joint Resolution 150; to the Committee on the Judiciary.

1089. Also, petition of 83 members of Perry S. Gaston Post, No. 343, American Legion, of New Castle, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1090. By Mr. HOPE: Petition of Rev. Ruth S. Larmer and 12 other residents of Arkansas City, Kans., against H. R. 4278, a bill to enact the National Security Training Act; to the Committee on Armed Services.

1091. Also, petition of Mrs. Edward J. Staadt and 61 other residents of Tribune, Kans., against H. R. 4278, a bill to enact the National Security Training Act; to the Committee on Armed Services.

1092. By Mr. MARTIN of Massachusetts: Petition of Mrs. Henry R. Passey and sundry

citizens of Massachusetts, advocating enactment of universal military training; to the Committee on Armed Services.

1093. By Mr. JENKINS of Pennsylvania: Petition of K. McNally, legislative chairman of the American Legion Auxiliary, No. 592, White Haven, Pa., containing the signatures of 62 residents of White Haven, urging the enactment during the Eightieth Congress of legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1094. Also, petition of 43 residents of Wilkes-Barre, Pa., urging the enactment of legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1095. Also, petition of Black Diamond Post, No. 395, American Legion, Kingston, Pa., urging enactment of legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training, containing 56 signatures of members of that post from Forty Fort and Kingston, Pa.; to the Committee on Armed Services.

1096. Also, petition submitted by Jean A. Lehnler, 315 Church Street, Kingston, Pa., containing the signatures of 30 residents of Edwardsville, Pa., urging the enactment of legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1097. Also, petition of 36 residents of Glen Lyon, Pa., urging that a system of universal military training be established, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1098. By Mr. LECOMPTE: Petition of sundry citizens of Chariton, Iowa, urging passage of S. 265; to the Committee on Interstate and Foreign Commerce.

1099. Also, petition of sundry citizens of Humeston, Iowa, in the interest of the establishment of universal military training; to the Committee on Armed Services.

1100. Also, petition of sundry citizens of Garden Grove, Iowa, in the interest of the establishment of universal military training; to the Committee on Armed Services.

1101. Also, petition of members of the American Legion Post at Centerville, Iowa, urging adoption of a system of universal military training; to the Committee on Armed Services.

1102. Also, petition of members of Newton Post, No. 111, American Legion, Newton, Iowa, urging adoption of a system of universal military training; to the Committee on Armed Services.

1103. Also, petition of a number of citizens of southern Iowa, urging support of universal military training; to the Committee on Armed Services.

1104. Also, petition of sundry citizens of Creston, Iowa, urging enactment of legislation establishing a system of universal military training; to the Committee on Armed Services.

1105. Also, petition of 261 citizens of Ottumwa, Iowa, urging the establishment of a system of universal military training; to the Committee on Armed Services.

1106. Also, petition of sundry citizens of Grinnell, Iowa, urging support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1107. Also, petition of sundry citizens of Brooklyn, Iowa, urging the establishment of a system of universal military training; to the Committee on Armed Services.

1108. Also, petition of sundry citizens of Oskaloosa, Iowa, in the interest of S. 265; to the Committee on Interstate and Foreign Commerce.

1109. By Mr. MILLER of Maryland: Petition of 85 citizens of Snow Hill, Md., in support of S. 265, a bill to prohibit the transportation of alcoholic-beverage advertising in interstate commerce and the broadcasting of alcoholic-beverage advertising over the radio; to the Committee on Interstate and Foreign Commerce.

1110. By Mr. PATMAN: Petition of M. L. Johnson, Jr., Texarkana, Tex., and a number of other people, urging the Eightieth Congress to support and vote for legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1111. Also, petition of Mrs. Bruce Bland, Clarksville, Tex., and a number of other people, urging the Eightieth Congress to support and vote for legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1112. By Mr. SMITH of Wisconsin: Petition of residents of East Troy, Wis., and vicinity, urging legislation to establish a system of universal military training; to the Committee on Armed Services.

1113. Also, petition of residents of Kenosha, Wis., urging legislation to establish a system of universal military training; to the Committee on Armed Services.

1114. Also, petition of residents of Burlington, Wis., urging passage of legislation to strengthen the United Nations Organizations; to the Committee on Foreign Affairs.

1115. By the SPEAKER: Petition of Charles F. Darden and others, of Beaumont, Tex., petitioning consideration of their resolution with reference to an amendment to the oath of allegiance to the United States of America; to the Committee on the Judiciary.

1116. Also, petition of Joseph E. Geiger and Eugene Geiger, of Milwaukee, Wis., petitioning consideration of their resolution with reference to a Federal building program for the next 20 years; to the Committee on Public Works.

1117. Also, petition of W. A. Smith, Frostproof, Fla., and others, petitioning consideration of their resolution with reference to requesting the amendment of the oath of allegiance to the United States of America, in United States Code, 1940, title 8, section 735b; to the Committee on the Judiciary.

1118. Also, petition of Archbishop Vitaly for various members of the Russian Orthodox Greek-Catholic Church, Inc., petitioning consideration of their resolution with reference to the displaced-persons problem; to the Committee on the Judiciary.

HOUSE OF REPRESENTATIVES

TUESDAY, JANUARY 13, 1948

The House met at 12 o'clock noon.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. HALLECK) laid before the House the following communication from the Speaker:

JANUARY 13, 1948.

I hereby designate Hon. CHARLES A. HALLECK to act as Speaker pro tempore today.

JOSEPH W. MARTIN,
Speaker.

PRAYER

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, Thou who knowest our necessities, as we unburden our minds in Thy presence, help us to perceive that which we really need. Do Thou quiet all restless thought and direct us in that which is good for humanity, and thus keep America strong and courageous, that she may fulfill her assigned destiny. In every crisis of our country, vouchsafe to make us free from weakness and uncertainty, and constrain us to do the right in all ministries of Christian service. O give our land a release from the confusion of tongues, and to all doubting ones send the challenge that in the encroachment of any pagan philosophy America is in the hands of a good God. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

AMENDMENT TO ARTICLES OF WAR

Mr. ALLEN of Illinois, from the Committee on Rules, reported the following privileged resolution (H. Res. 424, Rept. No. 1239), which was referred to the House Calendar and ordered to be printed:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 2575) to amend the Articles of War to improve the administration of military justice, to provide for more effective appellate review, to insure the equalization of sentences, and for other purposes. That after general debate, which shall be confined to the bill and shall continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment, the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Miller, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 389. An act for the relief of the dependents of Carl B. Sanborn;

H. R. 645. An act for the relief of Ben. W. Colburn;

H. R. 769. An act for the relief of the estate of Ruth Horton Hunter;

H. R. 1155. An act for the relief of the estate of W. H. Rodgers, deceased;

H. R. 1175. An act for the relief of the estate of Daphne Ward Pope, deceased;

H. R. 1319. An act for the relief of Calvin J. Frederick;

H. R. 1531. An act for the relief of William P. Gillingham;

H. R. 1645. An act for the relief of Mrs. Leona McMinn Winkler;

H. R. 1933. An act for the relief of Mrs. Elizabeth F. McCombie;

H. R. 2056. An act for the relief of J. C. Bateman;

H. R. 2348. An act for the relief of Charles J. Smith;

H. R. 2891. An act for the relief of Mattie A. Horner;

H. R. 3068. An act for the relief of Alfred Thomas Freitas;

H. R. 3146. An act to amend section 3 of the Flood Control Act approved August 28, 1937, and for other purposes; and

H. R. 3754. An act for the relief of Oscar and Anna Carlblom.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H. R. 1799. An act for the relief of Eva L. Dudley, Grace M. Collins, and Guy B. Slater;

H. R. 2192. An act for the relief of the Massman Construction Co.;

H. R. 3111. An act for the relief of Louis H. Deaver; and

H. R. 4055. An act to provide increases in the rates of pension payable to veterans of Indian wars and the dependents of such veterans.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 489. An act to amend the Nationality Act of 1940, to preserve the nationality of naturalized veterans, their wives, minor children, and dependent parents;

S. 544. An act to regulate subsistence expenses of officers and employees in the executive branch of the Government while absent from their designated posts of duty on official business;

S. 865. An act to provide for the striking of medals, in lieu of coins, for commemorative purposes;

S. 922. An act for the relief of Ruth Grossman;

S. 944. An act for the relief of Oran Curry;

S. 1267. An act for the relief of Eleonore M. Hannon;

S. 1347. An act for the relief of Burks L. Fielder;

S. 1411. An act for the relief of Willie Ruth Chapman;

S. 1486. An act to provide for payment of salaries covering periods of separation from the Government service in the case of persons improperly removed from such service;

S. 1644. An act to amend the Veterans' Preference Act of 1944 so as to permit rescission of prior agency action in complying with recommendations of the Civil Service Commission pursuant to appeals taken by preference employees;

S. 1675. An act to authorize the Secretary of the Navy to proceed with the construction of certain public works, and for other purposes;

S. 1676. An act to authorize the Secretary of War to proceed with construction at military installations, and for other purposes;

S. 1698. An act to define the exterior boundary of the Uintah and Ouray Indian Reservation in the State of Utah, and for other purposes; and

S. 1716. An act for the relief of Mrs. Iola Veach.

TAX GONE TO EUROPE

Mr. VURSELL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. VURSELL. Mr. Speaker, when the President sent his spendthrift budget to the Congress yesterday asking for $39,700,000,000 to pay the expense of the Government for the coming year, he and his New Deal crowd who made up the budget asked for the biggest peacetime budget in the history of the Nation. His budget is heavily padded in every department of government.

His budget message was a masterpiece of confusion against the Congress and the American people. If he runs true to form he will spend $41,000,000,000 instead of $39,700,000,000 by reason of over a billion carried over from the last year which is not included in the figure he presented.

When he presented this budget he tried to throw the possibility of tax reduction out the window when he included $6,800,000,000 to supply the first-year funds for the Marshall plan. He, in fact, served notice on our taxpayers, "your tax cut will go to Europe."

Of course the President, even though he recommended a political tax bill has no intention of allowing the overburdened taxpayers a reduction in taxes in 1948. In fact, the bill he threw in was another piece of confusion to prevent a real tax-reduction bill being enacted by the Congress.

Mr. Speaker, last year when the Republican Congress fought to reduce the President's budget by $5,000,000,000, the President and his bureaucrats in government opposed the reduction of the cost of government on every occasion. Try as hard as we did, we were only able to reduce the cost of government by about $3,000,000,000. This year he asks for $2,000,000,000 more than he asked for last year. His budget, if he had cooperated with the Congress, could have been cut to $31,000,000,000 last year.

If the people could be brought to understand the connivance and extravagance of this administration they would drive it out of power at the November election by an overwhelming majority. This New Deal crowd is determined to continue their policy of tax and tax, and spend and spend without any regard for the 140,000,000 people whose pockets are drained needlessly year after year of billions of dollars taken from them in taxes.

Mr. Speaker, if the President would cooperate, Federal pay rolls could be reduced, which would save $4,000,000,000 a year. But he will not. He apparently wants to keep these pay rolls padded for the next November election. This administration, if it would adopt a policy of economy in operating the Government, could save many more billions of dollars during the coming year. But there is no hope for that.

Mr. Speaker, nothing will bring this Government back to sound governmental policies and the reduction of cost of government short of driving these wastrels out of power by the election of a Republican President and Congress in 1948.

I have watched their operations here for the past 5 years, as have other Members of the Congress. I am discouraged to the point which has caused me to make the above statement, "That we cannot get good sound economical government that will reduce its cost by many billion dollars a year unless this administration is driven out of power. By their actions they have proved to every Member of the Congress, regardless of whether they be a Democrat or a Republican, and by this time they should have proved to the American people that they are only interested in continuing themselves in power.

Mr. Speaker, we Republicans owe a duty to the people which we must try to fulfill. That duty is to cut this budget by $5,000,000,000 or more if possible. The American taxpayers are expecting us to do it. They are demanding economy in government that will make it possible for them to have a reduction in taxes. We must get out our paring knives and start cutting and cutting on every appropriation bill that comes before this House. I know under the able leadership of the gentleman from New York, Congressman TABER, of the Appropriations Committee, and the Republican leadership of the House that every effort will be made in that direction.

Mr. Speaker, if we can cut this budget $5,000,000,000 we can give the American taxpayers $5,000,000,000 in relief. That will mean less money taken out of the pay checks of 50,000,000 workers, less money taken from the professional and little-business man, less money taken from the white-collar workers, school teachers, and annuitants. And less money taken from bigger business which needs to turn capital back into their business organizations, thereby investing risk capital that will expand business which is absolutely necessary to keep 50,000,000 wage earners employed.

Mr. Speaker, we who have fought for economy in government for the past number of years have a great responsibility and a heavy task ahead. That is to continue our fight for the reduction of the cost of government in the interest of all of the American people. We must pass a tax reduction bill fair and just to all taxpayers in the hope this time we can get a majority large enough to override a Presidential veto.

EXTENSION OF REMARKS

Mr. KILBURN asked and was given permission to extend his remarks in the RECORD and include a resolution adopted by the Rotary Club, Ogdensburg, N. Y., endorsing the St. Lawrence seaway.

Mr. MEYER asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. BAKEWELL asked and was given permission to extend his remarks in the RECORD in two instances; to include in one an editorial appearing in the Washington Star, and in the other an address delivered by Mr. Arthur J. Freund before the American Bar Association.

Mr. ELLIS asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. MERROW asked and was given permission to extend his remarks in the RECORD and include an article written by him entitled "Aggression Is on the March."

Mr. CRAWFORD asked and was given permission to extend his remarks in the RECORD and include a statement by Mr. Lawrence Ferdy on the needs for tools and machinery in this country.

Mr. LEFEVRE asked and was given permission to extend his remarks in the RECORD.

Mr. ENGEL of Michigan. Mr. Speaker, I ask unanimous consent to extend my

remarks in the RECORD and include remarks of Wally Boren, author of Wally's Wagon column of this week's issue of This Week magazine. For once someone said something nice about the Congress.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DAVIS of Tennessee asked and was given permission to extend his remarks in the RECORD in two instances; to include in one an editorial, and in the other an address delivered by Ned Dearborn.

THE WORKINGMAN AND THE FARMER PAY THE PRICE

Mr. ELLIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. ELLIS. Mr. Speaker, on last Wednesday the President addressed the joint session of the Congress on what was supposed to have been the state of the Union. After a limited study of his proposals, one is impressed with the fact that he failed completely to address himself to this subject and that probably a more appropriate title would be "The State of Mind of the Democratic Candidate for President."

Reaction to the President's message the past week was quick and varied with most of the comment following the expected pattern. The most notable reaction was the lack of strength from the President's own party and from the press which usually supports the administration.

It is recognized that the subjects involved cannot be thoroughly discussed in a short statement of this nature, but the one fact that stands out in the overall picture, and on which there is almost unanimous agreement, is that Mr. Truman and his advisers have decided beyond all doubt that their political future lies in holding the support of the left-wing radicals, parlor pinks, Communists, and the international cabal of counterfeit Americans generally referred to as internationalists or "one-worlders." He gave notice to all other segments of people in America that henceforth he is in opposition to free enterprise, decentralization of Federal power, economy in government, and tax reduction. If his proposals were carried out, it would call for the expenditure of $60,000,000,000 or $70,000,000,000 in addition to normal expenses for the next 4 or 5 years, and he failed to tell us how we can give away our own substance at this rate along with the proposed increases in Federal operation expenses without adding momentum to the inflationary spiral which will insure higher prices and greater scarcity of consumer and durable goods.

When goods are exported, labor is exported. When they give away goods, they give away labor. When they give away labor, the workingman and the farmer pay the bill. They pay it through higher prices and higher taxes. All in all his program is contrary to every known sound business principle and inconsistent with the economic practices that have made this Republic the greatest Nation in all history.

He asks for wartime controls, wartime spending, and wartime confiscatory taxes. We cannot have independence without self-dependence. We cannot maintain that self-reliance individually that has meant so much to our progress without constant agitation for personal responsibility. Paternalistic government and democratic independence are as unmixable as oil and water. The real strength of any nation is in the self-reliance of its citizenship. Mr. Truman's preachment strikes at the very foundation of our constitutional government and throws to the wind the sacred principle that the state is the servant of the people.

His program would make financial disaster and bankruptcy almost a certainty and lay the foundation for a police state. Russia is a police state. He does not make clear why it is necessary to set up a police state in America in order to abolish police states in Europe. He places himself in a very precarious position when he tries to justify his creation and support of communism's twin brothers, the socialistic states of Europe and a controlled economy in this country while he is showing his teeth at all other forms of totalitarian governments.

Mr. Truman's tax plan is a feeble effort to play both sides of the political street, and it is so recognized by practically all Members of Congress excepting only a few left-wingers.

The only way tax relief can be afforded the American people is to reduce the total amount assessed. This simple arithmetic is understandable by any high-school student. The over-all tax load in the United States is approximately $52,000,000,000 annually. This sum is anchored in the cost-of-living bill and no power can get it out except by reducing the total tax burden. This tax load is one-fourth of the national income. Consequently, 25 percent of every dollar we spend goes for taxes. No matter where you are or what you do, if you make a dollar and spend it, you pay taxes. If you make $40 per week and spend it, $10 of the amount goes into the tax till. Notwithstanding, you may be exempt from all direct tax payments. No one that receives money and spends it escapes taxes.

The most serious indictment of the Truman proposal is that despite the superficially plausible statement of the President to the contrary, such legislation would be inflationary in character. Which is another way of saying that instead of helping the victims of high prices for whose benefit it is professedly offered, it would actually intensify their problem by adding new impetus to the inflationary spiral. When the President vetoed the tax bills last year, he thereby added $4,500,000,000 to our cost-of-living bill for the year 1947. When he bludgeoned the Congress into voting for the British loan of approximately $4,000,000,000, that sum was added to our cost of living and the same holds true of all foreign loans and grants and excess Federal expenditures. All of this spending is reflected in the high cost of living and high taxes—the people paying the bill.

The taxpayer is not being fooled by any double-talk on taxes. The only forthright approach to the inflationary, high-priced problem, is to materially reduce all taxes, reduce the proposed Federal budget of $39,700,000,000 by at least 20 percent, reduce Federal spending, hold exports within the bounds of reason, and do it now.

GRATING ON THE NERVES OF THE COMMUNISTS

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, I am getting some wonderful publicity these days.

On yesterday there came out in the Washington Daily News 10 pictures of individual Americans that are said to have been selected by the Academy of Vocal Arts as having outstanding voices. They were: Secretary Marshall, General Eisenhower, Senator Owen Brewster, Kate Smith, Cardinal Spellman, Lauren Bacall, Ralph Edwards, Secretary Forrestal, Jay Jostyn, and your humble servant.

They said my voice was the "most grating." I did not understand just whom my voice was grating on until I read this Associated Press article from Moscow, which I want to read to the House.

It says:

> Boris Izakov, writing in Pravda, the Communist Party organ in Russia, described present-day life in the United States as similar to that in Nazi Germany before the war.
>
> Izakov said the United States was caught in the meshes of the FBI, and that a small-scale reign of terror gripped the people.

Then he said:

> There have been no mass executions yet in the United States of America, such as are being carried on in Greece with the blessings of American generals and diplomats, but the fate of any American nowadays is in the hands of the notorious Fascist [Representative JOHN E.] RANKIN (Democrat of Mississippi) and any detective in the FBI.

So it seems that the Communists are the ones on whom my voice grates the most.

They seem to be trying to make the people of Russia believe that I have as much power over the American people as Stalin has over them, and that I am using the FBI as my gestapo.

The truth is that I am speaking for a majority of the real Americans in this country in my efforts to expose the Communists who are plotting the overthrow of this Government, and in demanding that they be driven from every position of influence in our national life.

Of course, the FBI agrees with me on that issue.

The sooner we clean house and fumigate, the better it will be for the country.

The SPEAKER pro tempore. The time of the gentleman from Mississippi has expired.

EXTENSION OF REMARKS

Mr. HARRISON asked and was given permission to extend his remarks in the RECORD and include several editorials.

Mr. KEATING asked and was given permission to extend his remarks in the RECORD regarding a bill he is introducing today.

LIFT EMBARGO ON ARMS

Mr. CELLER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CELLER. Mr. Speaker, the embargo on arms to the Middle East must be lifted. Palestinian Arabs are getting not only arms but armed men from neighboring Arab States. The British are either unable or unwilling to maintain order.

The United States joined with more than a two-thirds majority of the United Nations to set up and maintain a Jewish state. No state surrounded by hostility can be created without arms. The embargo has the effect of nullifying our action at the United Nations General Assembly.

The United States has a great responsibility in this matter. She took the lead in setting up the Jewish state. She cannot wash her hands of this matter by setting up an embargo and letting it go at that.

Neutrality is inconsistent with our affirmative action in the United Nations. Neutrality in this instance is a one-way street. Arms are denied Jews which are supplied the Arabs. Arab sovereignties can get all the arms the Palestinian Arabs need. The Jewish state is not yet sovereign, and therefore cannot negotiate for their purchase.

The embargo must be lifted.

MANUFACTURE OF INTOXICATING BEVERAGES

Mr. BRYSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. BRYSON. Mr. Speaker, on December 19, 1947, near the close of the first session of the Eightieth Congress, when the House had up for consideration Senate Joint Resolution 167, which ultimately became and now is Public Law 395 of the Eightieth Congress, I voted for the measure. I stated then, and am now all the more convinced, that the terms of the act were inadequate to meet the situation. One of the main reasons which induced many of us to vote for the bill was the fact that authority was given to the President to limit the amount of grain used in the manufacture of distilled spirits and for other beverage purposes. The authority thus granted to the President expires on January 31, 1948, only a few days away.

With the selfish and greedy attitude of distillers and brewers so well known, it is imperative that at least the controls provided for in Public Law 395 be extended for sufficient time to permit the Congress to enact its will on this vital subject.

I have today introduced House Joint Resolution 294 which, if passed by Congress, will extend the authority of the President as provided in section 4, subdivision b of Public Law 395 until January 31, 1949. This 1 year's period will give us time to work out proper legislation to deal with one of the most controversial issues that has ever confronted this country.

It is, indeed, a strange paradox that the brewers and distillers of this country are determined to gobble up as much grain as possible to be used in the manufacture of intoxicating beverages, while at the same time we struggle to provide sufficient food to save human lives both here and abroad.

MERCHANT MARINE

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BRADLEY. Mr. Speaker, I note that through some error my special order of 30 minutes for today has been omitted from the first page of the calendar. I take this opportunity merely to tell the friends of the merchant marine that I have not walked out on them, but that I intend to speak on the merchant marine as soon as the time for the special orders arrives.

AID TO GREECE

Mr. BUFFETT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. BUFFETT. Mr. Speaker, about 10 months ago President Truman called upon the United States to be an international fireman in Greece. At that time the fire hoses were filled with American dollars. It appears that before long they may be filled with American blood.

In the meantime Congress may be interested in knowing how well we have done in stopping inflation in Greece. By the International Monetary Fund, I am told, on February 28, 1947, the Greek drachma was quoted at 140,000 to 1 gold sovereign. This last week the Greek drachma was quoted at 215,000 drachmas to 1 gold sovereign, so that inflation in Greece during that 10 months has increased 53 percent while we have been running that show.

Mr. Speaker, they say that in heaven the angels all rejoice at the conversion of a single soul. In a similar vein I should like to read a couple of sentences from a recent column by Walter Lippmann. He says:

> We are morally and politically overextended. * * * We are at a point where the Truman administration cannot please all the services, all the departments, all the specialized divisions of the State Department, all the countries to which by its unconsidered and no doubt well-intentioned declarations it is morally committed.

To that statement, Mr. Speaker, I add a fervent amen.

PERSONAL PRIVILEGE

The SPEAKER pro tempore. For what purpose does the gentleman from Michigan rise?

Mr. HOFFMAN. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER pro tempore. The gentleman will state the ground for the question of personal privilege.

Mr. HOFFMAN. Mr. Speaker, in the December 15 issue of In Fact, which the editor, George Seldes, describes as "an antidote for falsehood in the daily press," there is this statement:

> All during the war and since its end, HOFFMAN's record has been one of constant support for the crackpot fringe of native fascism. A report on his activities by the Friends of Democracy (vol. 3, No. 20) says:
>
> "America's Fascists, pro-Fascists, isolationists, and labor-baiters have long recognized Representative HOFFMAN as one of their most influential spokesmen. The sharp-tongued Congressman first gained attention from Fascist circles in 1937 when he had served in Congress 3 years. From that time on, HOFFMAN, whose arch enemies have been Roosevelt, Stalin, Britain, world cooperation, labor, and aliens, has steadily risen to top prominence with the Nazi lovers."
>
> * * * * *
>
> Today, this same Congressman is embarked on the boldest campaign of intimidation of newspapermen yet undertaken by any individual or group in the Congress, including the Committee on Un-American Activities. With few exceptions, the press whose freedom he would curb maintains a monumental silence.

Mr. Speaker, those statements reflect upon the integrity and loyalty of the Member from the Fourth Congressional District in his official capacity as a Representative from Michigan and raise the question of personal privilege.

The SPEAKER pro tempore. The gentleman from Michigan is recognized.

Mr. RANKIN. Mr. Speaker, I make a point of order that a quorum is not present.

Mr. HOFFMAN. I hope the gentleman will withhold his point of order, as this will only take 5 minutes.

Mr. RANKIN. Mr. Speaker, I withdraw the point of order. I thought the gentleman wanted an audience.

Mr. HOFFMAN. No, no; I do not want an audience. My purpose today is to make a record.

Mr. RANKIN. I thought the gentleman ought to speak to the Members of Congress.

Mr. HOFFMAN. The Members should know of the methods used by this man

Seldes, for he is a vicious, lying tool of the Communists. I do not want an audience. I am just putting this reliable information in the RECORD at the request of some very reliable Americans who want to keep the record straight. I am not alone in this. The gentleman himself has the same reputation along the same lines with the same people as I have. We are not alone. I notice here that the American Legion is characterized by this same person as being a sort of Fascist organization, and he said Mr. Dulles, who stands behind Secretary of State Marshall, had the same reputation.

Mr. RANKIN. I think he also makes the same attack on the Daughters of the American Revolution. While everybody knows that the Daughters of the American Revolution are patriotic and loyal, it is generally understood that Seldes has long been recognized as a Communist propagandist.

Mr. HOFFMAN. If previous issues of In Fact are read, it will be found that Seldes has attacked and vilified practically every individual who was energetic, aggressive, and persistent in speaking and acting for America and who was not either a Communist, a left-winger, or a New Dealer.

Just as an illustration, in his issue of December 8 he writes:

> Year after year the American Civil Liberties Union reports listed the Legion as the most powerful force in the Nation working against the civil liberties of its citizens.

In the same issue he writes:

> The man behind Secretary of State Marshall at the present conference in London which may settle the fate of Europe and which will affect the future of the United States is John Foster Dulles.

He then proceeds with a subhead which reads, "Relationship of Dulles firm and Nazi firm," in his attempt to show that Mr. Dulles is not a good, loyal American and that he and his associates are linked with the Nazis.

Seldes is a talented writer and, as a mass producer of falsehood and vilification dressed in attractive language, it is doubtful whether he can be excelled.

To show his complete disregard for the truth let me repeat one of his later references to me:

> Today, this same Congressman is embarked on the boldest campaign of intimidation of newspapermen yet undertaken by any individual or group in the Congress, including the Committee on Un-American Activities.

Everyone cognizant of the facts in connection with the two incidents to which he makes reference knows there has never been any attempt on my part to intimidate anyone, much less newspapermen.

Last fall, as a subcommittee of the Labor Committee, I held certain hearings in the Midwest. At those meetings the reporters were given every facility for their work. They were seated at the same table as was the committee, its counsel, and the witnesses. On one or two occasions they were called upon for assistance in the asking of questions in order to clear up some point that was in doubt. When "goon" squad leaders or certain publications charged that the hearings were unfair, the union's representatives were given an opportunity to fully and freely express themselves. On one occasion, that is, at Galion, Ohio, the following occurred:

> Mr. HOFFMAN. Gentlemen, we will come to order. Preliminary to the opening of the hearing, I most respectfully call the attention of the reporters, some eight in number, who are present, to an editorial in the Detroit Free Press of October 23 referring to the investigations which have been held and in which the editor joins William McAuley, the regional director of the UAW-CIO, in his statement presumably referring to the hearings which were held at Clinton, St. Joseph, and Dowagiac, Mich., and I quote:
>
> "The hearings are unfair to all concerned."
>
> There are several other statements in the editorial reflecting upon the investigation and those who are conducting it.
>
> My purpose now is most respectfully to request that you reporters be on the lookout for any evidences of unfairness, any improper conduct, any violation of the rights of citizens generally and, in particular, employees and union officers and representatives and State authorities, and request that, if you find any evidence of unfairness, you emphasize it. Send it in and have it printed in bold-faced type and underscore, because the people are entitled to know if any of their representatives are acting in an improper manner.

The purpose of these remarks today is to once more call the attention of the Members of the House, of the press, and of the public to the fact this man Seldes is a falsifier and a prevaricator, that he has not the slightest regard for the truth, that his love of the dollar and his perverted mind induce him to use his undoubted talent to create material which, because of its sensationalism and its charges against people and organizations which enjoy public confidence and which are engaged in a public service, finds a market with those who are attracted by his outrageous nature.

Some information bearing upon Mr. Seldes' unreliability will be found in the Appendix of the CONGRESSIONAL RECORD, volume 93, part 10, pages A1078–A1081.

The Federal Bureau of Investigation is headed by a man who is known throughout the world for his investigatory powers and for his reliability. So, instead of citing instances of Mr. Seldes' lying, let me read you what J. Edgar Hoover had to say about this gentleman, and then let me add information from other sources.

I quote from Mr. Hoover:

> FEDERAL BUREAU OF INVESTIGATION,
> UNITED STATES DEPARTMENT OF JUSTICE,
> *Washington, D. C., August 27, 1941.*
>
> Mr. GEORGE SELDES,
> *Editor, In Fact, New York, N. Y.*
>
> DEAR MR. SELDES: I wish to acknowledge your letter of July 21, wherein you refer to a letter which I directed to Mr. Thomas A. Murphy. I did state in my letter to Mr. Murphy, in response to his request, that the May 12, 1941, issue of In Fact contained a collection of "lies and falsehoods." I made this statement since I had no other choice in view of the obvious inaccuracies of the statements appearing in In Fact.
>
> You state that it is your purpose to publish the facts, that you keep your columns open to correction, and that if I will point out "one statement or one word in In Fact which is not true * * *" you will print a correction. I am not so much interested in a correction as I am in keeping the record straight, and accordingly I wish to advise as follows with reference to the statements appearing in the May 12 issue of In Fact:
>
> In Fact says, "Bridges case seen as opening FBI gun against labor and civil liberties in preparation for war."
>
> This statement is incorrect, inasmuch as the FBI is a fact-finding organization which has for its objective the preservation and protection of civil liberties. It does not inject itself into the employer-employee relationship. The FBI is charged, however, with carrying out the will of Congress and the instructions of the Attorney General of the United States and the President of the United States. The investigation of Harry Bridges, which resulted in a recent hearing afforded Mr. Bridges, was made on the specific instructions of the Attorney General.
>
> In Fact states: "That in preparation for entering the war the majority of American citizens who want peace are being intimidated and harassed by J. Edgar Hoover, who did the same job for Attorney General Palmer in World War I."
>
> This statement is false. No citizen has been harassed or intimidated by any special agent of the Federal Bureau of Investigation or by me. As a matter of fact, my duties in the Department of Justice during the First World War could not by any stretch of the imagination sustain the charge which you have made. I was not connected with any activity wherein there was an opportunity to carry on such work, for it was not until August of 1919 that I was appointed a special assistant to the Attorney General, which position I held until 1921. The record of the Federal Bureau of Investigation since I assumed its directorship in 1924 speaks for itself. During that period, a persistent and successful effort has been made to lift the standards of law enforcement by first illustrating through the activities of the Federal Bureau of Investigation that law-enforcement work could be carried on in an orderly and impartial manner and that its activities could be kept on a high plane. At no time has the Federal Bureau of Investigation violated the civil liberties of any person. As a matter of fact, over a period of years 96 percent of the persons arrested and charged with violations of Federal offenses were found guilty when tried in Federal court. This record in itself disproves the charge of intimidation and violation of civil liberties.
>
> In Fact says, "That the FBI has sought to frame progressive unionists."
>
> This is a gross and malicious misstatement of fact, although I am, of course, cognizant that this charge has been made before by Communists and their fellow travelers. However, it is untrue. The Federal Bureau of Investigation has never sought to frame "progressive unionists" or any other individuals.
>
> In Fact says, "That the FBI has cooperated with labor's worst enemies in an effort, so far singularly unsuccessful, to break strikes."
>
> This statement is false. While In Fact does not name "labor's worst enemies," nevertheless the FBI does not cooperate with anyone or any organization to break strikes. It never has and it is not contemplated that it will at any time in the future.
>
> In Fact says, "That a witch-hunt against civil liberties is being instituted, without any official wartime legislation, by Hoover and the FBI."
>
> This statement is false. The FBI has as one of its functions the maintenance of civil liberties, and as a matter of fact, I have been subjected to considerable criticism by reason of a stand which I have taken against the creation of vigilante groups. The record will show that from the very inception of the emergency I have constantly called upon law-enforcement officers and citizens alike to handle matters coming to their attention in a calm and impartial manner. Your conclu-

sion, which is set forth as a statement of fact, is not supported by the record.

In Fact states, "Bridges said, 'The FBI is now performing antilabor espionage for nothing which was formerly done for pay by company hirelings.'"

While it is true In Fact is quoting Bridges, I must point out that the statement by Mr. Bridges is a falsehood and as In Fact pointed out, it would be hard to substantiate, because it is false. The FBI does not perform antilabor espionage and as I have already indicated it is an established policy of this Bureau to refrain from having any connection with employer-employee relationships.

In Fact, in referring to the difficulty to substantiate the Bridges statement without a congressional investigation, states that my "love of publicity * * * has recently been replaced by a tight-lipped reticence. The FBI's current activities seldom get into the newspapers. However, from the Nation's labor and periodical press, In Fact has collected numerous illustrations of the FBI's pronounced antilabor bias."

The activities of the FBI have always been open and aboveboard. It is true that the FBI has not been making blanket charges and, incidentally, it has never sought publicity or headlines, your statements to the contrary notwithstanding. It is rather odd, since In Fact admits that current FBI activities seldom get into the papers, that in the next breath the statement is made that it has collected numerous illustrations from the papers. For your information, every activity of the FBI is scrutinized at periodic intervals by the Attorney General, the Bureau of the Budget, the Appropriations Committee of the House of Representatives and the Senate, and later by the Congress of the United States. Thus, it is readily apparent that the FBI's activities are well known by the governing forces of the United States.

In Fact states that Joe Mason drove his fiancée from her home in Spokane, Wash., to Kellogg, Idaho, to be married. "Two days after the ceremony he was seized by the FBI and accused of violating the Mann Act."

The facts are that charges were made against Joe Mason for violation of the White Slave Traffic Act, which charges reached the FBI on September 30, 1940. The FBI was advised that Mason had transported a girl from Spokane, Wash., to Kellogg, Idaho, and thence to Butte, Mont. On the night of September 21, 1930, Mason, the girl, and another individual wrecked their car at Kellogg and all three stayed in a hotel before proceeding to Butte, where Mason and the girl registered at a hotel on September 23, 1940, as Mr. and Mrs. Joe Mason, occupying the same room. They paid rent up to, and including, October 10, 1940. When the facts were presented to the United States Attorney, who is the prosecuting official for the United States Government, he issued instructions to file a complaint against Joe Mason for violation of the White Slave Traffic Act, which was done on October 11, 1940. Mason was never arrested by the FBI; he was not seized by the FBI; he was not even questioned by the FBI but voluntarily appeared at his arraignment on October 16. On October 19, the complaint was dismissed by the prosecuting attorney inasmuch as Mason had married the girl subsequent to the time of the alleged violations. Mason's attorney exhibited a marriage certificate which revealed that Mason and the girl were married at Dillon, Mont., on October 14, 1940. Thus it will be noted that the marriage took place 3 days after the complaint was filed.

In Fact states that 85 FBI agents were known by the miners' union to have visited Butte in 6 months, and some 15 or 20 are estimated to be stationed there at the present time.

The FBI maintains a field division in Butte covering the States of Montana and Idaho. However, the number of agents, and there were not 85, who visited Butte is immaterial and not pertinent to the issue. The number of agents presently assigned to Butte likewise has no bearing. The number varies from time to time in proportion to the amount of work in the Butte district.

In Fact refers to two FBI agents armed with revolvers who pushed their way through a mine, mill, and smelter workers' picket line at the Public Service Brass Co. in Los Angeles, blustering and making unjustified and unwarranted antilabor statements.

It is true that two special agents drove up to the Public Service Brass Co. in Los Angeles on January 30, 1941. The agents were seeking an individual who reportedly was armed and naturally the agents were armed in order that they might protect themselves if necessary. They did not, however, know that a strike was in progress until they stopped their car in front of the Public Service Brass Co. One of the agents got out of the automobile and was stopped by the leader of the picket line. However, he passed the agent after the latter had identified himself. The other agent remained in the car until he noticed that the first agent was stopped, at which time he too got out of the car. The agents made no blustering statements when stopped by the picket leader. Neither did they make any statements that could be regarded as antilabor.

In Fact refers to a case in Ducktown, Tenn., wherein the Mine, Mill and Smelter Workers Union requested "the FBI to investigate when strikers' homes were dynamited but no investigation was made till TVA power lines were blown up." The statement is then made that "working with the county sheriff, FBI agents arrested 22 strikers, held them incommunicado on company property and after 6 days of intimidation secured several 'confessions,' which were later repudiated."

The facts are that the TVA power lines were blown up and that this malicious destruction of Government property constituted a violation of the laws of the United States coming within the primary investigative jurisdiction of the FBI. Accordingly, an investigation was conducted. With reference to the dynamiting of the strikers' homes mentioned in In Fact, I wish to advise that such action would constitute a violation of State laws and under the circumstances would not constitute a violation of Federal laws. Thus the FBI would have no authority to investigate such action. Following the investigation of the destruction of the TVA power lines, 21 individuals were taken into custody. Five of these individuals were arrested by local officers at the request of the FBI, and as a matter of fact, none of the others were apprehended by special agents of this Bureau. As a matter of fact, the five individuals arrested at the request of special agents were not held incommunicado.

After hearing the evidence, a Federal grand jury at Chattanooga, Tenn., in an indictment charged the 21 individuals with conspiracy to willfully injure and commit degredation upon the property of the Tennessee Valley Authority. This, of course, proves that there was a legal basis for the investigation. In connection with this case, several of the defendants expressed their satisfaction with the treatment received from FBI agents. The fact that some of the defendants later denied their statements in court does not sustain a charge of intimidation or duress. As a matter of fact, this issue was raised during the trial of the case and the court did not find after hearing the evidence that any illegal or improper methods were employed.

In Fact states that Anderson and six other strikers were convicted in February, receiving 2-year sentences and fines up to $5,000. As a matter of fact, Anderson did receive such a penalty following his conviction. However, 7 others were convicted, 6 of whom received sentences of 2 years and a fine of $1,000. The seventh individual received a sentence of 15 months without the imposition of a fine. In all, 8 of the 21 individuals indicted by the grand jury were found guilty. In Fact's statement quoting an FBI representative as saying to a striker, "Anderson is the man we want" is untrue.

In Fact refers to the strike of the National Association of Die Casting Workers and charges that the Department of Immigration broke up the strike.

Inasmuch as the Immigration and Naturalization Service is not connected with the FBI, this reference in In Fact has no bearing on the FBI.

In Fact states that during the Allis-Chalmers strike "the auto workers' union charged the FBI with sending agents to the homes of strikers to intimidate them into signing back-to-work petitions."

This statement is false for FBI agents at no time intimidated workers. Neither did agents go to the homes of the strikers in an effort to have them return to work.

In Fact refers to the International Harvester strike in Chicago and to a bulletin issued by the Chicago International Labor Defense stating, "Hundreds of Chicagoans have come face to face with America's Gestapo—J. Edgar Hoover's FBI—working hand-in-hand with Chicago's notoriously antilabor police force." The statement is then made that "agents of this new Gestapo have knocked on doors, forced entrance into homes, intimidated people into answering questions, and frightened them with fifth-column accusations; agents have visited factory foremen and workers using thinly veiled threats of reprisals against anyone who refused to stool and answer the questions of the investigators."

This statement is likewise absolutely false. No agent of the FBI committed the acts charged.

In Fact refers to an item appearing in the New York Sun on November 1, reporting that "the FBI was shadowing John L. Lewis."

This statement is so false that its re-publication appears maliciously deliberate. In Fact further states that the New York Post reported that "numerous G-men were devoting their full time to taking down the license numbers of cars parked outside CIO meetings called by Lewis." This statement is absolutely false. At no time have special agents been assigned to such activities.

In Fact states that when the "United Electrical Workers began organizing the Levene Motor Co. in Philadelphia several months ago, the company president called the men together and said that the FBI had instructed all companies with defense contracts to warn their employees against 'Communist agitation'." Continuing, In Fact states that the president "fired the union organizer 'by order of the Navy Department'."

This statement is untrue, insofar as the FBI is concerned. While the FBI does make surveys of the protective facilities of industries having large national defense contracts at the request of both the War and Navy Departments, these surveys do not contemplate or go into the employee-employer relationship. As a matter of fact, the Levene Motor Co. has not been surveyed by special agents of the FBI. What instructions the president of the Levene Motor Co. gave, of course, are something with which I am not familiar. At any rate, any instructions which he did give were certainly not on behalf of the FBI.

In Fact refers to an address of Congressman ANDERSON, who "quoted from official file No. 654,632 of the Department of Justice." The article states that Joseph Curran took this up with the President, who replied that Paul Mallon, "who has good connections with the FBI," cleared up the confusion by revealing that the report referred to was a part of the FBI's report on Harry Bridges.

The facts are that the Federal Bureau of Investigation does not release its investigative reports for publication. Copies of the FBI's reports in some instances are furnished

to other Government agencies, and in the event the other Government agencies give out the report this is a matter over which the Bureau has no control. The Federal Bureau of Investigation gave no such report as referred to in In Fact to Congressman ANDERSON.

In Fact states that "many heads of company police and labor-spy outfits exposed by the La Follette committee in recent years have been former FBI men."

This statement, of course, has no bearing upon the Federal Bureau of Investigation today, as this organization does not have any control over any individuals who formerly were in its employ. Former special agents of this Bureau, insofar as official records, files, and other matters are concerned, are treated exactly like any other citizen.

In Fact states that the closest I "came to working openly with an employer's association was with the Cleveland Industrial Safety Council * * *."

The facts and records conclusively show that the FBI opposed the organization of the Cleveland Industrial Safety Council and its development inasmuch as it was in conflict with the President's directive of September 6, 1939. I have always felt that the handling of national defense matters was a job for the constituted authorities and not one to be handled by private groups of well-intended citizens or vigilantes.

In Fact states "two union steelworkers were arrested 'under orders of the FBI' for photographing an antilabor billboard in Weirton, W. Va."

The facts are that three individuals were arrested at Weirton, W. Va., by local authorities on March 19, 1940. The arrests were made without the knowledge of the FBI and the first information which the FBI had of these arrests was on March 21, 1940, when a letter was received from the local law-enforcement officer. The arrests were not made upon the orders of this Bureau.

In Fact states that in August of 1940 I "used the American (magazine) to denounce as saboteurs AFL aircraft workers at the Boeing plant in Seattle, one of the most profitable in the country, who were endeavoring to avoid a wage cut."

I did write the following paragraph in the August 1940 issue of American Magazine:

"Sabotage does not always consist of actual physical damage in plants. Sometimes more subtle methods are used. As this is written, a group of Communists are reported to be attempting to force a local labor union to take steps which would result in closing down a large airplane factory in America if the company takes contracts for the construction of planes for the Allies."

I did not name the factory involved. Neither did I state that the group consisted of AFL aircrafts workers at the Boeing plant in Seattle. This reference, together with others, appears rather inconsistent with your statement that you seek to print the truth, when, as a mater of fact, you print a statement which could be very easily checked by reference to American Magazine.

In Fact states, "One of Hoover's ambitions is to fingerprint every person in the United States." The article then goes on to refer to the matter of fingerprinting generally.

The facts are that fingerprints constitute an infallible means of identification. Likewise there is no difference between a set of fingerprints and a signature, except that fingerprints cannot be forged. No one objects to signing a marriage license or an application for an automobile driver's permit, for which reason it is rather difficult to reconcile the objections which you raised regarding fingerprinting unless it is the view of In Fact that a person has a right to conceal previous activities of a questionable nature. As a matter of fact, the use of fingerprints has grown in popularity annually for a long period of time. It is true that this method of identification does present a means of identifying an individual regardless of the number of times he has changed his name. By the same token it also is a positive means of protecting the innocent. The mere fact that I have publicly discussed the benefits of fingerprinting doesn't mean, however, that it is my ambition to fingerprint everyone in the United States.

In Fact states that the FBI "has all the prints ever taken by local police."

This is incorrect, because the FBI has not received every set of fingerprints ever taken by the local police.

In Fact refers to Estolv E. Ward's recent articles, whose inaccuracies closely parallel the May 12 issue of In Fact, and states, "Any militant unionist who has been arrested on a picket line is thus represented on a national antiunion blacklist."

This statement is incorrect since identification data in the FBI files are made available only to constituted authorities and the FBI has no antiunion blacklist. Any notations appearing upon fingerprints, of course, are made by local law-enforcement authorities in accordance with local procedures.

In Fact states, "the clerks in the FBI fingerprint file room are among the most overworked Government employees."

This is false. FBI employees, by reason of the present emergency, obviously are working hard in order to keep abreast with current needs. Limited overtime is necessary during the present emergency not only on the part of employees of this Bureau, but of many Government bureaus and departments. Unfortunately, it is not possible to compensate employees for overtime services inasmuch as the laws of the United States, as passed by Congress, do not so provide. The fact is, however, that the employees of the FBI, as well as the employees of other Federal agencies performing overtime, are doing their work not for any personal gain but for the benefit of the people of this country at large. They are loyal, patriotic citizens serving their country at a time when everyone should be doing his share. They are working no more overtime than many other Government employees and less than some.

In Fact states that clerks are clocked on their visits to rest rooms.

This is a malicious lie.

In Fact states that the following sign hangs in a training room: "If you must grumble or complain about your treatment by your superiors get out and complain from the outside."

In the event you should ever desire to make any further reference to Elbert Hubbard's motto on loyalty, which does hang in some of the classrooms, I am enclosing a copy of this motto in order that you will at least be able to quote it correctly.

In Fact states, "Hoover has ruthlessly suppressed organization among his employees."

This is an obvious falsehood when it is considered that Bureau employees boast of having the most active association of employees in the Government service. As a matter of fact, a high Bureau official is an officer of a labor union of Government employees.

In Fact states, "In 1936, 38 clerks were fired for joining the American Federation of Government Employees. At Hoover's insistence they were blacklisted by other Government agencies."

At no time has any employee ever been dismissed from the service of the FBI because of his joining a labor union. At no time has any employee ever been blacklisted with other Government agencies by reason of his affiliation with a labor union. In 1936, several former clerical employees of this Bureau stated they had been dismissed because they were members of a labor union. However, the FBI had no information or knowledge that they were members of a labor union until after they had left the Bureau's service and until they had so stated in their false charges. Strangely, several of those who protested had resigned voluntarily. A few others were requested to resign because of their inefficiency. Many of these individuals are now working in other Government agencies, which would not be the case had they been dismissed with prejudice from the FBI. Thus your false charges of blacklisting are proven to be maliciously untrue by the record.

In Fact states, "The FBI has the biggest labor turn-over in Washington."

This statement is false. As a matter of fact, most individuals leaving the Bureau's employ do so on their own volition to accept positions which are more remunerative in private industry. Likewise, scores of individuals who are employed by other Government agencies call at the FBI daily to make application for positions.

In Fact states, "The Palmer raids of 1919, during which 5,000 persons were arrested in one night, were conducted on Hoover's orders."

This statement is untrue. The raids were conducted by the Bureau of Investigation, which at that time was under the direction of Mr. William J. Flynn. At the time I was a subordinate official in the Department of Justice assigned as a special assistant to the Attorney General. In connection with these raids, my only assignment was to correlate the evidence to be used in prosecuting the deportation proceedings.

In Fact incorrectly and only partially quotes from page 173 of the Attorney General's Annual Report.

Had In Fact been correct, the statement quoted on the next to the last page in the fourth paragraph would have stated, "While the work of the General Intelligence Division was at first confined solely to the investigations of the ultraradical movement, it has now expanded to cover more general intelligence work, including not only ultraradical activities but also the study of matters of an international nature as well as economic and industrial disturbances incident thereto." Had In Fact correctly and completely quoted from the Attorney General's Annual Report, the impression would have been conveyed that any economic and industrial disturbances which were investigated were investigated solely as an incident to matters of an international nature. The references to the 1919 steel strike and the 1922 railroad strike are matters of public record which do not reflect to the discredit of the Bureau of Investigation or to my own activities. Any action that I might have taken in connection therewith was solely pursuant to congressional enactment and in furtherance of governmental policy.

In Fact states, "Most of the FBI's more recent violations of civil liberties have had antilabor implications." The article then refers to the Detroit arrests following the indictment of individuals recruiting volunteers to fight with the Spanish Loyalists.

At no time did FBI agents engage in antilabor activities. Their sole function was to serve the warrants which were issued by the Federal district court after the grand-jury indictments had been returned. In Fact does not refer to the investigation which was conducted by the Civil Liberties Unit of the Department of Justice following the Detroit arrests. In this connection, Mr. Justice Robert H. Jackson, who then was Attorney General, stated, "I am, of course, anxious, as you are, that in law enforcement we do no violence to our traditional civil liberties. I am convinced that if those liberties are generally endangered in this country it is not by the FBI." Mr. Henry Schweinhaut, Chief of the Civil Liberties Unit, who conducted the investigation, on page 16 of his report states, "* * * the conduct of the agents is not subject to justifiable criticism."

In Fact refers to the statements of the Attorney General of the United States regarding the Vultee aircraft strike and states, "Jackson got his information about the strike

from Hoover, who got his from Capt. William F. (Red) Hynes."

Naturally the Attorney General of the United States is advised in detail regarding each and every item of information and evidence that comes to the FBI in which he might be interested. The FBI naturally receives information from citizens. The FBI cooperates with all law-enforcement agencies and officers and will receive information from any of them pursuant to the instructions of the President of the United States, who called upon all law-enforcement agencies on September 6, 1939, to report information in their possession pertaining to espionage, sabotage, subversive activities, and violations of neutrality statutes. By accepting such information, the FBI does not endorse any law-enforcement officer, and accordingly, the comments pertaining to Captain Hynes in In Fact are not pertinent.

In Fact states, "For many years Hoover has conducted a National Police Academy at which representatives of local police forces were given target practice."

It is true the FBI did establish the FBI National Police Academy in the summer of 1935 in order that select representatives from law-enforcement agencies might be equipped to return to their communities to instruct their brother law-enforcement officers. Approximately 1 week of the 3-month period of instruction is devoted to defensive tactics and the use of firearms. Thus In Fact obviously seeks to convey an erroneous impression when it states that members of local police forces are given target practice and does not state that they are also given instruction in all phases of scientific law-enforcement work and in legal and ethical procedures.

In Fact states that since the President "proclaimed a limited emergency and designated the FBI as a clearinghouse * * * Hoover has expanded the curriculum." In Fact refers to a mayor of a small western town who writes that "the FBI has asked him and his chief of police to keep a file of everyone in town who spoke in favor of peace, and to notify the FBI of any labor trouble at the town's only plant. 'This has happened in every town in the State,' writes In Fact's informant, whose name naturally cannot be used. 'I told them to go to hell.'"

This statement is false in its entirety. The FBI has never made a request such as the one set forth by In Fact. The President of the United States in his directive outlined the nature of the acts which were to be investigated by the Federal Bureau of Investigation. At no time has the FBI exceeded the President's directive, nor has it exceeded its jurisdiction prescribed by law. If In Fact desires to print the facts, I would appreciate being advised of the identity of the town, the identity of the State, the identity of the mayor, and the identity of the informant in order that the facts insofar as the FBI is concerned may be revealed. If In Fact declines to give this information, then, of course, it places itself in the position of not being desirous of correcting a condition, if it exists, and it would appear that the rights of the Federal Bureau of Investigation are being violated in falsely misrepresenting its activities unless an equal opportunity is given for it to correctly set forth its activities.

In Fact refers to a columnist who wrote regarding the cooperation of the American Legion and the FBI and states "In Fact is informed the unofficial merger has been completed."

The Federal Bureau of Investigation has been most appreciative of the splendid cooperation which it has received, not only from the American Legion but from civic groups throughout the country as well as individual citizens. This assistance has been most helpful to the FBI in the orderly handling of complaints pertaining to national defense matters and by reason of this cooperation it has been possible to hold down an outbreak of mob spirit and the unbridled activities of vigilantes. The assistance of civic groups and the American Legion, however, is limited to passing on to the FBI information which their members possess pertaining to unlawful activities. In no instances do they conduct investigations relative to the information which they pass on to the FBI.

In Fact states "The FBI's principal anti-labor activity in 1940 was the preparation of the Bridges report, which took several hundred agents 3 months."

The facts are that following the passage of the Smith Act, the Attorney General of the United States ordered the Bridges' case reopened, and at his direction FBI agents did investigate the allegations pertaining to Mr. Bridges. However, several hundred agents did not work on the case for 3 months. As a matter of fact, a squad of a score of agents handled the investigation. The statements appearing in In Fact pertaining to the pronouncements of the Bridges' defense committee are false.

In Fact quotes Harry Bridges as saying, "The new evidence Hoover has secured we know to be faked. It was secured by bribery and intimidation."

Mr. Bridges' statement is false, and if he had evidence to sustain this charge, he had an opportunity to present it at the recent hearing which was afforded him by the Attorney General. The evidence obtained by the FBI in the course of the investigation was admitted during the hearing and certainly had the evidence been secured through bribery and intimidation the issue could have been raised. Had the charges been sustained, the evidence would have been inadmissible.

With reference to the third paragraph of your letter referring to Mr. Bridges' statement that he had furnished the FBI with evidence of espionage by Nazis in Douglas and other airplane plants, and that the FBI not only refused to act but went after the CIO union instead, I wish to advise that this statement is false. Harry Bridges did send a telegram to the President of the United States on January 23, 1939, wherein he charged that Nazi agents and sympathizers were working on airplanes for the United States Government. Each charge, however, was carefully investigated and each charge was found to be untrue.

With reference to the fourth paragraph of your letter, wherein you refer to Joseph Curran as denouncing the FBI for antilabor activities and urging the FBI to fight enemy spies, I wish to advise that the FBI has been doing exactly what Mr. Curran in the latter statement urged it to do, namely, it has been counteracting the actions of foreign agents within the United States. At no time has the FBI engaged in antilabor activities.

You state that the American Civil Liberties Union in its 1941 report accuses the FBI of invading the field of opinion, and says the FBI requires constant watching and checking because it interferes with the rights of citizens as guaranteed by the Constitution.

The charges are false and I must call your attention to page 16 of the annual report of the American Civil Liberties Union, which does not support your statement. The report states, "We have also opposed the extension of powers of the Federal Bureau of Investigation into the field of opinion, which the Attorney General has sanctioned under a general authority to investigate 'subversive activities,' not defined." I want to assure you, however, that the FBI does not conduct investigations in the field of opinion.

I likewise must refer again to page 16 of this report wherein is stated, "The FBI is rapidly extending its powers in the emergency of war preparations, and needs constant watchfulness and checking to curtail its tendencies to assume the role of a political police." This does not say, as you do, that the FBI interferes with the rights of citizens as guaranteed by the Constitution. Neither does it say that the FBI has engaged in activities which would violate constitutional civil liberties.

I have taken the liberty of writing you somewhat in length in view of your statements which, on their face, indicate a desire on your part to correctly report the facts. I have attempted to do so in an impartial and factual manner. I shall now observe with interest the action which you will take since being advised of the facts, and of course, I shall be very glad for you to quote my letter in whole in a subsequent issue of In Fact.

May I also make the observation that in the future should you desire to correctly report the activities of the FBI, I shall be very glad indeed to hear from you on specific matters in order that specific activities of the FBI in question may be explained to you if consistent with the public interest, because naturally it would not be possible to give out information of a confidential nature obtained in connection with pending investigations. I have taken you at your word, and as I said, shall observe with interest the action you take.

Very truly yours,

JOHN EDGAR HOOVER,
Director.

From one of the most efficient and reliable investigatory organizations in the world comes the following information on the record of this Red smear artist, George Henry Seldes.

BACKGROUND

Who's Who in America, volume 24, 1946–47, contains the following biographical data concerning Seldes:

Georges Seldes, writer, was born at Alliance, N. J., on November 16, 1890, the son of George Sergius and Anna (Saphro) Seldes. He received his preparatory education at the Vineland (N. J.) High School and East Liberty Academy in Pittsburgh, Pa. He was a student at Harvard from 1912 to 1913. He married Helen Larkin Wiesman. He was a reporter for the Pittsburgh Leader in 1909–10; night editor, Pittsburgh Post in 1910–16; managing editor, Pulitzer's Weekly, New York City, 1916; war correspondent with the American Expeditionary Forces, 1917–18; head of the Berlin bureau of the Chicago Tribune, 1920–25, and the Rome bureau, 1925; war correspondent during the French campaign in Syria, 1926–27; war correspondent for the New York Post in Spain, December 1936 to May 1937; has engaged in writing since 1928; editor of In Fact, weekly newsletter, since 1940. He is a member of the Farmers' Union (Brooks County, Mont.) and a committee member of the National Citizens Political Action Committee. He is author of the following: You Can't Print That, 1929; The Truth Behind the News, 1929; Can These Things Be, 1931; Sawdust Caesar, 1932; World Panorama, 1933; The Vatican and the Modern World, 1933; Iron, Blood, and Profits, 1934; Freedom of the Press, 1935; You Can't Do That, 1937; Lords of the Press, 1938; The Catholic Crisis, 1939; Witch Hunt, 1940; The Facts Are—, 1942; Facts and Fascism, 1943.

It was stated that Seldes, while an assistant in the London office of the Chicago Tribune, was expelled for releases and news that were reportedly true but highly unfavorable to the country reported. He was expelled from Fiume in 1920, from Moscow in 1923, and from Rome in 1925.

The first issue of Ken magazine—Red front—listed George Seldes as editor, but because of a disagreement on policy as

to what could be printed, he tendered his resignation.

During its existence, Seldes was a regular contributor to Fight magazine, official organ of the American League Against War and Fascism, a Red front organization, later known as the American League for Peace and Democracy, a Red front organization.

PRESENT OCCUPATION AND RESIDENCE

George Seldes is editor of In Fact, a weekly newsletter, with offices at 280 Lafayette Street, New York, N. Y. He resides on Grist Mill Road, Norwalk, Conn.

A mailing leaflet advertising In Fact contains a statement by George Seldes, in which he says:

I belong to no party or political organization, but I am willing to join with any individual or society in fighting fascism, which is the enemy of all progressive mankind. By fascism I mean not only far-away fascism in Nazi Germany, Mussolini Italy, and Hirohito Japan, but the fascism of the Cliveden set in Britain and its counterparts among the ruling families of America.

In Fact characterizes itself as "antidote for falsehood in the daily press."

MEMBERSHIP AND SPONSORSHIP OF ORGANIZATIONS, COMMITTEES, AND ACTIVITIES

Seldes was reportedly a member of the International Committee for Political Prisoners in 1937, a Red front.

In 1938 he was a signer of a statement by American progressives on the Moscow trials. It is reported that in December 1938 he was a member of the National Committee for People's Rights—a Red front—and in 1942 his name appeared on a list of sponsors of the National Committee for People's Right, 112 East Nineteenth Street, New York City.

Reportedly, Seldes was in 1939 a member of the National Committee, American Boycott Against Aggressor Nations—a Red front organization. In March of that year he was said to be a member of the organizational committee of Films for Democracy.

A press release issued by the Medical Bureau and North American Committee to Aid Spanish Democracy—a Red front—on March 14, 1939, announced a meeting opening a drive for the relief of victims of "Franco's conquest" on the night of March 15, 1939, at which time there would be discussed The Spanish Conflict and Its International Significance. George Seldes was one of the speakers scheduled to address the meeting.

A circular distributed in February 1940, entitled "In Defense of the Bill of Rights," was signed by Seldes. The signers denied therein that they were Communists but pointed out that they were interested only in the tradition of free speech and that the suppression of the Communist Party in European countries was only a beginning, followed by a campaign against trade unions, cultural groups, Jews, Catholics, Masons, and ending with destruction of all freedom.

Seldes was a member of the Writer's Emergency Committee to Save New Masses—a Red front—in April 1940 and was reportedly one of the sponsors of The Call to a Conference on Constitutional Liberties in America—a Red front—held in Washington, D. C., June 7, 8, and 9, 1940.

A mass meeting styled "Keep America out of war" held in Greenwich Village, New York City, public school No. 3, on June 13, 1940, under the auspices of the Greenwich Village Chapter of the New York Peace Association, was reportedly sponsored by George Seldes, among others.

Seldes was allegedly a member of the executive board of the United American Spanish Aid Committee—a Red front—200 Fifth Avenue, New York City, in July 1940, and one of the sponsors of the Call to the Emergency Peace Mobilization—a Red front—in Chicago from August 31 to September 2, 1940. He is also said to be or have been a member of the American Committee for Protection of the Foreign Born; Friends of the Abraham Lincoln Brigade and the American Council on Soviet Relations—Red front organizations.

REFERENCE TO SELDES IN COMMUNIST NEWSPAPERS

George Seldes was listed in an item in the Daily Worker for June 11, 1938, as one of several prominent intellectuals who had endorsed a campaign launched by the Friends of the Abraham Lincoln Brigade—a Red front—to bring home several seriously wounded Americans from France.

According to the Daily Record of Chicago, defunct Communist daily newspaper, for October 27, 1938, Seldes and others interested themselves in the Committee to Aid Excluded Loyalist Veterans—a Red front. The committee was created to bring pressure to bear on the Secretary of Labor to permit returning Spanish Civil War veterans to enter the United States from Ellis Island.

The People's World—a Red front—for November 21, 1938, stated that—

Thirty-six American authors, representing the finest in the Nation's present literary production, have added their voices to the clamor of labor, progressive, peace, religious, and other groups, demanding that President Roosevelt rebuke the Nazi reign of terror by closing the doors of America to Nazi trade.

The demand referred to was in the form of a letter signed by 36 American authors including George Seldes.

On January 12, 1939, the Daily Worker reported Seldes to be a member of a defense committee to save George Roth, a naturalized American sailor who had been arrested by the German Gestapo in Hamburg on a charge of importing anti-Nazi literature.

The Daily Worker for February 2, 1939, reported that George Seldes, together with Richard Wright, Dr. Margaret Schlauch, and Kyle Crichton, was scheduled to appear at the Delphic Studios in New York City on February 6, 1939, to participate in the Pink Slip Cabaret, organized to raise money to support dismissed WPA writers.

Seldes was a sponsor in a campaign to raise $160,000 for a disabled veterans' fund launched by the Friends of the Abraham Lincoln Brigade, according to the Daily Worker for March 22, 1939.

The Daily Worker of December 3, 1940, contained a news item captioned "Britain's treatment of Jews hit here. Twenty noted citizens signed protest to Lothian." George Seldes was listed as one of the 20 individuals.

Seldes' name was listed by the Daily Worker for December 19, 1940, as one of 165 "nationally prominent representatives of every field of public life" requesting Gov. Culbert Olson, of California, to dismiss immediately charges against Sam Adams Darcy, Communist leader.

In the Daily Worker of June 9, 1941, there is a news article reading:

Writer's congress adopts firm antiwar program. America's best and bravest writers and artists went on record against the imperialistic war at the American Writer's Congress (a Red front) at the Hotel Commodore last night.

The article quotes the writer as follows:

We pledge ourselves to speak the truth about the criminal war.

Among the writers was the name of George Seldes, editor of In Fact, who, according to the article, was elected vice president.

BOOKS AND ARTICLES BY SELDES—LORDS OF THE PRESS

Seldes' book Lords of the Press was reviewed in the Sunday Worker—a Red front—for November 27, 1938, by Howard Rushmore. The following is quoted from the book:

The press lords of the United States in 1 year made this great record: Fought all issues where their profits were involved; led the attack against a real pure food and drug act; opposed the Wagner Act; urged amendment of the proposed social-insurance legislation, putting newspapers in a special class; proposed outlawing of strikes, favored child labor; and frowned at the Securities Act.

WITCH HUNT

Witch Hunt, written by George Seldes, was published in 1940 and carried the subtitle "The Technique and Profits of Red Baiting." Seldes states therein that the most prominent "Red baiting" is attributable to the American Legion, chambers of commerce, the Catholic hierarchy, the Daughters of the American Revolution, the Ku Klux Klan, and the Nazis. The book was reviewed by Ernest Moorer in the Daily Worker of November 11, 1940.

THE FACTS ARE

In the Daily Worker for January 3, 1943, Charles S. Seeley reviewed The Facts Are—, by George Seldes. The last paragraph of the review states:

Incidentally, The Facts Are— closely indicates why those seeking the truth should read the Daily Worker and other papers and magazines which are sympathetic toward the common man of whom Mr. Wallace speaks.

COMMENTS CONCERNING SELDES AND IN FACT IN OTHER PUBLICATIONS

Frederick Woltman, of the staff of the New York World Telegram, is the author of an article in the November 19, 1943, issue of the American Mercury magazine entitled "The Camouflaged Communist Press." The article states that George Seldes' In Fact provides a case study of the Communist press. It says the "newsletter In Fact, founded and edited by one George Seldes, at present provides the outstanding example of ingenious and agile toeing of the mark in conformity

with the party line." By quoting directly from the contents of In Fact, Woltman endeavors to show how In Fact has consistently adhered to the Communist Party line. On page 586 Woltman states:

Small wonder that the Daily Worker praises Seldes and his dope sheet. It merely returns the compliment. In a signed article in the New Masses just before he launched his own paper, Seldes attested that "it now becomes imperative to read the Daily Worker for the actual information about Europe."

The New Leader for April 22, 1944, volume XXVII, No. 17, contains an article by James A. Wechsler, national editor of PM. This article is a reprint from the Guild Reporter. In this article the author attempts to explain Seldes' position over a period of several years. There is also a part captioned "Seldes the Fanatic," under which it is stated that the only charitable explanation for George Seldes' actions is that he is "congenitally and temperamentally a fanatic." It is stated:

All through his career he has struck a "holier than thou" pose, deriding practically every newspaperman in the country and suspecting everybody else's motives.

The article continues:

At present Seldes is running In Fact, a tout sheet for the liberals which seek to cash in on the sucker strain in American life by claiming to give the inside dope.

Seldes started In Fact in 1940, announcing in his prospectus that "I belong to no party, no organization." But, he continued, "I will expose the warmongers." And he has lithely traipsed along the Communist Party line in every little twist and turn. His first associate editor was Bruce Minton, an editor of the New Masses. His first exposés were the plans of the British to trap America into war. In 1940 In Fact lauded a pamphlet, Lothian versus Lothian, which was published by Flanders Hall, a pro-Nazi publishing house secretly supported by George Sylvester Viereck; Seldes ran such headlines as "Britain Burns Food While Millions Starve"—this during the onslaughts by the Nazis; he supported the American Peace Mobilization (a Red front) and publicized the report of Appeaser Joseph Kennedy that "Britain Is Going Fascist in Wartime." Came the June 22, 1941, dawn, and George Seldes became as fierce a warmonger as J. P. Morgan—even fiercer.

But these strange reversals are characteristic of the surrealist strain in Seldes. In 1923 George Seldes was the Chicago Tribune's correspondent in Russia, until he was expelled by Lenin for smuggling out stories.

Seldes left Russia and sent several dispatches and letters to his employer, Colonel McCormick. These letters were released, and in a story in the New York Times of June 18, 1923 (p. 15), Seldes' letters are reprinted. Here is what Seldes wrote:

"Believe me, if bolshevism ever comes to America nothing would please me more than a nice corner post on a roof overlooking two main streets, and a nice large machine gun with unlimited belts of ammunition.

"I am convinced more than ever that Russian bolshevism will never be satisfied until it carries world revolution to other countries, but the country they want most is America. I certainly believe it is the duty of every man who cares the least bit for his own liberty or for the most fundamental rights to fight the greatest force today of anticivilization."

Eyewitness Seldes has never returned to Russia after 1923.

Sure a man has a right to change his opinions. But with Seldes' gyrations in view, can you trust his judgments?

VIEW OF ANTICOMMUNIST WRITERS

Eugene Lyons, in an article entitled "Red Mouthpiece" published in the March 1947 issue of Plain Talk, charged that the subject's newsletter In Fact is a "Communist Party line publication" and that Seldes "has been for at least 10 years a prominent and active fellow traveler of the Communists."

Lyons quoted Louis F. Budenz, former editor of the Daily Worker, who declared that—

In 1940 when I was named president of the corporation publishing the Daily Worker, official organ of the Communist Party, the then secretary general, Earl Browder, stated that the political committee of the party was prepared to name George Seldes as editor of the Daily Worker. Later I was advised that Seldes felt that he should not be associated with such an open Communist publication as the Daily Worker. The party leaders, too, I was told, now felt that he would be more useful as an ostensible non-Communist journalist. * * * As to In Fact, the entire plan for that venture was submitted to me by the ninth floor of the Communist Party—the national headquarters, that is to say. * * * Incidentally, William Browder's wife, Rose, subsequently became business manager of the Seldes publication. * * * I can state that Seldes was one of those men without an open Communist label who was regarded by the national leaders of the Communist Party as one who would always act as a Communist under any given circumstances.

Seldes, when questioned by reporters, declared that he never met Budenz and that the charges were outright lies. In saying that he was not a Communist, Seldes added the only party he ever belonged to was the Democratic Party, but had joined anti-Fascist organizations as had so many other people.

The charge by Lyons that In Fact was printed on the same presses as a number of Communist publications was referred to by Seldes and he answered to the effect he has had three different printers and he did not know of the other jobs they did. Lyons also charged that In Fact employed Communists, to which Seldes answered the newsletter employs 17 persons "and we don't ask them what their race, creed, color, or political beliefs are."

Lyons concluded his article by stating:

Week after week Seldes presents a brew of synthetic scoops, exposés, accusations—spiced with those self-righteous liberal clichés certain people find irresistible. His four pages overflow with the nefarious plots of big business, attacks on the Vatican, Red-baiters, imperialists, and other stock villains of the Muscovite melodrama.

AVAILABLE INFORMATION ON SELDES' RELATION WITH COMMUNIST PARTY

The most recent recorded statement of Seldes that he is neither a Communist nor a red-baiter appeared in the March 31, 1947, issue of In Fact.

The Daily Worker, however, quotes liberally from In Fact. In February of 1946, In Fact devoted its entire issue to an attack on the United States Department of Justice for the alleged suppression in its files of so-called documentary evidence to the effect that Father Coughlin was a paid Nazi agent. The byline of the article was Albert E. Kahn, who is a close friend of Seldes, is said to be a Communist Party member and was co-author of The Great Conspiracy. The day after Kahn's sensational article appeared in In Fact, it appeared in the Daily Worker.

Seldes has been closely associated with Richard Bransten, alias Bruce Minton, in the publication of In Fact. Bransten for a time, at least, was coeditor of this publication. Mrs. Richard Bransten, also known as Ruth McKenney, authoress of the successful play, My Sister Eileen, and Richard Bransten were expelled from the Communist Party for left-wing deviationism.

Mrs. William Browder, sister-in-law of Earl Browder, is the business manager of In Fact. It has been stated that Mrs. Seldes, nee Helen Larkin Wiesman, was carried on the record book of dues and attendance for 1944 as a member of the Norwalk-Westport, Conn., branch of the Communist Party.

Mr. Speaker, from another reliable source comes the following statement bearing upon the activities of Mr. Seldes. Pull off the sheet and take a look at the real George Seldes and his bedfellows. I quote:

MEMORANDUM ON GEORGE SELDES

Seldes, George: Writer, born Alliance, N. J., November 16, 1890, son George Sergius and Anna (Saphro) Seldes; education, Liberty Academy, Pittsburgh, Pa.; Harvard University, 1912–13. Reporter for Pittsburgh Leader, 1909–10; night editor Pittsburgh Post 1910–16; managing editor Pulitzer's Weekly, New York City, 1916; war correspondent for Marshall Syndicate, 1917–18; from 1919 to 1928 member Chicago Tribune foreign news service, serving as head of Berlin bureau, head of Rome bureau, and war correspondent French campaign in Syria, 1926–27; contributed articles on Spain from Loyalist territory to New York Post, 1937. Author: You Can't Print That (Payson & Clarke, 1929); Can These Things Be? (Warren & Brewer, 1931); World Panorama (Little, Brown & Co., 1935); The Vatican, Yesterday, Today, Tomorrow (Harper & Bros., 1934); Iron, Blood, and Profits (Harper & Bros., 1935); coauthor, Not To Be Repeated (Long & Smith, 1932); We Cover the World (Harcourt, Brace & Co., 1937). Married Larkin, daughter Samuel Wiesman, St. Louis, Mo., address, care of Nannine Joseph, 200 West Fifty-fourth Street, New York City. (From Who's Who in American Jewry, 1938–39.)

His own self-serving biography, as given on the jacket of his latest book, Facts and Fascism, which book runs true to the Seldes untruthful form, is as follows (1944):

"George Seldes began his newspaper career in Pittsburgh in 1909, worked in the United Press office in London, was editor of the United States Army edition of the Chicago Tribune, then a member of General Pershing's G2–D, the press section of the United States Army in the World War.

"He was Berlin, Rome, Dublin, Moscow, and Baghdad correspondent for the Chicago Tribune for 10 years, 1919–29; he and his wife, Helen Seldes, were in Madrid as war correspondents for the New York Post in 1937.

"In 1929 he wrote his first book, "You Can't Print That," which told the truth about the stupid and deliberate suppression of foreign news, during his years as a war correspondent. Since then he has written a dozen books. His Sawdust Caesar is the only true full-length portrait of Mussolini; his Lords of the Press tells who bosses our newspapers; last year he published The Facts Are—, a

guide to falsehood and propaganda in wartime. Since 1940 he has been editing the weekly news letter In Fact."

Issues of In Fact from volume 1, No. 1, May 20, 1940, to date, are on file. Its present address is 280 Lafayette Street, New York 12, N. Y.

Seldes endorsement of The Soviet Union; Defender of Democracy and Peace, appears in the Soviet's magazine Soviet Russia Today, November 1938.

He has long been a contributor of articles to the left liberal New Republic, classified by the New York State Lusk Committee as an advocate of revolutionary socialism, by Benjamin Stolberg as a Stalinoid weekly.

When demanding an embargo on Nazi goods was part of the Communist Party line, he was a demander (Communist Party's Daily Worker, November 18, 1938). When fighting Germany and Italy as aggressor nations was part of the party line, he was one of the national committee of the American Boycott Against Aggressor Nations (July 7, 1939). After the line changed with the Nazi Soviet pact (September 1939), he was praised by the Communist Party's Daily Worker (February 3, 1940) for exposing the warmongering lies of the capitalist press.

When the Moscow-Stalin purge trials had shocked all but the hardest of Communists, Seldes signed a statement upholding the trials (Daily Worker, April 28, 1938), saying that the Moscow trials "have by sheer weight of evidence established a clear presumption of the guilt of the defendants" (Communist Party's Midwest Daily Record, April 26, 1938). This was before the assassination of Leon Trotsky.

He is head of the New York branch and was elected a vice president (Daily Worker, June 6, 1939) of the League of American Writers, organized, backed, and controlled by the Communist Party. Seldes endorsed its affiliation with the celebration of the Communist May Day (Daily Worker, April 20, 1940), which he praised as peace day.

To describe his activities for Loyalist (Red) Spain would require a chapter. He has been on the jump, as backer of the rally for the communistic Abraham Lincoln Brigade (Daily Worker, June 22, 1937); sponsor of a dinner for Loyalist Spain (New Masses, September 28, 1937); speaking to raise funds for the communistic North American Committee to Aid Spanish Democracy (Daily Worker, March 16, 1939); denouncing the French Government for ordering Spanish Reds to return to Spain (Daily Worker, March 22, 1940); defending the communistic Abraham Lincoln Brigade (Daily Worker, March 11, 1940).

His books Lords of the Press, You Can't Print That, Sawdust Caesar are puffed by the Communist Party press and their loyal aide, the American Civil Liberties Union. Praising his book Lords of the Press, the Daily Worker (November 25, 1938) said that Seldes pays tribute to the Daily Worker and to the organ of the Communist unit of the New York Times, called the New Times; he has sent eulogies to other Communist papers.

His article condemning Donald Day's anti-Soviet Chicago Tribune articles was printed in New Masses and reprinted in the Communist Party's Record Weekly (February 3, 1940), page 11. He was one of those at the dedication of the Soviet pavilion at the New York World's Fair (Daily Worker, June 30, 1939). He was one of those headlined in the Daily Worker (May 13, 1940) as blasting the Dies committee and demanding that it be dissolved and investigated by Attorney General Robert Jackson.

He was a scheduled lecturer for the pro-Communist New School of Social Research starting February 7 (Daily Worker, January 31, 1939); also, sponsor of the communistic American Committee for Protection of Foreign Born (March 1940), which fights for admission and retention of alien Reds of all nations in the United States of America; signer of the American Civil Liberties Union telegram to Gov. Lehman urging him to repeal the Devany civil-service bill barring Communist advocates of overthrow of the United States Government from holding civil-service positions (ACLU Bulletin May 27, 1939).

His article, Hero Loyalists Vets Held for Deportation, calls for floods of protests to free these Reds, in the organ of the communistic International Labor Defense (November 1938), the Russian section of this world-wide organization being MOPR. He was a speaker and was at the reception when a portrait of the Communist John Reed was presented to New Masses (Daily Worker, June 6, 1939).

He contributed (1937–38) to Fight, magazine of the American League Against War and Fascism, which Dies' publicity forced under cover. He was a speaker with Communist Party leaders at the convention of the International Workers Order, communistic fraternal insurance society (Daily Worker, June 12, 1940). The Daily Worker, May 29, 1940, announced his new weekly news letter In Fact.

He was elected vice president to the Communist-controlled American Writers' Congress (June 7, 1941).

"Seldes resigned his Berlin post in the fall of 1926. In a letter to the Chicago Tribune on November 11, he said he was in New York and was entering a hospital for an appendix operation. On December 12, the then new executive of the Tribune ordered that Seldes be paid 'until he recovers.' This was done. Meanwhile Seldes' place was filled and when he asked reemployment he was refused because the man who had been hired to replace him was doing satisfactory work. Seldes became resentful at not getting his job back." (Chicago Tribune, May 24, 1942.)

The revolutionary Socialist Joseph Freeman, in his An American Testament (Farrar & Rinehart, 1936) stated: "George Seldes, one of the founders of the utopian colonies of New Odessa, Oreg., and Stelton, N. J., was the father of Gilbert and George Seldes, both of whom subsequently became well-known journalists" (p. 282). Comment is almost unnecessary, but, as for the sons becoming well-known journalists, neither, after 1936, enjoyed employment as correspondents of the regular secular press.

Eugene Lyons, erstwhile Socialist, former Moscow correspondent, when writing his The Red Decade (Bobbs-Merrill Co., 1941) devoted quite some space to George Seldes:

"Writing at this time, in Can These Things Be, George Seldes gave pages to exposing such an 'out and out call to treason' on the part of the Russians. (This was before Seldes, growing more communistic as Russia grew less so, changed from a good reporter into a poor politician (p. 90).

"The variety of the signers (Seldes was one of them, Ed.) of this amazing whitewash of Stalin prepared by movie actors and scientists must stand as a symbol of the Red decade. Its insanity was surpassed only once, 15 months later, by 400 experts who publicly denied the possibility of any common ground between Russia and Germany—9 days before the two nations made their alliance in the Kremlin. Here, for the record, is the distinguished list, exactly as published by the Daily Worker of April 28, 1938, pages 247–249:

"Take the case of George Seldes, celebrated in the ideological history of the period. For 12 or 13 years he devoted himself to exploding the myth of Soviet socialism before Stalin and after. * * *

"* * * But suddenly, around 1937, George popped up far inside the Communist orbit, a regular contributor to Stalin's American press, gunning for the hides of colleagues who were quoting his own stuff on Russia. * * *

"No, there is no clue in logic to the change. The transformation had clearly occurred on a level beyond logic, beyond common sense. George, poor boy, had caught communism as one catches the flu in an epidemic. * * * Currently he is editing a pro-Soviet party line sheet called In Fact; until the breach between Russia and Germany, it was loudly anti-British and opposed to our defense efforts (p. 313).

"Among the signatories (Seldes was one of them—Editor) of the 400 signature letter were at least 29 who had also graced the famous 150-signature letter whitewashing the Moscow trials and purges. To have given support to two such documents rates them a special listing as stooges-cum-laude, so here they are * * * (pp. 348–349).

"These dauntless 29 deserve to lead all the rest when diplomas are handed out to the prime window dressers of the Red decade. Not only had they condoned the blood purges in Stalin's domain, but they had attested that the quality of his oppression was unique and not to be lightly confused with the lines offered by Hitler and Mussolini. Those who joined in the latter public testimony, released to an indifferent world just 9 days before Moscow announced its newfound love for Hitler, are listed herewith—precisely as published by the dependable Daily Worker on August 14, 1939." (Seldes was one of them.—Editor.) (Pp. 349–350.)

Seldes was in complete harmony with the Communist Party line before the breach of the Nazi-Soviet pact on June 21, 1941, when the Nazis invaded the U. S. S. R.

Seldes, in June and July of 1942, through form advertisements appearing in issues of In Fact, solicited subscriptions from "the boys in uniform." Subscription solicitation for In Fact has been carried on with regularity at the Communist Modern Book Store, eighth floor, 64 West Randolph Street, Chicago (now at 180 West Washington Street) and no doubt this same system for broadening the scope of In Fact is carried on from the headquarters of Communist book stores in all the metropolitan cities of the Nation.

When the Communist successor of the American League for Peace and Democracy, namely, the American People's Mobilization, held its meeting at the Chicago Stadium, August 31 to September 2, 1940, no less than 20,000 copies of a reprint of the August 26, 1940, issue of In Fact were distributed. This particular issue inveighed against the so-called Selective Service Draft Act, which was described as "conscription." Seldes opined that conscription was fascism.

The esteem in which George Seldes was held by the international pacifists, when the latter were having their field day, during two decades, is testified to by the fact that his book, Iron, Blood, and Profits, was blurbed by the peace-at-any-price Women's International League for Peace and Freedom, which, for a time, was affiliated with the Communist-conceived and controlled American League for Peace and Democracy, so roundly exposed by the Dies committee that it was finally forced to liquidate.

Seldes contributed an article to the February 1, 1940, issue of The Review, official organ of the Young Communist League of America. The article was titled "George Seldes Debunks News From Finland: Headline Hysteria." At the time world sympathies were with Finland, when it was being raped by the U. S. S. R., Seldes was one of the pro-Soviet journalists who constantly upheld the cause of the Soviet Union.

J. B. Matthews, chief investigator of the Dies committee, in his Odyssey of a Fellow Traveler, makes the following observation:

"Of course, the classic smearing campaign in which the Communists of this country have engaged is that which they have directed against their foremost journalistic critic, William Randolph Hearst. The Communists have found writers like Ferdinand Lundberg and George Seldes especially useful in this business of answering anti-Communist facts with scurrility" (pp. 250–251).

The Communist Progressive Weekly Daily Record for January 21, 1939, in an article by Seldes, entitled "Columnists: From Left to

Right," the following self-revealing quotation appears:

"A wide gulf separates Heywood Broun from Mark Sullivan, Jay Franklin from Walter Lippmann. On the left, says Mr. Seldes, is truth and progress; on the right ride the knights of reaction."

The left-wing, liberal magazine Direction, volume 3, No. 2, February 1940, was sent to every Senator and Congressman. This issue contained an article by George Seldes captioned "Why has Roosevelt surrendered?"—two paragraphs from which are quoted below:

"In 1938 the President bestrode the earth like a colossus; he had won the hearts and minds of the people, incurred the hatred of all Americans who were enemies of America, and notably big business and the publishers. Critics placed Franklin Roosevelt alongside Washington, Jefferson, and Lincoln.

"But in 1940 we behold one of the most astonishing, disgraceful, and disheartening spectacles in our history; the spectacle of cowardice, betrayal, surrender. We see the leader of the people for no apparent reason abandoning all that was making him a great man. And looking backward we find that all the signs of mistrust were right (p. 2)."

Of great significance is the fact that Seldes' book Lords of the Press was considered by the Communist Party of such propaganda importance that the party's book store stocked the book and the Daily Worker gave it much free advertising. (Daily Worker, November 25, 1938.)

His book Witch Hunt was published by Modern Age Books, Inc., 155 East Forty-fourth Street, New York City. Congressman SHAFER, of Michigan, on March 1, 1939, page 2990 of the CONGRESSIONAL RECORD, has the following to say about Modern Age books:

"Modern Age books are advertised in all Communist publications and find a wide market among the Reds in America. The official organ of the Young Communist Pioneers, the New Pioneer, contained a page advertisement of Modern Age books in its issue of May 1938. In that issue an appeal was made to the Communist International Workers' Order to obtain subscriptions to the Modern Age book service. The advertisement states that the 'Modern Age book service has become a sensation.'

"Another advertisement for Modern Age books is found in the Communist publication Soviet Russia Today, December '938. Among the books advertised are those by John Strachey, the British Red, who was recently halted at the gates of America by the Department of Labor; School of Barbarians, by Erika Mann; I Like America, by the avowed Communist, Prof. Granville Hicks; One-fifth of Mankind, by Anna Louise Strong, editor of the Moscow News, a Communist publication printed in Moscow, Russia; Japanese Terror in China; Practical Birth Control Methods; from Spanish Trenches, the Wall of Man, favoring the Spanish Red front; Labor Spy Racket; Red Feather; and Adventure in Steel."

In addition to Seldes' affiliations with left-wing organizations as already noted, the following might be added as of the same general stripe and character, veering from definite Communist control to Socialist, intellectual and the utopian-intelligentsia-do-gooding type:

Citizens Committee for Harry Bridges (June 2, 1941).

Foster Parents' Plan for War Children (April 4, 1941) (which grew out of Foster Parents' Plan for Spanish Children).

Committee to Defend America by Keeping Out of War (July 20, 1940) (Mobilize for Peace Rally).

National Emergency Committee Conference for Democratic Rights (August 1940), which later became National Federation for Constitutional Liberties.

Washington Committee for Spanish Refugee Aid (August 20, 1940), local affiliate of United American Spanish Aid Committee.

American Investors Union (May 10, 1941).

Consumers' Union of United States (1938).

International Committee for Political Prisoners (1937).

Marcus Graham (anarchist) Freedom of the Press Committee (1938).

In an article in Dan Gillmor's Communist Party-line magazine Friday (September 6, 1940) (now defunct), Seldes wrote: "No American mother is willing to have her son killed defending American oil corporations operating south of the border."

"A HIGH CRITIC OF PRESS IS VIEWED BY A CRITIC

"(James Wechsler, in Newspaper Guild publication, New York City, May 12, 1944)

"The article:

"Several years ago a refugee from the Chicago Tribune named George Seldes set himself up in business as high critic of the American press.

"He has been trading at that stand ever since, persuading innocent clubwomen and serious-minded school teachers that he is the voice of truth. Maybe he himself really believes it by now.

"While these dispatches have frequently included harsh words about American publishers, I have always read Seldes' In Fact sermons on the subject with very mixed feelings. For I suspect he is a sedative to the conscience of the newspaper barons.

"Every time a publisher broods about his own errors he must look smugly in the direction of Seldes and say to himself: 'He's dirtier than I am.' For every legitimate exposure of press corruption, Seldes had provided some sensational sham that makes the publishing fraternity feel virtuous and virginal.

"Brother Seldes invariably pictures himself as the lone independent thinker of our time, nature's noblest crusader against fraud and suppression. But the same George Seldes has been demonstrating a humbleness which matches that of any wage slave inhabiting the darkest pastures of the newspaper field. Mr. Seldes speaks (and apparently thinks) as the Communist Party, a ruthless and exacting boss, does.

"Every item in his recent career proves that point.

"I have no evidence that Brother Seldes is a dues-paying member. I have never inquired; if he isn't the party is getting more than its money's worth anyway out of his labors. Whether he is a card-carrier or 'kibitzer,' he has steadily followed the leader.

"Consider his public career. Until August 1940, Seldes was an ardent advocate of collective security. He was all for joining up and trouncing the Nazis with one big coalition of anti-Fascist forces.

"Comes the dawn.

"The Nazis sign a pact with the Soviet Union and one George Seldes, independent spirit and torch bearer for truth, discovers that he has been lying all along.

"Did somebody say that the Nazi advance menaced democracy? A British imperialist speaking.

"Did somebody suggest that the American strength should be rallied against the Nazi night riders? A warmonger, he, and to be exposed in next month's issue of George Seldes' In Fact, a Fascist plot.

"Let us then sneer at embattled Britain, expose the war plans of the Roosevelt administration, join in chanting a hymn under the guidance of Reverend Browder, called The Yanks Aren't Coming.

"Brother Seldes, valiant warrior against the imperialists fills his newsletter with exclusive revelations. In July 1940 we are given this glimpse of the future, through In Fact's reliable informants. 'By the middle of August the present European war will be ended.'

"Seldes saw no Nazi peril.

"Seldes, self-appointed critic of the American press, was really going to town denouncing conscription, exposing imperialism, faithfully reciting the line of the Nazi and domestic Communist propagandists. Seldes (with the help of Daily Worker) was telling all.

"Suddenly Seldes lost his voice. The Nazi had attacked Russia.

"Seldes was shaken but not overcome. He had worked for the Chicago Tribune; he was resilient. Exit Pacifist Seldes. Enter Warmonger Seldes.

"Had he defended Wheeler and Nye? He had given us the low-down on the plotting of the interventionists. Had he written, on July 15, 1940, that every newspaperman in Washington knows that the closest thing to a native American Fascist is Wendell Willkie?

"Good-by to all that.

"We have with us now, on June 23, 1941, a new George Seldes, valiant anti-Nazi, the man who will give us the low-down on isolationists conspiracy. Mr. Seldes had gone to war.

"Which brings us to the present.

"The courageous spirit who exposed conscription is now the lustiest voice in the chorus for national unity. He is against defeatists.

"What concerns us most is that this fabulous faker, with a record of complete and continuous devotion to the Communist Party line, is still selling his wares as objective, independent, and purer-than-snow analysis of the venal press.

"When Seldes draws an independent breath and sings a tune of his own, he deserves a hearing. Until then he is a liability of major proportions to those who favor free and independent criticism of the American press.

"A few years ago Seldes wrote a testimonial for the Daily Worker, declaring it was imperative to read that journal to get the actual information about Europe.

"Seldes can tell an independent newspaper when he sees one."

Seldes praises or condemns in accordance with the Communist Party line—having no regret for what happens to be true.

[From the Muncie Press of January 28, 1944—Comment by Wilbur E. Sutton]

"IN FACT IS FALSE

"The notorious New York radical pamphleteer, George Seldes, whose printed letter is issued every week, says it is 'an antidote for falsehood in the daily press. Its latest collection of falsehoods is a diatribe against the Muncie Press for its original publication of the now nationally famous article by 'Irish' Walsh, the Muncie seaman, which has been read by millions of Americans and favorably commented upon in letters and telegrams by thousands. Probably it is dignifying it even to mention a publication of the Seldes type, these days, but there is a trifle of humor in his calling his literary effluvia, In Fact, when it is filled with surmises and falsehoods. Not long ago it said in some kind of an attack whose subject has been forgotten that the Muncie Press was a member of the Scripps-Howard League of newspapers. The only trouble with that 'fact' was that there was not a word of truth in it, although we have high respect for the Scripps-Howard folks. In the latest effusion it seeks to make its subscribers, if any, believe that the Walsh article is the latest trick of the corrupt American press in its campaign against American labor, and that it is a Fascist plot. Wonder how 'Irish' and millions of his buddies fighting their lives out in behalf of all the rest of us react to that? Oh, well, in a real democracy such as ours, maybe it is all right to have folks named George Seldes."

A few excerpts from an editorial titled "A Statement of Fact," appearing in Collier's for November 9, 1946, may give some additional truth and fact on the Seldes side:

"Collier's, however, gets these mistaken and false accusations from fanatics on both sides of the road. George Seldes, who once was a reporter on the staff of the Chicago Tribune, gets out a weekly newsletter that he calls In Fact. This generally follows the Communist Party line.

"In a recent issue he publishes an untrue and irresponsible attack on Collier's as an agency of J. P. Morgan and Co. * * *

"There is not a single word of truth in George Seldes' attack on Collier's or the American Magazine. J. P. Morgan and Co. never directly or indirectly controlled the Crowell-Collier Publishing Co. * * *

"* * * We are not upset by George Seldes who takes the Communist line."

In listing "Books: free" in the February 10, 1947, issue of In Fact, he has the following interesting item:

"The following books are offered free to readers who obtain new subscriptions or buy subscription cards:

"ROOSEVELT BOOK FREE

"As He Saw It by Elliott Roosevelt is a Nation-wide best seller. It contains the most important disclosures of our time; it tells what happened at the meetings of F. D. R., Churchill, Chiang Kai-shek, Stalin; tells how Churchill sabotaged great war plans; a hundred inside stories. Original $3 edition. Free for six $2 subscriptions to In Fact."

EXTENSION OF REMARKS

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD and include an article published in a paper in his district.

Mr. ARNOLD asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. DAVIS of Georgia asked and was given permission to extend his remarks in the RECORD and to include a newspaper article.

Mr. BRYSON asked and was given permission to extend his remarks in the appendix of the RECORD and include an article on the petroleum shortage.

REFUNDS, ALLOWANCES, AND ANNUITIES IN CONNECTION WITH THE FOREIGN SERVICE RETIREMENT DISABILITY SYSTEM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 497)

The SPEAKER laid before the House the following message from the President of the United States, which was read by the Clerk, and, together with the accompanying papers, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

I transmit herewith a report by the Acting Secretary of State, showing all receipts and disbursements on account of refunds, allowances, and annuities for the fiscal year ended June 30, 1947, in connection with the Foreign Service retirement and disability system, as required by section 862, Foreign Service Act of 1946 (Public Law 724).

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 9, 1948.*

(Enclosure: Report concerning retirement and disability fund, Foreign Service.)

SUBSISTENCE ALLOWANCE FOR VETERANS

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 3 minutes.

The SPEAKER pro tempore. The Chair cannot entertain a request for 3 minutes at the present time, but will entertain a request for 1 minute.

Mrs. ROGERS of Massachusetts. Then, Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, according to a story that was handed to me which appeared in the Washington Star by George Beveridge, the President has come out against a small increase in the subsistence allowance for the GI's taking institutional training. As the House knows, the Senate has already passed a bill granting a small increase of $10 a month to single men and a small increase up to $105 for a married man with one child and an additional amount of $120 in the case of a married man with several children, which is little enough to grant these men. The House bill, the Meade bill, is on the calendar ready for action.

We passed the GI bill of rights giving them their training. In the first place, we provided what we thought was enough, perhaps, to help them get along, but the cost of living has gone up and $50 today does not begin to buy what it did when we originally passed the bill. I think there would be no objection—I doubt if a single Member on the floor of Congress would vote in opposition—to this legislation. The other body in its wisdom passed it last spring. These veterans have made a very fine showing in their classes; they stand very high scholastically. We should now give them an opportunity to finish their courses by giving them a little more subsistence, something to help make up for part of the time they lost through their war service. Many of these men are having to drop out because they cannot exist on the meager amounts they receive.

The SPEAKER pro tempore. The time of the gentlewoman from Massachusetts has expired.

EXTENSION OF REMARKS

Mr. KNUTSON asked and was given permission to extend his remarks in the RECORD and include a table showing comparative tax rates as between the United States and Canada.

STATUTE OF LIMITATIONS FOR RECOVERY OF UNDERCHARGES OR OVERCHARGES BY OR AGAINST CERTAIN COMMON CARRIERS

Mr. HARNESS of Indiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 422 making in order the consideration of the bill H. R. 2759, and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 2759) to amend the Interstate Commerce Act, as amended, so as to provide limitations on the time within which actions may be brought for the recovery of undercharges and overcharges by or against common carriers by motor vehicle, common carriers by water, and freight forwarders. That after general debate, which shall be confined to the bill and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment, the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. HARNESS of Indiana. Mr. Speaker, this resolution makes in order H. R. 2759 reported by the Interstate and Foreign Commerce Committee. This bill amends the Interstate Commerce Act to provide a 2-year limitation within which actions may be brought against common carriers by motor vehicle, common carriers by water, and freight forwarders, and other common carriers for the recovery of undercharges and overcharges. At present there is no uniform statute of limitations on actions brought by or against common carriers by motor vehicle or freight forwarders or other common carriers to recover alleged overcharges by common carriers. The statute of limitations of the individual States are applicable, and this results in a great deal of confusion.

I understand the bill was reported unanimously by the Committee on Interstate and Foreign Commerce and that there is little if any objection from any quarter.

Mr. Speaker, there being no further requests for time on the rule I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

Mr. WOLVERTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2759) to amend the Interstate Commerce Act, as amended, so as to provide limitations on the time within which actions may be brought for the recovery of undercharges and overcharges by or against common carriers by motor vehicle, common carriers by water, and freight forwarders.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 2759, with Mr. GRAHAM in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. WOLVERTON. Mr. Chairman, the legislation which is now before us for consideration, H. R. 2759, was unanimously reported by the Committee on Interstate and Foreign Commerce after hearings had been held. This bill also has the approval of the Interstate Com-

merce Commission, likewise the shippers' organizations and the different carriers which will be affected by passage of the legislation.

The purpose of the bill now under consideration is to amend the Interstate Commerce Act, as amended, so as to provide limitations on the time within which actions may be brought for the recovery of undercharges and overcharges by or against common carriers by motor vehicle, common carriers by water, and freight forwarders.

The time within which such actions may be brought under the provisions of the pending bill is 2 years. This is the same time within which similar actions may be brought against common carriers by rail under Part I of the Interstate Commerce Act. Thus, uniformity of time is provided by the amendment of Parts II, III, and IV of the Interstate Commerce Act as contemplated by this pending legislation. This is highly desirable. There is no essential difference in the character of service rendered by railroads, motor vehicles, water carriers, and freight forwarders that would make plausible or necessary any difference of time limit within which actions for undercharges or overcharges could be brought by or against them.

In the absence of any action by Congress in fixing a time limit for the bringing of suits of this character, then the time limit fixed by statutes in the several States prevails. The result is one of great confusion and uncertainty as to the time within which such actions shall be brought. This period of time in different States varies from 2 years in some to as high as 10 and 15 years in others. Furthermore, uncertainty and confusion also results from a difference of opinion as to the statute of which particular State will apply; that is, as to whether a statute in which the shipment originates applies, or whether a statute of the State in which the shipment terminates applies.

In testifying before the Committee on Interstate and Foreign Commerce, F. F. Estes, vice chairman of the legislative committee of the National Industrial Traffic League, expressed the favorable opinion of that organization toward the legislation now under consideration. In fact, he said:

> The National Industrial Traffic League, as its name implies, is a national organization of shippers and receivers of freight, embracing in its membership individual shippers and representatives of shippers, such as various types of associations, chambers of commerce, and so forth, which shippers utilize each and all of the various transportation agencies, including the railways, motor carriers, water carriers, and freight forwarders.
>
> The National Industrial Traffic League long ago went on record officially by a vote of its members in annual meeting in favor of a uniform statutory period of limitation covering overcharges, undercharges, and reparations for all four parts of the Interstate Commerce Act; and that position has been reaffirmed at each annual meeting of the league, including that held in New York City in November 1946 which was attended by over 659 members.
>
> In our opinion, no justifiable reason can be advanced for any inconsistency in such statutory period as between the various types of carriers, and it is the considered judgment of the league that this statutory period should be established as 2 years, as now provided in section 16, part I, of the Interstate Commerce Act, with respect to shipments via rail carriers.
>
> The reasons why the league favors this remedial legislation, while not numerous, are most important and of far-reaching effect on shippers and receivers of freight. For example, in the absence of a definite provision in the Interstate Commerce Act for a statutory period with respect to, let us say, motor carriers, it is not uncommon for a shipper of freight via a motor carrier to be confronted with a bill for undercharges some 3 or 4 years, or even longer, after the shipment is made, depending upon the State laws covering the particular shipment, because in the absence of any Federal statutory period the State laws, of course, apply.
>
> This means that a shipper under such conditions is required for his own insurance to maintain shipping records far beyond any reasonable periods of time and after the transaction has long been forgotten and even after the parties who were involved in the transaction may have gone out of business.
>
> Further to complicate the situation, there is wide difference in the statutory period in the various States, varying all the way from 2 to 10 years. There frequently is difference of opinion as to the statute of which particular State will apply; that is, as to whether a statute of the State in which the shipment originates applies, or whether a statute of the State in which the shipment terminates applies.
>
> It is, of course, true that a statutory period, whether it be federally prescribed or a State statute, applies with similar force with respect to overcharges as well as to undercharges. However, we have had long experience insofar as the rail carriers are concerned, with respect to the 2-year statutory period provided for in part I of the act, and it has operated most satisfactorily both so far as the railroads and the shippers are concerned.
>
> We believe that your committee and the Congress will agree with our position that a shipper using more than one type of transportation agency or different shippers using different types of transportation agencies should enjoy the same and a uniform statutory period in which to file claims; and at the same time the respective transportation agencies which they use should enjoy the same statutory period to file their claims for undercharges. Particularly is that true where the governmental agency administering the Federal regulatory statutes is the same, namely, the Interstate Commerce Commission.

For many years the Interstate Commerce Act has contained provisions prescribing periods of limitation for the bringing of such actions by or against railroads, express companies, sleeping-car companies, and pipe lines. Those are the carriers which are now covered by part I of the act. Similar provisions are contained in part III of the act, which covers water carriers, but the periods of limitation differ from those prescribed in part I. Part II of the act, which covers motor carriers, and part IV, which covers freight forwarders, contain no limitation provisions at all.

This bill makes no change whatever in the present law as it applies to railroads, express companies, sleeping-car companies, and pipe lines. All it does is to change the limitation periods already prescribed in part III to conform to those prescribed in part I and to incorporate into parts II and IV limitation provisions similar to those already contained in part I.

The desirability of uniformity in such limitation periods as they relate to all types of carriers covered by the act is quite generally recognized. The bill has the approval of shippers generally and of the Interstate Commerce Commission. In fact, the bill as reported by the committee seemed to be so free from controversy that it was originally brought up on the Consent Calendar. When it came up on the Consent Calendar at the last session, question was raised whether the limitation periods which it prescribes would or would not apply to actions of the sort to which they relate when such actions are brought by the United States.

I think it clear that the limitations for which the bill provides would apply to the United States as a shipper, just as to any other shippers. The Interstate Commerce Commission so held 25 years ago with respect to similar provisions then in the act—*United States* v. *Director General* (80 I. C. C. 143). The Government did not seek review of that decision by the courts, and it has stood all these years without challenge in the Congress. I think, too, that there is every reason why these limitations should apply to the United States the same as to any other shipper.

The Interstate Commerce Commission has expressed the same view in the letter to the committee, from which I quote one paragraph:

> Manifestly it would not be desirable merely to exempt the Government without fixing some period of limitations, for under our regulations the records of the carriers may be destroyed after a prescribed period, and relevant evidence may, of course, become unavailable because of the death of witnesses and other causes. We see no reason for allowing the Government more time for presentation of its claims than is granted to other shippers.

The purpose of the limitations is to relieve both carriers and shippers of the intolerable uncertainties that they would face if constantly confronted with possible liability under undisclosed claims running back over long periods of years and involving sums of money which cannot be calculated or estimated. This purpose would be to a large extent, defeated if an exception were made with respect to the Government which is one of the largest shippers in the country. Certainly ordinary justice demands that carrier and shipper alike be protected from stale claims long undisclosed because of the failure of the claimant to exercise reasonable diligence. In a commercial transaction, such as transportation for hire, there is no conceivable ground for distinction between the Government as a shipper and any other shipper, so far as concerns a reasonable limitation of the time within which a claim should be asserted.

Speaking of limitations of the character provided in this bill, the Supreme Court has said that they "are vital to the welfare of society"; that "they promote repose by giving security and stability to human affairs"; that "an important public policy lies at their foundation"—*Wood* v. *Carpenter* (101 U. S. 135, 139).

The promotion of security and stability of the kind to which the court referred is

of the greatest importance in the field of transportation. It is essential that carriers be able to determine, with a reasonable measure of accuracy, their financial condition at any given time. It is of the utmost importance that they have information concerning their resources and liabilities. Otherwise they cannot be in a position to program expenditures for maintenance, improvements, and so forth, or to make decisions with respect to their rates and charges. The Interstate Commerce Commission would likewise be handicapped in the exercise of its rate-making power, and the other powers which have been confided to it, by a situation which would make it possible to recover from carriers large sums of money on old claims concerning which there had been no notice or warning of any kind. Thus I believe it can be said that the failure to provide a period of limitation for claims by such a large shipper as the Government would result in a situation of uncertainty which would adversely affect the national transportation policy as declared by Congress in the Interstate Commerce Act.

The bill should be passed in the form reported by the committee.

In conclusion I wish to bring to the attention of the membership that the proposed legislation was suggested by, and has the approval of, the Interstate Commerce Commission, and likewise all organizations of shippers and the carriers affected. I trust that the bill will be given your unanimous approval.

Mr. PRIEST. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, this bill has been very adequately explained by the chairman of the committee. It simply makes all sections of the Interstate Commerce Act conform with respect to the time limitation for the filing of actions for overcharges and undercharges. It has the support of the Commission and all witnesses representing the various interests that appeared before the committee. It has a unanimous report from the Committee on Interstate and Foreign Commerce. I hope the bill will be approved.

Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. CELLER].

Mr. CELLER. Mr. Chairman, what I have to say may not be entirely germane to the bill but has to do with the subject of transportation, which is the ultimate object of the current bill. I refer to the Floyd Bennett Field, which is in my district of Brooklyn. We have had many catastrophes at LaGuardia Airport in the borough of Queens, New York City, which is the New York City airport. Those catastrophes have been due to the overcrowded conditions at LaGuardia Airport. It is essential for safety of New York civilian air transportation that we have an additional airport. The Navy controls Floyd Bennett Field. The city of New York made an earnest request of the Navy to have transferred to the city of New York's jurisdiction three-fourths of Floyd Bennett Field, leaving one-fourth of the field for Navy installations. Negotiations were in process when the city turned over its jurisdiction to the Port of New York Authority, which continued the negotiations, but the Navy asked an extortionate amount of money for leasing portions of the Floyd Bennett Airport to the Port of New York Authority. As has been stated, the Navy asked a gold-plated rental—a rental all out of proportion to the value of the subject of the lease.

The situation at LaGuardia Airport is deteriorating daily. We are very much concerned that there may be a terrible tragedy there because of the congested conditions. The attitude of the Navy Department, to my mind, is unfair. It contains elements of obstruction and obstinacy. There is an officers' club at Floyd Bennett Field, and some of the officers may be reluctant to give up their privileges at that field. I say the officers can drink their cocktails elsewhere. Whisky is just as potent in a parlor or in a woodshed. I hope some wisdom will descend upon the appropriate officials of the Navy Department to the end that there may be consummated a lease between the Port of New York Authority and the Navy Department concerning Floyd Bennett Field, so that the conditions that now obtain at the LaGuardia Airport may be alleviated. I hope Mr. Sullivan, head of the Navy Department, will see that light and force upon his recalcitrant subordinates an agreement with the Port of New York Authority as a fair rental for the facilities at Floyd Bennett Field.

Mr. WOLVERTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Iowa [Mr. DOLLIVER].

Mr. DOLLIVER. Mr. Chairman, I desire to allude to only one feature of this bill which I believe should be further emphasized in order that the House and the committee may know the real background of the legislation.

At the present time there is in the interstate commerce law a similar statute of limitations with regard to overcharges and undercharges by rail common carriers. That limitation is a 2-year period. The common carriers by methods other than rail are controlled as to the statute of limitations on overcharges and undercharges by the statutes of the various States. No two of the statutes of the 48 States are identical. The statutes of limitations in Iowa are different from those of New York and those in Oklahoma are different from those in Tennessee. That is the situation that exists clear across the country.

One of the major purposes of this bill is to end that confusion. As is stated in the report, at present in the case of actions of this character brought by or against common carriers by motor vehicles or freight forwarders, these periods of limitations provided under the State laws are applicable.

This results in confusion because of the great variety in the periods provided under the laws of the various States. The purpose of the pending bill is to bring order out of this confusion. It makes the limitation statute uniform all over the country and uniform as to the various types of common carriers.

Mr. PRIEST. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Chairman, I asked for this time to propound a few questions to the chairman of the committee and the ranking minority member of the committee who is in charge of the bill on the minority side. We all know of the acute emergency situation existing with relation to fuel oil and kerosene and the condition in general along the east coast and certain parts of the interior. We know that the committee of which the distinguished gentleman from New Jersey is chairman has been looking into this very thoroughly. I wonder if the gentleman has any information with reference to that which he can give to the House concerning the study that his committee has made and whether or not there is any likelihood of action being taken in the near future, which action would have to be taken by the gentleman's committee.

Mr. WOLVERTON. In reply to the question of the distinguished gentleman from Massachusetts who has been interested in this subject over a long period of time, I wish to say that as he has indicated, the committee has given considerable time in hearings to a study of this important subject. The committee has had before it some of the outstanding individuals in this country who we think know most about the situation and who could probably be most helpful in proposing a remedy. During the recess of the Congress, this study was further carried on by our staff of the Committee on Interstate and Foreign Commerce to the end that some results might be achieved instead of merely having an expression of opinions and high hopes. I am happy to report that in some particulars this has been accomplished. On Thursday of this week there will gather in the Department of the Interior the coordinators of the several States. There will probably be some 30 of them who will be present representing the States where this problem of an inadequate fuel supply is most acute. A program has been worked out whereby we anticipate that through these agencies of State governments cooperating with the Federal Government officials, as well as representatives of the industry, much of the difficulties which now exist will be eliminated, or at least some material relief obtained, if not complete relief.

Mr. MCCORMACK. As I understand it, the question is a serious one, and we can anticipate that the demand will be greater than the supply during this winter as well as the next winter.

Mr. WOLVERTON. I am fearful that that will be true.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. MCCORMACK] has expired.

Mr. PRIEST. Mr. Chairman, I yield the gentleman three additional minutes.

Mr. MCCORMACK. And this meeting, in connection with the supply available, is to direct itself to the question of the efficiency of transportation, and within the State, the effectiveness of the allocation within.

Mr. WOLVERTON. The question of transportation is equally important with the question of supply. It has been the cause in no small part in producing the unfortunate situation that confronts so many of our districts throughout the country. The question of supply to meet

the unusual demand, together with more efficient use of our transportation facilities, will be subjects of consideration on Thursday next at the meeting called by the Department of the Interior, and is the method which is being pursued by Federal and State officials to get the relief that is sought by stricken areas.

Mr. McCORMACK. Has the gentleman's committee looked into the question of whether or not legislation is necessary to authorize some Federal agency—for example, the Maritime Commission—to direct American companies who have purchased tankers from the Government through the Maritime Commission to use those tankers to transport fuel oil or kerosene to certain sections of the country where emergency within the emergency may exist?

Mr. WOLVERTON. The committee has given very careful consideration to that phase of the problem. During the recess additional attention was given to it by our committee staff. We have sought to obtain all the available information with respect to the number of tankers in use in foreign trade as well as in domestic trade, and also to ascertain how many of the tankers could be transferred to routes that would relieve those areas of our country that are particularly distressed at this time. We have been promised the cooperation of not only the agencies of Government but also companies that control or own the tankers that would be utilized in such a service. We are hopeful that it will produce the result which the gentleman and others are so anxious to attain.

Mr. McCORMACK. My interest is wherever the emergency exists, as well as in our particular section.

Mr. WOLVERTON. I realize that.

Mr. McCORMACK. So that the committee has under consideration the giving of authority at least in relation to those tankers that the Government owned and sold, to some agency having the power during a limited time, to issue directions, if necessary?

Mr. WOLVERTON. Unfortunately, there is much that could have been done in June last, for instance, that cannot be done now. It was very unfortunate that this situation was not revealed at an earlier date. I think somebody is at fault in not having known the possibility of the situation that now confronts us and taken means to prevent it from creeping up upon us as it has. I assure the gentleman from Massachusetts and all others in the House that your Committee on Interstate and Foreign Commerce will do everything possible to relieve the situation.

The CHAIRMAN. The time of the gentleman from Massachusetts has again expired.

Mr. WOLVERTON. Mr. Chairman, there is no further application for time on this side. If the gentleman from Tennessee [Mr. PRIEST] has no requests for time, the Clerk may read.

Mr. PRIEST. I have no requests for time, Mr. Chairman.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That part II of the Interstate Commerce Act, as amended, is amended by inserting after section 204 thereof a new section as follows:

"SEC. 204a. (1) All actions at law by common carriers by motor vehicles subject to this part for the recovery of their charges, or any part thereof, shall be begun within 2 years from the time the cause of action accrues, and not after.

"(2) For recovery of overcharges, action at law shall be begun against common carriers by motor vehicle subject to this part within 2 years from the time the cause of action accrues, and not after, subject to paragraph (3) of this section, except that if claim for the overcharge has been presented in writing to the carrier within the 2-year period of limitation said period shall be extended to include 6 months from the time notice in writing is given by the carrier to the claimant of disallowance of the claim, or any part or parts thereof, specified in the notice.

"(3) If on or before expiration of the 2-year period of limitation in paragraph (2) a common carrier by motor vehicle subject to this part begins action under paragraph (1) for recovery of charges in respect of the same transportation service, or, without beginning action, collects charges in respect of that service, said period of limitation shall be extended to include 90 days from the time such action is begun or such charges are collected by the carrier.

"(4) The cause of action in respect of a shipment of property shall, for the purposes of this section, be deemed to accrue upon delivery or tender of delivery thereof by the carrier, and not after.

"(5) The term 'overcharges' as used in this section shall be deemed to mean charges for transportation services in excess of those applicable thereto under the tariffs lawfully on file with the Commission.

"(6) The provisions of this section shall apply only to cases in which the cause of action may accrue after the date of the enactment of this section."

SEC. 2. Subsection (a) of section 308 of the Interstate Commerce Act, as amended, is hereby amended to read as follows:

"(a) For the purposes of this section the term 'carrier' means a common carrier by water."

SEC. 3. (a) Subsection (f) (1) of section 308 of the Interstate Commerce Act, as amended, is hereby amended to read as follows:

"(1) (A) All actions at law by carriers subject to this part for the recovery of their charges, or any part thereof, shall be begun within 2 years from the time the cause of action accrues, and not after.

"(B) All complaints against carriers for the recovery of damages not based on overcharges shall be filed with the Commission within 2 years from the time the cause of action accrues, and not after, subject to subdivision (D).

"(C) For the recovery of overcharges action at law shall be begun or complaint filed with the Commission against carriers subject to this part within 2 years from the time the cause of action accrues, and not after, subject to subdivision (D), except that if claim for the overcharge has been presented in writing to the carrier within the 2-year period of limitation said period shall be extended to include 6 months from the time notice in writing is given by the carrier to the claimant of disallowance of the claim, or any part or parts thereof, specified in the notice.

"(D) If on or before expiration of the 2-year period of limitation in subdivision (B) or the 2-year period of limitation in subdivision (C) a carrier subject to this part begins action under subdivision (A) for recovery of charges in respect of the same transportation service, or, without beginning action, collects charges in respect of that service, said period of limitation shall be extended to include 90 days from the time such action is begun or such charges are collected by the carrier."

(b) The amendments made by subsection (a) of this section shall apply only to cases in which the cause of action may accrue after the date of the enactment of this act.

SEC. 4. Paragraph (5) of subsection (f) of section 308 of the Interstate Commerce Act, as amended, is hereby repealed.

SEC. 5. Title IV of the Interstate Commerce Act, as amended, is hereby amended by inserting after section 406 thereof a new section, as follows:

"SEC. 406. (1) All actions at law by freight forwarders subject to this part for the recovery of their charges, or any part thereof, shall be begun within 2 years from the time the cause of action accrues, and not after.

"(2) For recovery of overcharges action at law shall be begun against freight forwarders subject to this part within 2 years from the time the cause of action accrues, and not after, subject to paragraph (3) of this section, except that if claim for the overcharge has been presented in writing to the freight forwarder within the 2-year period of limitation said period shall be extended to include 6 months from the time notice in writing is given by the freight forwarder to the claimant of disallowance of the claim, or any part or parts thereof, specified in the notice.

"(3) If on or before expiration of the 2-year period of limitation in paragraph (2) a freight forwarder subject to this part begins action under paragraph (1) for recovery of charges in respect of the same service, or, without beginning action, collects charges in respect of that service, said period of limitation shall be extended to include 90 days from the time such action is begun or such charges are collected by the freight forwarder.

"(4) The cause of action in respect of a shipment of property shall, for the purposes of this section, be deemed to accrue upon delivery or tender of delivery thereof by the freight forwarder, and not after.

"(5) The term 'overcharges' as used in this section shall be deemed to mean charges for service in excess of those applicable thereto under the tariffs lawfully on file with the Commission.

"(6) The provisions of this section shall apply only to cases in which the cause of action may accrue after the date of the enactment of this section."

With the following committee amendments:

Page 1, line 7, strike out the word "vehicles" and insert in lieu thereof the word "vehicle."

Page 5, line 3, strike out "406" and insert "406a)."

The committee amendments were agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore having resumed the chair, Mr. GRAHAM, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 2759) to provide limitations of time for recovery of undercharges or overcharges by or against certain common carriers, pursuant to House Resolution 422, he reported the same back to the House with sundry amendments agreed to in the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDMENT TO THE FEDERAL FOOD, DRUG, AND COSMETIC ACT

Mr. HARNESS of Indiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 423, making in order the bill H. R. 4071.

The Clerk read as follows:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 4071) to amend sections 301 (k) and 304 (a) of the Federal Food, Drug, and Cosmetic Act, as amended. That after general debate, which shall be confined to the bill and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Indiana is recognized for 1 hour.

Mr. HARNESS of Indiana. Mr. Speaker, I yield 30 minutes to the gentleman from Georgia [Mr. Cox] and yield myself such time as I may use.

The SPEAKER pro tempore. The gentleman from Indiana is recognized.

Mr. HARNESS of Indiana. Mr. Speaker, the bill H. R. 4071, reported by the Committee on Interstate and Foreign Commerce, amends sections 301 (k) and 304 (a) of the Federal Food, Drug, and Cosmetic Act. The proposed amendments are necessary to permit Government seizure of contaminated food and drugs in interstate commerce, and thereby protect the consuming public from a possible menace to health.

Under the original Food and Drug Act of 1906, the Government was empowered to seize and condemn foods and drugs that became adulterated or misbranded after interstate movement had ceased if they remained unloaded, unsold, or in original unbroken packages. The provision proved most successful in protecting the public health and safety. But the language in the 1906 bill was thought to confer powers of seizure which were too broad, and when the act was revised in 1938 language was inserted to guarantee against unreasonable and arbitrary exercise of this authority to seize and condemn interstate shipments.

The language of the 1938 bill limited to a single interstate shipment seizure action on misbrandings that were not genuinely serious and that had not been the subject of a prior court decision in favor of the United States.

Even this restricted language continued to be effective until 1946 when the Circuit Court of Appeals for the Ninth Circuit held that the present terms of the law did not authorize seizure and condemnation of food which became contaminated while stored in a warehouse where it was placed after its interstate journey. Since this court decision the Government has been handicapped in its enforcement of the Food and Drug Act.

It was testified before the Rules Committee by members of the Committee on Interstate and Foreign Commerce that for a period of some 40 years the Government had exercised the authority which this act would give them. That is, that it had the right to seize contaminated food in protection of the public interest and the public health. But because of this court decision the hands of the enforcing officials of the Food and Drug Administration of the Department of Agriculture were tied so that they cannot now protect the public interest and the health of the people.

The rule which we have before us making this bill in order is an open rule providing for 1 hour general debate. As far as I know, there is no opposition either to the rule or to the bill itself.

Mr. COX. Mr. Speaker, the presentation which the gentleman from Indiana has just made is fair. This was the testimony given to the Rules Committee by members of the Committee on Interstate and Foreign Commerce, which committee was unanimous in reporting the bill. It seems to be desirable legislation.

Mr. HARNESS of Indiana. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. WOLVERTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 4071) to amend sections 301 (k) and 304 (a) of the Federal Food, Drug, and Cosmetic Act, as amended.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 4071, with Mr. RIZLEY in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. WOLVERTON. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, as has already been stated by the gentleman from Indiana [Mr. HARNESS] and by the gentleman from Georgia [Mr. Cox] this legislation comes before the House with the unanimous report and approval of the Committee on Interstate and Foreign Commerce after hearings had been held.

Mr. Chairman, the bill H. R. 4071 is a very simple one. It is designed to amend the Federal Food, Drug, and Cosmetic Act in two respects. First, section 304 (a) which gives the Food and Drug Administration authority to seize adulterated or misbranded goods. The section now authorizes such seizure when the articles are introduced into interstate commerce, while being in interstate commerce and while held for sale. The bill proposes to clarify the words "while held for sale." This clarification is necessary in view of a recent decision of the Circuit Court of Appeals for the Ninth Circuit, in United States against Phelps-Dodge Mercantile Co. Certiorari was denied by the Supreme Court in that case. The circuit court of appeals held that under the terms of the present law the Government was not authorized to seize and condemn a food which became contaminated while stored in a warehouse where it was placed after completion of its interstate journey. The bill, therefore, contemplates making clear that the Government has such power by inserting after the words "while held for sale" the following: "(whether or not the first sale) after shipment in interstate commerce."

The legislative history of the 1938 act which supplanted that of 1906 makes it clear that Congress intended to extend the protection of the law to consumers in cases of adulteration and misbranding, regardless of whether the forbidden act occurred before the article was sent on its interstate journey, while it was in transit, or upon completion of its interstate journey when it was placed in a warehouse waiting for sale.

The testimony presented showed that some 20 percent of the seizures of adulterated and misbranded foods instituted during recent years involved cases where the adulteration clearly resulted from insanitary conditions or other causes during storage after interstate shipment. In a great many other cases, it would have been impossible to prove that contamination or deterioration occurred before the interstate journey ended. The great bulk of the commodities involved in this problem are those which become contaminated by rodents, insects, and other vermin.

The second amendment concerns section 301 (k). This section prohibits the doing of any act with respect to any food, drug, or cosmetic while held for sale after shipment in interstate commerce, if such act results in the article being misbranded. Here, again, a recent court case, Jordan J. Sullivan against United States, makes a clarification of the statute desirable. The question in that case was whether the statute was limited to the first sale after shipment in interstate commerce. The bill would resolve the doubt by adding the words "(whether or not the first sale)."

In addition, the bill would extend this subsection by making it applicable to adulteration as well as misbranding, thus making the section coextensive with the seizure section, section 304 (a), which I mentioned before. Both amendments are designed to protect consumers against adulterated and misbranded products. Without these amendments, serious enforcement problems are presented. The national grocery and pharmaceutical organizations are supporting the bill because it protects their nationally advertised and distributed products against adulteration and misbranding while awaiting sale.

It should also be emphasized that the State food and drug officials, at their fifty-first annual conference at Carls-

bad, N. Mex., in June of 1947, adopted a resolution supporting in every way the present bill. The resolution reads as follows:

In the matter of H. R. 3128 and 3147 and S. 1190 now pending before the Congress:

Whereas recent decisions by the Federal courts have seriously restricted the applicability of the Federal Food, Drug, and Cosmetic Act, to interstate shipments of foods, drugs, cosmetics, and therapeutic devices that become adulterated or misbranded after the completion of their interstate transportation, thus drastically curtailing the public protection heretofore afforded under the Federal act; and

Whereas the States and local authorities have, by common understanding, come to rely in great measure upon the Food and Drug Administration for the inspection and supervision of interstate shipments of foods, drugs, cosmetics, and devices to insure that, from these sources, only products that are free from adulteration and misbranding are delivered to consumers, thus permitting the assignment of the inspectional staffs of State and local agencies to problems more particularly concerned with the commerce of the States; and

Whereas the activities of the Food and Drug Administration in connection with such goods have been very effective against products which have become contaminated with filth, or otherwise adulterated or misbranded at destination; and

Whereas the Food and Drug Administration has successfully maintained a program of surveillance over commodities falling within this category without friction or conflict with State law-enforcement agencies exercising like functions with respect to products in the commerce of the State; and

Whereas the funds and facilities of State and local agencies are generally inadequate to afford satisfactory consumer protection from abuses which occur in this field unless their efforts can be supplemented by enforcement activities under the Federal act; and

Whereas it has long been the policy and practice of the various State and local agencies and the Food and Drug Administration to plan their respective programs so that the regulatory activities of each will harmonize with and supplement the operations of the other, through the pooling of resources for concerted action where conditions require, or the planning for careful division of work so that personnel can be deployed for maximum coverage to give the consuming public and responsible industry the greatest degree of protection possible within their respective and concurrent jurisdictions: Be it therefore

Resolved, That the Association of Food and Drug Officials of the United States in Annual Conference assembled in Carlsbad, N. Mex., express its firm belief in the soundness of the proposal to amend section 304 of the Federal Food, Drug, and Cosmetic Act so as to extend the jurisdiction of the act to products shipped interstate which may become adulterated or misbranded after the interstate transportation has been completed; and that such jurisdiction be extended to the limit of the constitutional authority of the Congress so as to include not only the first sale but subsequent sales as a means of consumer protection and to prevent undue burdens on legitimate interstate commerce; and be it further

Resolved, That it is the belief of this association that the provisions of section 301 (k) should be extended to prohibit acts which result in adulteration as well as misbranding and should be so framed as to be coextensive in all respects with the amended seizure provisions of the Food, Drug, and Cosmetic Act as above proposed: Be it further

Resolved, That a copy of this resolution be forwarded by air mail to Hon. CHARLES A. WOLVERTON, chairman, Committee on Interstate and Foreign Commerce, House of Representatives; to Hon. ROBERT HALE, chairman, subcommittee of the House; and to Hon. WALLACE H. WHITE, JR., chairman, Committee on Interstate and Foreign Commerce, United States Senate.

The Congress has time and again given expression to its interest in enacting laws that will adequately protect the consuming public against improper food, drugs, and cosmetics. This bill seeks to do that. It is necessary because of the unexpected decisions already referred to. I ask for the unanimous approval of this bill by the House so that there may be no doubt as to the desire of the House to provide adequate and effectual means of protecting the public against impurity of food, drugs, and cosmetics.

Mr. PRIEST. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I believe the purpose of this legislation has been well emphasized and the need of it fully explained by the chairman of the committee. It has a unanimous report. I believe the bill is in the public interest and hope that the House will support the committee.

Mr. WOLVERTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Maine [Mr. HALE].

Mr. HALE. Mr. Chairman, the gentleman from Indiana [Mr. HARNESS] and the distinguished chairman of the Committee on Interstate and Foreign Commerce, the gentleman from New Jersey [Mr. WOLVERTON], have already given you an explanation of this legislation, and I presume no further remarks from me are necessary. But, as I had the distinction of being the chairman of the subcommittee before which this bill was heard, I would like to make a few comments of my own.

The bill makes two amendments to the Federal Food, Drug, and Cosmetic Act of 1938. It amends, in the first place, section 301 (k) of the present law, which is enforceable by criminal and injunction proceedings, and prohibits the doing of any act with respect to an article of food, drug, device, or cosmetic, while it is held for sale after shipment in interstate commerce. The bill adds the words "(whether or not the first sale)."

Under the decision on May 12 last of the Circuit Court of Appeals for the Fifth Circuit, in Sullivan against the United States, the court restricted the power of the Federal authorities to seize contaminated, misbranded, and so on, drugs, to the time of the first sale after shipment in interstate commerce. Under this bill the Federal authorities could seize contaminated goods until they came into the hands of the ultimate consumer.

Similarly this bill, H. R. 4071, amends section 304 (a) of the Federal Food, Drug, and Cosmetic Act which now authorizes, among other things, seizure and condemnation of any article of food, drug, device, or cosmetic that is adulterated or misbranded when introduced into or "while in interstate commerce." Section 2 of the bill amends this provision by inserting after the words "while in interstate commerce" the words "or while held for sale (whether or not the first sale) after shipment in interstate commerce."

This language is also, apparently, necessitated by the decision of the Circuit Court of Appeals for the Ninth Circuit in the so-called Phelps-Dodge case referred to on page 2 of the report— *United States* v. *Phelps Dodge Mercantile Company* (1946, 157 Fed. 2d, 453, certiorari denied (67 S. Ct. 675)).

The report on this bill is, in my opinion, an admirable document. It has been prepared with great care. I am at liberty to say this because I had nothing whatever to do with its preparation.

The point of these amendments is that they greatly facilitate the enforcement of this legislation by the Federal authorities, as to which the courts have rendered what we believe to have been unduly narrow and restrictive decisions.

As the distinguished chairman of our committee has pointed out, there is no opposition to the bill. As a matter of fact, it was on the Consent Calendar last spring but was challenged, I think entirely due to the fact that it was a little complicated and probably not fully understood, when it came up on the Consent Calendar. The bill is cordially received by the trade. See in this connection an article in the Food, Drug, Cosmetic Law Quarterly for September 1947. I think the bill should receive the unanimous vote of the House.

Mr. WOLVERTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Connecticut [Mr. MILLER].

Mr. MILLER of Connecticut. Mr. Chairman, the bill now before us—H. R. 4071—makes two amendments to the Federal Food, Drug, and Cosmetic Act which are vitally important to continued effective operation of that act.

Section 301 (k) of the present law prohibits the doing of any act with respect to an article of food, drug, device, or cosmetic, while it is held for sale after shipment in interstate commerce, if such act results in the article being misbranded. The first section of H. R. 4071 amends the subsection by inserting "(whether or not the first sale)" after the words quoted above, so as to make it clear that the subsection is not limited to the case where the act occurs while the article is held for first sale after interstate shipment. This section also extends the coverage of the subsection to acts which results in adulteration as well as to those resulting in misbranding.

Section 304 (a) now authorizes, among other things, seizure and condemnation of any article of food, drug, device, or cosmetic that is adulterated or misbranded when introduced into or while in interstate commerce. Section 2 of the bill amends this provision by inserting after the words "while in interstate commerce" the words "or while held for sale (whether or not the first sale) after shipment in interstate commerce." The language added, except for the parenthetical expression, is identical with language now contained in section 301 (k).

The necessity for the amendment to section 304 (a) of the act arises from a Circuit Court decision in the so-called Phelps-Dodge case which case the Supreme Court refused to review. The decision in the Sullivan case makes necessary the amendment to section 301 (k). These decisions will be discussed by

other members of the subcommittee to which this bill was referred.

The Phelps-Dodge decision brought to an end an important protective public service that has been carried out for 40 years under the present law and the original Food and Drug Act of 1906.

The hearings on the subject matter of this legislation were held during the last session on H. R. 3128 and H. R. 3147. Those bills proposed to amend only section 304 (a). It was after the introduction of those bills that the decision in the so-called Sullivan case was rendered. As a result of that decision and discussion during the hearings, your committee decided on the advisability of introducing the bill here reported amending both sections 301 (k) and 304 (a).

The testimony before the committee, including testimony of representatives of the food and drug industry, was overwhelmingly in favor of the legislation on which the hearings were held. We feel satisfied that there will be no substantial opposition to the further changes made by the bill now before us.

The enactment of the proposed amendments will not have the effect of excluding State authority. The Federal Food and Drug Administration has worked cooperatively with the several States and these amendments should not disturb that excellent relationship. The Federal Food and Drug Administration presents us with an excellent example of the good results that can flow from proper cooperation between Federal and State agencies working in the same field of endeavor. They should be commended.

These proposed amendments were approved unanimously on June 20, 1947, by the Association of Food and Drug Officials, primarily made up of State and city enforcement officers, in its annual conference attended by representatives of 32 State-enforcement organizations.

The amendments are also strongly supported by the Grocery Manufacturers of America, Inc., and the American Pharmaceutical Manufacturers' Association.

During the hearings the committee did receive a letter from the Indiana Canners Association, Inc., signed by A. F. Dreyer, secretary, in opposition to the proposed amendments. This association does, however, recommend certain other amendments to the Pure Food, Drug, and Cosmetic Act. As an indication of the attitude of this association toward the problems of public health I wish to read just one sentence from their recommended amendments. They suggest:

> The law be amended so as to prohibit the destruction of food which is admittedly fit for food, and prohibit the condemnation of food which is fit and suitable to feed to inmates of charitable institutions.

To the everlasting credit of those who administer our Pure Food and Drug Act, let me remind you that this agency adheres to but one standard of inspection and that standard applies equally to those who buy expensive foods and those who must eat the food served to inmates of charitable institutions. Food is fit for all human consumption or it is not fit for any.

I will not discuss the constitutional questions raised during the consideration of these amendments. Suffice for me to say that I am confident that the Congress wishes to go as far as constitutionally permissible in protecting the American consumer. There is certainly ample authoritative precedent for these amendments, both within and without the Pure Food and Drug Act.

Section 301 (k) of the act now prohibits "the alteration, mutilation, destruction, obliteration, or removal of the whole, or any part of the labeling of, or the doing of any other act with respect to a food, drug, device, or cosmetic, if such act is done while such article is held for sale after shipment in interstate commerce and results in such article being misbranded."

Our proposed amendment to section 304 (a) gives the seizure law precisely the same jurisdiction as that which Congress gave to the misbranding law in section 301 (k) in 1938. To disapprove this amendment is to argue that the protection of the purity of food is less important than the honest labeling of food.

We find precedent for this amendment outside the act in two supplemental enactments by Congress. The first is the Seed Act of 1912, as amended in 1926, which provides that misbranded seed shall be liable to a Government seizure proceeding if it is being, first, transported in interstate commerce; or, second, held for sale or exchange after having been so transported.

The second precedent is the Caustic Poison Act of 1927, which provides that a misbranded dangerous caustic or corrosive substance shall be liable to such a proceeding if it is being, first, shipped in interstate or foreign commerce; or, second, held for sale or exchange after having been so shipped.

Consequently there is nothing new about this jurisdictional amendment of section 304 (a) now before you because Congress wrote an identical seizure authority into the supplemental acts to which I have just referred. No one can reasonably argue that such acts should have a stronger seizure law than the far more important Federal Food, Drug, and Cosmetic Act.

It is difficult to visualize the magnitude of the breech in consumer protection that has occurred since the Phelps-Dodge decision. A spokesman for the Pure Food and Drug Administration testified before our committee that it is a conservative estimate to say that an average of more than 20 tons of contaminated articles would be seized daily except for the immunity conferred by this court decision. The committee in its files had several photographs that show very graphically just how our food supply can become contaminated. I don't think it is necessary to display these pictures in order to impress the House with the necessity of the early enactment of these proposed amendments.

Mr. WOLVERTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Connecticut [Mr. LODGE].

Mr. LODGE. Mr. Chairman, reliable reports indicate that Communist leaders, meeting in Milan, have decided on a Communist uprising in April for the purpose of setting up an independent popular republic in north Italy unless Moscow gives a counter order.

Top Communist leaders from all parts of Europe have been attending a congress of the Italian Communist Party in Milan. It is reported that Palmiro Togliatti, head of the Italian Communists, informed a small circle of top Communists that a new regime could be set up at Milan within 6 days and that Russia would give it unlimited support.

I have thought for some time that a serious attempt would be made by the Communists in the early spring of this year to capture the governments of France and Italy by internal force. The strikes and riots of last December were, I believe, only a forerunner of what we may expect. Serious strikes in Italy at this very moment are the cause of great concern.

Mr. Chairman, we must address ourselves not only to the economic recovery of Europe, not only to an effective, energetic, and resourceful information program, but also to the problem of somehow bolstering the police in these countries in order that they shall not become police states. This is the responsibility of the administration. We must help to preserve these bastions of liberty against the onslaughts of Red fascism.

Communist domination would jeopardize the European recovery program, the national security of the United States, and the peace of the world.

We must resist the conquest of Europe by internal force just as we would resist overt acts of war.

Mr. WOLVERTON. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That subsection (k) of section 301 of the Federal Food, Drug, and Cosmetic Act, as amended (21 U. S. C. 331 (k)), is amended to read as follows:

"(k) The alteration, mutilation, destruction, obliteration, or removal of the whole or any part of the labeling of, or the doing of any other act with respect to, a food, drug, device, or cosmetic, if such act is done while such article is held for sale (whether or not the first sale) after shipment in interstate commerce and results in such article being adulterated or misbranded."

SEC. 2. Subsection (a) of section 304 of such act, as amended (21 U. S. C. 334 (a)), is amended by inserting immediately after the words "when introduced into or while in interstate commerce" the following: "or while held for sale (whether or not the first sale) after shipment in interstate commerce."

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore having resumed the chair, Mr. RIZLEY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 4071) to amend sections 301 (k) and 304 (a) of the Federal Food, Drug, and Cosmetic Act, as amended, pursuant to House Resolution 423, he reported the bill back to the House.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES—FOLSOM DAM (H. DOC. NO. 496)

The SPEAKER pro tempore laid before the House the following message from the President of the United States which was read and referred to the Committee on Public Lands and ordered to be printed:

To the Congress of the United States:

The estimates of appropriation for civil functions of the Corps of Engineers, Department of the Army, in the 1949 Budget, include $3,370,000 for beginning construction of the Folsom Dam on the American River in California. This project was authorized for construction by the Corps of Engineers in the Flood Control Act approved December 22, 1944, "substantially in accordance with the plans contained in House Document No. 649, Seventy-eighth Congress, second session, with such modifications thereof as in the discretion of the Secretary of War and the Chief of Engineers may be advisable * * *."

The Corps of Engineers, the Bureau of Reclamation of the Department of the Interior, and the State of California are agreed that the initial plans for a reservoir of 355,000 acre-feet capacity should be revised to provide a reservoir of 1,000,000 acre-feet. This will not only provide more adequate storage for flood control but will also provide adequate storage at the Folsom Dam site for irrigation, hydroelectric-power production, and other uses consistent with the conservation of water resources in the Central Valley area. The Corps of Engineers is completing construction plans for the dam on this revised basis and work can be started promptly.

The Folsom Dam and Reservoir is a key unit in any plan for the full development of the water resources of the Central Valley. There is an urgent need for this structure, not only from the standpoint of flood control but also to provide additional electric energy and conservation of water to meet growing demands in the area. The Corps of Engineers should therefore be given funds to start building the dam at once under the authority of existing legislation. At the same time the authority contained in existing law for the construction of Folsom Dam should be expanded to permit the Bureau of Reclamation to construct and operate a power plant.

The power plant at Folsom must be integrated with the hydroelectric-power plants at Shasta and Keswick, constructed and operated by the Bureau of Reclamation, and with the Delta-Mendota pumping plant of the Central Valley project—all of which must be operated as a unit. To achieve such coordinated operation, the Folsom Dam and Reservoir, once constructed, should be transferred to the Bureau of Reclamation for operation and maintenance. After the transfer, the dam would be operated for flood control in accordance with criteria established by the Secretary of the Army, as provided in section 7 of the Flood Control Act of 1944.

The transfer to the Bureau of Reclamation would assure that Folsom Dam and its important related developments would be operated in coordination with other Federal conservation structures in the Central Valley to yield the greatest possible benefits. Power produced at the Folsom Dam would be used as a second source of energy for the Delta-Mendota pumping plant and for other irrigation pumping. The income from the disposition, under Federal reclamation laws, of the power there produced would assist not only in amortizing the cost of the Folsom Dam and power plant, but also in paying an appropriate share of the cost of irrigation canals and other works needed to distribute water from Folsom Reservoir to irrigation districts, cities, and suburban areas. Unless this income from power revenues is provided for in accordance with established practice under reclamation law many related developments proposed in the Central Valley, particularly in the American River basin and nearby areas of California, will not be financially feasible.

I recommend therefore that the Congress expand the present authorization for the construction of Folsom Dam to provide, (1) For the transfer of the dam and reservoir, upon its completion, to the Bureau of Reclamation for operation and maintenance as a coordinated unit of the Central Valley project under the Federal reclamation law; (2) for construction by the Bureau of Reclamation of a power plant, afterbay and necessary transmission lines; and (3) for construction by the Bureau of Reclamation of irrigation canals and related works needed to deliver water from the reservoir to irrigation districts, cities, and suburban areas. There are pending in the Congress two bills (H. R. 4152 and H. R. 4157), either one of which, if enacted into law with appropriate amendments, would accomplish these purposes.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 12, 1948.*

CALENDAR WEDNESDAY

Mr. JENSEN. Mr. Speaker, I ask unanimous consent that business in order on Calendar Wednesday of this week may be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

EXTENSION OF REMARKS

Mr. VAN ZANDT asked and was granted permission to extend his remarks in the RECORD and include an article, Natural Gas Shortage in Pennsylvania Is Not Improving.

Mr. MACKINNON asked and was granted permission to extend his remarks in the RECORD in two instances and to include an editorial and a newspaper article.

Mr. KERSTEN of Wisconsin asked and was granted permission to extend his remarks in the RECORD and to include two articles.

SPECIAL ORDER GRANTED

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that I may proceed for 10 minutes today after the other special orders.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from California [Mr. BRADLEY] is recognized for 30 minutes.

OCEAN SHIPPING AND RECOVERY PROGRAM

Mr. BRADLEY. Mr. Speaker, within the limits of time I shall be glad to yield to any Member at any time for question or comment, and to answer any question within the limits of my ability.

Mr. Speaker, the funeral of an adequate American merchant marine has been arranged by the State Department. The pallbearers may well be some 16 foreigners. The mourners will all be Americans. The Outline of a European Recovery Program prepared under the direction of the State Department, aims a near mortal blow at our present merchant marine. It may be that this Congress can save the patient's life and disappoint those who hopefully anticipate the reading of the last will and testament.

I intend to speak briefly of the ocean shipping section of this proposed recovery program, to outline the events which preceded these proposals and to give my reasons for believing them thoroughly unsound.

I want it clearly understood that I favor reasonable help to western European nations, and to their citizens to enable them to regain their economic footing even though such help is an additional burden upon our taxpayers. But I do not comprehend, as a part of that help, a program which will strip us of a part of our principal defense assets and will relegate our entire shipping industry to a very inferior standing among the fleets of the world.

Under the proposals of the State Department we shall sell to European nations some 200 ocean-going steamships, and, in addition, transfer to them on a temporary basis up to 300 more bulk cargo ships under bare-boat charter. In substance, Mr. Speaker, this is a proposal to transfer 5,000,000 tons of American ships—about 25 percent of our reserve dry-cargo fleet—to foreign nations under the Marshall plan. It is a proposal to transfer foreign about half as many ships as now constitute our entire privately owned ocean-going merchant marine. This astonishing proposal has come forth even though the merchant fleets of the 16 Marshall-plan nations will exceed the level of their prewar capacity when their present construction programs are completed. This proposal is made notwithstanding the fact that in 1951 these same nations expect to have 10,000,000 tons—over 20 percent—more shipping than they had prewar. It is made notwithstanding the fact that even after allowing heavy withdrawals for obsolescence in 1951 they will still exceed their 1938 capacity by the equivalent of

750 ships of an average of 10,000 dead weight tons each. This proposal is made notwithstanding the fact that the United States has already made a material contribution toward increasing the postwar tonnage of these nations by selling them over 750 of our war-built ships.

The genesis of the State Department proposal was this: Last summer, following the invitation of the Secretary of State made in his Harvard commencement speech, 16 European nations met in Paris to discuss what they considered to be their requirements in the way of friendly aid from the United States. A committee, known as the Committee on Maritime Transport, was formed for the purpose of analyzing availabilities and requirements with respect to ocean shipping. Because the United Kingdom anticipated operation of a fleet some five times as large as that of any other participating nation, a British subject, Percy Rogers, was designated chairman of the committee.

In its report, issued in September 1947, and released by the State Department in October 1947, the Committee on Maritime Transport outlined its concept of future participation in ocean shipping by the fleets of the United States and the 16 Marshall-plan nations. Although our merchant marine carried less than 30 percent of our foreign commerce in 1938, although through heroic wartime efforts and at tremendous expense we built the greatest merchant fleet ever assembled under any one flag, and although these Marshall-plan nations projected for themselves fleets more than 20 percent larger than prewar, the report of the Maritime Transport Committee suggested that participation of United States-flag vessels in trade with these nations should be at substantially the same or even less volume than prewar.

They suggested also that to enable these nations to build up their fleets and to reduce American participation in trade with them, we should transfer to them 3,000,000 dead-weight tons of shipping; that is, about 300 ships. This number of ships was more than the entire tonnage which they planned would be operating under United States flag in trade with these nations in 1951.

At the same time, these 16 participating nations outlined proposals for new-ship construction on their part during the 4¼-year period under consideration. They plan to build some fifteen and a half million tons of new shipping, an amount which will require more than one-half of the proposed imports of steel from the United States or almost 5 percent of the entire steel requirements embodied in the Paris proposals.

During the preparation of the report of the Committee on Maritime Transport, an American committee, known as the Harriman committee of 19, was appointed for the purpose of determining "the facts with respect to the character and quantities of United States resources available for economic assistance to foreign countries and to advise the President on the limits within which the United States might wisely and safely plan to extend such assistance."

After receipt of the Maritime Transport Committee's report, the Harriman committee met with representatives of the Marshall-plan nations, including Percy Rogers, and discussed the possibility of limiting the proposed ship-construction programs.

A reading of the Harriman committee report makes it obvious that the Marshall-plan nations were adamant in defending their new construction programs. Suggestions that transfers of ships might be made in exchange for reductions in ship construction were rejected. The Harriman committee suggests that the Paris nations had in mind something over and above emergency rehabilitation of their shipping industry when it stated:

> Neither in Paris nor Washington have the European maritime representatives shown much disposition to look upon the next 4 years as an emergency in which means must be contrived to make do with the facilities we have at our disposal rather than to embark on longer-term building programs.

All in all, from reading the ocean-shipping analysis of the Harriman committee, I get a clear impression that these nations have indulged in a degree of opportunism in laying out their own programs, and in projecting the prospective requirements of American tonnage to be engaged in trade with them.

The report of the Harriman committee is plain-spoken. It deals with these proposals realistically. It says:

> It is pointless for Europe to be building up a world surplus of vessels at this juncture. It would be equally pointless for us to transfer large numbers of dry cargo vessels during the period of European surplus build-up.

But this analysis by the Harriman committee, a group of eminent businessmen, appears to have been more than ignored in the present proposals of our State Department. The transfer of the 300 ships which the Harriman committee termed "pointless" has been expanded by the State Department into a proposed transfer of 500 ships.

Americans do not understand that the transfer of 500 vessels wil result in elimination from trade with these European nations of some 500 vessels presently operated under the United States flag and manned with American officers and crews. Even if the transferred vessels are taken from lay-up, their participation in the trades will result in a corresponding reduction in the United States flag tonnage which would otherwise be engaged.

Right now, there appear to be ample ships in trade with western European nations to carry all the tonnage expected under the relief program. The use of additional American vessels will not add to the shipping capacity now engaged, but will result in the transfer to foreign flag, foreign crews, and foreign management of ships now operating under the United States flag with United States personnel and United States management.

Even now we are carrying only the surplus of cargoes which the European nations are unable to lift themselves. The number of American ships in operation increases or decreases with the ebb and flow of cargoes to be moved. The Paris report, the Harriman committee report, and the State Department report of January 7, 1948, all proceed on the assumption that as tonnage becomes available to the 16 nations, American-flag tonnage will be withdrawn from the trade. Recent experience seems to confirm this assumption, since about 200 war-built vessels chartered to United States operators have been returned to the Maritime Commission within the past few months as a result of lack of sufficient business to warrant their further operation.

The net result of the transfer proposed by the State Department, would be the withdrawal of 500 American-flag ships from the European trade.

The Harriman committee emphasized the serious national defense aspects of this European scheme when it said:

> The United States needs an active merchant marine for national defense and we must not create conditions in which that merchant marine cannot survive.

The President's advisory committee on the merchant marine, in its report issued in November, said, "Security requirements can be met only through the existence of an efficiently operated merchant marine of such size as to meet the initial military and naval demands. Unless the shipping and shipbuilding industries are maintained above some minimum level, the country will lose that vital nucleus of know-how which is essential to enable rapid expansion to meet emergency or wartime needs."

The proposal of the State Department cannot be regarded as a constructive effort toward the maintenance of our shipping industry at the minimum level required.

Mr. SEELY-BROWN. Mr. Speaker, will the gentleman yield?

Mr. BRADLEY. I yield to the gentleman from Connecticut.

Mr. SEELY-BROWN. Captain, do you not feel that the shipping clause as it is presently written in the European recovery program is in direct contradiction of an attempt by some of the other Government agencies to subsidize the construction of new ships?

Mr. BRADLEY. It is completely in opposition. With one hand we try to build up a merchant marine. We pay subsidies for ship construction and operation. With the other hand we try to do everything humanly possible to drive our ships off the seas. That is exactly what the State Department is trying to do—drive them off the seas, and put them under foreign flags.

Furthermore, every safeguard which we have heretofore established in order to protect ourselves against foolish destruction of our merchant marine would be completely eliminated under the current proposal of the State Department. In the Ship Sales Act of 1946, section 6 (2), the Congress required that the Secretary of the Navy must be consulted as to whether any vessel proposed for transfer to a foreign country is "necessary to the defense of the United States." Under the State Department scheme no such consultation is required. Transfers are to be made whenever the Administrator of the European recovery program determines that the sale "would be in furtherance of this Marshall plan act," if his

action is approved by the President and the vessel is available for such transfer. National defense considerations are eliminated. The Maritime Commission is bypassed. Government-owned ships become pawns in the play of the Administrator of the European recovery program.

What reason is offered by the State Department for ignoring the analysis of the Harriman committee? It emphasizes possible dollar savings for the foreign countries or for the American taxpayer. When analyzed, the savings which would be available as a result of the proposed transfers amount to less than $213,000,000 even if foreigners operate most of the ships without dollar payment for cargo carrying. This saving would amount to a maximum of only between 1 and 2 percent of the cost of the proposed Marshall plan program. The Harriman committee dealt realistically with this particular phase of the argument when it said:

> The limited financial savings are not sufficient to justify the drain on United States resources for national defense which such transfers would involve.

It is impossible for me, Mr. Speaker, to understand how the State Department of this Government, with the analysis of the Harriman committee before it, can recommend the transfer of 500 more American ships to European nations. I do not believe that my long service in the Navy causes me to overemphasize the value of our merchant marine for national defense, although I concede that I may be more sensitive to its importance than are those who have had less contact with affairs at sea. Then again, the President's Advisory Committee on the Merchant Marine points out that "the American people believe America should lead in shipping as it is expected to lead in other world affairs," and I do not believe that any of our citizens, or any of their representatives in Congress, can believe that the interests of the United States will be served if we have a merchant marine which carries less than 30 percent of our own commerce.

Exactly that, however, would be the inescapable result of carrying out the proposals in the report of the State Department. I believe that is the hope of many European nations.

Wholly aside from the commercial aspects of the proposal of the State Department, the international situation certainly does not justify the risk involved in the proposed transfer of ships. Approximately only 2,000 dry-cargo merchant vessels suitable for national defense purposes remain in this Government's possession. There is grave doubt if the vessels remaining after the proposed 500 were transferred would be a sufficient stock pile of national defense merchant ships for the security of the Nation.

Time after time it has been demonstrated that we have never had sufficient ships in time of war. Now, the report of the President's Advisory Committee on the Merchant Marine points out that we are already short of the minimum of 11,400,000 tons of active shipping deemed necessary by the Navy for military purposes.

Let me set forth our requirements for merchant ships in the event of another world upheaval. At the impact of the emergency an active merchant fleet, fully manned, and in operation, is vital to our military forces. The Navy has indicated that a minimum of 11,400,000 tons of shipping will be required for handling cargo movements during the impact period. This minimum is more than our present privately owned fleet, and is more than the total tonnage which would be in operation under the American flag if these 500 ships are turned over to the European nations.

Second. We must have a reserve fleet of substantial proportions to replace casualties, furnish transport of men and materials, and support generally our striking forces as they are increased. It is for this reserve fleet that we have ships in lay-up today. It takes time, however, to break such ships out of lay-up, and a reserve is in no way a substitute for an adequate active merchant fleet.

Third. An emergency requires ship production in volume. A period of from 12 to 18 months may be required before our shipyards can get into production, and it is to bridge the gap between our active merchant fleet and our new construction that the reserve fleet is essential.

Twice, within the present generation, we have been called upon to build a national defense fleet hastily and extravagantly. At the impact of both emergencies we were woefully short of merchant vessels in every category. A saving of 1 percent or 2 percent of the cost of the Marshall plan does not justify a repetition of the extravagant unpreparedness which in World War II alone cost the American taxpayer some $15,000,000,000 for ship construction.

It is recognized that foreign-flag ships, with their low-wage crews and low standards of living, are able to compete more than successfully against American shipping. In recognition of this fact, Congress wrote into the Merchant Marine Act of 1936 provisions for subsidy on established trade routes.

The creation of a surplus of active world tonnage can only have the effect of creating conditions where the forces of supply and demand will make it still more difficult for a United States flag fleet to participate in world trade. This will be particularly true in the bulk-cargo trades, where, in general, no subsidies are provided by law.

As a result, we can look forward, if we follow the proposals of the State Department, to such vigorous foreign competition that the greater part of our merchant marine will be driven from the seas.

The inescapable conclusion is that, if we transfer our ships to foreign flags in accordance with the recommendations of the State Department, we shall not be able to maintain the minimum active American merchant marine required for impact requirements of our military forces.

We must not be blinded by diplomatic language intended to cover up the inevitable results of the proposed transfer, by language suggesting that such transfer might reduce or defer European ship construction. The State Department, for example, in a report issued January 7, 1948, says:

> It is not suggested that foreign shipbuilding now under way should be stopped, but it is thought that a portion of the projected building could be deferred until the emergency is over.

Mr. Speaker, European nations are not disposed to curtail their ship-construction programs.

If I am correct in sensing underlying opportunism in the Paris report, any endeavor on our part to impose curtailment of construction as a condition of aid will be met with charges that the United States is seeking to interfere with the internal economy of foreign nations. That argument goes over in a big way with our international do-gooders and it is usually effective. To expect curtailment in foreign ship construction programs is just unrealistic.

The safe way of preserving our merchant marine for national defense is to defend the shipping industry against the inroads of competition created by our own stupidity. In comparison to the $15,000,000,000 which we spent for ship construction during the last war, the possible saving on paper of less than $213,000,000 is of small importance when we think of the ships it will take from under the American flag and the men it will throw out of work.

To keep us secure and to provide us with the implements for effective participation in world affairs, I suggest that we actually save 1 or 2 percent of the costs of European rehabilitation by cutting off some real money where it will not imperil the security of America.

Then let us keep a strong, healthy merchant marine in active operation. Let us do so with a realistic understanding of its importance to the safety of the United States.

Mr. Speaker, we should refuse to approve further transfer of American ships to foreign nations.

Mrs. ROGERS of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. BRADLEY. I yield.

Mrs. ROGERS of Massachusetts. May I ask the gentleman what he feels about the arrangement for the sale of tankers to foreign countries or foreign firms? I do not know whether in California the gentleman's constituents are suffering from lack of oil, but as the gentleman knows, the people in New England are suffering from a shortage of fuel.

Mr. BRADLEY. Personally, I do not like to see the sale of any of our ships to any foreign countries. I think the gentlewoman has spoken about Russia. From the last reports I know of, we had some 96 ships running under the Russian flag—ships turned over to the Russians by the Department of State as a part of lend-lease. In order to get these ships for Russia, the State Department bought them from the War Shipping Administration with lend-lease funds, so the Maritime Commission, successor to the War Shipping Administration, does not have any financial interest in them. Then the Department of State turned the ships over to Russia and, after that, handed Russia bills of sale so that the ships would be safe from capture. Now

we talk about getting them back. The Russians, however, think that the ships belong to them, and I believe that we have at least two strikes on us because they are in possession of the ships.

Mrs. ROGERS of Massachusetts. They have title to the ships?

Mr. BRADLEY. They have actual title to the ships, but of course they never paid anything for the title. As far as I know, the understanding, or rather the belief, was that the title would not be good after the war and that we would get them back.

Mrs. ROGERS of Massachusetts. Does not the gentleman feel that the President should put an embargo on tankers going abroad at the present time carrying oil, even with the permission of some of our own oil companies, at least during the period of the emergency?

Mr. BRADLEY. Of course, my opinion is that we should look out for our own people first. I think that answers the gentlewoman's question fully.

Mrs. ROGERS of Massachusetts. The people are suffering from a lack of fuel in other sections of the country as well as in New England. It is not purely a local or sectional problem with us.

Mr. BRADLEY. People in several parts of the United States are cold because they do not have fuel, and I think we ought to look out for the necessities for our own people before we ship fuel abroad.

Mrs. ROGERS of Massachusetts. I want to take this opportunity to thank the gentleman from California for the fight that he has made to maintain an adequate Navy, as well as an adequate number of officers and Reserve officers.

Mr. BRADLEY. May I express my appreciation to the gentlewoman from Massachusetts?

Mrs. ROGERS of Massachusetts. I remember the gallant fight that the gentleman made on the floor in an effort to obtain recognition for the work done by the Reserve officers. Ninety percent of the fighting was done by the Reserve officers and men.

Mr. BRADLEY. I thank the gentlewoman very sincerely.

Mr. EDWIN ARTHUR HALL. Mr. Speaker, will the gentleman yield?

Mr. BRADLEY. I yield.

Mr. EDWIN ARTHUR HALL. I was very much interested in what the gentleman had to say about those 96 ships which we handed over to Russia. Does it not seem to the gentleman that certainly in this case the old adage would apply that "Possession is nine points of the law"?

Mr. BRADLEY. I think that in this case it is 99.9 percent of the law.

The SPEAKER pro tempore. The time of the gentleman from California has expired.

SPECIAL ORDER GRANTED

Mr. RICH. Mr. Speaker, I ask unanimous consent that after the conclusion of special orders already granted I may address the House for 10 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

EXTENSION OF REMARKS

Mr. KLEIN asked and was given permission to extend his remarks in the RECORD and include a letter from the American Legion.

Mr. PHILBIN asked and was given permission to extend his remarks in the RECORD and include a recent article from the Boston Post.

Mr. MUNDT asked and was given permission to extend his remarks in the RECORD and include an editorial from the Sioux Falls Daily Argus showing that South Dakota ranks first in the Nation in the purchase of Government Savings bonds.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Connecticut [Mr. MILLER] is recognized for 30 minutes.

PHYSICALLY HANDICAPPED

Mr. MILLER of Connecticut. Mr. Speaker, in this huge Federal Government of ours it is next to impossible for Members of Congress to keep in touch with the work of all the agencies and committees we create. Every once in a while, however, our attention is attracted to the fine work being done by a group of men and women in some department or agency of the Federal Government. It is for the purpose of discussing the excellent results being obtained by such a group that I have asked for this time today.

In August 1945 the Seventy-ninth Congress approved a House joint resolution to designate as National Employ the Physically Handicapped Week the first week of each October. The resolution provided that during that week appropriate ceremonies were to be held throughout the Nation, the purpose of which would be to enlist public support for and interest in the employment of otherwise qualified but physically handicapped workers.

In 1945, 13,439 handicapped persons were placed in jobs, of whom 8,141 were disabled veterans. The following year, 1946, 29,439 handicapped were placed, of whom 19,200 were disabled veterans. In 1947, 30,765 handicapped were placed, of whom 17,802 were disabled veterans. In all, since the passage of the resolution to which I referred, 73,643 handicapped have been placed in suitable employment, of whom 45,143 have been disabled veterans. It will thus be seen that there has been a steady increase each year, which augurs well for future observances of National Employ the Physically Handicapped Week.

No doubt you have all by now received copies of the minutes of the meeting of the President's Committee on National Employ the Physically Handicapped Week, which was held in Washington last November 4.

This Committee has been established by the President for the purpose of bringing together representatives of organizations outside the Government and among the one-hundred-and-thirty-odd groups are some of the most powerful organizations in the United States, representing industry, business, labor, veterans, women, religious, fraternal, and other organizations, with a combined membership of more than thirty million.

When one stops to think that one and a half to two million handicapped applicants for work have registered in employment service offices across the country, one must come to the conclusion that it is going to take more than the observance each year of a National Employ the Physically Handicapped Week to solve this problem.

In order to solve the problem the work of this national Committee must be supplemented by work on the local level. A great deal of the work on the local level can be done by volunteer workers. In fact, in many instances the volunteer worker can do the job better than a professional worker. Finding the right job for a physically handicapped person is pretty much a case of making the right personal contacts.

If I may be pardoned a personal reference, I would tell you that I never see a physically handicapped person who has decided that there is nothing useful for him to do and that he is going to just sit around for the rest of his life, but what I think that I might have made the same decision but for friends or relatives who just would not permit that to happen.

Anyone who suffers a serious physical disability goes through a period when he needs friends, and the right kind of friends, as never before. Having gone through a period of uncertainty as to his ability to look out for himself, the time soon comes when he is ready for a job. It is at that point that the work performed by the President's Committee on National Employ the Physically Handicapped Week has its greatest value.

This Committee is deserving of our stronger support, because its purpose is not only to restore unfortunate, suffering people to usefulness and happiness but to render them productive citizens who can and will take up their share of our tax load by becoming taxpayers, instead of tax eaters themselves.

This Committee was formed to better carry out the purposes of Public Law 176 of the Seventy-ninth Congress, which is the House joint resolution to which I previously referred. The Committee will formulate a year-round program of public information and public education toward rehabilitation and employment of America's handicapped millions.

The recommendations of this Committee include:

First. Management-labor institutes throughout the country to secure employer acceptance of handicapped workers, emphasize availability and advantages of Federal-States Employment Service facilities, prepare a typical in-plant plan for employment of disabled, and secure increased employee interest from disabled and nondisabled alike;

Second. Investigation of, and assistance to, present and future community rehabilitation centers, formed to rehabilitate and employ the disabled at community level;

Third. Collaboration with governors' committees in the States;

Fourth. Local, State, and National essay contests to stimulate the thinking of students, parents, and teachers.

Fifth. Expositions showing the handicapped at work to arouse public interest and knowledge while educating employ-

ers to the value and variety of talents possessed by handicapped workers;

Sixth. Awarding of certificates of merit to individuals and organizations who have cooperated in the employment of handicapped;

Seventh. Study of workmen's compensation laws; and

Eighth. Study of schools for handicapped in order that curricula might bear a direct relationship upon future employment possibilities.

Mrs. ROGERS of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. MILLER of Connecticut. I yield to the distinguished gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. The gentleman spoke of his own case, of his relatives and friends coming to his aid.

Mr. MILLER of Connecticut. And some Congresswomen.

Mrs. ROGERS of Massachusetts. The gentleman did it himself without any suggestions or assistance from anybody else and is an inspiration to everybody. He has been an enormous help, I know, to those who have had a disability with which to cope.

Mr. MILLER of Connecticut. I thank the distinguished gentlewoman from Massachusetts I could tell some things about her fine work in the early twenties. I can remember when she too spoke of discouragements and wondered if she could do useful work back in the early twenties, but I do not want to disclose her age.

For the benefit of the Members who may desire to read the full report of the President's committee I extend as part of my remarks the report of this committee for their consideration.

(The matter referred to follows:)

I. BACKGROUND

Three consecutive annual observances of National Employ the Physically Handicapped Week enacted by the Seventy-ninth Congress and proclaimed by the President, have conclusively demonstrated the usefulness and necessity of such a campaign or program for employment of handicapped persons.

Each annual observance has been marked by increased interest in employment and rehabilitation of the handicapped, on the part of the public, officials, and media of information. Each year, however, statistics have shown a general "falling off" of calls for and placement of handicapped workers, shortly after observance of the week.

Today, in a period of 60,000,000 Americans being at work, in an era of full employment, it is estimated that at least 500,000 handicapped applicants, registered in employment-service offices across country, are still out of jobs, about 135,000 of whom are war-disabled veterans, while from 1,500,000 to 2,000,000 more handicapped persons could and should be rehabilitated for employment.

The work of this committee must be designed to continue the Nation-wide observance of National Employ the Physically Handicapped Week, so that its observance and the results obtained therefrom will contribute to the full employment of the physically handicapped.

In order to assure an effective annual observance and real results in jobs for the handicapped, the committee must continually keep before the public through public information and education, a day-by-day, month-by-month effort to support the program of all public and private groups in their programs of rehabilitation and employment of handicapped citizens.

II. OBJECTIVES OF THE COMMITTEE

To attempt to outline, at this time, the whole future development of the work of this committee is neither practicable nor reasonable. Much time and study is needed to evaluate present systems, facilities, carry on research, and suggest improvement in our present programs. We understand our function primarily concerns itself with the suitable employment of handicapped people. In order to achieve a reasonable goal in this direction we are well aware that we shall come into frequent contact with other phases of the program for the disabled. Men or women permanently or temporarily handicapped cannot perform much, if any, work, unless adequate physical restoration is accomplished; therefore, our program will necessarily be closely related to the medical services.

The handicapped may require education and training, or retraining, or vocational guidance; all such programs deserve our close study.

Procedures applying to the development of proper means of placement of handicapped are inextricably bound up with a continual study and revision of what are termed "physical demands"—the new science of matching men with jobs—the committee must give careful study to the question of how best to increase the present approximate 8,000 jobs from the estimated 27,000 different types of employment in America. The handicapped can fill more jobs, and ways and means must be devised to open the possibilities for their increased placement in these jobs.

Cooperation must be obtained, and maintained, from all public and private groups in the field, including those operating at Federal, State, and municipal government levels, as well as the great organizations of industry, business, labor, veterans, religion, women, education, farm, fraternal, civic, medical, welfare, scientific, and professional groups, and other interested organizations or individuals.

At the Federal level there now exists a coordinating and cooperating group—The Federal Interagency Committee on Employment of the Handicapped, with official representation thereupon from the Departments of Labor, Agriculture, Commerce, War, Navy, Veterans' Administration, Federal Security Agency, United States Civil Service Commission, et cetera.

This committee was established a year ago by Maj. Gen. Graves B. Erskine, USMC—then Administrator, Retraining and Reemployment of Vocational Rehabilitation, who declared there was a great need for coordination of the multitude of activities carried on in the Federal field. Investigation shows there are some forty-odd such agencies.

This committee has among its membership the Disabled American Veterans, the American Federation of the Physically Handicapped, and the National Association for Employment of the Handicapped, as representing the viewpoint of outside organization.

III. RECOMMENDATIONS

It is recommended that a subcommittee of the Committee on NEPHW meet in joint session with the Federal Interagency Committee, on December 11, 1947, when the Interagency Committee, doubtless will have received complete reports from all States and cooperating public and private agencies and organizations, as to this year's results on National Employ the Physically Handicapped Week. We can then see, in all likelihood, those areas in which effective work is being done, as well as others, perhaps, in which additional effort is required.

Also that the committee concentrate its attention on encouraging the development of local committees, composed of local representatives of essentially the same groups which constitute the National Committee. These local committees would have the same objectives as the National Committee and would provide the local organization necessary to stimulate employment of the physically handicapped through specific projects such as the following:

A. Management-labor institutes, to stimulate interest on the part of both employers and employees. Such institutes, in general, to provide a means—

1. To secure employer acceptance and effective utilization of qualified handicapped workers, both disabled veterans and civilians.

2. To emphasize use of Federal-State Employment Service facilities for recruitment and selection of workers.

3. To provide employers with facts regarding productivity, absenteeism, and low-accident incidence of handicapped people.

4. To illustrate by a typical in-plant plan for employment of disabled.

5. To demonstrate the advantages of the selective-placement approach to hiring the handicapped—particularly the method of making physical-demands analyses and physical-capacity appraisals.

Since many plants already have labor-management committees, many of these no doubt can be utilized. Where such do not exist, it would be advisable to ask that there be joint action of employer and employees, so that studies and pilot demonstrations might proceed simultaneously, to the advantage of both groups.

To the employee group it should be demonstrated that—

1. Special services are available to handicapped through USES-State employment offices.

2. Applicants, already handicapped but otherwise capable, should secure the various tests and vocational-guidance procedures of State employment and rehabilitation services necessary for satisfactory placement.

3. An in-plant plan should demonstrate to employees the possibilities of increased employment by rearrangement of machines—grouping of certain related plant activities which may be carried on by handicapped, etc.

These management-labor employment institutes may be conducted as a joint endeavor of the Federal-State employment services or at the local office level.

B. Community rehabilitation centers:

The committee should thoroughly investigate possibilities and potentials of community rehabilitation centers.

Although some steps in this direction have already been taken, as far as is known, there is no national policy or program, and most of the work has been done by private groups. If a practical program has been, or is being, developed, which can be adapted to the needs of the times, such should have the careful attention by this committee, with the objective of ascertaining what developments of such community rehabilitation and employment centers in many cities throughout the Nation, through the collaboration of the Office of Vocational Rehabilitation, the United States Public Health Service, and the USES-State Employment Services, which are necessary and need implementation by this committee.

C. Collaboration with governor's committees: In many States, as a result of joint efforts of public and private agencies, the respective governors have established Committees on NEPHW activities. In most instances, such committees are composed of State officials of the agencies having primary jurisdiction, but in a few instances governors have appointed public-spirited citizens to head such committees, from outside the official family.

We believe our committee should offer full cooperation to the governor's committees, and endeavor to supplement, implement, and complement their labors.

D. Local, State, and National essay contests:[1] In the 127,000 school districts in the

[1] It was voted that items D, E, and F be referred to appropriate subcommittees, to be appointed by the chairman, for implementation.

United States there are millions of pupils who, we believe, furnish the best possible means of developing an intelligent understanding of the problems of handicapped people—especially on a continuing, all-time basis.

If, for example, an education subcommittee of this committee, if such were appointed, would devise a means whereby the high-school students throughout the country could participate in an essay contest, the subject of which might well be "The Place of the Physically Handicapped in Our Economic System," we would, thus, undoubtedly, stimulate the thinking and comprehension of the problem of not only the students themselves but also their teachers and parents.

It should be stressed that if the younger generation can be brought to a point of understanding and proper evaluation of the handicapped—then our future programs will be greatly accelerated in all fields of treatment, training, and placement.

E. Expositions for handicapped:[1] In larger cities throughout the Nation there should be a general program of development and presentation of exhibits made by handicapped people and further, actual showing of the handicapped at work in industry and other fields.

Such exhibits might well take the form of annual expositions, in which local concerns employing handicapped, or schools specializing in vocational education might combine to present interesting and informative programs.

All this would add greatly to public interest and knowledge of the subject and would serve to educate employers on the value and variety of talent possessed by handicapped workers.

Industry, labor, and veterans organizations could well be asked to cooperate in this endeavor.

F. Awards of merit:[1] An annual certificate of merit will be issued to those individuals and organizations who have cooperated in the employment of the handicapped. Such awards will be made by the committee after standards of performance set by the committee have been met.

G. Study of workmen's compensation laws: There should be an exhaustive study of workmen's compensation laws with a view to ascertaining their relation to the problem of employment of handicapped people (advising employers of the facts), and to develop suggested means of improving these statutes.

H. Study of schools for handicapped: A study and evaluation, in collaboration with professional bodies interested, should be made of all schools in which the handicapped are taught, both children and adults. The curricula of these schools should, in part, bear a direct relationship to fields of employment possibilities.

I. Employment of handicapped in Government: The chairman of the President's committee should be empowered to appoint a subcommittee to investigate the possibility of the employment of handicapped people in all governmental agencies at all levels (Federal, State, and municipal).

IV. SUBCOMMITTEES

It is recommended that if the committee approves this report that the chairman be authorized to appoint appropriate subcommittees and chairmen to implement the recommendations of this report.

Mr. MILLER of Connecticut. Mr. Speaker, I yield back the balance of my time and ask unanimous consent to revise and extend my remarks and include the report to which I have referred.

[1] It was voted that items D, E, and F be referred to appropriate subcommittees, to be appointed by the chairman, for implementation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The SPEAKER pro tempore. Under the previous order of the House, the gentlewoman from Massachusetts [Mrs. ROGERS] is recognized for 10 minutes.

FUEL-OIL SHORTAGE IN MASSACHUSETTS

Mrs. ROGERS of Massachusetts. Mr. Speaker, I am talking again for just a minute or two on the question of oil, the very improper distribution of oil today as I see it, and the great difficulty we are having in finding out the true facts of the oil situation both as to production and distribution, and as to price. There are places in Massachusetts where oil without any reason that we can see has doubled in price and in some instances trebled. I was in Massachusetts to attend the funeral of a dear friend yesterday and everywhere I went taxicab men and everyone spoke of the high price of oil and how impossible it is going to be for veterans and people with small incomes to get along if the price continues high, even if they can secure the oil.

In other communities in the country the same situation exists, one family can secure oil and the family in the next house cannot secure oil. One oil dealer seems to have a great deal of oil while the next oil dealer has not any oil at all.

Mr. Speaker, I asked the President to act on the 3d of December, last year, requesting that he declare an embargo on oil going out of the country and on the tankers taking the oil out of the country. Certainly that should have been done at least until the emergency is over. I do not believe anyone in this country feels we should let the people of the United States get cold in order to send our oil to other countries. As a matter of fact, most of it, I understand, is not going to those who are cold over there.

The President has the power to act and he should act immediately. It is obvious we are not going to arrive at any solution immediately unless he does act.

EXTENSION OF REMARKS

Mr. SMATHERS asked and was given permission to extend his remarks in the Appendix of the RECORD.

The SPEAKER pro tempore. Under special order of the House, the gentleman from Pennsylvania [Mr. RICH] is recognized for 10 minutes.

WHO IS GOING TO GET THE MONEY?

Mr. RICH. Mr. Speaker, who is going to get the money? Upon many occasions I have asked the Congress, "Where are we going to get the money?" The answer is that we have been putting a mortgage on our grandchildren in order to get the money. We have run this country into the greatest debt that has ever been placed upon any nation in history—a greater debt than any nation has ever seen fit to place upon its people—$257,000,000,000 today.

I want to call your attention to the fact that if the so-called Marshall plan goes through, it may be well to ask, "Who is going to get the money?"

The Marshall plan is being sold to the American farmer on the basis that he is going to have a greater market for his products. However, the following article taken from the January 3 issue of the reliable Washington Farm Reporter would indicate that the farmers of some other countries are going to get most of the money:

MARSHALL PLAN EXPORTS

The Marshall plan is not to be the farm price bonanza that some had expected. It could be a boomerang.

A break-down study of President Truman's proposal discloses that Canadian and Latin-American farmers will get most of the Marshall plan dollars.

The President asked for $6,500,000,000 to finance aid from April 1, 1948, to June 30, 1949 * * * approximately two-thirds of which would be for foods.

The 15-month food budget is $4,163,000,000. Of that amount $2,785,000,000 would be spent outside the United States, but only $1,378,000,000 for domestic purchases.

Here is a break-down of food-spending plans:

Grain: United States, $840,000,000; elsewhere, $1,300,000,000.

Sugar: United States, $28,000,000; elsewhere, $268,000,000.

Fats and oils: United States, $122,000,000; elsewhere, $450,000,000.

Meat: United States, $7,000,000; elsewhere, $385,000,000.

Dairy and poultry products: United States, $271,000,000; elsewhere, not estimated but probably not considerable.

A total of $382,000,000 is included for coffee and other foods abroad. For fruits, vegetables, and other minor items the United States total is $110,000,000.

Farm machinery valued at $136,000,000 would represent a sharp increase in United States exports. About $22,000,000 would be spent in Canada and Latin America for farm machinery to be sent Europe.

In addition, the Marshall plan calls for expenditure of $20,000,000 in the United States for fertilizer; $22,000,000 elsewhere.

The point I am going to try to drive home is the fact that we are furnishing all the money for this Marshall plan and giving everything away. We are not trying to make a business deal, we are giving away our birthright. Now, I just want to call the attention of the House again to this: Whatever happened to the United Nations? Why do they not function? Why should America do it all? Why? Whatever happened to the Organization that we have been working for for two and a half long years, trying to get it built up? The United Nations organization; are you bypassing it? Several years ago we established the Bretton Woods bank which had a capital of $9,100,000,000. The United States subscribed for $3,175,000,000 and paid the money in. Then we had the stabilization fund amounting to $8,800,000,000. The United States subscribed for $2,750,000,000 of that. That was for the purpose of helping these nations stabilize their currencies and get on their feet. But, we are not trying to take advantage of the great promises made for that organization that was set up by vote of the Congress, and paying in money according to the rules and regulations laid down. These other countries are not now coming in to borrow that money from this organization; oh, no! They want to come over here under the Mar-

shall plan and get a hand-out—something for nothing. Everybody's doing it.

When Secretary Marshall made his proposal to those countries to get together and discuss the items they wanted, they got together in Paris, and after discussion for a few weeks, what happened? They told Mr. Marshall they wanted $42,000,000,000 worth of equipment and merchandise and material from the United States. Well, it pretty nearly scared Mr. Marshall to death. He did not want to present that figure to the United States Congress, so he said, "Go back and sharpen your pencils and do a good job; do it over again." Then they came back and asked for $22,000,000,000. Mr. Marshall was still scared to death, and finally he sharpened his pencil as much as he could and he said that he thought they ought to have about $17,000,000,000 or $18,000,000,000, over a 4-year period.

Now, Mr. Marshall is one of the finest men and one of the greatest army officers that we have ever had. He did a wonderful job. We gave him everything he wanted under the sun to win the war. We gave him all the money and all of the materials, all the men and everything. He did a fine job. Nobody could criticize him, and I would be the last one to do so. But, Mr. Marshall has got a new job today. He is Secretary of State. He is not in the Army now. He is over there dealing with a lot of foreigners that he has never had experience with, and they are asking him for this, that, and the other thing, and he thinks maybe they ought to have it, because every time one of his generals asked him for something that they needed to win the war, he gave it to them. Because the American people furnished it to and for him. Now, he is going to probably see how much he can get for those people over there. From the American people. His heart is bigger than the American's pocketbook. His schooling is not the one for Secretary of State.

I say to you that we want to put the Herter plan into effect so that we will have somebody besides the State Department handing out the money of the people of this country. We must have proper supervision. I want to tell you that you are going to ruin this country; you are going to wreck it; you are going to put it into bankruptcy as sure as little apples grow. It is in the making. What we have got to do is to put some screws on Mr. Marshall; plan too. We must scale it down, way down. Further, Mr. Marshall says he wants all that money or none. Well, let me tell you, if those people over there are starving to death, or if I was starving to death, and somebody gave me a sandwich, I would take that sandwich and think that was a pretty good meal. But, Mr. Marshall says, "No," he wants $17,000,000,000 or nothing. That shows right on the face of it that he is not the man that ought to be at the head of the distribution of all this money of the taxpayers. He must know how to compromise, he didn't do it in the Army, here he must take it and like it. That is my answer to him.

If this was in the Army and he was a four-star general and I a private I would not dare say such a thing or I would be in the brig.

Then, we not only have that to contend with, but goodness gracious, lo and behold, yesterday the President came in asking for that great, large budget of $39,700,000,000 for this year. Why it would scare almost any one of you until your fingers froze clear up to your shoulders, or your feet almost up to your knees, and if you are frozen that far you will probably not get along without them, and you have to stand still, and the first thing you know you will find yourself with a bald pate in a huckleberry patch. In other words you are gone. You are through.

What you have to do here is to trim the Marshall plan down to what it ought to be. You have to cut the President's budget down to what it ought to be. When you do that you are going to save about fifteen or eighteen billion dollars out of this. That is the only thing that is ever going to keep America solvent. That is important. You cannot keep solvent otherwise.

I say to Congress now, let us get busy. Let us sharpen our wits and sharpen our ax and take care of America and the American people. Be wise and economize. That budget of the President means $240 for every man, woman, and child in America. Think of it. Is not that a terrible amount for the President of the United States to ask to put into effect a lot of these New Deal ideas he is talking about now? Just for 1 year. We have had enough New Deal during the last 10 or 12 years, and we have got this country just about wrecked, with a $259,000,000,000 debt.

Mr. REDDEN. Mr. Speaker, will the gentleman yield?

Mr. RICH. I defy the gentleman or anybody else on that side to tell how you are going to work or get us out of the New Deal mess. The philosophy of everybody living off the Government. If the gentleman is going to give me something constructive in that line, if he is going to tell me how you are going to cut this extravagance down, I will yield.

Mr. REDDEN. Is the gentleman going to qualify his yielding or is he going to yield?

Mr. RICH. I will yield to the gentleman for a question. Do not make a speech, just ask a question.

Mr. REDDEN. I want to know how much the gentleman thinks the Marshall plan ought to be for. He said it ought to be cut down to some figure. What ought that figure to be?

Mr. RICH. I am very happy to have that question. If I were appropriating the American people's money for the aid and assistance of Europe, I would not give them over $10,000,000 at first. Then I would give them two or three million dollars at a time, and I would say, "That is a lot of money. That is more money than I ever saw in all my life, and more than I hope I will ever have an opportunity to see." I would say to those fellows over there, "Here is a million dollars. That ought to make a lot of sandwiches." Then I would say to the American people, as Drew Pearson did, "Let us get out and of our own hearts give things to the churches, to the Red Cross, and to the Salvation Army to help those people over there until they can get on their feet themselves." We never did such a thing before in history as that proposed in the Marshall plan, we never even dreamed of such a thing before the New Deal started to give us away.

This country is in such an awfully difficult position or financial situation now, and I am afraid the President is going to put into effect some of the New Deal ideas again, and then you will swamp America. We will be bankrupt. We will not be any good to ourselves or any good to anybody else. You have to be careful of that, for that is just what will happen unless you economize. I say it is time to economize.

Mr. Speaker, you ought to do everything you can to aid and assist us on this side of the House in cutting that budget to the very bone. Cut down the Marshall plan to a reasonable amount, and then make no commitments or permit any commitments by the President, the State Department, or anybody else longer than 1948. Let us keep on our own feet. I am afraid the President, with his enormous budget, Secretary Marshall with his extravagant ideas will knock the feet out from under us and down we will come. Down America will fall. When our country is down, what good are we? Be wise and economize.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 489. An act to amend the Nationality Act of 1940, to preserve the nationality of naturalized veterans, their wives, minor children, and dependent parents; to the Committee on the Judiciary.

S. 544. An act to regulate subsistence expenses of officers and employees in the executive branch of the Government while absent from their designated posts of duty on official business; to the Committee on Expenditures in the Executive Departments.

S. 865. An act to provide for the striking of medals, in lieu of coins, for commemorative purposes; to the Committee on Banking and Currency.

S. 922. An act for the relief of Ruth Grossman; to the Committee on the Judiciary.

S. 1267. An act for the relief of Eleonore M. Hannon; to the Committee on the Judiciary.

S. 1347. An act for the relief of Burks L. Fielder; to the Committee on the Judiciary.

S. 1411. An act for the relief of Willie Ruth Chapman; to the Committee on the Judiciary.

S. 1486. An act to provide for payment of salaries covering periods of separation from the Government service in the case of persons improperly removed from such service; to the Committee on Post Office and Civil Service.

S. 1644. An act to amend the Veterans' Preference Act of 1944 so as to permit rescission of prior agency action in complying with recommendations of the Civil Service Commission pursuant to appeals taken by preference employees; to the Committee on Post Office and Civil Service.

S. 1698. An act to define the exterior boundary of the Uintah and Ouray Indian Reservation in the State of Utah, and for other purposes; to the Committee on Public Lands.

S. 1716. An act for the relief of Mrs. Iola Veach; to the Committee on the Judiciary.

ADJOURNMENT

Mr. GOFF. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 13 minutes p. m.) the House adjourned until tomorrow, Wednesday, January 14, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1203. A letter from the president, the Georgetown Barge, Dock, Elevator & Railway Co., transmitting a report pursuant to the fifth section of the act of incorporation approved September 26, 1888; to the Committee on the District of Columbia.

1204. A letter from the Administrator, Wage and Hour and Public Contracts Divisions, United States Department of Labor, transmitting the report of the Wage and Hour and Public Contracts Divisions of the United States Department of Labor for the year ended June 30, 1947; to the Committee on Education and Labor.

1205. A letter from the Secretary of Labor, transmitting the Annual Report of the Secretary of Labor for the fiscal year ended June 30, 1947; to the Committee on Education and Labor.

1206. A letter from the Secretary of the Interior, transmitting the second report covering conditions in all underground bituminous-coal and lignite mines inspected by Federal coal-mine inspectors during the 6-month period July 1, 1947, to December 31, 1947, inclusive; all recommendations and notices sent to the mine owners or operators and State agencies; and the action taken by mine owners or operators and State agencies with respect to the Federal inspectors' findings and recommendations; to the Committee on Education and Labor.

1207. A letter from the Archivist of the United States, transmitting a report on records proposed for disposal by various Government agencies; to the Committee on House Administration.

1208. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of a proposed joint resolution entitled "Joint resolution to create a Committee on Capital Clearance for the District of Columbia"; to the Committee on the District of Columbia.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 424. Resolution for consideration of H. R. 2575, a bill to amend the Articles of War to improve the administration of military justice, to provide for more effective appellate review, to insure the equalization of sentences, and for other purposes; without amendment (Rept. No. 1239). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. RANKIN (by request):

H. R. 4927. A bill to amend the Servicemen's Readjustment Act of 1944 so as to provide readjustment insurance for those persons who served in the armed forces of the United States during World War II, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. CARSON:

H. R. 4928. A bill to amend the Contract Settlement Act of 1944 so as to authorize the payment of fair compensation to persons contracting to deliver certain strategic or critical minerals or metals in cases of failure to recover reasonable costs, and for other purposes; to the Committee on the Judiciary.

By Mr. CASE of South Dakota:

H. R. 4929. A bill authorizing the Secretary of War to restore the mineral rights, including oil and gas, to former Indian owners of certain lands on the Pine Ridge Reservation, S. Dak.; to the Committee on Armed Services.

By Mr. FOOTE:

H. R. 4930. A bill repealing certain provisions of the Internal Revenue Code relating to the tax on oleomargarine, and for other purposes; to the Committee on Agriculture.

By Mr. JOHNSON of Indiana:

H. R. 4931. A bill to amend the act entitled "An act to codify and enact into positive law title 17 of the United States Code entitled 'Copyrights'," approved July 30, 1947; to the Committee on the Judiciary.

By Mr. KLEIN:

H. R. 4932. A bill to authorize the Board of Commissioners of the District of Columbia to establish daylight-saving time in the District; to the Committee on the District of Columbia.

By Mr. MANASCO:

H. R. 4933. A bill to regulate subsistence expenses of officers and employees in the executive branch of the Government while absent from their designated posts of duty on official business; to the Committee on Expenditures in the Executive Departments.

By Mr. O'KONSKI:

H. R. 4934. A bill to declare that the United States holds certain lands in trust for the use of the Lac Courte Oreilles Band of the Lake Superior Tribe of Chippewa Indians of the State of Wisconsin; to the Committee on Public Lands.

H. R. 4935. A bill to provide pensions for disabled veterans of World War I under similar conditions, and in the same amounts, as now provided for disabled veterans of the Spanish-American War; to the Committee on Veterans' Affairs.

H. R. 4936. A bill relating to the war tax rate on retail sale of furs; to the Committee on Ways and Means.

By Mr. POAGE:

H. R. 4937. A bill repealing certain provisions of the Internal Revenue Code, relating to the tax on oleomargarine, and for other purposes; to the Committee on Agriculture.

By Mr. WOODRUFF:

H. R. 4938. A bill to amend the Tariff Act of 1930 with reference to platinum foxes and platinum fox furs, and for other purposes; to the Committee on Ways and Means.

By Mr. HEDRICK:

H. R. 4939. A bill to adjust compensation for postmasters and employees of the postal service; to the Committee on Post Office and Civil Service.

By Mr. JENKINS of Ohio:

H. R. 4940. A bill to amend the Department of Justice Appropriation Act, 1948, by removing a limitation contained therein upon overtime compensation of employees of the Immigration and Naturalization Service; to the Committee on Appropriations.

By Mr. KEATING:

H. R. 4941. A bill to amend Public Law 368, Eightieth Congress, first session, approved August 5, 1947, so as to provide for allowances for private interment of repatriated war dead of World War II, and for other purposes; to the Committee on Armed Services.

By Mr. ROBERTSON:

H. R. 4942. A bill to amend section 23 of the act entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," approved February 25, 1920, as amended; to the Committee on Public Lands.

By Mrs. ROGERS of Massachusetts:

H. R. 4943. A bill to extend the authority of the Administrator of Veterans' Affairs to continue and establish offices in the territory of the Republic of the Philippines; to the Committee on Veterans' Affairs.

By Mr. BRYSON:

H. J. Res. 294. Joint resolution to amend section 4, paragraph (b), of Public Law 395, Eightieth Congress (ch. 526, 1st sess.); to the Committee on Banking and Currency.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BUFFETT:

H. R. 4944. A bill for the relief of Douglas S. Williams, a minor; to the Committee on the Judiciary.

By Mr. CUNNINGHAM:

H. R. 4945. A bill for the relief of Frank F. Miles; to the Committee on the Judiciary.

By Mr. GRANT of Indiana:

H. R. 4946. A bill to legalize the admission into the United States of Chang Ha Kim; to the Committee on the Judiciary.

By Mr. LODGE:

H. R. 4947. A bill for the relief of Miss Ethel S. Wakeman; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1119. By Mr. CHIPERFIELD: Petition of citizens of Knox County, Ill., in support of universal military training; to the Committee on Armed Services.

1120. By Mr. MARTIN of Massachusetts: Petition of Edwin S. Pink and sundry citizens of Massachusetts, advocating enactment of universal military training; to the Committee on Armed Services.

1121. By the SPEAKER: Petition of the American Legion, of Albuquerque, N. Mex., petitioning consideration of their resolution with reference to the treatment of men who were at Bataan; to the Committee on the Judiciary.

1122. Also, petition of Boston Archdiocesan Union of Holy Name Societies, petitioning consideration of their resolution with reference to the Most Reverend Alois Stepinac, archbishop of Zagreb, Yugoslavia; to the Committee on Foreign Affairs.

1123. Also, petition of Gary B'nai B'rith Lodge, No. 831, of Gary, Ind., petitioning consideration of their resolution with reference to enactment of the Stratton bill, H. R. 2910; to the Committee on the Judiciary.

1124. Also, petition of the city of Milwaukee, Wis., petitioning consideration of its resolution with reference to measures recommended by the Special Committee on Living Costs and Food Conservation; to the Committee on Banking and Currency.

1125. Also, petition of the city of Milwaukee, Wis., petitioning consideration of its resolution with reference to traffic relief through the construction of express highways; to the Committee on Public Works.

SENATE

WEDNESDAY, JANUARY 14, 1948

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

We are glad, our Father, that troubles are cannibals—the big ones eat up the little ones.

But may it not be so with our duties and responsibilities. Help our Senators to keep a sane perspective, lest the big issues overshadow the lesser ones, and they fail to do Thy will with them. In all things, big and little, reveal to us Thy wisdom and Thy love.

Through Jesus Christ our Lord. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
PRESIDENT PRO TEMPORE,
Washington, D. C., January 14, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. HARRY P. CAIN, a Senator from the State of Washington, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. CAIN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Monday, January 12, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its reading clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 2759. A bill to amend the Interstate Commerce Act, as amended, so as to provide limitations on the time within which actions may be brought for the recovery of undercharges and overcharges by or against common carriers by motor vehicle, common carriers by water, and freight forwarders; and

H. R. 4071. A bill to amend sections 301 (k) and 304 (a) of the Federal Food, Drug, and Cosmetic Act, as amended.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Acting President pro tempore:

H. R. 389. An act for the relief of the dependents of Carl B. Sanborn;

H. R. 645. An act for the relief of Ben W. Colburn;

H. R. 769. An act for the relief of the estate of Ruth Horton Hunter;

H. R. 1155. An act for the relief of the estate of W. H. Rodgers, deceased;

H. R. 3754. An act for the relief of Oscar and Anna Carlblom.

ATTENDANCE OF A SENATOR

JOHN H. OVERTON, a Senator from the State of Louisiana, appeared in his seat today.

NECESSITY OF AN ADEQUATE AIR FORCE

Mr. LODGE. Mr. President, in this morning's paper is the announcement by the President's Air Policy Commission that our present Air Force, with its 55 groups of 580 heavy bombers, 2,300 fighters, and 8,000 other planes, is inadequate even today and would be hopelessly wanting in 5 years.

This is the latest survey affecting the defense of the United States and, of course, it is completely authoritative. It is of particular interest to note that the Commission recommends as a first step the building up of a first-line force of 12,400 new planes organized into 70 regular Air Force air groups. Added to that would be 27 National Guard and 34 Reserve groups.

In the Boston Herald of last Sunday appeared an article by Gen. H. H. Arnold, wartime chief of our Air Force, which states:

Any potential enemy knows our military situation; the only ones who do not realize it are our own people. The cold truth is that at present we are almost as badly off, in a military sense, as we were before Pearl Harbor. * * * Our Air Force today is a one-punch outfit. * * * We are little better than a third-rate power in the air. * * * In a very few years, every last airplane will be obsolete.

Of course, we say we have the atomic bomb. We comfort ourselves by stating over and over that it would take Russia 2 or 3 or 4 years to get that bomb into mass production. But do we remember how long it took us, last time, to get ourselves ready? If we started rebuilding at full speed, tomorrow morning, we would require several years to reach our full fighting strength. * * * Five full years were consumed last time in reaching our maximum in air power.

General Arnold makes precisely the same recommendation as is made by the President's Air Policy Commission in the paper this morning. He makes this statement:

The minimum requirement for the Nation's air security is an air force in being of 70 combat groups.

Late at the last session of Congress, I offered an amendment to the Army appropriations bill which would have provided the funds for 70 air groups. It received a good deal of support on the floor of the Senate, but it was not adopted. I rise this morning to express the hope that at this regular session of Congress the Appropriations Committee will not be bound by any short-sightedness or lack of understanding on the part of the Bureau of the Budget, and that it will include in the appropriation bill adequate funds for 70 air groups. We must have an air force in being, an air force which is immediately ready, not a skeleton air force. For this reason 70 air groups are the minimum.

I ask unanimous consent to have printed at this point in the RECORD the article by Gen. H. H. Arnold, entitled "We'll Lose the Next War."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WE'LL LOSE THE NEXT WAR

(By Gen. H. H. Arnold)

We won the last war. And it's the last war we'll ever win. If we have another, this Nation will lose.

We'll lose, and the enemy we fight will lose, because victory in atomic warfare is no longer possible. One nation cannot defeat another nation today. That concept died with Hiroshima. War is like fire: you can prevent a fire, or you can try to put it out, but you can't "win" a fire, because fire is destruction.

If we fought Russia, the best we could hope to achieve is a moral victory, and that would be small comfort to the remnants of our people, crawling amid the burnt-out foundations and charred chimneys of a ruined nation.

So we must not, we cannot, talk about waging war with Russia. Even if we wiped out Russia, we would be wiped out in the process. War itself is defeat. We must talk about waging peace. We must wage peace with all the air power, with all the machines and money and men that we used to fight Germany and Japan. We must be stronger than any other nation in the world, because I am convinced we are one of the few nations in the world today that genuinely, devoutly, and unselfishly want peace.

Where do we stand, then, at this most critical moment in our Nation's history?

How does our air power compare today with that of other nations, either potential allies or potential enemies? Are we strong enough to prevent another war?

ONE-PUNCH OUTFIT

During the war, as commanding general of the Army Air Forces, I was responsible for two and a half million men. I still feel a deep responsibility toward these men, and I believe they want to know the facts.

That is why I am breaking a 2 years' silence to state these facts frankly. Any potential enemy knows our military situation anyway; the only ones who do not realize it are our own people. The cold truth is that at present we are almost as badly off, in a military sense, as we were before Pearl Harbor.

If another attack comes, the first blow will again fall through the air. Our Air Force would hit back with all the power it has. It could probably hit the enemy a staggering blow. But then it would be all over for us. Our Air Force today is a one-punch outfit. Without the ability to launch a sustained counteroffensive, we would have to surrender—or be annihilated.

We are little better than a third-rate power in the air. We have about 3,700 first-line aircraft in flyable condition, but more than half of these are being used for training and are not ready for combat. We have another 5,900 or so first-line planes in storage, but to put them in combat readiness would take from 3 to 6 months. And, remember, for many of our first-line aircraft in operation, and for all of our aircraft in storage, time is running out fast. In a very few years, every last one will be obsolete.

IT TAKES TIME

Of course, we say, we have the atomic bomb. We comfort ourselves by stating over and over that it would take Russia 2 or 3 or 4 years to get that bomb into mass production. But do we remember how long it took us, last time, to get ourselves ready? If we started rebuilding at full speed, tomorrow morning, we would require several years to reach our full fighting strength.

All the planes and all the engines we used in World War II were on the drawing boards or in actual production at the time of Pearl Harbor, yet American aircraft production did not reach its peak until 1944.

Five full years were consumed last time in reaching our maximum in air power. And at that time we had strong allies to help give us the needed time. Our own factories were never under enemy bombardment. There were no atomic missiles to slow or cripple our production. Even at that, we barely made it: if we had been just a little more tardy, Germany's V–2 program would have been successfully launched, and we would probably still be fighting today. Our margin of victory was perhaps only a matter of weeks.

When Germany surrendered, the Air Force had more than 43,000 combat aircraft. What is more, there were 14,000 fighter pilots and 21,000 highly trained air crews to man our bombardment-type planes. At the time of Japan's surrender, we had 2,865 of the B–29 Superfortresses that had smashed and seared Japan's war economy to a state of impotence.

American air power hovered for a moment at that magnificent height. Then, with the war over but with the peace yet to be won, the cries for demobilization mounted in America and echoed around the world. They did what the guns of the enemy had never done. Within a few short months, precipitous demobilization had so riddled the Air Force's wings that not one group was fit for combat.

To be sure, we have made some recovery since that low ebb of our national strength. America is beginning to realize that its part in the Allied victories has placed us inevitably in a position of world leadership. We have begun to rebuild our military position.

But we are doing it far too slowly to be safe. The minimum requirement for the Nation's air security is an air-force-in-being of 70 combat groups, supported by the necessary number of service organizations. Although the Air Force was able to activate 55 of these groups by the end of last year, there are funds to sustain the remaining 15 on a skeleton basis only. And a glance at the future is even less encouraging. The Air Force budget for 1948 will permit the maintenance of only 40 combat groups—not much better than half the minimum requirement for the safety of the country.

WE'RE STALLING

Nor does the picture become any brighter when we look at aircraft production. The current Air Force budget allows us to purchase less than 1,500 aircraft of all types this fiscal year. This is just half of the 3,000 new aircraft the Air Force has stated must be procured each year to defend our shores.

Worse even than the decline of our military strength is the deterioration of our national pride. We are growing apathetic toward all national security matters. We hesitate and fumble and stall. We let the Congress cut military appropriations drastically, we debate endlessly over universal training, we let our strength dwindle a little more each day.

These are the plain and chilling facts. We have no time to lose; this golden opportunity to rebuild our military power may not last much longer. It will be too late to start after we are attacked. There are several basic steps that we must take at once to insure the prompt recovery of our former position as the strongest nation in the world. These may be summarized under four headings:

1. A balanced national defense

We must maintain an adequate Army, Navy, and Air Force as a deterrent to any potential aggressor, and as a power actually to stop war. If war does come, our first major task will be the air defense of the United States, its Territories and possessions. After that, it would be the task of the Air Force to blunt the enemy's offensive capability through strategic bombardment. This would give us time to build our strength to the point where we could take the initiative.

Once this build-up of offensive strength had been attained, our Air Force would have to launch a full-scale strategic offensive to destroy completely the war industry and the war economy of the enemy nation. Then, when this phase was completed, our Air Force would join with our ground and naval forces to exploit the effects of our offensive, and to establish control over the enemy nation.

Our Air Force today is woefully inadequate to perform this task. There is no threat to American sea power in the world; but American air power is dangerously below par. To give America a balanced defense, therefore, we must first of all increase the Air Force's share of our defense budget so it can perform its duty the way it is expected to.

2. Industrial preparedness

The heart and sinews of modern war lie in a nation's production. We must inaugurate a program of industrial preparedness, which will enable industry to maintain pilot plants, to stock pile machine tools, to redesign weapons and adapt them to mass production—in short, to take all steps necessary to insure volume output in a minimum time if another war should ever start.

3. Reserve program

We must support a Reserve program which will enable our Army, Navy, and Air Force-in-being to expand rapidly in the event of war. The Air Force budget for 1948 will allow some form of training for only 50,000 members of all three civilian components—the Air Reserve, the Air National Guard, and the Air ROTC. While over 100 Air Reserve training detachments are needed, budget cuts have reduced our Reserve training facilities to 42. These budget cuts must be restored at once. Training takes time; and there may not be much time.

We must change many other old ideas, and fit them to the modern concept of war. Our commercial air lines, for example, form a very important part of our whole Reserve system. We must keep our air lines healthy and strong, because we may need them in a hurry if a Pearl Harbor happens again.

4. Universal training

Last, but not least, we must establish a program of universal training, to give the three services the trained manpower they need to insure peace. This program has been called for repeatedly by leading statesmen, clergymen, and military men. The temper of the times makes imperative that we set it in motion without further delay.

We cannot win another war. No one can win another war. Therefore, we must not fight another war. Our only hope in this atomic age is to apply our strength firmly and steadily for peace among nations. This is in keeping with our history, our traditions. We must maintain our strength—not to use as a belligerent, but to buttress our position as the world's referee for peace. That means that what we built up together for victory should not be allowed to go to seed. We must work for peace as wholeheartedly, as devotedly as we worked for victory.

FOLSOM DAM ON AMERICAN RIVER, CALIF.—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 496)

The ACTING PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read by the Chief Clerk and referred to the Committee on Public Works.

(For President's message, see yesterday's proceedings of the House of Representatives on p. 137.)

THE PRESIDENT'S ECONOMIC REPORT (H. DOC. NO. 498)

The ACTING PRESIDENT pro tempore laid before the Senate the following communication from the President of the United States, which was read by the Chief Clerk, and, with the accompanying report, referred to the Joint Committee on the Economic Report:

THE WHITE HOUSE,
Washington, D. C., January 14, 1948.

The honorable the PRESIDENT OF THE SENATE,
The honorable the SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIRS: I am presenting herewith my Economic Report to the Congress, as required under the Employment Act of 1946.

In preparing this report I have had the advice and assistance of the Council of Economic Advisers, members of the Cabinet, and heads of independent agencies.

Respectfully,

HARRY S. TRUMAN.

TAX REFUNDS

The ACTING PRESIDENT pro tempore laid before the Senate a letter from the Acting Secretary of the Treasury, transmitting, pursuant to law, a report of refunds of internal revenue in excess of $500 made by the Bureau of Internal Revenue during the fiscal year ended June 30, 1947, on account of taxes illegally or erroneously collected, showing the names and addresses of the individual taxpayers and the amounts refunded, which, with an accompanying report, was referred to the Committee on Finance.

PETITIONS

The ACTING PRESIDENT pro tempore laid before the Senate the following petitions, which were referred as indicated:

A petition signed by the officers of the Buncombe County Unit of the Southern Pension Association and sundry citizens, all in the State of North Carolina, praying an amendment to the Social Security Act providing relief for the aged; to the Committee on Finance.

Resolutions adopted by the Los Angeles (Calif.) Branch of the National Customs Service Association, favoring the enactment of legislation beneficial to Federal employees; to the Committee on Post Office and Civil Service.

A resolution adopted by the Board of Supervisors of the City and County of Honolulu, T. H., favoring statehood for Hawaii; to the Committee on Public Lands.

HIGH PRICES OF FOOD PRODUCTS—LETTER FROM MELVIN E. TESKE

Mr. CAPPER. Mr. President, I have received a very interesting letter from a Kansas farmer, Melvin E. Teske, of Wheaton, Kans., which I should like to bring to the attention of the Senate. I therefore send it to the desk and ask unanimous consent to have it published in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WHEATON, KANS., *December 12, 1947.*

DEAR SIR: I wish to give you my view of conditions. Conditions are tough. People are complaining about the high price of meat. This is all wrong. Let's take poultry for instance. I'll give 1941 prices with 1947 prices.

1941: Eggs, 45 cents; corn, 60 cents; hens, 14 cents; roosters, 20 cents.

1947: Eggs, 43 cents, 5 percent down; corn, $2.52, 425 percent up; hens, 13 cents, 6 percent down; roosters, 16 cents, 20 percent down.

We pay 4 times as much for our feed now than in 1941 and get 2 cents less per dozen eggs than in 1941. The last 2 years we have had droughts in this community. Our cattle is all that keeps us going. In 1941 and 1942 we raised 1,000 chicks yearly. Last year we had 100 hens left. I switched to raising cattle as the price of feed increased and egg prices declined. Last spring chicks were burned by the million because no one would buy them. Then the papers put out eggs would be $1 a dozen by fall. Some of us suckers fell for it. I now have 175 hens. They eat twice as much as they bring in. The neighbors and us don't know what to do with our chickens. Old hens are cheaper than tankage in the long run so we feed them to our hogs. We butcher them and pack them in lockers. We did not raise feed so we have to buy it all. If poultry and eggs are high priced when the city people buy them it's because of the middleman, not the farmer. When eggs get to $1 a dozen, we will raise chickens again, not before, if the price of feed stays as high as it is: 1946, $1.12 to $1.20; 1947, 80 cents to $2.52.

DAIRYING

A year ago we got $1.12 per pound of butterfat. Now we get 80 cents. Last year corn was $1.20 and now it is $2.52. Can't something be done to balance these? This is outrageous. This does not bother me much because I switched to beef and ranching, but if I had kept on raising chickens and dairying, I would probably be going broke like some other small farmers.

I think the AAA is a good administration and should be extended through 1948 with a few added provisions. If the farmer will have his prairie sod tested to find what it lacks, the Government should pay for half the fertilizer he puts on. This would boost meat production from grass and save grain which is badly needed. Cattle fattened on grass tastes just as good as corn-fed ones. No big shot needs better meat than the farmer and the farmer always butchers a grass-fed one. Next fall we'll remember Mr. Truman's eggless Thursday. It's the "bunk."

Sincerely,

MELVIN E. TESKE.

REPORTS OF A COMMITTEE

The following reports of a committee were submitted:

By Mr. WATKINS, from the Committee on Public Lands:

S. 773. A bill authorizing the issuance of a patent in fee to Mrs. Mary E. Leaf; with an amendment (Rept. No. 820);

S. 1485. A bill to authorize the Secretary of the Interior to dispose of certain lands heretofore acquired for the Albuquerque Indian School, N. Mex.; without amendment (Rept. No. 814);

S. 1733. A bill to authorize payment to certain enrolled members of the Seminole Tribe of Indians under act of July 2, 1942 (Public, No. 645, 77th Cong.); without amendment (Rept. No. 815);

H. R. 1049. A bill to repeal certain acts of Congress, known as Indian liquor laws, in certain parts of Minnesota; without amendment (Rept. No. 816);

H. R. 2361. A bill to authorize the filing of actions in State courts to quiet title to lands described in a treaty between the United States and the Delaware Indians, dated October 3, 1818; with amendments (Rept. No. 821);

H. R. 3153. A bill to provide for the sale or other disposal of certain submarginal lands located within the boundaries of Indian reservations in the States of Montana, North Dakota, and South Dakota; with amendments (Rept. No. 822);

H. R. 3322. A bill to facilitate rights-of-way through restricted Osage Indian land, and for other purposes; with amendments (Rept. No. 823); and

H. R. 3326. A bill to provide for the granting of certificates of competency to certain members of the Osage Indian Tribe in Oklahoma, and for other purposes; without amendment (Rept. No. 817).

By Mr. BUTLER, from the Committee on Public Lands:

S. 1591. A bill to transfer certain transmission lines, substations, appurtenances, and equipment in connection with the sale and disposition of electric energy generated at the Fort Peck project, Montana, and for other purposes; without amendment (Rept. No. 812).

By Mr. ECTON, from the Committee on Public Lands:

S. 400. A bill authorizing the issuance of a patent in fee to Mabel Townsend Pretty on Top; with an amendment (Rept. No. 818); and

S. 401. A bill authorizing the Secretary of the Interior to issue a patent in fee to Clarence M. Scott; with an amendment (Rept. No. 819).

By Mr. O'MAHONEY, from the Committee on Public Lands:

S. 1407. A bill authorizing the issuance of a patent in fee to Robert E. Doyle; with amendments (Rept. No. 824); and

S. 1517. A bill authorizing the issuance to James Perry Doyle of a patent in fee to certain lands in Big Horn County, Mont.; without amendment (Rept. No. 813).

REPORTS OF COMMITTEES ON PERSONNEL AND FUNDS

Pursuant to Senate Resolution 123, Eightieth Congress, first session, the following reports were received by the Secretary of the Senate:

REPORT OF COMMITTEE ON FOREIGN RELATIONS

UNITED STATES SENATE,
January 12, 1948.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eightieth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from July 1, 1947, through December 31, 1947, together with the funds available to and expended by it and its subcommittees:

Name	Profession	Rate of gross annual salary	Total salary received
Francis O. Wilcox	Chief of staff	$10,000.00	
Richard H. Heindel (appointed Oct. 23, 1947).	Professional staff.	10,000.00	
Thorsten V. Kalijarvi.	do	9,129.12	
C. C. O'Day	Clerk	[1] 7,549.08 [2] 8,576.10	
Emmett M. O'Grady.	Assistant clerk.	[4] 14,040.38 [2] 4,536.97	
Isabel M. Smith	do	[3] 3,378.27 [2] 4,040.38	
Morella R. Hanson	do	[1] 2,964.45 [2] 3,709.33	
Mary Shepard	do	[3] 3,461.04	

[1] Through Dec. 9, 1947.
[2] Beginning Dec. 10, 1947.
[3] Resigned Dec. 15, 1947.

Funds authorized or appropriated for committee expenditure	$10,000.00
Amount expended during period Jan. 1 through June 30th, previously reported	2,138.66
Amount expended during period July 1 through Dec. 31st, 1947	4,650.76
Balance unexpended	3,210.58
Funds authorized or appropriated for subcommittee under provisions of S. Res. 161	$25,000.00
Amount expended	4,307.98
Balance unexpended	20,692.02

A. H. VANDENBERG,
Chairman.

REPORT OF COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

UNITED STATES SENATE,
January 13, 1948.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eightieth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from July 1, to December 31, 1947, together with the funds available to and expended by it and its subcommittees:

Name	Profession	Rate of gross annual salary	Total salary received
Edward Jarrett	Clerk	$8,339.10	$4,169.55
Edward Cooper	Professional staff member.	8,339.10	4,169.55
Halford G. Davis	do	8,339.10	4,064.18
Vera Burgess	Clerical staff	4,619.73	2,240.85
Harriet Gray	do	3,626.56	1,623.56
Dorothy Prout	do	3,626.56	1,623.56
Martha Shaffer	do	3,212.74	821.00
C. H. Dolan	Air accident investigator (temporary).	8,339.10	4,169.55

Funds authorized or appropriated for committee expenditure	$29,687.56
Amount expended	3,256.36
Balance unexpended	26,431.20

WALLACE H. WHITE, Jr.,
Chairman.

REPORT OF COMMITTEE ON LABOR AND PUBLIC WELFARE

UNITED STATES SENATE,
January 13, 1948.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eightieth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from July 1

to December 31, 1947, together with the funds available to and expended by it and its subcommittees:

Name	Profession	Rate of gross annual salary	Total salary received
Philip R. Rodgers	Clerk	$9,050.11	$4,465.77
Earl B. Wixcey	Assistant clerk.	7,549.08	3,774.54
Paul Sample	Clerical assistant.	4,702.50	2,351.28
Crawford C. Heerlein.	do	4,123.08	2,027.06
Vivien Harman	do	3,212.74	1,606.42
Dorothy Murphy	do	2,964.45	1,482.18
Francis G. Cornell [1]	Professional staff member.	9,050.11	2,262.51
Gerard D. Reilly [2]	do	10,000.00	833.33
Thomas E. Shroyer.[2]	do	10,000.00	833.33

[1] Employment terminated Sept. 30, 1947.
[2] Employment terminated July 31, 1947.

Jan. 1–June 30, 1947	$10,000	
July 1–Dec. 31, 1947	8,000	
Funds authorized or appropriated for committee expenditure		$18,000.00
Jan. 1–June 30, 1947	$3,660.00	
July 1–Dec. 31, 1947	3,533.35	
Amount expended		7,193.35
Balance unexpended		10,806.65

ROBERT A. TAFT,
Chairman.

REPORT OF COMMITTEE ON THE JUDICIARY

UNITED STATES SENATE,
January —, 1948.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eightieth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from July 1, 1947, to December 31, 1947, together with the funds available to and expended by it and its subcommittees:

Name	Profession	Rate of gross annual salary	Total salary received
Richard Arens	Professional staff (legal).	$7,944.09	$3,972.05
Maurice Covert	do	7,944.09	3,899.94
Joseph A. Davis	Assistant clerk	7,944.09	3,972.05
Miriam O. Fox	Stenographer	4,040.38	2,020.19
Helen W. Ganss	do	3,461.04	1,730.52
Margaret Holland	do	3,212.74	1,592.58
Mary Rogers	do	4,040.38	2,020.19
J. Carlisle Ruddy	Professional staff (legal).	7,944.09	3,972.05
H. R. Wilde	Clerk of committee.	10,000.00	5,000.00
Robert B. Young	Professional staff (legal).	7,944.09	3,972.05

Funds authorized or appropriated for committee expenditure		$35,000.00
Amount expended		10,081.00
Balance unexpended		24,919.00

ALEXANDER WILEY,
Chairman.

REPORT OF COMMITTEE ON THE JUDICIARY—SUBCOMMITTEE TO INVESTIGATE IMMIGRATION AND NATURALIZATION, PURSUANT TO SENATE RESOLUTION 137, EIGHTIETH CONGRESS

UNITED STATES SENATE,
January 9, 1948.

To the SECRETARY OF THE SENATE:

The above-mentioned committee, pursuant to Senate Resolution 123, Eightieth Congress, first session, submits the following report showing the name, profession, and total salary of each person employed by it and its subcommittees for the period from July 1, 1947, to December 31, 1947, together with the funds available to and expended by it and its subcommittees:

Name	Profession	Rate of gross annual salary	Total salary received
Thomas J. Davis	Investigator	$5,695.66	$1,993.44
John A. Loftus	do	5,695.66	1,898.52
Guy M. Massey	do	5,695.66	1,993.44
Fred M. Mesmer	do	5,695.66	1,993.44
Margaret P. Hogan	Stenographer	3,626.56	1,440.53
Lois C. Odham	do	3,626.56	1,259.20
James C. Messersmith.	Clerk	5,695.66	1,993.44

Funds authorized or appropriated for committee expenditure		$50,000.00
Amount expended		16,962.79
Balance unexpended		33,037.21

CHAPMAN REVERCOMB,
Chairman.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

(Mr. KEM introduced Senate bill 1977, to amend the act entitled "An act to authorize leases of real or personal property by the War and Navy Departments, and for other purposes," approved August 5, 1947, so as to permit State and local taxation of property leased thereunder, which was referred to the Committee on Armed Services, and appears under a separate heading.)

By Mr. MURRAY:

S. 1978. A bill authorizing the issuance of a patent in fee to Thomas A. Pickett; to the Committee on Public Lands.

By Mr. GREEN:

S. 1979. A bill directing the Fish and Wildlife Service of the Department of the Interior to undertake certain studies of the soft-shell clam in Rhode Island, Massachusetts, Connecticut, and Maine; to the Committee on Interstate and Foreign Commerce.

By Mr. SALTONSTALL:

S. 1980. A bill for the relief of George M. Vaughn;

S. 1981. A bill for the relief of Chiyoko Michimoto; and

S. 1982. A bill for the relief of Herman A. Bennink; to the Committee on the Judiciary.

(Mr. WILEY introduced Senate bill 1983, to amend the Contract Settlement Act of 1944, to provide that claims under section 17 must be filed within 6 months to be allowable, to stop further accrual of such claims, and for other purposes, which was referred to the Committee on the Judiciary, and appears under a separate heading.)

(Mr. LANGER (for himself, Mr. GURNEY, Mr. BUSHFIELD, and Mr. YOUNG) introduced Senate bill 1984, to authorize an appropriation for the immediate relief of the Indians of North and South Dakota, and for other purposes, which was referred to the Committee on Public Lands, and appears under a separate heading.)

(Mr. McCARRAN introduced Senate bill 1985, to amend the act entitled "Boulder Canyon Project Adjustment Act", approved July 19, 1940, which was referred to the Committee on Public lands, and appears under a separate heading.)

By Mr. THOMAS of Utah:

S. 1986. A bill providing for the conveyance of the Bear Lake fish-cultural station to the Fish and Game Commissions of the State of Utah; to the Committee on Public Lands.

By Mr. DWORSHAK:

S. 1987. A bill to authorize the Secretary of the Interior to construct the Preston Bench project, Idaho, in accordance with the Federal reclamation laws; to the Committee on Public Lands.

By Mr. TOBEY (by request):

S. J. Res. 172. Joint resolution to authorize vessels of Canadian registry to transport iron ore between United States ports on the Great Lakes during 1948; to the Committee on Interstate and Foreign Commerce.

LOCAL TAXATION OF CERTAIN GOVERNMENT-OWNED PROPERTY

Mr. KEM. Mr. President, I introduce for appropriate reference a bill to authorize local taxation of certain Government-owned property. The bill would add a new section to the existing law authorizing the Army and Navy to lease all or part of surplus properties, to provide that any such property, or portion thereof, leased to private business shall, during the period of such lease, be subject to taxation by the State and local political subdivisions in which the property is located to the same extent as privately owned property. Provision is made for the taxes to be withheld from the rents collected and paid directly to the local taxing agencies.

As a part of the war effort the Government acquired numerous parcels of real estate, and on many of them costly buildings were erected. As a matter of convenience title to these properties was frequently vested in a Government corporation. In this way Reconstruction Finance Corporation has held title to several large defense plants. So long as the RFC owns title ad valorem taxes on the property are paid by the RFC to the units of local government.

Section 3 (a) of Public Law 364, Eightieth Congress, approved August 5, 1947, provides that all right, title, and interest of the RFC to any plants or facilities shall be transferred by it to the United States for the use of the War or Navy Departments upon certification by either of these Departments that the retention of such plants and facilities is necessary for the maintenance of an adequate Naval or Military Establishment, including industrial reserves. When title is in the United States, in accordance with general law, the property becomes tax exempt.

Properties acquired in this manner by the Navy and Army from the RFC are located in or near Kansas City, Mo., Poughkeepsie, N. Y., Columbus, Ohio, Grand Prairie, Tex., Trenton, N. J., Los Angeles, Calif., and Rockford, Ill. I am informed that consideration is being given to the acquisition of properties from the RFC at St. Louis, Mo., Cleveland, Ohio, Euclid, Ohio, Detroit, Mich., and New York, N. Y.

The situation as to taxes follows a general pattern in each instance. By way of illustration, I should like to invite the attention of the Senate to the effect of one of these transactions on the administration of local government in my home county, which is Jackson County, Mo.

In this county, the Pratt & Whitney aircraft-engine plant, located outside the city limits of Kansas City, Mo., was built and fully equipped by the Defense Plant Corporation during World War II at a cost of over $80,000,000. It consists of a group of brick, steel, and concrete

buildings containing over 3,000,000 square feet of floor space. Until recently title to this plant was in the RFC. It was declared surplus for disposal by the War Assets Administration in December 1946. While the RFC owned the plant, portions of it not needed for the public business were leased to some 22 firms engaged in private industry. During the period of ownership by the RFC taxes were paid to the local governmental agencies based upon the assessed valuation. During the year 1946 the total tax payment on the property amounted to $191,109.99. On December 31, 1947, title to this property was transferred to the United States upon certification of the Navy that it desired to retain this plant as a part of its industrial reserve. The Navy does not now intend to use all this plant for its operations. Its present purpose is to hold the property for possible future use. The Secretary of the Navy has stated that an effort will be made "to find a single tenant who may be permitted by the Department to sublease those portions of the plant for which he has no use." In other words, all or a substantial portion of this plant will be put to private use by private industry. It will not be used for public business, and yet it will be free from taxation by the local governmental units.

The Pratt & Whitney works are located in the Center school district. From 1942 to 1948 the population of the school district was almost doubled, the school enrollment increasing by an additional 735 pupils. The budget requirements of the school district have increased over 100 percent. The increase in number of students and in cost of operating the school district can be attributed almost entirely to the presence of this great industrial plant in the district. While title to the property was held by the RFC, the school district received approximately $80,000 a year in taxes. Now these revenues have been cut off, but the number of students in the district and the cost of operating the school district have not been reduced, since the plant is being used by a large number of business concerns engaged in private industry whose employees live in the district and whose children attend the public schools. The school district is faced with bankruptcy. The county charged with the responsibility of furnishing police protection and other governmental services is severely handicapped by this loss of revenue. The State of Missouri is also a loser.

This story will be found to be substantially the same in every area where the Federal Government is taking title to defense properties, thereby preventing taxation of the property by local governments.

The bill I am introducing is designed to provide revenue to the State and local governments from that part of property owned by the Federal Government and used by private industry. The existing law granting authority to the Army and Navy to lease this property specifically states that each lease shall contain a provision that if Congress makes the property taxable by the State and local governments the terms of the lease shall be renegotiated.

Thomas Jefferson described the New England township system as the "wisest invention ever devised by the wit of man for the perfect exercise of self-government," and likened our Government to the planetary system with each unit revolving within its own proper constitutional orbit. If we are to maintain our American system of local self-government, the local government units must not be starved into nonexistence by the Federal Government denying them revenue with which to carry on their functions.

The bill (S. 1977) to amend the act entitled "An act to authorize leases of real or personal property by the War and Navy Departments, and for other purposes," approved August 5, 1947, so as to permit State and local taxation of property leased thereunder, was read twice by its title and referred to the Committee on Armed Services.

AMENDMENT OF CONTRACT SETTLEMENT ACT OF 1944

Mr. WILEY. Mr. President, on January 2 there was submitted to the President pro tempore of the Senate a letter from the Secretary of the Treasury, Mr. John W. Snyder, containing a draft of a bill for amendment of the Contract Settlement Act of 1944. The purpose of this draft is to provide that claims under section 17 of the Contract Settlement Act are to be filed within 6 months in order to be allowable and the further purpose is to stop further accruals of such claims.

The afore-mentioned letter and bill were transmitted to me as chairman of the Senate Judiciary Committee. I am, therefore, now introducing, at the request of the Treasury Department, this measure. I have not had the opportunity to study it or to evaluate the merits of the bill, but I do believe that it should receive the consideration of my committee and, for that purpose, and I am introducing it by request.

I ask that, immediately following my statement, there be reprinted in the RECORD the letter from the Secretary of the Treasury describing the purposes of this bill.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TREASURY DEPARTMENT,
Washington, January 2, 1948.

The PRESIDENT PRO TEMPORE OF THE SENATE.

MY DEAR MR. PRESIDENT: There is enclosed herewith draft of a proposed bill "To amend the Contract Settlement Act of 1944, to provide that claims under section 17 must be filed within 6 months to be allowable, to stop further accrual of such claims, and for other purposes."

Section 17 of the Contract Settlement Act of 1944 deals with an entirely different subject matter from the remainder of that act. It requires contracting agencies to pay fair compensation to any person who has arranged to furnish or furnished materials, services, or facilities for the prosecution of the war without a formal contract or pursuant to written or oral instructions or request to proceed from a contracting agency. It further requires contracting agencies not to take advantage of formal or technical defects in prime contracts or in the authority of officers or agents who order materials, services, or facilities, to amend, confirm, or ratify contracts or commitments in order to cure such defects and to make fair settlement of obligations created or incurred. It is by now well settled that this section not only permits the enforcement of contracts not evidenced by writing, but creates new classes of obligations when there were mere requests or instructions to proceed and no contracts even of a defective or informal nature.

Claims totaling approximately $65,000,000 have been filed against contracting agencies under section 17, and it is believed that claims for many further millions exist but have not yet been disclosed. There appears to be no Federal statute which would stop the presentation of such claims perhaps even as long as 10 years after their alleged accrual. This situation may result in a serious detriment to the interests of the Government. Frequently the evidence which controls the decision of a section 17 claim consists of oral testimony. Some of the claims are against agencies which are now being or have been completely liquidated, for example, the Civilian Production Administration (formerly WPB); others, although against permanent agencies, are found on the alleged acts of bureaus or divisions no longer in existence, or of personnel no longer in the service of the Government. Under these circumstances the possibility of successful enforcement of fraudulent claims tends to increase as time passes. Therefore, after consulting the Contract Settlement Advisory Board created by section 5 of the act, I have decided to request the Congress to amend section 17 by cutting off any claim under section 17 not presented in writing to the contracting agency in the form required by regulation 12 of the Office of Contract Settlement, within 6 months after approval of the amendment. The enclosed draft of a bill would, if enacted, accomplish that purpose.

I have also considered the allied question of whether it would be possible for any new claims under section 17 to accrue at the present time. I am advised that according to the better view this would not be possible. However, there may be some doubt as to this because of the fact that legally the war has not ended and to a limited extent war powers are still being exercised. Therefore, the draft also includes a clause providing that no further section 17 claims shall accrue after the date of the amendment. Of course, no admission is or should be implied that any claim could accrue up to the date of the amendment and a section is included in the bill to that effect.

It is respectfully requested that you lay the proposed bill before the Senate. A similar bill has been transmitted to the Speaker of the House of Representatives.

I would be pleased to furnish any further information which the Congress may require in connection with this bill.

The Department has been advised by the Bureau of the Budget that there is no objection to the submission of this proposed legislation to the Congress.

Very truly yours,

JOHN W. SNYDER,
Secretary of the Treasury.

The bill (S. 1983) to amend the Contract Settlement Act of 1944, to provide that claims under section 17 must be filed within 6 months to be allowable, to stop further accrual of such claims, and for other purposes, introduced by Mr. WILEY, was read twice by its title and referred to the Committee on the Judiciary.

RELIEF OF INDIANS OF NORTH AND SOUTH DAKOTA

Mr. LANGER. Mr. President, on behalf of myself, my colleague from North Dakota [Mr. YOUNG], and the senior and junior Senators from South Dakota [Mr. GURNEY and Mr. BUSHFIELD], I introduce for appropriate reference a bill to authorize an appropriation for the immediate relief of the Indians of North and South Dakota, and for other purposes.

I might say, Mr. President, that last week a meeting was held at which were present the Commissioner, as well as members of the Bureau of Indian Affairs stationed in North and South Dakota, together with members of two welfare boards. It was then stated that the only money available for the relief of the Indians was the sum of $10,000, which has already been allocated. The States of North and South Dakota cooperate with the Bureau of Indian Affairs and are furnishing funds to help the Indians. In addition to that, Benson County, N. Dak., where one of the tribes of Indians is located, has appropriated $1,500. Owing to the severity of the winter and the unusual amount of snow in that region, these Indians are really hungry, and in some instances do not have enough to eat or enough to wear. Therefore, on behalf of myself and the other Senators I mentioned, I introduce the bill and ask that the appropriate committee give it immediate consideration, so that hunger and want may be alleviated among the Indians of North and South Dakota.

Mr. HATCH. Mr. President, will the Senator from North Dakota yield?

Mr. LANGER. I yield.

Mr. HATCH. I did not catch the purpose of the bill. What does it provide? I am very much interested in the matter dealt with by the bill.

Mr. LANGER. The purpose of the bill is to help the Indian tribes of North and South Dakota. It is a bill similar to that introduced by the Senator from New Mexico to help the Navajo Indians of New Mexico and Arizona.

Mr. HATCH. I supposed that was the purpose of the bill. Does the bill call for an appropriation of money?

Mr. LANGER. Yes.

Mr. HATCH. Does the bill request an appropriation by the Federal Government to provide adequate assistance to the suffering Indians of the States of North and South Dakota?

Mr. LANGER. Yes. The total sum asked for in the bill is $250,000, of which $150,000 would be made available immediately, and $100,000 would be used to provide useful employment on permanent construction projects by the Indians of the two States.

Mr. HATCH. If the Senator will yield further, I will say that I assume the Senator, by taking this position, is following the long-established and well-known policy that the welfare of the Indian is a primary obligation of the Federal Government.

Mr. LANGER. That is correct. I may say that I did all I could to assist the Navajos, when the bill which would provide aid to the Navajos was before the Senate, because I knew the great interest of the distinguished Senator from New Mexico in that problem. I was delighted to do what I could to help in the passage of that bill.

Mr. HATCH. I appreciate the attitude taken by the Senator from North Dakota in respect to the Navajos. I want to help the Senator in the passage of his bill. I assert here and now, as I have heretofore, and as I shall on every occasion I can, that the problem of the American Indian, wherever he may be, is a problem for the Federal Government.

Mr. LANGER. I thoroughly agree with the Senator.

Mr. CONNALLY. Mr. President, will the Senator yield?

Mr. LANGER. I yield.

Mr. CONNALLY. I agree with the position taken by the Senator from New Mexico. I want to call attention to the fact that Texas has a very small Indian population. We have a little colony of Indians in Texas called the Alabama Indians. Until a few years ago the Federal Government did not give them a dime. The State of Texas appropriated money to pay for lands and build houses, and furnish such aid as those Indians received. We were finally successful in inducing the Bureau of Indian Affairs to make some sort of allowances. I am not now familiar with the details. Of course, it is a Federal responsibility to give the Indians such aid as they may require. I thoroughly agree with the Senator from New Mexico.

Mr. LANGER. Knowing the warm heart of the distinguished Senator from Texas and his interest in the downtrodden, the poor, and the Indians, I am delighted to note his support for this measure.

The bill (S. 1934) to authorize an appropriation for the immediate relief of the Indians of North and South Dakota, and for other purposes, introduced by Mr. LANGER (for himself, Mr. GURNEY, Mr. BUSHFIELD, and Mr. YOUNG), was read twice by its title and referred to the Committee on Public Lands.

SCHOOL CONDITIONS AT GRAND COULEE AND BOULDER DAM

Mr. McCARRAN. Mr. President, as we construct great hydroelectric, storage, and reclamation projects throughout the country, we encounter difficulties in connection with caring for service communities. At Grand Coulee and at Boulder Dam there is a pressing condition with reference to the school children who belong to communities serving those great projects. There is in the State of Nevada today a question of taking care of the schools of Boulder City, which is a service community, and a very beautiful community, constructed around and depending upon Boulder Dam. In the near future there will be similar communities created in the State of Nebraska, perhaps in Montana, and I know in connection with Davis Dam in Arizona. We shall face in connection with each of these projects a question similar to that which exists today at Grand Coulee and at Boulder City.

During the years Boulder City has been in existence, the school problem has been dealt with from year to year through congressional action. However, during the consideration of recent appropriation bills, it has become increasingly manifest that a basic law must be devised which will provide adequate support for the schools. With that in mind, I draw to the attention of Senators from Nebraska, Washington, Oregon, and other States in which reclamation projects are contemplated, the bill I am now about to introduce, dealing exclusively with the community of Boulder City. While it is a bill designed to take care of the school problem in that particular community, a similar condition is expected to arise in each of the other communities to which I have referred. I introduce, for appropriate reference a bill dealing with the subject.

The bill (S. 1935) to amend the act entitled "Boulder Canyon Project Adjustment Act," approved July 19, 1940, introduced by Mr. McCARRAN, was read twice by its title, and referred to the Committee on Public Lands.

EXPENDITURES BY COMMITTEE ON EXPENDITURES IN THE EXECUTIVE DEPARTMENTS

Mr. AIKEN submitted the following resolution (S. Res. 189), which was referred to the Committee on Expenditures in the Executive Departments:

Resolved, That in carrying out the duties imposed upon it by subsection (g) (2) (B) of rule XXV of the Standing Rules of the Senate, or any other duties imposed upon it, the Committee on Expenditures in the Executive Departments, or any duly authorized subcommittee thereof, is authorized to make such expenditures, and to employ upon a temporary basis such investigators and such technical, clerical, and other assistants, as it deems advisable.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $125,000, in addition to any unexpended balance under Senate Resolution 75, Eightieth Congress, agreed to February 21, 1947, which is hereby made available for the purposes of this resolution, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee or subcommittee, as the case may be.

PROMOTION OF FOREIGN RELATIONS BY INTERCHANGE OF PERSONS, KNOWLEDGE, ETC.—AMENDMENTS

Mr. BALL submitted four amendments intended to be proposed by him to the bill (H. R. 3342) to enable the Government of the United States more effectively to carry on its foreign relations by means of promotion of the interchange of persons, knowledge, and skills between the people of the United States and other countries, and by means of public dissemination abroad of information about the United States, its people, and its policies, which were ordered to lie on the table and to be printed.

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H. R. 2759. A bill to amend the Interstate Commerce Act, as amended, so as to provide limitations on the time within which actions may be brought for the recovery of undercharges and overcharges by or against com-

mon carriers by motor vehicle, common carriers by water, and freight forwarders; and

H. R. 4071. A bill to amend sections 301 (k) and 304 (a) of the Federal Food, Drug, and Cosmetic Act, as amended; to the Committee on Interstate and Foreign Commerce.

BROTHERHOOD WEEK—STATEMENT BY SENATOR WILEY

[Mr. WILEY asked and obtained leave to have printed in the RECORD a statement by him on the subject of Brotherhood Week, the week of February 22–29, 1948, which appears in the Appendix.]

ARMISTICE DAY ADDRESS BY SECRETARY OF THE NAVY

[Mr. LUCAS asked and obtained leave to have printed in the RECORD an address delivered by Hon. John L. Sullivan, Secretary of the Navy, at Armistice Day ceremonies sponsored by the American Legion, at Arlington National Cemetery, on November 11, 1947, which appears in the Appendix.]

THE PALESTINE SITUATION—ADDRESS BY DR. ABBA HILLEL SILVER

[Mr. IVES asked and obtained leave to have printed in the RECORD an address by Dr. Abba Hillel Silver, chairman of the American Section of the Jewish Agency for Palestine and of the American Zionist Emergency Council, delivered in New York City on December 29, 1947, which appears in the Appendix.]

ECONOMY IN GOVERNMENT—ARTICLE BY SENATOR BYRD

[Mr. LUCAS asked and obtained leave to have printed in the RECORD an article entitled "Economy in Government," written by Senator BYRD and published in the Elks magazine for December 1947, which appears in the Appendix.]

WORLD PEACE—ARTICLE BY MISS NELL BATTLE LEWIS

[Mr. HOEY asked and obtained leave to have printed in the RECORD an article by Miss Nell Battle Lewis dealing with world peace, published in a recent issue of the Raleigh (N. C.) News and Observer, which appears in the Appendix.]

AWARDS TO HIGH-SCHOOL STUDENTS FOR ACHIEVEMENTS IN SCHOLASTIC JOURNALISM—ARTICLE FROM THE BALTIMORE SUN

[Mr. O'CONOR asked and obtained leave to have printed in the RECORD an article dealing with awards presented to two honor high-school students for achievements in the field of scholastic journalism, published in a recent issue of the Baltimore Sun, which appears in the Appendix.]

OUR FINAL CHOICE—ARTICLE BY W. T. HOLLIDAY

[Mr. HATCH asked and obtained leave to have printed in the RECORD an article entitled "Our Final Choice," by W. T. Holliday, president of the Standard Oil Co. of Ohio, published in the January 1948 issue of the Reader's Digest, which appears in the Appendix.]

THIRD PARTY THEME SONG: "I'M WILD ABOUT HENRY"—EDITORIAL BY DANIEL M. KIDNEY

[Mr. REED asked and obtained leave to have printed in the RECORD an editorial entitled "Third Party Theme Song: 'I'm Wild about Henry,'" by Daniel M. Kidney, from the Indianapolis Times of January 10, 1948, which appears in the Appendix.]

HENRY WALLACE'S THIRD PARTY—EDITORIAL BY DANIEL M. KIDNEY

[Mr. REED asked and obtained leave to have printed in the RECORD an editorial entitled "Henry Wallace's Third Party," by Daniel M. Kidney, from the New York World Telegram of January 8, 1948, which appears in the Appendix.]

AMENDMENT OF VETERANS' PREFERENCE ACT OF 1944—BILL INDEFINITELY POSTPONED

Mr. WHERRY. Mr. President, on the call of the calendar on Monday last, when Calendar No. 591, House bill 966, a bill to amend section 14 of the Veterans' Preference Act of June 27, 1944 (58 Stat. 387), was reached, the question arose as to whether or not an identical Senate bill had previously been passed by both the House and Senate and approved by the President. House bill 966 went over pending investigation, on the query of the Senator from North Dakota [Mr. LANGER], chairman of the Committee on Post Office and Civil Service.

I am told that an examination of the records in the Secretary's office discloses the fact that Senate bill 1494, introduced by the Senator from North Dakota, was passed by both Houses, and signed by the President on August 4, 1947. It is now Public Law 325. I ask the Senator from North Dakota if that statement is correct.

Mr. LANGER. Mr. President, the statement of the Senator from Nebraska is correct. Senate bill 1494 was passed some time ago.

Mr. WHERRY. In order to clear the calendar, inasmuch as an identical Senate bill has been passed, I ask unanimous consent that House bill 966 be indefinitely postponed and taken from the calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE DREDGE "AJAX"—BILL INDEFINITELY POSTPONED

Mr. OVERTON. Mr. President, on July 23, 1947, the Senate passed House bill 4229, providing that the Canadian-built dredge *Ajax* and certain other dredging equipment owned by a United States corporation be documented under the laws of the United States. There is now pending on the Senate Calendar, under the heading "Motions for reconsideration," a motion to reconsider the vote by which this bill was passed.

A bill ipsissimis verbis with House bill 4229 has already been enacted into law. Therefore I ask unanimous consent that the vote by which the bill passed the Senate be reconsidered, and that the bill be indefinitely postponed.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, the vote is reconsidered, and the bill is indefinitely postponed.

REHABILITATION OF THE FORT SUMNER IRRIGATION DISTRICT OF NEW MEXICO—MOTION TO RECONSIDER

Mr. CONNALLY. Mr. President, on Monday the Senate passed House bill 3834, to authorize a project for the rehabilitation of the Fort Sumner irrigation district in New Mexico, and for other purposes. I desire to spread on the RECORD a motion to reconsider in due course of time, at a later date, the vote by which the bill was passed.

The ACTING PRESIDENT pro tempore. The motion will be entered.

AMERICA'S WINTER OLYMPIC TEAMS

Mr. BRIDGES. Mr. President, I wish to take a few moments of the Senate's time to try to direct the attention of its Members and the country to a situation involving a group of America's most effective ambassadors of good will, good sportsmanship, and peace.

America's winter olympic teams are now on the European Continent preparing to compete with the representatives of other nations in the first postwar olympic contests. America's skating team is now participating in the meets at Prague and our skiing team is practicing for participation in the meets to be held at St. Moritz. The members of these teams are America's outstanding participants in skating and skiing. On their uniforms they wear the American flag, and they are in these war-torn countries abroad as the worthy representatives of American youth and as the skilled representatives of the American people as a whole.

My reason for calling the attention of the Senate and of the country to our Olympic teams today is that I have received word that they are without the financial support which is necessary if they are to go through as America's representatives in the first postwar Olympic games. I am sure all Senators will agree with me that at a time when all the world needs a vivid demonstration of the good sportsmanship and friendly competition which is so typical of our American Nation, it would be sad indeed if American representatives were forced to withdraw from Olympic competition because of the lack of financial support. Financial backing for our Olympic teams is not the province of our Government. That is understood by those who will compete at Prague and St. Moritz in America's name. The financial support for American participation in this finer phase of good neighbor relations must come from the American people. My thought is that a friendly voice in the United States Senate today might help arouse the interest of our people in the good will undertaking of representative American youth in the winter Olympic competitions, and lead to the financial support which is vitally needed at this moment. I am sure that if the people of our country are informed regarding the need for their help they will back these young Americans fully in order that we who have fought for and now work for peace may have the benefit of the help which members of American Olympic teams can give our vital cause.

My State of New Hampshire is famous, among other things, for its winter sports, and I know first-hand the good that is accomplished at home and abroad by those who engage in friendly skiing and skating competition. I hope the American public will back these American winter Olympic teams so that our competition from the United States may be effective in promoting good sportsmanship and good will and that our teams may be couriers of peace abroad.

SUBSISTENCE ALLOWANCES TO VETERANS

Mr. MORSE. Mr. President, I believe that all Members of the Senate fully appreciate the fact that in politics one must have a good sense of humor in connection with criticisms, attacks, and "smears" which appear from time to time in the press and elsewhere. I do have such a good sense of humor, and I think I have demonstrated that I can "roll with the punches." However, there are times when one must fight back a little. There are times when it is important that one keep the record clear.

As a result of certain stories which are appearing in the press today I have received a considerable amount of joshing from some of my colleagues because of the fact that my name has been linked with a lobbying project which is being conducted on Capitol Hill this week, known as Operation Subsistence. Thus a story appeared this morning in the Times-Herald of this city which indicates that the promoters of this particular lobby have linked my name with it.

I know nothing about the facts, but it is alleged in the press that at least there is a Communist source and inspiration for what is known as Operation Subsistence. It is alleged in the press that some veterans in institutions of higher learning have been encouraged to come to Washington to carry on lobbying in support of certain bills pending before the House relating to veterans' subsistence. It is alleged in the press that some of these veterans who were persuaded to come to Washington by the promoters of this lobby called Operation Subsistence have expressed to Members of the Senate—and one of them expressed the opinion to me personally—that they now believe that they were duped into coming to Washington as a part of some Communist propaganda. As I say, I know nothing about the facts, because I know nothing about the origin of the plan for the lobbying movement which is being referred to as Operation Subsistence. I have no connection with it whatsoever.

It is alleged in the press today that these veterans have been told—and one of them has stated to me personally that he has been told—that one of their friends behind this movement of Operation Subsistence is the junior Senator from Oregon. There is no basis in fact for any such representation. I do not criticize the press for carrying such a story because I have no doubt that such a representation has been made, but I do wish to point out that it is a false representation.

Hence, Mr. President, I wish to keep the record perfectly straight. I say for the record here and now that I know nothing about the movement called Operation Subsistence other than what I state in this speech. I am in no way connected with it, directly or indirectly.

Further, in regard to the veterans' legislation itself, I am very proud of the fact that my name appears on the legislation. If what is being attempted is to give the impression that I am a friend of the veterans, that is absolutely accurate, but apparently an entirely different motivation, judging from the stories in the press, is behind this particular lobby. I suppose the fact that my name appears on the veterans' legislation which is involved in this discussion serves as a springboard for creating a false impression as to my connection with some subversive element, if a subversive element in fact is attempting to carry on lobbying activities in connection with my veterans' legislation.

Let me relate a little history in regard to this legislation. Day before yesterday I was called to the reception room by a group of veterans, just as were a good number of other Senators on Monday afternoon. There I met a group of veterans, as some of the rest of the Members of the Senate did, who represented that they wished to discuss the status of my veterans' legislation. I said to those veterans exactly what already appears in the CONGRESSIONAL RECORD, and what I placed in the RECORD in my last speech on veterans' legislation, last July. I pointed out to them that I had done all that could be done in the Senate regarding my legislation, because it had already passed the Senate. I am perfectly willing to stand on my record as to what happened in the United States Senate in connection with that legislation.

I state today what I stated last July on the floor of the Senate, that the destiny of the legislation now rests with the leadership of the House of Representatives. It has passed the Senate. It cannot go to the White House until it is passed by the House of Representatives. That simply happens to be a parliamentary fact, and I pointed that out in my Senate speech in July.

So when the veterans who called me to the reception room on Monday asked me, "What can we do?" I said, "The problem rests with the House of Representatives and not with the Senate, unless an attempt is made further to amend the legislation." I said to them what I said to a large group of veterans in Oregon last week, that, so far as I am concerned, in view of the changes in the cost of living since the measure was passed in the Senate last July, I think a good case can be made for increasing the subsistence allowance in the legislation by approximately 10 percent, making it an increase of 25 percent instead of 15 percent. But I also advised the veterans whom I met in the reception room day before yesterday, as I advised the veterans in Oregon last week, that I thought the possibility of amending the legislation in any respect was a most remote possibility, and that the proper course to follow would be to get the measure pending in the House passed and on its way to the White House.

Of course, Mr. President, in my speech of last July I said, and I say now, that the responsibility for the quick passage of the pending veterans' bill rests on the leadership of the House of Representatives, and I hope they will proceed quickly to pass it. I certainly hope that they will not permit any attempt on the part of any subversive element in this country to smear any of us, either in the Senate or in the House, if such an attempt is being made, to cause them to hesitate for a moment in putting sound and needed veterans' legislation through the House just as rapidly as possible.

I make this statement today because I want my Republican colleagues in the Senate, as well as in the House, to know that my position on the legislation in question was made perfectly clear last July, perfectly clear last week in Oregon, and perfectly clear when I talked to the group of veterans day before yesterday. It has no connection whatsoever, may I say, Mr. President, with any lobbying tactics on the part of any group of Communists of non-Communists. I simply say now, as I said last July, that I think it is our duty, as representatives of the people of this county, to see that justice is done in the interests of our veterans by the passage of this veterans' legislation through the Congress and by the signing of it by the President of the United States.

I repeat now what I said last July, that I shall take my chances on the legislation being signed when it reaches the White House, because a large majority of Democratic Senators voted for it. Any argument to the effect that because the President, in his message on the state of the Union in January 1947, recommended against the passage of any veterans' legislation, I think is not applicable to this particular type of legislation. But if it is, I shall take my chances with a Presidential veto, because I think we have the votes to override a veto.

I say to the leadership of my party that this is a grand opportunity to make clear to the veterans of this country that we stand for fairness and justice for the veterans, and it is a grand opportunity to make clear to the President of the United States that when we give him an opportunity to sign fair and just legislation in the interest of the veterans he can either sign it or run his chances of a veto being overridden by the Congress. However, I am convinced that President Truman will agree with us on the merits of this legislation if the Congress gives him a chance to sign it.

Mr. President, there is another point I wish to make in regard to any Communist smear of me, and that is that I know of no one in the Senate of the United States who, on the record, has made more clear his unequivocal and absolute opposition to communism in all forms than has the junior Senator from Oregon. I know of no man in the Senate of the United States, without exception, who has made it more perfectly clear on the record that he is opposed completely, thoroughly, and absolutely to the international policies of noncooperation of Soviet Russia. I said to a very large audience in the State of Oregon last week that I wanted it definitely understood that, so far as the junior Senator from Oregon was concerned, he intended to go right down the line, point by point, with that great leader in the Senate, the distinguished Senator from Michigan [Mr. VANDENBERG] in support of the objectives of the Marshall plan. I shall remain open-minded, as I am sure Senator VANDENBERG will, to suggestions for improving the Marshall plan, but I shall support its basic objectives.

I wish to say, Mr. President, that one of the things which commends the Mar-

shall plan most highly to the Senate and the American people is the fact that Soviet Russia has announced her intention to sabotage, defeat, and prevent any effective operation of that plan. I do not know how anyone can make himself more clear in regard to his opposition to the policies of Soviet Russia and everything for which communism stands than I.

Mr. President, the position of the junior Senator from Oregon on communism is not of recent date. Go back through the record over the years, and I defy anyone to find in it a scintilla of evidence that would support any criticism or charge against the junior Senator from Oregon that he favors in any shape, way, or manner Communist principles in any form whatsoever. I say with all my vigor and with whatever ability I may possess that I intend to oppose in every form whatsoever all communistic technique, principles, and policies, not only in my own country but as a world policy.

I close, Mr. President, by saying that I think the chips are down on the table of international gambles, because—and let us be frank about it—no one can foresee with certainty what the future holds for the destiny of our Nation. But there is certainly much evidence that we are confronted with a world situation today in which one great power, possibly capable of becoming the greatest power in all history—Soviet Russia—is not giving us a demonstration of cooperative relationships as an ally, but is indicating along many fronts that she holds an unfriendly attitude toward the United States.

I lay down one simple little test which Russia can meet if she wants to demonstrate to us and to the world that she intends to promote the peace of the world. Just let her lift the iron curtain of nonaccessibility. Let her move in the sunlight of world observation. That is the first step she has to take to demonstrate that she intends to assume friendly attitudes toward us and the rest of the world. Until she does that, Mr. President, the junior Senator from Oregon will take the position in the Senate of the United States and on the platforms of America—because I think a great job of public education has to be done in the immediate months ahead in regard to this problem of foreign policy and relations with Russia—that we must keep ourselves as a nation so strong that at a moment's notice, day or night, we can demonstrate to Russia our intention and our determination to preserve the peace. Until she meets that very simple test, it will be my position that we must proceed in Europe, irrespective of Russian policy, toward the development of a sound, efficient, and workable Marshall plan which will give to the people in Europe who still are fighting the fight for freedom an opportunity to live as free men. Such an objective means, of course, that Europe must be economically rehabilitated, and the people of Europe must have an opportunity once again to sustain themselves. That is why, Mr. President, I am going to fight in this session of Congress for a workable Marshall plan. It is because I think it is essential not only to the prosperity of America but to the maintenance of peace throughout the world.

But, as I said before—and I close with this thought, Mr. President—the very fact that Soviet Russia is out to sabotage and destroy the successful operation of the Marshall plan should commend the plan to every American. Russia's opposition should lead us to pause and consider whether that opposition itself is not one of the soundest arguments for going forward without costly delay in putting the Marshall plan into operation.

Mr. HATCH. Mr. President, I wish to say that no person could be more right than the Senator from Oregon is right in the remarks he has just made. Certainly his attitude toward having Russia lift the iron curtain should be generally adopted. What he has said about maintaining our armed forces to the highest possible strength is also right. I agree wholeheartedly with what the Senator has said; but I deplore the condition of the world which forces such a policy.

Mr. President, the Marshall plan must be enacted into law. We must maintain our armed strength.

THE ST. LAWRENCE SEAWAY

Mr. WHERRY obtained the floor.

Mr. LUCAS. Mr. President, will the Senator yield to me?

Mr. WHERRY. I am glad to yield.

Mr. LUCAS. On yesterday it was reported to me, by an authority who seemed to know, that after the disposition of the so-called Mundt bill, the Senate would proceed to consider the St. Lawrence waterway treaty or agreement. I wonder whether the Senator from Nebraska can tell me anything about that.

Mr. WHERRY. I am quite satisfied that the St. Lawrence seaway legislation will not be taken up next week. It is my understanding that before it comes before the Senate, the distinguished senior Senator from Michigan [Mr. VANDENBERG], who now is conducting the hearings in the Committee on Foreign Relations, would like to be heard. With that in mind, I think the Senator from Illinois can rest assured that there is little likelihood that the St. Lawrence seaway legislation will be taken up next week.

However, I feel that in keeping with an announcement made here recently by the chairman of the steering committee, it should be said that it is likely the bill to amend the Civil Service Retirement Act will be taken up for consideration next week. I make that statement at this time for the information of all who are interested. This is not an announcement that the bill will definitely be considered at that time, for I am not sure that that can be done, inasmuch as two bills on the subject have been introduced, and I think an attempt will be made to report to the Senate the bill which most Senators will find they can support. But I certainly would take the responsibility of saying that the St. Lawrence seaway matter will not come up for consideration next week.

Mr. LUCAS. I thank the Senator for that information.

Mr. VANDENBERG. Mr. President, will the Senator from Nebraska yield to me?

Mr. WHERRY. Certainly, and I ask the Senator to excuse me for not noticing when he entered the Chamber. I should like to have him speak for himself.

Mr. VANDENBERG. Let me say that the St. Lawrence seaway bill is in charge of the Senator from Wisconsin [Mr. WILEY]. I do not know what final arrangement he has made; but it is my understanding that not later than the week after next, the seaway bill will be on the floor of the Senate.

Mr. LUCAS. I thank both Senators for that information.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORT OF A COMMITTEE

As in executive session,

The following favorable report of a nomination was submitted:

By Mr. GURNEY, from the Committee on Armed Services:

Mark Edwin Andrews, of Texas, to be Assistant Secretary of the Navy.

PROMOTION OF FOREIGN RELATIONS BY INTERCHANGE OF PERSONS, KNOWLEDGE, ETC.

Mr. WHERRY. Mr. President, inasmuch as it seems to me that the work of the Senate for today is about concluded, I now move that the Senate proceed to the consideration of House bill 3342, Calendar No. 861, a bill popularly designated as the Voice of America or the Mundt bill. I wish to have that bill made the unfinished business.

The ACTING PRESIDENT pro tempore. The bill will be read by title, for the information of the Senate.

The CHIEF CLERK. A bill (H. R. 3342) to enable the Government of the United States more effectively to carry on its foreign relations by means of promotion of the interchange of persons, knowledge, and skills between the people of the United States and other countries, and by means of public dissemination abroad of information about the United States, its people, and its policies.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Nebraska.

The motion was agreed to; and the Senate proceeded to consider the bill (H. R. 3342), which had been reported from the Committee on Foreign Relations with amendments.

RECESS TO FRIDAY

Mr. WHERRY. Mr. President, I now move that the Senate stand in recess until Friday next, at noon.

The motion was agreed to; and (at 12 o'clock and 57 minutes p. m.) the Senate took a recess until Friday, January 16, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 14, 1948:

COMMISSIONER, DISTRICT OF COLUMBIA

Guy Mason, of the District of Columbia, to be a Commissioner of the District of Columbia for a term of 3 years, and until his successor is appointed and qualified.

INTERSTATE COMMERCE COMMISSION

Walter M. W. Splawn, of Texas, to be an Interstate Commerce Commissioner for a term expiring December 31, 1954.

BUREAU OF INTERNAL REVENUE

Charles Oliphant, of Maryland, to be assistant general counsel for the Bureau of Internal Revenue, in place of John Philip Wenchel, resigned.

Mortimer Jordan, of Alabama, to be collector of internal revenue for the district of Alabama, in place of Henry J. Willingham, resigned.

John T. Jarecki, of Illinois, to be collector of internal revenue for the first district of Illinois, in place of Nigel D. Campbell, resigned.

(These officers are now serving under temporary commissions issued during the last recess of the Senate.)

COLLECTOR OF CUSTOMS

Martin R. Bradley, of Michigan, to be collector of customs for customs collection district No. 38, with headquarters at Detroit, Mich. (Reappointment.)

UNITED STATES ATTORNEY

Howard L. Doyle, of Illinois, to be United States attorney for the southern district of Illinois. (Mr. Doyle is now serving under an appointment which expired October 1, 1947.)

UNITED STATES MARSHALS

Benjamin F. Ellis, of Alabama, to be United States marshal for the middle district of Alabama. (He is now serving under a recess appointment.)

Gerald K. Nellis, of New York, to be United States marshal for the northern district of New York. (He is now serving under a recess appointment.)

Theodore B. Werner, of South Dakota, to be United States marshal for the district of South Dakota. (He is now serving under a recess appointment.)

APPOINTMENTS IN THE REGULAR ARMY OF THE UNITED STATES

To be captain

Gordon M. Johnson, AGD, O29406.

To be first lieutenants

George W. Gorman, AC, O43058.
Paul N. Harlow, AC, O31590.
Benjamin G. Musser, MC, O56894.
Howard R. Schroeder, AC, O56518.

To be second lieutenant

Kenneth B. Smith, AC, O49722.

NOTE.—The above listed officers were serving in the Regular Army in incorrect grades due to discrepancy in original records of birth. These officers were discharged from their incorrect grades on December 29, 1947, and were given recess appointment in the proper Regular Army grade on December 30, 1947.

IN THE NAVY

Admiral DeWitt C. Ramsey, United States Navy, to have the grade, rank, pay, and allowances of an admiral while serving as Commander in Chief, Pacific and United States Pacific Fleet.

Vice Adm. Forrest P. Sherman, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as Commander United States Naval Forces, Mediterranean.

Vice Adm. John D. Price, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as deputy Chief of Naval Operations (Air).

Vice Adm. Harold B. Sallada, United States Navy, to have the grade, rank, pay, and allowances of a vice admiral while serving as Commander Air Force, United States Pacific Fleet.

IN THE MARINE CORPS

Maj. Gen. William P. T. Hill to be Quartermaster General of the Marine Corps, with the rank of major general, for a period of 2 years from the 1st day of February 1948.

HOUSE OF REPRESENTATIVES

WEDNESDAY, JANUARY 14, 1948

The House met at 12 o'clock noon, and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Dear Lord, as we come into Thy holy presence, be Thou the master light for all our ways. Direct us and enjoin us to be brave and calm in the discussion of every question. In our valley of decision, lead us to acquit ourselves as true Americans, cognizant of our own defects and patient with the errors of others. We pray Thee to bless our Speaker with renewed strength, and for all who bear the authority and responsibility of leadership, may they and all citizens make the great adventure of faith, and, believing, find the inspiration to labor on. We pray in our Master's name. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries.

EXTENSION OF REMARKS

Mr. ENGEL of Michigan asked and was given permission to extend his remarks in the RECORD and include an editorial from the United Mine Workers Journal.

Mr. WELCH asked and was given permission to extend his remarks in the RECORD and include an article by Ruth Finney entitled "Public Power Lauded," which appeared in the San Francisco News.

Mr. ROBERTSON asked and was given permission to extend his remarks in the RECORD and include a letter from the Dairy Industries Association.

Mr. RAMEY (at the request of Mr. MCGREGOR) was given permission to extend his remarks in the RECORD and include a radio address.

Mr. BRAMBLETT asked and was given permission to extend his remarks in the RECORD and include a copy of a speech made by Hon. GEORGE W. GILLIE, of Indiana, chairman of the special House Subcommittee on Foot and Mouth Disease, before the forty-eighth annual conference of the Veterinary Alumni Society, University of Pennsylvania, at Philadelphia on January 6, 1948.

Mrs. ROGERS of Massachusetts asked and was given permission to extend her remarks in the RECORD and include a letter she received from the White House regarding the oil situation.

SPECIAL ORDER GRANTED

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that I may address the House today for 10 minutes following the disposition of business on the Speaker's desk and the conclusion of special orders heretofore entered.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

EXTENSION OF REMARKS

Mr. BAKEWELL asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial from the Armed Forces magazine.

Mr. TWYMAN asked and was granted permission to extend his remarks in the RECORD and include a speech made by Senator C. WAYLAND BROOKS, of Illinois, relative to the Marshall plan.

Mr. JAVITS asked and was granted permission to extend his remarks in the RECORD and include an editorial from the New York Herald Tribune entitled "Explosives for Palestine."

Mr. JAVITS asked and was granted permission to extend his remarks in the RECORD and include an address by Senator IVES on the occasion of a farewell dinner to Dr. Silver.

Mr. REED of New York asked and was granted permission to extend his remarks in the RECORD in three instances and in each instance to include extraneous matter.

Mr. MACKINNON asked and was granted permission to extend his remarks in the RECORD and to include extraneous matter.

Mr. ELLIS asked and was granted permission to extend his remarks in the RECORD and include a newspaper article.

SPECIAL ORDER GRANTED

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that on tomorrow, after the disposition of matters on the Speaker's desk and all other special orders, my colleague the gentleman from Indiana [Mr. LANDIS] may address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

THE ROAD TO SOCIALISM

Mr. MASON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute on the subject of The Road to Socialism and to extend and revise my remarks and include a short statement from David Lawrence on the same subject.

The SPEAKER. Is there objection to the request of the gentleman from Illinois [Mr. MASON]?

There was no objection.

Mr. MASON. Mr. Speaker, the streams of American risk capital are rapidly dry-

ing up. Our people are saving and investing very little these days. During the prewar days we saved 25 percent of our national income and invested those savings in ever-expanding American business enterprises. Today we are saving only 6 percent of our swollen national income; therefore, the streams of risk capital needed for the expansion of industry, the creation of jobs, and the production of scarce goods have become tiny trickles and are rapidly drying up altogether.

Great Britain, before World War I, also saved 25 percent of her national income. After World War I, Great Britain's savings kept dwindling until they became almost nil. As a result, her industrial plants and her mines—for lack of new capital—deteriorated and became obsolescent. The strain of World War II was too much for these starved industrial plants, and so we had to come to her rescue with over $30,000,000,000 worth of lend-lease materials. After World War II, Great Britain was forced into Government ownership and socialism, because the Government was the only source from which capital could be secured for the rehabilitation of British industry. What is true of Great Britain is also true of France and Italy.

Mr. Speaker, are stifling taxes, bureaucratic restrictions, and Government encroachment upon American business forcing American industry to travel today along the same road Great Britain and France have traveled, the road that leads to socialism? Is not it about time for our bureaucrats in Washington to stop, look, and listen?

David Lawrence speaks with authority when he says:

> If the risk capital system is to survive, and private individuals, instead of a socialistic government, are to furnish the capital for improvement of our plants and productive facilities in order to produce more goods and bring down prices, there must be savings over and above the needs for household expenses. It is from the savings of the investor class that funds must be obtained for working capital in American enterprises.

WISCONSIN NEWSPAPER OPPOSES MARGARINE TAX

Mr. BUCK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BUCK. Mr. Speaker, even Wisconsin, claimed to be the greatest dairying State in the Union, is beginning to see the light on margarine. I append an editorial advocating removal of all Federal margarine taxes which appeared in the December 20 issue of—believe it or not—the Milwaukee Journal:

THREE QUESTIONS ABOUT OLEO

> A Milwaukee housewife, who finds it impossible to provide near dollar butter for a family of six on a meager budget, asks three questions about oleomargarine:
>
> Why it is impossible to buy oleo in many Milwaukee stores? Why, when you can get it, is the price so much higher than in Illinois? And why don't the manufacturers color the margarine themselves and save the housewife a messy job?
>
> Those are all good questions. They merit a frank and clear answer.
>
> The reason many Milwaukee stores do not sell oleo is that, to do so, they must have both a State and a Federal license. The State license costs $25; the Federal $6. A store has to be sure of selling considerable oleo before it buys these licenses.
>
> The reason the price is higher here than in Illinois is that Wisconsin has a tax of 15 cents a pound on all oleo sold in the State. Furthermore, a wholesaler, in addition to paying the Federal license fee of $200, must pay a Wisconsin license fee of $500. The high State fee, added to the high tax, means a considerable boost in price.
>
> The reason oleo comes to the consumer white lies in the fact that there is a special Federal tax on colored margarine. There are also special fees for wholesalers and retailers of the colored product. The Federal tax on white margarine is ¼ cent a pound. The tax goes up to 10 cents a pound if the margarine is yellow. The Federal license for wholesalers is $200, if they sell only white oleo; if they sell the colored, the fee is $480. The Federal retail license similarly goes up from $6 to $48.
>
> The way to get manufacturers to color their margarine at the factory is to get the special Federal tax and license fee repealed.
>
> The way to get cheaper oleo available in more places is to get both the State and the Federal taxes and license fees largely reduced or removed altogether.

OLEOMARGARINE

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin [Mr. MURRAY]?

There was no objection.

Mr. MURRAY of Wisconsin. Mr. Speaker, I wish to say that I also on December 21 read the same editorial. Now, the Milwaukee Journal has the right to express itself on this oleo business if they wish to do so. They have expressed similar opinions for several years. There is no law against it. The gentleman from New York should be advised that when it comes to the time when he needs someone to help him put over this oleo business, I hope he will not have to depend upon a Democratic paper to do it. That does not mean anything up in Wisconsin coming from a Democratic paper, but I ask the gentleman to find any similar editorial from a Republican paper in the State of Wisconsin—yes, one—that gives any credence to this product, this concoction known as oleo.

Mr. BUCK. Mr. Speaker, will the gentleman yield?

Mr. MURRAY of Wisconsin. I yield.

Mr. BUCK. Are the oleo taxes paid by Democrats or Republicans or both?

Mr. MURRAY of Wisconsin. I presume most of them are paid by the Republicans, because they are the ones who make the money. The Democrats spend the money.

OLEOMARGARINE—DISCHARGE PETITION NO. 12

Mr. RIVERS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS. Mr. Speaker, the subject of oleo is a very vital subject to me. I rise to tell my distinguished colleague from the State of New York that I have today placed on the desk a petition to discharge my bill on this matter. Naturally, I do not want any of you to get killed in the rush to sign that petition, but you had better sign it, for you will need it, that is the only way under God's sun you will be able to get the bill pried loose from a committee on which the gentleman from Wisconsin holds membership.

EXTENSION OF REMARKS

Mr. LYNCH asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

Mr. ANGELL asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article.

Mr. MEADE of Maryland asked and was given permission to extend his remarks in the Appendix of the RECORD and include a radio address he delivered recently.

Mr. MARCANTONIO asked and was given permission to extend his remarks in the RECORD and include an address by the Honorable Henry A. Wallace on December 29.

Mr. TRIMBLE asked and was given permission to extend his remarks in the Appendix of the RECORD and include a report from the Soil Conservation Bureau.

Mr. TEAGUE asked and was given permission to extend his remarks in the Appendix of the RECORD and include a letter.

Mr. LANE asked and was given permission to extend his remarks in the Appendix of the RECORD and to include a newspaper article.

Mr. FISHER asked and was given permission to extend his remarks in the RECORD and include a program adopted by the Association of Letter Carriers which has just concluded a meeting in Washington.

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks in the Appendix of the RECORD in two instances, in one of which I show that over a billion dollars' worth of automobiles were shipped out of the United States last year, and in the other an article from Rhode Island showing that even they feel the ill effects of the new New Deal agricultural approach.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

THE BUDGET MESSAGE

Mr. POTTS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POTTS. Mr. Speaker, in the President's budget message under the subheading "Budget receipts," the President makes the comment that estimated revenues for 1949 will be greater by $1,300,000,000 than the 1948 estimate. On that prognostication, the 1949 budget is greater by almost $2,000,000,000 than the present year.

The President goes on to say that the estimates assume continuation of the present high levels of business activities and incomes, continued full employment, and, mind you, stable prices close to the present level. That to my mind indicates that the President intends to keep present inflation and terrifically high prices as they now exist. I do not think that the people of the country are going to accept that position.

But the double talk is in the words which immediately followed the President's assumption and those words are as follows:

> These assumptions presuppose an effective anti-inflation program.

So that in the one paragraph you have a Presidential comment that his budget is dependent on stable prices close to the present level, and therefore inferentially he will do everything to maintain that level, and at the same time that his assumptions presuppose an effective anti-inflation program which, to the collective mind of the people, I am sure would indicate that something ought to be done to bring down present high prices. It seems to me that the President's straddle of the political horse is a lopsided one.

EXTENSION OF REMARKS

Mr. KEATING asked and was given permission to extend his remarks in the Appendix of the RECORD and include a communication from the Honorable CHRISTIAN A. HERTER, of Massachusetts.

PERMISSION TO EXTEND REMARKS AT THIS POINT

Mr. MILLER of Connecticut. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MILLER of Connecticut. Mr. Speaker, the Washington Star of last Sunday announced that officials from the District of Columbia and 22 States now adversely affected by the fuel-oil shortage would meet here in Washington next Thursday. According to the Sunday Star, the board of managers of the Council of State Governments called on Congress to provide for administrative authority to control the shipment of oil.

This statement from the board of managers of the Council of State Governments follows:

> In the face of the fact that the supply of fuel oil is ample to satisfy the demand, the crisis that has been permitted to arise has apparently been brought about by a lack of administrative authority.

Based on that misinformation, the board then adopted a resolution urging that prompt remedial legislation be passed to assure transportation of an adequate supply of fuel oil to American homes and businesses.

It is becoming more apparent each day that someone here in Washington is deliberately misleading the oil coordinators and the Governors of States now suffering from a lack of fuel oil. The record is amply clear that the President now has complete control over the shipments abroad of fuel oil. With the exception of shipments to Canada, all other exporters must secure an export license.

As early as last June committees of this Congress made formal inquiry into the possibility of a fuel-oil shortage during the present winter. On page 11747 of the CONGRESSIONAL RECORD of December 19, our distinguished colleague the gentleman from Massachusetts [Mr. HESELTON] covered the situation very thoroughly. The gentleman from Massachusetts [Mr. HESELTON] quoted from testimony presented before three different committees of the House of Representatives, proving beyond any shadow of a doubt that the executive branch of the Government now has, and has had for some time, ample authority to control shipments of fuel oil from the United States.

As a result of the suggestion made by a member of the House Committee on Interstate and Foreign Commerce, conferences have been held with the proper representatives of the Canadian Government with a view of reducing our shipments of fuel oil to Canada for the time being. The Canadian Government seemed more than willing to reduce their imports of fuel oil from the United States by at least 50 percent.

The blame for the present shortage of fuel oil cannot be laid at the door of the Eightieth Congress. I hope that Members whose States will be represented in the Washington fuel-oil conference next Thursday direct the attention of their governors to the statement in the CONGRESSIONAL RECORD by our colleague the gentleman from Massachusetts [Mr. HESELTON].

THE ECONOMIC REPORT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 498)

The SPEAKER laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, referred to the Joint Committee on the Economic Report and ordered to be printed:

THE WHITE HOUSE,
Washington, D. C., January 14, 1948.

The Honorable the PRESIDENT OF THE SENATE,

The Honorable the SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIRS: I am presenting herewith my Economic Report to the Congress, as required under the Employment Act of 1946.

In preparing this report I have had the advice and assistance of the Council of Economic Advisers, members of the Cabinet, and heads of independent agencies.

Respectfully,

HARRY S. TRUMAN.

INCREASES IN THE RATES OF PENSION PAYABLE TO VETERANS OF INDIAN WARS

Mr. MATHEWS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 4055) to provide increases in the rates of pension payable to veterans of Indian wars and the dependents of such veterans, with the Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

> Line 5, after "any", insert "public."

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

AMENDMENT TO ARTICLES OF WAR

Mr. WADSWORTH. Mr. Speaker, on instructions of the Committee on Rules, I call up House Resolution 424 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

> *Resolved,* That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 2575) to amend the Articles of War to improve the administration of military justice, to provide for more effective appellate review, to insure the equalization of sentences, and for other purposes. That after general debate, which shall be confined to the bill and shall continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment, the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. WADSWORTH. Mr. Speaker, this resolution provides for the consideration of the bill H. R. 2575, to amend the Articles of War, as just read by the Clerk.

The rule is an open one. After 2 hours of general debate the bill will be read for amendment and the usual privilege will be extended to all members of the Committee of the Whole to express their opinions if they so desire.

Mr. Speaker, it is not my purpose to discuss the detailed provisions of this bill at the present time. I may say with much satisfaction that the discussion held in the meeting of the Rules Committee, upon which occasion representatives of the Committee on Armed Services were present and explained this bill, gave us much encouragement.

As will be remembered, toward the close of hostilities and subsequent to the close of hostilities a considerable wave of complaint was heard all over the country with respect to the court-martial system then prevalent in the Army. The Armed Services Committee embarked upon a very

thorough study of the whole question and this bill is the result of that study.

I desire to make but one other observation. The study made by the Armed Services Committee commenced long before the passage of the so-called unification bill and was finished before the passage of that bill. To all intents and purposes the Subcommittee on Armed Services had reached, generally speaking, a decision as to what should be done with reference to the court-martial system in the Army. Obviously it was impractical for that committee to embark upon a new study and endeavor to merge together legislation with respect to the Navy and its court-martial system with that of the Army.

My information is that the Armed Services Committee is embarking upon an investigation or inquiry into the necessity, perhaps, of revising the Navy procedure, and upon a later date, perhaps, the House will receive recommendations on that subject. In any event, this bill, in my humble judgment, and that of the members of the Committee on Rules who heard the discussion, accomplishes a great reform and is entitled to the favorable consideration of the House.

Mr. Speaker, I have no more requests for time. Under the rule, the minority is entitled to some time, if it desires it. Hearing no requests, Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

Mr. ELSTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2575) to amend the Articles of War to improve the administration of military justice, to provide for more effective appellate review, to insure the equalization of sentences, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 2575, with Mr. CANFIELD in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. The gentleman from Ohio [Mr. ELSTON] is entitled to 1 hour and the gentleman from Georgia [Mr. VINSON] is entitled to 1 hour.

Mr. VINSON. Mr. Chairman, I suggest that the time on the minority side be controlled by the distinguished gentleman from Texas [Mr. KILDAY].

The CHAIRMAN. The gentleman from Texas will be recognized.

Mr. ELSTON. Mr. Chairman, I yield myself 35 minutes.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I yield to the gentleman from Pennsylvania.

Mr. FULTON. I understand that both sides of the committee are in favor of this bill. I am opposed to the bill in its present writing. I should like to have some time for the opposition, and will ask either one of the gentlemen in control of the time to yield some time for the opposition, so that both sides may be stated.

Mr. ELSTON. We shall be very glad to yield some time to the gentleman.

Mr. Chairman, the purpose of H. R. 2575 is to amend the Articles of War and improve the Army system of justice.

In order that the Members may have a full appreciation of the importance of the legislation which is presented here today, I consider it both advisable and necessary to relate, in a general way, the events which have brought the subject of military justice to our attention.

During the course of World War II approximately 11,000,000 men saw service in the United States Army, and of that number approximately 80,000 were convicted by general courts martial. Even before the cessation of hostilities it was apparent to the War Department and to the Congress that a detailed study of the Army system of justice was appropriate, if not mandatory. Accordingly, in 1944 and 1945, the War Department sent Col. Phillip McCook, former prominent New York jurist, to various theaters of operation to conduct such studies. Additional reports were submitted to the War Department from other sources.

Within a few months after the end of hostilities the matter was brought to the attention of the American Bar Association, and on March 25, 1946, the War Department Advisory Committee on Military Justice was appointed by order of the Secretary of War. The committee, under the chairmanship of the Honorable Arthur T. Vanderbilt, and referred to as the Vanderbilt committee, consisted of nine outstanding lawyers and Federal jurists from eight States and the District of Columbia. From March 25, 1946, until December 13, 1946, a period of almost 9 months, the members of that committee engaged in studies, investigations, and hearings, and availed themselves of voluminous statistical data of the Judge Advocate General's Department and other sources.

At full committee hearings in Washington the Secretary of War and Under Secretary of War, the Chief of Staff, the Commander of the Army Ground Forces, the Judge Advocate General, the Assistant Judge Advocate General, numerous other officers, and the representatives of five veterans' organizations were heard. There were numerous personal interviews, supplemented by letters, and the digesting of 321 answers to questionnaires from both military and nonmilitary personnel. Additional widely advertised regional public hearings were held at New York, Philadelphia, Baltimore, Raleigh, Atlanta, Chicago, St. Louis, Denver, San Francisco, and Seattle. The subsequent report of the committee was based on these extensive inquiries.

During the Seventy-ninth Congress, a Military Affairs Subcommittee under the chairmanship of the gentleman from North Carolina, Mr. CARL T. DURHAM, devoted more than 1 year to detailed study of the Army system of justice. The report of the Durham committee has been thoroughly considered in our deliberations.

Additional studies have been conducted by special committees of the American Legion, VFW, AMVETS, AVC, the New York County Lawyers' Association, the War Veterans' Bar Association, the Judge Advocate Generals' Association, and the Phi Alpha Delta law fraternity. The reports and recommendations of each of these groups were made available to the Armed Services Committee and representatives of each of the organizations appeared before the committee in public hearings in support of their recommendations. Other witnesses, who had particular knowledge of the subject by virtue of their service and experience in the recent war, were heard.

In our opinion, the combined efforts of these organizations and individuals represented the most comprehensive study of military justice that has been conducted in the history of our country.

In general, the main accomplishments of the bill may be outlined as follows:

First. Enlisted men have been authorized to sit as members of a courts martial.

Second. It subjects officers to trial by special courts martial.

Third. It prohibits the unlawful influence of courts martial or the members thereof.

Fourth. Warrant officers are authorized to sit as members of courts martial.

Fifth. An accused, if he so desires, may have counsel at the pretrial investigation.

Sixth. Authority to grant a bad-conduct discharge has been granted to general and special courts martial.

Seventh. The review and appellate provisions have been strengthened.

Eighth. A lesser punishment than death or life imprisonment for murder or rape has been provided.

Ninth. A lesser punishment than dismissal from service for officers drunk during time of war has been provided.

Tenth. The authority of commanding officers under the one hundred and fourth article of war has been increased so far as it pertains to officers but not to enlisted men.

Eleventh. A separate Judge Advocate General's Corps has been established.

From the foregoing general summary, the following points merit additional consideration:

First. Should enlisted men be authorized to sit as members of a courts martial in the trial of other enlisted men?

The Army agrees that they should, at the option of the appointing authority. Our committee agrees that they should, at the option of the defendant and has amended section 3 accordingly. We seriously doubt that the inclusion of enlisted men as members of the court will benefit enlisted men who are defendants. However, the choice is properly a right of the defendant. Once having exercised that right he must assume the responsibility for the results of his choice.

Second. Should the trial judge advocate and defense counsel be attorneys, if available?

There is unanimous agreement that such personnel must be attorneys and we have so provided in section 8.

Third. A greater equality in the treatment of officers and enlisted men should be provided.

The committee agrees that a greater equality must be attained and has accordingly amended section 10, making officers subject to trial by special courts martial. Heretofore, the President has had authority to exempt such classes as he may designate from trial by special and summary courts martial and under that authority has exempted officers from trial by these two courts. As a result, officers have been triable by general courts martial only. This resulted in a reluctance on the part of superior commanders to subject officers to trial and possible dismissal for comparatively minor offenses for which enlisted men were tried and convicted. Section 21, page 16, provides that, in time of war, an officer, in lieu of a dishonorable discharge, may be reduced to the grade of private.

Since a commanding officer's authority under the one hundred and fourth article of war has been increased in this bill so that he may forfeit one-half of an officer's pay for 3 months, rather than 1 month, a far greater restraint on officers will be the inevitable result. Enlisted men are not subject to this increased power of forfeiture.

Fourth. Should the pretrial investigation be made mandatory and should accused be furnished counsel at such investigation?

This question presents a more difficult problem than is apparent. In our consideration of the subject of military justice we have been guided by the principle that the basic rights of an accused should be protected without encumbering the military system in such a maze of technicalities that it fails in its purpose. Upon this premise we have concluded that an investigation should precede every general courts-martial trial but that the investigation should be considered sufficient if it has substantially protected the rights of the accused. To hold otherwise would subject every general courts-martial case to reversal for jurisdictional error on purely technical grounds.

Our committee has added another safeguard in amending section 22 by providing counsel in every pretrial investigation upon the request of the accused. As a matter of custom the Army already provides such counsel in serious cases. It now becomes a matter of right, at the option of the accused.

Fifth. A more adequate review should be provided.

Any system of judicial review is complicated, technical, and difficult to understand. The principal provisions of judicial review are presently contained in Articles of War 50 and 50½. In an attempt to clarify these sections they have been rewritten in section 26 of the bill. The new section provides for a new judicial council of three general officers, in addition to the present board of review, and defines the action to be taken upon cases examined. The judicial council is vested with a very broad confirming authority. The three members of this council would be chosen upon the basis of their judgment, experience, and knowledge of the law. Whereas the board of review is chiefly concerned with the legality of the case, the judicial council is concerned not only with the legal sufficiency but with the weight of the evidence of any case which may come before it on review. The broad powers of confirmation which have been heretofore vested in the Secretary of War are now vested in this council and the Department of the Army subscribes to the propriety of this change. Except for the clemency power still vested in the Secretary of the Army and the President, which authority we have not disturbed, we may properly refer to the judicial council which we propose to create in this bill as the supreme court of the Army.

Under the present Army system it is possible for a defendant to be convicted and dishonorably discharged without having had an appellate review of the dishonorable discharge portion of his sentence. Not only is it possible, there have been many such cases, resulting in extensive criticism of the Army system. This has been corrected in section 26 (e) of the bill.

Section 28 of the bill provides that the Judge Advocate General shall have clemency power, such power to be exercised under the direction of the Secretary of the Army. This matter was considered by the legal subcommittee of the Armed Services Committee in connection with the powers of reviewing authorities. The practical result of the law is that the Judge Advocate General becomes a recommending officer and has no independent authority to exercise the power of clemency. Due to the wide disparity in sentences given for similar offenses, it was the conclusion of the subcommittee that the results which could normally be expected to come from a proper and thorough exercise of the clemency power in the office of the Secretary of War had not been obtained. This resulted in widespread criticism of the Army system and prompted the subcommittee to give the Judge Advocate General this clemency power, to the exclusion of the Secretary of War. When the matter was presented to the full committee, the then Secretary of War appeared in opposition to the committee amendment and urged that the final power of clemency be restored to his office. After due deliberation, the full committee restored the power to the Secretary of War. It is a recognized fact that administrative failures of this nature are usually the result of the stress of wartime. The increased responsibility of every higher official makes it inevitable that certain duties be delegated to subordinates, and unless those subordinates have the capabilities to meet the delegated responsibilities, the desired results will not be obtained. In restoring final clemency power to the Office of the Secretary of War, it is to be hoped that the appropriate officials will take such steps as they may deem necessary to insure that any future delegation of the power of clemency will be safeguarded by selecting the best qualified delegates of the power obtainable.

Sixth. Should command influence, with respect to the judicial acts of courts martial, military commissions, and the members thereof, be curtailed?

There is unanimous agreement that command influence has been improper and must be stopped. In addition to the provisions of section 33 of the bill, our committee has accepted that section of the Durham bill which provided for a separate Judge Advocate General's Corps. We consider these provisions adequate to stop this phase of command influence.

This brings us to the final and by far the most controversial question which our committee has considered: Should an independent Judge Advocate General's Corps, with a separate promotion list, be established?

The Department of the Army opposes the establishment of a separate Judge Advocate General's Corps. However, our committee, favors such a corps. It is important to note that every organizational representative and every individual who testified before the committee, except Army witnesses, not only favored but urged the establishment of a separate Judge Advocate General's' Corps with a separate promotion list.

Under present law command has an abnormal and unjustified influence over military justice. In opposing our decision Army authorities stressed the necessity for preserving proper discipline and for giving line commanders authority which is commensurate with their responsibility. We fully agree that discipline is of the utmost importance and must be preserved. However, we feel equally certain that in the administration of military justice there is a point beyond which the considerations of justice are paramount or at least equal to discipline. Under present law and under this bill, as amended, command has abundant authority to enforce discipline. It refers the charges for trial, convenes the court, appoints the trial judge advocate, law member, and defense counsel who must now be qualified personnel and, after the trial, reviews the case with full authority to approve or disapprove the whole or any part of the sentence.

We contend that command should ask for nothing more in the furtherance of discipline. At the conclusion of a trial, under the present system, the same officers who conducted the case return to the command of a line officer who has full authority over their efficiency ratings, promotion recommendations, leaves, and duty assignments. These officers, many of whom have families and have chosen the Army for a career, would be less than human if they ignored the possibilities of such influence. We contend that those who are charged with the impartial administration of military justice must have sufficient freedom of judicial determination to meet the responsibility.

During the course of the lengthy hearings by the legal subcommittee it became apparent that it was the majority desire to establish a separate Judge Advocate General's Corps with a separate promotion list. The then Under Secretary of War, Hon. Kenneth C. Royall, and Lt. Gen. J. Lawton Collins requested the opportunity to be heard in opposition to such a provision. Both of these witnesses appeared before the subcommittee and ably presented the views of command officers in opposition to a Judge Advocate General's Corps. In

spite of this testimony by these able and respected witnesses the subcommittee was still of the opinion that a separate corps should be established. When the matter was brought before the full committee for final action the then Secretary of War, Robert P. Patterson, and the Chief of Staff, Gen. Dwight Eisenhower, requested that they be permitted to appear before the full committee in opposition to a separate Judge Advocate General's Corps. Even though the request was unusual and was at variance with the established procedure of the committee in its consideration of subcommittee reports, the request was granted and both the Secretary of War and the Chief of Staff appeared before the committee and voiced their strenuous objections to the curtailment of the clemency power in the Office of the Secretary of War and the establishment of a separate Judge Advocate General's Corps. As hereinbefore stated, the clemency power was restored to the Secretary of War. However, the full committee endorsed the action of the subcommittee in voting to establish a Judge Advocate General's Corps with a separate promotion list.

The use of the term "independent Judge Advocate General's Corps" has been rather loose and has resulted in some unfortunate and unjustified conclusions. The primary mission of every member of the armed forces of the United States is the winning of battles in wartime and the preparation to win them in peacetime. Regardless of their technical status in the armed forces, members of the Judge Advocate General's Department or Corps have that same primary mission and we do not intend that it shall be changed. Judge Advocate officers are properly members of the Department of the Army team, and, while the duties of their assignments are necessarily noncombatant in nature, it seems wholly unjustified to say that they are less interested in the primary mission of the Army than any other member of the armed forces.

It has been said that this is another attempt to establish special privileges for another professional group. Nothing could be further from the truth. During the entire hearings, which began on April 18 and were not concluded until the latter part of June, no member of the subcommittee nor any witness who appeared before it gave the slightest intimation that he was interested in legislating for lawyers as a class. As a matter of fact, there is a shortage of qualified legal talent in the Army, and it seems inevitable that if we are to attract qualified personnel into the Judge Advocate General's Department that we must do more than has been done heretofore. The Vanderbilt committee states that approximately 25,000 lawyers applied for duty with the Judge Advocate General's Department, but less than 10 percent were accepted. The evidence was undisputed that many line commanders declined to use such legal talent as was available to them in matters of military justice, and even went so far as to reprimand those lawyers who made an honest attempt to serve the cause of justice in military trials. Even if a separate Judge Advocate General's Corps is established, the Army will have great difficulty in obtaining qualified personnel to staff such a corps. The Army will find itself in somewhat the same position as it now finds itself with respect to doctors. They are in great demand in civilian life, and it is certain that the emoluments of civil practice exceed those offered by the Army. Some inducements must be offered to retain the qualified officers now on duty and to attract qualified graduates of our law schools into the service. The present condition does neither.

The Secretary and the Chief of Staff have criticized a separate promotion list for the Judge Advocate General's Corps, stating that it is contrary to the basic provisions of H. R. 3830, the promotion bill, which was recently passed by the House and Senate. It is admitted that there are humps in certain grades in the Judge Advocate General's Department. However, any objective study of this matter will reveal that the same situation exists in other branches of the service, particularly the Air Corps. It is important to note that it is not mandatory that the Secretary of the Army fill all grades under the promotion bill. He may do so at his discretion, and it is inconceivable that he would take any action in this respect which was not uniform throughout the other branches of the service.

It seems apparent that "command" considers the Judge Advocate General's Department to be composed of a nonprofessional group, whereas we are of the opinion that the Judge Advocate's Department must be a professional group, especially trained in order that it may properly perform its function. We have been reliably informed that approximately 90 percent of the field work of the Judge Advocate's Department consists of matters relating directly to military justice and that more than 50 percent of its work in Washington is of the same nature. Another considerable function consists of the investigation and adjustment of claims. It can hardly be expected that unqualified personnel can handle these assignments. If they could, this subject would not be before us today.

The Secretary stated that the creation of a separate corps of the Judge Advocate's will not decrease the load on combat officers. We think that the creation of a separate corps would inevitably result in lessening the burden on combat officers. It is an indisputable fact that throughout the war the trial judge advocates, law members, and defense counsel, in addition to officers who investigated claims, were largely drawn from officers of the line. This resulted in those officers having a dual function and the testimony before our committee made it very apparent that the added function of military justice and claims was held to be of secondary importance.

It is difficult to determine the costs which would be incurred by the enactment of this legislation. The War Department estimated that the enactment of H. R. 2575 without our amendment would require a total of 937 officers and a comparable number of enlisted men, at a cost of $3,200,000. Our amendment proposes a corps of 750 officers and warrant officers and enlisted men in such numbers as the Secretary of the Army may determine. Since we are asking for 180 less officers than the War Department itself asked for, it is my judgment that the cost of this legislation would not be $3,200,000 but would be something less than $2,000,000. In any event, we are of the opinion that the establishment of a separate Judge Advocate General's Corps would cost considerably less than the enactment of the original provisions of this bill.

I cannot guarantee that this bill, if enacted into law, will cure all of the evils and inequities of the existing system, but I do say that, in my opinion, the bill represents the minimum action we should take. For those who may feel that we have gone too far in our efforts to revise the existing system I wish to state that the only criticism that we have received of our action, which was taken more than 5 months ago, is that we have failed to go far enough.

We are now on the threshold either of universal military training or of the maintenance of a professional army at least five times larger than that maintained before the last war. The future Army, no matter how it may be raised, will be composed of the physically fit youth of the country. The first contact with any judicial system for the overwhelming majority of these young men will be their experience with the administration of military justice. We believe that it is our duty, so far as lies within our power, to see that the system to which they are exposed is reasonably designed to achieve justice.

Mr. JENKINS of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I yield to the gentleman from Pennsylvania.

Mr. JENKINS of Pennsylvania. I have been either the president or lay member of a division general court for over a year. My only criticism would be that you have not gone far enough, particularly in divorcing the operation of military justice from the chain of command. If I understand correctly, the commanding officer still convenes the court, appoints the personnel of the court, and confirms the sentence. That is correct, is it not?

Mr. ELSTON. That is right.

Mr. JENKINS of Pennsylvania. From that confirmation is there any appeal under the provisions of this act to your judicial council; that is, any automatic appeal?

Mr. ELSTON. Yes; section 26, article 50 (f), provides that every record of trial by general court martial, the appellate review of which is not otherwise provided for, shall be examined in the office of the Judge Advocate General, and if found legally insufficient to support the findings of guilty and sentence, in whole or in part, shall be submitted to the Board of Review for appropriate action. Subsection (e) of the same section provides that no authority shall order the execution of any sentence of a court martial involving dishonorable discharge, bad conduct discharge, or confinement in the penitentiary until the appellate review provided in that section shall have been completed and unless and until any

confirming action required shall have been completed. In fact, every record of trial by general or special court martial involving a sentence to dishonorable discharge or bad conduct discharge, whether such discharge be suspended or not suspended, and every record of trial by general court martial involving a sentence to the penitentiary shall be examined by the Board of Review.

Mr. JENKINS of Pennsylvania. He has the right of appeal from the confirmation of the sentence?

Mr. ELSTON. He has.

Mr. JENKINS of Pennsylvania. Secondly, is there any restriction upon the right of the commanding officer to appoint and dismiss the court at his whim? I speak in that respect from knowledge of the fact that when a court does not please the commanding officer in the sentence imposed, that it finds itself dismissed, a new court appointed, and frequently the officers are detailed on rather undesirable assignments as the result of their action on the court.

Mr. ELSTON. I will say to the gentleman that there is nothing in this bill that prohibits that, except the provision that we have written into the bill to the effect that any effort on the part of an officer to improperly influence the court in any manner whatsoever is punishable. Under the circumstances, if it can be shown that the convening authority was dissatisfied with the verdict and assigned officers to unpleasant duties because of that dissatisfaction, that in itself would constitute a violation of one of the provisions of this bill.

Mr. JENKINS of Pennsylvania. There was another point I had in mind, and that is, I do not see anything in the bill, as I read it rather cursorily, with respect to the time within which trial must be had. I believe there are others who have that same idea in mind. Nowhere in here do I find that trial must be had within a definite period of time; in other words, the correction of the situation, which I think many of us know about, where enlisted men have been held for months without being brought to trial.

Mr. ELSTON. Of course, there might be circumstances under which an accused could not be brought to trial immediately. There is no provision as to exact time, but section 31, amending article 70, provides that when a person is arrested or confined immediate steps must be taken to try the accused, and that if there is unnecessary delay, the officer who is responsible therefor shall be punished.

Mr. JENKINS of Pennsylvania. Would the committee be willing to accept an amendment setting a time limit within which trial must be had, subject to such discretionary authority in the convening authority as the exigencies of the service might warrant?

Mr. ELSTON. We will be very glad to consider it, but I believe the section to which I refer is adequate.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I shall be glad to yield to the gentleman from New York.

Mr. KEATING. Mr. Chairman, I rise primarily to commend the chairman of the Armed Services Committee and the members, particularly the distinguished gentleman from Ohio, and the members of his subcommittee, for what appears to me to be a magnificent job. I have gone over this bill and the report with some care. It seems to me that there has been nothing of greater importance come before us, and certainly it would appear that the committee has given the most minute study to the details of this legislation. I am very happy to support it in general principle. There may be some little minor details which could still be improved, but I certainly feel that we ought to, all of us, let the committee know how grateful we are to them for this help.

Mr. ELSTON. I am sure all the members of the committee appreciate the remarks of the gentleman from New York.

Mr. McGREGOR. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I am pleased to yield to the gentleman from Ohio.

Mr. McGREGOR. I join with the previous speaker in complimenting my colleague from Ohio on the presentation of this splendid piece of legislation. I am certain all the veterans and the friends and families of the veterans will appreciate the untiring efforts of this subcommittee chairman and of the full committee in behalf of the veterans.

I know the gentleman is familiar with the fact that some months ago I introduced a bill that was submitted to his committee under which the defense attorney would be of the same rank as the attorney for the prosecution. That bill was caused by some cases of which I have personal knowledge, where I feel that an injustice was done to the defendant through his attorney because the attorney happened to be of lower rank than the attorney for the prosecution. I feel certain that my distinguished colleague has given that some consideration, and I should like to have his report on it.

Mr. ELSTON. This bill provides for the selection of counsel for an accused having the same legal qualifications as the law member of the court, although both lawyers may not be of the same rank.

Mr. McGREGOR. I thank the gentleman.

Mr. MATHEWS. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I yield to the gentleman from New Jersey.

Mr. MATHEWS. I have some questions which are purely technical.

In the first section, apparently for brevity and clarity and simplicity, the word "soldier" is defined as including a noncommissioned officer, a private, or any other enlisted man or woman. Then the bill later apparently abandons that term and uses the terms "enlisted persons" and "enlisted men" throughout. Will the gentleman explain why, after having made that definition available, the subsequent provisions of the bill appear to have abandoned it and other terms are used?

Mr. ELSTON. This section merely amends existing law, which section would necessarily refer to many other articles of war not amended by this bill.

Mr. MATHEWS. You would not have to use it also. I thought the purpose of defining the term "soldier" was to make one word cover the whole works.

Mr. ELSTON. The use of the word "soldier" may appear in other articles of war. We refer, I believe, only to enlisted men or to officers.

Mr. MATHEWS. The definition of the word "soldier" excludes an officer.

Mr. KILDAY. Mr. Chairman, will the gentleman yield? I think I can clarify that.

Mr. ELSTON. I yield to the gentleman from Texas.

Mr. KILDAY. This is the amendment of an existing Article of War. It is carried in this bill in order to add "woman." The balance of the bill may relate to enlisted men. Some of the other articles of war refer to soldiers.

Mr. MATHEWS. That is one of the questions. Now, this one has probably been taken care of, but I do not know just where. We amalgamated the services. Now we have a separate Air Force. The Articles of War, as I understand, apply only to the Army. How is the Air Force taken care of?

Mr. ELSTON. It is taken care of in this way:

The question has been raised as to whether or not the Judge Advocate General's Department of the Department of the Army may properly review courts-martial cases which originate in the Department of the Air.

At the time of the passage of the Unification Act which is now Public Law 253, Eightieth Congress, and properly referred to as the National Security Act, it was realized that there would be a period of adjustment during which time it would be determined which services within the Army should remain entirely with the Army, which services should be completely transferred to the Air Department and which services should be handled on a temporary basis by the Department of the Army for the Department of the Air. In view of this realization, section 305 (a) was included in Public Law 253 and this subsection, together with succeeding subsections, specifically provides that for a period of 2 years from the date of enactment of the bill the Secretary of Defense may designate the manner in which the transfer of particular services would be treated. It is a matter of fact that the Secretary of Defense has not transferred the functions of the Judge Advocate General's Department of the Army to the Department of the Air. At the present time the functions of military justice in the Air Department are being handled in approximately 90 percent of the cases by Air Force personnel. However, the judicial review of general courts-martial cases must be referred to the Board of Review of the Judge Advocate General's Department of the Army. There are about 40 such cases per month. There is no question about the legality of this procedure.

Mr. MATHEWS. Did the amalgamation bill provide that the Articles of War should continue to apply to the Air Corps?

Mr. ELSTON. Yes, to the extent I have just indicated.

Mr. KILDAY. Mr. Chairman, I yield myself 10 minutes.

Mr. KILDAY. Mr. Chairman, in peacetime the Army experienced practically no difficulty in the administration of justice. Prior to the war when the Army was composed of professional soldiers, all of whom knew the rules under which they were living and working, they experienced practically no difficulty. The difficulty arose when millions of civilians went into uniform, both as officers and enlisted men. Of course, these new officers and enlisted men were not professional soldiers, and they were not as familiar with the rules of the game as their professional predecessors had been. Therefore, even before the termination of the war, there was a very distinct demand that something be done toward revising the administration of military justice. This bill is a result of that demand, and the result of a study made of the subject by the committee, which indicated that revisions were essential. I want to point out that this is not a revolutionary rewriting of the Articles of War nor of the court-martial procedures. I believe that the American Bar Association studied the matter objectively. They came forward with a very detailed study of the matter and with a proper appraisal of the situation. In their report they stated:

> The Army's system of justice in general and as written in the books is a good one * * * It is excellent in theory and designed to secure swift and sure justice * * * The innocent are almost never convicted and the guilty seldom acquitted.

So we do not attempt to tear up the body of the law and the precedents which have been established since the beginning of the Nation in this revision.

The gentleman from Ohio referred to a separate judge advocate general's department. I want to make it clear at the outset that I am supporting this bill in the form in which it has been reported by the committee. I do not propose to offer any amendments to take out of the bill any of the major provisions included in it. At the present time I do not contemplate offering any amendments.

Mr. NORBLAD. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield.

Mr. NORBLAD. The fact is that this bill, as written, was very satisfactory to the American Legion, the Veterans of Foreign Wars, and the American Bar Association Committee.

Mr. KILDAY. That is my understanding. However, in view of the fact that I have not agreed with the creation of a separate Judge Advocate General's Department, I would like to state my position very briefly. I believe in the democratic system, and I offered my amendments in the committee, which were overwhelmingly defeated. I abide by the decision of the majority. I agree with the end desired to secure equal, impartial, and uniform justice. I do not believe that the creation of a separate Judge Advocate General's Department will add anything to the provisions that we have in the bill for that purpose. I do not believe they are designed to assist in improving the administration of justice. During the past 9 years I have been on the subcommittee which has worked on each promotion bill and each pay bill. I have seen every branch of the armed services ask for a separate promotion list—every branch, that is, except the fellows who do the fighting. They are the only ones who have been able to see their way clear to do the fighting and carry the guns and take care of the heavy artillery and fly the airplanes and whatnot without a separate promotion list. It is also very interesting to note that in each instance those groups which seek to secure a separate list come from well-organized professions and occupations in civil life. Of course, the infantryman has no counterpart in civil life. I do not see where making the Judge Advocate General, who is going to serve only as a law member, the trial judge advocate, the defense counsel, and reviewing authority, independent, is going to lend anything to the impartiality of the trial.

I very heartily endorse the provisions of the bill which require defense counsel to be either a member of the Judge Advocate General's Department or a qualified member of the bar of the Federal courts or of the highest court of one of the States in all instances in which the trial judge advocate holds such qualifications. I heartily endorse also the provisions which prohibit the commanding officer from intimating or directing the disposition which should be made of a case or the penalty to be imposed. Likewise, the provision which prevents him from reprimanding a member of the court for any action taken by that member while sitting on the court.

Those are things which I believe will lend themselves to fair and impartial administration of justice without interference of command, rather than the creation of a separate Judge Advocate General's Department. Of course, the enlisted men will now have the right to have members sit on their courts. I believe our report states that we doubt whether that will be resorted to very frequently. I believe it will be developed as time goes on that it was something that was desired in the abstract more than something that would be desired when an enlisted man is facing trial before a court martial. However, he does have the absolute right, when he so requests, to have not less than one-third of the members of the court be enlisted men. Of course under no circumstances can a court martial convict except on the concurrence of two-thirds of the members of the court present and voting.

Another thing that will add to the administration of military justice is the provision contained in this bill recognizing the law member of the court as the real judge of the law of the case. Under the provisions of this bill the law member has the exclusive right to rule on interlocutory questions, except on challenges, for the direction of a verdict or a finding of insanity. So that there could be no possibility of members of the court, not trained in the law and the law of evidence, passing upon what would be regarded as competent, relevant, or material evidence. That will be passed on exclusively by the law member of the court. I think that greatly strengthens the administration of military justice.

There is another provision in this bill about which nothing has been stated, and there is nothing in the report about it. It is a very important matter. Under the GI bill of rights we included a provision creating a board of review in the various departments to review discharges other than honorable, but we limited that to the so-called blue discharge, the bad-conduct discharge, and specifically prohibited the board from reviewing dishonorable discharges issued by direction of a court martial. In expanding the review facilities of the Army in this bill we have given the judicial council the power to review any court martial within a period of 1 year after it becomes final. In the case of courts martial resulting in dishonorable discharges during World War II, that year will not begin to run until the termination of World War II. So that we now have a provision which was found to be necessary in administering the discharge review board set up under the GI bill of rights, a comparable provision for the review of dishonorable discharges. That right has not existed heretofore. Many people lose sight of the fact that a court martial is a court, the same as any civil court. When its judgment becomes final, it is a final judgment, and no longer subject to review. A person who has been convicted by it, after sentence has been served, has only the remedy which exists through executive clemency. In this bill we have provided a means by which for 1 year after the termination of World War II—and of course it is not yet terminated officially—those discharges may be reviewed.

There is another matter that caused some considerable comment, not perhaps so much by those who had served in the Army and had seen or thought they had seen grave injustices committed, but by those in the higher echelon, who knew more of the technicalities of the procedure. It has been possible in the past for a man to be dishonorably discharged from the service without his case ever having been reviewed by a board of review. A reading of the Articles of War would have indicated that was not legally possible; but it was.

The CHAIRMAN. The time of the gentleman from Texas [Mr. KILDAY] has expired.

Mr. KILDAY. Mr. Chairman, I yield myself five additional minutes.

In the event the convening authority on the first approval suspended execution of the dishonorable discharge under the present Article of War, that case did not come before a review board for review. The dishonorable discharge was suspended, review was not required, and immediately thereafter the dishonorable discharge was carried out. So that it has been possible in the past to carry out dishonorable discharge without review by a board of review. That is prevented by this bill.

I think we should remember that no bill that we write, no penal code, no code of criminal procedure in the civil courts will be any better than the manner in which it is administered. There is no provision that we can write to effect the manner in which men will administer laws; it will depend upon their personality, their judicial temperament, their sense of fair play, and those are things that we cannot inculcate in the individuals.

I was interested in some of the questions asked of the gentleman from Ohio a while ago with reference to the time of trial and matters of that kind. It is not possible for us to write here a method of procedure which will be so bound up and ironclad as to secure all of these things and at the same time be workable. The only means by which it could be done would be to make those things that you desire matters of jurisdiction and the judgment void in the event they are not carried out. That is not feasible, especially in time of war when men are moving about—for instance, as to the time of trial. The provisions of the present bill do call for an expeditious trial, as quickly as possible, but that is as far as we can go. If we say that if he is not tried within the period of 3 months, 5 months, or 6 months he is to be released, there would, of course, be instances in which men palpably guilty would go free without any punishment.

Mr. KEARNEY. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield.

Mr. KEARNEY. Along the lines of what the gentleman is now saying, that is purely an administrative matter, is it not?

Mr. KILDAY. It is purely a matter of administration. The same situation exists in our civil courts here. You will find in some jurisdictions and some courts and, I am sorry to say, even in some Federal courts, advocates sitting on the bench who do not have the sense of justice and the judicial temperament that men ought to have to hold that position. You will find the same thing existing with reference to prosecuting officers and investigative officers.

Mr. KEARNEY. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield.

Mr. KEARNEY. As a matter of fact, the inclusion of any such provision in this proposed bill would work harm to the individual who was being tried, would it not?

Mr. KILDAY. Very definitely so. I myself have tried a few criminal cases on both sides of the table. When I was on the defense side I never was very anxious for a prompt trial. That is one constitutional right that I think is rarely sought by a defendant. There is no better lawyer or witness in a criminal case than the lapse of time when a man is charged with a criminal offense.

I believe that all in all we have made a reasonable approach to this proposition and we have brought here a bill which will eliminate those things which are substantially objectionable in the operation of our system of military justice. I hope you will take time to read at least part of the hearings because I believe you will see there that the matter was approached by a subcommittee composed entirely of lawyers of excellent training and wide experience in both civil and criminal fields. It was approached from an understanding standpoint and with a knowledge of the technicalities of law and of trial procedure, and that there was a sincere effort made to get to the bottom of those things which were substantial and which caused the difficulties. We approached it without any hysteria or feeling of rancor about what may have happened during the time when so many civilians were in the armed services. I believe the bill is reasonably sufficient for this purpose and that we will do well to adopt it.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield.

Mr. KEATING. With reference to section 46 I gather that the gentleman is not in agreement with it although he is not planning to offer an amendment to modify it or strike it out. I understand an amendment will be offered to strike it out. Is it not a fact that the Air Corps had a separate promotion list all during the last war?

Mr. KILDAY. During the war nobody had a promotion list, I may say to the gentleman from New York. Promotions were made by reason of the necessity for service in a higher rank. A promotion list as such has not been operative for practical purposes since about 1940 or 1941.

Mr. KEATING. When the gentleman spoke of the promotion list, he means the Regular Army promotion list?

Mr. KILDAY. That is correct.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. KILDAY. Mr. Chairman, since we have gotten into that question, I yield myself five additional minutes.

Of course, up until the last day of the first session of the Eightieth Congress promotions in the Army and Air Corps were made by reasons of years of service in grade. Prior to that they were made on the basis of a vacancy in the next higher grade. On the day we adjourned the first session of the Eightieth Congress we passed a new promotion bill under which promotions will be made in a different manner in the future. They will be both selective and based on years of service in grade.

When we refer now to the Judge Advocate General's Corps set up in this bill, we refer to permanent promotions within the Judge Advocate General's Corps, not temporary promotions or temporary rank held during the war or during the national emergency, but to permanent rank that those officers will secure and be entitled to retain until retired or promoted to a higher grade.

Mr. KEATING. Do I understand there is no such separate promotion list for any other branch of the Army?

Mr. KILDAY. There is a separate promotion list under the new bill for doctors, dentists, chaplains, and nurses. Of course, the nurses are very limited in their length of service. They do not serve as long as the male members of the service.

Mr. BURLESON. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Texas.

Mr. BURLESON. I would like the gentleman's explanation of the appellate review of the records of courts martial provided in section (g) on page 29 and how it is that an appellate group can review the credibility of witnesses by reading the printed page? Why would not the court martial itself, in looking at the witness, his demeanor, his actions on the stand, and so forth, be the proper place to give credence to the testimony of witnesses?

Mr. KILDAY. I agree with the gentleman, and in the first instance that is true. In other words, where a witness is shown to be highly contradictory or not to have been in a position to have seen the things about which he testifies, and so forth, the credibility of the witness may be passed on by the reviewing authority from the printed page. I think, however, the significance of the inclusion of those words in this section is that we have made the review just as broad as it can possibly be made. Heretofore, members of review boards have found that they were too restricted in the things which they could review on a court martial when it came to them. It was our purpose to open it up as wide as it possibly could be opened so that they could pass upon the weight of the evidence, the credibility of witnesses, the legal sufficiency of the evidence, and the legal technicalities in the whole record. In other words, that there would be a true and actual review and that there would be no technical rules to prevent the review board and the Judge Advocate from going into the whole case.

Mr. BURLESON. May I ask this further question, knowing the gentleman's experience and qualifications, he having been a district attorney and also experienced in civil matters, if he believes that under this bill a boy charged with an offense before a court-martial board has to a very great degree the same opportunity to defend himself as is given the common criminal in most of the State jurisdictions of this country?

Mr. KILDAY. I believe the bill, as written, and in connection with the other Articles of War and laws controlling the procedure, does give him that opportunity. Again I must say that no law can control the conduct of officers discharging their official duty. There is no means by which you can control their administration. As written, the boy would have the presumption of innocence and all of his constitutional rights protected the same as any civilian in the most carefully operated court. Whether there would be instances in which there would be men who would not so administer the law, of course, I do not doubt, but that is not caused by the bill that has been written or by the Articles of War now in effect. It would be due to human frailty in the administration of the law.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. ELSTON. Mr. Chairman, I yield 2 minutes to the gentleman from Idaho [Mr. GOFF].

Mr. GOFF. Mr. Chairman, because of an affair to be held in New York this evening, I am asking permission to speak out of order and invite your attention to an unfortunate situation. I come from Idaho, where we are very much interested in winter sports. We have one of the finest winter sport centers in the world at Sun Valley.

Many people throughout the country have been shocked to learn that the United States has sent an Olympic team to Europe to compete against teams from some 20 other nations, with the United States team inadequately financed. And the question is, Why has this happened?

There are some 50 young men and women, our finest athletes, in Switzerland now. Our Olympic teams always are backed by voluntary subscription. In this case, only about half the necessary funds were raised. These young men and women carry the American flag, in fact even wear it on their uniforms. In a way they are our ambassadors. They are our representatives in international competition, and we are proud of them. We not only want them to win if they can, but, above all, we want them to make a good impression. How can they do this if they are in Europe with inadequate finances?

Certainly this is something of a national oversight.

All this is causing much comment both over the air and in the press. I hope the difficulty can be quickly overcome. A few enthusiasts are trying to remedy the matter by holding an emergency benefit in New York at Carnegie Hall this Thursday afternoon which should be helpful.

Mr. KILDAY. Mr. Chairman, I yield 7 minutes to the gentleman from South Carolina [Mr. RIVERS].

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. RIVERS. For a question.

Mr. FULTON. This is in the nature of a parliamentary inquiry. I have said that I am opposed to this bill, and I have been hearing nothing from both sides but the ones who are for it. How does the time now stand between the ones who are for it and the ones who are against it? How much time has been taken by the ones for it, and when do the ones against it get a chance?

The CHAIRMAN. The time has been equally divided between the majority and the minority, and it is the Chair's understanding that the gentleman from Ohio [Mr. ELSTON], chairman of the committee, has an understanding with the ranking minority member, the gentleman from Texas [Mr. KILDAY], as to recognition.

Mr. FULTON. How much time has been used in this period, may I ask?

The CHAIRMAN. The gentleman from Ohio [Mr. ELSTON] has 24 minutes remaining and the gentleman from Texas [Mr. KILDAY] has 40 minutes remaining.

The gentleman from South Carolina [Mr. RIVERS] is recognized.

Mr. RIVERS. Mr. Chairman and gentlemen of the Committee, I shall address myself to two phases of this bill. With usual clarity my distinguished chairman, the gentleman from Ohio [Mr. ELSTON] has very, very explicitly explained this bill to you, I think, with a master's voice, and he was ably assisted by my good friend over here, the gentleman from Texas [Mr. KILDAY] who likewise has made a great contribution. What I shall say will naturally be somewhat repetitious of what they have said. Consequently I will just address myself to the above two phases.

Let me begin by saying that every Member of this House, during the war years, has been deluged with complaints of autocracy in the handling of these courts martial throughout the Armed Forces. Everybody has had complaints, and they were just complaints. So much so did these things come to pass that the American Bar Association and the former Secretary of War convened the Vanderbilt Committee. The American Legion, the AVC, the Amvets, the VFW, and the New York County Bar Association and every legal organization of any real influence in this Nation has been clamoring, along with the American people, for a change in the situation. We had to make a change, and here it is today. It may be imperfect, but we labored hard, and we hope we did not bring forth a mouse; at least, we do not think we did. Certainly, we tried not to. We brought this measure out in the face of the opposition of the Secretary of War and General Eisenhower. We had more opposition than ever did a committee which finally succeeded. They brought the most glamorous gentleman down there, one of the ablest speakers I ever saw, and he could not prevail on us. The facts were on our side, and we had to do something. Of course, we started off on the right side. That is the reason this bill is here today.

I want to impress these things on you. First, as to the interlocutory power of the law member. He passes on the admissibility of evidence. That is a very important thing. There are many good lawyers in this body. That law member tells you what is admissible. Heretofore, when a court martial was convened, if the man were guilty in the eyes of the commanding officer they did not have a court martial, and woe be unto those who did let that boy get off. They got a whipping of the tongue and they caught the works. A member of our committee, the gentleman from Oregon [Mr. NORBLAD] was one of the law officers in the Air Corps. He said whenever they acquitted somebody the law members took a severe tongue lashing from the commanding officer. Those are the things with which we were confronted. Heretofore, when the court was convened the accused were deemed guilty. They were not guilty without trial, they were guilty. So remember that.

There is another thing I want to impress on you. We have separated the Judge Advocate General from the hierarchy, the Chief of Staff, whatever you want to call it, of the Army. He has an independent organization now. With the exception of the promotion, he is like any other organization of the Armed Forces; he is independent. The law officers are like the men in the Department of Justice; they are trained. They have to be trained before they can hold these jobs. You do not have the case of a man not knowing law trying these cases.

The peculiar thing about this is that whenever there is a case contemplating the tainting of a man's reputation forever, for instance, in a court martial where he can be kicked out of the Army, whenever such a thing as that occurs and that commanding officer approves that court martial finding—of course, if he changes it the man is free, but the minute it goes out, and it has to go out, he cannot stop it if he wants to enforce the punishment, the hand of the Chief of Staff is forever taken off and the Judge Advocate General then is the sole judge of the facts in the case. He is the sole judge in any trial where some innocent young man, as he thinks, may have his reputation forever and forever tainted because of some miscarriage of judgment, as he saw it.

I want to tell you a story General Bradley told me. I went to Europe with him this summer. He said the Russians were coming over to the American occupation zone and raping the German girls time and time again, and they had many, many complaints, and there was a very serious situation. He said they would arrest these Russians and send them back to the Russian zone, and nothing happened. In this particular instance, he arrested a half dozen of them. I do not recall the number and I do not care, because the only good Russian I know at present is a dead Russian. So he sent this group back over there and along with it he told the commanding general, "These boys are committing all kinds of terrible offenses in our zone. I do not like it." The Russian said, "I don't either. Take them out and shoot them." But that is not the way we do in our Army. Every American boy in this Army is somebody's son, a legitimate son, somebody's loved one, somebody's husband, somebody's sweetheart. We want him protected by the constitutional guaranties. We are trying to do it under this bill.

He is not a mere automaton or the property of the state. We think he is a human being and this bill protects him when charges are made against his character and reputation. That is the American way because after all when he serves in the Army, he is serving a heritage and we believe this fulfills that basic American heritage.

Before I do close, I want to ask you all to read page 4, which will give you a pretty fair conception of what this bill does. It is very clearly outlined there, and we feel that that will give you a really fair conception of what we have endeavored to do to protect the guarantees about which I have just spoken.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. ELSTON. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. JOHNSON].

Mr. JOHNSON of California. Mr. Chairman, I am sure I can add but little to what has already been stated here. It was my pleasure to have served with a subcommittee during the Seventy-ninth Congress, in which we reviewed the matter of court-martial procedure, and possible changes required to administer

justice more equitably by the military courts.

We again took that matter up in this Congress following a few bad experiences that we had in courts martial during the recent World War. I am one of those who believes that substantial justice was administered by the courts-martial system as it has existed up to the present time. There were not a great many cases, in proportion to the total number of cases, in which there was a miscarriage of justice.

There are, in my opinion, some serious fundamental defects in the administration of military justice because of the mechanics through which this administration is carried out. One of those, and the major one in my opinion, is the fact that the military courts were not independent in the sense that civil courts are independent. The very man who appointed the members courts martial was the one who had to review and pass on the efficiency record of the members of the court he appointed and into the efficiency record of such a member could go the bias and the prejudice and even the misunderstanding of the appointing officer of what a courts-martial member should do.

Mr. O'HARA. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I yield.

Mr. O'HARA. May I preface my remarks by stating that I happen to have served with a general courts martial during World War I. My observation of some of the courts-martial sentences handed out during the recent war has left me shocked and amazed by reason of their severity when compared to sentences handed down by civilian courts. In one particular case which was called to my attention, a boy from my district was given 3 years for an offense which probably in civilian life would have resulted in a sentence of from 10 to 30 days. Perhaps that is not the fault of the courts-martial system. But I do say that if the Army does not do a better job than they have done in some of these cases, the Congress is going to have to rewrite the penalty sections a little more stringently than they have been written in this bill.

Mr. JOHNSON of California. I agree with the gentleman that there were some very severe sentences for minor offenses. If the gentleman had pursued those cases, he would have found that in 98 percent or more of the cases the sentences were greatly reduced. Some of these officers seemed to have the idea that to show their authority and to render strict justice, they have to throw the whole book at the man. I think they should decide at the beginning what would be a fair punishment and not rely on some other body or individual, hoping that they would reduce the punishment.

Mr. O'HARA. In the particular case to which I have referred the offense for which the man was convicted was that he was a. w. o. l. for something like 30 minutes. Instead of the man being given 10 days or 30 days in the brig, or something of the kind, the final result was that the man got 3 years and was dishonorably discharged. When I took that case up with the Judge Advocate General's office, they said nothing could be done. They said the sentence was a fair one and the man would have to serve it out.

Mr. JOHNSON of California. I think the gentleman should not generalize from one case that goes wrong. We have had some terrible abortions in the criminal law of the civil courts as well.

What I want to impress upon you is that we have put into the law the fundamental American principle that the courts must be independent. As the gentleman from Texas [Mr. KILDAY] said, no matter how good the technique may be on the law books, unless we have men with understanding, learning, ability, and courage on the courts, we will not get the best administration of justice. I believe the set-up we have here is fundamentally sound and in accord with American traditions and American concepts, and in that respect is better than we had before. Therefore, I believe we will get better results.

Mr. KEARNEY. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I yield.

Mr. KEARNEY. I agree with the gentleman from Minnesota [Mr. O'HARA] I know something about the prosecution of criminal cases, having been district attorney of my county for a great many years. There is no comparison, as far as severity is concerned, in the sentences handed out by courts martial and those in civilian life for the same offenses. I do not think this bill will change that. It still deals with the human element of the individual who is on the court.

Mr. JOHNSON of California. I think this will change it in this way: We have men who are trained in the law and they will be much more judicial in their attude than men who are not trained in the law. Many men on courts martial are military men, and they look on a court martial not as a court of justice but as the disciplinary part of the Army.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I yield.

Mr. KEATING. It seems to me it should be said, in all fairness, although I have experienced exactly what the gentleman from New York [Mr. KEARNEY], and the gentleman from Minnesota [Mr. O'HARA] have experienced, of what seemed to be severe penalties. Yet, of course, sometimes it was the fault of the present court-martial law itself. For instance, take this change which you are making in the law relating to rape. I defended an officer who was charged with rape and who was convicted and sentenced, because he had to be. He either had to be hanged or imprisoned for life. He was imprisoned for life, but the commanding general cut it down to 7 years, and I understand that later, after 2 years, he was restored to service so that he could work out a discharge. So I think there are two sides to that question.

Mr. JOHNSON of California. Yes. I think you will find fewer of these excessive sentences if you have trained lawyers on the courts martial and you have defense counsel who are lawyers. That was one of the weaknesses heretofore.

Mr. BURLESON. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I yield.

Mr. BURLESON. The gentleman has said that at all times the administration of court martial was handed out by military men. That is true. I am wondering if this bill does not further implement that authority. On page 45, section 47, it requires that Regular Army officers be permanently appointed by the President to the Judge Advocate General's court. I do not know. West Point may have a very good law school. I never heard of it. They may realize that some civilians had something to do with this last war and that they may have something to say in court-martial procedures from here on.

Mr. JOHNSON of California. If you will read the entire bill, you will find that the Judge Advocate and the defense counsel must be lawyers. Heretofore they may have been laymen. The administration of justice, in my opinion, is just as technical as practicing medicine. We want to get men who know how to handle the tools and who know something about the specific technical field they are covering. That is what this bill is designed to do. It is patterned exactly after the American system of justice, where you have trained men on the bench who are independent and juries who are advised by a jurist. After sitting through long hearings on two subcommittees, I was impressed by the fact that this bill and a previous one follows straight through the system we have had for 175 years in America, of getting independent judges, and having full and free hearings, and according to the accused every single possible right that a civilian has accorded to him.

We were convinced that we were right when an eminent committee of the American Bar Association, after a prolonged, dispassionate, and independent study of the matter, recommended practically the very identical things which we have in this bill. Our committee, I think, was very tolerant. The gentleman from Texas [Mr. KILDAY], whom I admire tremendously, wanted a few changes in the bill, but the committee decided they were perhaps unwise, or at least that they would rather have the bill in the form in which it is now before us; but I am sure the Members all noticed how the gentleman from Texas today made a very fine lawyerlike argument for this bill.

I believe we will more definitely approximate 100 percent justice under the mechanism and the plan we have set out in this bill than we have had before or could have under any other type of bill. Practically every Judge Advocate who had experience in this last war favors this bill. If I have talked to one, I have talked to dozens, and perhaps hundreds, but have not found one who was not heartily in favor of this bill. One point they all stress is that we must make the Judge Advocate's department an independent department and have the court free from the domination, if you please, or the influence, of line officers. They must be a separate, independent corps where a man's main duty is to carry out the duty of sitting as the judge or acting as counsel and doing those little jobs which only a lawyer can do.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. KILDAY. Mr. Chairman, I yield 5 minutes to the gentleman from North Carolina [Mr. DURHAM].

Mr. DURHAM. Mr. Chairman, I take this time to review somewhat the history of this legislation and also to compliment the present committee which brought this bill before us for consideration at the present time. They have done an excellent job in my opinion. In the beginning of the Seventy-ninth Congress in 1945 this House adopted House Resolution 20 which placed authority in the hands of the old Military Affairs Committee to investigate the war effort and other matters. Immediately thereafter this committee was set up. At that time I was serving as chairman. The gentleman from Ohio [Mr. ELSTON] also was a member of the committee, as were the gentleman from Mississippi [Mr. WINSTEAD], and the gentleman from California [Mr. JOHNSON]. We became a kind of clearing house for the complaints of Members of Congress as to what was happening under our system of military justice. I suppose something like two or three thousand cases were reviewed by this subcommittee. The gentleman from Ohio [Mr. ELSTON] at that time was serving on the subcommittee. Hearing after hearing was held with the War Department and eventually the War Department set up the review boards. Experience showed that something was wrong, for the review boards' reduction of sentences ran something like 70 to 85 percent. Also, about that time the War Department began to take this matter very seriously and asked the American Bar Association to study this problem and make recommendations. They did. Those recommendations were brought before the committee and in the first session of the Eightieth Congress I introduced a bill, H. R. 576.

The present committee headed by the gentleman from Ohio [Mr. ELSTON] in my opinion has taken most of the complaints and abuses that came out of the hearings before the American Bar Association—the hearings, the extensive hearings which number thousands of pages, which still are to be obtained from the Armed Services Committee today—and have brought to you what I believe to be an improvement in the Articles of War system for the armed services.

The American people are proud of their Army. They realize its stupendous achievements in the recent war. They know that it was a small Army and, in many respects, unprepared for the great struggle, not through its own fault but because of the blindness of the Nation to the world situation that was developing. They watched our little Army expand into a force of many millions with an amazing absence of confusion and uncertainty. They saw it adjust itself to unprecedented conditions and win victories. They observed that where changes were needed there was in most respects a remarkable readiness to discard the traditional for the sake of meeting new exigencies effectively.

It has not failed to be noted, however, that this adjustability has not extended to military justice. In that field no improvements were made. There is no question that discipline must be preserved in our armed services. Discipline, however, must not be made as a cloak to cover arbitrariness and injustice. Discipline is sound only when those who are subject to it know that it will be fair, that the accused will have his side properly presented, that punishments imposed will be equal, that those who are not guilty will not be treated as if they were guilty.

It is a matter of record that the injustices that have already been spoken of were evident in all the hearings held by our subcommittee. Some of the legal technicalities of this bill, and it is a very technical matter, I personally am not qualified to talk about because I am not a trained lawyer. The Armed Services Committee and the chairman of that committee were very wise in selecting and placing on the committee a number of trained lawyers who brought to you what I feel, as I said before, is a very excellent improvement in our Articles of War.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. DURHAM. I yield to the gentleman from California.

Mr. JOHNSON of California. The gentleman says he is not technically qualified to pass on this bill. I may say that in 1946 he was wise enough to realize that we had to have an independent system of justice. As chairman of the previous committee he recognized that fact very promptly.

Mr. DURHAM. Well, after studying the whole matter for 4 or 5 years I feel that most of our trouble stemmed from this problem. As to whether or not it will correct all of the trouble, I am not in position to say. I believe, however, that we have placed this matter now in the hands of trained personnel if this measure is adopted. I think we recognize that in this bill.

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. KILDAY. Mr. Chairman, I yield the gentleman three additional minutes.

Mr. DURHAM. Mr. Chairman, it is almost necessary to have trained lawyers to handle this problem. In many cases where an individual was brought before a court-martial hearing the person who acted as counsel in the defense of the man was not a trained lawyer, but was in some other profession and had no legal training. There are many instances of that kind of record. I feel this will to some extent cure the abuses.

Of course, there are other problems connected with the services also. This bill does not go into the judicial system of the Navy. I am hopeful a continuation of this subcommittee will study the problem and bring to the House legislation that will cure some of our problems which today we face in the Navy. I am satisfied they will do that because at the present time we are in a different position from what we were in the early days when the old Military Affairs Committee and the Naval Affairs Committee handled these problems separately. We can now get the facts and bring them together in closer connection so that it will be far better administration of justice than it has been heretofore.

The CHAIRMAN. The time of the gentleman from North Carolina has again expired.

Mr. KILDAY. Mr. Chairman, I yield such time as he may desire to the gentleman from Tennessee [Mr. EVINS].

Mr. EVINS. Mr. Chairman, I rise in support of the pending measure and also should like to take advantage of this opportunity to commend and congratulate the members of the Subcommittee and the Committee on Armed Services of the House of Representatives for bringing forth this measure for consideration and passage. I have carefully studied this bill, the report thereon, including much of the testimony taken at the hearings, as well as reports of special committees concerned with and interested in this legislation. The bill as reported contains numerous improvements over the present system of military justice and provides needed safeguards looking toward insuring and protecting the rights of soldiers in our armed forces who are subject to a system of law and judicial procedure different from that in civilian life.

The historical and accepted purpose of our courts-martial system is to maintain discipline in the service and to administer justice within the Army. The procedure, needless to say, is unique and different from our system of law enforced in our civil courts. The system has many worth-while features, which in the main, serves its dual purposes, but which nevertheless is far from perfect. The entire system should not be condemned, neither should the evils known to exist be condoned. The good should be retained and the bad features eliminated with improvements substituted therefor. There are doubtless many minor matters which can be corrected administratively and concerning which the Judge Advocate General of the Army and officers in his department are fully cognizant. Much praise has been given and rightly so to leaders of our Army for the great successes and victories which, through their leadership, they helped to achieve for our country. But in the achieving of these victories mistakes and errors were made. Some mistakes and errors were to be expected, but we should profit by our mistakes and try to see that they do not occur again. We must make improvements wherever possible. Such a situation applies especially with respect to our archaic and outmoded system of military justice in the Army.

Mr. Chairman, the purpose of the bill before the House today is to amend the Articles of War and to improve our system of military justice in the Army. Much has been written on this subject, and much has already been said, concerning the need for improvement of military justice in our armed forces. This fact has been clearly demonstrated during the late war. Almost everyone agrees that there is a real need for effecting improvements both by legislation and through administration. During World War II approximately 11,000,000 men saw service in the United States Army, and of that number approximately 80,000 were brought to trial and convicted by our Army courts martial.

A far larger number than this were convicted by special and lower military courts. Even before the cessation of hostilities it was apparent to officials of the War Department and to Members of Congress, and others, that a detailed study of the system of Army justice was needed. Accordingly, during 1944 and 1945, the War Department secured the services of Col. Philip McCook, former prominent New York jurist, to visit various theaters of operation and to conduct studies of our system of military justice in operation. As a soldier and member of the staff of the Assistant Judge Advocate General in the European Theater of Operations during the recent war, I had occasion to meet Judge McCook and to know something of his work, and also to have had an opportunity for first-hand observation and experience in the workings of our system of military justice. Like others, I saw the great need for effecting its improvement. Shortly after the end of hostilities, the American Bar Association recommended to the War Department that our system of military justice be overhauled and improved.

Accordingly, the Secretary of War appointed an advisory committee on military justice for the purpose of studying this problem and presenting recommendations. This committee consisted of outstanding lawyers and jurists throughout the country and they engaged in studies, investigations, and hearings and availed themselves of voluminous statistical data within the Judge Advocate General's Department and other sources concerning the operation of our military courts. Following the holding of hearings and receipt of information from questionnaires and after exhaustive study, this committee filed its report recommending changes and needed improvements. It was obvious to the advisory committee after the hearing of many witnesses that there was great need for providing of safeguards to insure that men called into the military service of our country should have their rights protected.

In addition, there have been many detailed recommendations made and which have been carefully studied by the Committee on Armed Services of the House. The one principal question which goes to the heart of the whole problem, however, is whether military justice is to remain essentially military or whether it is to be essentially justice administered within the Military Establishment; whether there is to be a separation of command and judicial functions in our system of Army courts. The eminent committee of the American Bar Association is of the opinion that the right of command to control the prosecution should be retained only, through the right to name the trial counsel to prosecute the case, to refer charges for trial and to review the case thereafter, and that the Judge Advocate General's Department should become an independent branch of the Army with appellate reviewing authority independent of the command.

The subcommittee of the Committee on Armed Services and the full Committee on Armed Services have agreed with this principle, namely, that if real justice is to be obtained in connection with the trial of an accused that officials charged with reviewing the case should be independent and free to exercise their judgment without restraint and control from the commander in the field who appointed the court, and prosecutor, and referred the case for trial. In other words, the principal question boils down to this fact—Should the field commander be within himself both the prosecutor, judge, and jury or should there be a separation of functions of prosecution and judicial review? The report of the Committee on Armed Services submitted in connection with this bill goes into detail in supporting the latter view, that there should be a separation of functions to insure justice. The Committee effectively has answered all arguments advanced in favor of retaining complete control over the handling of a case by a single command. In this connection, the report of the committee states that—

> There is unanimous agreement that command influence has been improper and must be stopped.

Thus, if improvement is to be effected, there must be a separation and divorcement of authority so that the Commander in the field may not serve as prosecutor, judge and jury and maintain complete control over the military trial and review of the record of trial of an accused soldier. The committee has therefore recommended, and in my opinion properly so, the establishment of a separate Judge Advocate General's Corps to continue as a part of the military establishment along the lines of the Medical Corps of the Army but with separate and independent functions of review to insure justice in our system of military courts. In opposing this recommendation, certain high ranking military leaders have stressed the necessity for preserving discipline in the Army. Certainly there is a need for maintaining discipline in the Army. However, in the administration of military justice, there is a point beyond which the consideration of justice becomes paramount to discipline. Under this bill, line commanders have abundant authority to enforce discipline as such Commanders have the authority to refer charges for trial, to name the members and convene the court, to appoint the trial judge advocate, the law member and the defense counsel, and after trial to review the original record and to approve or disapprove, in whole or in part, the sentence.

Certainly this is ample authority for the commander to have in connection with maintaining discipline within his command. At the conclusion of the trial, however, it is proposed that the Judge Advocate General's Department, acting independently, shall serve as the appellate reviewing authority to set aside any errors of law, to weigh the evidence, and to judicially and impartially determine the guilt or innocence of the accused, based upon the record of trial. The committee has well pointed out in its report:

> We are now either on the threshold of universal military training or of the maintenance of a professional army many times larger than that maintained before the last war. The future army will be composed of the young men of our country. The first contact with any judicial system for the overwhelming majority of these young men will be their experience with the system of military justice in the Army.

We, as Members of the Congress, would be derelict in our duty if we fail to provide the necessary legislation to insure that the rights of these young men are insured and protected. We should see to it that the system of military law to which they are exposed is designed to achieve and promote justice. The system presently in effect has demonstrated in many instances that justice has not always been insured and human rights have not always been protected. This bill goes far toward improving this condition—there is more good than evil in the measure. It is designed to bring about safeguards and protection of the rights of men in the service, to strengthen our military law, and to insure that these rights are guaranteed and preserved. I do not pose as an expert on the subject of military justice. Certainly a detailed discussion of the technical aspects of the bill at this point is unnecessary. However, I do wish to summarize and set forth the main accomplishments which the enactment of this bill provides:

First. Enlisted men have been authorized to sit as members of our Army courts, thus insuring that enlisted men may serve upon a court when an enlisted man is tried, thereby making our military courts more democratic in composition.

Second. It subjects officers to trial by special courts martial.

Third. It prohibits the unlawful influence of courts martial or of the members thereof.

Fourth. Warrant officers are authorized to sit as members of a courts martial.

Fifth. An accused, if he so desires, may have counsel at the pretrial investigation.

Sixth. Authority to grant a bad-conduct discharge has been granted to general and special courts martial.

Seventh. The review and appellate provisions have been strengthened.

Eighth. A lesser punishment than death or life imprisonment for murder or rape has been provided.

Ninth. The authority of commanding officers under the one hundred and fourth article of war has been increased so far as it pertains to officers but not to enlisted men.

Tenth. A separate Judge Advocate General's Corps has been established for the purposes above indicated, namely, of insuring independent exercise of judicial judgment and discretion in arriving at decisions affecting the rights of our men in the armed forces.

Mr. Chairman, in addition to the establishment of an independent Judge Advocate General's Corps for the purposes indicated, I wish to especially point out two or three other features of the bill which I consider meritorious, namely, that provision providing for enlisted men to sit as members of Army courts martial; the mandatory provision that the appointing authority

shall detail as law member of the court an officer of the Judge Advocate General's Department. This provision will serve to insure that a trained and experienced and capable law member, who is familiar with the rules of law with respect to the reception of evidence, shall serve on our courts and thereby serve in the capacity as a judge in courts-martial proceedings.

Another major improvement provided in the bill is that section prohibiting the unlawful interference and influencing of members of the court. This section provides that—

> No authority appointing a general, special, or summary court martial nor any other commanding officer, Judge Advocate General, or other officer shall censure, reprimand, or admonish such court, or any member thereof, with respect to the findings or sentence adjudged by the court, or with respect to any other exercise, of its or his judicial responsibility. Any person subject to military law who attempts to coerce or unlawfully influence the action of a court martial or any military court or commission, or any member thereof, in reaching the findings or sentence in any case, or the action of an appointing or reviewing or confirming authority with respect to his judicial acts, shall be punished as a court martial may direct.

This is a most worth-while and needed provision. As has been pointed out in most of the hearings and from reports of questionnaires sent to persons familiar with the operation of the system of the military justice and who have observed and witnessed our military courts in operation, most all agree that there have been instances of improper influence exercised by commanders upon the decisions and sentences of the courts. Under the present system a commander exercising courts-martial jurisdiction names the members of his court from his command, and such persons appointed to serve on the court are subject to removal at the discretion of the commanding general. Although the members of the court are theoretically independent, nevertheless, every member of an Army courts martial knows that he was appointed by his commander and that if his action is not in accordance with the commander's wishes that he may be removed.

Aside from this fact there are other considerations which either consciously or subconsciously enter into the minds of the members of the court in arriving at their decision. The members want to do only what their commanding officer wishes in the way of rendering a sentence, and as they do not want to take any action which would jeopardize the possibility of their own promotion or assignment, they, therefore, often render a prejudiced or controlled decision, one in line with what they know their commander wants, and their decisions are often harsh and excessive and unjust.

Many officers presently charged with the handling of our courts-martial system and as advisors to commanding generals in the field are Regular Army officers, many of whom have families and have chosen the Army as a career. They would, therefore, be less than human if they ignored the possibilities of the influence of their commander. Those who are charged with the impartial administration of military justice must have sufficient freedom of judicial determination to meet their responsibility. There have been many cases in which our Army courts have imposed lenient sentences and thereafter the members of the court have been reprimanded by their commanding general and removed from the courts. Orders have been handed down in effect requiring that more excessive sentences be imposed.

I recall a specific instance in which a lieutenant colonel who was a member of a general court in the European theater informed me that the court of which he was a member tried a soldier for an offense not too serious, following which the court imposed what, in its opinion, was a just and fair sentence. The decision—rather the sentence imposed—did not please the commanding general. As a result a few days thereafter the court received a reprimand—a "skin letter" as it is popularly referred to in the Army—from the commanding general criticizing the members of the court for their leniency and stressing the importance of imposing heavy sentences. After this reprimand a few days later another case was tried by the same court which involved a minor offense, at least an offense of less gravity than the preceding one, and the court imposed a gross and excessive sentence. This later action was, in the opinion of my informer, a direct result of the reprimand which the court had received from the commanding general. In the first instance the members of the court used their own judgment as to what constituted a just and fair sentence and they were criticized for their action. In the second instance an injustice resulted because of the commanding general's dictation to and control of the court. This situation illustrates the evil which should be corrected. All too often it has been cases of this character that have brought our system of military justice into disrepute.

The enactment of the pending measure and the accomplishment of the objectives herein outlined will serve to protect and insure the rights of accused soldiers and will also serve as a guidepost to those officials charged with administering and enforcing our military laws, by indicating to them the views of the people of our country that the men serving in our armed forces shall not be treated unjustly or tried by "kangeroo courts" or subjected to "star chamber" proceedings, but that American soldiers shall be treated as human beings with their just rights protected and preserved. The approval of this bill, which includes the proposal that there be a total separation of appointing and reviewing authority, will go far toward eliminating present evils in our court-martial system and will serve to effect an improvement in the present system of military law and justice. Although this measure may not contain all the improvements needed, the bill goes far toward effecting genuine improvements. Especially is this true with respect to the expanded and improved appellate review provided. Provision is made for full and adequate review through constituted channels within the Judge Advocate General's Department, the Office of the Secretary of War, and ultimately the President of the United States, who, of course, is the Commander in Chief of our armed forces. Adoption of this measure is therefore urged by the Congress.

Mr. KILDAY. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. BURLESON].

Mr. BURLESON. Mr. Chairman, I expect to vote for whatever bill comes out of this committee, but I am not supporting the bill. I would like to make that distinction. In other words, I assume the attitude of the old gentleman who said that he was not as good as he should be and he was not as good as he wants to be, but, thank God, he is better than he used to be. That is about the way this bill is here. It certainly is an improvement, but it reminds me somewhat of the Doolittle report. The Doolittle report was a public appeasement. It did not go down to the fundamentals involved, and I think this bill here is somewhat of an appeasement measure. I am not criticizing the committee at all, because I join in complimenting you upon having done something, but I think this is an Army bill; it is a military bill. There will always be military bills when the Army or the Navy has anything to do with it. They are going to bring in those bills to make sure that they keep the authority unto themselves.

As my colleague and good friend, the gentleman from Texas, has said, the administration of military justice has a great deal to do with the results, but the trouble here is that too much of it is being administered by the military, and this bill furthers that perspective in rendering decisions in matters dealing with the lives and the liberty of boys in service charged with an offense. I say, under this bill, that a boy in military service charged with an offense does not have the same right to defend himself as the most hardened and vicious criminals in most of the jurisdictions of our State courts. There is hardly a jurisdiction that I know anything about—and I have given study to a number of them—which does not extend the theory of reasonable doubt, and juries are instructed that if they have a reasonable doubt as to the guilt of the accused, the doubt shall be resolved in his favor. Such is not the case in so-called military justice.

Take, for instance, challenges to the members of the court-martial board. There is a provision in here, of course, for challenges, but it is vague, indefinite, and ineffective. That provision should be spelled out in understandable terms.

Mr. MACKINNON. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Minnesota.

Mr. MACKINNON. The statement that the gentleman has just made with respect to reasonable doubt is exactly contrary to my understanding.

Mr. BURLESON. That is the gentleman's opinion.

Mr. MACKINNON. I believe it to be a fact that the doctrine of reasonable doubt is applicable in military law. Does the gentleman have any support for a contrary statement?

Mr. BURLESON. The only support is the bill itself. If you can read me any

place in here that it definitely directs the court-martial board to resolve a doubt in favor of the accused, I have not seen it.

Mr. MACKINNON. That is part of the fundamental law. It need not be restated here as the Constitution of the United States contains such protection, as I understand it.

Mr. BURLESON. It is fundamental; definitely it is fundamental. It is also fundamental that the theory of presumption of innocence shall be given also, but it is not in here and how can you presume that every person who serves on court martial to know the law under the Constitution unless it is given to him in application. In all of the jurisdictions in the State courts, the burden of proof, of course, is on the prosecution.

Mr. MACKINNON. But you do not find that in your State courts solely by virtue of a statutory declaration.

Mr. BURLESON. Oh, yes, you do. In most jurisdictions it is so spelled out. That is just the point that I am making. We are leaving loose ends in here to be interpreted by men in military. Ordinarily they are not trained lawyers, and in the case of this last war some have recognized the fact that Reserve officers and other people had something to do with winning the war beside the Regular Army and the Navy. For instance, in here it provides that no one shall serve upon court-martial boards—"if practical" it says—if they have had less than 2 years of service. Where does that leave the people who have just come into the service while the war has been going on? It does not make sense to me. In fact, the people that have just come into the service may know something about it, and they might be able to render more military justice than those of the Regular Army or those who have already spent considerable time in the service.

Mr. KEARNEY. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from New York.

Mr. KEARNEY. I would like to inform the gentleman that under the statutes of the State of New York the defendant in a criminal action is presumed to be innocent until proven guilty.

Mr. BURLESON. Of course, that is the very point. He shall be presumed to be innocent until his guilt is established by legal and competent evidence, and you will find that situation to exist in most of the State jurisdictions.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. KILDAY. Mr. Chairman, I yield the gentleman two additional minutes.

Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Texas.

Mr. KILDAY. Of course, in our own State of Texas that is statutory. I believe it is in all the 48 States. The gentleman is complaining that it is not contained in H. R. 2575. I want to call attention to the fact that H. R. 2575 does not constitute the Articles of War. H. R. 2575 amends certain of the Articles of War, and the great body of the criminal law of the military remains as it has in the past. It is only amended in certain particulars in which it appears in H. R. 2575. Of course, the military law is that a man is presumed to be innocent until his guilt is established by legal and competent evidence beyond a reasonable doubt, and that the presumption shall remain with him until overcome by legal and competent evidence. It is as strongly a part of the military law as it is of the civil law.

Mr. BURLESON. I think perhaps you can find by reading between the lines—at least one can who is on the defense side in a court-martial proceeding, and I have been on both—some of those things, and you might point them out, but I say that in court-martial proceedings, it should be spelled out word for word to have a decent administration of it, and in this bill it is not.

Mr. NORBLAD. If the gentleman will yield, I have the entire data the gentleman wants right here. If the gentleman will refer to the Manual of Courts Martial, corrected to 1943, the latest one, beginning on page 62 he will find two solid pages on the rule of reasonable doubt.

Mr. BURLESON. Yes, I have read that from cover to cover many times. I do not hold myself up to be an expert but I do know something about how it works in practical application. I have tried it on both sides.

Let me point out another matter, the concurrence of the court in finding guilty, a boy charged with a crime. Only in matters of a death sentence is it necessary that it be unanimous. Then it drops down to three-fourths when a bad conduct discharge is involved, and then it gets down to just a majority in some decisions.

Mr. KILDAY. I hope the gentleman will correct the statement he has just made. It requires two-thirds.

Mr. BURLESON. Is two-thirds the minimum?

Mr. KILDAY. That is right.

Mr. BURLESON. However, it has been a majority where it is a lesser offense. Is not that correct?

Mr. KILDAY. That is not my understanding.

Mr. BURLESON. That is my understanding, and I have read it. The real catch in the language providing for the number for decision, are the words, "those present." They should be "be present" and no speculation about it.

I see no reason why that should not be unanimous, for that matter, upon a decision of the court-martial board. It is that way in criminal jurisdictions in the State courts. That is one of the things I am talking about. The boy charged with crime does not have the same right to defend himself as common criminals in civilian life.

There is a provision also that the accused shall have the right of peremptory challenge of members of a court-martial board. It is not spelled out in this bill. When a boy goes before a court-martial board he is afraid he will antagonize them if he says, "Have you a fixed opinion in this case? Have you ever heard the circumstances of this case discussed, and if so, do you have a fixed opinion, and will it take evidence to remove that opinion?" You know it is not in this bill, and it should be in here. It is a shame that it is not. This has gone on for too long now, and in the name of decent justice, it should not be continued.

Mr. ELSTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Missouri [Mr. REEVES].

Mr. REEVES. Mr. Chairman, I favor the passage of H. R. 2575. To my knowledge it has the support of all of the service organizations and opposition from none. The American Bar Association has approved it, as have various civilian organizations. It is recognized as meeting in part, at least, the objections which developed during our experience in World War II with respect to the administration of military justice.

This measure, as amended, follows closely the recommendations of the War Department Advisory Committee on Military Justice contained in its report dated December 13, 1946. This group is usually referred to as the Vanderbilt Committee in tribute to its chairman, the distinguished Arthur T. Vanderbilt, a former president of the American Bar Association and now dean of one of the great law colleges in the United States. The high caliber of the members of the committee is manifest. The following comprised it:

Mr. Arthur T. Vanderbilt, Newark, N. J., chairman.

Mr. Justice Alexander Holtzoff, Washington, D. C., secretary.

Mr. Walter P. Armstrong, Memphis, Tenn.

Hon. Frederick E. Crane, New York, N. Y.

Mr. Joseph W. Henderson, Philadelphia, Pa.

Mr. William T. Joyner, Raleigh, N. C.

Mr. Jacob M. Lashly, St. Louis, Mo.

United States Circuit Judge Morris A. Soper, Baltimore, Md.

Mr. Floyd E. Thompson, Chicago, Ill.

It was the function of this committee, as prescribed by the Secretary of War, to recommend "changes in existing laws, regulations, and practices which the committee considers necessary or appropriate to improve the administration of military justice in the Army."

The excellence of the report of the committee reflects the elaborate care with which it accomplished its work. By a series of specific recommendations the committee undertook to provide corrective measures for what it called a disquieting absence of respect for the operation of our present system of military justice. The results of its study and conclusions are substantially embodied in H. R. 2575. It may not be a perfect bill, and further changes may be indicated by experience, but no one can deny that it represents a forthright and conscientious effort to correct the deficiencies in and objections to our existing system of military justice by implementing the recommendations of the Vanderbilt committee. I join with my colleagues in commending the Armed Services Committee and its subcommittee, headed by the gentleman from Ohio [Mr. ELSTON], upon a hard task well done.

I think the differences between the views of the War Department on the one hand and the views of the Vanderbilt committee and civilian groups generally on the other may be explained by their

very different concepts of the function which justice should perform in the Military Establishment. In the Army the emphasis is upon discipline, of which the system of military justice is largely an instrumentality. The civilian concept is based upon the Anglo-American ideals of equal justice under the law, and the independence of the courts and judiciary. It is not easy to reconcile the differences between these two positions.

But it is clear that a fundamental requirement for any system of justice is an impartial court which is free from influence and any possibility of intimidation or control. That requirement can be met only by separating the administration of military justice from command control. Until the commanding officer no longer has the right to select judge, jury, prosecutor, and appellate tribunal, no court martial can be regarded as altogether freed from the suspicion and the possibility of influence, however indirect it might be.

The gist of this bill is found in its treatment of that situation. It undertakes to separate military courts, so far as practicable, from the chain of command, by authorizing enlisted men to sit as members of courts martial at the option of the accused; by specifically prohibiting any attempt to influence a court martial or its members; by strengthening review and appellate procedures; by prescribing professional qualifications for the trial judge advocate and defense counsel; by establishing a separate Judge Advocate General's Corps with a separate promotion list; and by other provisions.

It seems to me that this is the heart of the bill, although there are other provisions of importance which the distinguished gentleman from Ohio has already detailed. I believe that H. R. 2575, as amended by the committee, will bring the system of military justice into a more consistent relationship with the fundamental principles of American jurisprudence, and will better adapt it to the needs of the citizen armies which comprise the great bulk of our forces in times of national peril.

I earnestly urge the House to consider the measure carefully and to pass it by a decisive vote.

Mr. ELSTON. Mr. Chairman, I yield 5 minutes to the gentleman from Wisconsin [Mr. BYRNES].

Mr. BYRNES of Wisconsin. Mr. Chairman, I find myself in substantial agreement with many of the things the gentleman from Texas who spoke just a moment ago has said, but I do want to compliment the subcommittee and the committee for attacking a problem that has been crying for attention for a long, long time. I think the discussion here has demonstrated the need for this attention. I do not think a person can serve as a Member of Congress for very long before there are called to his attention many evidences of injustice in the administration of military justice.

I am not one to condemn the military and rave about outlandish actions of brass hats, and so forth. I have a very high regard for these men. I think they do a splendid job and render noble service. But as was pointed out in the discussion earlier by the chairman of the subcommittee, the military is primarily responsible for winning battles during a war and preparing to win battles in case of a potential war. This bill deals with administering justice, with determining guilt or innocence, and punishment for violation of regulations, and so forth.

I have taken this time primarily to ask the chairman of this committee whether or not any consideration was given during the course of considering this question to the possibility of establishing a civilian review board of some kind as a final board of review.

Mr. ELSTON. There was some consideration given to the question, but the committee decided against it. As a matter of fact, I think we had a bill before us which provided for a review in the Federal courts of the United States of the court martial convictions. We felt it best to leave the review in the hands of the Board, the judicial council set-up, in the Judge Advocate General's department.

Mr. BYRNES of Wisconsin. I thank the distinguished chairman.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield.

Mr. JOHNSON of California. In 1946 we had a subcommittee consider the same matter very exhaustively. They have a somewhat similar provision in England. After thinking it over carefully we decided to reject it in favor of the provision such as is contained in the bill before us.

Mr. BYRNES of Wisconsin. I thank the gentleman. I do think, however, and I want to express my view, that at least some type of civilian review should be incorporated in the bill. I want to call the attention of the House to what we did in the Seventy-ninth Congress in connection with the Legislative Reorganization Act. Prior to the passage of that act and its adoption as the rules of the House, there was the possibility for correction of a military record by a civilian group. The Congress had that power. Final power to correct injustices in military records was vested in the Congress. The Reorganization Act, in an attempt to reduce the legislative work load, banned the introduction of private bills of this character. This prohibition is set forth in section 131 of Public Law 601 of the Seventy-ninth Congress. That section provides:

> No private bill or resolution * * *, and no amendment to any bill or resolution, authorizing or directing. * * * (3) the correction of a military or naval record, shall be received or considered in either the Senate or the House of Representatives.

As a substitute the act empowered the Secretaries of War, Navy, and Treasury, with respect to the Coast Guard, to create boards of civilian officers or employees of their respective departments, and through them to authorize the correction of any military or naval record where in their—the Secretary's—judgment such action was necessary to correct an error or to remove an injustice. That authorization is contained in section 207 of Public Law 601, Seventy-ninth Congress. In other words, the Secretaries of the various departments were given the same jurisdiction as had formerly been possessed by the Congress in this respect. But what has happened? The effect of these provisions of the Legislative Reorganization Act has been, in practice, to deny the veteran's right of appeal. By leaving the power of review at the discretion of the Secretaries of the Departments, Congress has, in effect, asked the impossible. It has asked that a fair and impartial review be granted by the same judge who has previously approved of the decision in the case.

The present state of the law vests final jurisdiction entirely in the armed services and thereby breaks an historic precedent in the sequence of military appeal. This is a situation which I believe should be corrected at the earliest possible date.

I called the attention of the House to a bill which I introduced last June, H. R. 4019, which would create a civilian board of final review of armed forces discharges and dismissals. I do not contend that the machinery provided for in H. R. 4019 is perfect. But I believe that the subject matter of the bill should be given early consideration in order that some method may be provided whereby a final review of discharges and dismissals will be obtained by a board, commission, or court that is not under the influence of the military.

Mr. ELSTON. Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. FULTON] the remainder of my time.

Mr. FULTON. Mr. Chairman, I am one of these people who feel that the bill does not go far enough, and that it can be improved over its present form by amendment and also by administrative order in the War Department. Of course, there are some things here that have to be written into law for protection and there are other things that are details which should be handled by administrative order. The one thing that the bill lacks, to me, is an emphasis on what might be called a bill of rights for the serviceman, which would protect him and show that he has affirmative protections and will insure that he, after all, is to be tried as a citizen of the United States with certain inherent rights. This bill and the courts-martial procedure seem to me to have come down through the law in the traditional way; the way a great many of the criminal laws have come down to us in our States. That is, we emphasize the penalty, the confinement, and the severity of the punishment.

My feeling is that we ought to look toward the rehabilitation of the serviceman, giving him hope that when his sentence has been served he can build himself up again so that he can be restored to active duty, and by good conduct remove maybe this one blemish on his service. For example, many of us have been in the service and have seen men who have been subject to strains so that when they got out they got drunk and did some things they usually would not do. Then when they come back in a general court martial is called, and they, having had a perfect record previously in civil life or in the Army or Navy, find themselves with a dishonorable discharge that cannot be removed, and that affects them in

their economic life thereafter, and it prevents them from ever being restored to duty. It forever blemishes these men so that they are always trying to get the dishonorable discharge changed. You Members know that has taken place. You have had people of sterling character, from fine families, come to you, saying, "This has been the one thing in my life that has completely blighted me." As Congressman from Pittsburgh, I have had men from the first war come to me and say, "Here, you are a new Congressman, perhaps you can think up something that will remove this stain from my family, because I would give anything to get it removed."

The emphasis should be on rehabilitation and the taking away of the stigma of punishment after the penalty has been met.

In many of our State courts and in many of our Federal courts, the people are put through what is called a psychological clinic, where it is necessary. Many times those people do things when they are probably in the condition of the young fellow I saw in Italy this last summer. He would not talk to anybody. He would not look at anybody. He was confined in a barbed-wire enclosure, without shelter during the day, he had nothing but a board to sleep on, with two blankets, and no bed. He would not discuss anything with anybody. When we asked who he was and what he was, they said he was under some punishment of 50 or 60 years; that he would not cooperate. He evidently felt he never had a chance. So that he was just going from one offense in this particular disciplinary training center to another, with the result that he stood no chance of getting out. We Congressmen who were on the trip insisted that he be brought over to us and that he talk to us, separate and apart from the personnel in charge of this particular camp. He finally talked with us. He was a psychological case if I ever saw one. I said to him, "If you have any idea of ever getting out of here, or of ever trying to better yourself, let us hear what you have to say." The only word I have ever had is something from his mother saying that he is up here in a Federal penitentiary.

When we left, that young man said, "I have been misused." He said, "I came in without a chance, because I had a record against me and was known to have been paroled to the Army. The first thing that came up when something was wrong, they blamed it on me." He said, "I did not do it." He said, "From there on I did the things they are saying," and he said, "I am going to continue to do them."

Now, perhaps a sentence of 50 or 60 years for that young man in his early twenties is not quite the solution. Perhaps rehabilitation, perhaps a feeling that there is a chance in the United States for him will take that young man off the backs of the taxpayers back to self-support in civil life. I do not want 80,000 young men in the prime of their manhood and in the prime of their productive years kept in the prisons of this country and either kept out of the Army or kept out of productive employment.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. KEATING. Is it not a fact that the Army has now established certain rehabilitation centers where the very thing is being done that the gentleman is seeking.

Mr. FULTON. I may say to the gentleman that I have talked to the Secretary of Defense about such rehabilitation centers and will continue to make suggestions for rehabilitation centers that can be used so that these men we are speaking of will not go right out of the Federal penitentiaries with the prison brands on them into civil life. Those rehabilitation training centers, however, should be distinct from the Army disciplinary training centers. Disciplinary training centers should be used for small offenders.

Mr. ELSTON. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. ELSTON. Is the gentleman not aware of the fact that of the 80,000 convicted of court-martial offenses, 33,000 were restored to duty after being assigned to rehabilitation centers?

Mr. FULTON. I am very well aware that a good start has been made but there is still quite a large problem remaining. I spoke of the total number of people who had been sentenced by Army court martial, and I am pointing it out to show the size of the problem. As the gentleman from Ohio points out, a very good start has been made in this particular. I will have some amendments to offer a little later under which a young man sentenced for anything under 5 years as a minimum sentence may choose an Army disciplinary training and rehabilitation center as the place to serve his last year and that if he comes out with satisfactory conduct he will be eligible for an administrative discharge as distinguished from a bad-conduct discharge that would haunt him all his life.

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. JOHNSON of California. Would not that very probably be more appropriate in a separate bill? In my State we have a penal code that lays down the provisions of the administrative penal law and the fundamental law, and we have a separate one on parole, probation, and those things, entirely separate. It does not seem to me that what the gentleman seeks is appropriate in this particular bill.

Mr. FULTON. That may be a good idea to consider. If it is refused at the present time then it might be done as the gentleman from California suggests, in a separate bill.

Mr. JOHNSON of California. I agree with the gentleman in his idea.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. FULTON. Because I am one of the few Members opposed to the bill in its present form, may I not ask that a little more time be allotted to me?

Mr. KILDAY. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. FULTON. I think with 2 hours allotted for the discussion of this bill that for a Member opposed to the bill to be given 9 minutes plus 5, totaling 14, is not asking too much.

The CHAIRMAN. The gentleman from Pennsylvania has been allotted five additional minutes and is recognized for five additional minutes.

Mr. KILDAY. I suggest that the gentleman use the 5 minutes to speak on the bill. It may then be that additional time remains.

Mr. FULTON. I thank the gentleman.

Mr. KEARNEY. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. KEARNEY. I have been reliably informed by the Army, and I know from cases I have had in my own office that not only youngsters who have been sentenced for a term of 5 years or under, but in one instance I know of a term of 40 years, where the individual was sent to a disciplinary battalion and 18 months thereafter was restored to full duty and upon the completion of his term of enlistment was given an honorable discharge.

Mr. FULTON. That is fine and I think that opportunity should be given every young man. He should have the choice between finishing his term in prison and going to one of these Army rehabilitation centers and not have it remain for someone else to say who of the enlisted men are to be given the opportunity to make such choice.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. KEATING. I wish to add to what the gentleman from New York has said, that I know of a similar case where a young man was given life as an original sentence, but later was restored to duty, not in his same grade, but restored to duty. Therefore, I am sure that the Army has a program along these lines. Whether it is exactly the right one or not, certainly it cannot be charged with not thinking along these general lines.

Mr. FULTON. No. As a matter of fact, I am not charging the Army with being in the position of not thinking about the matter. I am trying to be constructive in reference to a program that will lead in a certain direction toward rehabilitation. I think the Army generally has done a fine job, and that also applies to the Navy and Marine Corps.

Mr. GOFF. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from Idaho.

Mr. GOFF. May I ask the gentleman if he has ever heard of the special clemency board that was set up by the Secretary of War, of which Justice Roberts was chairman?

Mr. FULTON. Yes. I know quite a bit about that.

Mr. GOFF. May I inform the gentleman that my last military duty during the recent war was as a member of one of these special clemency boards under Justice Roberts. The reference has been made here to knowing one case. I know some 35,000 cases where the very thing the gentleman has been talking about has been done.

Mr. FULTON. But now that board has completed its job.

Mr. GOFF. That board does not exist in that name, but there is at the present time in the War Department a board actually functioning at this time which reviews these sentences and has the power to recommend reductions to the Secretary of War and it actually has a continuous process of arranging for the rehabilitation of these men. The bill under consideration is one that certainly has my unreserved support.

Mr. FULTON. The gentleman has taken the trouble to inform himself on the subject. I may say that I went to Europe several months ago and visited the Army disciplinary barracks and I think I know something about it. If the gentleman would like to hear some more about this investigation I can tell him about it.

I found people who were confined under physical punishment conditions for 7 months without a trial. They were held without being able to get a trial when they asked for it. For example, on March 19, 1946, I wrote to Washington asking where a particular young serviceman was and I was advised they had no record of his being up for general court martial in Washington. I then found out on July 26, after he had been arrested on January 3, that this young man who had just turned 21 was sentenced to 30 years at hard labor. His father had a stroke shortly after because of shock, and it was a great shock when he felt his son was right on duty as usual.

When I went over to the Army disciplinary training center I found enlisted men there without beds, sleeping on boards with spaces so wide between them I could put four fingers in the spaces. I asked the people in charge of the camp to stand aside and let me talk to the men alone, which I did. Eighty percent of them said they were cold and needed blankets.

If that is one example of Army justice maybe we need some corrections.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. KILDAY. Mr. Chairman, I yield myself 2 minutes.

Mr. KILDAY. Mr. Chairman, anyone who has ever had any part in the administration of justice has always been most regretful to see what happens to a young man who becomes embroiled with the law. Also those of us who have had experience know that quite frequently the greatest punishment falls on the innocent members of the family rather than on the wrongdoer. Those are things which are inherent in society and our way of life. No matter what we may do they cannot be eliminated.

Mr. Chairman, whether men are sleeping on the floor or not has nothing to do with the type of bill that we can write on the administration of justice in the Army. I condemn any such practices on the part of any commanding officer. In my opinion he should be brought before a court martial himself if he permits things of that kind to take place. However, that has nothing to do with the procedure before courts martial.

This bill attempts to do exactly the things that the gentleman from Pennsylvania says he would like to see incorporated into the administration of military justice. It is true that during the war rehabilitation battalions were organized by the Army, and I believe that 33,000 of the 80,000 were given the opportunity to go to rehabilitation battalions and secure honorable discharges. In this bill for the very first time we make it a part of the law of the United States by incorporating it in the Articles of War that it can be done.

I call your attention to page 30 of the bill, line 22:

> The authority which suspends the execution of a sentence may restore the person under sentence to duty during such suspension—

There has not heretofore been any such statutory authority for that to be done. It was done during the war while the War Powers Acts were in effect, and things of that kind—

> and the death or honorable discharge of a person under suspended sentence shall operate as a complete remission of any unexecuted or unremitted part of such sentence.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. KILDAY. Mr. Chairman, I yield myself five additional minutes.

So, you see that we are now providing that even though the judgment becomes final, if a man goes to a rehabilitation battalion and secures an honorable discharge, it is automatic in setting aside the previous judgment of the general court martial. So, in this bill we are taking care of that very thing.

Now, in the case of the young men whose lives were blighted because they received dishonorable discharges, for the first time in this bill we are giving an opportunity for the review of a fully executed judgment of a general court martial. Heretofore that power only existed in the President under his constitutional power of Executive clemency. In this bill the judicial council in its review has the right at any time within a period of 1 year after the judgment becomes final to review the court martial and to set aside even a dishonorable discharge. That was excepted from the GI bill of rights where bad-conduct discharges could be reviewed. In addition, as to any offense for which a man was convicted during World War II there is a period of 1 year after the termination of the war—and the war has not as yet terminated and we do not know when it will officially terminate—in which those discharges can be reviewed. So, rather than criticize matters about which the gentleman from Pennsylvania has spoken, I think the bill deserves support for the very reasons he has given, because the bill for the first time incorporates in statutory law all of the things which he advocates.

Mr. ELSTON. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Ohio.

Mr. ELSTON. As a matter of fact, the bill provides that the judicial council may weigh the evidence, power which does not vest in even some of our appellate courts with respect to civil cases.

Mr. KILDAY. That is correct.

Mr. ELSTON. So, as a matter of fact, the bill gives to the soldier convicted in every general, special, or summary court martial, more consideration than is given to a civilian who may be placed on trial in any State of the Union.

Mr. KILDAY. That is correct.

Now, very conscientious members of the boards of review have told me of the difficulty which faces them and the terrible mental anguish that it caused some of them because of the technical rules which bound them in reviewing courts martial; the fact that they could not consider the weight and the sufficiency of the evidence, and the credibility of the witnesses, and that there were technical rules by which they were deprived of the right to consider certain questions of law, because certain preliminary motions had not been made during the trial and things of that kind. This bill does away with a lot of that.

Of course, there has been a good deal said here about uniformity of sentence. I say to you, as my considered opinion, that whenever you get a system of jurisprudence which gives the same penalty for the same charge, then you have no system of justice. If theft is going to take 10 years in every case of theft, you do not have an administration of justice; you have a robot turning out automatically machine-produced things. In the administration of justice you will never reach the point that every charge of the same character of offense will receive the same penalty. It should not be. All of the circumstances must be taken into consideration; the individual himself, his intelligence, his opportunities, his environment, premeditation, acts of passion, whether done in anger, or things of that kind. So long as you do have varying penalties, then you have a system of justice. When you find a situation in which each charge of the same character receives the same penalty, then justice has left your system of administration of justice.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Pennsylvania.

Mr. FULTON. My purpose is to bring out some of these points in order to see that they are covered by the bill. I think the gentleman has made an adequate explanation on the review and remission features. Will the gentleman show me something in the bill that will provide the thing that the gentleman from Pennsylvania [Mr. JENKINS] and I are very interested in, and that is prompt trial? Is there anything in the bill that will insure these men having a prompt trial? Let me give the gentleman my situation. I found a young man who was denied a trial for 7 months. Is there anything in the bill that will prevent that in the future?

Mr. KILDAY. It is most reprehensible that a man should be held for a period of time such as that or for any unreasonable period of time. I think the bill does all that you can possibly do in a code of criminal procedure in a State in accomplishing that. Where are

you going to state your limit as to when he shall be brought to trial?

Mr. FULTON. Would the gentleman object to an amendment that had in it a provision that general courts martial in the usual run should be held within 60 days after the service of charges upon the defendant, except where the Judge Advocate General shall grant an extension of time under special circumstances?

Mr. KILDAY. I would have to oppose that, because the military very frequently is on the move. Suppose during the past war a division was in England on its way to the Continent and a man was charged there with some heinous crime, and shortly thereafter the division went to France, went into the front line, was up in Belgium or Luxemburg, or further up the line. I do not know that they could get the witnesses in 60 days, I do not know that they could get them in 90 days. They might be able to get them in 10 days. There is no way to tell. Our Constitution saw fit to say that a man was entitled to a speedy trial, and went into no further detail. That is the only right the gentleman or I have as civilians in regard to a trial.

This is what we put into the bill, and I do not think you could be any more specific, because if you attempt to be you are going to have to say that a man not brought to trial within 60 days shall be released and not tried. Whenever you do that, you have to have the procedure so hide-bound that you are not going to be able to administer justice.

Page 18, line 12, is where it begins:

When a person is held for trial by general court martial, the commanding officer will, within 8 days after the accused is arrested or confined, if practicable, forward the charges to the officer exercising general court-martial jurisdiction and furnish the accused a copy of such charges. If the same be not practicable, he will report to superior authority the reasons for delay.

Again, we must depend upon those administering any law.

The trial judge advocate will cause to be served upon the accused a copy of the charges upon which trial is to be had, and a failure so to serve such charges will be ground for a continuance unless the trial be had on the charges furnished the accused as hereinbefore provided. In time of peace no person shall, against his objection, be brought to trial before a general court martial within a period of 5 days subsequent to the service of charges upon him.

The latter provision is regarded as the one that is important. The code of procedure of my State does not say the time within which a man shall be tried, but it is very positive in saying that he shall not be tried quicker than 2 days after the indictment is returned, or in cases of capital punishment not within 2 days after the indictment has been personally served on him. That is the thing that has been regarded as deserving of protection from the Government, that is, a quick trial without opportunity to prepare.

Mr. BURLESON. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Texas.

Mr. BURLESON. I want to know what the gentleman's attitude would be relative to the suspension of sentence by the court martial itself, not waiting until higher authority reviews it.

Mr. KILDAY. I do not know that I have any definite opinion on that. It might be one way or the other. The gentleman's opinion on that would be as good as mine.

Mr. BURLESON. That is another thing that contributes to the statement I made before, and I repeat it: The boy in the Army who is charged with an offense still does not have the opportunity to defend himself in a court-martial trial comparable to that of the most hardened criminal in State jurisdictions.

Mr. KILDAY. The gentleman may be correct, but that has not been my experience, having observed the Army rather closely all my life. We have laws which are just as strict as they can be made to secure for him that right. I have seen men butchered by district attorneys; there is no doubt about that. I have seen them butchered by trial judges. What are you going to do about that in writing laws? It is something that just cannot be done. The best you can do is to put them under oath that they will fairly and impartially administer the law. After you have done that there is no way in the world that you can make a man be fair and impartial, no more than you can make him love his neighbor or keep him from hating another man. That is the human equation which exists in the administration of justice by human beings. The best we can do is to come as close to it as we possibly can, and I think that in this bill we have done so.

The CHAIRMAN. The time of the gentleman from Texas has expired. All time has expired. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the Articles of War (41 Stat. 787 to 811, as amended) are hereby amended as follows:

Article 1 is amended to read as follows:

"(a) The word 'officer' shall be construed to refer to a commissioned officer.

"(b) The word 'soldier' shall be construed as including a noncommissioned officer, a private, or any other enlisted man or woman.

"(c) The word 'company' shall be construed as including a troop, battery, or corresponding unit of the Ground or Air Forces.

"(d) The word 'battalion' shall be construed as including a squadron or corresponding unit of the Ground or Air Forces.

"(e) The word 'cadet' shall be construed to refer to a cadet of the United States Military Academy."

SEC. 2. Article 2, subparagraph (a), is amended to read as follows:

"(a) All officers, members of the Army Nurse Corps, warrant officers, flight officers, and soldiers belonging to the Regular Army of the United States; all volunteers, from the dates of their muster or acceptance into the military service of the United States; and all other persons lawfully called, drafted, or ordered into, or to duty or for training in, the said service, from the dates they are required by the terms of the call, draft, or order to obey the same;"

SEC. 3. Article 4 is amended to read as follows:

"ART. 4. Who may serve on courts martial: All officers in the military service of the United States, and officers of the Marine Corps when detached for service with the Army by order of the President, shall be competent to serve on courts martial for the trial of any persons who may lawfully be brought before such courts for trial.

"All enlisted persons in the active military service of the United States or in the active military service of the Marine Corps when detached for service with the Army by order of the President, shall be competent to serve on general and special courts martial for the trial of enlisted persons and persons of these categories shall be detailed for such service when deemed proper by the appointing authority.

"When appointing courts martial the appointing authority shall detail as members thereof those officers of the command and when eligible those enlisted persons of the command who, in his opinion, are best qualified for the duty by reason of age, training, experience, and judicial temperament; and officers and enlisted persons having less than 2 years' service shall not, if it can be avoided without manifest injury to the service, be appointed as members of courts martial in excess of minority membership thereof. No person shall be eligible to sit as a member of a general or special court martial when he is the accuser or a witness for the prosecution."

SEC. 4. Article 5 is amended to read as follows:

"ART. 2. General courts martial: General courts martial may consist of any number of members not less than five."

SEC. 5. Article 6 is amended to read as follows:

"ART. 6. Special courts martial: Special courts martial may consist of any number of members not less than three."

SEC. 6. Article 8 is amended to read as follows:

"ART. 8. General courts martial: The President of the United States, the commanding officer of a Territorial department, the Superintendent of the Military Academy, the commanding officer of an Army group, an Army, an Army corps, a division, a separate brigade, or corresponding unit of the Ground or Air Forces, or any command to which a member of the Judge Advocate General's Department is assigned as staff judge advocate, as prescribed in article 47, and, when empowered by the President, the commanding officer of any district or of any force or body of troops may appoint general courts martial; but when any such commander is the accuser or the prosecutor of the person or persons to be tried, the court shall be appointed by superior competent authority, and may in any case be appointed by superior authority when by the latter deemed desirable.

"The authority appointing a general court martial shall detail as one of the members thereof a law member who shall be an officer of the Judge Advocate General's Department or an officer admitted to practice law in a court of the judicial system of the United States or in the highest court of a State of the United States and certified by the Judge Advocate General to be qualified for such detail: *Provided*, That no general court martial shall receive evidence or vote upon its findings or sentence in the absence of the law member regularly detailed. The law member, in addition to his duties as a member, shall perform the duties prescribed in article 31 hereof and such other duties as the President may by regulations prescribe."

SEC. 7. Article 9 is amended to read as follows:

"ART. 9. Special courts martial: The commanding officer of a district, garrison, fort, camp, station, or other place where troops are on duty, and the commanding officer of an Army group, an Army, an Army corps, a division, brigade, regiment, detached battalion, or corresponding unit of ground or air forces, and the commanding officer of any other detached command or group of

detached units placed under a single commander for this purpose may appoint special courts martial; but when any such commanding officer is the accuser or the prosecutor of the person or persons to be tried, the court shall be appointed by superior authority, and may in any case be appointed by superior authority when by the latter deemed desirable."

SEC. 8. Article 11 is amended to read as follows:

"ART. 11. Appointment of trial judge advocates and counsel: For each general or special court martial the authority appointing the court shall appoint a trial judge advocate and a defense counsel, and one or more assistant trial judge advocates and one or more assistant defense counsel when necessary: *Provided*, That the trial judge advocate and defense counsel of each general court martial shall, if available, be members of the Judge Advocate General's Department or officers admitted to practice law in a court of the judicial system of the United States or in the highest court of a State of the United States: *Provided further*, That in all cases in which the officer appointed as trial judge advocate shall be a member of the Judge Advocate General's Department, or an officer admitted to practice law in a court of the United States or in the highest court of a State, the officer appointed as defense counsel shall likewise be a member of the Judge Advocate General's Department or an officer admitted to practice law in a court of the judicial system of the United States or in the highest court of a State of the United States: *Provided further*, That when the accused is represented by counsel of his own selection and does not desire the presence of the regularly appointed defense counsel or assistant defense counsel, the latter may be excused by the president of the court: *And provided further*, That no officer who has acted as member, trial judge advocate, assistant trial judge advocate, defense counsel, or assistant defense counsel, in any case shall subsequently act as a staff judge advocate to the reviewing or confirming authority upon the same case."

SEC. 9. Article 12 is amended to read as follows:

"ART. 12. General courts martial: General courts martial shall have power to try any person subject to military law for any crime or offense made punishable by these articles, and any other person who by the law of war is subject to trial by military tribunals: *Provided*, That general courts martial shall have power to adjudge any punishment authorized by law or the custom of the service including a bad-conduct discharge."

SEC. 10. Article 13 is amended to read as follows:

"ART. 13. Special courts martial: Special courts martial shall have power to try any person subject to military law for any crime or offense not capital made punishable by these articles: *Provided*, That the President may, by regulations, except from the jurisdiction of special courts martial any class or classes of persons subject to military law: *Provided further*, That the officer competent to appoint a general court martial for the trial of any particular case may, when in his judgment the interests of the service so require, cause any case to be tried by a special court martial notwithstanding the limitations upon the jurisdiction of the special court martial as to offenses herein prescribed, but the limitations upon jurisdiction as to persons and upon punishing power herein prescribed shall be observed.

"Special courts martial shall not have power to adjudge dishonorable discharge or dismissal, or confinement in excess of 6 months, nor to adjudge forfeiture of more than two-thirds pay per month for a period of not exceeding 6 months: *Provided*, That subject to approval of the sentence by an officer exercising general court-martial jurisdiction and subject to appellate review by the Judge Advocate General and appellate agencies in his office, a special court martial may adjudge a bad-conduct discharge in addition to other authorized punishment."

SEC. 11. Article 14 is amended to read as follows:

"ART. 14. Summary courts martial: Summary courts martial shall have power to try any person subject to military law, except an officer, a member of the Army Nurse Corps, a warrant officer, flight officer, or a cadet, for any crime or offense not capital made punishable by these articles: *Provided*, That noncommissioned officers shall not, if they object thereto, be brought to trial before a summary court martial without the authority of the officer competent to bring them to trial before a special court martial: *Provided further*, That the President may, by regulations, except from the jurisdiction of summary courts martial any class or classes of persons subject to military law.

"Summary courts martial shall not have power to adjudge confinement in excess of 1 month, restriction to limits for more than 3 months, or forfeiture or detention of more than two-thirds of 1 month's pay."

SEC. 12. Article 16 is amended to read as follows:

"ART. 16 Persons in the military service—how triable: Officers shall be triable only by general and special courts martial and in no case shall a person in the military service, when it can be avoided, be tried by persons inferior to him in rank. No enlisted person may sit as a member of a court martial for the trial of another enlisted person who is assigned to the same company or corresponding military unit."

SEC. 13. Article 22 is amended to read as follows:

"ART. 22. Process to obtain witnesses: Every trial judge advocate of a general or special court martial and every summary court-martial shall have power to issue the like process to compel witnesses to appear and testify which courts of the United States having criminal jurisdiction may lawfully issue; but such process shall run to any part of the United States, its Territories, and possessions. Witnesses for the defense shall be subpenaed, upon request by the defense counsel, through process issued by the trial judge advocate, in the same manner as witnesses for the prosecution."

SEC. 14. Article 24 is amended to read as follows:

"ART. 24. Compulsory self-incrimination prohibited: No witness before a military court, commission, court of inquiry, or board, or before any officer conducting an investigation, or before any officer, military or civil, designated to take a deposition to be read in evidence before a military court, commission, court of inquiry, or board, or before an officer conducting an investigation, shall be compelled to incriminate himself or to answer any question the answer to which may tend to incriminate him or to answer any question not material to the issue when such answer might tend to degrade him.

"The use of coercion or unlawful influence in any manner whatsoever by any person subject to military law to obtain any degrading statement not material to the issue, or any self-incriminating statement, admission, or confession from any accused person or witness, shall be deemed to be conduct to the prejudice of good order and military discipline, and no such statement, admission, or confession shall be received in evidence by any court martial."

SEC. 15. Article 25 is amended to read as follows:

"ART. 25. Depositions—when admissible: A duly authenticated deposition taken upon reasonable notice to the opposite party may be read in evidence before any military court or commission in any case not capital, or in any proceeding before a court of inquiry or a military board, if such deposition be taken when the witness resides, is found, or is about to go beyond the State, Territory, or district in which the court, commission, or board is ordered to sit, or beyond the distance of 100 miles from the place of trial or hearing, or when it appears to the satisfaction of the court, commission, board, or appointing authority that the witness by reason of age, sickness, bodily infirmity, imprisonment, or other reasonable cause, is unable to or, in foreign places, because of nonamenability to process, refuses to appear and testify in person at the place of trial or hearing: *Provided*, That testimony by deposition may be adduced for the defense in capital cases: *Provided further*, That a deposition may be read in evidence in any case in which the death penalty is authorized by law but is not mandatory, whenever the appointing authority shall have directed that the case be treated as not capital, and in such a case a sentence of death may not be adjudged by the court martial: *And provided further*, That at any time after charges have been signed as provided in article 46, and before the charges have been referred for trial, any authority competent to appoint a court martial for the trial of such charges may designate officers to represent the prosecution and the defense and may authorize such officers, upon due notice, to take the deposition of any witness, and such deposition may subsequently be received in evidence as in other cases."

SEC. 16. Article 31 is amended to read as follows:

"ART. 31. Method of voting: Voting by members of a general or special court martial upon questions of challenge, on the findings, and on the sentence shall be by secret written ballot. The junior member of the court shall in each case count the votes, which count shall be checked by the president, who shall forthwith announce the result of the ballot to the members of the court. The law member of a general court martial or the president of a special court martial shall rule in open court upon interlocutory questions, other than challenge, arising during the proceedings: *Provided*, That unless such ruling be made by the law member of a general court martial, if any member object thereto, the court shall be cleared and closed and the question decided by a majority vote, viva voce, beginning with the junior in rank: *And provided further*, That any such ruling made by the law member of a general court martial upon any interlocutory question other than a motion for a finding of not guilty, or the question of accused's sanity, shall be final and shall constitute the ruling of the court; but the law member may in any case consult with the court, in closed session, before making a ruling, and may change any ruling made at any time during the trial."

SEC. 17. Article 36 is amended to read as follows:

"ART. 36. Disposition of records—Special and summary courts martial: After having been acted upon by the officer appointing the court, or by the officer commanding for the time being, the record of each trial by special court martial and a report of each trial by summary court martial shall be transmitted to the headquarters of the officer exercising general court-martial jurisdiction over the command, there to be filed in the office of the staff judge advocate: *Provided, however*, That each record of trial by special court martial in which the sentence, as approved by the appointing authority, includes a bad-conduct discharge, shall, if approved by the officer exercising general court-martial jurisdiction under the provisions of article 47, be forwarded by him to The Judge Advocate General for review as hereinafter in these articles provided. When no longer

of use, records of summary courts martial may be destroyed as provided by law governing destruction of Government records."

SEC. 18. Article 38 is amended to read as follows:

"ART. 38. President may prescribe rules: The President may, by regulations, which he may modify from time to time, prescribe the procedure, including modes of proof, in cases before courts martial, courts of inquiry, military commissions, and other military tribunals, which regulations shall, insofar as he shall deem practicable, apply the principles of law and rules of evidence generally recognized in the trial of criminal cases in the district courts of the United States: *Provided*, That nothing contrary to or inconsistent with these articles shall be so prescribed: *Provided further*, That all rules and regulations made in pursuance of this Article shall be laid before the Congress."

SEC. 19. Article 39 is amended to read as follows:

"ART. 39. As to time: Except for desertion or absence without leave committed in time of war, or for mutiny or murder, no person subject to military law shall be liable to be tried or punished by a court martial for any crime or offense committed more than 2 years before arraignment of such person: *Provided*, That for desertion in time of peace or for any crime or offense punishable under articles 93 and 94 of this code the period of limitations upon trial and punishment by court martial shall be 3 years: *Provided further*, That the period of any absence of the accused from the jurisdiction of the United States, and also any period during which by reason of some manifest impediment the accused shall not have been amenable to military justice, shall be excluded in computing the aforesaid periods of limitation: *Provided further*, That this article shall not have the effect to authorize the trial or punishment for any crime or offense barred by the provisions of existing law: *And provided further*, That in the case of any offense the trial of which in time of war shall be certified by the Secretary of War to be detrimental to the prosecution of the war or inimical to the Nation's security, the period of limitations herein provided for the trial of the said offense shall be extended to the duration of the war and 6 months thereafter."

SEC. 20. Article 43 is amended to read as follows:

"ART. 43. Death sentence—when lawful; vote on findings and sentence: No person shall, by general court martial, be convicted of an offense for which the death penalty is made mandatory by law, nor sentenced to suffer death, except by the concurrence of all the members of said court martial present at the time the vote is taken, and for an offense in these articles expressly made punishable by death; nor sentenced to life imprisonment, nor to confinement for more than 10 years, except by the concurrence of three-fourths of all the members present at the time the vote is taken. Conviction of any offense for which the death sentence is not mandatory and any sentence to confinement not in excess of 10 years, whether by general or special court martial, may be determined by a two-thirds vote of those members present at the time the vote is taken. All other questions shall be determined by a majority vote."

SEC. 21. Article 44 is amended to read as follows:

"ART. 44. Officers—reduction to ranks: When a sentence to dismissal may lawfully be adjudged in the case of an officer the sentence may in time of war, under such regulations as the President may prescribe, adjudge in lieu thereof reduction to the grade of private."

SEC. 22. Article 46 is amended to read as follows:

"ART. 46. Charges; action upon:

"a. Signature; oath: Charges and specifications must be signed by a person subject to military law, and under oath either that he has personal knowledge of, or has investigated, the matters set forth therein and that the same are true in fact, to the best of his knowledge and belief.

"b. Investigation: No charge will be referred to a general court martial for trial until after a thorough and impartial investigation thereof shall have been made. This investigation will include inquiries as to the truth of the matter set forth in said charges, form of charges, and what disposition of the case should be made in the interest of justice and discipline. At such investigation full opportunity shall be given to the accused to cross-examine witnesses against him if they are available and to present anything he may desire in his own behalf, either in defense or mitigation, and the investigating officer shall examine available witnesses requested by the accused. If the charges are forwarded after such investigation they shall be accompanied by a statement of the substance of the testimony taken on both sides.

"c. Forwarding charges; delays; service of charges: When a person is held for trial by general court martial, the commanding officer will, within 8 days after the accused is arrested or confined, if practicable, forward the charges to the officer exercising general court-martial jurisdiction and furnish the accused a copy of such charges. If the same be not practicable, he will report to superior authority the reasons for delay. The trial judge advocate will cause to be served upon the accused a copy of the charges upon which trial is to be had, and a failure so to serve such charges will be ground for a continuance unless the trial be had on the charges furnished the accused as hereinbefore provided. In time of peace no person shall, against his objection, be brought to trial before a general court martial within a period of 5 days subsequent to the service of charges upon him."

SEC. 23. Article 47 is amended to read as follows:

"ART. 47. Action by convening authority:

"a. Assignment of judge advocates; channels of communication: All members of the Judge Advocate General's Department will be assigned as prescribed by the Judge Advocate General after appropriate consultations with commanders on whose staffs they may serve; and the Judge Advocate General or senior members of his staff will make frequent inspections in the field in supervision of the administration of military justice. Convening authorities will at all times communicate directly with their staff judge advocates in matters relating to the administration of military justice; and the staff judge advocate of any command is authorized to communicate directly with the staff judge advocate of a superior or subordinate command, or with the Judge Advocate General.

"b. Reference for trial: Before directing the trial of any charge by general court martial the convening authority will refer it to his staff judge advocate for consideration and advice; and no charge will be referred to a general court martial for trial unless it has been found that a thorough and impartial investigation thereof has been made as prescribed in the preceding article, that such charge is legally sufficient to allege an offense under these articles, and is sustained by evidence indicated in the report of investigation.

"c. Action on record of trial: Before acting upon a record of trial by general court martial or military commission, or a record of trial by special court martial in which a bad-conduct discharge has been adjudged and approved by the authority appointing the court, the reviewing authority will refer it to his staff judge advocate or to The Judge Advocate General for review and advice; and no sentence shall be approved unless upon conviction established beyond reasonable doubt of an offense made punishable by these articles, and unless the record of trial has been found legally sufficient to support it.

"d. Approval: No sentence of a court martial shall be carried into execution until the same shall have been approved by the convening authority: *Provided*, That no sentence of a special court martial including a bad-conduct discharge shall be carried into execution until the same shall have been approved by an officer authorized to appoint a general court martial.

"e. Who may exercise: Action by the convening authority may be taken by an officer commanding for the time being, by a successor in command, or by any officer exercising general court-martial jurisdiction.

"f. Powers incident to power to approve: The power to approve the sentence of a court martial shall include—

"(1) the power to approve or disapprove a finding of guilty and to approve only so much of a finding of guilty of a particular offense as involves a finding of guilty of a lesser included offense;

"(2) the power to approve or disapprove the whole or any part of the sentence; and

"(3) the power to remand a case for rehearing under the provisions of article 52."

SEC. 24. Article 48 is amended to read as follows:

"ART. 48. Confirmation: In addition to the approval required by article 47, confirmation is required as follows before the sentence of a court martial may be carried into execution, namely:

"a. By the President with respect to any sentence—

"(1) of death, or

"(2) involving a general officer:

Provided, That when the President has already acted as approving authority, no additional confirmation by him is necessary;

"b. By the Secretary of War with respect to any sentence not requiring approval or confirmation by the President, when the Judge Advocate General does not concur in the action of the Judicial Council;

"c. By the Judicial Council, with the concurrence of the Judge Advocate General, with respect to any sentence—

"(1) when the confirming action of the Judicial Council is not unanimous, or when by direction of the Judge Advocate General his participation in the confirming action is required, or

"(2) involving imprisonment for life, or

"(3) involving the dismissal of an officer other than a general officer, or

"(4) involving the dismissal or suspension of a cadet;

"d. By the Judicial Council with respect to any sentence in a case transmitted to the Judicial Council under the provisions of article 50 for confirming action."

SEC. 25. Article 49 is amended to read as follows:

"ART. 49. Powers incident to power to confirm: The power to confirm the sentence of a court martial shall be held to include—

"a. The power to approve, confirm, or disapprove a finding of guilty, and to approve or confirm so much only of a finding of guilty of a particular offense as involves a finding of guilty of a lesser included offense;

"b. The power to confirm, disapprove, vacate, commute, or reduce to legal limits the whole or any part of the sentence;

"c. The power to restore all rights, privileges, and property affected by any finding or sentence disapproved or vacated;

"d. The power to order the sentence to be carried into execution;

"e. The power to remand the case for a rehearing under the provisions of article 52."

SEC. 26. Article 50 is amended to read as follows:

"ART. 50. Appellate review:

"a. Board of review; Judicial Council: The Judge Advocate General shall constitute, in his office, a Board of Review composed of not less than three officers of the Judge

Advocate General's Department. He shall also constitute, in his office, a Judicial Council composed of three general officers of the Judge Advocate General's Department: *Provided*, That the Judge Advocate General may, under exigent circumstances, detail as members of the Judicial Council, for periods not in excess of 60 days, officers of the Judge Advocate General's Department of grades below that of general officer.

"b. Additional boards of review and judicial councils: Whenever necessary, the Judge Advocate General may constitute two or more Boards of Review and Judicial Councils in his office, with equal powers and duties, composed as provided in the first paragraph of this article.

"c. Branch offices: Whenever the President deems such action necessary, he may direct the Judge Advocate General to establish a branch office, under an Assistant Judge Advocate General who shall be a general officer of the Judge Advocate General's Department, with any distant command, and to establish in such branch office one or more boards of rewiew and judicial councils composed as provided in the first paragraph of this article. Such Assistant Judge Advocate General and such board of review and judicial council shall be empowered to perform for that command under the general supervision of the Judge Advocate General, the duties which the Judge Advocate General and the board of review and judicial council in his office would otherwise be required to perform in respect of all cases involving sentences not requiring approval or confirmation by the President: *Provided*, That the power of mitigation and remission shall not be exercised by such Assistant Judge Advocate General or by agencies in his office, but any case in which such action is deemed desirable may be forwarded to the Judge Advocate General with appropriate recommendations.

"d. Action by board of review when approval by President or confirming action is required: Before any record of trial in which there has been adjudged a sentence requiring approval or confirmation by the President or confirmation by any other confirming authority is submitted to the President or such other confirming authority, as the case may be, it shall be examined by the board of review which shall take action as follows:

"(1) In any case requiring action by the President, the board of review shall submit its opinion in writing, through the judicial council which shall also submit its opinion in writing, to the Judge Advocate General, who shall, except as herein otherwise provided, transmit the record and the board's and council's opinions, with his recommendations, directly to the Secretary of War for the action of the President: *Provided*, That the judicial council, with the concurrence of the Judge Advocate General shall have powers in respect to holdings of legal insufficiency equal to the powers vested in the board of review by subparagraph (3) of this paragraph.

"(2) In any case requiring confirming action by the judicial council with or without the concurrence of the Judge Advocate General, when the board of review is of the opinion that the record of trial is legally sufficient to support the sentence it shall submit its opinion in writing to the judicial council for appropriate action.

"(3) When the Board of Review is of the opinion that the record of trial in any case requiring confirming action by the President or confirming action by the Judicial Council is legally insufficient to support the findings of guilty and sentence, or the sentence, or that errors of law have been committed injuriously affecting the substantial rights of the accused, it shall submit its holding to the Judge Advocate General and when the Judge Advocate General concurs in such holding, such findings and sentence shall thereby be vacated in accord with such holding and the record shall be transmitted by the Judge Advocate General to the appropriate convening authority for a rehearing or such other action as may be proper.

"(4) In any case requiring confirming action by the President or confirming action by the Judicial Council in which the Board of Review holds the record of trial legally insufficient to support the findings of guilty and sentence, or the sentence, and the Judge Advocate General shall not concur in the holding of the Board of Review, the holding and the record of trial shall be transmitted to the Judicial Council for confirming action or for other appropriate action in a case in which confirmation of the sentence by the President is required under article 48a.

"e. Action by Board of Review in cases involving dishonorable or bad-conduct discharges or confinement in penitentiary: No authority shall order the execution of any sentence of a court martial involving dishonorable discharge not suspended, bad-conduct discharge not suspended, or confinement in a penitentiary unless and until the appellate review required by this article shall have been completed and unless and until any confirming action required shall have been completed. Every record of trial by general or special court martial involving a sentence to dishonorable discharge or bad-conduct discharge, whether such discharges be suspended or not suspended, and every record of trial by general court martial involving a sentence to confinement in a penitentiary, other than records of trial examination of which is required by paragraph d of this article, shall be examined by the Board of Review which shall take action as follows:

"(1) In any case in which the Board of Review holds the record of trial legally sufficient to support the findings of guilty and sentence, and confirming action is not by the Judge Advocate General or the Board of Review deemed necessary, the Judge Advocate General shall transmit the holding to the convening authority, and such holding shall be deemed final and conclusive.

"(2) In any case in which the Board of Review holds the record of trial legally sufficient to support the findings of guilty and sentence, but modification of the findings of guilty or the sentence is by the Judge Advocate General or the Board of Review deemed necessary to the ends of justice, the holding and the record of trial shall be transmitted to the Judicial Council for confirming action.

"(3) In any case in which the Board of Review holds the record of trial legally insufficient to support the findings of guilty and sentence, in whole or in part, and the Judge Advocate General concurs in such holding, the findings and sentence shall thereby be vacated in whole or in part in accord with such holding, and the record shall be transmitted by the Judge Advocate General to the convening authority for rehearing or such other action as may be appropriate.

"(4) In any case in which the Board of Review holds the record of trial legally insufficient to support the findings of guilty and sentence, in whole or in part, and the Judge Advocate General shall not concur in the holding of the Board of Review, the holding and the record of trial shall be transmitted to the Judicial Council for confirming action.

"f. Appellate action in other cases: Every record of trial by general court martial the appellate review of which is not otherwise provided for by this article shall be examined in the Office of the Judge Advocate General and if found legally insufficient to support the findings of guilty and sentence, in whole or in part, shall be transmitted to the Board of Review for appropriate action in accord with paragraph e of this article.

"g. Weighing evidence: In the appellate review of records of trials by courts martial as provided in these articles the Judge Advocate General and all appellate agencies in his office shall have authority to weigh evidence, judge the credibility of witnesses, and determine controverted questions of fact.

"h. Finality of court-martial judgments: The appellate review of records of trial provided by this article, the confirming action taken pursuant to article 48 or 49, the proceedings, findings, and sentences of courts martial as heretofore or hereafter approved, reviewed, or confirmed as required by the Articles of War and all dismissals and discharges heretofore or hereafter carried into execution pursuant to sentences by courts martial following approval, review, or confirmation as required by the Articles of War, shall be final and conclusive, and orders publishing the proceedings of courts martial and all action taken pursuant to such proceedings shall be binding upon all departments, courts, agencies, and officers of the United States, subject only to action upon application for a new trial as provided in article 53."

SEC. 27. Article 50½ is rescinded.

SEC. 28. Article 51 is amended to read as follows:

"ART. 51. Mitigation, remission, and suspension of sentences:

"a. At the time ordered executed: The power of the President, the Secretary of War, and any reviewing authority to order the execution of a sentence of a court martial shall include the power to mitigate, remit, or suspend the whole or any part thereof, except that a death sentence may not be suspended. The Judge Advocate General shall have the power to mitigate, remit, or suspend the whole or any part of a sentence in any case requiring appellate review under article 50 and not requiring approval or confirmation by the President, but the power to mitigate or remit shall be exercised by the Judge Advocate General under the direction of the Secretary of War. The authority which suspends the execution of a sentence may restore the person under sentence to duty during such suspension; and the death or honorable discharge of a person under suspended sentence shall operate as a complete remission of any unexecuted or unremitted part of such sentence.

"b. Subsequent to the time ordered executed:

"(1) Any unexecuted portion of a sentence other than a sentence of death, including all uncollected forfeitures, adjudged by court martial may be mitigated, remitted, or suspended and any order of suspension may be vacated, in whole or in part, by the military authority competent to appoint, for the command, exclusive of penitentiaries and the United States disciplinary barracks, in which the person under sentence may be, a court of the kind that imposed the sentence, and the same power may be exercised by superior military authority or by the Judge Advocate General under the direction of the Secretary of War: *Provided*, That no sentence approved or confirmed by the President shall be mitigated, remitted, or suspended by any authority inferior to the President: *And provided further*, That no order of suspension of a sentence to dishonorable discharge or bad conduct discharge shall be vacated unless and until confirming or appellate action on the sentence has been completed as required by articles 48 and 50.

"(2) The power to suspend a sentence shall include the power to restore the person affected to duty during such suspension.

"(3) The power to mitigate, remit, or suspend the sentence or any part thereof in the case of a person confined in the United States disciplinary barracks or in a penitentiary shall be exercised by the Secretary of War or by the Judge Advocate General under the direction of the Secretary of War."

SEC. 29. Article 52 is amended to read as follows:

"ART. 52. Rehearings: When any reviewing or confirming authority disapproves a sentence or when any sentence is vacated by action of the Board of Review or Judicial Council and the Judge Advocate General, the reviewing or confirming authority or the Judge Advocate General may authorize or direct a rehearing. Such rehearing shall take place before a court martial composed of members not members of the court martial which first heard the case. Upon such rehearing the accused shall not be tried for any offense of which he was found not guilty by the first court martial, and no sentence in excess of or more severe than the original sentence shall be enforced unless the sentence be based upon a finding of guilty of an offense not considered upon the merits in the original proceeding."

SEC. 30. Article 53 is amended to read as follows:

"ART. 53. Petition for new trial: Under such regulations as the President may prescribe, the Judge Advocate General is authorized, upon application of an accused person, and upon good cause shown, in his discretion to grant a new trial, or to vacate a sentence, restore rights, privileges, and property affected by such sentence, and substitute for a dismissal, dishonorable discharge, or bad conduct discharge previously executed a form of discharge authorized for administrative issuance, in any court-martial case in which application is made within 1 year after final disposition of the case upon initial appellate review: *Provided*, That with regard to cases involving offenses committed during World War II, the application for a new trial may be made within 1 year after termination of the war, or after its final disposition upon initial appellate review as herein provided, whichever is the later: *Provided*, That only one such application for a new trial may be entertained with regard to any one case: *And provided further*, That all action by the Judge Advocate General pursuant to this article, and all proceedings, findings, and sentences on new trials under this article, as approved, reviewed, or confirmed under articles 47, 48, 49, and 50, and all dismissals and discharges carried into execution pursuant to sentences adjudged on new trials and approved, reviewed, or confirmed, shall be final and conclusive and orders publishing the action of the Judge Advocate General or the proceedings on new trial and all action taken pursuant to such proceedings, shall be binding upon all departments, courts, agencies, and officers of the United States."

SEC. 31. Article 70 is amended to read as follows:

"ART. 70. Charges; action upon, unnecessary delay: When any person subject to military law is placed in arrest or confinement immediate steps will be taken to try the person accused or to dismiss the charge and release him. Any officer who is responsible for unnecessary delay in investigating or carrying the case to a final conclusion shall be punished as a court martial may direct."

SEC. 32. Article 85 is amended to read as follows:

"ART. 85. Drunk on duty: Any person subject to military law, who is found drunk on duty, shall be punished as a court martial may direct."

SEC. 33. Article 88 is amended to read as follows:

"ART. 88. Unlawfully influencing action of court: Any person subject to military law who attempts to coerce or unlawfully influence the action of a court martial or any military court or commission, or any member thereof, in reaching the findings or sentence in any case, or the action of an appointing or reviewing or confirming authority with respect to his judicial acts, shall be punished as a court martial may direct."

SEC. 34. Article 89 is amended to read as follows:

"ART. 89. Good order to be maintained and wrongs redressed: All persons subject to military law are to behave themselves orderly in quarters, garrison, camp, and on the march; and any person subject to military law who commits any waste or spoil, or wrongfully destroys any property whatsoever or commits any kind of depredation or riot, shall be punished as a court martial may direct. Any commanding officer who, upon complaint made to him refuses or omits to see reparation made to the party injured, insofar as the offender's pay shall go toward such reparation, as provided for in article 105, shall be dismissed from the service, or otherwise punished, as a court martial may direct."

SEC. 35. Article 92 is amended to read as follows:

"ART. 92. Murder—rape: Any person subject to military law found guilty of murder shall suffer death or imprisonment for life, as a court martial may direct; but if found guilty of murder not premeditated, he shall be punished as a court martial may direct. Any person subject to military law if found guilty of rape shall suffer death or such other punishment as a court martial may direct: *Provided*, That no person shall be tried by court martial for murder or rape committed within the geographical limits of the States of the Union and the District of Columbia in time of peace."

SEC. 36. Article 93 is amended to read as follows:

"ART 93. Various crimes: Any person subject to military law who commits manslaughter, mayhem, arson, burglary, housebreaking, robbery, larceny, perjury, forgery, sodomy, assault with intent to commit any felony, assault with intent to do bodily harm with a dangerous weapon, instrument, or other thing, or assault with intent to do bodily harm, shall be punished as a court martial may direct: *Provided*, That any person subject to military law who commits larceny or embezzlement shall be guilty of larceny within the meaning of this article."

SEC. 37. Article 94 is amended to read as follows:

"ART. 94. Frauds against the Government: Any person subject to military law who makes or causes to be made any claim against the United States or any officer thereof knowing such claim to be false or fraudulent; or who defrauds or attempts to defraud the Government of the United States or any of its agencies in any manner denounced by the Criminal Code of the United States or in any manner whatsoever, or who steals, knowingly and willfully misappropriates, wrongfully applies to his own use or benefit or wrongfully and knowingly sells or disposes of any ordnance, arms, equipment, ammunition, clothing, subsistence stores, money, or other property of the United States, furnished or intended for the military service thereof shall be punished as a court martial may direct: *Provided*, That any person subject to military law who commits larceny or embezzlement with respect to property of the United States furnished or intended for the military service thereof or with respect to other property within the purview of this article, steals said property within the meaning of this article.

"If any person, being guilty of any of the offenses aforesaid or who steals or fails properly to account for any money or other property held in trust by him for enlisted persons or as its official custodian while in the military service of the United States, receives his discharge or is dismissed or otherwise separated from the service, he shall continue to be liable to be arrested and held for trial and sentence by a court martial in the same manner and to the same extent as if he had been so separated therefrom."

SEC. 38. Article 104 is amended to read as follows:

"ART. 104. Disciplinary powers of commanding officers: Under such regulations as the President may prescribe, the commanding officer of any detachment, company, or higher command, may, for minor offenses, impose disciplinary punishments upon persons of his command without the intervention of a court martial, unless the accused demands trial by court martial.

"The disciplinary punishments authorized by this article may include admonition or reprimand, or the withholding of privileges, or extra fatigue, or restriction to certain specified limits, or hard labor without confinement or any combination of such punishments for not exceeding 1 week from the date imposed; but shall not include forfeiture of pay or confinement under guard; except that any officer exercising general court martial jurisdiction may, under the provisions of this article, also impose upon a warrant officer or flight officer or officer of his command below the rank of brigadier general a forfeiture of not more than one-half of his pay per month for 3 months.

"A person punished under authority of this article, who deems his punishment unjust or disproportionate to the offense, may, through the proper channel, appeal to the next superior authority, but may in the meantime be required to undergo the punishment adjudged. The commanding officer who imposes the punishment, his successor in command, and superior authority shall have power to mitigate or remit any unexecuted portion of the punishment. The imposition and enforcement of disciplinary punishment under authority of this article for any act or omission shall not be a bar to trial by court martial for a serious crime or offense growing out of the same act or omission, and not properly punishable under this article; but the fact that a disciplinary punishment has been enforced may be shown by the accused upon trial, and when so shown shall be considered in determining the measure of punishment to be adjudged in the event of a finding of guilty."

SEC. 39. Article 108 is amended to read as follows:

"ART. 108. Soldiers—separation from the service: No enlisted person, lawfully inducted into the military service of the United States, shall be discharged from said service without a certificate of discharge, and no enlisted person shall be discharged from said service before his term of service has expired, except in the manner prescribed by the Secretary of War, or by sentence of a general or special court martial."

SEC. 40. Article 110 is amended to read as follows:

"ART. 110. Certain Articles of War to be read or explained: Articles 1, 2, 24, 28, 29, 54 to 97, inclusive, 104 to 109, inclusive, and 121 shall be read or carefully explained to every soldier at the time of his enlistment or muster in, or within 6 days thereafter, and shall be read or explained once every 6 months to the soldiers of every garrison, regiment, or company in the service of the United States. And a complete text of the Articles of War and of the Manual for Courts Martial shall be made available to any soldier, upon his request, for his personal examination."

SEC. 41. Article 116 is amended to read as follows:

"ART. 116. Powers of assistant trial judge advocate and of assistant defense council: An assistant trial judge advocate of a general or special court martial shall be competent to perform any duty devolved by law, regulation, or the custom of the service upon the trial judge advocate of the court. An assistant defense counsel shall be competent likewise to perform any duty devolved by law, regulation, or the custom of the service upon counsel for the accused."

SEC. 42. Article 117 is amended to read as follows:

"ART. 117. Removal of civil suits: When any civil or criminal prosecution is commenced in any court of a State of the United

States against any officer, soldier, or other person in the military service of the United States on account of any act done under color of his office or status, or in respect to which he claims any right, title, or authority under any law of the United States respecting the military forces thereof, or under the law of war, such suit or prosecution may at any time before the trial or final hearing thereof be removed for trial into the district court of the United States in the district where the same is pending in the manner prescribed by law, and the cause shall thereupon be entered on the docket of such district court, which shall proceed as if the cause had been originally commenced therein and shall have full power to hear and determine said cause."

SEC. 43. Section 1 of article 121 is amended to read as follows:

"ART. 121. Complaints of wrongs: Any officer or soldier who believes himself wronged by his commanding officer, and, upon due application to such commander, is refused redress, may complain to the officer exercising general court-martial jurisdiction over the officer against whom the complaint is made. That officer shall examine into said complaint and take proper measures for redressing the wrong complained of; and he shall, as soon as possible, transmit to the War Department a true statement of such complaint, with the proceedings had thereon."

SEC. 44. This act shall become effective on the first day of the fourth calendar month after approval of this act.

SEC. 45. All offenses committed and all penalties, forfeitures, fines, or liabilities incurred prior to the effective date of this act, under any law embraced in or modified, changed, or repealed by this act, may be prosecuted, punished, and enforced in the same manner and with the same effect as if this act had not been passed.

Mr. ELSTON (interrupting the reading of the bill). Mr. Chairman, since the bill is 47 pages long, I ask unanimous consent that further reading of the bill be dispensed with, that it be printed in the RECORD, and that the bill be open to amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 2, line 13, strike out "members of the Army Nurse Corps."

The committee amendment was agreed to.

Committee amendment: Page 2, line 14, strike out the words "flight officers."

The committee amendment was agreed to.

Committee amendment: Page 3, line 3, following the period after the word "trial", insert the following paragraph:

"All warrant officers in the active military service of the United States and warrant officers in the active military service of the Marine Corps when detached for service with the Army by order of the President, shall be competent to serve on general and special courts martial for the trial of warrant officers and enlisted persons, and persons in this category shall be detailed for such service when deemed proper by the appointing authority."

The committee amendment was agreed to.

Committee amendment: Page 3, strike out lines 11 to 17, inclusive, and insert the following:

"Enlisted persons in the active military service of the United States or in the active military service of the Marine Corps when detached for service with the Army by order of the President, shall be competent to serve on general and special courts martial for the trial of enlisted persons when requested in writing by the accused at any time prior to the convening of the court. When so requested, no enlisted person shall, without his consent, be tried by a court the membership of which does not include enlisted persons to the number of at least one third of the total membership of the court."

The committee amendment was agreed to.

Committee amendment: Page 4, line 16, strike out "2" and insert "5."

The committee amendment was agreed to.

Committee amendment: Page 5, line 17, strike out the words "an officer admitted to practice law in a court of the judicial system of the United States" and insert the words "an officer who is a member of the bar of a Federal court."

The committee amendment was agreed to.

Committee amendment: Page 5, line 19, strike out "in" and insert "of."

The committee amendment was agreed to.

Committee amendment: Page 7, line 1, strike out "admitted to practice law in a court of the judicial system of the United States" and insert "who are members of the bar of a Federal court."

The committee amendment was agreed to.

Committee amendment: Page 7, line 3, strike out "in" and insert "of."

The committee amendment was agreed to.

Committee amendment: Page 7, line 7, strike out "admitted to practice law in a court of the United States" and insert "who is a member of the bar of a Federal court."

The committee amendment was agreed to.

Committee amendment: Page 7, line 9, strike out "in" and insert "of."

The committee amendment was agreed to.

Committee amendment: Page 7, line 12, strike out "admitted to practice law in a court of the judicial system of the United States" and insert "who is a member of the bar of a Federal court."

The committee amendment was agreed to.

Committee amendment: Page 7, line 14, strike out "in" and insert "of."

The committee amendment was agreed to.

Committee amendment: Page 7, line 19, strike out "officer" and insert "person."

The committee amendment was agreed to.

Committee amendment: Page 7, line 21, strike out the word "or."

The committee amendment was agreed to.

Committee amendment: Page 1, line 21, insert after the word "counsel," "or investigating officer."

The committee amendment was agreed to.

Committee amendment: Page 7, line 22, after the word "act" insert "in any capacity as a member of the prosecution or defense or act."

The committee amendment was agreed to.

Committee amendment: Page 8, line 14, strike out the proviso beginning in line 14.

The committee amendment was agreed to.

Committee amendment: Page 8, line 17, strike out the word "further."

The committee amendment was agreed to.

Committee amendment: Page 8, line 22, strike out the word "but" and all of lines 23 and 24.

The committee amendment was agreed to.

Committee amendment: Page 9, line 10, insert:

"*Provided further*, That a bad-conduct discharge shall not be adjudged by a special court martial unless a complete record of the proceedings of and testimony taken by the court is taken in the case."

The committee amendment was agreed to.

Committee amendment: Page 9, line 17, strike out "a member of the Army Nurse Corps."

The committee amendment was agreed to.

Committee amendment: Page 9, line 17, strike out the words "flight officer."

The committee amendment was agreed to.

Committee amendment: Page 17, line 22, after the period insert "The accused shall be permitted, upon his request, to be represented at such investigation by counsel of his own selection, civil counsel if he so provides, or military if such counsel be reasonably available, otherwise by counsel appointed by the officer exercising general courts martial jurisdiction over the command."

The committee amendment was agreed to.

Committee amendment: Page 20, line 18, after the word "until", insert "in addition to the approval of the convening authority."

The committee amendment was agreed to.

Committee amendment: Page 24, line 22, strike out the word "may" and insert the word "shall."

The committee amendment was agreed to.

Committee amendment: Page 34, line 18, strike out the word "Any", and insert: "No authority appointing a general, special, or summary court martial nor any other commanding officer, shall censure, reprimand, or admonish such court, or any member thereof, with respect to the findings or sentence adjudged by the court, or with respect to any other exercise, by such court or any member thereof, of its or his judicial responsibility."

The committee amendment was agreed to.

Committee amendment: Page 34, line 24, after the word "responsibility", insert the word "No."

The committee amendment was agreed to.

Committee amendment: Page 34, line 24, strike out the words "who attempts" and insert the words "shall attempt."

The committee amendment was agreed to.

Committee amendment: Page 35, line 5, strike out the words "shall be punished as a court martial may direct."

The committee amendment was agreed to.

Committee amendment: Page 36, line 19, strike out all of line 19 and the balance of the page, and all of page 37, down to and including line 21, and insert:

"ART. 94. Frauds against the Government: Any person subject to military law who makes or causes to be made any claim against the United States or any officer thereof, knowing such claim to be false or fraudulent; or

"Who presents or causes to be presented to any person in the civil or military service thereof, for approval or payment, any claim against the United States, or any officer thereof, knowing such claim to be false or fraudulent; or

"Who enters into any agreement or conspiracy to defraud the United States by obtaining, or aiding others to obtain, the allowance or payment of any false or fraudulent claim; or

"Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or against any officer thereof, makes or uses, or procures, or advises the making or use of, any writing or other paper knowing the same to contain any false or fraudulent statements; or

"Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or any officer thereof, makes or procures, or advises the making of, any oath to any fact or to any writing or other paper knowing such oath to be false; or

"Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or any officer thereof, forges or counterfeits, or procures, or advises the forging or counterfeiting of any signature upon any writing or other paper, or uses, or procures, or advises the use of any such signature, knowing the same to be forged or counterfeited; or

"Who, having charge, possession, custody, or control of any money or other property of the United States, furnished or intended for the military service thereof, knowingly delivers, or causes to be delivered, to any person having authority to receive the same, any amount thereof less than that for which he receives a certificate or receipt; or

"Who, being authorized to make or deliver any paper certifying the receipt of any property of the United States furnished or intended for the military service thereof, makes or delivers to any person such writing, without having full knowledge of the truth of the statements therein contained and with intent to defraud the United States; or

"Who steals, embezzles, knowingly and willfully misappropriates, applies to his own use or benefit, or wrongfully or knowingly sells or disposes of any ordnance, arms, equipment, ammunition, clothing, subsistence stores, money, or other property of the United States furnished or intended for the military service thereof: *Provided*, That any person, subject to military law, who commits larceny or embezzlement with respect to property of the United States, furnished or intended for the military service thereof, or with respect to other property within the purview of this article, steals said property within the meaning of this article; or

"Who knowingly purchases or receives in pledge for any obligation or indebtedness from any soldier, officer, or other person who is a part of or employed in said forces or service, any ordnance, arms, equipment, ammunition, clothing, subsistence stores, or other property of the United States, such soldier, officer, or other person not having lawful right to sell or pledge the same; or

"Who enters into any agreement or conspires to commit any of the offenses aforesaid;

"Shall, on conviction thereof, be punished by fine or imprisonment, or by such other punishment as a court martial may adjudge, or by any or all of said penalties. If any person, being guilty of any of the offenses aforesaid or who steals or fails properly to account for any money or other property held in trust by him for enlisted persons or as its official custodian while in the military service of the United States, receives his discharge or is dismissed or otherwise separated from the service, he shall continue to be liable to be arrested and held for trial and sentence by a court martial in the same manner and to the same extent as if he had not been so separated therefrom."

The committee amendment was agreed to.

Committee amendment: Page 41, line 11, strike out "or flight officer."

The committee amendment was agreed to.

Committee amendment: Page 43, line 5, strike out the word "Council" and insert the word "Counsel."

The committee amendment was agreed to.

Committee amendment: Page 44, line 17, strike out the word "fourth" and insert the word "eighth."

The committee amendment was agreed to.

Committee amendment: Page 45, line 1, insert:

"SEC. 46. Section 8 of the National Defense Act, as amended (10 U. S. C. 61), is amended to read as follows:

"'SEC. 8. Judge Advocate General's Corps: The Judge Advocate General's Corps shall consist of one Judge Advocate General with the rank of major general, one assistant with the rank of major general, three officers with the rank of brigadier general, and an active list commissioned officer strength to be determined by the Secretary of War, but such strength shall not be less than 1½ percent of the authorized active list commissioned officer strength of the Regular Army, and in addition warrant officers and enlisted men in such numbers as the Secretary of War shall determine.'

"SEC. 47. Regular Army officers shall be permanently appointed by the President, by and with the advice and consent of the Senate, in the Judge Advocate General's Corps in the commissioned officer grades of major general, brigadier general, colonel, lieutenant colonel, major, captain, and first lieutenant. The names of commissioned officers of the Judge Advocate General's Corps below the grade of brigadier general shall be carried on the Judge Advocate's promotion list. The Judge Advocate's promotion list shall be established by entering thereon the names of the officers concerned without change in their order of precedence on the existing promotion list. The authorized numbers in each of the several grades in the Judge Advocate's promotion list shall be prescribed by the Secretary of War, but the numbers thus authorized shall not exceed the following percentages of the total strength authorized for that list: 8 percent in the grade of colonel; 14 percent in the grade of lieutenant colonel; 19 percent in the grade of major; 23 percent in the grade of captain; and 36 percent in the grade of first lieutenant: *Provided*, That numbers may be authorized for any grade in lieu of authorization in higher grades: *Provided further*, That this provision shall not operate to require a reduction in permanent grade of any officer now holding permanent appointment.

"Officers whose names are carried on the Judge Advocate's promotion list shall be promoted to the several grades as now or hereafter prescribed for promotion of promotion-list officers generally and the authorized numbers in grades below colonel on such list shall be temporarily increased from time to time in order to give effect to the promotion system now or hereafter prescribed by law for promotion-list officers.

"Within the authorized strength of the Judge Advocate General's Corps additional officers may be appointed by transfer of qualified officers from other branches of the Army, by appointment of Reserve judge advocates or qualified civilian graduates of accredited law schools. Those originally appointed in the Regular Army in the Judge Advocate General's Corps shall be credited with an amount of service for the purpose of determining grade, position on promotion list, permanent-grade seniority, and eligibility for promotion as now or hereafter prescribed by law.

"SEC. 48. The Judge Advocate General shall, in addition to such other duties as may be prescribed by law, be the legal adviser of the Secretary of War and of all officers and agencies of the War Department; and all members of the Judge Advocate General's Corps shall perform their duties under the direction of the Judge Advocate General.

"SEC. 49. Notwithstanding any other provisions of law, the Judge Advocate General, the Assistant Judge Advocate General and general officers of the Judge Advocate General's Corps shall be appointed by the President, by and with the advice and consent of the Senate, from among officers of the Judge Advocate General's Corps who are recommended for such positions by the Secretary of War. Upon the appointment of an officer to be the Judge Advocate General or Assistant Judge Advocate General with the rank of major general, he shall at the same time if not then holding permanent appointment in such grade be appointed a permanent major general of the Regular Army."

Mr. ELSTON. Mr. Chairman, I offer a committee amendment to the amendment.

The Clerk read as follows:

Committee amendment offered by Mr. ELSTON: In sections 46, 47, 48, and 49 substitute the words "the Department of the Army" for the word "War" wherever the latter shall appear, except in line 8, page 47.

The amendment to the amendment was agreed to.

The committee amendment as amended was agreed to.

The Clerk read as follows:

Committee amendment: Page 45, line 11, strike out the words "Regular Army" and substitute therefor the words "Armed services of the National Military Establishment who are subject to the Articles of War."

The amendment was agreed to.

The Clerk read as follows:

Committee amendments:

Page 16, line 5, substitute the words "Department of the Army" for the word "War."

Page 21, line 23, substitute the words "Department of the Army" for the word "War."

Page 30, line 12, substitute the words "Department of the Army" for the word "War."
Page 30, line 22, substitute the words "Department of the Army" for the word "War."
Page 31, line 15, substitute the words "Department of the Army" for the word "War."

The amendments were agreed to.

Mr. FULTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FULTON: On page 3, line 22, after the word "persons", insert a period and strike out the words "when requested in writing by the accused at any time prior to the convening of the court when so requested."

Mr. FULTON. Mr. Chairman, I shall not take 5 minutes on each of the amendments I have but will explain each briefly and then let them be voted on.

My amendment strikes out on page 3, line 22, the proviso that the enlisted man must request in writing that he shall have other enlisted men serving on the court martial. I think it is better that the enlisted person shall have enlisted men serving on the court martial unless he shall request otherwise. If this is not done you always have the enlisted man asking for enlisted men and the officers saying, "Well, he does not have confidence in us"; so the enlisted man under this particular provision will not ask for it. It will never be used.

If you do what I suggest, put a period after the word "persons" in the phrase "courts martial for the trial of enlisted persons." Then, the next sentence will read "When so requested, no enlisted person shall, without his consent be tried by a court the membership of which does not include enlisted persons to the number of at least one-third of the total membership of the court."

That means that unless the enlisted man objects he shall have enlisted men on the court martial without asking for it. It is simply a method of procedure.

I now yield to the committee.

Mr. ELSTON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, as I understand the amendment offered by the gentleman from Pennsylvania, it would not make it mandatory that the accused request in writing that enlisted men serve on general or special court-martial cases. We have provided that the man may have enlisted men if he requests it in writing. It seems to me the rights of the enlisted man are fully protected. We gave great thought and study and discussion to this whole subject in the committee, and came to the conclusion that the rights of an accused person was fully protected if he had the right to select enlisted men to serve if he wanted them. It seems to me that we have gone just as far as it is necessary in order to protect the rights of the accused by requiring him to make the request in writing. As a matter of fact, I do not think he is as fully protected under the gentleman's suggested amendment as he would be under the section of the bill as read.

Mr. KILDAY. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I yield to the gentleman from Texas.

Mr. KILDAY. I believe it will be found that the hearings reflect the fact that the American Bar Association Committee in its hearings and from questionnaires sent out received a large proportion of answers from former enlisted men objecting to the presence of enlisted men on courts martial in the trial of enlisted men. There was quite a feeling this should be mandatory when we began these hearings, but after the thing had been gone into and we had heard from people who went around the country, and from questionnaires sent out to those who had been in the service, we found there was a surprisingly large proportion of enlisted men who preferred to be tried by officers. This will give both those who want to be tried by officers and those who want enlisted men on the courts martial the same right to have them.

Mr. FULTON. Mr. Chairman, will the gentleman yield to clear up a misapprehension?

Mr. ELSTON. I yield to the gentleman from Pennsylvania.

Mr. FULTON. My amendment does not make it mandatory. My amendment provides for the consent of the enlisted man, and the language would now read as follows, using the committee's own language:

No enlisted person shall without his consent be tried by a court the membership of which does not include enlisted persons to the number of at least one-third of the total membership of the court.

So my amendment, too, says it must be with the enlisted man's consent. The only difference between the committee language and mine is that I do not require the enlisted man to stand up to the officers and make the request. I let the enlisted man have them as long as he consents to it, but he does not have to initiate it and go against the officers over him.

Mr. KILDAY. At one time we had this provision written that way, but after further consideration we came to the conclusion that we were in error in so writing it because it would place it in the power of the accused to cause interminable delay in bringing his case to trial. If he does not have to make his choice until he is arraigned before a court martial, after the court is fully constituted, perhaps officers having been brought from long distances in order to constitute the court, at the very last minute he can say, "I decide I want enlisted men on the court." Then the case goes over.

I think it is perfectly fair and reasonable for him to be required to make his request. You understand that in this bill we give him the right to counsel, even in the preliminary investigation. He has the right to counsel from the very first moment they suspect him. That has not been true in the past. Now he has a lawyer from the very beginning.

Mr. JENKINS of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I yield to the gentleman from Pennsylvania.

Mr. JENKINS of Pennsylvania. May I point out that the first sentence as written by the committee merely designates the enlisted personnel as competent to sit on the court. It does not say they shall or shall not. The amendment of the gentleman from Pennsylvania leaves the same competency of enlisted personnel as the committee has written it. Then he simply says that no enlisted person shall be tried without his consent by a court which does not include enlisted personnel. So I think the gentleman from Ohio is possibly not quite correct in saying that the committee amendment gives greater protection to the enlisted personnel.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. CROW. Mr. Chairman, I rise in support of the pending amendment.

Mr. Chairman, I have a similar amendment pending on the desk, but rise in support of this amendment. My reasoning is a little bit different from that of my colleague from Pennsylvania [Mr. FULTON].

This bill provides that upon request of the enlisted man "prior to the meeting of the board" a court martial is appointed by an order of the commanding officer; notices are sent out and the officers come into the court-martial room. They are not convened until they raise their right hands and are sworn as a court. Under this bill the enlisted man has until that time to say, "I want enlisted personnel on my court." What does that mean? It means that the court will have to be adjourned, the commanding officer will have to cut a new order, and there will be at least a delay of 3 days in bringing the case to trial.

I think this amendment should be adopted. I think an enlisted man should be entitled to have enlisted men on the court. I think that has been determined by the sentiment of the enlisted personnel, and I do not think that it ought to be allowed to remain as it is so that the court can be delayed and cause the commanding officer to appoint a new court. If we change the law the way we have it now the commanding officer can appoint two courts, one court of officers to try officers and one court with enlisted personnel on it to try enlisted personnel. If the enlisted man says, "I want to be tried by officers," the commanding officer will call the other court, but as it is drawn at the present time it will cause a great deal of inconvenience to the appointing authorities.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. CROW. I yield to the gentleman from New York.

Mr. KEATING. What would be the effect, in the gentleman's opinion if the amendment were adopted, if the enlisted man did nothing? Unless he expressed his consent, would he not then be tried solely by a court of officers?

Mr. CROW. Not necessarily. I believe it should be required to have enlisted personnel on the court.

Mr. KEATING. It does not strike me that way. It seems to me, as the gentleman from Ohio has said, that this amendment does a disservice to what we are trying to accomplish, and for this reason: Under the proposed amendment, if the enlisted man remained silent and did nothing, then it seems to me he would be tried by a court of officers; he would have to be. Now, under the bill as it reads, the thing is brought right up to

his attention, "Do you want enlisted men on your court? If you want them, you must ask for them in writing." As the gentleman from Texas has said, he is advised by counsel from the very start, and one of the first things his counsel would say to him would be, "Do you want enlisted men on your court? If you do, sign this paper asking for it. If you do not, then you do not sign the paper." It seems to me that that protects him thoroughly and much more effectively than would happen under the proposed amendment.

Mr. CROW. It might protect him if they approach it in that way, if the defense counsel asks him whether he wants them. But, do they always do that? Could he not change his mind the day he walked into court merely for the purpose of delaying the case?

Mr. KEATING. Under the bill as presented to us by the committee, as I understand it, if the man on trial wished to have enlisted men on the court to try him he could request that at any time prior to the convening of the court, and they would have to comply with his request. That is the way I think it should be.

Mr. CROW. But he certainly would have that right under this bill.

Mr. ELSTON. Mr. Chairman, will the gentleman yield?

Mr. CROW. I yield to the gentleman from Ohio.

Mr. ELSTON. Could he not also change his mind under the amendment which the gentleman is referring to and not give his consent until the court had been convened?

Mr. CROW. No. I do not think he would have anything to say about it. It says here that the enlisted personnel must be on the court.

Mr. ELSTON. Mr. Chairman, will the gentleman yield further?

Mr. CROW. Yes.

Mr. ELSTON. You will notice we went so far as to provide that the accused person shall, in all cases subject to general and special court martial, have the benefit of counsel, who shall have the same legal qualifications as the law officer of the court. Are we not to assume that counsel is going to give to the accused person the benefit of the best advice that he can and is going to advise him that he has the right to have enlisted men on the court? Are we going to assume that counsel is going to give him incorrect advice in all cases?

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. CROW. Mr. Chairman, I ask unanimous consent to proceed for two additional minutes to answer that question.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CROW. I would like to answer the chairman of the committee. He states that they will all have legal counsel; all perfectly qualified. Now, if you read the bill it says, "if available." I think in most cases you will find that legal counsel is not available, and I do not think that is any protection to him at all.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. CROW. I yield to the gentleman from Pennsylvania.

Mr. FULTON. May I read exactly how the amendment will read:

> No enlisted person shall without his consent be tried by a court the membership of which does not include enlisted persons to the number of at least one-third of the total membership of the court.

Therefore, he does have enlisted persons unless he consents otherwise.

Mr. CROW. It would not be an officer court to try an enlisted man unless he consented to it. I think that is correct.

Mrs. ROGERS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. CROW. I yield to the gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. Did not General Doolittle suggest that four enlisted men sit on the court?

Mr. CROW. It has always been my understanding that his committee did suggest that.

Mrs. ROGERS of Massachusetts. He testified that before our committee. I understood that would be his recommendation.

Mr. CROW. That is right.

Mrs. ROGERS of Massachusetts. I happen to know that in many courts martial no legal man acted as a representative of an enlisted man. I happened to work a good many years with the prisoners, both the disabled prisoners and the others, the detached men, and I felt that they did not have the proper representation. One man I know of, who gave a leg for us, was sentenced to life at hard labor.

Mr. CROW. I can agree with the gentlewoman from Massachusetts. I was very active during the war on courts martial, and I have had some experience in that.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. McCORMACK. Mr. Chairman, I ask unanimous consent that the gentleman be permitted to proceed for three additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. ANDREWS of New York. Mr. Chairman, will the gentleman yield?

Mr. CROW. I yield to the chairman of the Committee on Armed Services.

Mr. ANDREWS of New York. Is it not inconceivable that any enlisted man appearing before the court, this provision being in the Articles of War, is not going to know, either through counsel or otherwise, that he has the right to request enlisted personnel on that court? Why, it is inconceivable.

Mr. CROW. I do not think the Articles of War means anything in that connection. I have been in the Army and have heard them read every 6 months, and I have seen the enlisted men sleep through the whole thing. Most of the enlisted men do not know what is in the Articles of War.

I personally am in favor of this amendment and hope it will be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. FULTON].

The question was taken; and the Chair being in doubt, the Committee divided and there were—ayes 36, noes 43.

So the amendment was rejected.

Mr. FULTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. FULTON: On page 4, line 7, strike out "age."

Mr. FULTON. Mr. Chairman, very briefly, this section means that when appointing courts martial they are to pick those best qualified for duty by reason of age, training, experience, and judicial temperament, according to the committee version. My amendment simply strikes out the word "age." Will someone on the committee please tell me whether the older ones are supposed to be better than the younger ones, and what age is going to supply, simply in and of itself, as a qualification for serving on courts martial?

Mr. ELSTON. It gives some discretion in the selection of members who are to serve, so that they can take into consideration whether they are youthful or mature. That is all it means. The commanding officer thus would not have to take an enlisted man, regardless of his age. Bear in mind that in time of war we may be drafting boys who are 18 years of age and the commanding officer or convening officer may feel that they are not mature enough to serve on such a board. It is a protection to the accused that such a qualification can be taken into consideration.

Mr. HUGH D. SCOTT, JR. Has not the gentleman been in Congress long enough to know that age in itself is a qualification?

Mr. FULTON. But not when you are younger.

May I say that if this word "age" is left in the bill, it will be assumed by people in the field that it means old age and that the older they are, that is the more reason why they should be on the courts martial. We who have been in the service do not want appointments on the basis of age. I have seen generals in the Army 37 or 38 years of age and with due deference to the committee, I think that Army generals of the age of 38 have probably cut their eye teeth enough to serve on a court martial.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. KEATING. I would agree with the gentleman that they should not put all old men on the courts martial and if that was the effect of the wording as it now stands, I would be opposed to it. I do not agree, however, with that. It seems to me it gives a wide latitude in the matter and that if a young man is being tried, this gives him protection in the matter of taking into consideration the age of the ones on the court. I do not agree that it would be interpreted to mean that only old men should be appointed to the court. I wonder if

it is not true, and might I ask the chairman of the subcommittee whether it was not also intended that youth as well as old age might be a consideration in appointing them?

Mr. ELSTON. Yes, there was no desire to exclude youth. But there might be cases in which the convening authority might feel that the enlisted man was too young and not mature enough to act as a judge in the trial of a serious case. That is all.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. McCORMACK. It seems to me that the gentleman's amendment is one that ought to receive very serious consideration. The question of training and experience and judicial temperament seems to me to be the important thing. We have an age limit of 21 years before anyone can take the bar examination, for example. I was an enlisted man in the First World War and had been a lawyer for several years before that. I do not know whether I was qualified from the angle of training and experience and judicial temperament, and so forth, but nevertheless it seems to me there is something in what the gentleman says with reference to this question of age. Furthermore, the other requirements, training and experience and judicial temperament, are the real thing.

Mr. FULTON. That is right. I agree with the gentleman.

Mr. McCORMACK. The question of age would be involved in that. If it is specifically put in, then there are going to be rules and regulations passed, and being a mandate of Congress, it seems to me that would have to be considered and they would have to determine some particular age below which they could not consider the appointment of anyone to a courts martial, whether he was an officer or an enlisted man, even if such a person had the training and experience and judicial temperament. It seems to me those are the paramount qualifications that a man should possess to be a member of a courts-martial board.

Mr. KEARNEY. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. KEARNEY. I wish the gentleman would explain why if the word "age" is taken out in line with his amendment you should not also take out the words "training, experience, and judicial temperament," because in my opinion they all go together.

Mr. FULTON. Because age alone means nothing, and I do not want someone appointed on the basis of age alone.

Mr. KEARNEY. Training alone means nothing either.

Mr. MacKINNON. Mr. Chairman, I rise in support of the amendment.

I do not feel that this is a matter of particularly great consequence, but I want to say briefly that I concur very heartily in the argument that has been advanced by the gentleman from Pennsylvania. He has analyzed the operation of this word as I have seen it work in the services. If you leave in the word "age" which is admittedly an immaterial factor, when the training and experience of the individual should be the true criterion, then you will have a perversion of the word "age" by people in the field that will be used to create discrimination between individuals that should not exist. Age is not necessarily synonymous with wisdom. I cannot see anything that is gained by including the word "age" in the legislation. For that reason I support the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. FULTON].

The amendment was rejected.

Mr. CROW. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. CROW:

Page 3, line 22, place a period after the word "persons" and strike out "when requested in writing by the accused at any time prior to the convening of the court. When so requested"

Line 24, change the small letter "n" in the word "no" to a capital letter "N." And on page 4, line 2, add the following:

"No enlisted person may sit as a member of a court martial for the trial of another enlisted person who is assigned to the same company or corresponding military unit."

Mr. ELSTON. Mr. Chairman, I make a point of order against the amendment because the first part of the amendment has already been passed upon. The second part of the amendment is in another section of the bill.

Mr. CROW. Mr. Chairman, I agree that the first paragraph, as the amendment was read, was the original amendment made by the gentleman from Pennsylvania [Mr. FULTON] but I submit that the amendment which I am here to discuss now is the second paragraph on page 4, line 2, adding the following after that paragraph.

The CHAIRMAN (Mr. CANFIELD). The Chair is ready to rule. The amendment offered by the gentleman from Pennsylvania [Mr. CROW] is not identically the same as the former amendment, and is in order. The gentleman from Pennsylvania may proceed.

Mr. CROW. Mr. Chairman, I offered this amendment for this reason: Article 4 of this bill reads: "Who may serve on courts martial." If you will turn to page 10 of the bill you will find article 16: "Persons in the military service—how triable."

The last sentence of that paragraph reads: "No enlisted person may sit as a member of a court martial for the trial of another enlisted person who is assigned to the same company or corresponding military unit."

My amendment merely moves that sentence from the paragraph I have just read to article 4 on page 4, line 14. It would follow the word "prosecution." It does not change the bill, although I think it specifies who may serve on courts martial, and does not specify how anyone will be tried by court martial.

I may add I have another amendment to place to article 16, which will show how an enlisted man shall be tried.

Mr. ELSTON. Mr. Chairman, will the gentleman yield?

Mr. CROW. I yield.

Mr. ELSTON. I want to be certain about what the gentleman's amendment seeks to cover.

As I understand the first part it is, with the exception of a few words, identical with the amendment offered by the gentleman from Pennsylvania [Mr. FULTON]; is it not?

Mr. CROW. I am not offering the first part as an amendment. The Clerk read that because I did not get a chance to tell him not to read it. I am offering the amendment to add to section 4.

Mr. ELSTON. The last part is that which the gentleman is now offering.

Mr. CROW. That is right.

Mr. ELSTON. That is identical with the language employed in section 5 on page 10.

Mr. CROW. That is correct.

Mr. ELSTON. All the gentleman's amendment would do would be to move the language from page 10 and insert it on page 4.

Mr. CROW. That is correct.

Mr. ELSTON. In fact, it would not even be moved if the gentleman's amendment were adopted in its present form, but it would appear in both places.

Mr. CROW. I have another amendment to strike it out at one place and add it as another section.

Mr. ELSTON. Is there any reason why it should be on page 4 instead of page 10?

Mr. CROW. I have read a lot of law. I like to see substantive law written in a regular, well-ordered sequence, related things coupled together and not scattered in different sections of the bill.

Mr. ELSTON. Could you not go to one section as well as to another to find it?

Mr. CROW. That is correct; but when I look at that section of the bill which states who may sit on courts martial I believe that is where I should find enumerated the kinds and types and classes of personnel who may compose a court martial. I would not expect to find that in the section which provides the place where he is to be tried or the manner in which he is to be tried.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. CROW. I yield.

Mr. FULTON. When the gentleman looks at a particular section to find what shall be the constitution or a court martial he expects to find all elements in that section instead of having to go to other sections in order to find it.

Mr. CROW. The gentleman is correct.

All this amendment does is to clarify the bill. I think everybody will appreciate it once it is adopted and written into the bill. I ask support for the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. CROW].

The question was taken; and on a division (demanded by Mr. CROW) there were—ayes 32, noes 39.

So the amendment was rejected.

Mr. BURLESON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BURLESON: Page 4, line 8, after the semicolon strike out

the words "and officers and enlisted persons having less than 2 years' service shall not, if it can be avoided without manifest injury to the Service, be appointed as members of courts martial in excess of minority membership thereof."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. BURLESON].

The question was taken; and on a division (demanded by Mr. BURLESON) there were—ayes 26, noes 35.

So the amendment was rejected.

Mr. FULTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FULTON:

Page 11, line 13, after the word "issue", insert the word "or."

Beginning in line 17, delete the words "obtain any degrading statement not material to the issue or any self-incriminating."

Mr. BURLESON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BURLESON. Mr. Chairman, I have an amendment on page 10 which I want to offer, if the gentleman is going ahead with his amendments.

The CHAIRMAN. The gentleman will not be precluded from offering any amendment.

Mr. FULTON. Mr. Chairman, the first part of this amendment inserts the word "or" in next to the last line of the paragraph that ends in line 14, so that it would read: "or to answer any question, the answer to which may tend to incriminate him or to answer any question not material to the issue or when such answer might tend to degrade him."

That is obviously what the committee meant. Would the committee accept that part of the amendment?

Mr. ELSTON. It does not seem to change anything. I see no objection to accepting it.

Mr. FULTON. You do not want the defendant limited to answering any question not material to the issue when such answer might tend to degrade him. It does change it somewhat.

The next part of the amendment is on page 11 where I am cutting out words in line 17.

Mr. ELSTON. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from Ohio.

Mr. ELSTON. I assume the gentleman refers only to the word "or."

Mr. FULTON. That is correct.

Mr. ELSTON. Now he is moving over to another amendment?

Mr. FULTON. No; it is one part of the amendment that I asked the gentleman to accept; that is, the word "or." Now I am going over to page 11, line 17, deleting the words "degrading statement not material to the issue or any self-incriminating."

I am striking out those words, and the reason for that is as follows: The way the committee has it written they would bar only the use of coercion and unlawful influence when it is to obtain any degrading statement not material to the issue or any self-incriminating statement. Actually, what the committee meant to do is this: They want to say the use of coercion or unlawful influence in any manner whatsoever by any person subject to military law to obtain any statement, admission, or confession from any accused person or witness shall be deemed to be conduct to the prejudice of good order and military discipline. In other words, you cannot have coercion or unlawful influence used to get any statement, admission, or confession.

Mr. ELSTON. Mr. Chairman, as far as I am concerned, we have no objection to that, if it is agreeable to the other members of the committee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. FULTON].

The amendment was agreed to.

Mr. FULTON. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Amendment offered by Mr. FULTON: Page 10, line 10, strike out beginning with the word "and" to the end of the sentence, and insert "and preferably by persons of equal rank. In no case shall more than one-third of the membership of the general court trying any officer be of inferior rank."

Mr. FULTON. Mr. Chairman, I will speak of this briefly. If you will read how the committee says it on page 10, line 10, "in no case shall a person in the military service, when it can be avoided, be tried by persons inferior to him in rank." That committee statement does not mean anything. What do the words "when it can be avoided" mean? My amendment merely restates it saying that it is preferable, so that the person who convenes the court martial shall know that it is preferable to have persons of equal rank, but when he cannot do it there will be a specific limit on it so that they cannot have more than one-third of inferior rank as members of the court martial.

Now, the committee has no limit. They could, when it cannot be avoided, have the man tried by everybody of inferior rank. I would not do that. You should have the method of statement construed in the act, because, "when it can be avoided" would mean a thousand different things to a thousand different people.

Mr. KILDAY. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from Texas.

Mr. KILDAY. The gentleman feels that heretofore in the trial of officers there has been no difficulty because the officers had generally been of superior rank; does he not?

Mr. FULTON. Would the gentleman repeat that?

Mr. KILDAY. In the past, in the trial of officers by court martial, the members of the court have been of equal or superior rank?

Mr. FULTON. That is right.

Mr. KILDAY. And the system has worked satisfactorily?

Mr. FULTON. That is right.

Mr. KILDAY. Well, this is the same language which has always existed. It is a repetition of the present Article of War with the addition of the provision for the service by enlisted men.

Mr. FULTON. But I go further than the gentleman, because my amendment says to the commanding officer who convenes the court martial that it is preferable to have members of equal or higher rank, and then it clears up the language that you have from the former Article of War to show what it means. I do not put in a vacuous phrase such as "when it can be avoided."

In addition to that, if it cannot be avoided so that the commanding officer has to appoint inferior rank to try a man, he should not appoint more than one-third of the court-martial members of inferior rank. I want them tried by at least equal rank or above if possible, but if not, he should not be able to appoint a whole court of inferior rank but should be limited to one-third of the membership of lower rank.

Mr. NORBLAD. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from Oregon.

Mr. NORBLAD. Does the gentleman know whether there has been any case where there has been any difficulty in the application of the present law over a period of years? I believe it has worked very satisfactorily.

Mr. FULTON. If you are writing a law and amending it, such as we are here, you might as well have it mean something, and simply because there has only been one Noah's flood is no reason why there will not be one tomorrow.

Mr. KEARNEY. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from New York.

Mr. KEARNEY. I was under the impression, though I may be wrong and somebody can correct me, that under the courts-martial system in the Army of our country it was mandatory that no officer would be tried except by only those of equal or higher rank.

Mr. FULTON. It was, unless it could not be avoided, when they could have people of inferior rank try an officer. The difference between my version and the committee is that it would only permit appointment of one-third of the people on the court-martial board of inferior rank rather than all.

Mr. KEARNEY. As I read this particular section, this does not change the wording that is now in effect.

Mr. KILDAY. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from Texas.

Mr. KILDAY. If the gentleman will turn to page 16 of the report, article 16, he will find set out, under the Ramseyer rule, the existing law as it is changed by this proposal. The gentleman will find that the law that now exists reads:

Officers; persons in the military service; how triable: Officers shall be triable only by general and special courts martial, and in no case shall an officer, when it can be avoided, be tried by officers inferior to him in rank.

That is the existing law. The only point I make is that when you are amending a law that has been in effect for many years you must bear in mind that the statutory provision is a very small portion of the law. The precedents which have been established under it are just as much a part of the law. I do not know what the holdings may have been under

this provision, but it should be disturbed as little as possible.

Mr. MATHEWS. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from New Jersey.

Mr. MATHEWS. What would happen in the case of a high-ranking officer where circumstances existed so that you could not get the one-third you are talking about? What would he do, languish in jail, or would no charges be preferred against him, or would he never be tried, or what?

Mr. FULTON. How does the gentleman mean that?

Mr. MATHEWS. Exactly as it is stated.

Mr. FULTON. If you have an admiral, unless there are other admirals that will sit in trial on this particular admiral, enough to constitute two-thirds of the court, I do not want the admiral tried. I do not want the admiral tried by a court composed entirely of ensigns, which can be done under article 16 as now stated. I want it limited to two-thirds men of equal or higher rank.

Mr. MATHEWS. What are you going to do with him in the meantime, until you can get him tried?

Mr. FULTON. Any admiral can be tried by other admirals, and any general by other generals.

Mr. MATHEWS. The circumstance I mention is that they are not available.

Mr. BUCK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time to suggest to the committee the desirability of clarification of nomenclature. In the first place, the bill involves the Department of the Army. At the bottom of page 4 we find mention of the Territorial Department. In line 5, on page 5, we have the Judge Advocate General's Department. Then to cap it all, over on page 45 we have the Judge Advocate General's Corps.

Mr. ELSTON. If the gentleman will yield, perhaps the gentleman was not here when a number of committee amendments were offered changing the names of the departments. The reason is that this bill was reported out before the Unification Act was passed, and when the War Department was known as the War Department instead of the Department of the Army.

Mr. BUCK. Does that take care of the Territorial Department, too, and the Judge Advocate General's Department?

Mr. ELSTON. I think the amendments that were offered took care of everything.

Mr. MATHEWS. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, I shall vote for this bill. But I call the attention of the gentleman from Pennsylvania to the fact that this act applies only to the Army, and the Army will not be trying admirals.

From the study I have been able to make of H. R. 2575, the present bill to amend the Articles of War and to improve the administration of military justice, I believe that the Committee on the Armed Services has done an excellent piece of work. It is humanly impossible for any conscientious Member of this House, in view of the number, bulk, and technicality of the bills we have to consider, the vast amount of committee work and the innumerable other duties devolving upon him, to ever find himself in a position to give the thorough study he would like to any bill, except perhaps those from his own committee.

Section 8 of this bill particularly appeals to me. It amends article 11 of the Articles of War, to provide among other things that trial judge advocates and defense counsel of general courts martial shall, if available, be members of the Judge Advocate General's Department or officers who are members of the bar of a Federal court or of the highest court of a State of the United States, and that where a trial judge advocate is such an officer, defense counsel shall be likewise such officer.

The provisions of this section, coupled with section 46 of the act which amends section 8 of the National Defense Act, as amended, providing for a separate Judge Advocate General's Corps, mark an encouraging step in advance, provided that the Secretary of War and the Congress see to it that this Judge Advocate General's Corps is sufficiently numerous and efficient to provide qualified personnel for the reasonable carrying out of the provisions of section 8.

My own experience as a division judge advocate of a National Guard division, as well as a civilian defense counsel for an accused person before a military court, has demonstrated that both the accused and the United States suffered greatly by the fact that not only did line officers act as trial judge advocates and defense counsels, but that at times even officers of other departments were compelled to act as law members of general courts because of the shortage of Judge Advocate Department personnel.

Many times the rights of the accused were not adequately protected by reason of the fact that defense counsel, although earnest, honest, sincere, and diligent was inadequate to protect all those rights by reason of being untrained for that purpose. On the other hand, convictions which should have been obtained were lost because of the same situation applying to trial judge advocates.

Cases have been improperly prepared and deserved convictions lost because investigating officers were not qualified for that work and, particularly, not familiar with the laws of evidence.

Frequently time consumed both in investigations and in trials could have been shortened by technically trained personnel as investigators, trial judge advocates, and defense counsel.

It has been a manner of astonishment to me that this situation existed as long as it did, but during peacetime the appropriations for the Army were cut so much that it was only natural for it to reduce personnel in the Judge Advocate General's Department because of the mistaken view among so many military men of the uselessness of officers of that Department.

The legal profession is a profession of high standing, despite some popular view to the contrary. To qualify, one must spend years of arduous study and training. And yet, an army which so highly regards the utility, necessity, and efficiency of the members of the Surgeon General's Office seemed to have no such conception about the members of the Judge Advocate General's Department. But what would happen if a soldier who had a cold in the head, or bad appendix, were required to undergo treatment for that cold by a Signal Corps officer, or to have an ordnance officer perform an appendectomy upon him? Yet, when his reputation, property, liberty, and even life is at stake, he is given an infantry, cavalry, or artillery officer to defend them.

That has been the situation heretofore and is one which the present bill is designed to remedy to some extent. What further steps may need to be taken must await experience under the present act if it becomes law.

With regard to section 26, providing for a board of review and judicial council, these being innovations, again experience only will demonstrate their effectiveness.

The allowance under certain circumstances of enlisted men to sit on courts to try enlisted men may be of some help, but I do not share the optimism of some Members that this will create great reform. It seems to me that the benefit will be largely psychological.

I do hope, Mr. Chairman, that my belief that this act, and particularly section 8, will be beneficial to the administration of justice in the Army will be realized.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. FULTON].

The amendment was rejected.

Mr. FULTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FULTON: On page 8, line 8, strike out "or the custom of the service."

Mr. FULTON. Mr. Chairman, may I say by way of explanation of my several amendments that I did not know this bill was coming up this quickly. I had been in Europe and had examined quite a few camps for the purpose of making comments and suggestions to the committee. However, I find that the bill has come up, so it is necessary that these suggestions of mine be made as quickly as possible at this time because this is the only time they will get a hearing.

This amendment is to page 8, line 8, striking out the words "or the custom of the service." It would then read, "provided that general courts martial shall have power to impose any punishment authorized by law, including a bad conduct discharge." I am willing to have in the law every punishment that the general courts martial shall give, but they should not do it by what they might term "general customs of the service." I think we should be specific when we come to these serious offenses and we should have expressed in the law what the penalties and sentences may be.

Mr. ELSTON. Mr. Chairman, I rise in opposition to the amendment. I regret that the gentleman from Pennsylvania did not have the time or opportunity to read the hearings or he, perhaps, would not have offered his amendment. I refer to page 2038 of the hearings, where this question was asked of General Hoover:

Mr. ELSTON. I wonder if you could enlarge on the term "or the custom of the service"?

This was General Hoover's answer:

General HOOVER. That is meant to cover the types of punishment that are customarily used by court martial, but are not expressly authorized by the Articles of War. For example, a dishonorable discharge is not expressly authorized by the Articles of War, nor is detention of pay, reprimand, or admonition. The thought is that the term "custom of the service" will authorize those punishments which are now recognized by the Manual for Courts Martial. The only limitation that we have in the Articles of War is with respect to cruel and unusual punishments. Of course, that limitation would remain.

Mr. FULTON. With the understanding that it is specifically understood that the words "or the custom of the service" excludes unusual or degrading punishment, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. FULTON. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. FULTON: Page 9, line 5, strike out beginning with the word *"Provided"* to the end of the section.

Mr. FULTON. Mr. Chairman, I have been advised by the committee since preparing this amendment that this is the same practice that has been used by the Navy in summary courts martial, is that correct? And that it has worked satisfactorily there. So that if this is specifically put in, to carry out the custom that has been practiced by the Navy without going beyond it, and the committee will so assure us of that, I will withdraw my amendment.

Mr. ELSTON. I have been informed of that fact, but we cannot give you assurance.

Mr. FULTON. Well, with the understanding that it is the intention of the committee and in view of the debate here that that is the thought, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FULTON. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. FULTON: Page 10, line 15, after the period insert the following new paragraph:

"No person subject to military law shall be confined with enemy prisoners or any other foreign national outside of the continental limits of the United States, nor shall any defendant awaiting trial be made subject to punishment or penalties other than confinement prior to sentence on charges against him."

Mr. FULTON. Mr. Chairman, this particular amendment is to provide that no United States serviceman when he is sentenced to confinement shall be confined with enemy prisoners or any other foreign nationals outside of the continental limits of the United States.

Mr. KEARNEY. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. KEARNEY. I am quite interested in the statement the gentleman has just made and would like to ask the gentleman if he has any information that any soldier of the United States Army while awaiting trial and under charges has been in confinement with enemy troops in time of war?

Mr. FULTON. Yes; I have such information. I saw them myself this summer in the same cage as German prisoners. I saw our own troops in the Pisa disciplinary training center, not only in the same place with enemy troops, but in the same barbed-wired cage, which was about 50 by 200 feet long.

In addition to that, at the same disciplinary training center I have seen American boys in a barbed-wire cell, about 10 by 20 feet in size, confined immediately next to an Italian prisoner of war who had shot down in cold blood American fliers who had been captured in Italy during the war. So that I have seen both German and Italian prisoners of war right next to American prisoners of war.

In addition to that, at the same disciplinary training center, at Pisa, I have seen men held for months under physical punishment conditions who were not even tried yet. They were deprived of beds; they were deprived of sufficient clothing for their boards; they were forced to sleep on boards. They were put under this disciplinary training, gotten up for special inspections, forced to do work as if they had already been convicted. I said to those boys when I was at that training camp, "I will try to see first that you are not confined with these enemy prisoners and certainly that you are not punished before you have been sentenced."

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. KEATING. Did the gentleman take this matter up with the commanding officer of the area? I refer to this question of confinement with alien prisoners.

Mr. FULTON. I may say I took it up with the lieutenant colonel in charge of the disciplinary training center, and I said I was shocked to find it. Then, on the relief of the other general in charge of Italy, I took it up with a very fine general, General Janes, and he said he was sorry that such had occurred and would see that it did not in the future; that those things occasionally occurred.

Now I want it in the Articles of War, to see that it never occurs again, because when you find American prisoners not even segregated from Nazi prisoners, using the same toilet facilities, in the same barbed-wire enclosure, with no separation, being forced to associate with people they were just fighting against shortly before, perhaps the committee had better adopt this amendment and see that it never occurs again.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from Pennsylvania [Mr. FULTON].

The question was taken; and on a division (demanded by Mr. FULTON) there were—ayes 34, noes 16.

So the amendment was agreed to.

Mr. BURLESON. Mr. Chairman, I have an amendment on the Clerk's desk. I wish to withdraw the amendment on page 10, because that has been covered by the amendment offered by the gentleman from Pennsylvania [Mr. FULTON], but I have an amendment on page 11, line 22.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. BURLESON: Page 11, line 22, at the end of the sentence, add "It shall be the duty of any person subject to military law, in obtaining any statement from an accused to advise him that he does not have to make any statement at all regarding the offense of which he is accused or being investigated and that any statement by the accused may be used as evidence against him in a trial by court martial."

Mr. BURLESON. Mr. Chairman, in most of our State jurisdictions, when a man is placed under arrest he must be warned of the offense against him before he gives a written confession. As he gives a written statement, it devolves upon the officer taking that statement to advise him that any statement he may make can be used against him on the trial of the offense of which he is accused.

In the case of men charged with an offense against military law I have seen this thing happen, and you can visualize it: A boy has committed some offense. An officer goes down to investigate. I have been that officer—asking for his statement, asking what he has done, and so forth, and asking him all the leading questions he can think of. The boy does not know his legal rights. He will give a statement. Some of the questions are very leading. Oh, I know someone will say "You will be fair about those things." In reply I say you are playing a game, you are working for the prosecution; and I repeat that I have been on both sides of the table—and you would like for your side to win. Finally it becomes a game. You lawyers know how it works.

I feel that when anyone authorized to take statements from an accused interrogates him for that purpose that he should tell the accused that any statement he makes may be used against him on the trial of the offense with which he is charged.

I hope, Mr. Chairman, that the committee may accept this amendment. I believe it is entirely fair, and I feel that if the accused is apprised of his rights justice will not be harmed.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. KEATING. I wish to say to the gentleman that I thoroughly agree with

this particular amendment. I happened at one time to defend a young man overseas charged with a very serious crime. By the time he got to me he had already given four different statements. All of them differed. There was no consistency between any two of the four. You can say that the fellow ought to have gotten life imprisonment—which he did—but it is our duty to protect the rights of an accused boy like that just as we do in our criminal proceedings in civilian life. I like the gentleman's amendment and feel that something along that line ought to be adopted.

Mr. JENKINS of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. JENKINS of Pennsylvania. May I say that I was the investigating officer in the case to which my friend the gentleman from New York just referred. I think he will also say that the defendant in that case was in advance of the investigation warned of his rights and told that he was entitled to counsel.

Mr. KEATING. If my distinguished friend from Texas will yield further, I want to say that as long as my distinguished friend from Pennsylvania was in the case the boy was told of his rights; but before it ever got to the distinguished gentleman from Pennsylvania the boy had already been interviewed by a sergeant, a lieutenant, and two or three others, and his story was never the same in any two instances.

Mr. BURLESON. I suggest that the gentleman from New York and the gentleman from Pennsylvania continue the trial of this case at some other time; but that is a good illustration of how it can happen and of the fact that it has happened time and time again.

Mr. JENKINS of Pennsylvania. May I say in that connection that I, like the gentleman from New York, am in hearty support of the gentleman's amendment.

Mr. ELSTON. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. ELSTON. As I understand the gentleman's amendment it is to assure the accused the same right a civilian has who is charged in the civil courts with a crime, of being told that any statement he may make may be used against him.

Mr. BURLESON. That is right.

Mr. ELSTON. I have no objection to the amendment.

Mr. RIVERS. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. RIVERS. We have no objection to the amendment on this side.

Mr. GOFF. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. GOFF. I thought at first that what the gentleman proposed was a different rule than what had been applied, but actually this is the rule that has always been applied by the Judge Advocate General and is the very rule that is being applied now.

Mr. BURLESON. May I say that I did not intend to suggest that it had never been used, certainly not; but in so many cases it is not used that it should be made mandatory.

Mr. GOFF. It is already provided for by the Articles of War.

Mr. BURLESON. With that I cannot agree. You, like some of the other gentlemen here, must be indulging in some presumptions. Perhaps there are vague references that may be interpreted, but why speculate and theorize on these matters which are so desperately fundamental.

The CHAIRMAN. Without objection, the amendment offered by the gentleman from Texas is agreed to.

Mr. GOFF. Mr. Chairman, I object; it is already provided for.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The amendment was agreed to.

Mr. KEATING. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KEATING: Page 4, line 14, after the words "for the prosecution" insert "or defense."

Mr. KEATING. Mr. Chairman, I think it might be quite possible the members of the committee on both sides would be willing to accept this amendment after an explanation of it.

We have heard a lot here today about protecting the accused, which is certainly entirely in order and much to be desired; but, like all lawsuits, there are two sides to these cases. The prosecution, as well as the defense, should have ample protection. In the present wording it is provided that nobody shall sit as a member of a court martial when he is the accuser, which is obvious, or when he is a witness for the prosecution; but he could still sit there if he were a witness for the defense.

Mr. ELSTON. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield to the gentleman from Ohio.

Mr. ELSTON. Of course, in drafting this bill we were seeking to give every protection to the accused. We never thought of any case where the accused would object to having one of his witnesses sit in judgment on him. We see no objection to the amendment.

Mr. KEATING. He may not object, but the prosecution might object.

Mr. MATHEWS. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield to the gentleman from New Jersey.

Mr. MATHEWS. Does the gentleman know whether the language now appearing in the bill is the same as in the present Articles of War?

Mr. KEATING. I am without knowledge on that point but if the Articles of War at present read that way, in my opinion, they are wrong. I do not think a defense witness ought to sit on a court martial.

Mr. MATHEWS. It is a fact, however, that the present Articles of War contain the same language as is in the bill?

Mr. KEATING. I cannot say.

Mr. MATHEWS. If the gentleman's amendment is adopted, perhaps he is taking away something from the accused.

Mr. KEATING. That may be, but I do not believe any accused could seriously contend that one of his witnesses should sit as a member of a court martial.

Mr. ELSTON. Whether it is in the bill or not, it is perfectly obvious they would not permit any officer to sit in judgment if he were going to be a witness for either the prosecution or the defense. We see no objection to it being written in the law.

Mr. NORBLAD. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield to the gentleman from Oregon.

Mr. NORBLAD. For the gentleman's information, that is a new section added to the present Articles of War.

Mr. KEATING. I did not know about that and thank the gentleman.

Mr. MACKINNON. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield to the gentleman from Minnesota.

Mr. MACKINNON. If the gentleman's amendment is adopted, is he not going to place it in the hands of the accused to practically name his court? I can foresee that the actual situation which will arise many times, if the amendment is adopted, is that the accused will be tried by members of his own battalion or company, and if he indicates he wants to call any particular member of the court as a witness, even though he would only give evidence as to the character of the accused, then that man could not be appointed to sit on that case.

Mr. KEATING. That is right.

Mr. MACKINNON. Does not the gentleman think that result would work a perversion of the present court-martial procedure or any fair court-martial procedure?

Mr. KEATING. In answering the gentleman, may I ask him a question? Does not the gentleman think it would be a perversion of justice for a defense witness in the case to sit as a member of the court martial?

Mr. MACKINNON. I think so if he were testifying as to matters involving the commission of the crime, but in these cases before military courts you get to the matter of character evidence to a greater extent than in the ordinary civil cases. They very frequently rely upon testimony from members of the court and members of their own command. For instance, they place a man's service record in evidence, usually through the officer having custody thereof. In fact, they consider many matters of character and the performance of duty that ordinarily would not be considered in a criminal trial in civilian courts and which do not go to the question of the commission of the offense. I can see a great deal of good that might come from the gentleman's amendment, but it strikes me that this might open up an avenue of abuse that could be used to delay a proper consideration of these matters. It would place a weapon in the hands of counsel for the accused where he could practically name his own court in many instances.

Mr. KEATING. My judgment is that no matter what the character of the witness' testimony might be, whether it goes to the merits of the proceeding or

in the nature of character evidence or specialized or expert evidence of any kind, the witness giving that evidence on behalf of one of the parties to the lawsuit should not also sit in judgment on the accused.

Mr. CROW. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield to the gentleman from Pennsylvania.

Mr. CROW. If one of the members of the court were going to act as a character witness for the accused, does the gentleman not think that he should disqualify himself from sitting on the court?

Mr. KEATING. I certainly do.

Mr. JENKINS of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield to the gentleman from Pennsylvania.

Mr. JENKINS of Pennsylvania. Not only should he not sit, but if he is a witness and does sit he, in effect, weighs the credibility of his own testimony.

Mr. KEATING. That is correct.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. KILDAY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I am afraid we are losing sight of a very important matter in connection with criminal procedure. If this amendment should be adopted, any defendant up for court martial who does not want to go to trial can avoid trial for an indefinite period of time. We have had situations here in the District in which the defendants have disqualified one judge after the other, and very effectively avoided trial, so that if this amendment is adopted the defendant can subpena every member of the court, and when they are relieved because of disqualification under this amendment, he can subpena everybody appointed on the new court. In adopting rules of criminal procedure in all of the States it is necessary to see to it that the defendant is forced to go to trial. We lose sight of that here because of the fact that we have seen men who have been held in confinement for a long period of time, and I am afraid we are losing sight of the fact that one of the most difficult things in criminal cases is to get the defendant into court and get him ready for trial. In civil courts we have to overrule or grant all the motions to which he is entitled. His first motion for continuance is almost invariably granted, and then he can generally fix up the second one. As I said in my opening remarks, the constitutional right to a speedy trial is the one most frequently waived by the defendant. This would very effectively block trial of any defendant who did not want to go to trial.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from New York.

Mr. KEATING. I never intended to create a schism between the two sides of this committee by this simple amendment. Does the gentleman feel that simply by subpenaing a member of the court that would disqualify that member from sitting? My idea is that it would be necessary for him to show what he was going to prove in order to disqualify the man. He could not simply use the ruse of subpenaing everybody on the court and then prevent them from acting.

Mr. KILDAY. Do you not understand that under the provision we have that if a member of the court shows up who is a witness for the prosecution, all the defendant would have to do would be to say, "I challenge that member of the court," and he would have to stand aside. But, you are making it a statutory ground of disqualification.

Mr. KEATING. If he is a witness. In other words, if he is called as a witness to give testimony he is going to get some witness that aids the prosecution or the defense. He might just use this as a ruse to get out of it.

Mr. KILDAY. Does the gentleman take the position that a character witness for the prosecution, perhaps for the injured party to a transaction, would be competent to sit on the court martial under the provision we have here?

Mr. KEATING. No.

Mr. KILDAY. I do not think he would be.

Mr. KEATING. No.

Mr. KILDAY. I think the converse would be true if the amendment is adopted, that the defendant would not have to go to trial unless he wanted.

Mr. KEATING. It certainly was not my intention to have that result, and I am inclined to disagree with the gentleman that that would be the effect of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. KEATING].

The amendment was rejected.

Mr. JENKINS of Pennsylvania. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JENKINS of Pennsylvania: On page 7, line 14, after the words "United States", insert the following: "Of a rank not less than that of the trial judge advocate."

Mr. JENKINS of Pennsylvania. Mr. Chairman, the purpose of this amendment is very obvious; namely, to see to it that the rank of the attorney representing the accused shall not be less than the rank of the prosecuting officer. I think it is quite obvious to all the men who have been in the service that very frequently a junior officer is imposed upon and somewhat awed by the superior rank of his opponent. This merely holds even the scales of justice in the actual trial of the case as between the accused and the prosecution.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Pennsylvania. I yield to the gentleman from New York.

Mr. KEATING. Does the gentleman's amendment make it mandatory that the defense counsel must be of equivalent rank with the prosecution counsel?

Mr. JENKINS of Pennsylvania. Yes.

Mr. KEATING. I can conceive of cases, and perhaps the gentleman would be familiar with such cases, where a defendant would be represented by a colonel who did not know half as much as the lieutenant who was on the other side. In other words, it does not matter what your rank is on this court-martial work; you have to know your business or you will get a licking in the lawsuit.

Mr. JENKINS of Pennsylvania. That is correct. Therefore, this amendment would leave the respective parties to rest upon the ability of their counsel. With reference to the case to which my distinguished friend from New York refers, this amendment would not touch that situation at all, because this amendment is designed to protect the accused, and the case to which the gentleman refers, as I understand, was where counsel for the accused was of a rank superior to that of the counsel for the prosecution.

Mr. KEATING. Let us consider just the opposite of that case. It does not seem to me you are helping the accused in any way by forcing him to have as his attorney, over his objection, somebody of high rank. He might select a well-qualified lawyer who was a lieutenant.

Mr. JENKINS of Pennsylvania. The counsel appointed must be of at least equal rank. The accused can choose other counsel if he so desires, and the bill so provides.

Mr. KEATING. I understood that the gentleman answered my inquiry by saying it was mandatory for the defense counsel to be of as high rank as the prosecuting attorney.

Mr. JENKINS of Pennsylvania. Where the defense counsel is appointed by the convening authority. This is an amendment to that part of the section on page 7 which states that in all cases in which the officer appointed as Trial Judge Advocate shall be a member of the Judge Advocate General's department, and so forth, the officer appointed as defense counsel shall be of the same professional qualifications and of equal rank.

Mr. BURLESON. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Pennsylvania. I yield to the gentleman from Texas.

Mr. BURLESON. I am in agreement with the gentleman and am going to support his amendment. However, I have seen some enlisted men that were quite able to appear before a court-martial board, and I would hope that a provision might be inserted in the bill to enable them to do so. However, I do not expect to offer such an amendment.

Mr. JENKINS of Pennsylvania. The amendment does not in any way prohibit or limit the accused in the right of selecting his own counsel. He can select an enlisted man if he so desires.

Mr. CROW. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Pennsylvania. I yield to the gentleman from Pennsylvania.

Mr. CROW. I call the gentleman's attention to the words on the bottom of page 6, line 25, "if available." Does not that control the whole thing? If they are not available, then they do not have to be of equal rank.

Mr. JENKINS of Pennsylvania. That states that both the Trial Judge Advocate and defense counsel shall be members of the Judge Advocate General's department, if such officers are avail-

able. I would interpret that as referring to that particular phraseology.

Mr. NORBLAD. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Pennsylvania. I yield to the gentleman from Oregon.

Mr. NORBLAD. Where I was located overseas, in a base of some 3,000 men, there were two attorneys. One was a lieutenant and the other was a captain. How would we ever get a case tried under those circumstances?

Mr. JENKINS of Pennsylvania. There would be no prohibition, as I have said, against the accused's selecting anybody he desired.

Mr. NORBLAD. He might have to select a captain who was not a lawyer rather than take a lieutenant who was a lawyer, in a case like that.

Mr. JENKINS of Pennsylvania. I believe that is true.

Mr. NORBLAD. That would be very ineffectual.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. JENKINS].

The question was taken; and, the Chair being in doubt, the Committee divided and there were—ayes 11, noes 24.

So the amendment was rejected.

Mr. BURLESON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BURLESON: On page 14, after the sentence in line 2, add the following:

"It shall be the duty of the law member of a general or special court martial before a vote is taken to advise the court that the accused must be presumed to be innocent until his guilt is established by legal and competent evidence beyond a reasonable doubt, and that in the case just considered, if there is a reasonable doubt as to the guilt of the accused, the doubt shall be resolved in the accused's favor and he shall be acquitted; if there is a reasonable doubt as to the degree of guilt, the finding must be in a lower degree as to which there is no such doubt; that the burden of proof to establish the guilt of the accused is upon the Government.

"That each member is the sole judge of the creditability of the witnesses and the weight to be given their testimony, but the interpretation of law they shall receive from the law member, and shall be governed thereby. And provided further the law member shall instruct other members of the court martial that in case the accused has filed application for a suspended sentence, in the event he is convicted or he has pleaded guilty, they shall in their discretion grant or reject the suspended sentence application and so say by their verdict."

Mr. BURLESON. Mr. Chairman, this amendment embodies three fundamental elements. The first is the theory of the presumption of innocence. This is so fundamental that it is recognized in all matters dealing with life and liberty of individuals everywhere. This spells it out. This defines it. This makes it definite and removes it from speculation. It definitely says that the court-martial board must be instructed to that effect. Some of the Members have recited personal experiences. Permit me to recite my own personal experience hurriedly. I know of one case. We were sitting in a tent out on a little island in the Pacific and I was talking to a fellow about his service on a court-martial case. We should not have been discussing it, of course, but we were, and he referred to "our side" several times. Finally I said, "What do you mean 'your side' "? He said, "The ship's side. The station's side." I asked him if he had ever served on a jury in civilian life, and he said he had not. I said, "You do not have a side." He said he never heard of such a proposition. He was an officer in the United States Navy, but he had never heard of being an impartial juror. Is it not possible that people might never have heard of such a thing? They should be definitely and clearly instructed on these matters. The layman cannot be expected to have studied these matters. Why presume and risk grave error.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. KEATING. Does the gentleman assume that an officer of the United States Army might be equally uninformed about that?

Mr. BURLESON. I would suspect that it is entirely possible.

Mr. Chairman, to come to my next point. The theory of reasonable doubt is recognized for just what it is, that if there is a reasonable doubt in the minds of those serving upon the court-martial board, as to the guilt of the accused, the doubt should be resolved in favor of the accused. The degree of punishment or the degree of guilt has nothing in the world to do with it. It makes no difference whether he is deprived of his liberty for 1 day or for 6 years. The principle is the same. If there is a reasonable doubt, it should be resolved in favor of the accused.

Mr. JOHNSON of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. JOHNSON of Oklahoma. We hear much said about Army justice or military justice being on a par with what we find in civilian life. Is it not true that if this instruction as contained in your amendment were not given by a judge in a civilian trial it would constitute a reversible error in most jurisdictions if an appeal was taken on that ground?

Mr. BURLESON. In all jurisdictions that I know anything about, and I just know about a few of them—I know enough to convince me that it is a principle of law that we find all through our judicial system, that always the doubt is resolved in favor of the defendant.

Mr. WILLIAMS. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. WILLIAMS. I am certainly in accord with the gentleman's remarks and I shall certainly support his amendment. However, I do feel that the amendment does not go quite far enough. I feel that the question should be used in qualifying the persons who sit on that board, before they are qualified to sit on the board.

Mr. BURLESON. I agree with the gentleman and I think perhaps the accused and his counsel should have the right to challenge every individual member of the court-martial board. I had a provision in the amendment to that effect, but it was rather long and I withdrew it. I agree with the gentleman that each member of the court should be examined as an individual, as to whether he has such bias or prejudice that it would take evidence to remove it.

But, to hasten to another point I wish to make, court-martial board members should be the sole judges of the credibility of the witnesses: I ask my good friend from Texas how one, reviewing a written page, could give any credence to testimony or be a judge of human nature, or the credibility of the testimony given by an individual while he was testifying under oath on the witness stand. You, from experience, know that you have a right, both as an attorney and as a juror, to appraise the character and demeanor of a witness giving testimony, as to whether he is telling the truth, and to judge the force that is to be given to his testimony. I think that should be incorporated in the law.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BURLESON] has expired.

Mr. ELSTON. Mr. Chairman, I rise in opposition to the amendment.

I think it is perfectly obvious that we cannot undertake in the committee to write a complete code of procedure so far as court-martial cases are concerned, in the limited time we have at our disposal.

With respect to the amendment offered by the gentleman from Texas [Mr. BURLESON] nobody wants to see any man, tried by a court martial deprived of the presumption of innocence, or to see him convicted unless there is evidence adduced against him beyond a reasonable doubt. I do not believe any case was called to our attention where that did happen. Moreover, this amendment is not confined to the presumption of innocence and reasonable doubt features.

Under the provisions of this bill the findings of the court are reviewed by the convening authority, who has complete authority to set aside any sentence, in its entirety, if it cares to do so. After that it goes before a board of review, and then to the Judicial Council, and the Judicial Council has the power to review the evidence. If the council finds that witnesses who testified against the accused were not credible witnesses it has the right to reject the testimony and to set aside the conviction or modify it. So it seems to me the rights of the accused are fully protected, in fact, more fully protected than in the civil courts, because there many courts of appeal do not have the right to pass upon the weight of the evidence. Such courts must take the position that the trial court, having seen and heard the witnesses, is in the best position to judge the credibility of the witnesses. In this case we go further than that and give the Judicial Council the right to pass upon this question. We have thrown unusual safeguards around the accused, and I believe we might do a disservice to accused persons if we undertake to write a complete code of procedure here on the floor of the House.

Mr. JOHNSON of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I yield.

Mr. JOHNSON of Oklahoma. I am not unmindful of what you gentlemen on the committee have done in this bill. You have done a very commendable job. I am for your bill, whether this is agreed to or not, but to say that the time element enters into it is a poor argument, because we are now, after about 150 years, trying to write a bill under which a man's liberty can be taken from him. I do not care how much review is made possible under this bill, when a court is not advised of these two or three basic fundamentals of our system of justice, when it comes up to review they do not know what the court thought which sat in this case. I think certainly this instruction should be given the court, because under existing conditions it is not given, and you have men sitting on the court who never heard of these things before.

They rob a man of his life, of his liberty; and you could appeal it till kingdom come and they still would not reverse it because they do not know what the court had in mind when it assessed the sentence. You have got to reach men's minds, and if they are advised of that just before they pass sentence I certainly think that the defendant would come nearer getting justice than he would when you have a bunch of laymen like these in this last war sitting there taking men's lives who had never heard of these things.

Mr. JENKINS of Pennsylvania. The gentleman from Ohio says he did not recall having presented to the committee any instance where the substance, at least, of such instructions was not given. In my capacity as executive officer of an establishment here in the United States I detailed an officer of the command to serve as a member of a court in the camp in which we were located. Shortly afterward he came back to me and asked to be relieved of that detail by reason of the fact that when the court went into closed session and he endeavored to discuss the evidence he was told by the president of the court that he was not there to discuss the evidence, he was there to convict.

I think that all of us feel that these fundamental concepts of our law should be retained in the manual of court martial. They provide for a great deal of it, but this particular right is in the fundamental basic law.

Mr. MORRIS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I believe it was the old Roman philosopher, Seneca, who said "Haste trips up its own heels, stops and fetters itself." I realize we have many important things to do and that our time is valuable here, but after all this is an extremely important matter and ought to challenge our most careful attention and a reasonable amount of our time. We ought not to be hasty, in my judgment.

I want to compliment this committee in taking what appears to be a very fine forward step in the administration of justice in the services of our country, the Army, the Navy, the Air Force, and so forth; but, Mr. Chairman, I call your attention to the fact that nothing on this earth is perfect; and regardless of the time and brains that have gone into this bill, and a lot have gone into it, it is not a perfect bill and it will not be perfect even though you adopt a great many amendments. Mr. Chairman, I observed once before in this House and I observe again, honestly and truly, I do not believe there is anything sacrosanct about a committee's report even though it be the finest committee in the House with the most honest and sincere group of people involved; still, there is no perfection and there should not be any objection to a good amendment when it is offered, and I say this is a most excellent amendment, in my judgment.

When I was a district judge, and I served nearly 10 years on the bench, every time I tried a man accused of crime I instructed the jury that he was presumed to be innocent until that presumption was overcome and that every reasonable doubt of his guilt must be resolved in his favor. Had I not so instructed the jury the higher court would have reversed me, as it should have, because it must be impressed upon the minds of the jury that that is the fundamental law of the land, that a man is entitled to the presumption of innocence until his innocence is overcome by competent and legal evidence beyond a reasonable doubt. Just why there should be objection to incorporating this principle here in our military law is beyond my conception. You admit it is a part of the fundamental law. Then why not put it in here and require that those who sit in judgment upon a man be informed of that fact so there can be no question but what they will know it is the law? There just cannot be, as I see it, any sound argument against this amendment. As was stated by two or three gentlemen who have spoken previously here today, many of the men who sit upon these courts martial are not lawyers.

They may be very brainy, very smart men, but ordinarily they are not lawyers and they do not understand all these things unless they are told. You cannot operate a linotype machine and I cannot either. There are thousands of things I cannot do. If I come into a strange field where I am not acquainted, I appreciate an expert in that field telling me something about it.

Why anybody would object to a lawyer or some one instructing this body that is going to pass upon the liberty and maybe the life of a man as to what his fundamental rights are is beyond my conception. Why the objection to it? It cannot hurt, and certainly if it is the law, they ought to know what the law is and should not sit there in ignorance of the law when in a very simple way they can be advised what the law is. I do not see any reason why the amendment should not prevail.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. MORRIS. I yield to the gentleman from New York.

Mr. KEATING. The gentleman has made a very persuasive argument on this subject. I cannot understand why we should not incorporate in this bill what is recognized everywhere as the fundamental law.

Mr. MORRIS. Yes.

Mr. KEATING. I am glad to say that I am thoroughly convinced by the argument the gentleman has made.

Mr. MORRIS. I thank the distinguished gentleman from New York.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. JOHNSON of Oklahoma. Mr. Chairman, I rise in support of the pending amendment.

Mr. Chairman, as I told the chairman of the committee awhile ago I think this is a good bill. It is certainly better than the system we have operated under up to date. But that is still no reason why, when a good amendment is offered, one that is fundamental under either military or civilian justice, the committee should not accept it, as I see the matter.

I served as a TJA in the Army and I for one know, and they can talk until they are black in the face about military justice, that it stinks. I have been on both ends of it, as a prosecutor and defense counsel. You try to rectify that in this bill. Right here in connection with this one amendment I see no reason why we should not write this in so that the members of the court just before they vote, in some instances they may be taking a man's life or taking his liberty for many years, should not be reminded of these most simple and basic fundamentals in the American or any other system of justice. It is inconceivable to me that the committee will not accept it or that it will be voted down.

I hope that the amendment will be agreed to.

Mr. KILDAY. Mr. Chairman, I rise in opposition to the pending amendment.

Mr. Chairman, the discussion of this amendment has all centered around the first paragraph of it. Of course, I agree that the court and every member of it should know the law that the defendant is presumed to be innocent, and that presumption remains throughout the trial or until overcome by competent evidence beyond a reasonable doubt. I have no particular objection to that being incorporated into the Articles of War, although I do not believe it to be necessary. The Articles of War do not spell out all of the procedure in detail. They deal mostly with the formation of the court, the definition of offenses, the punishment, and things of that kind. This is in the court-martial manual, and I see no objection to it going into the Articles of War.

Mr. Chairman, this amendment has a great deal more than that in it. It goes on to say—

> That each member is the sole judge of the creditability of the witnesses and the weight to be given their testimony, but the interpretation of law they shall receive from the law member, and shall be governed thereby. And provided further, the law member shall instruct other members of the court martial that in case the accused has filed application for a suspended sentence in the event he is convicted or he has pleaded guilty, they shall in their discretion grant or reject the suspended sentence application and so say by their verdict.

The latter part of this amendment changes entirely the concept of courts martial. We are providing in this bill that on interlocutory matters the ruling of the law member shall be final and

binding on the court, but that does not apply to anything else. It does not apply as to the judgment, as to whether he is guilty under the law and the evidence. All of the members of the court must pass on that. Challenges, motions for directed verdict, and pleas of insanity, all those things pass out of the hands of the law member. But the law member is not the judge in the sense that in our civil courts we divide the functions of the judge as the trier of the law from the jury as the trier of the facts.

And again we import in here a lot of things which are unnecessary—the importation into the court martial of the right of the trial court to grant suspended sentences. There are provisions for suspension of sentence on review, and matters of that kind. I think it is a very dangerous practice for us now to pass on an amendment of this kind which changes the fundamental concept of courts martial by taking away from the members of the court, except the law member, decisions as to law and importing an entirely new type of restraint to be imposed.

Mr. BURLESON. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Texas.

Mr. BURLESON. Does the gentleman see any great danger in conferring the right on a court martial to grant suspended sentences?

Mr. KILDAY. The gentleman and I have both practiced in Texas exclusively, and that is the sort of thing we are used to down there, but I would hesitate a great deal to say that our court of criminal procedure was the best ever conceived. The question of suspension of sentence and probation are matters that generally lie entirely within the realm of those who deal with the law phases of the situation.

Mr. BURLESON. If it is left to the discretion of a board away up the line of command, all the way up——

Mr. KILDAY. I cannot yield further, because I want to answer the gentleman.

Mr. BURLESON. All the way up to Washington, why cannot the board on the ground exercise its judgment?

Mr. KILDAY. When we provide board review on the credibility of the witnesses, my colleague is construing that as depriving the trial court of the right to pass on the credibility of the witnesses. Of course, all trial courts pass on the credibility of witnesses. But, we have gone further now and left the board of review to say that they are not going to believe the witness; they are going to pass on his credibility, and over a long period of years the courts of most of the States have had questions of probation and suspension handled differently, not by the trial courts, so I do not think at this late hour and in this manner we should import this new type of sentence into our military law.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. BURLESON].

The question was taken; and on a division (demanded by Mr. BURLESON) there were—ayes 16, noes 25.

So the amendment was rejected.

Mr. DINGELL. Mr. Chairman, I move to strike out the last word, and ask unanimous consent to proceed out of order.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DINGELL. Mr. Chairman, I have just introduced a bill to put into effect the tax recommendations made in the President's message on the state of the Union.

This bill would provide a cost-of-living tax credit of $40 for each individual income taxpayer and for each of his dependents, and would make up the revenue loss by reimposing an excess-profits tax. The excess-profits tax would be at a lower rate and after larger exemptions than those in effect during the war period. It would apply to only a relatively small number of corporations—probably less than 22,000 in all—which are making large excess profits during this period of inflationary pressures and rising living costs.

As the President said in his message, this is no time for a general tax reduction. The cost-of-living credit provided by this bill has been made necessary by the steady increase in the level of consumers' prices—32 percent since the $500 per capita tax exemption was first set in May 1944. The benefit of the credit would go almost entirely where it is most needed; 93 percent of it would go to persons with incomes under $5,000 a year. It would take 10,300,000 taxpayers with low net incomes off the tax rolls entirely. These persons have little, if any, means to pay taxes, except at the expense of their health and that of their dependents.

To reimburse the Treasury for the cost of this necessary relief to the small taxpayer, the bill provides for the reimposition of a reasonable excess-profits tax. The rate is 75 percent on profits in excess of 135 percent of prewar profits plus an exemption of $50,000. This liberal provision exempts the smaller corporations and places the burden where it should properly fall. The corporations which would be subject to this tax are the ones making large profits and can afford to pay it.

The bill, taken as a whole, provides relief which has been made necessary by the pressure of rising living costs, yet it does not add to the forces making for further increases in these costs. In both of these respects, it contrasts with the Republican tax-reduction bill. That bill would give less relief at the lowest income levels, where it is needed most, yet would drastically reduce Federal revenues and so force up living costs still further.

Of the 360,000 taxpaying corporations for this year, 22,000 would be affected by this bill.

Estimated number of taxable-income recipients and their total individual income tax under present law[1] and under the proposed cost-of-living tax-adjustment credit of $40 per capita, distributed by net income classes, in calendar year 1948

[Assuming personal income of $200,000,000,000]

[Number of income recipients in thousands; money amounts in millions]

Net income class (000)	Number of taxable-income recipients			Total tax[2]

[3] Less than $50,000.
[4] Less than 0.05 percent.

Treasury Department, Jan. 13, 1948.

Mr. KEATING. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KEATING: On page 14, after the sentence in line 2, add the following: "It shall be the duty of the law member of a general or special court martial before a vote is taken to advise the court that the accused must be presumed to be innocent until his guilt is established by legal and competent evidence beyond a reasonable doubt, and that in the case just considered, if there is a reasonable doubt as to the guilt of the accused, the doubt shall be resolved in the accused's favor and he shall be acquitted; if there is a reasonable doubt as to the degree of guilt, the finding must be in a lower degree as to which there is no such doubt; that the burden of proof to establish the guilt of the accused is upon the Government."

Mr. KEATING. Mr. Chairman, the purpose of this amendment is to endeavor to bring together my two fine and distinguished colleagues from Texas. It is my hope that they will be able to see eye to eye on this problem now. This amendment strikes out the last paragraph of the amendment previously offered by the gentleman from Texas [Mr. BURLESON]. It endeavors to write into military law only what is the fundamental law of our land now. I am sure it will also have the support of both gentlemen from Oklahoma, and I would hope that there would be no objection from anyone to this modified version of the amendment originally offered by the gentleman from Texas.

The presumption of innocence until guilt is established beyond a reasonable doubt is one of the oldest and most cherished principles of our common law. In that respect from earliest times there has been a definite line of cleavage between our jurisprudence and that adopted in some other countries, where the initial presumption is one of guilt rather than innocence.

Certainly we should afford to the men of our armed services every protection which is enjoyed by the most hardened criminal in our land. To do less is to shirk our full duty to those who serve our country.

It may well be the fact, and probably is, that the basic rule of evidence embodied in this amendment is usually explained to the members of a court martial by the law member during the course of their deliberations. No harm can come, however, from ensuring that this will of necessity be done in each instance by making it a mandatory requirement as is here contemplated.

I earnestly urge that my colleagues, whom I know to be sincere in their desire to bring about a more nearly perfect performance of justice in court-martial proceedings, support this amendment designed to accomplish such a result.

Mr. KILDAY. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield to the gentleman from Texas.

Mr. KILDAY. Of course, I had no objection to that portion of the amendment, as I indicated in my remarks a moment ago.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The amendment was agreed to.

Mr. JENKINS of Pennsylvania. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JENKINS of Pennsylvania: On page 45, line 11, after the words "Regular Army" insert "all of whom shall be persons regularly admitted to practice, either in one of the district courts of the United States or a court of equivalent jurisdiction of a State, Territory, or insular possession of the United States."

Mr. JENKINS of Pennsylvania. Mr. Chairman, the bill presently under consideration sets up a separate Judge Advocate General's Corps. In questioning some of the members of the committee during the course of debate here this afternoon in which the statement was made that all officers of the Judge Advocate General's Corps are lawyers, I find that that is not written into the statutory law, at least I am so informed, but that it is so provided by administrative order only. I think all of us recognize the fact that those who are dealing with legal questions, whether they be concerning the administration of justice or whether they be questions of claims against the Government, or on behalf of the Government, should be men who are trained in law. While it has never happened, it is nevertheless conceivable that it could happen that the administrative order might be repealed, and I can see no objection to writing into the law, at the time when we are actually establishing this separate Judge Advocate General's Corps, the provision which has always been observed heretofore. I ask the chairman of the committee whether there is any objection to accepting the amendment and putting into the act what we now have in the form of an administrative order.

Mr. ELSTON. I do not believe there is any necessity to adopt the amendment because obviously nobody is going to be selected as a judge advocate of the Army who is not in every sense of the word qualified. I think the amendment is surplusage and unnecessary. I do not know of a time when we ever had a judge advocate who was not qualified. It is inconceivable that one would be appointed who is unfit to hold the office and who does not possess the qualifications necessary to fulfill the office of Judge Advocate General.

Mr. JENKINS of Pennsylvania. The gentleman is addressing himself to the Judge Advocate General. The amendment provides, I believe, that the officers of the Judge Advocate General's Corps shall all be members of the legal profession.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. JENKINS].

The amendment was rejected.

Mr. ELSTON. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore, Mr. HALLECK, having assumed the chair, Mr. CANFIELD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 2575) to amend the Articles of War to improve the administration of military justice, to provide for more effective appellate review, to insure the equalization of sentences, and for other purposes, had come to no resolution thereon.

RESIGNATION FROM A COMMITTEE

The SPEAKER pro tempore. The Chair lays before the House the following resignation from a committee.

The Clerk read as follows:

JANUARY 14, 1948.

Hon. JOSEPH W. MARTIN, Jr.,
The Speaker, House of Representatives, Washington, D. C.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the Joint Committee of Congress on the Library.

Very sincerely,

HUGH A. MEADE,
Member of Congress.

The SPEAKER pro tempore. Without objection, the resignation will be accepted.

There was no objection.

EXTENSION OF REMARKS

Mr. BONNER asked and was granted permission to extend his remarks in the RECORD and include an editorial.

Mr. KLEIN (at the request of Mr. CELLER) was granted permission to extend his remarks in the RECORD.

Mr. ANGELL asked and was granted permission to extend his remarks in the RECORD and include certain excerpts.

LET US STICK TO THE TRUTH

Mr. DAWSON of Utah. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore (Mr. HALLECK). Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. DAWSON of Utah. Mr. Speaker, it of course is to be expected in a Presidential election year that parties will be lined up against each other, and political oratory will ebb and flow. Criticism of the "ins" as well as the "outs" will be heard on all sides. There should be, however, a sincere desire on the part of national leaders to stick to the truth in making their appeal to the voters.

In the first issue of the Utah Democrat, Gael Sullivan, the executive director of the Democratic National Committee, has resorted to deliberate falsehood in maligning my record in the first session of the Eightieth Congress.

Among other statements, Mr. Sullivan reported as follows:

DAWSON is a member of the Committee on Public Lands, vital to western interests. His committee failed to pass a single major measure in the first session.

This is a deliberate falsehood. As one other who was greatly admired by Mr. Sullivan used to say, "Let's look at the record."

The House Public Lands Committee in the first session has considered and favorably reported to the House of Representatives 122 bills and resolutions, 107 of which were taken up by the House and passed. Among these measures was one granting statehood to Hawaii, and approving many reclamation projects throughout the country.

If Mr. Sullivan thinks that such bills as the one granting statehood to Hawaii, and approving reclamation projects in the West are not important to his party, or considered as major legislation, then I suggest that he reexamine his party platform.

Mr. Sullivan further points out that I followed the lead of the gentleman from New York, JOHN TABER, the economy champion of Congress, in reducing appropriations. I am proud to have had a part in reducing many Federal expenditures and also reducing the amount of the Federal debt. The President's budget presented the day before yesterday calls for nearly $40,000,000,000, which is nearly double the amount of any prewar peacetime budget. Surely we cannot go on spending and spending without some honest effort being made

to reduce expenditures. Of course we would all like to see benefits extended both at home and abroad, but if we expect to reduce the spiral of inflation we must make an honest attempt now to reduce Federal expenditures before our people are engulfed. I feel confident that the American people will insist that we honestly meet this problem without resorting to demagoguery. We are not so much interested in criticism, unless it is constructive, as we are in suggestion and program which will make this Nation a better democracy than it is now.

Just because a proposal is Republican policy or is Democratic policy is not really important. The important thing is whether such policy is good for all the people of this great country of ours.

It is indeed regrettable that one who stands so high in the Democratic Party should embark so early on a campaign of vilification.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Texas [Mr. POAGE] is recognized for 30 minutes.

OLEOMARGARINE

Mr. POAGE. Mr. Speaker, I have introduced a bill for the repeal of all Federal taxes and license fees on margarine. These antimargarine laws, in one form or another, have been on the statute books for years. The butter lobby has managed to defeat every effort to put margarine on the same basis as any other nutritious and perfectly good food product. However, I have predicted on many occasions in the past, and I now renew that prediction, that the Federal antimargarine laws eventually will be repealed. They are unfair and unjust. In a democracy history shows such class legislation is repealed once the public has become thoroughly informed on the issue.

And right here let me say that the margarine issue is not a sectional issue. It should not be a partisan issue. The proposal to repeal the antimargarine laws is not an attack upon the dairy industry, or even upon the butter industry, as my colleagues to my left have in the past seemed to assume. In years past this reform has been blocked by the almost united opposition of Republican Members of Congress. They pleaded that they were protecting the butter industry. Before the war they could make the contention with some plausibility; that it might be possible to supply the American people with enough butter to meet their needs for a wholesome table spread, although this never has been done.

Today even the butter manufacturers themselves have to admit that it is impossible to supply adequate milk for America's children and at the same time supply enough butter for America's tables at any price. The issue now is: Will we deny our citizens a wholesome table spread which the butter industry cannot supply? I do not believe my Republican friends will continue to insist on keeping this legislation on the books. I would welcome their cooperation in a completely nonpartisan effort to aid all consumers, to help millions of farmers, and to strike a blow for free enterprise and equal treatment for all by repealing the discriminatory margarine laws.

The conditions which served as an excuse for the first antimargarine laws have changed, even though the laws still are in effect. The first oleomargarine was a poorly made product by comparison with modern margarine. It imitated butter, but it was not nearly as nutritious as butter, and it was made in some instances under unsanitary conditions.

When the original Federal antimargarine laws were enacted, there were no Federal and State pure-food laws. As all of you know, both the Federal Government and the States have enacted comprehensive and adequate pure-food laws since that time. Among them is the Federal Food, Drug, and Cosmetic Act of 1938. Under it, an official definition and standard of identity for margarine was adopted by the United States Food and Drug Administration in 1941. Margarine which is made according to this standard, and 100 percent of it is so made, has a minimum fat content of 80 percent and a minimum of 9,000 United States Pharmacopoeia units of vitamin A per pound. Ninety-nine percent of all margarine now is fortified with 15,000 units of vitamin A, the content always being indicated on the label.

I do not think that even the persons who contend that the antimargarine laws should be continued will deny that modern margarine is a nutritious and high-quality food. For anyone still doubtful, I refer them to a report on margarine by the New York Academy of Medicine, a Report on Margarine by the Food and Nutrition Board of the National Research Council and the verdict of many other nutrition groups and nutrition experts.

The Federal antimargarine legislation is the keystone in the almost Nationwide legislative structure built up against margarine. So long as the Federal Government gives its blessing to discrimination against margarine, we can expect State laws against margarine to continue.

Charges that margarine was sold under fraudulent conditions and that it was an unhealthy product were the arguments used to push through the first margarine laws in 1886. Some Congressmen argued logically that the Government should go directly to the heart of the matter through pure-food laws instead of using the taxing power against a domestic product. The interests pressing for legislation did not like this suggestion. The thought that a tax on margarine, coupled with regulations for the labeling of margarine as such, would kill the product. Their aim all along has been to kill margarine, or to cripple it until it no longer interfered with butter. That is the aim today of the group which insists on perpetuation of the antimargarine laws.

Recently I examined the debates and hearings which accompanied the passage of the three Federal antimargarine laws, the first in 1886, the second in 1901, and the third and last in 1931. They confirmed something which has been apparent all along—that the antimargarine laws are class legislation; that they were intended to kill one domestic product for the benefit of a competitive domestic product, and that they have failed in their purpose. Margarine has increased its production in spite of the strenuous efforts to legislate it out of existence. But the antimargarine laws have been costly. They have set a most vicious precedent. All through the years, they have forced the low-income groups to pay a higher price for their table spreads. Finally, the price of butter has risen to such fantastic heights that the majority of American families are low-income groups so far as butter is concerned. Almost everybody uses some margarine, but housewives, if they prefer to serve it yellow, as most do, are forced to waste time and effort in mixing in the color. It has been estimated that from sixteen to eighteen million pounds of margarine were wasted last year in the mixing process and that more than 88,000,000 hours were required to do the work.

As might have been expected, the enactment of the first Federal antimargarine law was preceded by a huge meeting of dairymen in New York City. As described by Representative Scott of Pennsylvania, the convention was composed of representatives from 26 States. They decided to seek legislation to remedy what Congressman Scott called the traffic in oleomargarine. As a result of this and similar meetings, Congress was flooded with memorials urging antimargarine laws.

Despite the pressure, the charges of fraud and unsanitary oleomargarine had to be repeated over and over again to get the measure through the House by a 177 to 101 vote.

For example, listen to Representative Scott in the House on May 24, 1886:

> Within a period of less than 10 years a gigantic traffic has grown up which has already displaced one-fifth of butter and substituted therefor an article, the ingredients of which are acknowledged to be not only offensive in their original character to human taste but positively injurious to the public health. * * * The genius which has succeeded by the application of chemical fluids and compounds in transferring a mass of loathsome and unwholesome ingredients into an article of food at a trifling cost does not hesitate to impose the produce upon the public and receive in the way of excessive profits the difference between the cost and the price of butter.

Although the oleomargarine bill was, on its face, a revenue measure, it was never seriously considered as a money-raising bill during congressional debate.

> I have no desire—

Senator Miller, of New York, said—

> to introduce such a bill for taxation. I want no money from this bill in the Treasury. I want protection to the dairy industry of New York. I want it to go as far as to exterminate the rival industry, if necessary.

This brings to mind that an editorial on June 18, 1941, in the Dairy Record, a magazine representing the dairy industry, said:

> The dairy industry must set as its goal the complete extermination of oleomargarine. It must never rest until the manufacture and

sale of oleomargarine have been outlawed in this country.

Senator Miller admitted frankly that—

This—

The 1886 statute—

doubtless is a new species of legislation, or largely so, in this country and under our system. But the exigencies of the occasion seem so great that this body cannot afford to ignore them.

I am indeed thankful that the precedent established by this first law has been confined to margarine. Otherwise, there would have been economic chaos in these United States long ago. Cotton would have placed a tax on rayon, lard a tax on vegetable shortening, and so on, through an endless list.

Time and time again in the 1886 debate the assertion was made that margarine would not sell if it were known as margarine. This apparently was taken for granted by even the defenders of margarine.

Representative Frederick, of Iowa, said:

The fact is, as shown by all the testimony, that it—

Margarine—

will not sell when known.

President Cleveland expressed a similar belief in signing the bill. The foes of margarine felt that they had put the quietus on margarine, butter's competitor, and were satisfied.

It looked for a time as if they had succeeded. In 1887 the production of margarine dropped to approximately 20,000,000 pounds. It had been estimated that at least 200,000,000 pounds of margarine annually were being manufactured before the law went into effect. Despite that first sharp decrease, the production of oleomargarine by 1889 had increased to 83,000,000 pounds.

The butter interests saw they had not killed margarine. In 1901, they again took their case to the Federal Government. This time they attacked margarine on the grounds that it should not be allowed to be colored yellow.

The fact that there was almost no reference to the color issue in 1886 did not deter them. When the first Federal margarine law went through Congress there was no claim that butter had any preemptive right to use yellow to the exclusion of oleomargarine. I could find but one reference to color in the 1886 debates. Representative Henderson, of Iowa, did propose that oleomargarine be colored pink. His argument, however, was that this was necessary to prevent fraud. He set up no claim that butter had an exclusive right to yellow.

The 1886 statute imposed a tax of 2 cents a pound on all oleomargarine, but it did not differentiate between the colored and uncolored product. In addition, it defined butter as the product of the cow and defined all other table spreads as oleomargarine. License fees were placed on manufacturers, wholesalers, and retailers, and there were various labeling and packaging requirements and requirements also for the keeping of records.

The 1901 Federal statute reduced the tax on uncolored margarine to one-fourth cent and levied a tax of 10 cents a pound on colored margarine. There was a section which applied the laws of a State with regard to oleomargarine to oleomargarine shipped into the State. At the time, 32 States prohibited the sale of colored margarine, most of these statutes having been enacted after the butter industry saw that the 1886 Federal statute and other State laws would not kill their competition.

In 1901, the health argument figured very little. By that time, admittedly, most margarine had become a healthful and nutritious product.

By and large, the proponents of an amended law centered their case on alleged frauds. They claimed that most oleomargarine still was sold as butter. The majority report from the House Agriculture Committee said that four-fifths of the colored oleomargarine made was so sold despite the legal prohibition against such sales. This statement was challenged in a minority report, signed by six members and the gentleman from New York, Chairman Wadsworth. The gentleman from New York, Representative Wadsworth, stated that that fraud practice was largely done by retail dealers in butter. The gentleman from Mississippi, Representative John Sharp Williams, quoted the Commissioner of Internal Revenue, charged with enforcement of the 1886 act, as saying that no more than 5 percent of oleomargarine was sold as butter.

The minority report, read by the gentleman from New York, Representative Wadsworth, flatly charged that the real object of the legislation was to destroy the oleomargarine industry. He quoted a statement by a Mr. Adams, pure food commissioner of Wisconsin, before the House Agriculture Committee, which said:

There is no use beating about the bush in this matter. We want to pass this law and drive the oleomargarine manufacturers out of business.

He quoted also a statement by Charles Y. Knight, secretary of the National Dairymen's Union, in a letter to the Virginia dairymen, dated March 18, 1900:

Now is the time for you to clip the fangs of the mighty octopus of the oleomargarine manufacturers who are ruining the dairy interests of the country by manufacturing and selling, in defiance of law, a spurious article in imitation of pure butter.

The gentleman from New York, Representative Wadsworth, also called attention to an utterance by W. D. Hoard, ex-Governor of Wisconsin, and at that time president of the National Dairymen's Union, before the House committee. Mr. Hoard said:

It is provided that a tax of 10 cents a pound shall be imposed on all oleomargarine in the color or semblance of butter. In plain words, this is repressive taxation.

Representative Wadsworth's reaction to this confession was as follows:

Just here the minority of the Agriculture Committee parted company with the National Dairymen's Union, for we do not believe that the Congress ought to ruin one American industry to benefit another. And that is just the object sought by these men by their own confession.

The objective of the bill also was summed up boldly by Representative Grout, of Vermont, sponsor of the House measure. He said:

Most of the 38 oleomargarine factories now running will make room for 1,000,000 additional cows and the butter maker whose business now suffers from this competition will feel the relief as from a nightmare and will rejoice that he is at last permitted to reap the fruits of honest toil and the whole American people will be thankful that they are released at last from this oily monster which now lurks for entrance into every household, and for a place at every table.

It—

Oleomargarine—

may suit the stomach of the average workingman but it is true that it is not assimilated by the delicate.

From the fact that 700,000,000 pounds of margarine was consumed in this country in 1947, it is evident that Representative Grout did not have the gift of prophecy.

The minority report clearly summed up the heart of this issue in a statement which is as true today as it was almost 50 years ago. The report said:

Congress is being asked to ruin one industry to benefit another and this, in the opinion of the minority is the thing Congress ought not to do. The minority believes it to be class legislation of the most pronounced kind and it would establish a precedent which, if followed, would create monopolies, destroy competition and militate against the public good.

As I have stated previously, it is indeed fortunate that the precedent has not been followed. Nevertheless, the legislation, most unsavory in character, remains. It is time to get rid of it.

I told the House previously that the color issue, the chief talking point today of the butter lobby, was not raised in 1886. The butter spokesmen embraced this line of reasoning after they discovered that taxing and labeling oleomargarine left it still very much alive. The 1901 discussion has a strangely modern sound and I would like to quote some pertinent passages. It shows that butter's claim that it has an exclusive right to use yellow is as full of holes as the most perforated piece of cheese.

The case for butter was made by that champion of the dairy industry, Representative Grout. He said:

The trouble all comes from giving it—

Margarine—

a color not its own, but the color of butter—always yellow. The oleomargarine men complain because butter is sometimes colored but the coloring of butter only intensifies a little its natural color—the color that belongs to it, the color by which the world knows it, the color that this false product seeks in order that it may palm itself off for butter. * * *

We know that to meet a varying taste coloring matter is introduced into butter. I, myself, think it a foolish practice. I think that the taste of anyone which requires artificial coloring matter in butter is an abnormal and perverted taste.

Representative WADSWORTH replied to Representative Grout in words which I cannot hope to improve. Anyone who really believes that butter has some sort of sacred claim to yellow will read his

words closely. They are as true today as they were almost half a century ago. This is what Mr. WADSWORTH said:

It is claimed by the extreme butter men that yellow is the natural butter color and that practically no other food product has the right to use it. If that claim is true, what shade of yellow is it entitled to? * * * It is only in the months of May and June, and I speak as a practical butter maker myself when I make the assertion, that creamery butter, and that, of course, is the butter of commerce, has a decided yellow color or tint and that color disappears entirely or almost so when the fall and winter sets in. * * * Here are samples of butter purchased by me this morning and no two are alike. As a matter of fact, every sample is artificially colored. * * *

I deny that butter has the copyright, patent right, or any other right to any particular color, whether yellow or otherwise. * * * If coloring oleomargarine a shade of yellow helps to perpetrate a fraud, then the coloring of butter is actually a fraud because it makes the consumer believe, and necessarily, that fall or winter or white butter of any season of the year is June butter, which is generally considered the best.

Representative Williams, of Mississippi, who became nationally known for his wit and ability when in the Senate later, summed it up trenchantly:

Now what is butter color? Why, it runs all the way from a pure white in the hill country of Mississippi and the piney districts of the United States—almost as white as this piece of paper I hold in my hand—to as red a color as that which used to be the glory of the Goshen butter manufactured in Pennsylvania, the butter which had the widest reputation and the largest sale of any in the country and which everybody who was able to secure, desired for his table. * * *

If they are going to tax uncolored oleomargarine why do they not tax uncolored butter and if they are going to tax colored margarine out of existence, why do they not also tax colored butter out of existence and let everything stand on its own basis of color without artificial incentive to the buyer and without any sort of attempt at deceit?

Despite the convincing arguments of those who held that no food product holds an exclusive right to any particular color, the dairy lobby again prevailed. Butter, by action of Congress, was in effect, granted a preemptive right to yellow as against margarine.

Once again it seemed that butter had dealt margarine a fatal blow.

In 1901, per capita consumption of margarine had been 1.6 pounds, according to the Bureau of Agricultural Economics of the Department of Agriculture. In 1902, it fell to nine-tenths. The following 3 years it was constant at six-tenths—or slightly more than half a pound a person.

But this decrease in margarine consumption was not accompanied by a corresponding rise in butter consumption. The low-income groups decreased their purchases of margarine but they did not increase butter purchases, probably because they could not afford to.

In 1902, butter consumption was 17.5 pounds per person as compared with 19.9 pounds per person in 1901, a decline of more than 2 pounds per capita. During the next 3 years, when margarine was being consumed at a little more than one-third of its 1901 rate, butter consumption still showed no compensating increase. As a matter of fact—and I hope those gentlemen who have been influenced by the contention that it is necessary to keep these laws against margarine in order to protect the dairy industry from ruin will follow me closely—not once, not in one single year, since the drastic antimargarine legislation of 1901 was passed has per capita butter consumption reached the peak it achieved in 1900—the year before the legislation was passed. In that year the American public consumed 20.1 pounds of butter per person. It has never been that high since.

Today, nearly a half a century after the passage of this most drastic of the antimargarine laws, butter consumption is estimated at less than 12 pounds per person per year.

As time went on, two processes were developed for manufacturing a naturally colored margarine which, inasmuch as it was free from artificial coloration, could be sold at the one-fourth-cent tax rate per pound. In 1929 the Commissioner of Internal Revenue, charged with enforcement of the antimargarine legislation, ruled that palm oil and soybean oil could be introduced into margarine without paying the almost prohibitive 10-cents-a-pound tax. These naturally colored oils gave the margarine a yellowish tint.

And then the butter interests moved in again.

They had, they thought, established an effective monopoly on yellow as the color of their table spread. They know that housewives prefer their table spread yellow, just as they prefer oranges yellow. Color tastes, so far as foods are concerned, are matters of conditioning and habits. We want certain foods colored certain ways and, knowing this, food manufacturers use artificial color, if that is necessary, to give the customer what he wants. But butter is the only food which seeks, by law, to prevent a competitor from using a color.

In 1931 butter again attempted to drive margarine from the competitive market, by seeing to it that margarine could not be colored, naturally or otherwise, without payment of a penalty.

A bill was passed amending the 1901 act, which had placed a tax of 10 cents a pound on artificially colored oleomargarine. It provided that, thereafter, all margarine should be held to be yellow in color when it was a tint or shade containing more than 1.6° of yellow, or yellow and red collectively, and subject to the 10-cent tax. By this amendment colored margarine produced from oils naturally yellow, as well as artificially colored margarine, was brought within the more drastic taxing and licensing provisions of the Federal margarine law.

Henceforth, domestic cottonseed and soybean oil—both of which contain some yellow color in their natural state—would have to be bleached before being used in the making of margarine.

Butter was now, it seemed, to own yellow as a table spread color—or at least 98.4 percent of it.

Now, in 1886, as we have seen, the butter interests established special privileges for butter as against margarine by claiming that they were thereby protecting the public from fraud and from an unhealthy food product. In 1901, their charges of impurity against margarine having been dissipated, they advanced once more behind a smokescreen, crying "fraud."

In 1931, their original purpose—to drastically curb or eliminate butter's competition—as strong as ever, they shifted ground once more. Margarine was being made with foreign oil, they said, to the detriment of American farmers. The fight was described as a battle between United States dairy farmers and "the coconut cow" referring to oil made from coconuts.

It was true that large quantities of palm oil and coconut oil were at that time being imported into the country and used in making margarine. But it is also true that considerable quantities of oleo and cottonseed oil were also going into the manufacture of margarine.

In 1931 the butter industry came out into the open. Their spokesmen said frankly that their first purpose was to protect the butter industry.

Senator Townsend, of Delaware, summarized the whole history of antimargarine legislation when he said:

The record of the proceedings of Congress during the debates of this act will convince any reader that the intent of the enactment was to protect the dairy interests.

Then he went on to mention Alexander Legge, Chairman of the Federal Farm Board, who, in testimony before the Agricultural Committee, said, "was especially insistent that palm oil be embargoed on the ground that it displaces American dairy products."

However—

Senator Townsend continued, with what, I am happy to say now, was considerable foresight—

it is my opinion that an embargo or a tariff will not relieve the situation permanently, for science will discover something that will take the place of palm oil unless the law is strengthened with respect to color in oleomargarine.

Science, as you know, did just that, even though "the law was strengthened." Margarine was further improved and fortified with vitamin A until today it is the nutritional equal in every way of butter.

It is hard to put a halter around ingenuity and enterprise as the butter interests have found out. In our economy it is hard to stifle competition. But the butter lobby tried again, and again, and again.

With a frankness matching that of the Senate sponsor, Representative Brigham, of Vermont, said:

The unrestrained sale of oleomargarine, costing as it does less than one-fourth the cost of dairy butter, will drive dairy farmers out of business.

There was, as has so often been the case, nothing in the record to support this oft-reiterated assertion. Restrictive legislation against margarine, as we have seen, had not helped the dairy industry. It had merely hurt the margarine industry and the people, mostly in the low-income groups, who use margarine.

Today antimargarine legislation is simply one more factor in adding to the high cost of living and in promoting inflation.

What happened after the passage of the 1931 act? Margarine consumption dropped again. Agriculture Department figures show that the per capita consumption of margarine declined from 2.6 in 1930 to 1.9 in 1931 and 1.6 the following year. Butter consumption fluctuated within narrow limits. It rose from 17.2 in 1930 to 18.0 in 1931 and 18.1 the following year. Then it dropped to 17.8, rallied briefly to 18.2, and the following year, 1935, it was 17.1—one-tenth of a pound lower than it had been in 1930, the year before the last Federal antimargarine law was passed.

After 1935 per capita butter consumption dropped to 16.4, where it remained until 1940, when it rallied briefly, but then it fell steadily again. In 1946 it was around 10½ pounds per person. Last year butter consumption is estimated to have been approximately 11½ pounds per capita. Compare this figure with the high of 20.1 pounds of butter consumed per person in 1900 and the all-time high of 22.2 pounds in 1896, and ask yourselves again if protection—however drastic—has really benefited the butter industry.

I see no indication that the production of butter will rise at any time in the near future. More and more, dairy farmers are realizing that the most profitable sale of their product is as fluid milk. A sale as butter is the least profitable, a point which I hope to develop at greater length later on.

Butter is not the only industry which has tried to use the law to kill off its competition. There are similar instances on record. The English wool industry secured legislation against calico years ago. I want to digress here a moment to tell you what happened in this instance, for the case has many aspects similar to the butter-margarine controversy.

In the sixteenth and seventeenth centuries especially, wool was the great English industry—more important even in that country's economy than the dairy industry has ever been in the United States. Thousands of sheep, grazing on the green English countryside, produced the finest wool in the world and this was spun and woven into cloth of the highest quality by the cottage weavers. And then the Government, jealous of the superior quality of English wool, moved to protect it from any possible competition by forbidding the export of raw wool. It was feared apparently that foreign hands might prove as skillful in the weaving of the cloth as English hands, and that the finished product would then compete with English woolens. To increase wool's use, a law was passed that funeral shrouds must be wool.

Thus, for more than 120 years—

Leggett tells us in his Story of Wool—

it was illegal to bury a person in any other shroud or covering than pure English wool.

Not everybody liked this kind of legislation. As was said at the time: "This law forces our dead to consume what the living were inadequate to purchase."

Late in the seventeenth century calico prints began to appear in the English market. They were not hand-woven in a thousand scattered cottages as was English wool. They were machine-made—by primitive machines, it is true, but nevertheless the products of imagination and enterprise. The cloth was poor in comparison with wool. At first only the very, very poor bought calico.

But where the wool growers were complacent, the calico makers were enterprising. The quality of the cloth improved. More people bought the cheap cotton substitute for wool. And then calico began to be manufactured in England.

The Government moved to protect its greatest industry. It placed a tariff upon imported calico and a heavy tax on its domestic manufacture. It was a discriminatory tax—like the tax on margarine—favoring one domestic industry at the expense of another. This kind of internal tariff is a rare thing in Anglo-Saxon history, almost unprecedented. Its two most painful examples, and saddest failures, are the tax on calico to favor wool and the tax on margarine to favor butter.

What happened in the latter instance also happened in the first. Wool, like butter, won little or no advantage; the calico and printed-goods industry, like the margarine industry, was hurt, but it did not die. And then, in 1700, Parliament acted again in behalf of its "petted and pampered trade," as a contemporary critic referred to the wool industry. It prohibited the selling of cotton goods in England and 12 years later, it forbade the weaving of cotton goods and placed a fine of $25 on the weavers and $100 on the venders.

But enterprise is hard to kill, and, try as they would, the wool industry could not kill calico.

The woolen manufacturers went so far as to hire Daniel Defoe, the great novelist, as a public-relations man. Defoe's assignment, for which he was well paid, Leggett says, was "to prepare a pamphlet making sport of chintz and calico."

Defoe assumed the task with all the ardor of a dairy spokesman attacking margarine.

Chintzes—

He said—

were advanced from being upon the floor to the backs, from footcloths to petticoats. * * * We see persons of quality dressed in India carpets which, but a few years before, their chambermaids would have thought too ordinary for them.

Another law, passed by Parliament in 1720, was a measure of the failure of the earlier restrictive legislation in behalf of wool against calico. It was the most drastic of all and prohibited the purchase and use of "printed, painted calicoes, the wearing of which manifestly tends to the great detriment of the woolen manufacturers of the Kingdom."

It would appear that this should have been enough, once and for all, to kill the competition of cotton with wool, and hence, as its proponents thought, to save the wool industry.

But, as Leggett points out, the wool industry "while sheltered from the economic stress of foreign competition, was to a large extent stagnant at home. For many decades no new fabrics or designs were developed. As late as the eighteenth century woolen yarn was still being spun and woven by hand in the homes of weavers."

Wool, like the butter industry, was too complacent, too content to rest on the mythical protection of restrictive laws against its competitor. It was old fashioned. It had been slow to develop new processes and new techniques. It suffered accordingly.

But neither the wool industry nor the manufacture of cotton cloth perished in England. There was a place for both; a market for both. Eventually the costly wasteful, prowool, anticalico laws were repealed and that place and that market were found, both for wool and for cotton.

The woolen manufacturers, faced with vital competition, replaced the cottage industry with factories and developed new machines. And cotton, at long last, won the same right to be worn by the living—and even the dead in shrouds—as wool enjoyed.

I sincerely hope that this Congress will write the same ending to the discriminatory antimargarine laws as the English Parliament long ago wrote to the anticalico laws.

I have already stated that dairy farmers are more and more coming to realize that the most profitable sale of their product is fluid milk and that the least profitable is butter.

This realization upon the part of the farmer is shown by the decline in butter production and a corresponding increase in milk production during the past 10 years. Butter production dropped from a prewar—1937–41—annual average of 2,200,000,000 pounds to 1,500,000,000 pounds in 1946. During the same period, milk production increased from a prewar—1937–41—average of about 108,000,000,000 pounds to about 120,000,000,000 pounds in 1946.

Despite the increase in the production of whole milk, the United States Department of Agriculture reports that there is still not nearly enough milk to supply the people of this country at the high level of consumption of 1941, a level which nutritionists say is highly desirable. To achieve this health goal, 657 pounds of milk or its equivalent per capita is required, compared to the estimated 1947 supply of 430 pounds, of which 403 pounds is fluid milk or cream. To fill the gap of 227 pounds per capita approximately 5,800,000 additional dairy cows would be needed at the 1946 high rate of production per cow.

What caused the dairy farmer to divert more and more of his product from butter production to whole milk?

It was the simple fact that he got more money for one than for the other.

The average price paid for milk sold as fluid milk or cream during the 10-year period, 1936–46, was about 74 cents per pound; for butterfat, about 37 cents per pound. The prices paid for milk

for use in ice cream, cheese, and other products fell between these two levels.

In other words it was twice as profitable during this period for the dairy farmer to sell his milk for whole milk use as it was for him to divert it to butter manufacture.

As a result butter today is a minor factor in farm cash income and in the income of dairymen themselves. Farm cash income amounted to $24,519,000,000 in 1946. Butter and butterfat contributed about 2 percent of this amount.

Farm cash income from all dairy products in 1946 amounted to $3,716,000,000. Of this total, butterfat and farm churned butter accounted for $549,000,000, or 14.7 percent. It is interesting to compare this last figure with the percent of their milk which dairy farmers diverted to butterfat use, which I cited earlier. This comparison shows that, although dairy farmers in 1946 disposed of 23.35 percent of their milk for butterfat, their income from that amount was only 14.17 percent of their total income from milk.

An examination of the use of dairy products as milk or butterfat throughout the country reveals that in certain sections butter is such a minor factor in the dairy industry as to make the claim of the butter lobby that the industry's continued prosperity depends upon the suppression of margarine an absurdity.

In 1946, for example, the northeastern region, Pennsylvania, New Jersey, New York, and the New England States—produced over 18,000,000,000 pounds of milk. Of this amount, only 3.61 percent was disposed of as butterfat.

All indications are that butter will become increasingly less important in the over-all dairy picture. I have read recently a very significant speech by W. A. Wentworth, vice president of the Borden Co., at a meeting of the Minnesota Ice Cream Manufacturers Association in St. Paul. Mr. Wentworth dealt in figures, not emotion and prejudice, and these figures clearly indicate to me that butter is likely to become less and less important to dairymen.

Mr. Wentworth pointed out that in the prewar years, 1935 to 1939, an average of 58,515,000,000 pounds of milk was used in the production of fluid milk and cream, cheese, ice cream, evaporated milk, condensed milk, and whole milk powder. In 1947 approximately 84,640,000,000 pounds of milk were used in the production of fluid milk and cream, cheese, and the other whole-milk products mentioned. To state it another way, 56 percent went into the whole-milk products before the war; 70 percent of the milk produced is being used for the listed products now.

On the other hand, Nation-wide butter production in 1947 will approximate 1,700,000,000 pounds, which is 22 percent less than the average annual production of 1935–39. If the population increase is taken into account, the per capita consumption of butter is 31 percent less than that of 1935–39; or in other words, only about two-thirds as much butter per capita was available in 1947 as in the prewar period mentioned.

Mr. Wentworth points out that if sufficient butter were produced to make prewar per capita consumption possible, that 13,500,000,000 pounds more milk would have gone into butter in 1947. This is nearly one-fourth of the expected sales of fluid milk and cream. He points out that if the 13,500,000,000 pounds were diverted into butter that the total volume of milk for fluid milk and cream sales would have to be reduced to the volume consumed annually in 1935–39. On a per capita basis, consumption would be substantially lower now than in the prewar years.

From a nutritional standpoint and from the standpoint of the dairyman, this shift from fluid milk and cream sales into butter production is undesirable.

What the trend away from butter production and increase in the consumption of fluid milk and whole milk products means is strikingly emphasized in Minnesota. Ten years ago, approximately 77 percent of Minnesota's milk production went into the manufacture of creamery butter. But in 1946 only 42 percent of the milk produced in Minnesota was used in the manufacture of creamery butter.

The proportionately large production of butter in prewar years indicated in reality a waste of milk—a huge quantity of skim milk being fed to animals—to the loss both of the consumer and the dairyman.

There still is entirely too much thinking in the terms of scarcity economics in some dairy industry circles. Some people still regard buttter production as a possible refuge for the industry, if income declines and people are forced to curtail milk consumption. On the other hand, the increasing awareness of the value of milk from a nutritional and health standpoint would tend to keep milk consumption comparatively high even if there should be a business recession.

The real interest of the dairy industry lies in expanding its market for fluid milk and in selling its extremely valuable products in ever increasing quantities at reasonable prices. This is in the best interests of the industry and of the Nation as a whole. It is evident, therefore, that dairymen no longer are dependent upon butter and that butter will be less and less important to the industry.

There will continue to be, of course, a market for butter. It is preferred by many people and always will continue to be regardless of the fact that margarine is as good nutritionally and will sell for a cheaper price. But the dairy industry as a whole will not be hurt if margarine greatly expands its present market. In fact, it will be helped if it pursues a statesmanlike course and also expands its markets in its most profitable field, that of whole fluid milk and whole milk products.

It is interesting to observe that, for the most part, the greatest butter production is in those areas where the soybean industry represents an increasingly important part of the farmer's income: Illinois, Ohio, Indiana, Iowa, Minnesota, Missouri, and Kansas—to mention a few.

Are the gentlemen who represent the people of these States going to say to the soybean farmers, who produce almost 45 percent of the oil used in margarine, "This food, into which so much of your product goes and upon which your livelihood so largely depends, is not worthy to compete in a free American market with butter. We are going to continue to restrict it and curb it and hamper it."

For more than a half a century that is what has been said by this Congress to the cotton farmers of the South whose cottonseed oil was used in margarine.

The cotton farmers protested in vain. Their protests were drowned out by the clamor of the butter interests demanding protection and special privilege for their product. The butter interests were well organized and they threatened vengeance on any Congressman who wanted to do the fair and right thing.

And so butter, like wool in England, remained a "petted and pampered" industry. But the butter industry was not the gainer. There was no gainer. There were only losers—the low-income consumers, the workingmen, the cotton, soybean and livestock farmers and the country as a whole.

What this vicious discrimination against margarine means to the poor farmer of the South has been well stated by Oscar Johnston, president of the National Cotton Council, in testimony before a Senate Agriculture Subcommittee in June 1944. He pointed out that it was the poorest farmers, the sharecroppers and the tenants, upon whom these antimargarine laws laid the heaviest burden. The mortage against the tenant's crop, drawn to assure payment of funds advanced him to make the crop, ordinarily did not cover cottonseed.

The seed, he testified, frequently provided the source of income on which the farmer lives.

The discrimination against margarine has curtailed the use of cottonseed, has decreased their value and thereby has taken millions of dollars out of the pockets of the neediest farmers in America.

The butter industry would have you believe that the fight over margarine is still largely a fight between the cotton producing South and the dairy industry, The consumer of course has been ignored because he was unorganized.

But, as I have indicated, this is no longer a struggle between the cotton South and the butter interests, even if we do not take the consumer into account.

The soybean farmers, many of them living in the Middle West, are in this fight, too, standing side by side with the cotton farmers, demanding that these unfair antimargarine laws be wiped out.

Ersel Walley, president of the American Soybean Association, recently made this statement:

> Modern margarine is a clean, nutritious, widely accepted product of American farms. It is the only food product on the American market upon which specific discriminatory taxation has been levied. This discrimination should be removed as quickly as possible.

In the 10-year period between 1936 and 1946, soybean production in the United States rose from 33,000,000 bushels to 196,000,000 bushels. In 1936, the value of soybeans harvested for beans was estimated at $520,000,000. In 1946 the value was even higher.

In Iowa, a leading dairy State, cash receipts for soybeans produced in 1946 were two-thirds of all dairy products. The

Iowa crop of harvested soybeans sold for $82,182,000; all Iowa dairy products, for $123,752,000.

The value of soybeans produced in Illinois in 1946 amounted to $183,243,000; dairy products to $146,022,000. In Illinois the value of the soybean crop is $37,000,000 greater than the value of dairy products.

The Indiana soybean crop was worth $56,897,000; the Missouri crop—$34,290,000; and the Minnesota crop—$22,172,000.

I do not think all the Members of this House are fully aware of the tremendous importance of the soybean industry to this country, of its amazing development and growth, and of its value to the farmers of their own and other districts. I have assembled some of this information and will be glad to give it to any Member who is interested in it.

There are districts I could cite in the so-called heart of the butter country where soybeans are a more important source of income to the farmer than butter. And without a profitable market for the oil which comes from the soybean, the farmer cannot economically produce that crop. I shall only add that in 1946, soybeans contributed $600,000,000 to the farm income of the Middle West alone.

Soybeans are very important in the whole food picture. For example, soybeans are an important source of protein feed—essential for the production of meat, dairy products, and eggs.

Soybean oil meal, as Mr. Walley points out, today leaves the processing plants at approximately the same price per pound as is paid for wheat or corn by live stock feeders.

Yet—and it is important that the Members of this House understand this fact—one pound of soybean oil meal will replace from 3 to 4 pounds of corn in the livestock ration, and will, therefore, help alleviate the critical grain shortage.

The expanded use of soybean oil meal by livestock feeders thus offers a way to meet the needs of the hungry peoples of Europe and of our own people, and, at the same time, benefit the American farmer.

But—and I want to stress this point—in order to get the soybean meal to the chickens and the cattle economically there must be a profitable market for the oil which is crushed out of the bean before it becomes meal.

The ability of the soybean industry to produce protein meal on an efficient basis—

Mr. Walley says—

is contingent upon profitable usage of soybean oil. This means that soybean oil, unhampered by outmoded restrictions, must go into food products in increasing quantities over a period of years.

I said earlier that the interests of the consumers had been largely ignored on this question in the past because consumers were unorganized. But I am sure no Member of Congress believes today that, with butter selling around a dollar a pound, that consumers are indifferent to the situation created by these discriminatory laws. If anyone doubts what I say, make your own poll of housewives. You will find that they are overwhelmingly in favor of legislation which will enable them to buy margarine already colored.

These taxes and license fees on margarine are direct levies upon the consumer's pocketbook. They add to the high cost of living at a time when one of the country's chief concerns is inflationary prices.

Since 1939 the over-all cost of living has increased 60 percent. In 1939, according to the Department of Agriculture, the weekly food bill for an average household amounted to slightly more than $6. In October 1947 it was more than $12. Today it is even higher.

It is little wonder that housewives, anxiously trying to stretch their food budgets are demanding margarine at the grocery stores of the country. And yet, due to these Federal—and State—antimargarine laws, more than half the grocery stores in the United Statse do not sell margarine, either colored or uncolored.

These are mostly the small independent stores, operating on little capital, afraid or unable to pay the fees and meet the other restrictive requirements of the law. And these are, generally the stores patronized by the lower-income groups whose need for an economical supply of vitamin-giving fat foods is greatest.

Margarine or butter is essential in the individual diet. The same Federal Government that tries to strangle margarine with taxes and fees lists it as one of the seven basic foods. And yet combined margarine and butter consumption for 1947 is estimated at only 16 pounds per person, considerably below previous nutritional levels.

Only one retail grocer in a hundred sells colored margarine; this is due, it is true, to State as well as Federal laws. But even in those States where only Federal fees and taxes operate to restrict the sale of colored margarine less than 1 store in 20 sells it.

The housewife wants to serve margarine yellow. This is a matter of food tastes and food habits. Butter meets the consumer preference by using artificial coloring without penalty. The housewife has to mix the coloring and margarine herself.

This is a time-consuming and wasteful process. From 2 to 2½ percent of the margarine is lost in the process of mixing, thus about sixteen to eighteen million pounds were wasted in 1947. It is also a totally unnecessary process. There is no reason, except these discriminatory laws, why all margarine should not be colored in the factory and sold to the consumers as they want it.

Yes, the antimargarine laws have their place in the total inflationary picture.

And right here, I want to repeat my hope that the leaders of the Republican Party will not, as they have generally done in the past, make a party issue out of this struggle to repeal the antimargarine laws. In the past, efforts to get legislation to repeal the antimargarine laws have met the united opposition of the Republicans. This state of affairs could not happen if the Republican leaders had been sympathetic to repeal. This effort to give long overdue justice to the farmers who produce domestic oils, and to the makers of margarine, and to the consumers, should be bipartisan. I do not see how either the Republican or Democratic leadership can afford to identify themselves as standing against the repeal of vicious, inflationary, un-American class legislation.

Unfortunately, some of the measures taken by the Republican leadership of this Congress have, in my opinion, contributed materially to the rising cost of living. This is not the place or time for a bill of particulars on this subject. I repeat that in this instance where the issues are startlingly clear once they are examined squarely, I hope that right-thinking men in both parties will join together. The Eighteth Congress will bring credit upon itself and do the entire country a service if it tears out these antimargarine laws by the roots and flings them where they belong—upon the scrap heap of oblivion.

The SPEAKER pro tempore. Under the previous order of the House, the gentleman from New York [Mr. CELLER] is recognized for 15 minutes.

ARMS FOR PALESTINE JEWS

Mr. CELLER. Mr. Speaker, when the United Nations decided on partition it was patent to all that the Moslem Arabs would not acquiesce. In fact the Moslem delegates from Iraq, Saudi Arabia, Yemen, Syria, Lebanon, Egypt, Iran, Afghanistan, stormed out of the Assembly Chamber at Flushing Meadows in high dudgeon when the President, Aranha, announced the vote for partition, 33 to 13.

These delegates had vowed vengeance. They threatened dire violence. They have now exhorted their nationals and lashed them into a fury of malice, plunder, rapine, and assassination against the Jews. They are sending arms and armed men into Palestine to sabotage the decision of the United Nations and make partition impossible. They are even holding innocent Jews in Egypt, Iraq, Yemen, and Syria as hostages and visiting upon them and their loved ones cruelties to their persons and confiscation of their properties.

Certainly the Jews in Palestine have the right to protection from the United Nations. Great Britain refuses adequate policing. The communal strife grows bloodier and more murderous each day. Great Britain deliberately refuses to curb the cutthroat bandits of the Grand Mufti and denies the Jews the right of self-protection. Britain plays the dog in the manger. She refuses to recognize Haganah as lawfully constituted.

Witness the shameful conduct of Britain concerning besieged Jerusalem. A horrible situation has been created in the very center of the Holy Land. The old city of Jerusalem, containing the shrines of the three great religions is under an Arab blockade. Arab bombs, grenades, knives, guns desecrate the Holy City. Under the eyes of the British and apparently with her consent several hundred Arabs under the Grand Mufti have blockaded the gates of Jerusalem and have isolated 1,800 Jewish inhabitants living near the wailing wall. The

purpose is to starve and finally massacre them.

The British are taking no steps to avert a catastrophe. Even the Palestine police are not permitted to pass Arab road blocks, although the British military could dissipate these Arab desperadoes in short order.

That is a typical example of how the British are maintaining law and order.

What must the Jews do outside this beleaguered area? Their patience is exhausted. They must try to break through the blockade to feed their brethren and finally rescue them. That means more violence.

How will Mr. Bevin excuse this British perfidy?

Britain even refuses to allow the members of the UN Palestine Commission to enter Palestine, although the Holy City is set aside in the partition plan as a separate unit.

How will Mr. Bevin explain away his flouting of the UN decision by allowing such reign of terror in the City of Peace?

The Jews are willing to bear the brunt of the fighting, but Great Britain disarms them and renders them impotent to defend themselves. Jews ask for Haganah the right of elemental self-defense. But Britain cruelly refuses that right—thwarts this right—so that Haganah men fighting to save their lives and that of the Jewish inhabitants, fighting to save the decision of the United Nations, must hide their arms, must disappear or be shot down by British troops as malefactors. Think of it. Shot down in cold blood in performing the duty that should be Britain's. Can the United States which voted partition, voted for the Jewish state, remain complaisant and unmoved by such turn of events? I hope not.

Mr. GOFF. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Idaho.

Mr. GOFF. Does the gentleman mean then that he wants American boys to be sent over there?

Mr. CELLER. I did not say that. If the gentleman will be patient, I shall be very glad to give him my views on that matter.

A mass of documented proofs attest to the unwarranted killing, disarming, and arrest of Haganah members by British forces. A few apologies may be forthcoming, but the tragicomedy goes on.

The main highways, which must be traversed by the Jews for sustenance and life for cities like Tel Aviv, are infested with Arab bandits. The Jewish Agency demanded and demands that the British patrol these roads, or allow the Haganah to do it. The British refuse to risk their men to patrol and refuse the requests of the Haganah. The roads, particularly those leaving the winding, hilly country near Jerusalem, which are constantly used by the Jews, are traps for murderers and snipers. The British police search all passengers and compel them to traverse unpatrolled highways unarmed. This is legalized murder. And the British are guilty of complicity in the murder.

Withal the Haganah has been ordered to show uttermost restraint. This they do save under the sternest provocation. They know that the Mufti's agents want the rioting to proceed. Widespread outbursts are grist to the Mufti's mill.

The Jews can take care of their own, if left unmolested and if the Grand Mufti is denied outside arms and men. They have the leadership, courage, will, and know-how, but arms and equipment are desperately needed.

This anomalous situation must cease. The British version is that on May 15, when they quit Palestine, the Jewish militia can be recognized but not until then. Until then Jews must be disarmed. Arms must be confiscated and those armed must be imprisoned. By May 15, under such intolerable conditions the Grand Mufti and the Arab League will have completed their dirty work. Jews by the thousands will have been destroyed. Palestine might be Juden run. I suppose Mr. Bevin presumes that on May 16, the day after British evacuation, arms in plenty will by some miracle descend upon the Jews, if there are any remaining, like manna from Heaven.

Well the game will not be played according to Mr. Bevin's plans. Jews will get arms by hook or crook. They must have arms to defend their hearth and home and their land. Otherwise the world would look upon them as spineless jellyfish. They will fight and die with Maccabean courage.

Meanwhile Bevin allows former British Indian Army officers to leave London for Palestine to fight the Jews. The New York Times of January 12 reports that some 4,000 British Army veterans have embarked as volunteers to fight under the aegis of the Arab League. Apparently Herr Bevin is now finicky about neutrality. He would undermine the decision of the United Nations. He would break the back of Jewish resistance by strengthening the Arabs led by the Grand Mufti, who stabbed Britain in the back in Iraq when she was in most desperate straits.

How Machiavellian a role Herr Bevin can play is seen in the reports (New York Times, January 12) that Britain was and is supplying arms to Egypt, Iraq, and Trans-Jordan. The Jewish Agency claims that the value of equipment shipped by Britain amounts to over $25,000,000. In fact only last week Britain concluded a military pact with Iraq. It will be formally signed tomorrow at Portsmouth. It provides for a plentiful supply of arms, heavy and light equipment, and planes. Only a child would deny that arms sent to Egypt, Iraq, and Trans-Jordan find their way into Palestine.

I have information from an accredited source that in the past few days Britain sent to Iraq 150 armed vehicles, 75 planes, 2,000 nonmilitary vehicles—easily convertible to military uses. These planes and cars are destined for use in Palestine to subvert the UN decision of a separate Jewish state.

Also the United States is reported to have sold to Iraq 150 Willys-Knight jeeps from surplus stocks, presumably for civilian purposes. But United States jeeps are admirable for war against the Jews.

I read from the New York Times of January 12 "Since the United Nations recommendations that Palestine be partitioned into Jewish and Arab states reports have come from Arab League countries of the recruiting, arming, and training of volunteer armies to resist the proposal. An incursion into the Holy Land by a force from Syria took place last Friday."

These armies are equipped with British guns, grenades, planes, and tanks.

Your hands are dripping with Jewish blood, Herr Bevin. There is too much fat around your belly and as well around your heart for you to be either just or compassionate.

Our State Department has placed an embargo on arms against Egypt, Lebanon, Syria, Saudi Arabia, Trans-Jordan, Iraq, and Palestine. You will note Yemen is not included, nor is Pakistan included, nor is India included. These Moslem countries can buy unlimited arms made in the United States, shipped from the United States and sent to Yemen and Pakistan and India. And then they can be routed to Palestine Arabs.

The embargo does not include lend-lease jeeps and trucks, which are already in many of those countries of the Middle East, and which can be readily turned over to military uses. It does not include clothing and shoes which can be used for uniforms. Millions of dollars of articles went into Saudi Arabia, Egypt, Iraq, Syria, Lebanon, and Yemen under lend-lease. They have very likely by this time found their way into Palestine to be used against the Jews.

Secretary General Trygve Lie in his address at the first session of the UN Palestine Commission recalled that the General Assembly had called on member nations not to interfere with or in any way impede the partition decision. By sending 4,000 British veterans, plus officers, to the Arabs in Palestine Herr Bevin thumbs his nose at the Secretary General. He says, in effect, to hell with the decision of the General Assembly.

Let us examine our own efforts at neutrality. Let us see how lopsided it really is, and how it aids the Arabs and hurts the Jews. The Arab states, being sovereign, can procure, and do get, arms and matériel from many countries. The Jewish Agency, not yet a sovereign state, has no such right. It is limited to the arms it manufactures and arms it smuggles into Palestine. But our embargo applies not to Turkey or Iran or Yemen. It does not apply to another Moslem country, Pakistan. Pakistan, Yemen, Iran, and Turkey all voted against partition. There is nothing to stop all four of these Moslem countries from shipping to Arabs in Palestine American arms and planes and jeeps and tanks.

There is no embargo whatsoever imposed by Great Britain. For our State Department to impose any embargo without similar action from London leaves open plenty of arms to the Arabs, but closes the door to the Jews.

Thus, the American neutrality embargo is working like the neutrality did in Spain. The embargo imposed by the western powers left the republican

forces impotent while Franco got all the arms he wanted from Hitler and Mussolini.

Now our State Department by the embargo shuts off much needed supplies to the Jews, while the Arabs, with the aid of Britain and American arms indirectly supplied through Turkey, Iran, Yemen, or Pakistan, can mow down the Jews, render the UN decision a nullity, and make of the Holy Land a Sodom and Gomorrah.

The SPEAKER pro tempore (Mr. HALLECK). The time of the gentleman from New York has expired.

Mr. CELLER. Mr. Speaker, I ask unanimous consent to proceed for 10 additional minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CELLER. Our neutrality is actually inconsistent with our action in the United Nations. Neutrality in this instance is no neutrality at all. It is favoritism to one side—the Arab side.

By our so-called neutrality we play Bevin's game. He wants partition to fail and thereafter have United Nations ask Britain to remain in Palestine.

By our neutrality we play the Grand Mufti's game—the game, extermination and massacre of the Jews.

I read a very significant report that comes out of Egypt. It is in the form of a cablegram sent from Egypt:

Roz El Yusef—

An important Egyptian newspaper—

reports that Arab League secretariat has just now received a large quantity of arms and ammunition sent by the Indian and Afghanistan Governments. The secretariat is now arranging for the safe transfer of this consignment to Palestine. The same paper reports that the Mufti asked the Egyptian Premier for permission to transfer to Palestine all arms and ammunition acquired by his agents and envoys in Egypt in the western desert and in Libya.

Here is another part of the cablegram:

Al Ahram—

Another Egyptian paper—

states that the Egyptian Government allotted a half million Egyptian pounds as the first installment in support of Palestine Arabs fighting against partition. This sum was allotted from a secret budget of the Premier and of the Foreign Ministry and is not part of the official budget. This was done in order to avoid the danger of a conflict with the Security Council or the General Assembly in the event that Egypt is accused of violation of the General Assembly resolution or of the United Nations CB Charter.

Al Mussawar—

A third Egyptian paper—

states that all Egyptian officers have been granted 6 months leave with full pay to go to Syria and to join Arab voluntary forces.

In pursuance of the fact that India supplied arms in the fashion indicated, I sent the following cable to the Premier of India yesterday:

JAWAHARLAL NEHRU,
Premier, Government of India,
New Delhi, India:

It is reported in the Roz el Usef, a newspaper published in Cairo, Egypt, that the Arab League Secretariat has acquired a large quantity of arms and ammunition sent by the Indian and Afghanistan Governments and that the Secretariat is arranging for the safe transfer of this consignment to Palestine. If true, this action on the part of your Government is a violation of the decision of the General Assembly of the United Nations on Palestine. Trygve Lie, secretary of the United Nations, has urged all nations to uphold the decision. I am sure that Trygve Lie and many friends of India in the United States will be shocked if you do not repudiate this reported violation of international comity. India has much to gain from a strong United Nations. Actions of this character wound the prestige of the United Nations to which India has, and is now in the act of so applying, applied for redress of wrongs.

EMANUEL CELLER,
Member of Congress,
United States of America.

Assuredly we have the right to expect the United Nations to have some definite obligations in this ordeal by fire in Palestine. These obligations must be respected and fulfilled. The UN must send a force into Palestine to defend its decisions; otherwise the house called UN becomes a mere shambles. UN prestige is at stake. Contingents of regular troops or volunteers contributed by several of the smaller nations, like Sweden, Belgium, Norway, Brazil, Colombia, South Africa, and Mexico, might be sent to the scene without delay. Small nations would consent. These forces could work with Haganah.

Mr. GOFF. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield.

Mr. GOFF. Would not the Soviet Union have a right to send in troops if these other nations sent in troops?

Mr. CELLER. I purposely left out the Soviet Union in my remarks because I did not want to touch on that problem. It is a very difficult one. It is hoped that the United States and the Soviet Union, China, France, Great Britain, and the other members of the Security Council might work out some arrangement. I do know they are deliberating on this matter. I do not know the outcome of their negotiations. Meanwhile the situation is deteriorating, and it cannot wait until the Security Council members can get together on some sort of an agreement. The smaller nations have expressed a willingness to send volunteers into Palestine for the purposes I have outlined. So that I think the United Nations should avail itself of any offers made by the smaller nations and their willingness to send contingents into the Holy Land. If no offers have actually been made, then overtures to that end should be made to them.

Mr. GOFF. Is not the Soviet Union also offering to send troops in there?

Mr. CELLER. That I do not know, sir.

Mr. GOFF. Does the gentleman think there is any way we could prevent them from sending their troops in?

Mr. CELLER. I think this suggestion of mine is the best way. It would prevent troops from any of the big nations, from any of the members of the Security Council going into Palestine. I spoke of smaller nations.

These forces could work with Haganah. The Arab rebellion must be crushed. The task of doing it is that of the UN. Only a force representing the authority of the UN may convince the Arabs that violence and murder will not defeat partition.

The United Nations must first put the Jewish Agency through Haganah in a position adequately and successfully to meet Arab onslaughts. The United Nations must make it possible for Haganah to have heavy and light arms and planes and tanks and mortars. These can be supplied by the United States through the United Nations.

Second, United Nations, through the Security Council, must set up an international police force, totaling around 50,000 men, with 2,000 planes, supplemented by an international fleet, including carriers, cruisers, and battleships.

Then and then only will it be possible for the Jewish state to come into being without undue bloodshed. Then and only then will the United Nations justify its existence. Then and then only will the Arabs learn their lesson, namely, that they cannot with impunity trifle with a solemn decision of the United Nations, of which they are members and whose edicts they have sworn to obey—not offend.

Finally, the crucial period comes between May 15 and September 12, when the British get cut and the Arab and Jewish states come into being and are given full independence.

It is incumbent upon the Military Staff Committee of the Security Council to present their recommendations forthwith and for the Council to lose no time in coming to a decision.

Mr. Speaker, I would like to insert, with the consent of the Members of the House, the text of a statement issued by the Jewish Agency in connection with this momentous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CELLER. The text of the statement issued by the agency follows:

The Jewish people of Palestine are in desperate need of arms for their defense. The ex-Mufti of Jerusalem, who collaborated with Hitler in the destruction of 6,000,000 Jews in Europe, has now called the Arab world to arms to carry on his work of massacre and extermination. Through his connections with the Arab League and the Arab states, the Mufti has the facilities to acquire arms and munitions for aggression and invasion.

The Jewish Agency for Palestine has the responsibilities of a state about to be born. It must protect the lives and homes of the 700,000 men, women, and children of Palestine. The United Nation's decision made no provision for an international force, but did provide for a Jewish militia to defend the Jewish state and to maintain public security.

It therefore devolves upon the responsible defense forces of the Jewish community of Palestine to rush preparations in a race against time in view of the threatened Arab aggression in defiance of the United Nations decision and the announced early withdrawal of British troops.

Accordingly steps were taken to arrange for the legitimate purchase of war surplus matériel and equipment. To facilitate these purchases the Jewish agency made dollar credits available. The materials found near Asbury Park on Thursday were to the best of

our knowledge, legally procured to await legitimate shipment.

It has, throughout, been our understanding that all such transportation was in full conformity with American law. We are proud to give our aid to the embattled Jews of Palestine. We trust that material urgent for their defense may soon be shipped to them legally, and with God's help reach them in time to meet their grave emergency.

EXTENSION OF REMARKS

Mr. KLEIN (at the request of Mr. MORRIS) was granted permission to extend his remarks in the RECORD and include two editorials.

Mr. PHILBIN asked and was granted permission to revise and extend his remarks in the RECORD in two instances.

EXTENSION OF REMARKS AT THIS POINT

Mr. GOFF. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. WOODRUFF] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore (Mr. HALLECK). Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. WOODRUFF. Mr. Speaker, yesterday I introduced a bill which would make dutiable platinum foxes and furs and all mutations or types developed from black, silver, or platinum foxes.

During recent years the demand for lighter and lighter colored furs has made the so-called platinum fox furs extremely valuable. The first platinum fox was a "mutation" developed accidentally from the mating of two silver or black foxes. Importers have been bringing into the United States increasing amounts of platinum fox furs claiming that they were free of duty as furs and fur skins not specially provided for, rather than as silver or black fox furs which are dutiable at 37½ percent. The court upheld the claim of the importers but the Government appealed the case, saying that if the ancestors of platinum foxes were silver or black foxes, then they too should be so classified for duty purposes.

It is not my intention to try to interpret the desires of any earlier Congress and I am perfectly willing to let the appellate court which now has the case decide it on its merits. My primary concern is the present and future rights of our fur producers, and I consider their protection a matter of right developed from 150 years of the American way of living. Everyone knows that no American fur grower can produce furs as cheaply as the producers in Russia or any other country now shipping them to us in huge quantities, even if he were willing to lower his standard of living so that it was comparable.

Russia has shipped furs to this country without regard for costs of production and without regard for the effects on the domestic market. More than two-thirds of all the imports from Russia in 1946 consisted of furs. As a result of this and of imports from other countries our home industry is in dire straits and this bill may have the effect of an opening announcement that Members of this Congress will not let our so-called need for imports completely upset their judgment. If our tariffs are too high—then they may be lowered, but if they are too low, then by the same token let them be raised. We cannot save the world by destroying our own industries.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. MEADE (at the request of Mr. MORTON), until January 19, 1948, on account of urgent business in his district.

PERMISSION TO ADDRESS THE HOUSE

Mr. MITCHELL. Mr. Speaker, I ask unanimous consent that on tomorrow, after the legislative business of the day and following any other special orders, I may address the House for 5 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

ENROLLED BILLS SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 389. An act for the relief of the dependents of Carl B. Sanborn;

H. R. 645. An act for the relief of Ben W. Colburn;

H. R. 769. An act for the relief of the estate of Ruth Horton Hunter;

H. R. 1155. An act for the relief of the estate of W. H. Rodgers, deceased;

H. R. 1175. An act for the relief of the estate of Daphne Ward Pope, deceased;

H. R. 1319. An act for the relief of Calvin J. Frederick;

H. R 1426. An act to extend veterans' preference benefits to widowed mothers of certain ex-servicemen and ex-servicewomen;

H. R. 1531. An act for the relief of William P. Gillingham;

H. R. 1645. An act for the relief of Mrs. Leona McMinn Winkler;

H. R. 1933. An act for the relief of Mrs. Elizabeth F. McCombie;

H. R. 2056. An act for the relief of J. C. Bateman;

H. R. 2348. An act for the relief of Charles J. Smith;

H. R. 2891. An act for the relief of Mattie A. Horner;

H. R. 3068. An act for the relief of Alfred Thomas Freitas;

H. R. 3146. An act to amend section 3 of the Flood Control Act approved August 28, 1937, and for other purposes; and

H. R. 3754. An act for the relief of Oscar and Anna Carlblom.

ADJOURNMENT

Mr. GOFF. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 9 minutes p. m.) the House adjourned until tomorrow, Thursday, January 15, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

1209. Under clause 2 of rule XXIV, a letter from the Acting Secretary of the Treasury, transmitting a report showing refunds of internal revenue in excess of $500 made by the Bureau of Internal Revenue during the fiscal year ended June 30, 1947, on account of taxes illegally or erroneously collected, was taken from the Speaker's table and referred to the Committee on Expenditures in the Executive Departments.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOPE: Committee on Agriculture. H. R. 4856. A bill to delay the liquidation of mineral interests reserved to the United States as required by the Farmers' Home Administration Act of 1946, and for other purposes; without amendment (Rept. No. 1240). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. HAGEN:

H. R. 4948. A bill to provide for the payment to certain Government employees for accumulated or accrued annual leave in cases involving transfers to other Government agencies under different leave systems; to the Committee on Post Office and Civil Service.

By Mr. KEARNEY (by request):

H. R. 4949. A bill to provide hospitalization and pensions to veterans of certain campaigns on a parity with war veterans; to the Committee on Veterans' Affairs.

By Mr. MEADE of Maryland:

H. R. 4950. A bill to authorize the construction of a Veterans' Administration general medical and surgical hospital in Baltimore, Md., and for other purposes; to the Committee on Veterans' Affairs.

By Mr. POWELL:

H. R. 4951. A bill to assure to all persons within the District of Columbia full and equal privileges of places of public education, accommodations, resort, entertainment, and amusement, and for other purposes; to the Committee on the District of Columbia.

H. R. 4952. A bill to prohibit race segregation in the armed forces of the United States; to the Committee on Armed Services.

By Mrs. ST. GEORGE:

H. R. 4953. A bill to create the Board of Postal Rates and Fees in the Post Office Department; to the Committee on Post Office and Civil Service.

By Mr. HOLMES:

H. R. 4954. A bill to authorize the construction, operation, and maintenance, under Federal reclamation laws, of the Kennewick division of the Yakima project, Washington; to the Committee on Public Lands.

By Mr. LANE:

H. R. 4955. A bill to incorporate the Italian-American World War Veterans of the United States; to the Committee on the Judiciary.

By Mr. O'HARA (by request):

H. R. 4956. A bill to establish a District of Columbia Armory Commission for the control of armories in the District of Columbia; to the Committee on the District of Columbia.

By Mr. ALBERT:

H. R. 4957. A bill to provide pensions for disabled veterans of World War I under similar conditions, and in the same amounts, as now provided for disabled veterans of the Spanish-American War; to the Committee on Veterans' Affairs.

By Mr. HAYS:

H. R. 4958. A bill repealing certain provisions of the Internal Revenue Code, relating to the tax on oleomargarine, and for other purposes; to the Committee on Agriculture.

By Mr. KERSTEN of Wisconsin:

H. R. 4959. A bill to amend title 18, United States Code 396, relating to the importing and transporting of obscene books and other material; to the Committee on the Judiciary.

By Mr. KLEIN:
H. R. 4930. A bill to create a Committee on Capital Clearance for the District of Columbia; to the Committee on the District of Columbia.

By Mr. MITCHELL:
H. R. 4961. A bill to amend section 213 (52 Stat. 1067, as amended by 53 Stat. 1266) of title 29 of the United States Code, the same being a section of the Fair Labor Standards Act of 1938, as amended, so as to eliminate the exemption of small telephone exchanges from the overtime and minimum-wage provisions of the Fair Labor Standards Act; to the Committee on Education and Labor.

By Mr. O'KONSKI:
H. R. 4962. A bill to provide pensions for certain widows of veterans of the Spanish-American War, including the Boxer Rebellion and the Philippine Insurrection; to the Committee on Veterans' Affairs.

H. R. 4963. A bill to amend the Servicemen's Readjustment Act of 1944 so as to provide readjustment insurance for those persons who served in the armed forces of the United States during World War II, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. REES:
H. R. 4964. A bill to preserve seniority rights of 10-point preference eligibles in the postal service transferring from the position of letter carrier to clerk or from the position of clerk to letter carrier; to the Committee on Post Office and Civil Service.

By Mr. ROSS:
H. R. 4965. A bill to amend the Servicemen's Readjustment Act of 1944 so as to provide readjustment insurance for those persons who served in the armed forces of the United States during World War II, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. RUSSELL:
H. R. 4966. A bill directing the Secretary of the Interior to sell and lease certain houses, apartments, and lands in Boulder City, Nev.; to the Committee on Public Lands.

By Mr. ANGELL:
H. R. 4967. A bill to provide for the acquisition of a site and preparation of plans and specifications for a new postal building and for remodeling of the existing main post office building in Portland, Oreg., and for other purposes; to the Committee on Public Works.

By Mr. DINGELL:
H. R. 4968. A bill to provide a cost-of-living credit under the individual income tax and to reenact the excess-profits tax on corporations; to the Committee on Ways and Means.

By Mr. SCOBLICK:
H. R. 4969. A bill to reduce the age requirements for old-age and survivors insurance benefits from 65 to 60, and, in the case of veterans of World War I or II, to further reduce such age requirements according either to their length of service or to whether they served outside the United States, and for other purposes; to the Committee on Ways and Means.

By Mr. WOLVERTON:
H. J. Res. 295. Joint resolution to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. BEALL:
H. Res. 425. Resolution creating a select committee to conduct an investigation and study of all phases of the sugar industry; to the Committee on Rules.

H. Res. 426. Resolution to provide funds for the expenses of the investigation and study authorized by H. Res. 425; to the Committee on House Administration.

By Mr. MULTER:
H. Res. 427. Resolution to increase personal income tax exemptions; to the Committee on Ways and Means.

By Mrs. ROGERS of Massachusetts:
H. Res. 428. Resolution providing for the consideration of H. R. 4242; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROWN of Georgia:
H. R. 4970. A bill for the relief of Fritz Busche; to the Committee on the Judiciary.

By Mr. BUCKLEY:
H. R. 4971. A bill for the relief of Peter Velykis, also known as Domas Rupeika; to the Committee on the Judiciary.

By Mr. HAVENNER:
H. R. 4972. A bill for the relief of Samuel Ensler and Louis Puccinelli; to the Committee on the Judiciary.

By Mr. HAYS:
H. R. 4973. A bill for the relief of certain employees of the Post Office Department; to the Committee on the Judiciary.

By Mr. KENNEDY:
H. R. 4974. A bill for the relief of Mrs. Mary Capodanno and the legal guardian of Vincent Capodanno; to the Committee on the Judiciary.

By Mr. LARCADE:
H. R. 4975. A bill for the relief of Joseph Thompson; to the Committee on the Judiciary.

By Mr. POTTS:
H. R. 4976. A bill for the relief of Father Louis Naclerio; to the Committee on the Judiciary.

By Mr. RILEY:
H. R. 4977. A bill for the relief of Mrs. Goldie Weiner; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1126. By Mr. LARCADE: Petition of citizens of Iowa, Lake Charles, Maplewood, Roanoke, and Sulphur, La., in favor of universal military training; to the Committee on Armed Services.

1127. Also, petition of veterans and other citizens of Morrow, Palmetto, and Rosa, La., in favor of universal military training; to the Committee on Armed Services.

1128. By Mr. SMITH of Wisconsin: Petition of members of the Department of Wisconsin, Veterans of Foreign Wars, urging legislation establishing a system of universal military training; to the Committee on Armed Services.

HOUSE OF REPRESENTATIVES

THURSDAY, JANUARY 15, 1948

The House met at 12 o'clock noon.

Rev. Frederic P. Gehring, of the Congregation of the Missions, St. Vincent's Seminary, Germantown, Philadelphia, Pa., offered the following prayer:

In the name of the Father and of the Son and of the Holy Ghost. Amen.

Humbly we beg Thee, O Father of Lights, to illuminate our minds with understanding and inflame our hearts with courage, so that we may carry out dutifully and unselfishly the obligations of Thy sacred trust. Through Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1031. An act for the relief of Antonio Zamora; Mrs. Antonio Zamora; Antonio Zamora, Jr.; Mrs. Juan Chavez; John Chavez, Jr.; Roland Chavez; Selso Trujillo; Dr. M. G. Wright; and the heirs of Keith Lane.

REV. FREDERIC P. GEHRING, C. M.

Mr. HUGH D. SCOTT, JR. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. HUGH D. SCOTT, JR. Mr. Speaker, we are very much honored today by the presence of the Reverend Father Frederic P. Gehring, director of the Vincentian missions in China, who has just delivered the invocation. Like so many celebrated men, he was born in Brooklyn. He was ordained at St. Vincent's Seminary, in Germantown, which, I am happy to say, is in my district. He served 7 years in China at the missions. He was in charge of relief work during the Sino-Japanese War. He joined the Navy in February 1942 as chaplain, and landed on Guadalcanal with the Navy and the Marines.

He was the first American chaplain to receive the Legion of Merit award and Presidential citation for rescuing 27 missionaries of all faiths from behind the Japanese lines on Guadalcanal. He served with Admiral Halsey on New Caledonia and New Guinea with the first naval detachment. After 2 years of active service, he returned to the United States and then went back to the Pacific and landed, I may say parenthetically, at the same time I did, with the first troops in Tokyo.

He was detached from active service in 1946 and is now serving as director of the Vincentian missions in China.

I am sure we are all very happy indeed, in paying honor to Father Gehring, to know that through him we pay honor also to those brave marines and naval forces with whom he served with such notable distinction.

ADJOURNMENT OVER

Mr. JENKINS of Ohio. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

EXTENSION OF REMARKS

Mr. DONDERO. Mr. Speaker, I have three requests. I ask unanimous consent to extend my remarks in the Appendix of the RECORD on the strange case of Heinz Norden.

Mr. HOFFMAN. Mr. Speaker, reserving the right to object, what is that about?

Mr. DONDERO. It has to do with a man who had been on one of the relief boards and sent to the American zone of occupation in Germany after he had had a record here which was certainly questionable. I am putting those facts in the CONGRESSIONAL RECORD.

Mr. HOFFMAN. Does that matter have reference to the case of a man where there was some criticism?

Mr. DONDERO. Yes; there was criticism offered against me.

Mr. HOFFMAN. By whom?

Mr. DONDERO. By the Washington Post because I attacked this man.

Mr. HOFFMAN. That is all right; I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DONDERO. Mr. Speaker, I also ask unanimous consent to extend my remarks in the Appendix and include a letter from the State Department in reference to the same person.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

AMERICAN SOVEREIGNTY DISREGARDED BY UNITED NATIONS

Mr. DONDERO. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DONDERO. Mr. Speaker, the matter I wish to call to the attention of the Congress deals with the sovereignty of the United States and its Territories. According to the New York Times of January 9, 1948, page 12, A. H. Feller, United Nations General Counsel, stated that the ultimate decision on the admission of alien correspondents accredited to the United Nations must be made by the international organization and not by the United States. He added that even if the United States denied admission to an accredited United Nations representative, the United Nations had the power to insist on his entry.

This question has been recently touched off by the arrest of Nicholas Kyriazides, UN correspondent for a Greek Communist paper, and S. Syed Nasan, UN correspondent for a Communist Bombay weekly, both detained by United States immigration authorities.

It is well known that Communists, regardless of their alleged mission or vocation, use every occasion for espionage purposes. The ban on the admission of foreign Communists is also on our statute books; nevertheless, our laws were overruled.

It is interesting to look into the character of the gentleman who has thus assumed the authority to override the laws of this country. Who is Abraham Feller? He is an American who, according to Plain Talk magazine of October 1947, "has been a member of the Committee on International Law of the National Lawyers Guild, which was repudiated as Communist controlled by such liberal attorneys as Frank P. Walch, Morris Ernst, Ferdinand Pecora, and Robert Jackson." According to this magazine, Feller's pro-Russian sympathies are well known to his former associates in Federal agencies.

This is the man who apparently has been given a superauthority above the Congress of the United States on matters vital to our national security.

Where are we heading, gentlemen?

EXTENSION OF REMARKS

Mr. KILBURN asked and was given permission to extend his remarks in the RECORD on the late Honorable Clarence E. Hancock.

Mr. RIEHLMAN asked and was given permission to extend his remarks in the RECORD and include two editorials on the late Honorable Clarence E. Hancock.

THE AIR SUPREMACY ACT

Mr. GOFF. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. GOFF. Mr. Speaker, in view of the report of the President's Air Policy Commission and the prediction that the United States will be in serious danger of atomic attack after December 31, 1952, I again invite your attention to the Air Supremacy Act, H. R. 4527, which was introduced by me on November 20.

The bill would insure a continuing program of national defense which would enable the United States to launch a maximum air offensive immediately the security of the United States is endangered through the overt act or acts of any aggressor nation. It provides for the construction and maintenance of 6,000 additional modern military planes during the fiscal year 1949, and intensified research in the development of aircraft, rockets, guided missiles, atomic weapons, and electronic equipment.

The report of the Commission emphasizes the importance of my bill. Another convincing reason for its immediate enactment is the necessity for protection of any substantial investment in human liberty we may make in restoring the economy of Europe. It would be foolish for us to fatten those countries merely for a Soviet killing. Military experts agree that Russian forces could sweep over Europe in a matter of days. If our aid results in the peaceful curbing of communism in Europe, the only consideration which will deter Russian military aggression then is the knowledge that we have a plentiful supply of atomic bombs on hand with swift means for delivery to Russian soil.

EXTENSION OF REMARKS

Mr. O'HARA asked and was given permission to extend his remarks in the Appendix of the RECORD in three instances and include newspaper editorials.

AN ADDITIONAL BALCONY ON THE SOUTH PORTICO OF THE WHITE HOUSE

Mr. MUHLENBERG. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include an editorial and a letter published in the Evening Star of Washington, D. C.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. MUHLENBERG. Mr. Speaker, as the only active architect in the present Congress it seems to me that it is entirely proper that I say a word or two about the proposal to erect an additional balcony on the south portico of the White House. I am against the idea; and I do believe that bulling it through over the unanimous protest of the Commission of Fine Arts is not proper. It is to be remembered that these public buildings are not the personal property of any tenant; that they are tenants at will of the public only; and that it is not their prerogative to make physical changes to suit personal desires. The President has indicated that he will use maintenance and repair funds for a capital improvement. It is just as illegal for him to do this as it would be for anyone else to switch funds from the specific purpose for which they were authorized to another purpose. But beyond the point of legality comes the question of propriety. The building belongs to the American people. The Commission of Fine Arts is doing its proper duty in objecting, as they have, to changes in the structure that would materially affect the physical appearance, for it is a heritage of the American people, not lightly or casually to be altered at the whim of any tenant. We want our President to be housed in dignity and comfort, but we will view with regret any move that proposes to change the appearance of this building our people have owned and loved for well over a hundred years.

I include in my remarks a letter by Mr. Horace W. Peaslee, Washington architect, active for many years in civic affairs and member of the architects committee on the National Capitol, also an editorial from the Washington Evening Star of Monday, January 12:

SEES FINE ARTS COMMISSION FLOUTED

To the EDITOR OF THE STAR:

May I be permitted the use of your columns to relate the White House balcony controversy to the general question of the part played by the National Commission of Fine Arts in the building of the National Capital?

The Commission had its beginnings in an Executive order by President Theodore Roosevelt issued in 1909, an order revoked by his successor, President Taft, who felt that such an undertaking should have its foundations in legislative authority. This authority was established by act of Congress approved May 17, 1910. It was broadened by successive Executive orders and directives issued by Presidents Taft, Wilson, and Harding, and by supplementary legislation, the Shipstead Act, extending the jurisdiction of the Commission to private holdings fronting various public buildings and parks. Its duties were summarized by the late Charles Moore, Chairman-militant of the Commission, as advising upon "all questions involving matters of art with which the Federal Government is concerned" in the District of Columbia * * * from medals, insignia, and coins, statues, fountains, and monuments; to public buildings and public grounds under Executive administration; and finally to related private undertakings.

The recommendations of the Commission of Fine Arts are not mandatory, but they

carry a great weight of qualified opinion in the field of the arts. Service on the Commission carries no remuneration other than the great honor and distinction of being selected to serve as a guardian of the public interest in the development of the Federal City. The great architects, sculptors, and painters of the past four decades have been glad to give their services to the cause. This service has not been in the form of arbitrary approvals or disapprovals but constructive and helpful criticisms and suggestions to make the most of each opportunity. There have been controversies and disagreements, it is true; but one cannot overlook such major achievements as getting the railroads out of the heart of the city, redeeming the Mall, saving the foreground of Arlington from the scheduled Pentagon development, and establishing high standards in every field of the arts. Nor can one overlook the vision and wisdom of those Executives who have shown their appreciation of the Commission's service by broadening its scope and establishing a tradition of conformance with its recommendations.

With this background, one may consider the question of the balcony. It may be granted that the distinguished architect who was called in for consultation after the project was under way has never done anything in his life which was not good architecture; it may be acknowledged that the present awnings of the portico are inexcusably ugly; it may well be that a balcony is a pleasant place on which to sit; there may be ample precedent for such a treatment in the buildings of Charlottesville or Charleston; the whole thing may be much ado about nothing.

On the other hand, we must take cognizance of the fact that the outstanding representatives of the allied arts, who have been picked to advise us in such matters, are unanimous in their disapproval; that the obnoxious existing awnings can be redesigned at a fraction of the balcony cost; that the precedent for this historic structure is nearer Dublin than Charleston; that the White House is a much sought after place as it stands, even lacking a balcony; that the affair is of great consequence because a matter of principle is at stake * * * the propriety of an executive agency proceeding with such a project, particularly a nonessential project involving one of our most highly regarded historic monuments and the current Chief Executive, in complete disregard for the unanimous adverse opinion of the agency established by preceding Executives to protect such monuments, regardless of pro forma compliance with the letter of the law regarding "submission" of plans.

It may be said that this is something for the Executive to decide, that it is not the business of private individuals or associations. That theory has been thoroughly tested in the past and found wanting. It was not until the turn of the last century that an aroused public opinion checked mediocrity in Capital building and saved the White House from threatened defacement. Once before, in the present administration, it has had to do the same job over again. It is unusual, to say the least, to start such needless controversies in election years. The professions have a right to raise voices of protest by virtue of the service they have given in the past and the need of obtaining recognition for the recommendations of their Supreme Court if that body is to have future value to the Nation.

HORACE W. PEASLEE.

IN TERMS OF AN OLD LEGACY

There is sentimental as well as a very practical appropriateness in the resolution adopted by the executive committee of the Washington chapter of the American Institute of Architects on the White House balcony controversy.

The committee disapproves as a matter of principle any action by the President or any Government agency tending to ignore recommendations of the Commission of Fine Arts. The Commission has unanimously disapproved the balcony, to be added to the south portico, because it permanently changes the south facade of an historic structure.

Before he left office the late Theodore Roosevelt wrote to the then president of the American Institute of Architects a letter in which he said that—

"If I had it in my power as I leave office, I would like to leave as a legacy to * * * the American Institute of Architects the duty of preserving a perpetual eye of guardianship over the White House to see that it is kept unmarred and unchanged from this time on."

The Washington chapter has lived up to the spirit of that trust and more than once has added its influential voice in protest over unwise changes in the White House. Since the first Roosevelt's day, subsequent Presidents strengthened the hand of the Fine Arts Commission, as discussed in Horace Peaslee's letter today, in guarding against the sometimes whimsical desires of White House tenants.

It is difficult to believe that the President, on careful consideration of the implications of such a decision on his part, will ignore the recommendations of the Fine Arts Commission and proceed to make a change in White House architecture in the very year which is to determine his own continued occupancy of the mansion.

EXTENSION OF REMARKS

Mr. STRATTON asked and was given permission to extend his remarks in the RECORD and include an article appearing in the Chicago Daily News.

Mr. SNYDER asked and was given permission to extend his remarks in the RECORD.

Mr. LEFEVRE asked and was given permission to extend his remarks in the RECORD and include an article by Elmo Roper.

Mr. TOWE asked and was given permission to extend his remarks in the RECORD and include an editorial by William Schulman.

Mr. BRADLEY asked and was given permission to extend his remarks in the RECORD and include extracts from a letter by the Chief of Transportation of the Army.

Mr. HOFFMAN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD in two instances.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. JAVITS asked and was given permission to extend his remarks in the RECORD and include an article.

Mr. TIBBOTT. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include arguments for and against Federal aid to education by M. Vashti Burr, deputy attorney general of Pennsylvania. I am informed by the Public Printer that this will exceed two pages of the RECORD and will cost $165.67, but I ask that it be printed notwithstanding that fact.

The SPEAKER. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

UNITED STATES MERCHANT MARINE

Mr. BRADLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BRADLEY. Mr. Speaker, on several instances during the last session, I had occasion to mention, on the floor of this House, the status of oceangoing ships owned by the Maritime Commission, but operated by the Army, insofar as safety-at-sea requirements were concerned.

I criticized certain conditions then existing and called for compliance with the laws of the United States. The Army responded in a most agreeable manner stating that the unsatisfactory conditions noted were a part of the aftermath of war and that they would be corrected as soon as possible.

I am now pleased to state that the Army has done, and is doing, an outstanding job at bringing these ships, as well as all of its own public vessels, into conformity with the safety-at-sea laws and requirements. I note with special satisfaction that the three great hospital ships of the ZC–2 class, which are all named in honor of enlisted men rather than for officers, have been completely converted for Army use and for safety at sea. I note also that six of the big P–2 class transports—ships which are the military counterparts of the magnificent new American President liner *President Cleveland*, now on its maiden voyage in the Pacific—are in yards undergoing conversion for peacetime passenger-transport service.

In regard to cargo craft, the Army is progressing so rapidly that it is expected that all such vessels will be certificated by the Coast Guard not later than March 31, 1948, in the same manner as our commercially operated and privately owned vessels of similar types.

Complete information regarding the status of each Army ship is being entered in the Appendix of the RECORD for the benefit of those who seek more details.

I believe the Army Transport Service and the Chief of Transportation, Maj. Gen. Edmond H. Leavey, are deserving of commendation and of this recognition of work well done—of accomplishments which will make travel safer for every American who takes passage in an Army ship.

TAKE IT OR LEAVE IT

Mr. HOFFMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute on the subject of Take It or Leave It, and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN. Mr. Speaker, appearing before a Senate committee, Secretary of State, General Marshall, referring to the plan which bears his name, told the committee that we should, and I quote, "either undertake to meet the requirements of the problem or don't undertake it at all."

He spoke in the typically militaristic manner, as though he were giving an

order, forgetting that he was Secretary of State and not a general giving orders to a buck private. In effect, he told the American people to take it or leave it.

He described the world situation as critical and extreme. He told us that our national safety and way of life were in the balance—that, if we did not take the Marshall plan as written, the alternative was to get ready for World War III. Acceptance of the Marshall plan "as is" is not the only alternative to war.

General Marshall may be a great general, but the record carries no evidence that his opinions are infallible when the issue is our ability to produce or the volume of our national resources which can be sent abroad without weakening our national defense, impairing our economic welfare.

Assuming that he is a great general, all are not disposed to accept his statements as to the absolute necessity of giving to foreign nations within the 15 months beginning April 1, $6,800,000,000; within the next 4 years, $17,000,000,000.

Some just cannot forget his inability to remember where he was the evening of December 7, 1941, when the Japs attacked Pearl Harbor.

If, with all the information of the Army, the Navy, the State Department, and the Secret Service at his command, he did not know the Japs were about to attack, did not know where he was when they hit us, why should we unquestioningly accept his opinion as to what we must now do to be saved?

For the last 13 years we have been hearing from the "one-worlders" that this country of ours was so weak, so lacking in all of the elements that make for national strength, that, if we did not do this, that, or the other—always spending, discarding the old, established, efficient ways, trying new experiments, we were, as a nation, on the road to oblivion.

Then President Roosevelt frightened us into believing that, if we did not get into World War II without delay, Hitler's bombers would be blasting St. Louis, Kansas City, Detroit, Chicago, and all the industrial cities of the Midwest—that to exist we must fight another war, make the world safe for democracy.

The internationalists, the one-world advocates, have been shaping our foreign policy for the past 15 years. What is the result? Their foreign policy has gotten us into two wars. You figure out our benefit from those two wars.

We have a national debt on which the interest alone is $5,500,000,000 per year. We have shipped so much of our natural resources, given so many of our dollars abroad, that today prices are "out of sight." We have inflation. The average American finds it extremely difficult to buy items which he has always considered necessities.

If we must take the Marshall plan "as is"—that is, "take it or leave it"—we will be wise to reject it. It means less fuel oil, gasoline, food, fewer homes, less of everything we need. It means the destruction of our way of life, a dangerous weakening of our ability to defend ourselves. It means that we will be compelled to cut benefit payments to veterans; to cut out much of our domestic program which is necessary for our own well-being.

The expenditure of a fraction of the amount the Marshall plan proponents insist we must give to Europe could and should be used to strengthen our national defense.

Sure, help feed the hungry, clothe the naked, and, as ability permits, help other countries. But first, by all means, look after our own people, take the measures, spend the money necessary, for our own national security. One hundred forty-four million people cannot, and they should not be asked to, assume responsibility for the rest of the world. There just isn't enough to do all of the things the administration proposes to do. We must make a choice. I think we should first choose to follow the policies which will serve our own national welfare best.

PRESIDENT'S BUDGET MESSAGE

Mr. POTTS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POTTS. Mr. Speaker, the President in his budget message said:

> Since last fall the number of dwelling units built has been greater than in any comparable period in our history. But, many families most in need of housing, particularly veterans, cannot afford to pay present high prices.

But the President wants present high prices to stay with us. He said in the same message that his estimate of national income assumed stable prices close to the present level. It follows that the President cannot want present high prices to come down and that therefore he merely pays lip service to the concern of veterans for housing at reasonable prices.

WHERE ARE YOU GOING TO GET THE MONEY?

Mr. RICH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RICH. Mr. Speaker, since we are not going to meet again until Monday, I call your attention to something that is vital to the welfare of this country. It worries me greatly. I want every Member of Congress to think it over, unless you have the answer now and can give it to me. It is this: With a $258,000,000,000 debt, with the President asking for $39,700,000,000 to run this country, with several proposals such as socialized medicine, that would require $500,000,000, the first year, Federal aid to schools $500,000,000, and universal military training that will require $3,000,000,000. The President said nothing of economy in government. The President and many Members of Congress are asking additional sums of money, for this and that, and with the people of this country clamoring for tax reduction, I want some Member of this House to tell me now where are you going to get the money to run this Government? If you do not have the answer now, I will try to call it to your attention again, if nothing happens to me. I think it is something that ought to be considered by every Member of Congress, and have it driven home. It is all important to our welfare, to our stability. A drop of water falling on a rock will soon wear it away, and I expect to ask you the question as long as I am here and as long as it is so important to our existence: Where are you going to get the money?

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. RICH. Has the gentleman got the answer?

Mr. RANKIN. Yes. I have been trying to tell you Republicans for the last few weeks that if we do not take back the right of the Congress to "coin money and regulate the value thereof," and stop the Federal Reserve System from inflating the currency, you will never be able to control the situation.

Mr. RICH. You have been coining and printing money. The Democratic administration started to print money when it came in here 15 years ago, and you have been printing it until it is just like paper. It will soon be worth nothing. We must annul many of the laws the Democrats passed the past 15 years, and the quicker we do it the better. It has been going on too long. Let the people elect a Republican President, and I guarantee you we will do just that—repeal a lot of laws to undo the wrong to America.

EXTENSION OF REMARKS

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD and include an editorial by Philip H. Parrish.

Mr. KEATING asked and was given permission to extend his remarks in the RECORD and include an editorial from the Washington Post.

Mr. RIVERS asked and was given permission to extend his remarks in the RECORD and include an address by Rear Adm. J. L. Holloway, Superintendent of the Naval Academy at Annapolis.

AMENDMENT OF PHILIPPINE REHABILITATION ACT OF 1946

Mr. JUDD submittted a conference report and statement on the bill (S. 1020) to amend the Philippine Rehabilitation Act of 1946, as amended.

DISCHARGE PETITION NO. 12

Mr. RIVERS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS. Mr. Speaker, it is heartening to see the Republicans getting ready to join me on my oleomargarine

bill. I call the attention of my friend from Kansas, the chairman of the Committee on Agriculture, to the fact that I understand there is in Washington at this time a large group of gentlemen representing the soybean group of the Middle West. They have seer some very important Republicans and that they are about to issue a statement on the bill, not the one introduced by me but a bill introduced by somebody who copied my bill 6 years after I introduced my first one. However, I am glad to have you join up with me even though you introduced your bill long after I introduced mine. We are all walking along the same street, and I am glad to have you with me. I understand the announcement will be made next week. Join up with us and let us take off this unconstitutional, unreasonable, and unpalatable tax of 15 cents on oleomargarine. You do not get Bang's disease from oleomargarine, you do not get tuberculosis from oleomargarine, all you get is a 15-cent tax. Oleomargarine has more vitamins and it has more calories than butter, and it is much more available. So join up early.

EXTENSION OF REMARKS

Mr. ELAND asked and was given permission to extend his remarks in the Appendix of the RECORD and include therein an article on some problems of the United States Merchant Marine by Mr. Frazer Bailey, president of the National Federation of American Shipping.

Mr. MANASCO asked and was given permission to extend the remarks he intends to make in Committee of the Whole today and include some letters.

Mr. BONNER asked and was given permission to extend his remarks in the RECORD and include two editorials from the News and Observer, Raleigh, N. C., edited by Hon. Josephus Daniels, Secretary of the Navy during the First World War, the subject being world government.

Mr. SOMERS asked and was given permission to extend his remarks in the RECORD.

Mr. FULTON asked and was given permission to extent his remarks in the RECORD in two instances and to include an address by Hon. John Hilldring, of the National United Jewish Appeal Conference, Atlantic City, N. J., December 13, 1947, and an address by Gen. Joseph T. McNarney at the same conference.

Mr. COUDERT asked and was given permission to extend his remarks in the RECORD in three separate instances and to include some newspaper material.

Mr. McGARVEY asked and was given permission to extend his remarks in the RECORD and include a statement by John Frey, president of the metal trades department of the American Federation of Labor.

Mr. HOPE asked and was given permission to extend his remarks in the RECORD and include copies of a resolution adopted at the recent annual meeting of the National Association of Farmers.

Mr. FOGARTY asked and was given permission to extend his remarks in the RECORD and include a statement by Richard Grey, president of the building and construction trades department of the American Federation of Labor, before the Joint Committee on Housing of the Congress of the United States yesterday morning.

PERMISSION TO ADDRESS THE HOUSE

Mr. FOGARTY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

[Mr. FOGARTY addressed the House. His remarks appear in the Appendix.]

EXTENSION OF REMARKS

Mr. KLEIN asked and was given permission to extend his remarks in the Appendix of the RECORD and include a statement of the union's position on the GSI strike.

THE PALESTINE SITUATION—THREAT OF ANOTHER WORLD WAR

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, I desire to join the gentleman from Michigan [Mr. DONDERO] in what he said about this international Sanhedrin up here in New York, shown as the United Nations, attempting to subordinate the United States to its domination.

I also want to remind you that the mothers and fathers and the servicemen of this Nation who just fought two wars in the last 30 years do not want that outfit dragging us into a race war in Palestine.

I am speaking now for the real Americans.

They have no right to drag us into a race war in Palestine. They have no more right to go in there and set up a racial state in Palestine than they have to set up an Indian state in Ohio or Pennsylvania or to set up a Negro state in Virginia, Texas, or Mississippi.

It is about time that the American people were given to understand that we are not going to let this Zionist group, this branch of the Communist movement, drag us into another world war to sacrifice 1,000,000 or 2,000,000 or probably 5,000,000 American boys.

Since the gentleman from New York [Mr. CELLER] continues to insist on our following a policy which would probably lead us into a race war in Palestine and line up the whole Moslem world against us, I want to quote the words of a great American Jew, Mr. Benjamin H. Freedman, of New York, who bitterly opposes this entire movement for the partition of Palestine.

In a recent letter published by the National Economic Council, Inc., of New York, Mr. Freedman said, in part:

GENTLEMEN: I write you with respect to the so-called Palestine question.

The threat of political Zionism to the welfare and security of America is little realized. It is a dangerous mistake to think of it as a localized, Arab-Jewish struggle. There may soon take place in Palestine an explosion that will set off another world war. Every American citizen, every head of a family, all members of Christian churches, every non-Zionist Jew, should be brought to understand that the consequences can be fatally disastrous.

* * * * *

It has always been a cardinal principle of American policy that all civilized peoples have a right to enjoy their own freedom. Limitation of immigration into any country by those who already live there is one of the basic rights belonging to any people. No self-respecting people will hesitate to resist forced immigration of aliens into their borders. The United States would never permit Soviet Russia to compel us to admit Japanese immigrants and to give them the choicest parts of the Pacific coast.

* * * * *

The slavery question resulted in the American Civil War. But such a question will be dwarfed by comparison with the issue whether Americans of the Christian faith should be sent to Moslem lands for the purpose of forcing upon the unwilling inhabitants the establishment of a national Jewish state. What if in such a war the newspapers of the United States begin printing casualty lists of American soldiers, Christians killed in Palestine to satisfy Zionist aspirations? Has anybody had sufficient foresight to understand what this may mean to the Jews of America, Zionist and non-Zionist alike? Doubtless the Jews in Palestine would be massacred to the last man, woman, and child.

But what of the Jews in America? Americans do not want another world war; if another should come in which the cause could be laid at the door of the Jew, who knows how popular resentment might break out against a whole people? Have the political Zionists stopped to consider that? Anti-Semitism is bad enough already in America. But if Zionist should push us into war for a Jewish Palestine, what will come will be to the present anti-Jewish sentiment as a hurricane is to a zephyr. If the majority non-Zionist Jews could only be brought to realize the disaster political Zionism is preparing for all Jews, and if they had the courage to act, they could break its power in a week. But they will not do this because they are afraid of being branded as "anti-Semitic Jews."

Popular ignorance of the real basis of political Zionism is beyond calculation. Vaguely most Christian Americans have the idea that the Jews claim Palestine because it was the Promised Land in which they lived for a period of a few centuries that ended 2,000 years ago. And the thought of a people returning to its homeland seems emotionally satisfying and good.

But here are facts most Americans do not know:

Political Zionism is almost exclusively a movement by the Jews of Europe. But these eastern Eurcpean Jews have neither a racial nor a historic connection with Palestine. Their ancestors were not inhabitants of the Promised Land. They are the direct descendants of the people of the Khazar Kingdom, which existed until the twelfth century.

The Khazars were a non-Semitic, Turko-Finn, Mongolian tribal people who, about the first century A. D., emigrated from middle Asia to eastern Europe. There they created one of the largest kingdoms of their time. At its greatest extent it covered an area of about 800,000 square miles. About the seventh century A. D., the King of the Khazars adopted Judaism as the state religion, and the majority of inhabitants joined him in the new allegiance. Before that date there was no such thing as a Khazar who was a Jew. Neither then nor since was there such a thing as a Khazar whose ancestors had come from the Holy Land. The Semitic peo-

ple, who established Judaism in Palestine many centuries before the Khazars became converts to the Hebrew faith, did mostly emigrate from Palestine. But none of them emigrated to the Khazar Kingdom far to the north.

* * * These eastern European, Yiddish-speaking Jews have no historic or racial connection with Palestine, or, for that matter, with the other Jews who existed in other countries for thousands of years prior to the Khazar conversion.

At best, the cry of truly Palestinian-descended Jews for a return of the homeland would be highly dubious. What right have peoples whose ancestors departed nearly 2,000 years ago to claim territory in which the present inhabitants have lived for 1,300 years? If the Indians should demand America back, would we all pack up and return to the lands of our ancestral origins? Yet the Arabs have been in Palestine a 1,000 years longer than we have been here. And if the claim of Palestinian-descended Jews is so dubious, what of the claim of Khazar-descended Jews? Would a single Christian support their trek back to the homeland or want to oblige them by expelling the Arabs, if it were known that these eastern European, Yiddish-speaking Jews, who form the Zionist group practically in toto, have neither a geographic, historic, nor ethnic connection with either the Jews of the Old Testament or the land known today as Palestine?

If the Jewish claim to Palestine is stated on the only other remaining ground, the religious, it may be summarily and finally replied that religiously both Christians and Moslems also have religious roots there. The reason it is called the Holy Land today is because Jesus of Nazareth lived and died there. To Christians he is the Son of God and Saviour. To Mohammedans he is a great prophet. To official Jewry, he is an executed blasphemer.

The ability of Zionists to have things their way stems from the organized pressure they can bring upon people who do not agree with them. By holding the threat of being called anti-Semitic over men engaged in public or business life, they have been able to stifle opposition—even among American Jews such as the writer, who have no interest in forming a Jewish state and wish only to live and die as good Americans.

It will take courage for Americans of whatever origin to think these facts through and take public positions upon them. They will be smeared. They will be slandered. Already Zionists have been able to bring about the economic ruin of many Christians and Jews who have dared challenge their right to claim Palestine for a national Jewish state.

But America and American Christianity stand at a crossroad. The majority must decide whether it will longer submit to being the tool of a small but ruthless and unscrupulous minority of a minority people. The great majority of American Jews also must choose. Will we all acquiesce in the program of political Zionism? Will we follow it out to its inescapable consequences?

If we do, we shall be walking the road to ruin.

Sincerely yours,

BENJAMIN H. FREEDMAN.

PALESTINE

Mr. CELLER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York [Mr. CELLER]?

There was no objection.

Mr. CELLER. Mr. Speaker, the gentleman from Mississippi as usual speaks from a wealth of lack of information on the subject. There is no intention to set up in Palestine or in the Middle East a theocratic government. The Jewish state in Palestine is not to be a religious state, and if he would read—and he who runs may read—he will readily perceive that there is not any idea of setting up a theocracy by the Jews in Palestine.

Beyond that he makes an aspersion upon those who, with great intrepidity and great wisdom, pioneered to set up that state, that they are inclined to be Communists or are Communists. That is a damnable statement to make.

Mr. RANKIN. Mr. Speaker, I demand that those words be taken down.

The SPEAKER. The gentleman will suspend.

The gentleman from New York will take his seat.

The Clerk will report the words objected to.

The Clerk read as follows:

By Mr. CELLER. That is a damnable statement to make.

The SPEAKER. The gentleman from Mississippi objects to the word "damnable"; is that it?

Mr. RANKIN. Yes; as used, it is a violation of the rules of the House and of all rules of common decency.

Mr. CELLER. Mr. Speaker, may I be heard?

The SPEAKER. This is not debatable. The Chair will pass on the question.

The Chair is not too conversant with the word "damnable" but does not find that it is banned in the rules of parliamentary procedure. The Chair thinks it is a rather harsh word.

The Chair hopes that the Members will not take this as a precedent for using the word on too many occasions.

Mr. CELLER. May I continue, Mr. Speaker? My 1 minute had not expired.

The SPEAKER. The gentleman's 1 minute had already expired.

Mr. CELLER. Under leave to extend, I emphatically deny that the Palestine Jews are Communists. They abominate communism. Many of those who made the trek to Palestine did so to avoid and to escape communism. There is and will be in the proposed Jewish state uttermost freedom of religion. Examine the reports of its suggested constitution. In the main it is patterned after our own Constitution. It would enshroud the nationals of Palestine, Jews and Arabs alike, with the precious gift of our Bill of Rights—with freedom of speech, press, religion, peaceful assembly, with trial by jury, confrontation of witness for anyone accused, the right of petition, and the writ of habeas corpus. All these rights are foreign to communism and would hardly be found in Russia. The Jews in Palestine will set up a republic where, like our own, private capital and private initiative and enterprise will prevail.

EXTENSION OF REMARKS

Mr. FEIGHAN asked and was given permission to extend his remarks in the Appendix of the RECORD and include a letter.

AMENDMENT TO ARTICLES OF WAR

Mr. ELSTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 2575) to amend the Articles of War to improve the administration of military justice, to provide for more effective appellate review, to insure the equalization of sentences, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 2575, amending the Articles of War, with Mr. CANFIELD in the chair.

The Clerk read the title of the bill.

Mr. FULTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FULTON: On page 19, line 2, after the period insert a new paragraph, as follows:

"(d) There shall be strict equality of treatment in the confinement of officers and enlisted personnel awaiting trial and in the sentence, confinement, and punishment after sentence. No privileges or exemption from punishment or routine shall be granted to officers under confinement that are not granted equally to enlisted men under confinement."

Mr. FULTON. Mr. Chairman, this amendment is to be placed in the bill on page 19 at line 2. The purpose of the amendment is to make sure that under the military law of the United States governing the Army there shall be no possible variation from equal treatment as between officers and men. This amendment is so drawn that when they are confined prior to trial they shall be treated equally, that in the sentencing they shall be treated equally, and that in the confinement after trial they shall be treated equally.

You ask me whether I feel this is necessary under the law; and my answer is that I have seen it otherwise. I have visited Army camps in Europe where men were awaiting trial. In one of the camps I found three officers who were quartered in a very nice tent, a large tent, with a bed for each officer and as many blankets as he wanted, and a separate desk for each officer. They also had a fine floor under them. Then I went over and looked at the enlisted men who were confined there awaiting trial. I found that they had no shelter during the day and that at night they had but a pup tent for two men. I found further that they had no beds. They were required to sleep on a hard wooden floor. I found further that the hard wooden floor was of boards that the boards had curled so that I could put my hand between the boards, my whole four fingers. I talked with these enlisted men and asked them whether they had enough covers. This was in Italy in the fall. They said that they had only two blankets each and that they were cold. That was not the case with the officers.

If special privilege is to be given to officers I think the public wants the law so changed that the practice shall be stopped. It was not the case of just one officer but it has been the case with many, many officers.

I am not a former enlisted man talking, but an officer from World War II. In military justice I want Benny Meyers treated just as young Jimmy Jones from my district was treated when he went a. w. o. l. for 8 days beginning Christmas night in 1945. He was accused of some things and yet after 3 years in combat in Italy, although only 21 years old, he was sentenced to 30 years at hard labor after being held 7 months by the Army admittedly without a trial. Perhaps Benny Meyers will not get that, but, believe you me, as a former serviceman of World War II, I am going to see that whatever treatment is given is meted out equally as to officers and enlisted men.

We have never had this provision in the law but it is about time we did have it.

I yield for a question to the committee if they desire to ask any. If not I have a question or two I should like to ask about the bill generally.

Mr. ELSTON. I shall be glad to try to answer any question the gentleman would care to propound. I may say to the distinguished gentleman from Pennsylvania that I expect to oppose his amendment when the gentleman has completed his remarks.

Mr. FULTON. Mr. Chairman, I would like to bring up another question before the committee. When I was in Europe I went to Nuremberg and saw there Army and Navy officers trying enemy prisoners under what might be called the law of nations. Those trials involve, peculiarly, only enemy nationals and enemy prisoners of war. There are none being tried who are United States citizens. But how does that law of nations that we are trying people under in Germany today fit in with your law of military justice before us here today? Suppose that someone should ask for one of our men to be delivered up to this same tribunal.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. FULTON. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes on this general subject.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FULTON. Mr. Chairman, suppose that Russia should ask that one of the officers in our Army or Navy be delivered up to this international tribunal for trial under the law of nations for a crime with which we disagree. May I ask the committee, how does this bill cover that? Does it cover it at all and if it does not should we not have some legislation that tells our men just what their liabilities are and who shall try them if they are guilty under this new law covering what might be called a crime against nations?

Mr. ELSTON. I may say to the gentleman from Pennsylvania that we are not seeking in this bill to deal with international law. This bill deals solely with military justice; that is, with the administration of justice within our own Army. In response to the gentleman's question as to whether or not we would turn one of our soldiers over to Russia if Russia made a demand of that kind, I know of no law that would authorize it and if such a request were made I am sure it would be turned down in no uncertain terms. The reason we are trying some of the war criminals of Germany is because we defeated that nation. Her war criminals were not turned over to us. They were arrested by American soldiers and were placed on trial under international law.

Mr. FULTON. Could I sum it up, then, by saying that at the present time it is the intent of the Congress, as evidenced by the gentleman's committee and by those present, that there shall be no United States serviceman turned over to any tribunal for charge under what might be called a war-crime law?

Mr. KILDAY. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from Texas.

Mr. KILDAY. I do not believe the question the gentleman propounds has any connection with the administration of military justice but comes within the general power of the Army to administer its own affairs. The only thing comparable to that I can imagine is the thing that occurs so frequently here in the United States, where local civilian authorities contend that a member of the armed forces is guilty of a violation of the civil law. Then the military commander may in his discretion deliver the man to the civil authorities for trial, or refuse to do so, as he may see fit. Sometimes they will do one, sometimes the other. That is not a matter in any wise connected with military justice but one having to do with the authority of the military command.

Mr. FULTON. In the gentleman's view it is in the discretion of the military commander under the supervision of the Commander in Chief, the President?

Mr. KILDAY. That is correct. Very frequently the Army authorities refuse to deliver the men to the civil authorities in the United States.

Mr. FULTON. May I ask the committee what measures are being taken by the Army or by the committee to see that the practice does not continue of inflicting these very high penalties, for example, 20, 30, 40, 50, or 60 years or life at hard labor, then they come along later and cut the sentences down to what they should have been in the first place.

For example, you will all recall about the poor unfortunate serviceman who was in a draft camp down here in the South who, because he would not obey an officer at one time on a small matter, was sentenced to death, and then within a period of about 6 months the sentence was reduced to 5 years. When is that practice going to cease and what is being done to eliminate it so, in the first instance, Army courts martial will give a sentence that is roughly equivalent to the crime involved?

Mr. ELSTON. I am sure the gentleman appreciates that it would be unwise to have a fixed penalty for every offense, since the circumstances are not the same in every case.

Mr. FULTON. I agree to that.

Mr. ELSTON. The gentleman, I am sure, can appreciate that there are times when more severe penalties are warranted than at other times; for example, when an organization is engaged in battle it may be necessary that more severe penalties may be inflicted.

The CHAIRMAN. The time of the gentleman from Pennsylvania has again expired.

Mr. FULTON. Mr. Chairman, may I comment and say because I have been restricted on the debate, I had asked the committee for extra time to discuss some of these general things to save amendments.

Mr. ELSTON. Mr. Chairman, I ask unanimous consent that the gentleman be given five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. ELSTON. We have endeavored in the drafting of this measure to equalize justice so far as it can be done. With this in mind, we have set up the board of review and the judicial council. Such council has complete authority to equalize sentences. I believe that that will take care of the matter. We, in our committee, gave a great deal of study to the question and came to the conclusion that that was the best way in which to solve the problem. It would be utterly impossible to fix definite penalties, because circumstances in one case might warrant a sentence of 6 months, whereas in another it might warrant a sentence of 5 years, although both offenders were charged with the same crime.

Mr. FULTON. May I ask the gentleman this? As far as your experience is concerned then, at the present time the Army is not now engaging in the practice, is it, of giving very severe sentences, and then later cutting them down?

Mr. ELSTON. No; I do not think they are doing it now; at least not to the same extent. I think most inequalities of sentence came about because we were at war. Of course, if sentences are still out of line, the Army can correct them.

Mr. FULTON. May I ask another question on a particular case that occurred during the war? I want to know just how far enemy aliens, enemy nationals, and also prisoners of war or enemies of the armed forces can testify in American courts martial against American servicemen. May I point out to you one case? There was an instance of a Navy court martial where the captain of an American ship had testify against him the commander of a Japanese submarine when the charge against the American Navy captain was simply one of negligence. It involved no moral turpitude and it involved no intent. Is there any limit on the power of these witnesses who are enemy nationals, enemy aliens, enemy prisoners of war, or enemy servicemen in testifying against American servicemen?

Mr. ELSTON. I will say to the gentleman there is nothing in the law that precludes the calling of any witnesses. The court is the judge of the credibility of the witnesses. If the witness is not a credible witness and the court does not see fit to give his testimony any faith

or credit, the court may reject it in its entirety. But I am sure the gentleman can appreciate that there might be some instances in which an injustice might be done if enemy aliens or prisoners of war could not be called as witnesses. Such persons may have witnessed the commission of a crime. The accused himself might want to call them as witnesses on his behalf. So, I am sure the gentleman can appreciate that we have to handle the matter just as it is handled in civil cases, namely, allow anybody to be called as a witness, but let the court determine how much faith and how much credit shall be given to his testimony.

Mr. KILDAY. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from Texas.

Mr. KILDAY. May I say to the gentleman that I think the conduct of the Trial Judge Advocate in calling the Japanese commander who had sunk the ship of the American commander was most reprehensible. I think the Navy Department agreed by the action it took in disapproving the sentence meted out to the American commander and immediately restoring him to duty.

However, I agree with the gentleman from Ohio that in the very nature of things you cannot disqualify people as witnesses. Cases have been brought to my attention where American soldiers have been convicted of murdering German civilians, and of course the witnesses were German civilians. The men should have been tried, and were properly tried, and the evidence against them by the aliens was entirely proper. In my State at one time no person who had ever been convicted of a felony or who had been pardoned could testify. It reached the point where we had to pass remedial legislation, because so many persons were called as witnesses who were thereby disqualified. I do not think we would be justified in disqualifying any witness.

Mr. FULTON. I agree with the gentleman that in cases of negligence in the performance of duty it is not a proper method of trial to call the commander of the submarine that sank an American officer's ship, in order to prove that he did not take proper evasive tactics.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from West Virginia.

Mr. SNYDER. I am interested in the gentleman's amendment. As I understand it, it would provide that all officers and all enlisted men be treated exactly alike pending trial. Is that true?

Mr. FULTON. It provides that whatever privileges are given to officers shall likewise be given to enlisted men that are in confinement awaiting trial. If the officer is just confined to his room but not in confinement, that is different. If the enlisted man is in his quarters, restricted but not subject to confinement, that is different. But when I saw in a camp this summer that enlisted men were deprived of beds and forced to sleep on the floor while officers were not only given beds but tables, and when I saw the privileges officers had as compared to the enlisted men, it certainly made me want to see that the same treatment was given to each. That is all this amendment does.

Mr. ELSTON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I am sure we all appreciate that we do not want officers to be treated in any different manner than enlisted men if their offense is the same. We have given a lot of consideration to this question in our committee. We have placed three provisions in this bill in which we attempt to equalize sentences, punishment, confinement, and the like. For example, we have now provided that officers may be tried by a special court martial. Heretofore they could be tried only by a general court martial. In the past there has been a reluctance on the part of commanding officers in many cases to file charges against officers because it would result in a general court-martial trial. Now officers may be tried by a special court martial the same as enlisted men.

We have also made it possible for an officer to forfeit two-thirds of his pay for 3 months. Heretofore it could be done for only 1 month.

We have also made it possible for an officer to be reduced to the grade of private regardless of what his rank might be.

The matter of confinement, the place they will be confined, and the manner in which they will be confined, I submit is an administrative function. It would be very difficult to legislate as to the kind of a place in which accused persons should be confined and as to the exact treatment they should receive. Such things must largely be left to the discretion of commanding officers. In view of the criticism that has already taken place, I believe that conditions have greatly improved.

If this measure passes with the provisions in it to which I have referred, there should no longer be any criticism about any discrimination between officers and enlisted men as far as trials and punishment are concerned.

Mr. BURLESON. Mr. Chairman, I offer an amendment which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. BURLESON: On page 16, line 16, place a period after the words "court martial" and strike out the remainder of the paragraph and substitute the following: "In all other cases tried before a general court martial, the verdict shall be by the concurrence of three-fourths of all the members of the court."

Mr. BURLESON. Mr. Chairman, after the proceedings yesterday, I would like to make this statement for the record—that it has not and is not my intention in offering numerous amendments, to place cumbersome technicalities around this bill or the administration of military justice, but simply to clarify the situation and to make error less likely and to spell out word for word that there shall not be speculation in arriving at a just verdict in court-martial proceedings. The amendment I now offer proposes to strike out language from the bill as it now reads which deals with verdicts in cases which may result in a sentence of death. Can you imagine that the concurrence of an entire court-martial board shall not be had when the death sentence is involved?

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. KEATING. Suppose one of the members of the court was taken seriously ill. Would not the gentleman's amendment prevent any decision at all in such a case?

Mr. BURLESON. It would in cases where the death penalty is involved.

Mr. KEATING. And the gentleman feels that in such cases there should be what we call a mistrial and a new trial would have to be held?

Mr. BURLESON. That is right. This is a serious matter.

Mr. RAINS. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Alabama.

Mr. RAINS. Is it not a fact that in the civil courts in the event one juror is taken seriously ill a mistrial is declared and the court is compelled to reconvene, and is it not also proper that justice should be so carried out in a military court?

Mr. BURLESON. Certainly. I think in some places an extra juror is provided. In most jurisdictions the unanimous concurrence of the jurors is required to return a verdict.

Mr. ROBSION. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. ROBSION. Is it not true that in criminal cases in nearly all the States a unanimous verdict is required?

Mr. BURLESON. I will say to the gentleman that it is true in all those jurisdictions with which I am familiar.

Mr. ROBSION. Now when the gentleman proposes that this provision shall apply to certain cases, does he mean cases where the death penalty may be imposed or is actually imposed?

Mr. BURLESON. I mean where the death penalty may be imposed as provided by law.

Mr. ROBSION. That is, where the judgment might result in the death of the accused?

Mr. BURLESON. That is right.

My amendment goes further and strikes out the entire paragraph after line 16 on page 16 and provides that in all other cases three-fourths of the members shall concur in returning any type of verdict. That certainly seems liberal and reasonable to me. At the present time it must be unanimous in cases of the death penalty and then provides for a three-fourths member vote for sentences of 10 years or more and less than a 10-year sentence only two-thirds of those present at the time the vote is taken is required. It seems to me it is very reasonable that we should have three-fourths of the members of a court-martial board concurring in returning any type of verdict because this deals with the very life and liberty and future of boys who are charged with crime.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. FULTON. I had an amendment along this same line which would require

the unanimous vote of those participating in the court martial in a case where a death sentence was possible. I too feel that it is necessary to have the unanimous vote of those participating because when somebody decides that he is not in favor of the death penalty he will just stay away if he is a member of the court martial.

Mr. BURLESON. I can very well conceive of that thing happening.

Mr. FULTON. So I had inserted in my amendment the words "participating at the trial" in line 16, which removes the objection raised by the gentleman from New York. So if you have the concurrence of all members of the court martial participating at the trial, I would ask the gentleman if he would not accept that as an addition to his amendment.

Mr. BURLESON. I would want to better understand the gentleman's idea. It is provided that as few as five may constitute a court martial. In that case I can conceive of two or three of those individuals being incapacitated, or, because of some circumstance, not being present. If the wording I suggest is adopted all doubt will be removed. Otherwise there will be no verdict returned at all. If they are members of that board they will be participating. I think we have the same idea.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BURLESON] has expired.

Mr. KILDAY. Mr. Chairman, I rise in opposition to the amendment, and I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. KILDAY. Mr. Chairman, the question raised by the gentleman from Texas [Mr. BURLESON] is more apparent than real. The court cannot sit unless five members are present. Unless there is a quorum present the court cannot sit. Five is the minimum for a general court martial.

I say it is more apparent than real, because the convening authority has the right to constitute a court of any number he may see fit, provided it is not less than five. So that under the entire system of the courts martial the most members of a court that a man could expect would be five, because the convening authority could limit it to five, and the court could not sit unless five were present.

I might say also with reference to the three-fourths concurrence in other sentences, that the provision contained in the present bill is an exact copy of the Articles of War as it has existed for many, many years. I know of no instance in which there has been complaint as to the concurrence of all for the death penalty. I cannot imagine an officer in the Army who would stay away from a court because he was opposed to the death penalty. If a man is of that caliber he is certainly in the wrong place. I cannot imagine a man of intelligence and principle, who felt that death should not be given in certain circumstances, who would sidestep his duty by not attending the court. I can see where a man who did not want to impose the death penalty might stay away.

Mr. NORBLAD. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield.

Mr. NORBLAD. If an officer stayed away he would be violating his orders and would be subject to court martial himself, would he not?

Mr. KILDAY. Of course. We are dealing with extraordinary times. This is not only for peacetime or for wartime but it is for all time. When we get into a court martial during a war, it might very well be that a member of the court would have to go forward with his men. But as I say, the concurrence of all in death penalty cases and the concurrence of two-thirds or three-quarters has been the law for many, many years. That is not one of the things I have heard complaints made about against the court-martial system. Of course, you can sit around and conjure up objections of all kinds to this thing.

Mr. ALBERT. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield.

Mr. ALBERT. Under article of war 43, I believe the Supreme Court finally held that a conviction could be had with less than a unanimous vote, a three-quarters vote. Is that right? Has this been changed?

Mr. KILDAY. I am not familiar with the decision to which the gentleman refers.

Mr. ALBERT. As I understand, under this bill, both sentence and conviction must be by a unanimous vote of the court.

Mr. KILDAY. The gentleman means in the case of the imposition of the death penalty.

Mr. ALBERT. Yes.

Mr. KILDAY. I am not familiar with the decision to which the gentleman refers. It seems to me what it means is that both conviction and sentence must be unanimous; in other words, you would not reach the penalty until after you had reached an agreement as to the guilt or innocence.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield.

Mr. FULTON. I wish to say to the gentleman from Oklahoma that unanimous consent is required only in the case of imposition of the death penalty and then it is the unanimous consent of those present at the time the vote is taken.

Mr. KILDAY. Not less than five.

Mr. FULTON. And not less than five. So it really might not be unanimous consent of the whole court-martial board. So there is that possibility and this amendment was designed to correct it.

Mr. BURLESON. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield.

Mr. BURLESON. I may say that was the point I was trying to make. Possibly I did not make my position clear. The language "those present" brings up the policy of the Army and Navy in conducting courts martial. It provides with reference to other duties that they may be collateral to his general duties and that he is not serving upon courts or boards or any of those things that is made of priority in the service.

Mr. KILDAY. That would hardly take place in a death-penalty case.

Mr. BURLESON. In all cases. Why should they not be present? There is no good reason why they should not.

Mr. KILDAY. Let us be practical about the proposition. Five is the minimum number regarded as essential under the law. When you start adding additional members you are simply taking care of the contingency that some member of the court might not be present, yet you are sure of the presence at all times of five. It is just like the case of alternate jurors which are provided for in some jurisdictions.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. MANASCO. Mr. Chairman, I move to strike out the last word and rise in support of the amendment.

Mr. Chairman, I did not intend to enter into this debate because I am not an expert on the practice of courts martial, but I want to call the attention of the Committee on Armed Services and the House to a case where I think there was a flagrant violation of equal justice. I am referring to the case of two boys, William D. Kimbrell, Army serial No. 34-393-207, and Joe R. Herald, Army serial No. 35-445-400. In October of 1943 these two boys were charged with raping an Arab woman. I was permitted to read the transcript of testimony taken before the court. I doubt very seriously if even a country justice of the peace in the remotest part of this country would have convicted either of the boys on the testimony. They were, however, both convicted. As I recall, they were sentenced to death. Their sentence was commuted to life imprisonment, and later the sentence of Kimbrell was cut to 20 years. The Herald boy was permitted to go back to active duty and earn an honorable discharge. The Kimbrell boy was not given such permission, but they did finally in their benevolence cut his sentence down to 12 years. After he served 4 years in the Federal penitentiary he was paroled.

I am not complaining about the sentences. What I am complaining about is the matter of equal justice. If Herald was entitled to a fair and honorable discharge and enjoy all the benefits of the GI's under the GI bill, I do not see any reason any responsible person could advance for not giving the other boy the same treatment. They were both convicted on the same testimony for the same offense. Incidentally, the charges were preferred against these boys and they were tried in about 2 hours' time. Their attorney was not given any opportunity to prepare their defense. They had to move on. I was advised—and I am pretty sure it is true—that some example had been called for by some of the officers, that they had demanded that an example be made of some of these boys, and this boy was a victim. I do not say the boys were justified in their conduct. I do not say Kimbrell was justified in his act, but I do say that equal justice should have prevailed.

Here is another thing that burned me up when I took the matter up with the War Department trying to see that equal justice was carried out. I found out that one of the fellows who sat on the original trial court was sitting down there in the Judge Advocate's office in the position of an appellate judge ruling on the appeal. It is absurd to think that he was going to reverse his decision. He did not happen to sit on the case of one of the boys, but he did sit on the case of the boy from my district. I would like to ask, Is there a man in the House who would be willing to be prosecuted and tried by the same man and then have the same individual rule on his appeal?

I hope this bill will correct some of these evils. We are being called upon now to vote for universal military training. I am wondering if we can, with good conscience in voting for universal military training, stand by and see these things practiced against any kid in this country, if we are not going to have equal justice? I hope to vote for universal military training. However, if we do not have equal justice in cases of this kind I do not think we should have universal military training but we should have a cleaning out of those who come before our committees and ask us to vote for all these things.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. MANASCO. I yield to the gentleman from New York.

Mr. KEATING. I may suggest to the gentleman it is possible that the boy who received the more severe sentence had some bad record.

Mr. MANASCO. They both received the same sentence. Here is what a member of the Secretary of War's office said to me, and I am putting these letters in the RECORD. He states that a survey revealed that young Kimbrell, now 36 years of age, is a confirmed alcoholic. Now, he had been in the penitentiary 4 years. How any person, I do not care how stupid he is, could say that a person is a confirmed alcoholic after he has been in the Federal penitentiary for 4 years is beyond me. If he is a confirmed alcoholic there he must have been getting some liquor in the Federal penitentiary, and if that is true perhaps we had better investigate the Federal penitentiaries.

Mr. KEATING. Does the gentleman know whether the boy had a bad record in the past or not?

Mr. MANASCO. He did plead guilty on two or three occasions to being drunk before he got into the Army, but he was good enough to be taken into the Army. The Army made it possible for him to get drunk when he was over there in north Africa.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. RIVERS. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. KEATING. Will the gentleman tell us whether the boy who received the tougher treatment had been in trouble previously in the Army?

Mr. MANASCO. I do not think that was of any concern at all. I did not investigate that, however. He came from another State that probably had a little more political influence with the Army than I did.

Mr. KEATING. I doubt if anyone would have any more political influence with the Army than the gentleman.

Mr. MANASCO. I never found I had any and I do not want any. I do not think it is right for anybody to have political influence in cases of this kind. I think we should see that justice is done, whether the boy comes from my district, from the district represented by the Speaker, or by the Vice President of the United States, or anybody else.

Mr. KEATING. I agree entirely with the gentleman's statement, but I do recognize the fact that in the sentencing of a convicted man in military justice, just as in civil justice, his previous record for past convictions or past difficulties with the law is one of the factors considered. I just wondered whether possibly that might have been the determining factor in this case.

Mr. MANASCO. Does the gentleman mean to tell me that if two men were to go out and bare their chests to enemy bullets after they had been drafted and one had been involved in a traffic accident some 8 or 10 years before and the other one had not, justice would require that one boy be given life imprisonment while the other one is restored to active duty?

Mr. KEATING. No; and if my remarks led to that conclusion on the part of the gentleman, I regret it.

Mr. MANASCO. I might be stretching that a little bit.

Mr. KEATING. I do not know whether either of these boys bared their breasts to enemy bullets.

Mr. MANASCO. Here is what I am complaining about. If the Army were so solicitous about the past reputation of these boys, why was it possible for them to get liquor on this night they were alleged to have gotten drunk and raped this Arab woman? If the Army had been as solicitous of their conduct while they were under the control of the Army as before, they could not have gotten drunk.

Mr. KEATING. Naturally, I knew nothing about their being drunk, because the gentleman had not stated it.

Mr. MANASCO. I did not go into all of the details because the trial was so arbitrary. The defense counsel was not given an opportunity to prepare his defense. I would like for you gentlemen to read that transcript. That is the reason I am calling this case to the attention of the House.

Mr. RIVERS. Mr. Chairman, will the gentleman yield?

Mr. MANASCO. I yield to the gentleman from South Carolina.

Mr. RIVERS. I would like to clarify one point in the gentleman's argument. We had a case of this nature brought to the attention of our committee. Under this bill any general court martial has to be reviewed by the reviewing authority, automatically.

Mr. MANASCO. It was done in this case, but the reviewing authority was a member of the original court.

Mr. RIVERS. We have a new reviewing authority, and from a year after the imposition of sentence, or 6 months after the expiration of the sentence, whichever is the longer, any after discovered evidence presented, there is a review on.

Mr. MANASCO. The so-called Roberts committee reviewed it. But, of course, they took the findings of these fellows down here in the War Department. They did not have time to go out and investigate, and the only question I am raising heck about is that one was restored to duty and the other was sent to the penitentiary and paroled by the Civilian Parole Board and not given the right to earn an honorable discharge. But, he has that stigma upon him which the other fellow does not have.

Mr. RAINS. Mr. Chairman, will the gentleman yield?

Mr. MANASCO. I yield to the gentleman from Alabama.

Mr. RAINS. I would like to cite an illustration of a situation which I found in a similar case where a man was convicted for the rape of a French woman without any corroboration whatsoever; not a single solitary witness to corroborate it except the woman herself. And, as the gentleman knows, that is in complete opposition to every single principle of our law, that there must be some corroboration of the crime if it is a capital offense.

Mr. MANASCO. The testimony presented in this particular case showed, as I recall, that the Arab woman was nursing a baby during the operation, and probably that was sufficient corroboration.

Mr. RAINS. I hope there will be provision made in capital cases where it takes corroboration in crimes of this nature, because that is provided in all criminal jurisdictions that I know anything about.

Mr. JOHNSON of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. MANASCO. I yield to the gentleman from Oklahoma.

Mr. JOHNSON of Oklahoma. Do I understand that this trial judge advocate who participated in the original trial is now sitting in the appeal division that passed on this man's appeal over here?

Mr. MANASCO. He was sitting in the office that I went to to review the transcript. I made the fatal mistake of saying down there that an ignorant justice of the peace would not have convicted the boy on the testimony presented, and he rose up in holy wrath.

Mr. JOHNSON of Oklahoma. He did not sit on the other fellow's case?

Mr. MANASCO. No.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. MANASCO. The letters, which I have received permission to insert, are as follows:

JANUARY 17, 1947.

The Honorable the SECRETARY OF WAR,
Washington, D. C.

In re: Kimbrell, William Dolphus, ASN 34–393–207, case No. CM–249414, register No. 63864–8.

MY DEAR MR. SECRETARY: The above-named general prisoner was convicted by a military court in north Africa in October 1943 for the crime of rape. Kimbrell and another soldier,

Joe R. Herald, ASN 35-445-400, BCM0143, were codefendants. They were given separate trials; however, the evidence submitted to the court was the same, and they were both found guilty and given identical sentences.

I have read the transcript of the proceedings before the court and am not taking exception to the findings of the military court but am basing my request on the grounds of discrimination. Herald has been restored to active duty and is being given an opportunity to earn an honorable discharge. Kimbrell is serving a sentence of 20 years for the same crime, convicted by the same court on the same evidence.

I, of course, am not protesting the Department's action in restoring Herald to duty, but I do think that in all fairness my constituent is being called upon to pay a greater price for a crime than the boy who came from Kentucky. I would greatly appreciate it if you would take a personal interest in this matter and see that equal justice under the law is meted out in this case.

Yours sincerely,

CARTER MANASCO,
Member of Congress, Alabama.

FEBRUARY 17, 1947.

Hon. CARTER MANASCO,
House of Representatives,
Washington, D. C.

DEAR MR. MANASCO: The Secretary of War has asked me to reply to your letter of January 17, 1947, in behalf of general prisoner William D. Kimbrell, Army serial No. 34393207, and in which you refer to Joe R. Herald (former general prisoner).

Please be assured that the War Department has the best interests of each general prisoner at heart and is giving each individual's case every reasonable consideration for restoration to duty. All the circumstances surrounding Kimbrell's offense, his past military history, his civilian history, and all other pertinent factors have been carefully evaluated. The results of this survey were then presented to the clemency board, who in turn considered the advisability of returning this man to honorable duty.

This survey revealed that Kimbrell, now 36 years of age, is probably a confirmed alcoholic and that he had admittedly been arrested and fined by civil authorities on three occasions for being drunk and disorderly before he entered the armed forces. He admitted at the trial that he had been drinking prior to the commission of his present offense, and also that he took the lead in having intercourse with the woman who was attacked. All the circumstances in his case indicate that there is every probability he would again become involved in further misbehavior, as a result of his addiction to alcohol, should he be released from confinement and returned to duty. Consequently, his restoration is not favorably considered.

It should be noted that Herald was recommended for restoration to duty prior to the termination of hostilities and was actually transferred from the penitentiary to the disciplinary barracks for that purpose August 9, 1945. He was considered qualified for restoration to duty under policies existing at that time and because the record indicated that Kimbrell was a coaccused, a further special report on the latter's restorability was obtained from the penitentiary.

In accordance with Army regulations, Kimbrell will continue to receive regular annual clemency consideration; his next review being scheduled for July of this year. At that time his case will be again reviewed for the possibilities of further leniency. Your letter and a copy of this reply have been attached to his file for consideration at that time. In view of the large number of unrestorable prisoners serving comparable sentences for similar offenses, the War Department cannot adopt the policy of releasing all coaccused in the event that one of them is restored to duty. However, you may be assured that the board will carefully consider all aspects of the situation in this case.

Sincerely yours,

JOHN W. MARTYN,
Administrative Assistant.

FEBRUARY 21, 1947.

Hon. JOHN W. MARTYN,
Administrative Assistant,
War Department,
Washington, D. C.

DEAR MR. MARTIN: I have your letter of February 17 replying to my letter of January 17 in behalf of General Prisoner William D. Kimbrell, ASN 34393207.

I, of course, cannot agree with your position in this matter. You apparently base your position on the ground that Kimbrell, now 36 years of age, is probably a confirmed alcoholic. If this be true, the man should be placed in a hospital for treatment instead of being confined to a penal institution. I did not know that our Federal penitentiaries permitted men to drink intoxicating liquors. This man has been a prisoner almost 4 years and how anyone could say that he is a confirmed alcoholic after being a prisoner for almost 4 years without having some information that he had been drinking during this period of confinement sounds utterly ridiculous to me.

If the War Department had exercised the same interest in Kimbrell that it is now exercising, it would have been impossible for him to have been drinking on the occasion which led to his trial. In view of this fact, I think it is nothing but right that the Department exert every effort to rehabilitate this young man, and I respectfully urge you to use your high office in seeing that this is done.

This young man was good enough to offer his life for his country, yet his punishment for an identical offense was a long prison sentence while his associate was restored to active duty.

Next week I am taking the liberty of calling to the attention of the House of Representatives the discrimination against young Kimbrell in the hope that the Congress will conduct a thorough investigation into this case and similar cases.

Yours sincerely,

CARTER MANASCO,
Member of Congress, Alabama.

MARCH 10, 1947.

Hon. CARTER MANASCO,
House of Representatives,
Washington, D. C.

DEAR MR. MANASCO: This is with further reference to your interest in the case of general prisoner William D. Kimbrell and to your letter of February 21, 1947, addressed to Hon. John W. Martyn, Administrative Assistant to the Secretary of War.

As Mr. Martyn informed you in his letter of February 17, 1947, Kimbrell has been considered unfavorably for restoration to duty largely because he took the lead in the offenses and because of his past history of alcoholism. Recommendations against restoration in this case have been unanimous from the authorities at the institution and from the various War Department agencies concerned with the case.

Kimbrell's case was scheduled for special consideration by the Advisory Board on Clemency, of which former Supreme Court Justice Owen J. Roberts is chairman, on February 27, 1947. As the case was not heard at that meeting, it is presently scheduled for consideration at the next meeting, March 19, 1947.

Your letter of February 21, 1947, and all of your previous correspondence in Kimbrell's behalf has been attached to his personal records and will be available for the Board's consideration.

Please be assured that the War Department will accord Kimbrell every possible consideration, and I have asked that you be advised of the ultimate decision.

Sincerely yours,

KENNETH C. ROYALL,
Under Secretary of War.

APRIL 15, 1947.

Hon. CARTER MANASCO,
House of Representatives,
Washington, D. C.

DEAR MR. MANASCO: The Under Secretary of War has asked that I inform you further in the case of William D. Kimbrell.

As a result of a recent consideration of Kimbrell's case by the Clemency Board, his 20-year sentence has been reduced to 12 years. This reduction will make him eligible for initial parole consideration in October of this year. Should Kimbrell desire parole he should make application at that time to the authorities at the United States Penitentiary, Atlanta, Ga., where he is presently confined.

I am pleased to transmit this information.

Sincerely yours,

G. K. HEISS,
Colonel, GSC, Special Assistant.

APRIL 19, 1947.

Col. G. K. HEISS, GSC,
Special Assistant to the
Under Secretary of War,
War Department,
Washington, D. C.

Re Kimbrell, William Dolphus, ASN 34393207, general prisoner.

DEAR COLONEL HEISS: I have your letter of April 15 advising that the Clemency Board has reduced the sentence of the above-named prisoner from 20 to 12 years, making this young man eligible for parole consideration in October of this year.

I, of course, appreciate this consideration but am still convinced that military justice is not uniform. I just read in one of the daily papers yesterday where a boy in Japan had killed a Japanese citizen and also raped a Japanese woman. His original sentence was death, and it was commuted to 3 years in prison. Of course, I realize that the War Department probably considers the life of a Japanese and the chastity of a Japanese woman much less than that of an Arab, but I thought that our laws were based on the established principle of equal consideration for all.

There is nothing further that can be done in this case, but I do hope that when we finally write a unification bill, which my committee is now considering, we can assure equal justice to all boys whether or not they come from Alabama, Kentucky, or any other State. General Royall is to testify before our committee, and I sincerely trust that he will be able to advise our committee that the War Department intends to reform its court martial.

I think that the decision in this case has been influenced by someone who happened to sit on the board during the court-martial proceedings. I, of course, am not going to let this flagrant discrimination against my constituent influence my decision upon consideration of the unification bill, because I think that matter should be considered like court-martial cases—without any prejudices.

Yours sincerely,

CARTER MANASCO,
Member of Congress, Alabama.

Mr. Chairman, I leave it to you fair-minded men to say whether or not equal treatment was given these boys. If the Department of the Army is not fair enough to correct this unconscionable

miscarriage of so-called justice in this and similar cases, the Congress should do so at once.

These boys are carrying a lifetime stigma because of the lack of conscience of some officers who someday hope to be generals. Let us correct the law that gives officers so much arbitrary power.

Mr. ELSTON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I do not know that there is much I can add to the statement already made by the gentleman from Texas [Mr. KILDAY], in opposition to the pending amendment. I would like to say this, however, that in all of the hearings had before our committee, nobody voiced any objection to the section now under consideration. The Vanderbilt Committee made an exhaustive study of the whole subject, as did the American Bar Association and many service organizations. There was at no time any objection raised to this section. Our committee considered a volume of complaints but we have no recollection of any objection to the subject which the proposed amendment would cover. I therefore believe the amendment should be defeated.

Mr. BURLESON. Mr. Chairman, I ask that the amendment be again read.

The Clerk again read the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The question was taken; and on a division (demanded by Mr. BURLESON) there were—ayes 11, noes 34.

So the amendment was rejected.

Mr. FULTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FULTON: On page 32, line 8, after the period insert a new paragraph as follows:

"(4) The time a defendant is held in confinement prior to sentence shall be specifically allowed as a credit on the sentence imposed, and be available for credit in the computation of the serving of minimum time of confinement in deciding when the defendant is eligible for parole."

Mr. FULTON. Mr. Chairman, will the Committee accept this amendment without argument, as it is obviously what should be done in computing what the confinement is?

Mr. ELSTON. I do not think it should be written into the law. We have been informed that as a matter of fact consideration is given in all cases to the time the man has been confined.

Mr. FULTON. Mr. Chairman, the purpose of this amendment is that all time that a serviceman spends in confinement shall be credited on the sentence that he must serve when he is sentenced. The reason this is necessary is that when the man is sentenced, as I observed in one case where a man served 7 months prior to his sentence and prior to his trial, he then has to serve a certain minimum length of time, but when the minimum length of time he has to be confined after his sentence is calculated, they do not take into consideration the fact that he spent 7 months in the brig before he came up for sentence. The young man, then, is confined for 7 months longer than he otherwise should have been confined and was found guilty for. It is the fact that they do not credit such confinement on the minimum sentence after he is sentenced. That is the trouble. It is the general rule that they take it into consideration before the sentence, but when the man is put into a Federal court he then loses that time in confinement which he otherwise should get.

Mr. JENKINS of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to my colleague, who is with me on this amendment.

Mr. JENKINS of Pennsylvania. Is it not a fact that the amendment the gentleman proposes follows the ordinary practice in most civil criminal courts?

Mr. FULTON. That is correct. This amendment simply follows the practice of the ordinary civil courts of every State of the Union, as well as the Federal courts.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from West Virginia.

Mr. SNYDER. I believe as to the question of time it is discretionary. In some cases the men get it and in some cases they do not. This amendment would make it mandatory in every instance, and everyone would be treated alike.

Mr. FULTON. Yes; this amendment would make everyone be treated alike, and take it out of the discretionary class.

Mr. ELSTON. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from Ohio.

Mr. ELSTON. The gentleman stated that it is the practice in the civil courts to give consideration to the time already served before conviction.

Mr. FULTON. That is right.

Mr. ELSTON. I grant that it is the practice, but is it written in the substantive law of the State? In the gentleman's own State of Pennsylvania, is there a statutory provision that time served before sentence shall be taken into consideration?

Mr. FULTON. I cannot give you the particular citation, but I know that that is the law. And if as the gentleman who has just spoken here says, the Army has a discretionary system and that this consideration is given to some people and not to others, then perhaps we had better put it into the substantive law. I understand that some members of the committee feel that this is not a very bad amendment and I thought perhaps you might accept it.

Mr. JENKINS of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. JENKINS of Pennsylvania. It is my recollection that it is a part of the criminal code of the State of Pennsylvania.

Mr. FULTON. May I point out to the Committee that the gentleman is an attorney in the State of Pennsylvania?

Mr. HOEVEN. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. HOEVEN. Suppose the defendent himself through his attorney asks for one or more continuances extending over a period of months and thus through his own action deprives himself of an early trial?

Mr. FULTON. Unless there is a valid reason for continuance, such as illness or inability to get witnesses, the commanding officer will not grant the continuance. The purpose of military justice or civil justice is to have a speedy and prompt and fair trial. That is within the jurisdiction of the commanding officer.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. KEATING. The gentleman has conceded, as I understand it, that the time served is usually taken into consideration by the court.

Mr. FULTON. Not usually, but sometimes—according to the gentleman's statement.

Mr. KEATING. I understood it usually was. But does not the gentleman also concede that the reviewing authority in cutting down the sentence or in considering the length of time of the sentence also takes that matter into consideration?

Mr. FULTON. The trouble with that is that these men are in the United States Federal prisons and are subject to United States law. So the law computes the minimum time that they must serve in confinement. This man whose case that I know of could not even get credit for his 7 months.

Mr. BURLESON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I rise in support of the amendment. I think the amendment that the gentleman from Pennsylvania has offered is a very good one. I certainly shall support it and simply want to call to your attention the fact that in most all cases except in certain instances after conviction, appeal bonds are allowed. In my own State, only if the conviction is in excess of 15 years, is an appeal bond not permitted. But in all other instances appeal bonds are acceptable. In the State of Texas and in most other States, it is within the discretion of the presiding judge as to whether the defendant is allowed time spent in jail to apply to a sentence which is subsequently imposed.

Mr. ALBERT. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. ALBERT. I understand one of the main purposes of this bill to amend the Articles of War is to eliminate injustice and inequalities. I believe that that can best be done by making these provisions mandatory rather than by leaving these questions to the discretion of courts martial. Like other Members who served in the armed forces during the war, I have observed the results of many courts martial. There were unquestionably many inequalities with reference to sentences and to credit for time served before trial. I believe that if we spell these things out in the law as best we can without upsetting the disciplinary functions of the Army, we should do so. I will therefore support the amendment.

Mr. BURLESON. The gentleman is eminently correct. I believe this must be spelled out. If we leave these matters to speculation, then inequities are more likely to occur as they have in the past. That is the big trouble now. You cannot depend on the administration of military justice being properly executed, as compared with civil courts in the States, because in too many instances the handling is not done by those legally trained. What else could be reasonably expected? It is the simple truth and the experiences that many of the Members have related bear that out.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. KEATING. I hope the gentleman from Texas and the gentleman from Pennsylvania [Mr. FULTON] will not conclude that by asking questions I am against the gentleman's opinion. I am trying to get information. I am a little worried about whether we should make this mandatory or discretionary. What is the rule in the State of Texas? I have been told that in Pennsylvania it is mandatory that it be counted on the total sentence. I wonder what the rule is in other States.

Mr. BURLESON. I think perhaps the gentleman from Texas [Mr. KILDAY] is better qualified to answer that than I am, but I believe it is left to the discretion of the court.

Mr. KILDAY. It is discretionary with the trial court in Texas, just as it is in the Federal court.

Mr. KEATING. Will the gentleman yield that I may ask the gentleman from Texas [Mr. KILDAY] a question?

Mr. BURLESON. I yield.

Mr. KEATING. Does the gentleman or does the gentleman's committee know whether generally throughout the country it is a matter of discretion, or is it written into the State law?

Mr. KILDAY. I was surprised to learn that it was mandatory in the State of Pennsylvania. I had never known of a State in which it was mandatory. As far as I know, the rule that applies in the Federal courts is the general rule prevailing throughout the United States—that is, in the discretion of the court.

Mr. BURLESON. A good reason for the amendment offered by the gentleman from Pennsylvania is the fact that no bond is provided in military matters. The boy must remain in incarceration while awaiting trial.

I have not told any sad stories yesterday or today, but when I came back to Okinawa from the China Sea right after hostilities had ended in the Pacific, I found that 28 boys had spent about 30 days in a stockade without anything having been done. Some of them had not even been advised as to what charges were placed against them—a disgraceful situation. They were just about 400 feet behind the fox holes which were behind the Jap lines on Okinawa. About twice a week the Japs threw hand grenades in the stockade. You would not keep a pig in such a place. It was atrocious and the most revolting thing you can imagine. Of course, that is an isolated case, I am sure. I do not know that it really serves any purpose to mention it here, but at least bear in mind that no bond is allowed, and certainly it should be mandatory that credit be given from the time of incarceration when sentence is imposed.

Mr. GOFF. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield.

Mr. GOFF. Do I understand that those were marines who were being held under a law that governs the Articles for the Navy?

Mr. BURLESON. Most of them were Seabees.

Mr. GOFF. That is under the Navy?

Mr. BURLESON. Yes.

Mr. GOFF. I am surprised to learn of such horrible conditions.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BURLESON] has expired.

Mr. SNYDER. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I think the committee has done a good job in bringing out a revised court-martial military-justice bill. I am in favor of this amendment offered by the gentleman from Pennsylvania. At the present time, in the trial of court-martial proceedings, as in criminal law which governs in most States, whether or not a man receives credit for the time he has been confined pending his trial is discretionary with the military court itself. Whether he gets that credit rests upon the generosity or caprice of the prosecutor in recommending it and the court in recognizing it.

We have a peculiar feature about trials in court-martial cases. A man is arrested and confined and the records in his case must be collected. It may be that the records are distributed in various places throughout the United States or even in foreign countries, and it takes time to collect those records. In the meantime, without any fault on his part, he is prevented from having a speedy and immediate trial. In the last analysis, if he gets credit for the time he has waited for trial, probably without fault on his part, he has to depend on the generosity of the trial court. I believe that if we err here in writing this law we can afford to err in giving the man who has remained in confinement 60 days, 7 months, or any other length of time, the benefit of the doubt and give him credit on his sentence for that time spent in confinement and awaiting trial. I trust the amendment offered by the gentleman will be agreed to.

The CHAIRMAN. The time of the gentleman from West Virginia [Mr. SNYDER] has expired.

Mr. MORRIS. Mr. Chairman, I rise in support of the amendment, and I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. MORRIS. Mr. Chairman, I had not intended to make any observations at all with regard to this bill when the debate started. I do not pretend to be, in fact I know that I am not, an expert in this particular field. I have a high regard for this committee and the members of it. As I observed yesterday, I think they have taken a forward step toward bringing about a great reform in the administration of military justice.

Relative to this matter my experience in life and my study and reading in life have brought me to a conclusion. Whether or not I am correct in it may of course be a matter subject to debate and you may disagree with me, but I have made a careful study along this particular line and have come to this conclusion, that ordinarily it is the certainty of punishment and not the amount of punishment that is the big deterrent to crime. As an illustration, if a statute provides that if a man robs a bank he shall be hung by the neck until he is dead, dead, dead, a criminally minded person will take a chance and rob a bank if he thinks he has a good chance of never being caught or if caught of going free; whereas, if the statute provides that the maximum punishment is only 30 years in prison, but if he knows that in 999 cases out of 1,000 he will be apprehended and convicted he will not rob the bank. That has been true down through the ages.

Back in the olden days they used to use all kinds and methods of punishment. The Romans used to put a criminal in a barrel, drive nails through the barrel, and roll him down a hill. They used to burn people. They used all kinds of instruments of torture, and so on, and yet people continued to commit crime. So it is not always the amount of punishment but usually it is the certainty of punishment that deters people from committing crime. Not only that, but if it is known that actual justice, equal and exact justice will be meted out to everybody, then it brings about a wholesome feeling in all of society.

Why should not these boys who are charged with crime and who are kept confined especially for an unreasonable length of time as some have been and inevitably will be, why should they not be given this credit? When they are kept in durance vile, they have suffered the confinement there; then why take any chances of permitting discretion on the part of anybody? There is not any reason for it, and every person should be given credit, in my judgment, for the time he has spent in durance vile in the guardhouse or in prison. The time so spent should be applied on the sentence he finally gets if he is finally convicted. I believe, Mr. Chairman, that we will be making a serious mistake by not writing this into the bill.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. KILDAY. Mr. Chairman, I rise in opposition to the amendment and ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. KILDAY. Mr. Chairman, I think in this debate we are losing sight of the fact that in many many cases it is necessary to force the defendant to trial. As I stated on yesterday, one of the greatest difficulties—and I am sure my friend from Oklahoma sitting on a court has

seen district attorneys struggle many many times and maybe many different terms of court to force a defendant to trial—one of the greatest difficulties is getting a defendant to trial.

If this amendment is adopted you will be placing a premium on every effort that the accused can make to delay his trial because as a matter of law the time that he is held in confinement awaiting trial must be credited on his sentence if he is convicted. The sentence would be confinement at hard labor. His confinement in the guardhouse has not been at labor any harder than perhaps cleaning up the jail and things of that kind, but certainly it is not confinement at hard labor. He could subpena witnesses from all over the country, take depositions around the world, and delay his trial for the major portion of the sentence he is going to get. So you are placing a premium on the effort to delay trial. Of course, the man who is held in jail pending trial through no fault of his own while the prosecution is getting its witnesses together, taking depositions and things of that kind, should be given credit for the time he is held in confinement.

The only way you can accomplish that is by leaving it within the discretion of the court. If he does not profit by reason of his delaying the trial, what have you accomplished with this amendment? Let us be practical. If the court feels he has delayed his trial, what is the court going to do? The members of that court are going to add it on the sentence they will give him. Here you are binding the hands of the court on a matter that, in our own Federal court, is within the discretion of the court, and I am sure in the majority of the States, as in my own State, it is discretionary with the court.

Mr. JOHNSON of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Oklahoma.

Mr. JOHNSON of Oklahoma. The gentleman talks about the defendant delaying the case.

Mr. KILDAY. Did the gentleman ever file a motion for a continuance?

Mr. JOHNSON of Oklahoma. Many times. We all know in civilian courts you file a motion to delay a trial so the thing will cool down in the community.

Mr. KILDAY. And witnesses will die.

Mr. JOHNSON of Oklahoma. That would not do you any good in an army overseas or some place like that. In civilian trials your defendant is probably running loose on bond.

Mr. KILDAY. I cannot imagine any place in the world that there would be more chance of witnesses disappearing than in an army during time of war when they are continually on the move.

Mr. BREHM. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Ohio.

Mr. BREHM. Is this question unreasonable? Suppose they would keep a man in confinement for 18 months through delaying tactics, then the court should find he should be sentenced for 1 year. Would he have cause for damages?

Mr. KILDAY. No. He would have been done a dirty trick maybe, but he would not have any action for damages.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Pennsylvania.

Mr. FULTON. This case I cited of the man held 7 months in Italy for trial is not an isolated case, because I asked General Eisenhower to make a survey of the Mediterranean area on courts martial and he came back with the astounding fact that this was the usual thing, that they were held for trial from several months up to 7 months. The reason given was there were so many people to be tried that the courts could not get to them. Now would you say that was because the young man could not voluntarily get a trial or was it because the Army court-martial system had bogged down?

Mr. KILDAY. In that instance he should get credit for time held in confinement. But you have the other type of case also. It is one of those situations in which you have got to leave it within the discertion of the court. Why do you not bring in a bill to change that in the Federal court? That is the rule that applies to you and to me.

Mr. ELSTON. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Ohio.

Mr. ELSTON. The gentleman from Pennsylvania and perhaps some of the others who are urging the adoption of this amendment are unaware of the fact that our committee endeavored to prevent delay. For example, on page 34 of this bill, amended section 31, article 70, reads as follows:

> When any person subject to military law is placed in arrest or confinement immediate steps will be taken to try the person accused or to dismiss the charge and release him. Any officer who is responsible for unnecessary delay in investigating or carrying the case to a final conclusion shall be punished as a court martial may direct.

Mr. KILDAY. That is correct.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. KILDAY. Mr. Chairman, I ask unanimous consent to proceed for one additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. MORRIS. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Oklahoma.

Mr. MORRIS. Does the gentleman believe there would be very much of an incentive on the part of the party who is charged in the Army, Navy, or Air Corps, since he cannot make bond, to want to stay in jail? Certainly he would not want to hold himself in jail.

Mr. KILDAY. That would depend on where he is confined. If confined at Randolph Field, Tex., in my district, he would be living pretty well; he would be in a pretty good set-up, good surroundings, and very little work to be done. On the other hand if he should be in a stockade such as we are told exists overseas, then I think he would be quite anxious to go to trial. I insist this is a matter of procedure, a thing which must be left within the discretion of the trial court or reviewing authority.

Mr. JOHNSON of Oklahoma. Mr. Chairman, I rise in support of the amendment.

I would say this to the chairman of the committee that just read the section over there, it sounds pretty good that any officer that unnecessarily delays a trial may be punished as the court martial may direct. But, it does not mean a thing in actual practice, because I have seen in Europe where the cases were stacked up three to four hundred, with a small staff to try the cases, and with orders emanating from SHEAF every week, "Why do you not call up those cases?" They come back and say, "We do not have the officer personnel to try them." So, you could not court martial any officer if there were not enough officer personnel to try those cases. They would never be tried and you would still have several hundred men languishing in confinement for 7 or 8 months before they were tried.

Mr. ELSTON. Mr. Chairman, if the gentleman will yield, that is exactly what we are trying to do in this bill, to increase personnel, so that there will be sufficient personnel to bring the offenders to trial, and the section that I just read was not in force and effect at the time the gentleman is speaking about.

Mr. JOHNSON of Oklahoma. I will say this to the gentleman that during the war, about the first minute you entered the Army, latrine rumors told you that if you were picked up for something, they would throw you in the brig and throw the key away. Then an officer would read the section of the court-martial manual to you where, within 7 or 8 days, I have forgotten which, that you had to be charged. Gentlemen, it sounds pretty good that the high command made it mandatory that you be charged within 7 or 8 days, but after you were once charged you might languish 7 or 8 months in prison and never be tried, and I think that should be counted off a man's sentence.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Oklahoma. I yield to the gentleman from Pennsylvania.

Mr. FULTON. I agree that the bill as now drawn may tighten it some within their discretion, but the damage has been done to the ones that you spoke of. They languished for 7 or 8 months, and some of them are in prison this minute, with no credit.

Mr. JOHNSON of Oklahoma. That is right.

Mr. FULTON. Because they could not court martial any officer for it. In the Mediterranean theater the cases were piled up by the thousands.

Mr. JOHNSON of Oklahoma. Well, they were piled up in the ETO by the thousands also as well as where the gentleman from Texas was, in the Pacific theater, and everywhere. And, I will say to the gentleman of the committee that any time he talks to the "high brass" over here at The Pentagon you are still going to get the same kind of stuff

that is in this bill, even though it is a little better than what we have had in the past. I am very grateful for what you have done. You have done a great work, but I still cannot understand this reluctance on the part of the committee, when you have done a good job in bringing out this bill, why you so persistently fight these things that will even make it better. That has been the attitude you have. You have not adopted one single amendment, or at least only one or two, and if this thing goes out it will be a committee bill, and not an enlisted man's bill, and the rest of us that fought in this war. I think the committee should take cognizance of that question. There are many of us who were in World War II that had been trying to strengthen this bill and do something for the bill. There are many who, like me, have been trial judge advocates and defense counsels, too, and they know how rotten and corrupt the whole system was. They can debate as long as they want to and they will not do anything for the boys that the gentleman from Alabama [Mr. MANASCO] is talking about, who are serving 20 years, because some officer was so stupid, and the officers of the court were so stupid and so blind in sentencing a man for that length of time, 20 years of the best years of his life, and allowing the accused to be restored to duty and given an honorable discharge.

Mr. BURLESON. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Oklahoma. I yield to the gentleman from Texas.

Mr. BURLESON. For the gentleman's information, I would like to inform him that I am in the process of presenting a resolution asking for a special board to review every court martial handed out in World War II, not involving moral turpitude, regardless of the provisions of this bill or of any policy of the Army or the Navy, with the view of correcting these inequalities, where moral turpitude has not been involved. I thought the gentleman would like to have that information.

Mr. JOHNSON of Oklahoma. I appreciate that. I think it should be done.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. FULTON].

Mr. FULTON. Mr. Chairman, I ask unanimous consent that the amendment be again read.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk again read the amendment.

The CHAIRMAN. The question is on the amendment.

The question was taken; and on a division (demanded by Mr. FULTON) there were—ayes 28, noes 35.

So the amendment was rejected.

Mr. DOMENGEAUX. Mr. Chairman, I move to strike out the last word, and ask unanimous consent to proceed out of order.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. DOMENGEAUX. Mr. Chairman, Earl K. Long is a candidate for Governor of the State of Louisiana in the Democratic primary to be held on January 20. Earl K. Long was elected Lieutenant Governor of Louisiana in 1936, at which time was also elected Richard W. Leche as Governor of Louisiana. Earl K. Long became Governor of Louisiana in April 1939 when Governor Leche resigned, and he served until May 1940. Governor Leche and many other high officials in the State of Louisiana, and other persons, doing business with the State of Louisiana, were indicted and convicted in the Federal Courts on various charges in defrauding taxpayers in the State of Louisiana.

The Earl K. Long-Richard W. Leche administration was one of reckless and fraudulent exploitation of the people's money and of the people's rights. Many connected with this regime were guilty of every conceivable misfeasance and malfeasance in office.

Earl K. Long, in his present compaign for Governor, boasts that even though some of his former associates were guilty of crimes against the State, that he, himself, is innocent. He repeatedly tells the people that he was investigated and reinvestigated by various agencies of the Federal Government and nothing improper or wrong was found against him.

I now charge that Earl K. Long received an income in excess of a quarter million dollars during the years 1938 and 1939, while he was Lieutenant Governor and Governor of the State of Louisiana.

I charge that this income is largely of the same nature which his former associates profited in; an income of illgotten gain and graft, obtained in an illegitimate and illegal manner at the expense of the taxpayers of the State.

I charge that Earl K. Long did not report this income to the Federal Government and instead reported an income of a nominal sum. I charge that his failure to report the proper income was a willful intent to evade his income tax.

I charge that the Bureau of Internal Revenue has assessed at the present time against Earl K. Long a tax liability including fraud penalty in excess of $100,000.

I charge that Earl K. Long has agreed to pay this tax liability including fraud penalties, but has requested that final consummation be deferred until after the present gubernatorial election.

I charge this tax claim, including fraud penalties, is now in the hands of the regional office in Dallas, Tex., and the technical staff of the Bureau of Internal Revenue in New Orleans for settlement. The apparent indifference on the part of the Bureau of Internal Revenue in allowing this matter to remain in abeyance is an aid in protecting an individual guilty of acknowledged tax evasion and violation of his trust in office against his people.

I call upon the Bureau of Internal Revenue to issue a deficiency notice or demand payment against Earl K. Long; and to effect the collection of this fraud income tax claim now, and to take whatever other steps proper under the circumstances. Should this not be done I intend to call this matter officially before the Congress of the United States by resolution asking for an investigation of such conduct by this Government agency.

We have had for almost 8 years constructive and honest State government in Louisiana. Our State is blessed, as no other, with natural resources. We have it within our means to provide a way of life for our people as good as any to be found in this country. We can do that with continued honest, constructive, and liberal government. Louisiana must not again put its affairs in the hands of a man like Earl K. Long, who swindled its taxpayers of hundreds of thousands of dollars, as well as many thousands of dollars from the United States Government.

Mr. FULTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FULTON: On page 34, line 6, after the word "delay", strike out the balance of article 70 and substitute therefor the following: "Each person subject to trial by either general, special, or summary court martial, shall receive a speedy and fair trial. All trials of general court martial shall be commenced within a period of 60 days after the service of charges upon the defendant. Trial of special court martial shall commence within 30 days and summary court martial within 15 days respectively of the service of charges upon the defendant, except upon specific authority by the Judge Advocate General for the continuance in his discretion because of special circumstances."

Mr. FULTON. Mr. Chairman, this amendment is to make a rule for speeding up courts martial once the charges have been served upon the defendant. It does not relate to when the charges must be prepared. The Army command can have all the time they want to prepare the charges, but once you arrest the man and throw him in jail, then, on a general court martial, they must bring him up for trial within 60 days. On a special court martial, he must be brought up for trial within 30 days, and in a small summary court martial, 15 days. That would prevent what happened in the Mediterranean theater during the war and will prevent these fellows languishing in jail for long periods of time without trial. There is an exception made in that the Judge Advocate General can say that there shall be a further continuance in special cases, but it is necessary for them to get administrative authority to do it. They cannot do it in the field and let the fellow just stay there as they did previously. Now you say to me, "FULTON, why are you so strong on this?" Well, on the summary that I have prepared of the Army, showing what happened in the Mediterranean theater, it showed conclusively that thousands of men were not brought up for trial for a period of weeks because they were so tied up that they could not get to the cases. That is what some of us servicemen who have served in this war are trying to correct.

Mr. JENKINS of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to my colleague the distinguished gentleman from Pennsylvania.

Mr. JENKINS of Pennsylvania. As I understand it, the purpose of this amendment is to carry out the suggestion made by our distinguished friend, the gentle-

man from Texas, yesterday to speed up the trial of court-martial cases?

Mr. FULTON. That is correct. The distinguished gentleman from Texas yesterday said that the purpose of Army justice was to speed up trials and not to delay them. Upon this particular thing we are helping Army justice and we are also protecting the serviceman who is thrown into the brig and has no rights for a trial. He is under his commander, and the commanding officer may think there are other things necessary. In the Army and the Navy, we servicemen know it is always those things that can be done as they go along that delay the most. There are never enough officers in wartime for court-martial proceedings. There are never enough officers who have time to sit in these summary courts and captain's mast. Those are things that are put off.

I would like to ask the committee several things that I think are defects, and ask how you are going to correct them.

During this last summer in Italy, I noticed people in solitary confinement. They were kept there without being given a full meal every third day. They were on bread and water. How will the committee see in the future that those fellows are not kept in there? The one I speak about was 2 weeks on bread and water, without exercise and without his full meal every third day. What kind of a system can you devise to protect service men against that?

Mr. ELSTON. I think if the gentleman is familiar with the administrative orders, he would know it is a violation of an administrative order to do that. I am sure the gentleman could appreciate that it would not be possible for this committee to legislate on a matter of that kind. There are certain things that have to be left to the discretion of the commanding officers, and those who have persons in confinement. If there is an unruly prisoner and certain restraints have to be placed upon him, obviously he has to be dealt with in a different manner than one who at all times is on his good behavior. So I do not see how it would be possible to legislate in order to settle the problem which the gentleman has referred to.

Mr. FULTON. What kind of a check does the Armed Services Committee of the House of Representatives make upon the carrying out of the policies you have laid down? Do you check to see if there are administrative rules set up? Do you check to see whether they are being carried out?

Mr. ELSTON. I will say to the gentleman that in the case of flagrant violation of administrative orders of the kind he has brought to the attention of the committee, of course the committee would act upon it.

Mr. FULTON. I went up to the Federal penitentiary at Lewisburg to visit a 21-year-old serviceman from my district who had been convicted, and I found that this kid, who had just turned 21, was confined with bank robbers and rapists and murderers. There was no segregation whatever. Is there anything dealing with segregation of these young servicemen in Federal prisons?

Mr. ELSTON. I would say that the gentleman ought to bring those specific cases to the attention of those who have it within their power to correct them. But I do not see how we are going to put anything in this bill that will correct the individual cases to which the gentleman has made reference.

Mr. JOHNSON of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. JOHNSON of Oklahoma. I might point out too, and call to the attention of the House, that when we had this man Kilian over at Litchfield, England, where he just took them out and said, "Don't break too many bones," and then when he was finally brought to trial he asked to have the man who is at present Secretary, General Royall, for his defense counsel. What chance does an enlisted man have under that kind of a system unless Congress does something to protect him?

Mr. JOHNSON of California. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman, a member of the committee.

Mr. JOHNSON of California. What you are talking about is not the type of thing to put in an act. In California we have all that taken care of under our penal system, and that is what we should have in this case.

Mr. FULTON. Will your committee go ahead and check on the administration and penal system so that these men will be protected, and these abuses will be stopped?

Mr. JOHNSON of California. Speaking as an individual, I am willing to look into the matter, and perhaps some kind of an act can be passed that will give better assurance of fair and honest treatment of these men.

I think the gentleman is to be commended.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. FULTON. Mr. Chairman, I ask unanimous consent to proceed for three additional minutes, to answer questions, and to get things off my chest that I have been complaining about.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. KEATING. I believe there are bills pending before the Committee on the Judiciary with the general substance of which I am in agreement, to devise some method in Federal penitentiaries of segregating so-called hardened criminals from a lot of these boys who should not be classed in that category. I believe the gentleman's colleague from Pennsylvania [Mr. WALTER] has been working in that field also.

Mr. FULTON. May I compliment the members of the Committee on the Judiciary for going into that, because I found a young man convicted and sentenced to 5 years under an Army court martial for selling a carton of cigarettes in Italy; and I found another young man sentenced to 5 years for misuse of an Army ambulance for 1 day. I found them mixed in with hardened criminals yet these boys were only in their early twenties.

Mr. JENKINS of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. JENKINS of Pennsylvania. It is a fact, is it not, that referring to the remarks of the distinguished chairman of the subcommittee, that some of the things the gentleman is objecting to arise by virtue of administrative orders and because these certain requirements are not written into the statutory law?

Mr. FULTON. If it is the proposal of this Congress through its committees to go ahead and see that some of these difficulties with our Army penal system are worked out and proper administrative changes made then I have made, I hope, a great point here of the protection of these servicemen.

Let us turn to something else. I wish to complain here publicly of the treatment of servicemen in confinement when they are not given adequate toilet facilities. I found that in the Army disciplinary center at Leghorn, Italy, servicemen were kept without latrine facilities and were forced to use a 2-gallon can without a lid. The can was removed only once every 24 hours. Some of the cells smelled so bad that Dr. Pfeiffer, a New York surgeon, was unable to approach the cells where these men were confined.

Mr. HOFFMAN. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. HOFFMAN. Is the gentleman talking about conditions here in America or in Europe where we are going to reform everything?

Mr. FULTON. These were conditions that existed in the disciplinary training center at Leghorn, Italy, that I found on my trip there. They were American servicemen in an American disciplinary training center.

Mr. HOFFMAN. Under American officers?

Mr. FULTON. That is correct.

The CHAIRMAN. The time of the gentleman from Pennsylvania has again expired.

Mr. ELSTON. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I am sure every member of our committee is in full sympathy with the views of the gentleman from Pennsylvania that persons accused of offenses should be given a speedy trial. Our committee fully considered the subject and we felt that when we enacted section 31 and made it an offense for an officer to delay either the investigation or the carrying out of a case to final conclusion, we had taken care of the matter about as well as it would be possible to do so.

I can conceive of a situation where if the gentleman's amendment were adopted it would in many cases work a disservice to an accused person. For example, there may be cases where men are arrested and placed in confinement, charged with serious offenses, yet the circumstances may not, in the opinion of the commanding officer, warrant a general court-martial trial. Such officer might allow the accused to remain in jail for a few months and then dismiss

the case rather than proceed with a general court-martial trial. If we are going to adopt a hard and fast rule that an accused person has to be brought to trial within a certain number of days, I repeat, we may do a disservice rather than a service to the persons we are seeking to help.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I yield.

Mr. FULTON. I wish to compliment the committee on its sincerity of purpose and on the result it has obtained in this bill. I think they are going in the right direction, but I also believe that the amendments I have offered are further steps in the same direction.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

The question is on the amendment offered by the gentleman from Pennsylvania [Mr. FULTON].

The question was taken; and the Chair being in doubt, the Committee divided and there were—ayes 11, noes 31.

So the amendment was rejected.

Mr. BURLESON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BURLESON: On page 45, line 14, after "SEC. 47", strike out the word "Regular."

Mr. BURLESON. Mr. Chairman, there is no question as to what the intent of this amendment is. It is simply to allow the appointment of a civilian to the Judge Advocate General's Corps. When I say civilian I simply mean an officer or officers who are not in the Regular Army. By striking out the word "Regular" it will permit the President to appoint anyone in the Army to the Judge Advocate General's Corps or the Judge Advocate General.

It does not seem to me that it should be necessary for the President to go into the Regular Army to find a lawyer or to find someone competent to serve in the Judge Advocate General's Corps. Suppose he wanted to go out and find a civilian and bring him into the Army to serve in this capacity. This would not require him to get a West Point graduate to fill that place.

Yesterday I made a remark in a more or less facetious way that the Army wanted to be certain that it held the authority unto itself. I am not so facetious about that today because I think it was put in here for that very reason and that it was suggested by the Army. I hope the committee may be liberal enough to share my views in this matter. I cannot see how it could possibly be injurious to the purpose and intent of this bill. Why should we preclude the President from reaching to other sources for competent legal counsel to represent the Judge Advocate General's Corps?

Mr. WILLIAMS. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Mississippi.

Mr. WILLIAMS. If the amendment which the gentleman has offered will do what I think it will do, I am certainly for it. I would like to ask another question. Does the bill as it is written now preclude the appointment of Reserve officers or Reserve personnel on this board?

Mr. BURLESON. It does, except that, of course, they may be brought in and given a Regular Army commission. It is entirely possible they may be commissioned in the Regular Army. But so far as a Reserve officer is concerned on active duty the answer would be "no." That is the purpose of my amendment.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from New York.

Mr. KEATING. Do I understand the purpose is to permit the President to appoint a Reserve officer to the Judge Advocate General's Corps, which the gentleman feels cannot be done now?

Mr. BURLESON. I feel it cannot be done under the language of the bill as written. The individual has got to go into the Regular Army. I can visualize that a man may be brought in to serve in this capacity and may not want to be in the Regular Army. He may not want a general's commission in the Regular Army. But he might be willing to serve as a civilian soldier and to give of his time for a certain period to serve during a war. I see no harm in an amendment like this being adopted and I hope the committee may see it that way.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Indiana.

Mr. MITCHELL. Is it not a fact that 90 percent of the Regular Army officers are not qualified attorneys? Most of them have not studied law. The lawyers come from the Reserves.

Mr. BURLESON. The gentleman is correct and that has been one of the things that has carried military justice so far astray. Of course, they should not be criticized because they were not professional men. They were completely out of their field. Someone mentioned the other day that he could not run a radar, or whatever he said, some technical piece of machinery. Why, of course not. Everyone must have his limitations. There are probably self-styled experts in numerous fields of endeavor but I am inclined to doubt abilities if there is obvious attempt to cover too much territory. The same thing is true in the Army and in the Navy. Why not recognize it. The only reason I can see is the desire of the military to keep its closed fraternity.

Mr. CHELF. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Kentucky.

Mr. CHELF. In other words, if a man can serve his country in time of war directly from civilian life, he can do likewise in time of peace.

Mr. BURLESON. I believe so.

Mr. ELSTON. Mr. Chairman, I rise in opposition to the amendment. I do not believe the author of the amendment is entirely familiar with Public Law 381, the promotion bill, or of all of the provisions of this bill.

Mr. KILDAY. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I yield to the gentleman from Texas.

Mr. KILDAY. I am afraid my colleague from Texas did not read the entire section 47. I do not care whether the word "regular" stays in there or not, but I do want to correct the impression that has been made in debate. Turning to page 46 of the bill, the last paragraph on the page, you will see that it reads:

Additional officers may be appointed by transfer of qualified officers from other branches of the Army by appointment of Reserve judge advocates or qualified civilian graduates of accredited law schools.

In other words, instead of the bill providing that these shall be regular officers transferred to the Judge Advocate General's department, it provides exactly the contrary.

Mr. BURLESON. Mr. Chairman, will the gentleman yield?

Mr. ELSTON. I yield to the gentleman from Texas.

Mr. BURLESON. In the first place, I will say to the gentleman from Ohio that there may be a few people outside of the Armed Services Committee that understand this promotion bill, I will say that there are not very many of us on this floor that ever understood the bill. I am presuming that it is a good bill, and I have heretofore commended my good friend and colleague from Texas in knowing so much about it and so ably explaining it here. I voted for it, though frankly I do not know why, except that he said it was all right. It is a complicated thing, but then if you have no objection to this word "regular" being in here, will the committee agree that it be stricken?

Mr. KILDAY. I personally would have no objection to it, no matter how complicated it may be.

Mr. ELSTON. Personally I have no objection to it, except that this is a technical section, and if we start to take words out of a section which was drafted with a great deal of care, we may unintentionally affect other parts of the section. As the gentleman from Texas [Mr. KILDAY] pointed out, no harm would be done if the word "regular" remains in the section, since the officers the gentleman is referring to can be given consideration.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. BURLESON].

The question was taken; and on a division (demanded by Mr. BURLESON) there were—ayes 14, noes 27.

So the amendment was rejected.

Mr. LUCAS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I rise in favor of the passage of this bill. For too long our armed services have discriminated against the enlisted man, and this legislation is one means whereby we can attempt to restore the dignity of the American citizen who is chosen to serve in the lower ranks of the services.

There are so many things about this bill that I like that it will be impossible to discuss them all. I do want to point out the fairness of the provision allowing enlisted men to sit on their own courts. For many years I have believed that the fundamental right of an accused to be tried by a jury of his peers is being violated in courts martial, because the Articles of War and all military and naval

law specifically and purposely set out the inequality of officers and enlisted men. It is a common expression in the Army that an officer is a gentleman by act of Congress, and the question naturally follows as what that makes out of an enlisted man. Here we are requiring that a soldier may demand that at least one-third of the court be enlisted men. Of course, we cannot know how this will work out in actual practice, but I believe that this will be a step toward equality as individuals in the courtroom. I should like to see every soldier tried by a court comprised wholly of his equals, which is apparently working out so very well at the Umtie camp in Kentucky, but I believe that this procedure should be tried out thoroughly before taking so radical a step. But it is not beyond the realm of possibility that enlisted men's courts will be the method which we must adopt in order to secure a purer, a more equitable and effective justice in our military courts.

I strongly favor the removal of the judge advocate from the chain of command. The old Prussian theory of the use of courts martial for the enforcement of military discipline is violative of our basic philosophy of Anglo-Saxon judicial procedure. No commanding officer should have both the power of appointment of a court and the power of review of the sentence imposed. The change of this archaic and reprehensible system is to my mind one of the best features of the bill. I think, however, that some penalty should be attached to the provision forbidding an attempt to coerce or unlawfully influence the action of a court martial.

We are by this bill rectifying some of the obvious evils in our military systems which were disclosed during the last war. It is a long and laborious process. I desire to call your attention to another evil which should receive our attention soon. We should divorce the Inspector General's Department from command, too, as we are here separating the Judge Advocate's Corps. I intend to introduce or support such a bill from the committee introduced for this purpose, and I urge your serious consideration of such a proposal.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. CANFIELD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 2575) to amend the Articles of War to improve the administration of military justice, to provide for more effective appellate review, to insure the equalization of sentences, and for other purposes, pursuant to House Resolution 424, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en bloc.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

Mr. ELSTON. Mr. Speaker, I ask unanimous consent that all Members may have five legislative days in which to extend their remarks in the RECORD on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PROTECTION OF THE RIGHT TO WORK

Mr. HOFFMAN. Mr. Speaker, had some so-called labor spokesmen been functioning when Adam and Eve were driven out of the Garden of Eden, no doubt God would have been charged with being antilabor and with promulgating a slave-labor edict, for by that command, both Adam and Eve were forced to work, though some present-day labor leaders loudly assert that no one can be forced to work.

However, from that day to this, every thinking individual has known that, if man would live, he must eat. Over the greater part of the earth, in addition to food, man must have clothing and shelter to protect himself from heat; from cold.

Assuming then if he would live, he must have food, clothing, and shelter, it follows that unless he is the recipient of charity, inherited wealth or steals or robs, he must work.

Some say and apparently with every evidence of sincerity, that every man is entitled to a job; that the man who works has a property right in a job and, for good measure, they add that no man can be forced to work.

All three of these assertions are reiterated time and again before congressional committees to individual Members of Congress, accompanied by the demand that Congress enact legislation insuring to everyone a job at a wage which will enable him to live according to the American way of life, while at the same time, guaranteeing that no one will be required to work at any time, place, or kind of employment when he does not wish to do so.

If we accept the premise that every man has a right to a job, we must also remember that jobs do not, like rain, without man's effort, come down out of the clouds.

Science tells us that it requires the power of the sun to first draw the water from the sea into the clouds before it can fall as rain.

Common sense should teach us that, before there can be a job, someone must work to create it. Even the farmer who works for himself, before he can plow his field, sow the seed, harvest and sell his crop, is forced either to clear the land or work to obtain the money to hire it done. Before the farm hand had his job, the farmer worked to create that job.

The factory, mine, or mill owner who employs 10, a hundred, or thousands of men, was compelled to work, he and his associates, before the mine was opened, the mill or the factory erected; before jobs were available.

So it is not only absurd but silly to say, as do Lewis, Green, Murray, and hundreds of their associates, that no man can be forced to work. Before any man can be given or successfully demand a job from another, that other or someone in the direct line preceding him was forced by circumstances to work to create the job or earn the money which created it.

If I am entitled to a job, then you or someone else must work to create the job. And you must continue to work in one capacity or another to obtain the money to pay my wages.

This simple truism organized labor has long overlooked.

Having accepted the assumption that every man who desires it is entitled to a job, unfortunately labor has gone one step farther and now holds that, after the opportunity to work—to live—has been created, then organized labor, through the closed shop, the union shop, union security, the check-off, which is a first mortgage upon the worker's pay, which gives the unions a priority over earnings at the expense of the grocer, the clothier, the landlord—yes, even the undertaker—has the right to say who shall work, when and where he shall work, the kind of work he shall do, and the wage which the creator of the job shall pay.

Having established the fact that employees have the right to work, labor unions inconsistently then levy a tax by way of initiation fees, dues, and special assessments upon all who exercise that right, thus placing a limitation upon what it contends is an unqualified, unlimited right.

They then go one step farther and lay down the decree that only those who comply with their rules and regulations shall exercise this God-given, this constitutional right to earn a livelihood—a second limitation of the right to a job.

Nor is that the end. They take another—a third restrictive step—and deny to some who seek to join the union, who announce their willingness to obey its rules and regulations, the right to become members of the union which has control of the jobs.

The closed shop is on occasion followed by the closed union.

Years ago, some employers required all applicants for jobs to sign an agreement that, if they belonged to a union, they would withdraw; that, if they did not belong, they would not join. That was the yellow-dog contract. It was outlawed in 1935.

Today some unions have adopted that policy in reverse. They insist upon a contract that no man shall work unless he joins the union and complies with their demands.

The man who joins, in addition to his city, school, county, State, and Federal taxes, which already take approximately a third of every dollar he earns, must in addition pay the tax imposed by the union.

Again, though a man may be willing and anxious to join and pay, because the higher-paying, more desirable jobs are limited in number, opportunity to

obtain them is limited by arbitrary rules, by favoritism, by all sorts of unfair practices—hence only the favored few can get the better jobs.

Over the years, because of the development of mass production in many industries, the individual who is forced to work—if he would eat—became a human cog in a gigantic mechanical machine. Herded together by the thousands under one industrial management, employees lost all personal contact with those who determined the wage and the conditions under which they should work.

With the desire for increasing profits ever present, and profits obtainable only through greater, more efficient production, employees were in altogether too many instances exploited by employers. In some few industries, sweatshops were the rule. In others—where there was an apparently high wage—living conditions were deplorable and the cost of living ever mounting.

So it was that the Congress in 1935 passed the National Labor Relations Act, the avowed purpose of which was to lessen the causes of labor disputes. Unfortunately, "Equal justice under law" was not the underlying principle. Though under it coercion and abuses practiced by employers were outlawed, the act threw wide open the door for oppressive practices by ill-disposed labor leaders and officials of unions.

Arbitrary curtailment of the individual employee's right to work—as, for example, in the sit-down strike of 1937, where hundreds of thousands of employees were, by the action of the unions and their goon squads, denied all opportunity to earn a livelihood—and a brazen disregard of the public's right to production and service, created the overwhelming public demand for a law which would protect the employee from his labor boss, the public from work stoppages, slowdowns, and strikes which threatened the public health, safety, and welfare.

The result was the Taft-Hartley Act which only experience and the passage of time will reveal as an adequate or inadequate relief measure.

So much for generalities. That there is need for adequate enforcement of the law by local, State, and Federal officials, or new legislation, or both, in order to protect the individual's right to work, can be determined by a brief statement of what happened in a few recent strikes—some before, some after, the effective date of the Taft-Hartley Act.

Permit me now to give you facts as shown by sworn testimony from citizens with good reputations for truth and veracity.

CLINTON, MICH., STRIKE

The Clinton Machine Co. at Clinton, Mich., is headed by Don Thomas, a young, husky, aggressive, former football player, mentally and physically able to do the work of two men. Starting on a shoestring, he has developed, in restricted quarters, an organization which produces an average of a thousand small motors a day.

When a labor dispute arose, a strike and a massed picket line resulted. Thomas led a group of back-to-work employees—who were satisfied with the proposed settlement of the strike issues—into the plant after a push-and-pull contest with the massed picket line.

Local pickets being unable to block the returning workers, sympathizers from adjoining plants in Michigan and from other States—including some from as far east as Buffalo, N. Y.—descended upon the city to the number of between 2,500 and 3,000. The entire population of Clinton is but 1,600.

Reliable information is to the effect that after the first back-to-work group went through the picket line, Conciliator Raymond Humphrey stated that he was informed by certain sources "that the present situation will not remain as such, and that if no settlement is reached today there might be trouble tomorrow morning or at some future date."

On the same day men on the picket line warned returning workers: "If we don't get what we want this afternoon, watch out tomorrow," while from 1,000 to 2,000 pickets demonstrated.

Emil Mazey, speaking from a sound truck parked in a street near the plant, was the first of the UAW officials to broadcast:

> We're going to demonstrate to employers in small towns that they are not going to push our workers around. This demonstration by Detroit and Toledo officials is just a sample of what's going to happen if this strike continues.

While the besieged workers sat at tables in the plant's yard waiting for breakfast, they were greeted with a shout of "scabs" over a UAW loudspeaker. Names of individuals who had returned to work were read, and Chester "Moon" Mullins, of Detroit, a union official, shouted over the loudspeaker:

> We could come right in there and knock hell out of you. We could put enough pickets around the plant to take the building apart, brick by brick.

Thomas had announced:

> I'll stand back of these rights—

The right to work—

> even if the situation results in my being found dead in the street. I believe I've got 2,000 people in the countryside backing me up.
>
> Violence is a hell of a way to find an answer to this thing. And it's a hell of a union that has to rely on violence to impose its will on its own workers, its union local, and an employer.

Thus was the stage set for civil strife.

When Thomas, having passed through the picket line with returning employees, was challenged to fight and turned on his tormentors, Captain Scavarda, who was on the scene in command of some fifty-odd State troopers, ordered him back into the plant, accused him of labor baiting, and threatened to arrest him.

When Virginia Service, an employee, who weighs 120 pounds, sought to pass the picket line on her way to work, she had her hat and blouse torn, her hair pulled, by Helen Houghton—weighing 168 pounds, assisted by several other pickets. Captain Scavarda, who was standing near, picked Virginia up, carried her out of the picket line, but no arrests of pickets were made.

A State trooper caught a picket throwing rocks, took him to Captain Scavarda's State police car, where he was released by Captain Scavarda, the captain said, for lack of evidence.

O. E. Priest, a man some 50 years of age, president of the local chamber of commerce, who had been interested in the back-to-work movement was accosted on a public sidewalk by one of the pickets who called him unprintable names, accused him of interference with the strikers' activities, and shoved him off the sidewalk. Captain Scavarda, aware of the episode, put his arm around or took hold of Priest, ordered him off the street and back to his office.

Employees seeking to leave the plant in trucks to obtain material were requested, or ordered, by State troopers not to do so.

A Ford auto, coming down the highway to deliver coffee to plant workers, was met by a group of pickets who threatened to overturn it. A citizen living nearby—not interested in any way in the controversy other than as a citizen—called to the driver to come in on his lawn. When the pickets followed, the property owner ordered them off and threatened them with a shotgun. At this display of the individual's lawful right to protect himself and his property, the pickets promptly retreated—as they did on a subsequent occasion when they appeared with a sound truck from which was directed at this individual's home obscene and profane language.

Employees remained in the plant, through fear of violence or from choice, and ate their meals on company property.

Soon it became evident that violence would result if the imported pickets remained on the scene. It also became evident that the sheriff and his force of three or four intended to take no action; that the State police would not prevent the hurling of threats and stones and the use of vile language over a loudspeaker at those who had returned to work. At the same time it became evident that the State police would not keep open the plant entrance and the adjacent streets and highways, nor disperse the crowd under the Riot Act which makes it their duty to disperse all unlawful, riotous, or tumultuous assemblies of more than 30 persons.

At this juncture, State and Federal mediators and conciliators came upon the scene. As a result, and because of the violence and the efforts of the conciliators and mediators, management yielded to certain demands, and an agreement was reached.

Whatever the cause, in every strike investigated the sequence of events was the same—a labor dispute, a strike, a picket line of local employees unable to prevent the return of employees who desired to work, then imported pickets, followed by violence, unlawful assembly, the appearance of State police, of State and Federal conciliators, a closing of the plant, except in Dowagiac, and a subsequent settlement.

Whether the settlement was forced by the violence, the threat of civil war, the inaction of the State police, or the urgency of the "requests" of the conciliators, the reader may judge.

BENTON HARBOR, MICH., STRIKE

In Benton township near Benton Harbor, Mich., Remington Rand employees went out on strike. There was a massed picket line completely blocking the entrances to the plant. The sheriff summoned his deputies, the police of St. Joe, Benton Harbor, and Niles. Through the prompt performance of their duties and without violence, the plant entrances were kept open to returning employees until the arrival of several hundred pickets who were incited by CIO regional officers to charge the sheriff's deputies and the police. Borne back by overwhelming numbers, the police used a fire hose and the pickets were beaten back, some of their leaders taken to the county jail. One was given a 90-day jail sentence; others presumably are awaiting trial.

State police appeared under the command of Captains Babcock and Scavarda, as did conciliators. Until their arrival, the plant entrances had been kept open. The law of the State of Michigan, which makes it an offense to interfere with an employee going to or from his work, was being enforced. Upon arrival of the State police in force, Captains Babcock and Scavarda called a conference with management, and upon, as they say, their request—which management said it considered an order—a truce was reached with the union representatives and the plant gates were temporarily closed. One of the objectives of the picket line, the closing of the plant to returning employees, was attained.

DOWAGIAC, MICH., STRIKE

At Dowagiac, Mich., Heddon Co. employees went on strike.

There was a successful back-to-work movement, some 70 percent of the employees returning to work. Then a picket line, made up of cars—an overwhelming majority of them driven by sympathizers from outside—appeared on the scene. They were driven so closely together that it was dangerous for employees to enter the plant, and in violation of State law successfully closed the plant entrances.

Until the arrival of the outside sympathizers—who operated under the direction of the sound truck driven by one Sirko, who has a record of a sentence of from 1 to 10 years for armed robbery—the local police force of nine had successfully maintained order and enforced the law, although there were a few incidents of violence.

Again the State troopers were called. Captain Scavarda, who had been sent out on all three occasions from State police headquarters at the capital, requested management to close the plant. Management refused. Mayor Black called upon the Governor for aid. The Governor issued orders to the State police to enforce the law.

Upon receipt at Dowagiac of news that the State troopers were on the way, the picket line of motor vehicles began to dissolve and, by the time the State police arrived, there were very few pickets left—practically all of the motor car pickets had left the vicinity of the plant and the outsiders had left town.

On the picket line at Dowagiac Helen Houghton reappeared. She had traveled some 67 miles from her home at Bronson to go on picket duty, as she had at Clinton. Here, too, when a school teacher—weighing 103 pounds—with a companion went through a picket line, Mrs. Houghton—still retaining her weight of 168, but accompanied by an assistant who had driven with her from Bronson—ran down the street and assaulted the school teacher, who was attempting to earn a little extra money to supplement her salary.

At Dowagiac, several people were arrested, some of them for as many as 4 or 5 alleged violations of the law. Here—as is so often the case—the strike over, requests for leniency were made and the justice of the peace imposed fines of $100 and costs of approximately $6 on Thomas Flynn and Harold Marsh, international representatives, and Helen Houghton. Smaller fines were imposed upon three local pickets.

Robert Waterson, the prosecuting attorney, announced that in view of pleas of guilty, five other cases against Flynn and some against local people would be dismissed.

The press announced that it was understood that the defendants will be reimbursed by their union, the total amount of fines and costs being $544.90.

As the principal source of income of the union is from moneys collected from the employees, it is evident that those who were assaulted and other back-to-work employees will be paying their share of the fines and costs imposed upon those who assaulted, those who prevented them from working.

MICHIGAN CITY (IND.) STRIKE

A strike developed at the Joy Manufacturing Co., Michigan City, Ind.

There was no violence on the picket line, but some name-calling and threats. There was a back-to-work movement which apparently was becoming stronger as the days went on. Employees were followed on their way home and threats were made to individual employees.

One employee living in New Buffalo, some 12 miles from the plant, had the motor of the truck, in which he went back and forth, damaged.

Paint was thrown against the sides of a home which another employee was building.

Another employee was beaten by three men as he approached his home.

A shotgun blast shattered the windows and drawn shade in the home of another employee, where the lives of the occupants would have been snuffed out had they not gone to another room just a short time before.

But the strike was unsuccessful. Employees were returning to work.

Mr. Cunningham, of the conciliation service with headquarters at Cleveland, wired the management to meet with Federal conciliators and the union representatives. The conciliators appeared, as did management, but union officials refused to negotiate while the chairman of a congressional committee was present.

Again, there was an intimation that the management should settle with the union.

Again, as in the three preceding cases, employees were at times prevented from working, and on all occasions during the strike some employees were forced, through fear, to forego their right to work.

GALION, OHIO, STRIKE

At Galion, Mount Gilead, and Kenton, Ohio, a distinguished inventor, who ranks with Edison and Bell, by his genius had made possible improvements in telephone equipment and kindred electrical devices.

The plants were manufacturing, among other things, a 4,000 line switchboard, completed instruments and parts for the Army, Navy and the Atomic Energy Commission.

At Galion there were—as always is the case—some who were dissatisfied; one, a chronic promoter of trouble. He brought the situation to the attention of Edward J. Duck, a CIO organizer, from Toledo, who moved into Galion determined to organize the Galion plant which, to a certain extent, supplied the plants at Mount Gilead and Kenton. His efforts were unsuccessful, many of the employees desiring to and returning to work. Then some 350 were penned in the plant by pickets brought in from other cities, again some from as far east as Buffalo, N. Y.

The local police, the sheriff's force, either failed or were unable to handle the situation and keep the plant open. The sheriff disarmed the Galion police.

Two men were kidnapped, are now awaiting trial. Some 500 or 600 windows of the plant were broken. Several pickets were arrested.

A representative of the Governor appeared, and through his efforts a truce was obtained. The union agreed that if the two pickets, who had been arrested and who were then in jail, would be released, the union in return would permit the release of 350 employees who for 9 hours had been imprisoned in the plant. With the approval of the Governor's representative, and without objection from the sheriff, the agreement was carried out. The imprisoned workers were permitted to go home; the pickets who had been arrested were released. Again the law-enforcing agencies bargained—and, to obtain the release of imprisoned workers, surrendered to the union demand.

The management—following the usual pattern—was then permitted to reopen the plant, provided it signed up with the union, agreed to accept the membership cards—many of which had been obtained by fraud and misrepresentation—after the cards had been checked, as evidence of the union's right to bargain for the employees in the Galion plant.

The employees were told that subsequently an election to determine a bargaining representative would be held. Just when such election would be held, or whether in the meantime the employees would be free from coercion and fear, no one seemed to know.

At the Mount Gilead, Ohio, plant a massed picket line attempted to keep the workers from their jobs. Two women, one 54 years of age, the other somewhat younger, defied them, attempted to force their way in. They were unsuccessful.

But here the sheriff appeared upon the scene and laid down the law to the leaders of the strike. He told them that a court injunction would be enforced. When it appeared that the countryside

was aroused, was about to arm, and, like the patriots of Lexington and Concord, would meet the unlawful activities of the pickets in an effort to defend themselves and their opportunity to work, Mr. Duck, "Toots" Martin, and the other CIO leaders, realizing that they were helpless before officials determined to enforce the law, got out of town.

Earlier, at the Kenton, Ohio, plant, 25 masked wreckers descended upon the night watchman, overpowering him. They injured and destroyed not only instruments which were in the process of being completed, and finished instruments, but the highly complicated tools necessary to production. Thus, not only were the efforts of the Army and the Navy to build up our national defense hindered and delayed, but instruments needed by those attempting to develop and perfect the atomic bomb for national defense were destroyed.

There is available no evidence whatever which even tends to show that any interest was served by such destruction other than the interests of the enemies of our country or of those who were seeking to organize the plant. Whether Communists who had infiltrated into the CIO, or union organizers, were responsible for the destruction is a matter of speculation, not of proof.

Over the loudspeaker at Clinton, after thousands of pickets had taken over the town and blocked entrance to the plant, Emil Mazey—and his statement is repeated—announced that the CIO was "going to demonstrate to employers in small towns that they are not going to push" the members of his union around. There was added the statement that "this demonstration by Detroit and Toledo officials is just a sample of what's going to happen if this strike continues."

There was a further threat by a union official that "we could come right in there and knock hell out of you. We could put enough pickets around the plant to take the building apart, brick by brick."

These threats were met by the assertion of Don Thomas that "I'll stand back of these rights"—the right to work—"even if the situation results in my being found dead in the street. I believe I've got 2,000 people in the countryside backing me up."

At Galion, a machine gun, shotguns, a rifle and a German Luger were carried by the imported pickets. An otherwise peaceable citizen threatened to get his rifle and protect his home by shooting. At Michigan City a returned war veteran announced publicly that he learned to kill in Germany, and intimated he would do some of it if he was assaulted in his home.

All these incidents are evidence that the lawlessness of goon squads may, if the law is not enforced, tend to bring on civil strife, a strife which we shall all deplore and regret.

Nothing is to be gained by ignoring such situations. Nor can those in public office, charged with enforcing law and order, any longer hide behind the subterfuge that there is no law, at least in Michigan, to prevent violence and rioting.

Since 1867 and until October 12, 1947, section 28.584 of the Statutes of Michigan provided:

SEC. 352. Any person or persons who shall, by threats, intimidations, or otherwise, and without authority of law, interfere with, or in any way molest, or attempt to interfere with, or in any way molest or disturb, without such authority, any mechanic or other laborer, in the quiet and peaceful pursuit of his lawful avocation, shall be guilty of a misdemeanor.

That law was amended by Act 297 of the Public Acts of 1947, which became effective October 12, 1947. That act reads as follows:

(28.584) SEC. 352. Any person or persons who shall, by threats, intimidations, or otherwise, and without authority of law, interfere with, or in any way molest or attempt to interfere with, or in any way molest or disturb, without such authority, any person, in the quiet and peaceful pursuit of his lawful occupation, vocation, or avocation, or on the way to and from such occupation, vocation, or avocation, or who shall aid or abet in any such unlawful acts, shall be guilty of a misdemeanor.

Act 176 of the Public Acts of 1939, section 17, until October 12, 1947, was the law in Michigan. It reads:

SEC. 17. It shall be unlawful for any employee or other person by force, coercion, intimidation, or threats to force, or attempt to force any person to become or remain a member of a labor organization, or for any employee or person by force, coercion, intimidation, or threats, to force or attempt to force any person to refrain from engaging in employment. Violation of this section shall be a misdemeanor and punishable as such.

That law was amended by Act 318 of the Public Acts of 1947 which became effective October 12 last. The amendment reads:

SEC. 9f. It shall be unlawful to hinder or prevent by mass picketing, threats, intimidation, force, or coercion of any kind the pursuit of any lawful work or employment, or to obstruct or interfere with entrance to or egress from any place of employment, or to obstruct or interfere with free and uninterrupted use of public roads, streets, highways, railways, airports, or other ways of travel or conveyance. It shall be unlawful for any person acting either individually or as one of a group to engage in picketing a private residence by any means or method whatsoever: *Provided*, That picketing, to the full extent that the same is authorized under constitutional provisions, shall in no manner be prohibited.

That today is the law in Michigan.

Nor is that all. Riots and unlawful assemblies are in Michigan outlawed by statute.

Section 28.789, Michigan Statutes, Annotated, as amended by section 521 of act 106 of the Public Acts of 1941, approved on May 20, reads as follows:

Suppression of unlawful assemblies—if any persons, to the number of 12 or more, being armed with clubs, or other dangerous weapons, or if any persons, to the number of 30 or more, whether armed or not, shall be unlawfully, riotously, or tumultously assembled in any township, city, or village, it shall be the duty of the mayor and each of the aldermen of such city, the supervisor of such township, the president and each of the trustees or members of the common council of such village, and of every justice of the peace living in such township, city, or village, and also for the sheriff of the county and his deputies and any member of a city police force and any member of the Michigan State Police, to go among the persons so assembled, or as near to them as may be with safety, and in the name of the people of this State, to command all the persons so assembled immediately and peaceably to disperse: *Provided, however*, That the above provision with reference to any member of a city police force shall not apply to any such police officer while he is privately employed. (Effective January 10, 1942.)

Section 28.790, Michigan Statutes, Annotated, riots and unlawful assemblies, failure to disperse when commanded; calling aid; arrests, section 522:

If the persons so assembled shall not, upon being so commanded, thereupon immediately and peaceably disperse, it shall be the duty of each of said magistrates and officers to command the assistance of all persons there present, in seizing, arresting, and securing in custody the persons so unlawfully assembled, so that they may be proceeded against for their offenses according to law.

A subsequent section reads as follows—riots and unlawful assemblies—neglect of officers to suppress, section 524, section 28.792, Michigan Statutes, Annotated:

Any mayor, alderman, supervisor, president, trustee or member of a common council, justice of the peace, sheriff or deputy sheriff, having notice of any such riotous or tumultuous and unlawful assembly as is mentioned in this chapter, in the township, city, or village in which he lives, who shall neglect or refuse immediately to proceed to the place of such assembly, or as near thereto as he can with safety, or shall omit or neglect to exercise the authority with which he is invested by this chapter, for suppressing such riotous or unlawful assembly, and for arresting and securing the offenders, shall be guilty of a misdemeanor, punishable by imprisonment in the county jail not more than 6 months or a fine of not more than $250.

That is the law in Michigan today.

Section 28.794, Michigan Statutes, Annotated, as amended by section 521 of Act 106 of the Public Acts of 1941, approved on May 20, reads as follows:

Control of armed force: Whenever an armed force shall be called out in the manner provided by law for the purpose of suppressing any tumult or riot, or to disperse any body of men acting together by force, and with intent to commit any felony, or to offer violence to persons or property, or with intent, by force or violence, to resist or oppose the execution of the laws of this State, such armed force, when they shall arrive at the place of such unlawful, riotous or tumultuous assembly, shall obey such orders for suppressing the riot or tumult, and for dispersing and arresting all persons who are committing any of the said offenses, as they may have received from the Governor, or from any judge of a court of record, or the sheriff of the county, any chief of police or his duly authorized representative, or any member of the Michigan State Police, and also such further orders as they shall there receive from any two of the magistrates or officers mentioned in the first section of this chapter.

Nor are the above citations the end of statutory provisions which can be used to protect law-abiding citizens.

There is a statute which makes it a felony to maliciously destroy or injure personal property. It reads as follows:

Maliciously destroying or injuring animals and personal property: Any person who shall

willfully and maliciously * * * destroy or injure the personal property of another, by any means not particularly mentioned or described in this section, shall be guilty of a felony. (Sec. 377, Act No. 328, Public Acts of 1931, sec. 28.609, Michigan Statutes, Annotated.)

There is another statute which makes it a felony to maliciously injure or destroy the home or a building of another. That statute reads like this:

Maliciously injuring or destroying house, barn, or building of another: Any person who shall willfully and maliciously destroy or injure any house, barn, or other building of another, or the appurtenances thereof, if the damage resulting from such injury shall exceed $50, shall be guilty of a felony. If the damage done shall be $50 or less, he shall be guilty of a misdemeanor. (Sec. 380, Act 328, Public Acts 1931, sec. 28-612, Michigan Statutes, Annotated.)

Then, there is still another statute which, if enforced, would do away with massing at the gates of an entrance to a place of employment. That statute reads:

Disturbance of meetings: Any person who makes or excites any disturbance or contention in any tavern, store or grocery, manufacturing establishment, or any other place of business or in any street, lane, alley, highway, public building, grounds, or park, or at any election where citizens are peaceably and lawfully assembled, is guilty of a misdemeanor. (Sec. 17115-170, 1940 Supplement Mason's Code, reenactment of secs. 16825; Act No. 328, Public Acts of 1931, sec. 170, Michigan Statutes, Annotated, 28.367 amending sec. 16.839, CL 1929.)

As everyone knows, assault and battery is still an offense against the law. So it will be seen that there is ample law—upon the books in Michigan, at least, and it may be assumed that other States have similar statutes—to protect citizens in the enjoyment of their constitutional rights; to punish those who, using organized labor as a shield and strikes as a defense, engage in unlawful activities.

The local law-enforcing officers at Benton Harbor, at Dowagiac, at Michigan City, Ind., made a successful effort to enforce the laws which prohibit interferences with employees attempting to go to their jobs until imported goon squads or pickets appeared on the scene.

At Clinton, at Benton Harbor, the State police made no worth-while effort to keep the entrances to the places of employment open. On the contrary, at Clinton and at Benton Harbor, on the advice of State authorities, the plants were closed and workers denied the rights guaranteed them by the State statutes.

At Galion, Ohio, the local officers were unsuccessful in their efforts to protect the workers. Upon the arrival of State authorities, a deal was made. The plant was closed, imprisoned workers were released, when the mayor of the city agreed to release two pickets who had been arrested.

It is not within my province, nor have I any disposition to criticize the State police of Michigan. Individually, the troopers stand for law enforcement. They are alert, constantly on the job, and effective, except when hampered by a policy which Commissioner Leonard says he inherited with the office.

Not only in Michigan but in many other places it has, in recent years, been the policy of law-enforcing officers to excuse during labor disputes and strikes all sorts of violations of the law. In many places, on many occasions, that policy has been approved by the public, but law violations have become so numerous, so serious, that the people now—at least in the smaller cities and in the rural communities—are demanding that all officers enforce the law, prevent violence, rioting, the destruction of property, and all activities which prevent the man who wants to work, who must earn the money to provide himself and his family with a livelihood, from going to and from his job.

Law enforcement at the beginning of strikes, insistence that pickets and those on strike obey the same laws which apply to other citizens, will solve the major part of our labor troubles.

Mediation and conciliation under the Taft-Hartley Act carried on in a spirit of fairness, with the determination to, in good faith, solve the issues, will take care of all others, except where a settlement is prevented by those who choose to defy the law.

EMPLOYEES DENIED THE RIGHT TO WORK

The procedure followed in these four strikes, and the results obtained, are familiar and follow quite faithfully the methods employed by certain labor organizers to impose their will upon employers, deprive individual employees of the opportunity to exercise their right to work, and force them into a union.

Unfortunately, the success of these methods strengthens the organizer's power, not only over the unorganized employee but over union membership, and tends to establish autocratic rule in the unions. These methods violate the Taft-Hartley Act, but since the penality is limited to loss of the benefits of the act and punishment for violation of any injunction which has been issued, the Federal remedy is not always effective.

A study of these cases shows the following steps:

First. A labor dispute, either real, growing out of grievances of the employees themselves, or one instigated and stressed by those who have an objective of their own in mind.

Second. A strike, carried on first by employees of the struck plant or by pickets of the same organization from adjoining plants.

Third. Then, if the strike is unsuccessful, the employer refuses to negotiate, or if a back-to-work movement seems to be succeeding, a calling in of hundreds or, if necessary, thousands of pickets from other cities; if necessary, from other States.

Fourth. The intimidation not only of those who desire to work, but, in the smaller cities, of the whole population, by a show of force, by the general use of vile, indecent, profane, and threatening utterances. The destruction of or injury to company property, the property of individuals, assaults upon those who insist upon working.

Fifth. When the violence caused by the invading goon squads, pickets, and sympathizers gets out of hand, as is almost always the case when the strike is not successful in the first instance, the State officials are called upon.

Sixth. If they have not already appeared, then come State and Federal mediators and conciliators, who, joining with law-enforcement officers, either request or order that the plant be closed until an agreement is reached.

Inasmuch as the purpose of the strike and the picket line is to force management to come to terms and to prevent employees who desire to work from going to and from their jobs, the company's surrender to the request of the conciliators and the police means a victory for the union.

Often it means that those who did not desire to strike; that those who, after the strike, desired, because of company concessions or otherwise, to go back to work, are, during the progress of the strike, deprived of the opportunity to earn a livelihood.

A further result is that often, by the settlement between the employer and the union, the employees who did not desire to strike, who have no grievance, are forced to submit to the control of union officials.

In Michigan, and presumably in many other States, there are statutes, not enforced, but which, if enforced, provide a remedy.

In all the States and at common law, it is an offense to commit an assault and battery. Seldom is that law enforced when the battery occurs during a strike.

In Berrien County, Sheriff Kubath, acting under the direction of Prosecutor Joseph Killian, enforced the law, prevented violence, made it possible for individuals to exercise their right to work, at least until the coming of the State police, upon whose arrival the plant was closed.

When hundreds or thousands of pickets and their sympathizers invade a city like Clinton, which numbers but some 1,600 people, the local authorities cannot cope with the situation, although it was demonstrated at Dowagiac, a slightly larger city, that a determined police force, acting upon direct orders from the Governor, can, and in that case, did force obedience to the law without a semblance of bloodshed.

The knowledge of their coming and of the orders which they had received caused the unlawful picket line to vanish. Similar activities under like orders in larger cities, even though the pickets numbered thousands, would undoubtedly provoke but little violence or bloodshed and, in the end, would establish the law's supremacy, for this country has not yet accepted the doctrine that the law must yield to goon squads, even though in 1937, during Governor Murphy's administration, the police, the State troopers, the Michigan National Guard, and the orders of the court were openly defied.

From that era of lawlessness, sanctioned by Governor Murphy without disapproval from the President of the United States, with whom the Governor

stated he was in daily contact, the country is now slowly recovering.

The action of the local law-enforcing officers of Berrien County, proceeding under the orders of Prosecutor Killian, may be the opening gun of a new Lexington and Concord, which will free the worker from coercion either by employer or union; which will enable him to exercise his right to earn a livelihood; to, in the words of the Taft-Hartley Act, which I quote:

> Have the right to self-organization, to form, join, or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection, and shall also have the right to refrain from any or all of such activities except to the extent that such right may be affected by an agreement requiring membership in a labor organization as a condition of employment as authorized in section 8 (a) (3).

It may be that a policy of law enforcement, fostered and given effect by the governors of the various States, may sound the death knell of the goon squad, of the violence, coercion, and intimidation which all too long have prevented the individual worker from exercising his right to work.

If it does not, then an amendment to the Taft-Hartley Act, defining mass picketing, preventing picketing of local plants by invading sympathizers numbering hundreds or thousands, may be necessary.

If an effective legal remedy is not found, the hearings indicate clearly that then will come armed resistance to goon-squad methods, especially in the smaller communities, where farmers and others have children and wives employed temporarily in the factories.

In the rural communities, not only are the folks law abiding but they are insistent that others obey the law.

If the law fails to function, they will, as always has happened in the history of our people, take measures to protect themselves. And, when they do, the ultimate result will be a disastrous defeat for the goons, and irreparable injury to the cause of organized labor.

Wise labor leaders will carry on their battle for better working conditions in a legal, peaceful way. When their battle is so waged, victory will be won, for the overwhelming majority of our people are in sympathy with the men and women who work in industry.

Following the suggested path, and accompanying it with the policy of doing a day's productive work for an adequate day's wage, labor's victory will be certain.

But lawlessness will bring only defeat.

The right to work is more sacred than the right to strike.

CROW TRIBE OF INDIANS

Mr. WELCH. Mr. Speaker, I ask unanimous consent that the Speaker be authorized to appoint two additional conferees on the bill (S. 1317) to give to members of the Crow Tribe the power to manage and assume charge of their restricted lands, for their own use or for lease purposes, while such lands remain under trust patents.

The SPEAKER. Is there objection to the request of the gentleman from California? [After a pause.] The Chair hears none, and appoints the following additional conferees: Mr. D'EWART and Mr. MURDOCK.

The Clerk will notify the Senate of the action of the House.

EXTENSION OF REMARKS

Mr. YOUNGBLOOD (at the request of Mr. KEATING) was given permission to extend his remarks in the RECORD and include an article from a Detroit newspaper.

Mr. JOHNSON of California asked and was given permission to extend his remarks in the RECORD and include a statement by the president of the National Biscuit Co.

Mr. PLUMLEY (at the request of Mr. JENKINS of Ohio) was given permission to extend his remarks in the RECORD.

Mr. PHILBIN asked and was given permission to extend his remarks in the RECORD and include an article from the Boston Post.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. NICHOLSON (at the request of Mr. GOODWIN), for 1 week, on account of official business.

The SPEAKER. Under previous order of the House, the gentleman from Florida [Mr. SIKES] is recognized for 15 minutes.

WHAT ABOUT THE RESERVES?

Mr. SIKES. Mr. Speaker, it has been more than 2 years since the shooting stopped in World War II. It soon will have been 3 years since VE-day. But throughout the world there continues uncertainty, tension, strife. World peace is still only a distant hope, a rainbow, beautiful in the slowly clearing skies.

In a world so continuously beset with economic and social problems it ill behooves us to become lethargic in our thinking on our own Nation's security. We, in Congress, should seriously take stock of our defense plans in order to determine if our program is adequate and if the proper emphasis is being placed on the component parts of our security forces.

Already two world wars have occurred within our lifetime. In both we have been most fortunate in having a dual ocean barrier as well as allies actively holding off our enemies. Both the ocean barriers and the Allies provided us with vital time needed to mobilize our citizen forces, call into Federal service the National Guard, call to active duty our Reserve Officers, institute a selective service system; in brief, to organize, equip, and train our citizens and make of them a fighting force. It took many, many months to accomplish this.

Long-range bombers, air-borne and parachute troops, rockets and guided missiles have effectively diminished the value of our ocean barriers. Our allies now look to us for aid and succor to even maintain a mere existence. To count on substantial aid from them in the event of an attack on this country would be wishful thinking.

All of this can mean only one thing—we should seriously review the present concept of our defense forces.

There are three recognized methods by which a nation may provide for its security. A standing professional force, complete reliance upon citizen soldiers, or a combination of the two.

Traditionally, we have placed our reliance in the combination, although our history, brief though it is, shows the use of all three during various periods. General Washington, of necessity, built a force largely from untrained civilians. The Indian wars, because of their limited scope, were fought entirely with professional soldiers. All our great military leaders from General Washington through General Marshall have advocated a trained citizenry in addition to a standing army.

Modern wars have become global in scope, involving tremendous armies and navies and stupendous costs. To maintain, in time of peace, professional forces of a size to wage a modern war would be economic suicide in a democracy.

With the advance in technical procedures and scientific use of methods and machines which typify modern warfare, it would be unwise to rely entirely on part-time citizen soldiers.

Of all the major wars in which this country has engaged, only two, the Revolution and the Civil War, were fought within our boundaries. However, there is every reason to believe that any future conflict will, initially at least, create a theater of war here, in the United States. A future aggressor will seek to rely on many Pearl Harbors, within our borders. to paralize this Nation industrially and militarily at the outset of war. Therefore, from every viewpoint, economically, technically, and defensively, it would appear wise to follow our traditional plan of a relatively small, well-trained professional force augmented by a large, trained and organized citizen reserve.

From a logical security viewpoint it becomes essential that we consider the relative sizes of the professional and reserve forces, and in particular the degree of organization and size of the reserve components.

Many of the concepts of the past based on wars fought outside this country must be discarded and our plans realistically prepared for a major conflict with the fighting war beginning within our homeland.

With the always-present possibility of many Pearl Harbors suddenly shocking this peaceful Nation into the awful realization of another war, it becomes essential that our defense forces not be paper organizations and that those that do exist in fact be capable of immediate action to the greatest degree possible.

Because of cost, our professional forces will of necessity be held to a minimum. They are dangerously low now. There is little likelihood that they will be increased during peacetime. This leads us to the inescapable conclusion that the Reserves must be large, well organized, well trained and equipped.

Historically, this Nation's security dollars are limited. They have to be stretched as far as possible. Under this condition, some components of our security system may be bypassed or ignored. I fear that such is the case with

our Reserve forces today. They are largely paper forces. They are not on a footing for immediate service, nor are they organized on a basis commensurate with the emphasis placed on them in the national security picture. We must bring about a national realization of the necessity of doing something now, to properly organize, equip, and train our citizen defense forces.

Too much of the planning by the armed services for national security has been based on the assumption that Congress would pass universal military training legislation. Yet the experience gained in the long-drawn-out fight made on this legislation in the House Committees on Military Affairs and Armed Services indicates clearly that years of delays may be encountered before passage is obtained. If it were passed tomorrow, 2 or 3 years could elapse before it were fully effective. This is not an argument against UMT. It is a statement of facts which concern our national defense.

There appears to be one alternative. It is the immediate development to full strength of the National Guard and the Organized Reserve. Thus far, efforts for the development of both are altogether too half-hearted for the good of the Nation. Inaction, lack of training, and low morale are taking dangerous toll in these organizations. The people in the field appear to be doing all they can, but they need more backing from Washington.

Mr. CARROLL. Mr. Speaker, will the gentleman yield?

Mr. SIKES. I yield.

Mr. CARROLL. Does the gentleman have any idea how many men we now have in the Officers Reserve Corps?

Mr. SIKES. I do and I am going to touch on that.

Mr. CARROLL. And also as to the enlisted personnel? Is the gentleman going to discuss that also?

Mr. SIKES. I am. I will be glad to yield to the gentleman if he cares to make a contribution along those lines.

Mr. CARROLL. I have asked concerning that because it occurs to me that there is not very much information as to how much of the military budget is being used for the Reserves.

Mr. SIKES. A very small percentage. The amount requested, particularly by the War Department, was small in comparison with the over-all military budget. I believe the departments received all they requested from Congress for Reserve and National Guard activities. I am going to comment further on this matter and after I do so if the gentleman cares to inquire further, I shall be glad to discuss it with him. I am glad to note my distinguished friend's interest in the matter.

The strength allotted to the National Guard by the Departments of Army and Air is close to 700,000 officers and men. Today in fact the National Guard is made up of skeleton units, partially equipped, which total about 200,000 men. Can we afford to allow the National Guard to remain as skeleton units awaiting possible passage of UMT legislation? Is it not more practical to inaugurate a drive of sufficient amount to bring these units up to usable strength, to equip and train them for modern warfare, as War Department blueprints long ago envisioned?

The Organized Reserve, in which over a million wartime officers and men signified their interest by joining, is today anything but an effective security force. Only a small percentage of its officers have received assignment to actual functioning units. The enlisted reserves, about 600,000 of them, are altogether too small in number. Enlisted for 3 years, they are only in the larger centers being incorporated into active units. Very little equipment has been released to Reserve units.

Are we willing to allow 600,000 men of the Enlisted Reserve Corps to live out their enlistments without being placed in units of the Organized Reserve Corps? Are we to lose the services of these most valuable veterans of World War II because they have not been integrated into an adequate Reserve program?

Is it not practical to build realistically on what we have at hand? We have today in the civilian components of the Army, Air, and Navy Reserves a substantial force of officers and men as fine as this world has ever seen. If properly organized, equipped, and trained we could have a security force right now which might well prove invaluable in the event of emergency.

Certainly 2½ years is sufficient time for the leaders of our armed forces to realize that something should have been done with our citizen components to effectively weld them into the proper kind of security forces.

All of the blame for the present weakness of the Reserve components cannot be attached to the armed services. Congress must accept its share. Legislation which is vitally needed to help insure strong functioning organizations now lies dormant in this House. I refer particularly to measures for inactive-duty training pay and for a retirement program for the Reserves.

Our professional forces are scattered all over the world. Their job is a difficult and a far-flung one. They are doing that job in a splendid manner. I have no quarrel with the work of our military establishments, as far as that work goes. But we are not effectively using the backlog of trained men now available and eager to serve. They are all that we have to fall back on in the event our small standing forces should suddenly be engaged. It appears exceedingly unwise to fail to take full advantage of the strength and security they represent. A little additional emphasis on National Guard and Reserve organization will make a great deal of difference in the immediate effectiveness of our fighting forces.

All of our security measures have one purpose only—that we will be able to avoid another war while exercising sound leadership toward world peace and plenty. This Nation has never wanted war and never will seek war. We are a peaceful people, coveting no territory, desiring no interference in the rights of other people to their own thinking, political or otherwise. But we do insist on our own right to adhere to the principles of the "four freedoms."

We know clearly, from the harsh reality of experience, that strength is for the moment our best insurance against involvement in war, our best guaranty of the right to build toward lasting world peace.

EXTENSION OF REMARKS

Mr. ROBSION asked and was granted permission to extend his remarks in the RECORD and include a radio address which he recently made.

The SPEAKER pro tempore (Mr. JOHNSON of California). Under previous order of the House, the gentleman from Indiana [Mr. LANDIS] is recognized for 30 minutes.

AN EXPLANATION OF THE TAFT-HARTLEY ACT

Mr. LANDIS. Mr. Speaker, in order to bring about peace in the industrial world we must encourage cooperation and fair play in the public interest and prevent either management or labor from using monopolistic practices to restrict production and competition.

As the ranking member of the House Labor Committee, I will endeavor to prove that the Taft-Hartley law is working and show how it protects the interests of the individual worker, the union, management, and the paramount interest of the public.

The data collected by labor relations' field men shows that the Taft-Hartley law is getting results.

Since the passage of the act there has been a much better understanding, on the part of unions and companies alike, as to what is involved in collective-bargaining process, than there has been at any other time in our history.

Many of the rank and file of labor are doubting their leadership charges that the Taft-Hartley Act is a slave-labor law, because the workers have not become slaves and their unions have not been destroyed. They are now experiencing greater freedom from the excessive power of union-hall officials.

The Labor Management Relations Act of 1947 has not retarded the growth of the labor movement. On the contrary, union membership has increased under the law. The teamsters' union, alone, has acquired approximately 100,000 new members since the passage of the act, according to Daniel J. Tobin, international president.

The new law has not affected the ability to bargain for higher wages and better working conditions. Actually, the best contracts ever negotiated have been signed.

The section dealing with the separation of the prosecution and judicial powers of the NLRB is being accepted by union leaders with considerable enthusiasm.

The rank and file of labor is just as anxious as the rest of us to reduce strikes. The average workers earned $72 more in 1947 than in 1946 due to industrial peace. In 1947 there was a loss of only 16 days' employment to the average worker because of strikes, as compared with 25 days in 1946. There were 81,000,000 less man-days idle in 1947 than in 1946, although the act did not take effect until August 1947.

Four million six hundred thousand workers lost an average of 25 days because of strikes in 1946. At $8 per day, their total loss in wages was $920,000,000. Two million two hundred thousand workers lost an average of 16 days in 1947. At $8 per day, their total loss in wages was $281,600,000. In comparison, fewer strikes in 1947 saved the American workers $633,400,000.

We had 1,385 less work stoppages in 1947 than in 1946. The monthly trend in work stoppages has decreased since the passage of the act as follows: In August there were 335 work stoppages; in September, 200; October, 175; November, 150; and, December, 120.

The Labor Board has on file 29,418 anti-Communist affidavits. They have been signed by 20,934 AFL, 6,715 Independent, and 1,769 CIO, union officers. Many Communists were dismissed from union leadership because they refused to sign these affidavits.

The Taft-Hartley Act is the law of the land. But the smooth administration of the act will be greatly hampered if labor, management, or Government seeks to enforce its rights without full consideration of the public. Success of the act will also depend upon the cooperation and good judgment used by the National Labor Relations Board, the general counsel, and the Federal Mediator.

The Taft-Hartley Act does not apply to the railroad brotherhoods. Congress exempted them because they are subject to the provisions of the Railway Labor Act which has been very successful in promoting good labor-management relations in the past several years.

In writing the Taft-Hartley Act, the objective of Congress was not to outlaw strikes, but to discourage and minimize their effect. Congress expects to protect national interests against the consequences of major disagreements. There will always be strikes as long as we live in a society that permits men to lay down their tools to enforce a demand or voice a grievance. We cannot stop men from disagreeing, nor should we allow the Government to attempt solution of all disagreements.

Our top labor leaders have admitted that wildcat strikes and jurisdictional strikes are wrong. They also contend that unions as well as management must abide by their contracts. Many labor leaders see nothing wrong in making financial reports available to their membership and the Department of Labor. Most of them are in favor of the Communist section which requires labor leaders to sign anti-Communist affidavits.

The principal and outstanding causes for amendments to the Wagner Act were:

Abuses and racketeering by labor leaders; secondary boycotts which deprived our citizens of deliveries of milk, bread, meat, fruits, and vegetables; Petrillo's methods used to deny children in 200,000 rural schools the opportunity to learn to play musical instruments; jurisdictional strikes in the building trades which delayed our housing program; poor administration of the act by the NLRB and open congressional hearings held by the labor committees which gave the facts to the public.

LABOR ABUSES RESPONSIBLE FOR TAFT-HARTLEY ACT

A few outstanding examples are as follows:

First. According to an indictment—February 1, 1940—a Chicago union, along with contractors, prohibited the installation of any fabricated stone finished in the Bedford-Bloomington district of Indiana and members of the Chicago unions refused to work in or on buildings upon which limestone finished in that district was used. Just think, limestone finished in the Bedford-Bloomington area is 100-percent union fabricated and its sister unions refused to use it.

Second. Owners of a cafe were asked to sign a union contract. They expressed a willingness to sign provided their employees voted to join a restaurant-workers' union. However, not one expressed a desire to join. The business agent, upon being informed of the workers' decision, stated it was mandatory that the owners sign a contract, regardless of the desire of the employees. The union agent later informed the owners that "if they didn't sign, they would have to suffer the consequences." The consequences were: (1) A picket line, (2) stench bombing, (3) acid throwing in patrons' cars, (4) seat cushions and tires slashed on employees' cars, (5) roofing nails put in the street in front of the cafe, (6) five plate-glass windows were broken.

While all this was going on, no dispute existed between the employees and employer.

Third. Two New York veterans, returned from the war, purchased a gasoline truck and entered the fuel-oil business. In a short time they had 12 employees. One morning a union agent phoned that their trucks would not be loaded at the docks unless they signed with the union. The veterans told him they had no objection to their employees joining the union if they wanted to and invited him to talk to the employees and hold an election. They held the election and the vote was 12 to 0 for no union. Another election was later held and the results were the same. After that a union agent called and told the veterans to quit fooling around and informed them they would either sign or they would not get any oil the next morning. They did not get the oil. The union agent told them the regular initiation fee was $37.50, but if they did not pay that day, the fee would be $75. They had to sign to remain in business.

Fourth. There was outright open warfare in Pittsburgh, Pa., between CIO and AFL unions. Let us note just a few things that happened.

(a) An employer had his place of business wrecked by an explosion so violent it shattered 150 neighborhood windows.

(b) Another employer had his two one-story buildings damaged. The blast broke 50 nearby windows.

(c) The violence consisted of 5 explosive bombings; 9 fire bombings; 2 beatings; 3 trucks burned; 2 arson cases; 1 truck driver stoned; and 23 smashed windows, not counting those broken by bomb explosions. The people that were injured and had their property destroyed were innocent victims and had no say as to which union should be in control.

Fifth. In some areas, unions have threatened to cut off supplies of gasoline to service-station owners unless such owners join the union. Also similar tactics have been used to force grocery-store owners to join. Remember, they owned their own places of business, hired no help, but still were forced to join a union in order to operate their own business.

There have been more violent irresponsible statements against the Taft-Hartley Act than have appeared against any other piece of legislation in many years. Labor leaders denounced it, both before and after its passage. Workers were told it was a slave-labor law.

The Taft-Hartley Act is not a slave-labor law according to section 502, title 5, of the act:

> Nothing in this act shall be construed to require an individual employee to render service or labor without his consent, nor shall anything in this act be construed to make the quitting of his labor by an individual employee an illegal act; nor shall any court issue any process to compel the performance by an individual employee of such labor or service, without his consent.

This act is not a vicious antilabor act, as many labor leaders have tried to make the rank and file of labor believe.

First. The act does not stop industry-wide bargaining.

Second. It does not abolish the right to strike.

Third. It does not outlaw the union shop.

Fourth. It does not take away union welfare funds.

Fifth. It does not stop the union check-off.

The Taft-Hartley Act does stop labor abuses and racketeering:

First. The act does stop jurisdictional strikes.

Second. It does stop wildcat strikes.

Third. It does stop secondary boycotts.

Fourth. It does allow employers the right of free speech as long as they do not threaten the employees or promise rewards for not joining a union.

Fifth. It does prevent Communists from holding offices in unions.

LABOR'S BILL OF RIGHTS

The Taft-Hartley Act will specifically protect the American worker:

First. They still have the right to organize and bargain collectively through representatives of their own choosing.

Second. Individual workers are protected against Communist labor officials.

Third. Workers are protected against excessive initiation fees.

Fourth. They are protected against political assessments.

Fifth. They will know how their union dues are spent.

Sixth. A worker cannot be fired on union orders unless he fails to pay his union dues.

Seventh. Members can express themselves on union matters without fear of losing their jobs.

Eighth. Workers are protected against loss of work through secondary boycotts and jurisdictional strikes.

Ninth. The act protects the individual member against the diversion of his welfare funds.

Tenth. The act gives the worker a right to vote. Every worker is to enjoy the right to vote in an election to determine whether union membership is to be required of all workers. Members will have opportunities to vote to accept or reject the employer's last offer.

Eleventh. They can take their grievances direct to their employers.

Twelfth. Skilled workers can form their own craft union rather than remain a member of a plant-wide union.

Thirteenth. A worker cannot be forced to strike against his will.

Fourteenth. An employee can sue the union in case of an illegal strike.

Fifteenth. The act gives the worker the right to work.

Sixteenth. It protects him against involuntary servitude because he still has the right to strike.

BENEFITS TO UNIONS

The Taft-Hartley law continues the many protections of the Wagner Act to unions and in addition grants new rights:

First. Collective bargaining rights are continued.

Second. Protection against membership raiding by other unions.

Third. Protection of craft units to form their own unions if the majority of the craft desire it.

Fourth. The right to sue employers for breach of contracts arrived at by collective bargaining.

Fifth. Provision for professional workers to form separate bargaining units.

Sixth. Protection of the right to strike.

Seventh. All bona fide unions are to be treated alike.

BENEFITS TO MANAGEMENT

Management who had few rights under the Wagner Act, now receives recognition:

First. Management will have greater freedom in hiring workers.

Second. Supervisors are agents of management and consequently have no protection of the Wagner Act.

Third. The right to sue unions for damages in the case of contract violations, secondary boycotts, and jurisdictional strikes.

Fourth. Freedom of speech in presenting news and arguments, provided they contain no threats or promise of benefits.

Fifth. The right to require unions to bargain in good faith.

Sixth. The right to enforce the required cooling-off period of 60 days before strikes by discipline or discharge of employees illegally striking during that time.

Seventh. The right to petition for an election to determine the bargaining agent.

Eighth. Greater protection to plant property through the requirement that guards may not be members of the same bargaining unit with production employees.

Ninth. Freedom from union featherbedding demands.

Tenth. The right to discharge workers who participate in wildcat strikes.

BENEFITS TO THE PUBLIC

For the first time, the paramount interest of the public and State is recognized:

First. A decrease in unnecessary strikes, work stoppages, and interruptions to production and distribution of goods where the public has been the innocent victim of union racketeering, wildcat strikes, and jurisdictional strikes.

Second. Potential lessening of industry-wide strikes threatening the national health and safety.

Third. Protection for the 75 percent of labor who are unorganized and who might wish to remain so, (a) against force and physical violence by labor unions to force membership, and (b) against the threat of insecurity from inability to obtain jobs.

Fourth. Possibility of redress for damages suffered by individuals and businesses as a result of illegal union activity and racketeering.

Fifth. Reinforcement of the principle of protection of the public interest over and above the private interests of any particular individual group.

The most important item to the public interest is the desire to be protected from ill-advised strikes.

LABOR'S RIGHT TO ORGANIZE

After making a thorough study of the Taft-Hartley Act, you realize that nothing is designed therein to undermine collective bargaining, permit employers to interfere unlawfully with organizing activities of employees or destroy unions that represent their employees. The law preserves the right of employees to organize and bargain collectively when they wish to do so. The new law makes it unlawful for employers or unions to threaten or force workers to join or not to join unions.

FREE SPEECH

This act guarantees free speech to both employers and employees. Employers may say what they please as long as they do not threaten employees or try to bribe them with promises of benefits. Employees can express themselves on union matters without fear of either losing their job or being expelled from their union.

FINANCIAL REPORTS

Union workers will receive more information about their unions than they have in the past. A union must disclose the names of its principal officers and all other officials to whom it pays more than $5,000 a year. It must show how they are selected, and how much members pay in initiation fees and dues. It must make available to members financial statements showing how much money it received, the source, how it was spent, and how much it has on hand.

JURISDICTIONAL STRIKES

The new law makes jurisdictional strikes unfair labor practices. These strikes usually arise out of quarrels between unions. The innocent employer suffers through no fault of his own. In case a jurisdictional dispute is not settled within 10 days by the unions involved the Labor Board will settle it for them.

COMMUNIST SECTION

By forcing labor leaders to sign anti-Communist affidavits we expect to take virtually all of the power away from Communists in labor circles. For years these Communists have planned political strikes to stall our production. The time has come to call a halt to these serious walk-outs led by Communists. Many union leaders have been dismissed by their unions because they refused to sign these anti-Communist affidavits.

INDUSTRY-WIDE STRIKES WHICH THREATEN NATIONAL HEALTH AND SAFETY

If no agreement is reached in a major dispute, such as steel or coal, which might imperil the national health and safety, the President may appoint a board of inquiry to investigate the issues involved in a dispute and make a written report to him within such time as he shall prescribe. Such report shall include a statement of the facts with respect to the dispute, including each party's statement of its position. The President shall file a copy of such report with the Mediation Service and shall make its contents available to the public.
